

# Areas of Landslides

## Shell Creek Bay Quadrangle, North Dakota

**Edward C. Murphy**

**2010**

### UNIT DESCRIPTIONS

Geology Undifferentiated

#### QUATERNARY SYSTEM

##### RECENT/PLEISTOCENE

**Qls** Landslide Deposits

Variable mixture of strata and deposits that have slid to the base of steep slopes.

#### Geologic Symbols

Known contact between two geologic units.

#### Other Features

State Highway

Paved Road

Unpaved Road

Landslides identified on this quadrangle were mapped from stereo pairs, black and white 1:20,000 scale aerial photographs flown between 6-6-58 and 9-7-58. As a result these maps can be used to identify areas that are vulnerable to slope failure, but are not an up to date assessment of all landslides for the area.
