

Areas of Landslides Blue Buttes Quadrangle, North Dakota

Edward C. Murphy

2010

UNIT DESCRIPTIONS

Geology Undifferentiated

QUATERNARY SYSTEM

RECENT/PLEISTOCENE

Landslide Deposits

Variable mixture of strata and deposits that have slid to the base of steep slopes. Many of the landslides in this area are hundreds, if not thousands, of years old.

Geologic Symbols

Known contact between two geologic units.

Other Features

State Highway

Unpaved Road

Landslides identified on this quadrangle were mapped from stereo pairs, black and white 1:20,000 scale aerial photographs flown between 6-6-58 and 9-7-58. As a result these maps can be used to identify areas that are vulnerable to slope failure, but are not an up to date assessment of all landslides for the area.
