tort, contract, statutory or strict liability. Tenant shall defend at Tenant's cost, all such claims and suits brought against Landlord. The terms of the forgoing indemnities contained in Section 4.1 above and this Section 4.4 shall apply to any claims arising or accruing during the Term or at any time thereafter. The terms of Section 4.1 above and this Section 4.4 of the Lease shall survive any expiration or earlier termination of this Lease.

4.5 Except for access to the surface of Landlord's Property as set forth in this Lease, Tenant shall not have any other actual or implied rights or easements to utilize the surface or other rights in Landlord's Property for any purpose, including, but not limited to, any right to install injection or monitoring wells on the surface of Landlord's Property. Any such additional rights or easements shall be by express written agreement.

4.6 Landlord shall have no right, express or implied, to enter into the Premises for any reason. Any access to property rights below the Premises must be made laterally without penetration of the Premises.

4.7 Tenant shall hereafter pay all taxes, assessments, fees, and other charges levied by any governmental authority against Tenant's leasehold interest in the Premises.

4.8 If any suit or action is filed by either party against the other to enforce any of the provisions of this Lease, the prevailing party shall be entitled to recover reasonable costs and attorneys' fees incurred in the investigation of related matters and in preparation for and prosecution of such action as fixed by the court, and if any appeal or other form of review is taken from the decision of any court, reasonable costs and attorneys' fees as fixed by the court.

#### **ARTICLE 5: TENANT'S REPRESENTATIONS, WARRANTIES AND COVENANTS**

5.1 Taxes. Tenant shall pay any increase in the real property taxes levied against the Premises directly attributable to the injection and storage of Carbon Dioxide in the Premises, to the extent that such increase is not separately assessed to Tenant and paid directly by Tenant to the taxing authorities. Tenant shall not be liable for taxes attributable to any improvements to the Landlord's Property installed by Landlord or others on the Landlord's Property or to the underlying value of the Landlord's Property itself. It is a condition to Landlord's right to payment or reimbursement of any such increased taxes hereunder that Landlord submit the real property tax bill to Tenant within ten (10) days after Landlord received the bill from the taxing authority. Tenant shall have the right to pay its portion of the real property taxes directly to the taxing authority. Landlord shall pay its portion of the real property taxes, and if Landlord fails to do so, Tenant shall be entitled, but not obligated, to make payment in fulfillment of Landlord's obligations to the taxing authority and may offset the amount of such payments from any amounts due from Tenant to Landlord under this Agreement. Tenant shall, at Tenant's option, have the right to cause the Christian County Tax Assessor's office to issue a separate Accessor's Tax Parcel number for the Premises, and to have it assessed separately from the Landlord's Property. Landlord agrees to cooperate with Tenant to executed any consents or other documents needed to obtain that separate Accessor's Tax Parcel number for the Premises.

5.2 Insurance and Indemnity. Tenant shall maintain commercial general liability insurance insuring Tenant against loss caused by Tenant's use of the Premises under this Lease, in an amount not less than One Million Dollars (\$1,000,000.00) of combined single-limit coverage, and shall provide certificates of this insurance coverage to Landlord upon Landlord's written request. Actual limits of said policy shall be reasonable and proportional considering industry norms, project size, project scope and project development or operational status. At Landlord's request, Tenant, its successors or assigns, shall add Landlord as an additional named insured under the general liability policy, provided that Landlord pay any additional underwriting and other fees required by the insurance company to effectuate the change.

5.3 Requirements of Governmental Agencies. Tenant shall comply in all material respects with all valid laws applicable to CCS Facilities located on or under the Landlord's Property, but shall have the right, in its sole discretion and at its sole expense, in its name or in Landlord's name, to contest the validity or applicability of any law, ordinance, order.

rule or regulation of any governmental agency or entity. Tenant shall control any such contest and Landlord shall cooperate with Tenant in every reasonable way in such contest, at no out-of-pocket expense to Landlord.

5.4 Mechanics' Liens. Tenant shall not permit any mechanics' liens to be filed against the Premises as a result of Tenant's use of the Premises pursuant to this Lease. Tenant may reasonably contest any such lien by written notice to the liening party with copy to the Landlord. Tenant may also provide a bond, guarantee, or other form of security, or provide a title insurance commitment to insure over the lien, or remove such lien from the Premises pursuant to applicable law. Any lien filed against the Premises that is reasonably contested by Tenant, or for which Tenant has provided reasonable security, title insurance, or removal, within 120 days of receiving written notice of such lien shall not be considered a breach under this Lease.

5.5 Hazardous Materials. As used in this Lease, the term "Hazardous Materials" means petroleum, asbestos, polychlorinated biphenyls, radioactive materials, radon gas or any chemical, material or substance defined as or included in the definition of "hazardous substances," "hazardous wastes," "hazardous materials," "extremely hazardous waste," "restricted hazardous waste" or "toxic substances," or words of similar import, under any applicable laws, including, but not limited to, all Environmental Laws. For all purposes under this Lease, the term "Hazardous Materials" specifically excludes Carbon Dioxide, as defined in this Lease. As used in this Lease, the term "Environmental Laws" means all statutes, ordinances, orders, rules and regulations of all federal, state or local governmental agencies relating to the use, generation, manufacture, installation, handling, release, discharge, storage or disposal of Hazardous Materials, including, but not limited to, the Federal Water Pollution Act, as amended (33 U.S.C. § 1251 et seq.), the Resource Conservation and Recovery Act, as amended (42 U.S.C. § 6901 et seq.), the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended (42 U.S.C. § 9601 et seq.), and the Hazardous Materials Transportation Act, as amended (49 U.S.C. § 1801 et seq.). If Tenant places, disposes or releases any Hazardous Material onto the surface of Landlord's Property and such placement, disposal or release results in the contamination of the surface of Landlord's Property, then Tenant shall remediate such Hazardous Materials to the extent ordered to do so by a governmental authority with jurisdiction.

5.6 Tile Lines / Other Fixtures. Tenant shall not damage or destroy ground tile or other fixtures on the Landlord's Property unless necessary to exercise its rights under this Lease. If during the Term of this Lease ground tile or other fixtures are damaged or destroyed by Tenant's ingress and egress to and from the Landlord's Property under the terms of this Lease then Tenant shall repair or replace such tile lines or other fixtures, or pay to Landlord fair compensation for such losses or damage. Fair compensation shall mean actual cost for third party contractor to repair at the point of damage and to return the tile or fixture to its pre-damage condition.

## **ARTICLE 6: LANDLORD'S REPRESENTATIONS, WARRANTIES AND COVENANTS**

6.1 Landlord's Authority. Landlord is the sole owner of fee simple title to the Premises and has the unrestricted right and authority to sign this Lease and to grant Tenant the rights granted in this Lease. When signed by Landlord, this Lease constitutes a valid and binding agreement enforceable against Landlord in accordance with its terms. All persons having any ownership interest in the Premises and/or Landlord's Property (including spouses) are signing this Lease as Landlord.

6.2 No Interference. Landlord agrees that Tenant shall have the exclusive right to access and use the Premises, including, without limitation, the exclusive right to store Carbon Dioxide in the Premises. Landlord shall not interfere with, and shall not allow any other party to interfere with, disturb or hinder Tenant's use of the Premises for the purposes set forth in this Lease, during the Term or at all times thereafter. Landlord shall not conduct any activity, nor grant any rights to any third party, whether on the Premises, Landlord's Property or elsewhere, that would interfere in any way with Tenant's use of the Premises or the rights granted to Tenant under this Lease, during the Term or at all times thereafter. Landlord shall not grant or provide any easement, license, lease or other right for access across any portion of the Premises or Landlord's Property to any third party if the granting of such right by Landlord could result in interference with Tenant's use of the Premises during the Term or at any time thereafter. NOTHING HEREIN SHALL IN ANYWAY PROHIBIT LANDLORD, ITSELF OR THEMSELVES, FROM USING THE SURFACE OF THE

LANDLORD'S PROPERTY FOR ORDINARY AND CUSTOMARY CROP AND LIVESTOCK FARMING OR LEASING OR GRANTING RIGHTS TO THIRD PARTIES TO USE THE SURFACE FOR SUCH CROP AND LIVESTOCK FARMING PURPOSES. Following the Commencement of Construction (as hereinafter defined) the covenants and agreements contained in this Section 6.2 shall survive the expiration and any earlier termination of the Lease, and the covenants and agreements contained in this Section 6.2 shall touch, concern and run with the title to the Premises, and be binding upon Landlord and its heirs, executors, administrators, personal representatives, successors, successors-in-title and assigns.

6.3 Liens. Landlord shall cooperate with Tenant to obtain a nondisturbance agreement from each lienholder (recorded or unrecorded) which provides that the lienholder shall not hinder, disturb or interfere with Tenant's use, possession or enjoyment of the Premises, Landlord's Property, or Tenant's other rights, under this Lease, or terminate this Lease so long as Landlord is not entitled to terminate this Lease under its terms.

6.4 Requirements of Governmental Agencies; Rights-of-way. At no out-of-pocket cost to Landlord, Landlord shall assist and fully cooperate with Tenant (including signing in Landlord's name, if necessary) in applying for, complying with or obtaining any land use permits and approvals, building permits, environmental reviews or any other approvals required for the financing, construction, installation, replacement, relocation, maintenance, operation or removal of the CCS Facilities and using the Premises for the permanent storage of Carbon Dioxide.

6.5 Hazardous Materials. Landlord hereby represents and warrants to Tenant that: (i) there are no Hazardous Materials, abandoned wells, other than disclosed to Tenant in writing at the time of signing the Lease, solid waste disposal sites or underground storage tanks located on the Landlord's Property; (ii) the Landlord's Property and the Premises are not in violation of any Environmental Law; and (iii) the Landlord's Property and Premises are not subject to, and Landlord has no notice of, any judicial or administrative action, investigation or order under any Environmental Law. Landlord warrants that it has done nothing to contaminate the Landlord's Property or Premises with Hazardous Materials. Landlord agrees not to use, dispose of or release on the Landlord's Property or Premises, or cause or permit to exist or be used, stored, disposed of or released on the Landlord's Property or Premises, as a result of Landlord's operations, any Hazardous Materials. If Landlord breaches its warranty or representation, or if a release of a Hazardous Material is caused or permitted by Landlord or its agents, employees or contractors and results in contamination of the Landlord's Property or Premises, then Landlord shall indemnify, defend, protect and hold Tenant, and Tenant's employees, agents, partners, members, officers and directors, harmless from and against any and all claims, actions, suits, proceedings, losses, costs, damages, liabilities (including without limitation sums paid in settlement of claims), deficiencies, fines, penalties or expenses (including, without limitation, reasonable attorneys' fees and consultants' fees, investigation and laboratory fees, court costs and litigation expenses) which arise during or after the Term as a result of such breach or contamination. This indemnity shall include, without limitation, and Landlord shall pay all costs and expenses relating to: (i) any claim, action, suit or proceeding for personal injury (including sickness, disease or death), property damage, nuisance, pollution, contamination, spill or other effect on the environment; (ii) any investigation, monitoring, repair, clean-up, treatment or detoxification of the Landlord's Property and Premises; and (iii) the preparation and implementation of any closure plan, remediation plan or other required action in connection with the Landlord's Property and Premises.

6.6 Exclusivity. Tenant shall have the sole and exclusive rights to use, install and operate any improvements or facilities related to the Premises, including, without limitation, the CCS Facilities. In no event during the Term shall Landlord construct, build or locate, or allow others to construct, build or locate, any improvements or facilities on the Landlord's Property during the Term, or at any time thereafter, that could affect the Premises or Tenant's use of the Premises for the permanent sequestration of Carbon Dioxide, including, without limitation, any CCS Facilities, Carbon Dioxide injection wells, Carbon Dioxide monitoring wells, or any other wells on the Landlord's Property. Following the Commencement of Construction, the covenants and agreements contained in this Section 6.6 shall survive the expiration and any earlier termination of the Lease, and the covenants and agreements contained in this Section 6.6 shall touch, concern and run

with the title to the Premises, and be binding upon Landlord and its heirs, executors, administrators, personal representatives, successors, successors-in-title and assigns.

6.7 Operation of the CCS Facilities. Landlord covenants and agrees that Tenant's use of the Premises for the storage of Carbon Dioxide and the operation of the CCS Facilities, on the Premises or elsewhere, shall not constitute a nuisance.

#### **ARTICLE 7: ASSIGNMENT AND SUBLETTING; EASEMENTS AND LICENSES; NEW, REVISED OR MODIFIED LEASE OR LEASES**

7.1 Assignment and Subletting, Easements and Licenses. Tenant may assign all or any portion of this Lease or its rights under this Lease or sublet all or any part of the Premises or the CCS Facilities without obtaining the consent of Landlord. Without limiting the generality of the foregoing, a foreclosure and sale by a Leasehold Mortgagee pursuant to Section 8 shall be a permitted assignment. In the event of an assignment of Tenant's entire interest in this Lease, Tenant shall be released of all further liability under this Lease. If Tenant shall have subleased or assigned all or a portion of the Premises or the CCS Facilities, no such sublease or assignment shall be affected by a cancellation or termination of this Lease, and Landlord shall recognize the rights of the subtenant or assignee thereunder, provided only that such subtenant or assignee attorn to Landlord upon its request. Landlord shall enter into a nondisturbance and attornment agreement, in form and substance reasonably acceptable to Tenant, upon the request of the subtenant or assignee under any sublease or assignment. Tenant also shall have the right to grant sub-easements, sub-licenses or similar rights (however denominated) to one or more persons or entities, without obtaining the consent of Landlord. If Tenant shall have subleased or assigned all or a portion of the Premises or the CCS Facilities, such assignee or subtenant shall have the right, but not the obligation, to cure any and all defaults of Tenant under this Lease during the longer of Tenant's cure periods under Section 9.3 or Leasehold Mortgagee's cure periods under Section 8.2, and if such assignee or subtenant cures or causes to be cured any default, such cure shall be as effective as if done by Tenant.

#### **ARTICLE 8: LEASEHOLD FINANCING**

8.1 Mortgage By Tenant. Tenant, subtenant or assignee may, from time to time, without the consent of Landlord, hypothecate, mortgage, pledge or alienate the CCS Facilities and/or Tenant's, subtenant's or assignee's leasehold estate and rights under this Lease. Each holder of any such lien is hereinafter referred to as a "Leasehold Mortgagee." For purposes of this Section 8 and Section 9, the term Tenant shall include a subtenant or assignee under Section 7. A Leasehold Mortgagee or its assigns may enforce such lien and acquire title to the leasehold estate in any lawful way and, pending foreclosure of such lien, the Leasehold Mortgagee may take possession of and use and operate the Premises, CCS Facilities and Tenant's Leasehold interest in the Premises, performing all obligations performable by Tenant that are capable of performance by the Leasehold Mortgagee. Upon foreclosure of such lien by power of sale, judicial foreclosure or acquisition of the leasehold estate by deed in lieu of foreclosure, the Leasehold Mortgagee may, upon notice to Landlord, sell and assign the leasehold estate to any transferee. Notwithstanding anything herein contained to the contrary, the Leasehold Mortgagee and/or any person or entity acquiring the leasehold estate shall be liable to perform the obligations imposed on Tenant by this Lease only to the extent arising during the period during which such person or entity holds title to the leasehold estate of Tenant or is making use of the Premises for the continuing storage of Carbon Dioxin in the Premises following such foreclosure or transfer in lieu of foreclosure.

#### **8.2 Rights of Leasehold Mortgagees.**

(a) The right of a Leasehold Mortgagee to receive notices and to cure Tenant's defaults pursuant to the provisions of this Section 8.2 shall be available only to those Leasehold Mortgagees which shall have notified Landlord in writing of their name and address, or whose lien is recorded in the official records of the County in which the Premises are located, regardless of whether the specific provision in question expressly so states. Tenant shall undertake reasonable efforts to

notify Landlord of the identity and notice address for any Leasehold Mortgagee, but failure to do so shall not be considered a default hereunder. When giving notice to Tenant of Tenant's default under this Lease, Landlord shall also serve a copy of such notice upon each Leasehold Mortgagee. No such notice shall be effective against a Leasehold Mortgagee unless and until served on such Leasehold Mortgagee. If Tenant shall default in the performance of any of its obligations under this Lease, then Landlord shall give each Leasehold Mortgagee a second written notice of such default and each Leasehold Mortgagee shall have the right, within thirty (30) days after the expiration of the cure period which this Lease provides to Tenant for curing such default, to cure such default and Landlord shall accept such performance as though the same had been done or performed by Tenant. Leasehold Mortgagee shall have no duty to exercise any cure rights granted hereunder or to foreclose on Tenant's interest in the Lease. In no event shall Leasehold Mortgagee be liable to Landlord for any action taken by it or on its behalf in good faith during the cure period notwithstanding that such action may prove in whole or in part to be inadequate or invalid. In the event a Leasehold Mortgagee shall elect to exercise its rights hereunder, such Leasehold Mortgagee shall have no personal liability to the Landlord and the sole recourse of the Landlord in seeking enforcement of its obligations under this Lease or any new lease entered pursuant to Section 8.2 (d) shall be to such Leasehold Mortgagee's interest in the Lease and Premises.

(b) In the case of a default by Tenant in the payment of money, Landlord shall take no action to terminate this Lease unless such default shall have continued beyond the cure period which this Lease provides to Tenant for curing such default, and then only after Landlord shall have given each Leasehold Mortgagee a second written notice of such default and an additional thirty (30) days, in addition to and after the expiration of Tenant's cure period, within which to cure such default,

(c) In the case of a non-monetary default by Tenant, Landlord shall take no action to terminate this Lease unless such default shall have continued beyond the cure period which this Lease provides to Tenant for curing such default, and then only after Landlord shall have given each Leasehold Mortgagee a second written notice of such default and an additional thirty (30) days, in addition to and after the expiration of Tenant's cure period, within which to elect:

(i) to commence and diligently proceed to cure such default, if such default can be cured by the Leasehold Mortgagee without obtaining possession of the Premises; or

(ii) to commence and diligently proceed to obtain possession of the Premises (including possession by a receiver) in order to cure such default, in the case of a default which can be cured only after the Leasehold Mortgagee has obtained possession of the Premises; or

(iii) to institute and diligently pursue foreclosure proceedings or otherwise proceed to acquire Tenant's interest under this Lease. A Leasehold Mortgagee shall not be required to continue such possession or continue such foreclosure proceedings if the default which prompted the service of such notice shall have been cured. A Leasehold Mortgagee shall have no obligation to cure any default in the payment of money which has occurred more than sixty (60) days before its receipt of notice of such default, in order to preserve its interest under its mortgage or to exercise any of the rights granted to it under this Lease. A Leasehold Mortgagee shall have no obligation to cure any default which is not reasonably susceptible of being cured by the Leasehold Mortgagee.

(d) If this Lease is terminated by Landlord on account of any default, or terminates for any other reason, including without limitation a rejection of the Lease by a trustee or debtor-in-possession in any bankruptcy or insolvency proceeding, then Landlord shall give prompt written notice thereof to each Leasehold Mortgagee. Each Leasehold Mortgagee, within sixty (60) days after receipt of written notice from Landlord, shall have the right to elect to enter into a new lease of the Premises as described below. Within thirty (30) days after receiving a Leasehold Mortgagee's written request therefore, Landlord shall execute and deliver a new lease of the Premises to such Leasehold Mortgagee or its nominee or to the purchaser, assignee or transferee, as the case may be, for the remainder of the Term of this Lease, containing the same covenants, agreements, terms, provisions and limitations as are contained in this Lease, except that

such new lease shall reflect any prepaid rent paid by Tenant, and the Leasehold Mortgagee shall not have to pay again any such prepaid rent, all of which shall be deemed to have been paid by the Leasehold Mortgagee. After execution of the new lease, the Leasehold Mortgagee shall commence and diligently proceed to cure all defaults which reasonably can be cured by the Leasehold Mortgagee.

(e) As long as there is a Leasehold Mortgage, neither the bankruptcy nor the insolvency of Tenant shall operate to terminate, nor permit Landlord to terminate, this Lease as long as all charges payable by Tenant continue to be paid in accordance with the terms of this Lease. As long as there is a Leasehold Mortgagee, Landlord and Tenant shall not modify or cancel this Lease without the consent of the Leasehold Mortgagee, which consent shall not unreasonably be withheld.

(f) The time available to a Leasehold Mortgagee to initiate foreclosure proceedings as aforesaid shall be extended by the number of days of delay occasioned by judicial restriction against such initiation or occasioned by other circumstances beyond such Leasehold Mortgagee's reasonable control.

(g) During the period that a Leasehold Mortgagee shall be in possession of the Premises and/or during the pendency of any foreclosure proceedings instituted by a Leasehold Mortgagee, the Leasehold Mortgagee shall pay or cause to be paid all charges payable by Tenant which have accrued during said period and are unpaid. Following the acquisition of Tenant's leasehold estate by the Leasehold Mortgagee or its designee, either as a result of foreclosure or acceptance of an assignment in lieu of foreclosure, the Leasehold Mortgagee or party acquiring title to Tenant's leasehold estate shall commence performing all of Tenant's obligations under this Lease thereafter arising, whereon Landlord's right to terminate this Lease based upon the default in question shall be deemed waived. Any default not susceptible of being cured by the Leasehold Mortgagee or party acquiring title to Tenant's leasehold estate shall be deemed to have been waived by Landlord upon completion of the foreclosure proceedings or acquisition of Tenant's interest in this Lease by any purchaser (who may, but need not be, the Leasehold Mortgagee) at the foreclosure sale, or who otherwise acquires Tenant's interest from the Leasehold Mortgagee or by virtue of a Leasehold Mortgagee's exercise of its remedies. No such purchaser, or successor to such purchaser, shall be liable to perform the obligations imposed on Tenant by this Lease incurred or accruing after such purchaser or successor no longer holds a leasehold interest, estate or possession of the Premises.

(h) If two or more Leasehold Mortgagees exercise their rights hereunder and there is a conflict which renders it impossible to comply with all such requests, then the Leasehold Mortgagee whose Leasehold Mortgage would be senior in priority if there were a foreclosure shall prevail. If any Leasehold Mortgagee pays any sums due hereunder which relate to periods other than during its actual ownership of the leasehold estate, such Leasehold Mortgagee shall be subrogated to any and all rights which may be asserted against Landlord with respect to such period of time.

(i) Upon the notice and request to Landlord from any Leasehold Mortgagee, Landlord and Tenant shall amend this Lease to include any provision reasonable requested by such Leasehold Mortgagee to implement the protective provisions contained in this Lease for the benefit of such Leasehold Mortgagee or to allow such Leasehold Mortgagee reasonable means to protect or preserve the lien of its Leasehold Mortgage on the occurrence of a default under this Lease; provided, however, that Landlord shall not be required to amend this Lease in any way which would adversely affect the Term or monetary charges to be paid by Tenant to Landlord hereunder or otherwise in any material respect adversely affect any rights or remedies of Landlord under this Lease.

#### **ARTICLE 9: DEFAULT AND TERMINATION**

9.1 **Surrender and Post Termination Monitoring.** Upon the expiration of the Term or proper termination of the Lease pursuant to the express terms of this Lease, whichever occurs first, Tenant shall surrender the Premises to Landlord in its then current condition, and Landlord and Tenant shall mutually execute and publicly record a Termination of Memorandum Agreement, that shall (i) confirm in the public records the termination of the Lease, (ii) memorialize in the public records Tenant's right to perform the Post Termination Monitoring (as defined below), (iii) include a notice

of the Premises being used for the permanent storage of Carbon Dioxide contained in the Premises, and (iv) include a notice to all future owners, tenants, subtenants and other users or parties acquiring any right, title or interest in the Premises and the surface above the Premises that any and all drilling or extraction that will or could penetrate into the Premises is prohibited, to ensure the permanence of the stored Carbon Dioxide at all times following the Term. In each case, upon any expiration or earlier termination of this Lease, Tenant shall have no obligation to remove any Carbon Dioxide from the Premises, and Landlord hereby agrees to accept the surrender of the Premises subject to any existing Carbon Dioxide located on or in the Premises. Additionally, Landlord covenants and agrees on behalf of itself and its heirs, executors, administrators, personal representatives, successors, successors-in-title and assigns, to not take, or permit others to take, any actions or omissions that could cause the release of any Carbon Dioxide permanently sequestered in the Premises or the Storage Unit that includes the Premises. Landlord agrees that Tenant and its agents, employees, contractors and subcontractors shall have the right, following the expiration or earlier termination of the Term of the Lease, to go upon the surface of the Landlord's Property to perform all work to monitor the Carbon Dioxide sequestered in the Premises and the Storage Unit that includes the Premises, for a period of fifty (50) years following the expiration or earlier termination of the Term of this Lease, or any longer period as required by any governmental authority, agency, industry practice or as required by applicable law (collectively the "Post Termination Monitoring"). Following the Commencement of Construction, the covenants and agreements contained in this Section 9.1 shall survive the expiration and any earlier termination of the Lease, and the covenants and agreements contained in this Section 9.1, shall touch, concern and run with the title to the Premises, and be binding upon Landlord and its heirs, executors, administrators, personal representatives, successors, successors-in-title and assigns.

9.2 Remedies Upon Landlord's Default. If Landlord shall at any time be in default of any of its covenants under this Lease and such default shall continue for a period of thirty (30) days after written notice to Landlord (or if any non-monetary default is not reasonably capable of being cured within thirty (30) days, if Landlord has not commenced to cure the same within said 30-day period and has not diligently prosecuted the same to completion within a reasonable period of time), then Tenant shall be entitled to exercise concurrently or successively any one or more of the following rights and remedies, in addition to all other remedies provided in this Lease or available at law or in equity: (i) to bring suit for the collection of any amounts for which Landlord may be in default, or for the specific performance of any other covenant or agreement of Landlord, without terminating this Lease; (ii) exercise Tenant's right to self-help and remedy the default itself, all at the cost and expense of the Landlord, and/or (iii) to terminate this Lease upon thirty (30) days' written notice to Landlord, without waiving Tenant's rights to damages for Landlord's failure to perform its obligations hereunder. If Tenant elects to terminate this Lease, then Landlord shall pay to Tenant any and all rent and other charges that Tenant shall have prepaid, to the extent relating to the period after the effective date of such termination.

9.3 Remedies Upon Tenant's Default. Tenant shall be in default under this Lease only if: (i) Tenant shall have failed to pay any monetary charges required to be paid by Tenant and such failure shall have continued for a period of thirty (30) days after written notice from Landlord; or (ii) Tenant shall have failed to perform any of Tenant's covenants under this Lease (other than the payment of monetary charges) and such failure shall have continued for a period of sixty (60) days after written notice from Landlord (or if such failure is not reasonably capable of being cured within sixty (60) days, if Tenant shall not have commenced to cure the same within said 60-day period and/or shall not have diligently prosecuted the same to completion within a reasonable period of time). If Tenant shall be in default after the expiration of the cure period set forth above, then Landlord shall be entitled, at its election, to terminate this Lease, (subject, however, to the rights of sublessees pursuant to Section 7 and Leasehold Mortgagees pursuant to Section 8) or, so long as Landlord does not terminate Tenant's right to possession of the Premises, keep this Lease in full force and effect and collect all charges from Tenant as and when due under this Lease, with Landlord having the obligation to mitigate damages. If Landlord terminates this lease in accordance with this Section 9.3, then all rights and obligations of the parties shall terminate, except that i) Landlord shall have the right to collect all amounts with respect to which Tenant shall then be in default, and all damages to Landlord by reason of such default, Landlord having the obligation to mitigate damages, and ii) Tenant shall surrender the Premises to Landlord as provided in, and subject to the terms of, Section 9.1 above.

9.4 Damages. NOTWITHSTANDING ANYTHING TO THE CONTRARY IN THIS LEASE, NEITHER PARTY SHALL BE ENTITLED TO, AND EACH OF LANDLORD AND TENANT HEREBY WAIVES ANY AND ALL RIGHTS TO RECOVER, CONSEQUENTIAL, INCIDENTAL, AND PUNITIVE OR EXEMPLARY DAMAGES, HOWEVER ARISING, WHETHER IN CONTRACT, IN TORT, OR OTHERWISE, UNDER OR WITH RESPECT TO ANY ACTION TAKEN IN CONNECTION WITH THIS LEASE.

9.5 Waiver of Jury Trial. EACH OF THE PARTIES KNOWINGLY, VOLUNTARILY AND INTENTIONALLY WAIVES THE RIGHT TO A TRIAL BY JURY IN RESPECT OF ANY LITIGATION BASED ON THIS LEASE, OR ARISING OUT OF, UNDER OR IN CONNECTION WITH THIS LEASE AND ANY AGREEMENT CONTEMPLATED TO BE EXECUTED IN CONJUNCTION HERewith, OR ANY COURSE OF CONDUCT, COURSE OF DEALING, STATEMENTS (WHETHER VERBAL OR WRITTEN) OR ACTIONS OF ANY PARTY HERETO IN CONNECTION WITH OR ARISING OUT OF THIS LEASE OR SUCH AGREEMENTS. EACH OF THE PARTIES TO THIS LEASE WAIVES ANY RIGHT TO CONSOLIDATE ANY ACTION IN WHICH A JURY TRIAL HAS BEEN WAIVED WITH ANY OTHER ACTION IN WHICH A JURY TRIAL CANNOT OR HAS NOT BEEN WAIVED. THIS PROVISION IS A MATERIAL INDUCEMENT TO EACH OF THE PARTIES FOR ENTERING INTO THIS LEASE.

#### ARTICLE 10: CONDEMNATION

10.1 Effect of Condemnation. If eminent domain proceedings are commenced against all or any portion of the Premises, and the taking would, as determined by Tenant in its sole discretion, prevent or adversely affect Tenant's installation or operation of the CCS Facilities or the Project making use of the Premises for storage of Carbon Dioxide, then, at Tenant's option, the parties shall either amend this Lease to reflect any necessary reductions in the size and scope of the Premises which will preserve the value and benefit of the Lease to Tenant, together with any corresponding reductions and equitable adjustments in payments, or, at Tenant's election, this Lease shall terminate in which event neither party shall have any further duties, obligation or liabilities under this Lease following the effective date of such termination, whereupon Tenant shall surrender the Premises to Landlord subject to the terms of Section 9.1 above.

10.2 Condemnation Proceeds. All payments made by a condemning authority on account of a taking by eminent domain of all or any part of the Premises shall be the property of the Tenant. Tenant shall have the right to participate in any condemnation proceedings.

#### ARTICLE 11: MISCELLANEOUS

11.1 Force Majeure. If performance of this Lease or of any obligation hereunder is prevented or substantially restricted or interfered with by reason of an event of "Force Majeure" (as defined below), the affected party, upon giving notice to the other party, shall be excused from such performance to the extent of and for the duration of such prevention, restriction or interference. The affected party shall use its reasonable efforts to avoid or remove such causes of nonperformance and shall continue performance as soon as such causes are removed. "Force Majeure" means: fire, earthquake, flood, tornado, pandemic (including, without limitation, Covid 19 or any variant thereof) or other acts of God and natural disasters; strikes or labor disputes; war, civil strife or other violence; any law, order, proclamation, regulation, ordinance, action, demand or requirement of any government agency or utility; or any other act or condition beyond the reasonable control of a party.

11.2 Confidentiality. Landlord shall maintain in the strictest confidence all information pertaining to the terms and conditions of this Lease, including, without limitation, the financial terms of this Lease, Tenant's engineering, methods of construction, operation and use of the Premises, Tenant's CCS Facility and/or the Project. Landlord shall not use such information for its own benefit, publish or otherwise disclose it to others, or permit its use by others. Notwithstanding the foregoing, Landlord may disclose such information to Landlord's lenders, attorneys, accountants and other personal financial advisors solely for use in connection with their representation of Landlord regarding this Lease; any

prospective purchaser of the Landlord's Property and Premises who has made a written offer to purchase or otherwise acquire the Landlord's Property and Premises that Landlord desires to accept; or pursuant to lawful process, subpoena or court order requiring such disclosure, provided Landlord in making such disclosure advises the party receiving the information of the confidentiality of the information and obtains the written agreement of said party not to disclose the information, which agreement shall run to the benefit of and be enforceable by Tenant and any assignee or transferee of Tenant, as a third party beneficiary of such agreement. The provisions of this Section 11.2 shall survive the termination or expiration of this Lease.

11.3 Terms and Conditions of Lease Run with the Land: Binding Effect. All of the terms, agreements, covenants and conditions stated in this Lease and any Leases hereto (i) attach to, burden, encumber and run with the title to the Premises and Landlord's Property, (ii) inure to the benefit of Landlord and Tenant, and their respective heirs, executors, administrators, personal representatives, successors, successors-in-title, assigns, permittees, licensees, lessees, sublessees, agents and employees, and (iii) shall be enforceable by Landlord and Tenant, and their respective heirs, executors, administrators and personal representatives, successors, successors-in-title, assigns, permittees, licensees, lessees, sublessees, agents and employees. Such parties may institute or prosecute any proceedings at law or in equity against any person or entity who violates or threatens to violate the provisions of this Lease, and if successful, to be entitled to recovery of costs and reasonable attorneys' fees. The failure of any party to enforce any right under the provisions of this Lease shall not be deemed a waiver of the right to do so thereafter or to enforce any other provision of this Lease.

11.4 Memorandum of Lease. Landlord and Tenant shall execute in recordable form, and Tenant shall record in the official records or land records of the County in which the Premises are located, a memorandum of this Lease satisfactory in form and substance to Tenant. Landlord consents to the recordation of the interest of Tenant, and any Leasehold Mortgagee or assignee of Tenant's interest in this Lease.

11.5 Notices. All notices pursuant to this Lease shall be in writing and shall be sent only by the following methods: personal delivery; United States Mail (first-class, certified, return-receipt requested, postage prepaid); or delivery by a national, overnight courier service which keeps records of deliveries (such as, by way of example but not limitation, Federal Express and United Parcel Service). For purposes of giving notice hereunder, the respective addresses of the parties are, until changed as hereinafter provided, the following:

Landlord:	Tenant:
	Plus a copy to:

Any party may change its address at any time by giving written notice of such change to the other party in the manner provided herein. All notices shall be deemed given on the date of personal delivery or, if mailed by certified mail, on the delivery date or attempted delivery date shown on the return-receipt.

**11.6 Entire Agreement/Amendments.** This Lease and the attached Addenda and Leases constitute the entire agreement between Landlord and Tenant respecting its subject matter, and replace and supersede any prior agreements, letters of intent, term sheets or other agreements, written or verbal. This Lease shall not be modified or amended except in a writing signed by both parties or their lawful successors in interest.

**11.7 Construction and Interpretation.** The headings of the Articles and Sections of this Lease are not a part of this Lease and shall have no effect upon the construction or interpretation of any part thereof. Unless the context requires otherwise, references in this Lease to Articles, Sections, subsections or Leases refer to the Articles, Sections, subsections and Leases of this Lease. Unless the context requires otherwise, references to a "party" or "parties" refer to Landlord or Tenant, or both, as the context may require. The word "including" shall be construed in its inclusive sense, and not in limitation, whether or not language of non-limitation (such as "without limitation") is used with reference thereto. References to a "month" or "months" refer to whole or partial calendar months during the Term. All provisions of this Lease have been negotiated by Landlord and Tenant at arms' length and neither party shall be deemed the scrivener of this Lease. This Lease shall not be construed for or against either party by reason of the authorship or alleged authorship of any provision hereof or by reason of the status of the respective parties as Landlord or Tenant.

**11.8 Tax and Environmental Credits.** Tenant shall be exclusively entitled to apply for, collect, receive, and obtain the benefit of all credits, set-offs, payments or other consideration arising out of the nature of Tenant's use of the Premises, from any the use of the CCS Facilities or the transportation and storage of Carbon Dioxide, including, without limitation, (i) federal, state and local carbon tax credits, production incentive payments and other renewable energy credits, (ii) green pricing programs, green tags, renewable energy credit trading programs, and (iii) environmental credits of any kind or nature, environmental set-offs and similar benefits. Landlord shall reasonably assist Tenant in applying for and receiving such credits and benefits, and Landlord agrees to amend this Lease or replace with a different instrument at the request of Tenant if such action would assist Tenant in applying for and receiving such credits or benefits, provided that such action would not reduce the rent.

**11.9 Personal Property.** Landlord acknowledges that the CCS Facilities and Carbon Dioxide shall be owned by Tenant (or Tenant's subtenant or assignee, as the case may be) and acknowledges and agrees that Landlord shall have no lien or claims of any nature now or hereafter in or to any of the CCS Facilities or the Carbon Dioxide. Landlord acknowledges that the CCS Facilities and Carbon Dioxide shall remain personal property (and not fixtures) owned by Tenants, notwithstanding the manner or mode of injection or attachment to the property where located, and that, notwithstanding the occurrence of an event of default under the Lease beyond all applicable notice and cure periods (including those granted to any Leasehold Mortgagee), Leasehold Mortgagee (or its designee) or Tenant may remove the CCS Facilities.

**11.10 Estoppel Certificates.** From time to time, each party, within fifteen (15) days after written request from the other party, shall execute and deliver an estoppel certificate certifying as to the status of this Lease and each party's performance thereunder.

**11.12 Quiet Enjoyment.** Landlord covenants and warrants that Landlord is the true and lawful sole owner of fee simple title to the Premises and has full right and power to lease the Premises. Landlord agrees that Tenant shall quietly and peaceably hold, possess and enjoy the Premises for the Term of this Lease, and any extension thereof, without any hindrance or molestation. Landlord shall defend title to the Premises and the use and occupancy of the same against the claims of all persons, except those claiming by or through Tenant. Landlord shall not enter into or modify any documents, including any declarations, easements, restrictions or other similar instruments, that are or may be recorded against the Premises, or otherwise affect the Premises, or the rights or obligations of Tenant, without first obtaining the prior written consent of Tenant, which consent may be withheld in Tenant's sole and absolute discretion.

11.13 No Partnership. Nothing contained in this Lease (including the method of computation of any rental payments) shall be deemed or construed by the parties or by any third person to create the relationship of principal and agent, partnership, joint venture or any other association between Landlord and Tenant, other than the relationship of landlord and tenant.

11.14 Governing Law. This Lease shall be construed and enforced in accordance with the laws of the State of Illinois.

11.15 Non-Waiver. No delay or failure by Landlord or Tenant to enforce or exercise any of their respective rights or remedies hereunder shall constitute a waiver of such right or remedy, nor shall any single or partial exercise of a right or remedy preclude any other or further exercise of rights or remedies.

11.16 Severance. If any provision of this Lease, except the Lease Term stated in Article 1, shall be determined by any court of competent jurisdiction to be invalid, void or unenforceable to any extent, the remainder of this Lease or the application of such provision to such person or circumstances, other than those as to which it is so determined invalid, void or unenforceable, shall not be affected thereby, and each provision hereof shall be valid and shall be enforced to the fullest extent permitted by law.

If the Lease term stated in Article 1 is determined to be invalid, void or otherwise unenforceable by a court of competent jurisdiction, due to conflict or inconsistency with any statutory limitation or prohibition, the lease term shall be revised and reformed to the maximum length consistent with the statutory period and commence from the original Effective Date of this lease. Landlord and Tenant understand and agree that project development, from commencement to commercial operation, is a complex, expensive and time-consuming process. If the Lease Term is revised or reformed pursuant to this paragraph to a term length that is less than the length of Term that Tenant determines is required to complete project development and commercial operation, Landlord and Tenant agree to execute a new lease and Memorandum thereof (acknowledged in the presence of a Notary Public), upon written request by Tenant containing a revised Term acceptable to Tenant prior to the expiration of the revised or reformed Lease Term. The new lease shall include a Lease Term sufficient, in Tenant's judgement, to complete development and operation of the CCS Facilities sufficient for Tenant's use and the financial success of the Project.

11.17 Grant of Easement Rights for Use of Premises. If at any time during the Term severance of the strata identified herein as the "Premises" is prohibited by statute or other applicable law, then in consideration for Tenant's agreement to continue pay the Operating Rent to Landlord, the Landlord shall execute and deliver to Tenant a perpetual, exclusive and irrevocable easement granting to Tenant the right to store and sequester Carbon Dioxide in the Premises, and granting to Tenant all of the other rights and remedies with respect to the Premises contained in this Lease.

11.18 Further Assurances. From time to time at and after the execution of this Lease, each party, at its expense and without further consideration, shall execute, acknowledge and deliver to the other party such instruments and documents, and take such other actions, in addition to the instruments, documents and actions specifically provided for herein, as such other party may reasonably request in order to effectuate the provisions of this Lease, consummate the transactions contemplated herein, or confirm or perfect any right, restriction or interest to be created or transferred hereunder or pursuant to these transactions.

11.19 Definitions. For all purposes under this Lease, the following terms shall have the following meanings:

(a) The term "storage," "storage facility," "Storage Unit," and terms of similar import, shall mean and refer to the permanent and perpetual sequestration of Carbon Dioxide in the subsurface Premises, and (i) Tenant shall have no duty or obligation to ever remove any Carbon Dioxide injected into the Premises or any Storage Unit that includes the Premises,

and (ii) Landlord, and anyone claiming title to or use of the Premises shall not take any actions or omit to take any actions, during the Term of this Lease and at any time after the expiration or any earlier termination of this Lease, that could cause the release or removal of any Carbon Dioxide injected into the Premises or any Storage Unit that includes the Premises.

(b) The term "Premises," "premises," and terms of similar import shall mean the deep subsurface strata underlying the surface of the Property identified and described in Exhibit A attached hereto and made a part hereof. The Premises does not include the surface of the Property; provided, however, that Tenant shall have the right to go on and use the surface of the Property for the limited uses and purposes expressly set forth in this Lease.

(c) The term "Commencement of Construction" and terms of similar import shall mean that the commencement of the construction of any CCS Facilities (including, but not limited to, the commencement of the construction of any of the injection wells, monitoring wells, or any portion of the pipeline for purposes of transmitting Carbon Dioxide to any of said injection wells), whether or not those CCS Facilities are located on the Property.

11.20 Special Considerations. A list of Special Considerations is attached to this Lease as Exhibit B and made a part hereof (the items listed in Exhibit B are herein sometimes collectively referred to as the "Special Considerations"). The Special Considerations amend the terms of this Lease and any Leases to this Lease affected by the Special Considerations. In the event of a conflict between the terms of the form of this Lease or the Leases attached hereto, on the one hand, and the terms of the Special Considerations, on the other hand, the terms of the Special Considerations shall control.

11.21 Counterparts and Execution and Delivery by Facsimile or Electronic Transmission. This Lease may be executed in multiple counterparts, each of which shall be deemed an original, but all of which, together, shall constitute one and the same instrument. Furthermore, this Lease may be executed and delivered by facsimile or electronic transmission. The parties intend that faxed or electronic (e.g. pdf. format) signatures constitute originals signatures and that a faxed or electronic copy or counterparts of this Lease containing signatures (original, faxed or electronic) of a party is binding upon that party. Each signature page to any counterpart of this Lease may be detached from such counterpart without impairing the legal effect of the signatures thereon and thereafter attached to another counterpart of this Lease identical thereto except having attached to it additional signature pages.

11.22 Authority and Execution. Each person executing this Lease on behalf of a party represents and warrants that such person is duly and validly authorized to do so on behalf of the entity it purports to bind and that such entity has the full right and authority to enter into this Lease and perform all of its obligations hereunder.

IN WITNESS WHEREOF, the parties hereto have executed this Lease on the day and year as set forth above

**HEARTLAND  
GREENWAY**

Dear [REDACTED]

***RE: Heartland Greenway Carbon Capture Project Revised Offer***

Heartland Greenway has revised its offer to landowners to purchase Deep Storage rights. We are now offering the following to all landowners within the project footprint:

- 1) Initial Option Payment has been increased to \$100 per acre to sign a four-year option agreement.
- 2) We are offering an additional \$25 per acre for those who sign by April 30, 2022.
- 3) Exercise of Option Payment has been raised to \$400 per acre.

As requested by the Landowners, please find enclosed the new Lease Agreement. Should you have any questions or concerns, please contact me on my mobile phone (310) 944-5366 or email me at [dtpadegimas@tenaska.com](mailto:dtpadegimas@tenaska.com).

Sincerely,

**Daria T. Padegimas**  
Senior Land Agent

## SURFACE USE AND PORE SPACE LEASE

THIS SURFACE USE AND PORE SPACE LEASE ("**Lease**") is made, entered into, and effective as of the \_\_\_\_ day of \_\_\_\_\_, 2023 ("**Effective Date**") by and between \_\_\_\_\_, whose address is \_\_\_\_\_ (whether one or more, "**Lessor**"), and \_\_\_\_\_, a Florida limited liability company, whose address is 3437 iris Ct, Boulder, CO 80304 (whether one or more, "**Lessee**"). Lessor and Lessee are sometimes referred to in this Lease individually as a "**Party**" and collectively as the "**Parties**."

**1. DEFINITIONS.** The following terms shall have the following meanings in this Lease:

"**Carbon Dioxide**" means carbon dioxide in gaseous, liquid, or supercritical fluid state together with incidental associated substances derived from the source materials, capture process and any substances added or used to enable or improve the injection process.

"**Commencement of Operations**" means the date on which Carbon Dioxide is first injected into a Reservoir for commercial operations under this Lease, provided that the performance of test injections and related activities shall not be deemed Commencement of Operations.

"**Commission**" means the North Dakota Industrial Commission.

"**Completion Notice**" means a certificate of project completion issued to Lessee by the Commission pursuant to Chapter 38-22 of the North Dakota Century Code.

"**Environmental Attributes**" means any and all credits, benefits, emissions reductions, offsets, and allowances, howsoever entitled, attributable to the Operations, including any avoided emissions and the reporting rights related to these avoided emissions, such as 26 U.S.C. §45Q Tax Credits.

"**Environmental Incentives**" means any and all credits, rebates, subsidies, payments or other incentives that relate to the use of technology incorporated into the Operations, environmental benefits of Operations, or other similar programs available from any regulated entity or any Governmental Authority.

"**Facilities**" means all facilities, structures, improvements, fixtures, equipment, and any other personal property at any time acquired or constructed by or for Lessee that are necessary or desirable in connection with any use of Reservoirs and their Formations or Operations, including without limitation wells, pipelines, roads, utilities, metering or monitoring equipment, and buildings.

"**Financing Parties**" means person or persons providing construction or permanent financing to Lessee in connection with construction, ownership, operation and maintenance of Facilities or Operations, including financial institutions, leasing companies, institutions, tax equity partners, joint venture partners and/or private lenders.

"**Formation**" means the geological formation of which any Reservoir is a part.

"**Hazardous Substance**" means any chemical, waste or other substances, expressly excluding Carbon Dioxide and Non-Native Carbon Dioxide, (a) which now or hereafter becomes defined as or included in the definition of "hazardous substances," "hazardous wastes," "hazardous materials," "extremely hazardous wastes," "restricted hazardous wastes," "toxic substances," "toxic pollutants," "pollutions," "pollutants," "regulated substances," or words of similar import under any law

INDUSTRIAL COMMISSION

STATE OF NORTH DAKOTA

DATE 6/13/24 CASE NO. 30869-880

Introduced By Braaten

Exhibit LO-49

Identified By Stockness

pertaining to environment, health, safety or welfare, (b) which is declared to be hazardous, toxic or polluting by any Governmental Authority, (c) exposure to which now or hereafter prohibited, limited or regulated by any Governmental Authority, (d) the storage, use, handling, disposal or release of which is restricted or regulated by any Governmental Authority, or (e) for which remediation or cleanup is required by any Governmental Authority.

**"Leased Premises"** means the Pore Space, surface and subsurface of the land, excluding mineral rights, described in **Exhibit A** of this Lease.

**"Native Oil and Gas"** means all oil, natural gas, and other hydrocarbons present in and under the Leased Premises and not injected by Lessor, Lessee or any third party.

**"Non-Native Carbon Dioxide"** means Carbon Dioxide that is not naturally occurring in the Reservoir together with incidental associated substances, fluids, minerals, oil, and gas, excluding that which, independent of Operations, originates from an accumulation meeting the definition of a Pool. All Non-Native Carbon Dioxide will be considered personal property of the Lessee and its successor and assigns under this Agreement.

**"Operating Year"** means the calendar year or portion of the calendar year following Commencement of Operations during which Operations occur.

**"Operations"** means the transportation and injection of Carbon Dioxide into a Reservoir after Commencement of Operations, and any withdrawal of this Carbon Dioxide, as well as the withdrawal of Non-Native Carbon Dioxide, for sale, sequestration or disposal in accordance with applicable law.

**"Pool"** means an underground Reservoir containing a common accumulation of Native Oil and Gas that is economically recoverable. A zone of a structure that is completely separated from any other zone in the same structure is a Pool.

**"Pore Space"** means a cavity or void, whether natural or artificially created, in a Reservoir.

**"Property"** means the real property commonly known as \_\_\_\_\_, which includes the Leased Premises.

**"Related Person"** means any member, partner, principal, officer, director, shareholder, predecessor-in-interest, successor-in-interest, employee, agent, heir, representative, contractor, lessee, sublessee, licensee, invitee, permittee of a Party, Financing Parties or any other person or entity that has obtained or in future obtains rights or interests from, under or through a Party (excluding the other Party itself).

**"Reservoir"** means any subsurface stratum, sand, formation, aquifer, cavity or void, whether natural or artificially created, wholly or partially within the Leased Premises, suitable for the storage or sequestration of carbon dioxide or other gaseous substances.

**"Storage Fee"** means Lessor's proportionate share of sixteen cents (\$0.50) per metric ton of Carbon Dioxide ("Storage Rate") as determined by the Lessee's last meter before injection as part of Operations. The Storage Fee shall be: (i) calculated separately for each amalgamated area as created and established by the Commission that includes any portion of the Leased Premises; (ii) limited to the Carbon Dioxide injected in said amalgamated area in the immediately preceding Operating Year; and (iii) based on the Lessor's proportionate per net acre share of said unit. For avoidance of doubt, the Lessor shall receive a separate Storage Fee for each amalgamated area created and established by the Commission that includes any portion of the Leased Premises on a net acre basis within the Lessor's interest being the numerator and the acres in the amalgamated area being the denominator.

**"Tax Credits"** means any and all (a) investment tax credits, (b) production tax credits, (c)

credits under 26 U.S.C. §45Q credits, and (d) similar tax credits or grants under federal, state or local law relating to construction, ownership or Operations

**2. LEASE RIGHTS.** In consideration of the compensation, covenants, agreements, and conditions set forth in this Lease, Lessor grants, demises, leases and lets to Lessee the exclusive right to use the Leased Premises for the capture, injection, storage, sequestration, sale, withdrawal or disposal of Carbon Dioxide, Non-Native Carbon Dioxide and incidental associated substances, fluids, and minerals; together with the following exclusive rights:

(a) to use the Leased Premises for developing, constructing, installing, improving, maintaining, replacing, repowering, relocating, removing, abandoning in place, expanding, and operating Facilities;

(b) to lay, maintain, replace, repair, and remove roads on the Leased Premises to allow Lessee, in its sole discretion, to exercise its rights under this Lease; and

(c) to enter upon and use the Leased Premises for the purposes of conducting:

(i) any investigations, studies, surveys, and tests, including without limitation drilling and installing test wells and monitoring wells, seismic testing, and other activities as Lessee deems necessary or desirable to determine the suitability of the Leased Premises for Operations,

(ii) any inspections and monitoring of Reservoirs and Carbon Dioxide as Lessee or any governmental authority deems necessary or desirable during the term of this Lease, and

(iii) any maintenance to the Facilities that Lessee or any governmental authority deems necessary or as required by applicable law.

Lessor also hereby grants and conveys unto Lessee all other and further easements across, over, under and above the Property as reasonably necessary to provide access to and services reasonably required for Lessee's performance under the Lease. The easements granted hereunder shall run with and burden the Leased Premises for the term of this Lease.

Lessee may exercise its rights under this Lease in conjunction with related operations on other properties near the Leased Premises. Lessee shall have no obligation, express or implied, to begin, prosecute or continue storage operations in, upon or under the Leased Premises, or to store and/or sell or use all or any portion of the gaseous substances stored thereon. The timing, nature, manner and extent of Lessee's operations, if any, under this Lease shall be at the sole discretion of Lessee. All obligations of Lessee are expressed herein, and there shall be no covenants implied under this Lease, it being agreed that all amounts paid hereunder constitute full and adequate consideration for this Lease.

**3. INITIAL TERM.** This Lease shall commence on the Effective Date and shall continue for an initial term of twenty (20) years ("Initial Term") unless sooner terminated in accordance with the terms of this Lease. Lessee may, but is not obligated to, extend the Initial Term for up to four successive five-year periods by providing notice to Lessor on or prior to the last day of the Initial Term or expiring five-year extension period. The Initial Term together with any extensions are referred to as the "Primary Term."

**4. OPERATIONAL TERM.** Upon Commencement of Operations at any time during the Primary Term, this Lease shall continue for so long as any portion of the Leased Premises or

Lessee's Facilities are subject to a permit issued by the Commission or under the ownership or control of the State of North Dakota ("Operational Term"); *provided, however*, that all of Lessee's obligations under this Lease shall terminate upon issuance of a Completion Notice, except for payment of the Final Royalty Payment (as applicable), and Final Occupancy Fee (as applicable). If Commencement of Operations does not occur during the Primary Term, this Lease shall terminate, and Lessee shall execute a document evidencing termination of this Lease in recordable form and shall record it in the official records of the county in which the Leased Premises is located.

#### **5. COMPENSATION.**

(a) **Primary Term Payment.** Lessee shall pay to Lessor five hundred dollars (\$500.00) per net acre in the Leased Premises ("Primary Term Payment"), which shall escalate at two- and one-half percent (2.5%) per year, the receipt and sufficiency of which are hereby acknowledged.

(b) **Royalty.** During the Operational Term, Lessee shall annually on or before May 31 pay to Lessor a royalty equal to the greater of a flat \$100.00 payment or the Storage Fee(s) for the immediately preceding Operating Year. For the Operating Year in which Lessee provides Lessor with a Completion Notice, Lessee shall pay a pro rata share of the Storage Fee(s) ("Final Royalty Payment"), as applicable, and said payment shall be made within sixty days after the date the Completion Notice was issued.

Lessor and Lessee agree that the Lease shall continue as specified herein even in the absence of Operations and the payment of royalties.

**6. AMALGAMATION.** (a) Lessee, in its sole discretion, shall have the right and power, at any time (including both before and after Commencement of Operations), to pool, unitize, or amalgamate any Reservoir or portion of a Reservoir with any other lands or interests into which that Reservoir extends and document such unit in accordance with applicable law or agency order. Amalgamated units shall be of such shape and dimensions as Lessee may elect and as are approved by the Commission. Amalgamated areas may include, but are not required to include, land upon which injection or extraction wells have been completed or upon which the injection and/or withdrawal of Carbon Dioxide and Non-Native Carbon Dioxide has commenced prior to the effective date of amalgamation. In exercising its amalgamation rights under this Lease and if required by law, Lessee shall record or cause to be recorded a copy of the Commission's amalgamation order or other notice thereof in the county in which the amalgamated unit. Amalgamating in one or more instances shall, if approved by the Commission, not exhaust the rights of Lessee to amalgamate Reservoirs or portions of Reservoirs into other amalgamation areas, and Lessee shall have the recurring right to revise any amalgamated area formed under this Lease by expansion or contraction or both. Lessee may dissolve any amalgamated area at any time and document such dissolution by recording an instrument in accordance with applicable law or agency order. Lessee shall have the right to negotiate, on behalf of and as agent for Lessor, any unit agreements and operating agreements with respect to the operation of any amalgamated areas formed under this Lease.

(b) The injection and/or withdrawal of Carbon Dioxide and Non-Native Carbon Dioxide into a Reservoir from any property within a amalgamated area that includes the Leased Premises shall be treated as if Operations were occurring on the Leased Premises, except that the royalty payable to Lessor under Section 5(b) of this Lease shall be Lessor's per net acre proportionate share of the total Storage Fee for the preceding Operating year's injection of Carbon Dioxide into the amalgamated area.

**7. ENVIRONMENTAL INCENTIVES.** Unless otherwise specified, Lessee is the owner of all

Environmental Attributes and Environmental Incentives and is entitled to the benefit of all Tax Credits or any other attributes of ownership of the Facilities and Operations. Lessor shall (i) cooperate with Lessee in obtaining, securing and transferring all Environmental Attributes and Environmental Incentives and the benefit of all Tax Credits and (ii) allow Lessee to take any actions necessary to install additional equipment or other facilities to comply with all monitoring and reporting obligations, and allow Lessee's personnel to enter the premises and collect any data Lessee requires to satisfy its obligations required in connection with obtaining Environmental Attributes, Tax Credits and Environmental Incentives. Lessor shall not be obligated to incur any out-of-pocket costs or expenses in connection with such actions unless reimbursed by Lessee. If any Environmental Incentives are paid directly to Lessor, Lessor shall immediately pay such amounts over to Lessee.

**8. SURRENDER OF LEASED PREMISES.** Lessee shall have the unilateral right at any time and from time to time to execute and deliver to Lessor a written notice of surrender and/or release covering all or any part of the Leased Premises for which the subsurface pore space is not being utilized for storage as set forth herein, and upon delivery of such surrender and/or release to Lessor this Lease shall terminate as to such lands, and Lessee shall be released from all further obligations and duties as to the lands so surrendered and/or released, including, without limitation, any obligation to make payments provided for herein, except obligations accrued as of the date of the surrender and/or release.

**9. FACILITIES.**

- (a) Lessee shall notify Lessor regarding the location of the Facilities, which selection shall be within the discretion of the Lessee. Notwithstanding the foregoing, in no event shall Facilities be located within 500 feet of any currently occupied dwelling existing on the Leased Premises or the Property as of the Effective Date without Lessor's express consent. Lessee may erect fences around all or part of any aboveground Facilities (excluding roads) to separate Facilities from adjacent Lessor-controlled lands. Lessee shall maintain and repair at its expense any roads it constructs on the Leased Premises in reasonably safe and usable condition.
- (b) Lessor and Lessee agree that all Facilities and property of whatever kind and nature constructed, placed or affixed on the rights-of-way, easements, patented or leased lands as part of Lessee's Operations, as against all parties and persons whomsoever (including without limitation any party acquiring interest in the rights-of-way, easements, patented or leased lands or any interest in or lien, claim or encumbrance against any of such Facilities), shall be deemed to be and remain the property of the Lessee, and shall not be considered to be fixtures or a part of the Leased Premises. Lessor waives, to the fullest extent permitted by applicable law, any and all rights it may have under the laws of the State of North Dakota, arising under this Lease, by statute or otherwise to any lien upon, or any right to distress or attachment upon, or any other interest in, any item constituting the Facilities or any other equipment or improvements constructed or acquired by or for Lessee and located on the leased Premises or within any easement area. Each Lessor and Lessee agree that the Lessee (or the designated assignee of Lessee or Financing Parties) is the tax owner of any such Facilities, structures, improvements, equipment and property of whatever kind and nature and all tax filings and reports will be filed in a manner consistent with this Lease. Facilities shall at all times retain the legal status of personal property as defined under Article 9 of the Uniform Commercial Code. If there is any mortgage or fixture filing against the Leased Premises which could reasonably be construed as prospectively attaching to the Facilities as a fixture of the Property, Lessor shall provide a disclaimer or release from such lienholder. Lessor, as fee owner, consents to the filing of a disclaimer of the Facilities as a fixture of the Property in the \_\_\_\_\_ County Recorder's Office, or where real estate records of \_\_\_\_\_ County are customarily filed.

**10. SURFACE DAMAGE COMPENSATION ACT.** The compensation contemplated and paid to Lessor hereunder is compensation for, among other things, damages sustained by Lessor for the lost use of and access to Lessor's land, pore space (to the extent required under North Dakota law), and any other damages which are contemplated under Ch. 38-11.1 of the North Dakota Century Code (to the extent applicable).

**11. MINERALS, OIL AND GAS.** This Lease is not intended to grant or convey, nor does it grant or convey, any right to or obligation for Lessee to explore for or produce minerals, including Native Oil and Gas that may exist on the Leased Premises. Lessee shall not engage in any activity or permit its Related Persons to engage in any activity that unreasonably interferes with the Lessor's or third party's (or parties') rights to the granted, leased, or reserved mineral interests.

**12. FORCE MAJEURE.** Should Lessee be prevented from complying with any express or implied covenant of this Lease, from utilizing the Leased Premises for underground storage purposes by reason of scarcity of or an inability to obtain or to use equipment or material failure or breakdown of equipment, or by operation of force majeure (including, but not limited to, riot, insurrection, war (declared or not), mobilization, explosion, labor dispute, fire, flood, earthquake, storm, lightning, tsunami, backwater caused by flood, vandalism, act of the public enemy, terrorism, epidemic, pandemic (including COVID-19), civil disturbances, strike, labor disturbances, work slowdown or stoppage, blockades, sabotage, labor or material shortage, national emergency, and the amendment, adoption or repeal of or other change in, or the interpretation or application of, any applicable laws, orders, rules or regulations of governmental authority), then while so prevented, Lessee's obligation to comply with such covenant shall be suspended and this Lease shall be extended while and so long as Lessee is prevented by any such cause from utilizing the property for underground storage purposes and the time while Lessee is so prevented shall not be counted against Lessee, anything in this Lease to the contrary notwithstanding.

**13. DEFAULT/TERMINATION.** Lessor may not terminate the Lease for any reason whatsoever unless a Default Event has occurred and is continuing consistent with the terms of this Section 13. Any Party that fails to perform its responsibilities as listed below shall be deemed to be the "Defaulting Party," the other Party shall be deemed to be the "Non-Defaulting Party," and each event of default shall be a "Default Event." A Default Event is: (a) failure of a Party to pay any amount due and payable under this Lease, other than an amount that is subject to a good faith dispute, within thirty (30) days following receipt of written notice from Non-Defaulting Party of such failure to pay; or (b) a material violation or default of any terms of this Lease by a Party, provided the Non-Defaulting Party provides written notice of violation or default and Defaulting Party fails to substantially cure the violation or default within ninety (90) days after receipt of said notice to cure such violations or defaults. Notwithstanding the foregoing, in the event a violation or default of the Defaulting Party cannot be cured within such ninety (90) day period, then, so long as the Defaulting Party is working in good faith to cure, the timeline to cure the violation or default shall be extended until such time as necessary, but in no event shall such timeline extend more than one hundred eighty (180) days. Parties acknowledge that in connection with any construction or long-term financing or other credit support provided to Lessee or its affiliates by Financing Parties, that such Financing Parties may act to cure a continuing Default Event and Lessor agrees to accept performance from any such Financing Parties so long as such Financing Parties perform in accordance with the terms of this Lease. If Lessee, its affiliates or Financing Parties, fail to substantially cure such Default Event within the applicable cure period, Lessor may terminate the Lease. Lessee may terminate the lease with thirty (30) days written notice to Lessor. Upon termination of this Lease, Lessee shall have one hundred eighty (180) days to remove, plug, and/or abandon in place all Facilities of Lessee located on the Leased Premises in accordance with applicable permit requirements or other applicable statutes, rules or regulations.

**14. ASSIGNMENT.** (a) Lessee has the right to sell, assign, mortgage, pledge, transfer, use as collateral, or otherwise collaterally assign or convey all or any of its rights under this Lease, including, without limitation, an assignment by Lessee to Financing Parties. (b) In the event Lessee assigns its rights under this Lease, Lessee shall be relieved of all obligations with respect to the assigned portion arising after the date of assignment so long as notice of such assignment is provided to Lessor, and provided that Lessee shall not be relieved from any obligation in respect of any payment or other

obligations that have not been satisfied or performed prior to such date of assignment. (c) This Lease shall be binding on and inure to the benefit of the successors and assignees. The assigning Party shall provide written notice of any assignment within sixty (60) days after such assignment has become effective; provided, however, that an assigning Party's failure to deliver written notice of assignment within such 60-day period shall not be deemed a breach of this Lease unless such failure is willful and intentional. Further, no change or division in Lessor's ownership of or interest in the Leased Premises or royalties shall enlarge the obligations or diminish the rights of Lessee.

**15. FINANCING.** (a) Lessor acknowledges that Lessee may obtain tax equity, construction, long-term financing and other credit support from one or more Financing Parties and that Lessee intends to enter into various agreements and execute various documents relating to such financing, which documents may, among other things, assign this Lease and any related easements to a Financing Party, grant a sublease in the Leased Premises and a lease of the Facilities from such Financing Party to Lessee, grant the Financing Parties a sublease or other real property interest in Lessee's interests in and to the Leased Premises, grant a first priority security interest in Lessee's interest in the Facilities and/or this Lease and Lessee's other interests in and to the Leased Premises, including, but not limited to, any easements, rights of way or similar interests (such documents, "Financing Documents"). Lessor acknowledges notice of the foregoing and consents to the foregoing actions and Financing Documents described above.

(b) Lessor agrees, to execute, and agrees to cause any and all of Lessor's lenders to execute, such commercially reasonable subordination agreements, non-disturbance agreements, forbearance agreements, consents, estoppels, modifications of this Lease and other acknowledgements of the foregoing as Lessee or the Financing Parties may reasonably request (collectively, "Lessor Financing Consent Instruments"). Lessor acknowledges and agrees that (i) Lessee's ability to obtain financing for the construction and operation of the Facilities is dependent upon the prompt cooperation of Lessor and its lenders as contemplated by this Section 15; (ii) if Lessee is unable to close on the financing for the Facilities, the construction of the Facilities and the Commencement of Operations will not likely occur; and (iii) it is in the best interest of both Lessee and Lessor for Lessee to obtain financing from the Financing Parties as contemplated by this Section 15. Therefore, Lessor agrees to act promptly, reasonably and in good faith in connection with any request for approval and execution of all Lessor Financing Consent Instruments. The Lessor shall also reasonably cooperate with the Lessee or the Financing Party in the making of any filings required by such requesting party for regulatory compliance or in accordance with applicable laws and in the operation and maintenance of the Facilities, all solely at the expense of the Lessee.

(c) As a precondition to exercising any rights or remedies as a result of any default or alleged default by Lessee under this Lease, Lessor shall deliver a duplicate copy of the applicable notice of default to each Financing Parties concurrently with delivery of such notice to Lessee, specifying in detail the alleged default and the required remedy, provided Lessor was given notice of such Financing Parties and if no such notice of default is required to be delivered to Lessee under this Lease, Lessor may not terminate this Lease unless Lessor has delivered a notice of default to each Financing Party specifying in detail the alleged default or breach and permitting each Financing Party the opportunity to cure as provided in this Section 15(c). Each Financing Party shall have the same period after receipt of a notice of default to remedy default, or cause the same to be remedied, as is given to Lessee after Lessee's receipt of a notice

of default under this Lease, plus, in each instance, the following additional time periods: (i) ten (10) Business Days in the event of any monetary default; and (ii) sixty (60) days in the event of any non-monetary default; provided, however, that (A) such sixty (60)-day period shall be extended for an additional sixty (60) days to enable such Financing Party to complete such cure, including the time required for such Financing Party to obtain possession of the Facilities (including possession by a receiver), institute foreclosure proceedings or otherwise perfect its right to effect such cure and (8) such Financing Party shall not be required to cure those defaults which are not reasonably susceptible of being cured or performed. Lessor shall accept such performance by or at the instance of a Financing Party as if the performance had been made by Lessee.

(d) If any Lessee Default Event cannot be cured without obtaining possession of all or part of the Facilities and/or the leasehold interest created by the Lease (the "Leasehold Estate"), then any such Lessee Default Event shall nonetheless be deemed remedied if: (i) within sixty (60) days after receiving the notice of default, a Financing Party acquires possession thereof, or commences appropriate judicial or non-judicial proceedings to obtain the same; (ii) such Financing Party is prosecuting any such proceedings to completion with commercially reasonable diligence; and (iii) after gaining possession thereof, such Financing Party performs all other obligations as and when the same are due in accordance with the terms of the Lease. If a Financing Party is prohibited by any process or injunction issued by any court or by reason of any action of any court having jurisdiction over any bankruptcy or insolvency proceeding involving Lessee from commencing or prosecuting the proceedings described above, then the sixty (60)-day period specified above for commencing such proceedings shall be extended for the period of such prohibition.

(e) Financing Parties shall have no obligation or liability to the Lessor for performance of the Lessee's obligations under the Lease prior to the time the Financing Party acquires title to the Leasehold Estate. A Financing Party shall be required to perform the obligations of the Lessee under this Lease only for and during the period the Financing Party directly holds such Leasehold Estate. Any assignment pursuant to this Section 15 shall release the assignor from obligations accruing under this Lease after the date the liability is assumed by the assignee.

(f) Each Financing Party shall have the absolute right to do one, some or all of the following things: (i) assign the rights, mortgage or pledge held by Financing Party (the "Financing Party's Lien"); (ii) enforce the Financing Party's Lien; (iii) acquire title (whether by foreclosure, assignment in lieu of foreclosure or other means) to the Leasehold Estate; (iv) take possession of and operate the Facilities or any portion thereof and perform any obligations to be performed by Lessee under the Lease, or cause a receiver to be appointed to do so; (v) assign or transfer the Leasehold Estate to a third party; or (vi) exercise any rights of Lessee under this Lease. Lessor's consent shall not be required for any of the foregoing; and, upon acquisition of the Leasehold Estate by a Financing Party or any other third party who acquires the same from or on behalf of the Financing Party or any purchaser who purchases at a foreclosure sale, Lessor shall recognize the Financing Party or such other party (as the case may be) as Lessee's proper successor, and this Lease shall remain in full force and effect.

(g) If this Lease is terminated for any reason whatsoever, including a termination by Lessor on account of a Lessee Default Event, or if this Lease is rejected by a trustee of Lessee in a bankruptcy or reorganization proceeding or by Lessee as a debtor-in-possession (whether or not such rejection shall be deemed to terminate this Lease), if requested by Financing Party, Lessor shall execute a new lease (the "New Lease") for the Leased Premises with the Financing Parties (or their designee(s), if applicable) as Lessee, within thirty (30) days following the date of such request. The New Lease shall be on substantially the same terms and conditions as are in this Lease (except for any requirements or conditions satisfied by Lessee prior to the termination or rejection). Upon execution of the New Lease by Lessor, Financing Parties (or their designee, if applicable) shall pay to Lessor any and all sums owing by Lessee under this Lease that are unpaid and that would, at the time of the execution of the New Lease, be due and payable under this Lease if this Lease had not been terminated or rejected. The provisions of this Section 15(g) shall survive any termination of this Lease prior to the expiration of the Term, and any rejection of this Lease in any bankruptcy or reorganization proceeding.

(h) Lessor consents to each Financing Party's security interest, if any, in the Facilities and waives all right of levy for rent and all claims and demands of every kind against the Facilities, such waiver to continue so long as any sum remains owing from Lessee to any Financing Parties. Lessor agrees that the Facilities shall not be subject to distraint or execution by, or to any claim of, Lessor.

**16. INDEMNIFICATION; WAIVER.** (a) Each Party shall indemnify, defend, and hold harmless the other Party and its Related Persons from and against any and all third-party suits, claims, or damages suffered or incurred by the indemnified Party and its Related Persons arising out of physical damage to property and physical injuries to any person, including death, caused by the gross negligence or willful misconduct of the indemnifying Party or its Related Persons except to the extent such claims arise out of the negligence or willful misconduct of the indemnified Party or its Related Persons. (b) Each Party shall indemnify, defend and hold harmless the other Party and its Related Persons from and against all suits, claims, or damages suffered or incurred by the indemnified Party and its Related Persons arising out of or relating to the existence at, on, above, below or near the Leased Premises of any Hazardous Substance, except to the extent deposited, spilled or otherwise caused by the indemnified Party or any of its contractors or agents, provided that Lessee shall not be obligated to indemnify Lessor with respect to any Hazardous Substance on the Leased Premises prior to the Effective Date.

**17. INSURANCE.** Lessee shall, at its sole cost and expense, keep and maintain in force commercial general liability insurance including broad form property damage liability, personal injury liability, and contractual liability coverage, on an "occurrence" basis, with a combined single limit, which may be effected by primary and excess coverage, of not less than Four Million Dollars (\$4,000,000.00) during the Primary Term, except that such limit in the Primary Term shall be instead not less than One Million Dollars (\$1,000,000.00) until such time as Lessee commences physical testing of any injection wells or other similar commercial activities, with such commercially reasonable deductibles as Lessee, in its discretion, may deem appropriate. Lessor shall be named as an additional insured in such policy but only to the extent of the liabilities specifically assumed by the Lessee under this Lease. The policy shall contain provisions by which the insurer waives any right of subrogation it may have against Lessor and shall be endorsed to provide that the insurer shall give Lessor thirty days written notice before any material modification or termination of coverage. Upon Lessor's request, Lessee shall promptly deliver certificates of such insurance to Lessor.

**18. MISCELLANEOUS.**

(a) **Confidentiality.** Lessor shall maintain in the strictest confidence, and shall require each of Lessor's Related Persons to hold and maintain in the strictest confidence, for the benefit of Lessee, all information pertaining to the compensation paid under this Lease, any information regarding Lessee and its business, operations on the Leased Premises or on any other lands, the capacity and suitability of the Reservoir, and any other information that is deemed proprietary or that Lessee requests or identifies to be held confidential, in each such case whether disclosed by Lessee or discovered by Lessor.

(b) **Liens.** (i) Lessee shall protect the Leased Premises from liens of every character arising from its activities on the Leased Premises, provided that Lessee may, at any time and without the consent of Lessor, encumber, hypothecate, mortgage, pledge, or collaterally assign (including by mortgage, deed of trust or personal property security instrument) all or any pollution of Lessee's right, title or interest under this Lease (but not Lessor's right, title or interest in the Leased Premises), as security for the repayment of any indebtedness and/or the performance of any obligation. (ii) Lessor shall not directly or indirectly cause, create, incur, assume or allow to exist any mortgage, pledge, lien, charge, security interest, encumbrance or other claim of any nature on or with respect to the Facilities, Operations or any interest therein. Lessor shall immediately notify Lessee in writing of the existence of any such mortgage, pledge, lien, charge, security interest, encumbrance or other claim, shall promptly cause the same to be discharged and released of record without cost to Lessee, and shall indemnify the Lessee against all costs and expenses (including reasonable attorneys' fees) incurred in discharging and releasing any such

mortgage, pledge, lien, charge, security interest, encumbrance or other claim.

(c) **Warranty of Title.** Lessor represents and warrants to Lessee that Lessor is the owner in fee of the surface and subsurface pore space of the Leased Premises. Lessor hereby warrants and agrees to defend title to the Leased Premises and Lessor hereby agrees that Lessee, at its option, shall have the right to discharge any tax, mortgage, or other lien upon the Leased Premises, and in the event Lessee does so, Lessee shall be subrogated to such lien with the right to enforce the same and apply annual rental payments or any other such payments due to Lessor toward satisfying the same. At any time on or after the Effective Date, Lessee may obtain for itself and/or any Financing Party, at Lessee's expense, a policy of title insurance in a form and with exceptions acceptable to Lessee and/or such Financing Party in its sole discretion (the "Title Policies"). Lessor agrees to cooperate fully and promptly with Lessee in its efforts to obtain the Title Policies, and Lessor shall take such actions as Lessee, or any Financing Party may reasonably request in connection therewith.

(d) **Conduct of Operations.** Each Party shall, at its expense, use best efforts to comply (and cause its Related Persons to comply) in all material respects with all laws applicable to its (or their) activities on the Leased Premises, provided that each Party shall have the right, in its sole discretion, to contest, by appropriate legal proceedings, the validity or applicability of any law, and the other Party shall cooperate in every reasonable way in such contest, at no out-of-pocket expense to the cooperating Party. During the Primary Term, Lessee, its agents, affiliates, servants, employees, nominees and licensees shall be entitled to: (i) apply for and obtain any necessary permits, approvals and other governmental authorizations (collectively called "Governmental Authorizations") required for the development, construction, operation and maintenance of the Project and Lessor agrees to co-operate, execute, obtain or join with Lessee in any applications or proceedings relating to the Governmental Authorizations upon Lessee's written request and at Lessee's direction, cost and expense; and (ii) apply for any approvals and permits and any zoning amendment of any area of the Leased Premises required in connection with the Project, and Lessor agrees to promptly cooperate, execute, obtain or join with Lessee in any applications or proceedings relating to such approvals, permits and zoning amendments upon Lessee's written request and at Lessee's direction, cost and expense.

(e) **Title to Carbon Dioxide.** As between Lessor and Lessee, all right, title, interest and ownership to all Carbon Dioxide injected into any Reservoir shall belong to Lessee, as measured by corresponding Storage Fee payment to Lessor.

(f) **Hazardous Substances.** Lessee shall have no liability for any regulated hazardous substances located on the Leased Premises prior to the Effective Date or placed in, on or within the Leased Premises by Lessor or any of its Related Persons on or after the Effective Date, and nothing in this Lease shall be construed to impose upon Lessee any obligation for the removal of such regulated hazardous substances.

(g) **Interference.** Lessee shall peaceably and quietly have, hold, and enjoy the Leased Premises against any person claiming by, through or under the Lessor and without disturbance by the Lessor, unless Lessee is found in default of the terms of this Lease and such default is continuing. Lessor shall not unreasonably interfere with Lessee's access to or maintenance of the Facilities or associated use of Leased Premises under this Lease; endanger the safety of Lessor, Lessee, the general public, private or personal property, or the Facilities; or install or maintain or permit to be installed or maintained vegetation, undergrowth, trees (including overhanging limbs and foliage and any trees standing which are substantially likely to fall), buildings, structures, installations, and any other obstructions which unreasonably interfere to Lessee access or use of the Facilities or Lessee's use of the Leased Premises under this Lease. Lessor shall not engage in any activity or permit its Related Persons to engage in any activity that might damage or undermine the physical integrity of any Formation or interfere with Lessee's use of the Leased Premises under this Lease, provided however that it is understood by Lessee that Lessor has no right to prohibit the exercise of any mineral rights not owned by Lessor at the time of entering into the Option to Lease between Lessor and Lessee with respect to the Leased Premises.

(h) **Reservations.** Lessor reserves the right to sell, lease, or otherwise dispose of any interest in the Leased Premises subject to the rights granted in this Lease and agrees that sales, leases, or other dispositions

of any interest or estate in the Leased Premises shall be expressly made subject to the terms of this Lease and shall not unreasonably interfere with Lessee's rights under this Lease.

(i) **Taxes.** Lessor shall pay for all real estate taxes and other assessments levied upon the Leased Premises. Lessee shall pay any taxes, assessments, fines, fees, and other charges levied by any governmental authority against its Facilities on the Leased Premises. The Parties agree to cooperate fully to obtain any available tax refunds or abatements with respect to the Leased Premises. Lessee shall have the right to pay all taxes, assessments and other fees on behalf of Lessor and to deduct the amount so paid from other payments due to Lessor hereunder.

j) **Amendments.** Lessee reserves the right to revise this Lease to remedy any mistakes, including correcting the names of the Parties, the legal description of the Leased Premises, or otherwise. Any amendments must be in writing and signed by both parties.

(k) **Remedies.** Notwithstanding anything to the contrary in this Lease, neither Party shall be liable to the other for any indirect, special, punitive, incidental or exemplary damages, whether foreseeable or not and whether arising out of or in connection with this Lease, by statute, in contract, tort, including negligence, strict liability or otherwise, and all such damages are expressly disclaimed. This provision does not limit Lessee's obligation to indemnify Lessor for third-party suits, claims, or damages under Section 16 of this Lease.

(l) **Financial Responsibility.** Lessee will comply with all applicable law regarding financial responsibility for Carbon Dioxide storage and will post bonds or other financial guarantees as required by the government entities.

(m) **Attorneys' Fees.** If any suit or action is filed or arbitration commenced by either Party against the other Party to enforce this Lease or otherwise with respect to the subject matter of this Lease, the prevailing party shall be entitled to recover reasonable costs and attorneys' fees incurred in investigation of related matters and in preparation for and prosecution of such suit, action, or arbitration as fixed by the arbitrator or court, and if any appeal or other form overview is taken from the decision of the arbitrator or any court, reasonable costs and attorneys' fees as fixed by the court.

(n) **Representations and Warranties.** Lessor represents and warrants to Lessee the following as of the Effective Date and covenants that throughout the Term: (i) Lessor has the full right, power and authority to grant rights, interests and license as contained in this Lease. Such grant of the right, interests and license does not violate any law, ordinance, rule or other governmental restriction applicable to the Lessor or the Leased Premises and is not inconsistent with and will not result in a breach or default under any agreement by which the Lessor is bound or that affects the Leased Premises. (ii) Neither the execution and delivery of this Lease by Lessor nor the performance by Lessor of any of its obligations under this Lease conflicts with or will result in a breach or default under any agreement or obligation to which Lessor is a party or by which Lessor or the Leased Premises is bound. (iii) All information provided by Lessor to Lessee, as it pertains to the Leased Premises' physical condition, along with Lessor's rights, interests and use of the Leased Premises, is accurate in all material respects. (iv) Lessor has no actual or constructive notice or knowledge of Hazardous Substances at, on, above, below or near the Leased Premises. (v) Each of the undersigned represents and warrants that they have the authority to execute this Lease on behalf of the Party for which they are signing.

(o) **Severability.** Should any provision of this Lease be held, in a final and unappealable decision by a court of competent jurisdiction, to be either invalid, void or unenforceable, the remaining provisions

of this Lease shall remain in full force and effect, unimpaired by the holding. If the easements or other rights under this Lease are found to be in excess of the longest duration permitted by applicable law, the term of such easements or other rights shall instead expire on the latest date permitted by applicable law.

(p) **Memorandum of Lease.** This Lease shall not be recorded in the real property records. Lessee shall furnish to Lessor a reasonable memorandum of this Lease and Lessor shall promptly execute. Lessee shall cause a memorandum of this Lease to be recorded in the real property records of the county in which the Leased Premises is situated.

(q) **Notices.** All notices required to be given under this Lease shall be in writing, and shall be deemed to have been given upon (a) personal delivery, (b) one (1) Business Day after being deposited with FedEx or another reliable overnight courier service, with receipt acknowledgment requested, or (c) upon receipt or refused delivery deposited in the United States mail, registered or certified mail, postage prepaid, return receipt required, and addressed to the respective Party at the addresses set forth at the beginning of this Lease, or to such other address as either Party shall from time to time designate in writing to the other Party.

(r) **No Waiver.** The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Lease or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provision or the relinquishment of any such rights, but the same shall continue and remain in full force and effect.

(s) **Estoppels.** Either party hereto (the "Receiving Party"), without charge, at any time and from time to time, within ten (10) Business Days after receipt of a written request by the other party hereto (the "Requesting Party"), shall deliver a written statement, duly executed, certifying to such Requesting Party, or any other person, or entity specified by such Requesting Party: (i) that this Lease is unmodified and in full force and effect, or if there has been any modification, that the same is in full force and effect as so modified and identifying the particulars of such modification; (ii) whether or not, to the knowledge of the Receiving Party, there are then existing any offsets or defenses in favor of such Receiving Party against enforcement of any of the terms, covenants and conditions of this Lease and, if so, specifying the particulars of same and also whether or not, to the knowledge of such Receiving Party, the Requesting Party has observed and performed all of the terms, covenants and conditions on its part to be observed and performed, and if not, specifying the particulars of same; and (iii) such other information as may be reasonably requested by the Requesting Party. Any written instrument given hereunder may be relied upon by the recipient.

(t) **Counterparts.** This Lease may be executed in any number of counterparts, each of which, when executed and delivered, shall be an original, but all of which shall collectively constitute one and the same instrument.

(u) **Governing Law.** This Lease shall be governed, interpreted, and enforced in accordance with the laws of the state of North Dakota.

(v) **Further Action.** Each Party will execute and deliver all documents, provide all information, and take or forbear from all actions as may be necessary or appropriate to achieve the purposes of this Lease, including without limitation executing a memorandum of easement and all documents required to obtain any necessary government approvals.

(w) **Entire Agreement.** This Lease, into which the attached **Exhibit A** is incorporated by reference, contains the entire agreement of the Parties. There are no other conditions, agreements, representations, warranties, or understandings, express or implied.

*[Remainder of page intentionally left blank. Signature page follows.]*

IN WITNESS OF THE ABOVE, Lessor and Lessee have caused this Lease to be executed and delivered by their duly authorized representatives as of the Effective Date.

**Exhibit A**

**LEGAL DESCRIPTION OF THE LEASED  
PREMISES**

The Leased Premises consists of the lands located in [] County, North Dakota that are owned by the Lessor and generally described as follows:

For purposes of calculating the royalty payable under Section 5(b) of this Lease, the Parties stipulate that the Leased Premises consists of \_\_\_\_\_ acres.

## OPTION AGREEMENT

This option agreement ("Agreement") is executed effective this \_\_\_\_ day of \_\_\_\_\_ 2023, ("Effective Date"), by and between \_\_\_\_\_ having a mailing address of \_\_\_\_\_ ("Owner") and Retract LLC, a Florida limited liability company, having a mailing address of 3437 Iris Ct, Boulder, CO 80304 ("Optionee"). Owner and Optionee are sometimes individually referred to as a "Party" and collectively, as the "Parties".

### PREMISES

- A. Owner is the owner of a certain tract of real property located in Morton County, North Dakota and more particularly described on Exhibit A attached hereto and made a part hereof ("Property"); and
- B. Owner desires to grant and convey to Optionee an option to acquire an exclusive lease for the surface estate and pore estate for the erection, installation, and maintenance of certain facilities for the capture and sequestration of carbon on the Property.

IN CONSIDERATION of the foregoing and other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, the Parties hereto agree as follows:

- 1. **Option.** Owner grants to Optionee an exclusive option to lease the Property referenced in Section 2 ("Option") in accordance with the following terms and conditions.
  - 1.1 **Option Term.** The period during which Optionee may exercise the Option shall be for a term of thirty-six (36) months, commencing on the Effective Date and expiring on the date immediately preceding the third (3<sup>rd</sup>) anniversary of the Effective Date ("Option Term").
  - 1.2 **Use.** During the Option Term, Optionee and its employees, agents and contractors shall have a right of entry upon the Property and the right of ingress and egress over and across the Property for the purposes of (i) surveying the Property; and (ii) performing such other tests and studies as Optionee may desire in connection with the Option, including, without limitation, environmental, and cultural resource assessments, geotechnical, foundation and soil tests.
  - 1.3 **Right to Grant Option.** Owner warrants and represents to Optionee that (i) Owner is the holder of fee simple title to all of the Property; (ii) Owner has the authority to grant this Option and Lease to Optionee without the consent or approval of any other party; and (iii) there are no other existing options, rights of first refusal, contracts to purchase, leases or mortgages that encumber the Property or would prevent Optionee from exercising its right with respect to the Option except as disclosed in writing to Optionee.

STATE OF NORTH DAKOTA

DATE 6/13/24 CASE NO 30869-880

Introduced By Bhaaten

Exhibit LO-51

Identified By Stockness

BLF-000001

- 1.4 **Exercise of Option.** Optionee may exercise the Option at any time up to the end of the Option Term by delivering written notice of Optionee's intention to lease the Property either (a) in person, or (b) by certified mail, return receipt requested (or other nationally recognized overnight mail service), effective upon receipt, to Owner at the above referenced address. Along with delivering written notice, Optionee shall deliver a lease substantially in the form attached to Exhibit A of the Letter Agreement between the Parties. Upon Optionee's exercise of the Option, the Option Term shall be automatically extended until Optionee and Owner enter into a Lease for the Property. Optionee and Owner shall negotiate in good faith and shall use diligent and commercially reasonable efforts to finalize such negotiations within thirty (30) days of Optionee's exercise of the Option.
2. **Lease.** Upon the lease commencement date, Owner does hereby grant, bargain, and convey unto Optionee, an exclusive lease in, under, on, and along the Property and within the subsurface pore space ("Lease") for the purposes of erecting, constructing, replacing, relocating, improving, enlarging, removing, maintaining, and utilizing, from time to time, a facility capable of capturing and sequestering, carbon therewith (collectively, the "Facilities").
- 2.1 **Rent Commencement Date.** Rent commencement will be upon the commercial operation date ("COD") of the Facility. If the COD is after the conclusion of the Option Term, Optionee shall make additional Option payments to Owner until the COD. Notwithstanding the foregoing, in all events, for the purpose of rent commencement for the Lease, the COD shall be on or before two (2) years after the effective date of the Lease.
- 2.2 **Terms and Termination.** Provided Owner timely exercises the Option, (time being of the essence), the lease terms shall be as follows:
- (a) **Real Estate Taxes.** Optionee shall pay all real estate taxes applicable to the lease area. The payment of real estate taxes are in addition to Lease rent payments.
- (b) **Term.** The lease will be for a period of twenty (20) years, with four (4) five-year (5-year) options to extend at Optionee's sole discretion. Notification of intent to extend the lease will be given to Owner, in writing, within thirty (30) days of the lease expiration and/or extension dates.
3. **Livestock.** Optionee shall take reasonable precautions to avoid contact with livestock on the Property. If agreed by Owner and Optionee, Optionee shall install temporary fencing around Optionee's production sites for purposes of deterring livestock.
4. **Interference.** During the Option Term, Owner expressly reserves the right to use the Property for all other purposes not granted to Optionee under this Agreement; provided, however, Owner covenants and agrees that neither Owner nor its agents, lessees, invitees, guests, licensees, successors or assigns will (i) interfere with, impair or prohibit the free and complete use and enjoyment by Optionee of its rights granted by this Agreement; (ii) take any action which will in any way interfere with or impair the Optionee's access over and across the Property and to the Property for the purposes

specified in this Agreement. Owner shall not be permitted to drill or excavate for minerals on the surface of the Property. Optionee shall also have the right and privilege to trim, cut down, or control the growth of trees or any other vegetation on the Property, as in the sole judgement of Optionee may interfere with maintenance or operation of the Facilities. Owner will cooperate with Operator to avoid pasturing animals on or near the Facilities during periods of construction, maintenance or removal activity by Operator.

5. **Assignability.** Optionee may assign this Agreement to any affiliate of Optionee for the same purpose and on the same terms and conditions set forth herein.
6. **Broker.** The Parties represent to one another that they have not dealt with any broker or finder, unless set forth in another writing, signed by both Parties hereto, with respect to this Agreement. Each Party shall indemnify, defend and hold harmless the other Party from and against any breach of the foregoing representation.
7. **Due Diligence.** Optionee may, during the term of this Agreement, conduct due diligence with respect to the Property. Such review may include, but is not limited to, soil samples, environmental review and engineering feasibility. Owner will cooperate in due diligence and provide all relevant documentation in Owner's possession. Owner acknowledges that Optionee may contact government authorities regarding the Property. Owner agrees to promptly execute all reasonable documents requested by Optionee for permitting the Facility. Owner shall provide access to the Property upon reasonable notice, not to exceed forty-eight (48) hours, from Optionee.
8. **Parties.** This Agreement shall be binding upon and inure to the benefit of the Parties hereto and their respective heirs, successors, legal representatives and assigns, it being specifically understood that unless Optionee declines to exercise the Option, Owner may not lease, sell, transfer or convey during the Option Term any interest in the Property and easement areas to any third party whatsoever. Further, during the Option Term, Owner shall refrain from negotiating, discussing or dealing with any other persons concerning the lease or sale of the Property.
9. **Entire Agreement.** This Agreement contains the entire agreement between the Parties with respect to the subject matter thereof. This Agreement may not be amended or modified, nor may any provision be waived, unless in writing signed by the Party against whom enforcement is sought. This Agreement may be executed in any number of counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. For purposes of this Agreement, any signature transmitted by facsimile or electronically via e-mail shall be considered to have the same legal and binding effect as any original signature.
10. **Easements.** Owner shall grant Optionee all easements necessary for construction and operation of the Facility, including, but not limited to, access, electrical and utility easement agreements. Additionally, Owner shall execute an electrical, utility and access easement with the relevant utility company.
11. **Governing Law.** This Agreement shall be governed by and construed under North Dakota law.

12. **Consent Form.** Conterminous with the execution hereof, Owner shall execute the utility Property Owner Consent Form.
13. **Force Majeure.** Notwithstanding anything to the contrary contained herein, neither party shall be liable for any delays or failures in performance resulting from acts beyond its reasonable control including, without limitation, acts of God, acts of war or terrorism, shortage of supply, pandemics, breakdowns or malfunctions, interruptions or malfunction of computer facilities, or loss of data due to power failures or mechanical difficulties with information storage or retrieval systems, labor difficulties or civil unrest. In the event there is a delay or failure pursuant to the preceding sentence, all timelines herein shall be extended on a day of day basis until such time as the reason for delay or failure expires. Notwithstanding the foregoing, in the event of such an occurrence, each party agrees to make a good faith effort to perform its obligations hereunder.
14. **Confidentiality.** Parties agree that the terms of this Agreement are confidential and constitute proprietary information of the Parties hereto. Each of the Parties hereto agree that itself, and its respective partners, officers, directors, employees, agents, brokers and attorneys, shall not disclose the terms and conditions of this Agreement to any other person without the prior written consent of the other Party hereto except pursuant to an order of a court of competent jurisdiction. Provided, however, that either party may disclose the terms hereof to its respective independent accountants, to any lender or prospective lender to such party, to any governmental entity, agency or person to whom disclosure is required by applicable law, regulation or duty of diligent inquiry and in connection with any action brought to enforce the terms of this Agreement, on account of the breach or alleged breach hereof or to seek a judicial determination of the rights and obligations of the Parties hereunder.

UG-0023

Agreement for Natural Gas Storage in the Grama Ridge-Morrow Formation**RIGHT-OF-WAY EASEMENT NO. RW-30222**

This Agreement for Natural Gas Storage in the Grama Ridge-Morrow Formation (this "**Agreement**"), made this 20th day of September, 2006, is by and between the **STATE OF NEW MEXICO**, acting by and through Patrick H. Lyons, its Commissioner of Public Lands, hereinafter called the "**Grantor**", and **ENSTOR GRAMA RIDGE STORAGE AND TRANSPORTATION, LLC (fka GRAMA RIDGE STORAGE AND TRANSPORTATION, LLC)**, a limited liability company duly organized and existing under the laws of the State of Oregon, and duly authorized to transact business in the State of New Mexico, hereinafter called "**Grantee**."

WHEREAS, Grantor has previously granted oil and gas leases covering lands within the Unit Area (as herein after defined);

WHEREAS, Raptor Natural Pipeline LLC (successor by merger and name change to Llano, Inc.) acquired such oil and gas leases and desired to develop the Storage Interval (as herein after defined) for the underground storage of natural gas;

WHEREAS, Grantor, pursuant to N.M.S.A. § 70-6-3, has the authority to grant rights for underground storage of natural gas in lands subject to its control;

WHEREAS, in order to grant such storage rights within the Storage Interval, a unit was formed for the purposes of secondary recovery and gas storage pursuant to that certain Unit Agreement for the Operation of the Grama Ridge-Morrow Unit Area, Lea County, New Mexico entered into on April 25, 1973 (as subsequently amended on September 1, 1976, and May 23, 2001, the "**Unit Agreement**");

BOOK 1473 PAGE 618BOOK 1516 PAGE 243

BLF-000001

WHEREAS, the "*Unit Area*" under the Unit Agreement covers Sections 33 and 34, Township 21 South, Range 34 East, N.M.P.M.; Section 3, Township 22 South, Range 34 East, N.M.P.M.; and Lot 1, Lot 2 and S½NE¼ of Section 4, Township 22 South, Range 34 East, N.M.P.M.;

WHEREAS, the unitized formation under the Unit Agreement is defined as the zone encountered at a log depth of 12,722 feet to 13,208 feet in the Shell Oil Company State GRA Well No. 1 (API No. 30-025-21336) as shown on the Schlumberger Sonic Log B Gamma Ray Log of such well dated July 5, 1965, which well is located 1,980 feet from the North line and 660 feet from the West line (Unit E) of Section 3, Township 22 South, Range 34 East (the "*Storage Interval*");

WHEREAS, OCD Order R-4473 (January 29, 1973) and OCD Order 4491 (March 16, 1973) provided the initial authorization for storage in the Storage Interval and OCD Order R-11611 (July 3, 2001) established "Special Project Rules and Operating Procedures for the Grama Ridge Morrow Gas Storage Unit";

WHEREAS, Grantee, as successor in interest to Raptor Natural Pipeline LLC (successor by merger and name change to Llano, Inc.), holds certain rights, including the right to store natural gas in the Storage Interval, in and to the Unit Area pursuant to the Unit Agreement and the "*Original Non-BLM Agreements*" (as such term is more particularly described in Exhibit B);

WHEREAS, Grantee, as successor in interest to Raptor Natural Pipeline LLC (successor by merger and name change to Llano, Inc.), holds certain rights from the United States of America to store natural gas in Sections 4 and 10, Township 22 South, Range 34 East (Lea County, New Mexico) pursuant to that certain Agreement for the

Subsurface Storage of Gas, Morrow Formation, Grama Ridge Area, dated effective November 1, 1975, Serial No. NM-70953X, formerly Contract No. 14-08-0001-14277 (such agreement, as amended, the "**BLM Gas Storage Agreement**");

WHEREAS, Grantee conducts gas storage operations in the Storage Interval underlying both the Unit Area and the lands committed to the BLM Gas Storage Agreement;

WHEREAS, Grantee, by assignment, is the holder of that certain Business Lease No. BL-1652, dated April 20, 2004, granted by Grantor in favor of ConocoPhillips Company (as amended, the "**Business Lease 1652**") covering certain lands in Section 3, Township 22 South, Range 34 East, Lea County, New Mexico, which business lease is an integral part of Grantee's storage operations on, and includes lands comprising, the "**State Committed Lands**" (as such term is defined below);

WHEREAS, Grantee, by assignment, is the holder of that certain Business Lease No. BL-1662, dated October 4, 2004, granted by Grantor in favor of ConocoPhillips (as amended, the "**Radio Tower Site Lease**") covering certain lands in Section 3, Township 22 South, Range 34 East, Lea County, New Mexico, which lease is also an integral part of Grantee's storage operations on, and includes lands comprising, the State Committed Land (the Business Lease 1652 and Radio Tower Site Lease, collectively, the "**Business Leases**");

WHEREAS, Grantee, by partial assignment, is the holder of that certain Right-Of-Way and Easement RW 16644, dated May 4, 2005, granted by Grantor in favor of Raptor Gas Transmission LLC for a pipeline in Section 34, Township 21 South, Range 34 East, NMPM, Lea County, New Mexico, which easement is an integral part of

Grantee's storage operations on, and includes lands comprising, the State Committed Lands;

WHEREAS, Grantee, by partial assignment, is the holder of that certain Right-Of-Way and Easement RW 16406, dated May 4, 2005, granted by Grantor in favor of Raptor Gas Transmission LLC for a pipeline in Section 34, Township 21 South, Range 34 East and Section 3, Township 22 South, Range 34 East, NMPM, Lea County, New Mexico, which easement is an integral part of Grantee's storage operations on, and includes lands comprising, the State Committed Land (RW-16644 and RW-16406 collectively, the "*State Easements*");

WHEREAS, Grantor and Grantee desire to reaffirm the rights of Grantee to conduct gas storage operations generally upon, and in the Storage Interval underlying, the State Committed Lands;

WHEREAS, the Second Amendment to the Unit Agreement states that the Unit Agreement is unique and that this right is in the nature of an easement that exists independently of the oil and gas leases that were initially unitized under the Unit Agreement;

WHEREAS, Grantor and Grantee desire to amend and restate, in their entirety, the terms and conditions contained in the Unit Agreement in respect of, and only in respect of, gas storage operations in the Storage Interval underlying the State Committed Lands with the terms and conditions contained herein, including those in the Stipulations For Underground Storage of Gas attached hereto as Exhibit A (the "*Stipulations*") and made a part hereof;

WHEREAS, Grantor and Grantee desire to provide herein for the uses of the lands covered by State Business Leases and State Easements, which uses are appurtenant to Grantee's storage operations; and

WHEREAS, Grantor desire to replace and supersede the conditions of the State Business Leases and State Easements in their entirety;

NOW, THEREFORE, Grantor, for and in consideration of the Fees (as defined in the Stipulations) to be paid by the Grantee, receipt whereof is hereby acknowledged, has granted and by these presents does grant to the Grantee, its successors and assigns, the exclusive right to use the following lands in Lea County, New Mexico, for the Permitted Uses (as such term is defined in the Stipulations):

**Township 21 South, Range 34 East, NMPM**

Section 33: NW/4NE/4 (mineral interest only), W/2SE/4 (mineral interest only) E/2E/2, W/2

Section 34: S/2S/2 (mineral interest only), N/2S/2, N/2

**Township 22 South, Range 34 East, NMPM**

Section 3: Lots 1 through 4, S/2N/2, S/2 (All)

Section 4: Lots 1 & 2 and S/2NE/4 (NE/4) (surface only)

all of which lands are hereby committed to this Agreement and are referred to as "**State Committed Lands**" and contain a total of 1,769.81 surface acres and 1887.16 mineral acres, in both cases, more or less.

TO HAVE AND TO HOLD the said State Committed Lands for the Permitted Uses and purposes unto Grantee, its lawful successors and assigns, subject to the terms and conditions contained herein.

The State Committed Lands shall be developed and operated as an entirety. The Permitted Uses on any part of the State Committed Lands shall be deemed to be use of

all the State Committed Lands. The grant herein is made upon the further condition that should the State Committed Lands hereby granted cease to be used by the Grantee or its lawful successors or assigns for any of the Permitted Uses for the consecutive period of one (1) year, the rights herein granted shall terminate, free and clear from any claim, interest or demand of the said Grantee or its successors or assigns; provided further, in any event, the Grantee shall be given notice of any such claimed cessation and a reasonable opportunity thereafter within which to remedy any default before a final determination is made to terminate the Grantee's rights under this Agreement.

If Grantee's use entails the crossing of any right-of-way for a highway, or the right-of-way of any other road, telephone, telegraph or transmission line, Grantee will exercise due care so as not to interfere with said rights-of-way and will comply with all laws, rules and regulations in connection with the making of such crossings.

Grantee, its successors and assigns hereby agree carefully to avoid destruction or injury to any improvements or livestock lawfully upon the State Committed Lands; carefully to close all gates immediately upon passing through such gates; and pay the reasonable and just damages for injury or destruction, if any, arising from Grantee's construction or operation activities on the State Committed Lands.

The Grantee shall have the right to assign this Agreement, subject to the approval of the Grantor.

Grantee, including its assigns, agents, and contractors shall at its own expense fully comply with all applicable laws, regulations, rules, ordinances, and requirements of the city, county, state, federal authorities and agencies, in all matters and things affecting the State Committed Lands and operations thereon. Such government entities

2007 DEC 3 PM 8 24  
STATE LAND OFFICE  
SANTA FE, N.M.

are not to be deemed third party beneficiaries hereunder; however, this clause is enforceable by the Grantor as herein provided or as otherwise provided by law.

This Agreement is executed subject to all valid existing rights; provided, however, that Grantee's rights deriving from Grantor in respect of its gas storage operations created under the Unit Agreement and/or the Original Non-BLM Agreements shall continue in full force and effect and relate back to the dates of the Unit Agreement and/or the Original Non-BLM Agreements, as applicable, subject only to the terms and conditions contained herein. This Agreement, together with its attachments, is intended to modernize, amend and restate, in their entirety, the terms and conditions of the Unit Agreement in respect of gas storage on the State Committed Lands within the Storage Interval, which Unit Agreement through length of time and amendments is in need of clarification and updating. Furthermore, Grantor grants to Grantee reasonable use of the surface of the State Committed Lands as is necessary to operate and maintain gas storage operations within the Storage Interval, including, without limitation, such use of the surface as is set forth in the Permitted Uses section of the Stipulations; and in this regard Grantor and Grantee agree to replace and supersede the State Business Leases and State Easements. Grantor agrees to exclude other parties from certain uses that would interfere with Grantee's storage operations as more fully described in Paragraph 6 of the Stipulations.

**EXHIBIT A**

attached to and made a part of that  
certain Agreement for Natural Gas Storage in the  
Grama Ridge-Morrow Formation

**STIPULATIONS FOR UNDERGROUND  
STORAGE OF GAS**

1. **PARTIES:** The parties hereto are the State of New Mexico acting by and through its Commissioner of Public Lands ("*Grantor*") and Enstor Grama Ridge Storage and Transportation, LLC (fka Grama Ridge Storage and Transportation, LLC) ("*Grantee*") (each of Grantor and Grantee, a "*Party*", and collectively, the "*Parties*").
2. **TERMS:** Any capitalized term contained herein, not otherwise defined herein, will have the meaning ascribed to such term in the Agreement for Natural Gas Storage in the Grama Ridge-Morrow Formation (the "*Agreement*") to which this Exhibit A is attached.
3. **PURPOSE:** In order to ~~prevent waste~~ and conserve natural resources, Grantee proposes to continue the use of certain lands in Lea County, New Mexico, specifically, Sections 33 and 34, Township 21 South, Range 34 East, N.M.P.M. and Sections 3, 4 and 10, Township 22 South, Range 34 East, N.M.P.M. (the "*Storage Area*"), and the underlying Storage Interval, more particularly described in OCD Order No R-11611 (July 3, 2001), for the development and operation of an underground gas storage facility (the "*Storage Facility*") as described in detail in Section 5 herein. Due to the fact that a portion of the Storage Area is comprised of lands owned by the State of New Mexico, specifically the State Committed Lands, Grantor has granted

2009 DEC 3 PM 3:24  
STATE LANDS OFFICE  
SANTA FE, N.M.

exclusively unto Grantee the use of the Storage Interval underlying the State Committed Lands for the purpose of injecting, storing and removing natural gas, and other gases or gaseous substances and vapors (hereinafter collectively referred to as "**Gas**"), from the Storage Interval (collectively, the "**Gas Storage Operating Rights**").

Furthermore, in connection with the development and operation of the Storage Facility, Grantor has granted to Grantee reasonable use of the surface of the State Committed Lands as is necessary to develop, operate and maintain the Storage Facility, including, without limitation, such use of the surface as is specifically set forth herein.

The Agreement, together with its attachments, is intended to a) modernize, amend and restate, in their entirety, the terms and conditions of the Unit Agreement in respect of gas storage on the State Committed Lands within the Storage Interval; and b) replace and supersede the State Business Leases and State Easements.

Accordingly, Grantor and Grantee have agreed and stipulated as herein provided:

4. **LANDS:** The following described lands are hereby designated and recognized as constituting the Storage Area:

Township 21 South, Range 34 East, NMPM  
Section 33: All  
Section 34: All

Township 22 South, Range 34 East, NMPM  
Section 3: All  
Section 4: All

2009 DEC 3 PM 8 24  
STATE LAND OFFICE  
SANTA FE, N.M.

Section 10: All

Total acres . . . . . 3211.92, more or less (the "*Storage Area Acreage*")

Lands owned by the State of New Mexico within the Storage Area are described as follows:

**Township 21 South, Range 34 East, NMPM**

Section 33: NW/4NE/4 (mineral interest only), W/2SE/4 (mineral interest only) E/2E/2, W/2

Section 34: S/2S/2 (mineral interest only), N/2S/2, N/2

**Township 22 South, Range 34 East, NMPM**

Section 3: Lots 1 through 4, S/2N/2, S/2 (All)

Section 4: Lots 1 & 2 and S/2NE/4 (NE/4) (surface only)

all of which lands are hereby committed to this Agreement and are referred to as "*State Committed Lands*" and contain a total of 2,090 acres, more or less, of which the Grantor owns 1,769.81 surface acres, more or less (the "*State Surface Acreage*") and 1,887.16 mineral acres, more or less (the "*State Mineral Acreage*").

5. **FORMATION:** The Storage Interval (sometimes referred to as the "Morrow Formation") is that certain subsurface zone underlying the Storage Area encountered at a log depth of 12,722 feet to 13,208 feet in the Shell Company State GRA Well No. 1 (API No. 30-025-21336) as shown on the Schlumberger Sonic Log B Gamma Ray Log of such well dated July 5, 1965, which well is located 1,980 feet from the North line and 660 feet from the West line (Unit E) of Section 3, Township 22 South, Range 34 East.

6. **OPERATIONS:** Subject to the other terms and provisions of this Agreement, Grantee shall have, and Grantor has granted to Grantee, the exclusive right, privilege, and authority to utilize the Storage Interval underlying

2001 DEC 3 PM 8 24  
STATE LAND OFFICE  
SANTA FE, N.M.

the State Committed Lands for Gas Storage Operating Rights and the right, privilege, and authority to utilize the State Committed Lands as is necessary or desirable to use and enjoy the Gas Storage Operating Rights. Pursuant to NMAC 19.2.10.22. Grantor expressly excludes other parties from Gas storage use within the State Committed Lands and expressly excludes surface use by other parties that do not currently hold valid existing rights (including, now or hereafter, valid renewals and extensions of those rights) in those certain portions of the SW/4NW/4 of Section 3, Township 22 South, Range 34 East, NMPM, Lea County, New Mexico, as more particularly described in Exhibit C and Exhibit D to this Agreement. Grantor further expressly excludes all other surface activities within the State Committed Lands that would interfere with, or would otherwise limit the enjoyment of, Grantee's storage operations and the Gas Storage Operating Rights. In no way limiting the foregoing, such rights of Grantee will include, but not be limited to, the following activities (collectively, and together with the Gas Storage Operating Rights, the "*Permitted Uses*"):

- a. The exclusive right to drill, complete, equip, connect to pipelines, maintain, and operate injection and/or withdrawal wells completed in the Storage Interval;
- b. The exclusive right to re-establish, re-open, repair, recondition, plug or re-plug any non-commercial existing wells heretofore drilled on the State Committed Lands, whether or not abandoned, for the purpose of injecting and/or withdrawing Gas in and from the Storage Interval;

- c. Drill, construct, install, operate, maintain, remove, and abandon, at locations selected by Grantee upon the State Committed Lands, such wells, piping, electric lines, communication facilities, and other fixtures, structures, equipment and appurtenances as Grantee, in its sole discretion, may deem necessary or desirable for the purpose of receiving, injecting, storing, treating, processing, and removing Gas in, from, and under the Storage Area;
- d. Conduct geological and geophysical surveys to determine the suitability and performance of the Storage Area for the Storage Facility;
- e. The exclusive right to transport Gas, whether produced from the State Committed Lands or elsewhere, into or out of the Storage Interval underlying the Storage Area through any well now or hereafter located or drilled on the Storage Area. Grantee shall have the right, in its sole discretion, to inject such Gas into the Storage Interval, store such Gas therein and in its sole discretion remove the Gas therefrom, with the Gas so injected, stored and removed to be and remain the personal property of Grantee, or Grantee's customers;
- f. The exclusive right to remove from Gas withdrawn from the Storage Interval any water vapors or liquid hydrocarbon absorbed therein;
- g. The rights of ingress and egress in, on and across the State Committed Lands, including, without limitation, the right to use any existing roads and to establish and utilize new roads as are reasonably necessary for

DEPT. OF REVENUE  
STATE OF NEW MEXICO  
SANTA FE, N.M.  
JAN 3 3 30 PM '83

the operation of the Storage Facility and for the enjoyment by Grantee of the rights and privileges granted unto Grantee in this Agreement.

- h. It is expressly understood and agreed that Grantee is under no obligation to drill or utilize any existing well or wells on the State Committed Land for primary production, secondary recovery and/or storage purposes. In the event that no surface operations for the underground storage of Gas is actually undertaken on the State Committed Lands, but such operations are conducted by Grantee in the Storage Area, Grantee shall have the right to inject Gas into the Storage Interval underlying the surface of the State Committed Land, store the Gas therein, and remove Gas (together with any native hydrocarbons) utilizing in such process of injection and removal of Gas any well or wells located within the Storage Area.
- i. Grantee, as approved and authorized by any agency having regulatory authority, shall be the sole and exclusive judge as to whether Gas is being stored in a portion of the Storage Interval underlying the State Committed Land, subject to reasonable proof, if requested by the Grantor, of a nature generally accepted in the gas storage industry.
- j. Grantee shall be, and shall have the rights of, the Operator in respect to the Gas Storage Operating Rights.
- k. Use, hold, and occupy the Storage Area, including the State Committed Land, together with necessary rights of ingress and egress, for all such foregoing purposes.

2009 DEC 3 PM 8 24  
STATE LAND OFFICE  
SANTA FE, N.M.

7. OBLIGATIONS OF GRANTEE:

- a. Within one (1) year after the later of the expiration of this Agreement and removal by Grantee of last recoverable Gas from the Storage Interval, Grantee shall fill all pits and ponds, remove all structures and equipment, plug and abandon all wells drilled or used by Grantee in accordance with applicable rules, regulations, and orders of the State of New Mexico, and restore the surface of the State Committed Land as nearly as practicable to its original condition, natural wear and tear and damage from the elements excepted.
- b. Grantee shall maintain any well site, storage tank location, or any other surface area used on the State Committed Lands in compliance with all applicable rules and regulations

8. EFFECTIVE DATE AND TERM: This Agreement shall become effective June 1, 2006, upon approval by Grantor, and shall remain in effect for a term of thirty-five (35) years, provided however that Grantee's rights hereunder shall terminate one (1) year after Grantee has ceased to use the State Committed Lands for gas storage purposes. The Agreement and the grant contained herein may be renewed for additional periods upon application to Grantor. Any such renewals are subject to such terms and conditions as the Grantor may reasonably require, and payment of reasonable compensation.

9. PAYMENTS: The following payments from Grantee to Grantor will compensate Grantor for all uses and rights granted herein and are sometimes referred to collectively as the "**Fees**":

2007 DEC 3 PM 8:24  
STATE LAND OFFICE  
SANTA FE, N.M.

- a. Grantee shall pay an annual storage fee (the "*Annual Storage Fee*") of one dollar (\$1.00) per acre, based upon the State Surface Acreage, which fee will be paid to Grantor regardless of the amount of Gas injected or withdrawn.
- b. Grantee shall pay an injection and withdrawal fee of \$0.02379 per MCF on the quantity of Gas injected and withdrawn by Grantee from the Storage Interval, prorated based upon a fraction, the numerator of which is the State Mineral Acreage and the denominator of which is the Storage Area Acreage (the "*Injection and Withdrawal Fee*"). The Injection and Withdrawal Fee will be paid on a quarterly basis and each such payment remitted by Grantee shall provide a statement indicating the volume of Gas injected and withdrawn and the rate referenced in this section supporting the amount of payment. The time period for corrections to each Injection and Withdrawal Fee payment data shall be six (6) months from the date of the initial payment with a three (3) month rebuttal period. This limitation does not apply in the case of deliberate omission or misrepresentation or mutual mistake of fact, nor shall this limitation diminish the Parties' other statutory or contractual rights. If there is a deliberate omission or misrepresentation of fact, there will be no time limit on correction of the payment.
- c. Grantee shall pay the Annual Storage Fee on or before September 30 of each calendar year during the term of this Agreement (Grantee has

previously made the September 2005 payment, so payments under this Agreement shall beginning September 30, 2006). Grantee shall pay the Injection and Withdrawal Fee within 30 days following the end of the calendar year quarter to which such payment relates. Unless otherwise directed by Grantor in writing, Grantee shall make all payments of the Fees to the order of the New Mexico State Land Office.

- d. Effective July 1, 2006, and every July 1<sup>st</sup> thereafter, the Injection and Withdrawal Fee will be adjusted in accordance with the COPAS accounting procedure wage index adjustments based on the Bureau of Labor Statistics for Crude, Petroleum and Gas Field Workers ("COPAS Wage Index"). Upon any future renewal, the Grantor reserves the right to negotiate for a different indexing adjustment depending on matters such as, but not limited to, the industry practice and the need to harmonize this Agreement with other storage agreements entered into by Grantor so that such agreements share major common features.

10. MEASUREMENT: All Gas stored by Grantee shall be measured when injected into and withdrawn from the Storage Interval, and a record thereof shall be kept. Grantee agrees to render to Grantor within 30 days following the end of each calendar year quarter a statement certified by Grantee showing the total amount of Gas injected into and withdrawn from the Storage Interval by Grantee during that preceding calendar year quarter. The quantity of Gas reported as

2007 DEC 3 PM 8:24  
STATE LAND OFFICE  
SANTA FE, N.M.

injected and withdrawn each calendar year quarter (and used to calculate the Injection and Withdrawal Fee) shall be computed at a standard pressure of 14.73 pounds per square inch absolute and a standard temperature of 60 degrees Fahrenheit, regardless of the pressure and temperature at which the Gas was actually measured.

11. ROYALTIES ON NATIVE HYDROCARBONS: It is acknowledged, agreed and stipulated by the Parties that Grantor has previously been compensated for all native Gas contained within the Storage Interval that may be produced and saved by Grantee. As such, Grantor shall not be owed any additional payments in respect of any Gas produced and saved by Grantee from the Storage Interval (other than the Fees as set forth herein).

In respect to oil produced and saved and all liquid hydrocarbons removed and saved by Grantee from Gas withdrawn from the Storage Interval, Grantee shall pay to Grantor as royalty 12.5% of the net proceeds received by Grantor for such oil and/or liquid hydrocarbons; provided, however, that such royalty paid to Grantor shall be proportionally reduced to Grantor's mineral ownership, on an acreage bases, within the Storage Area. For purposes of this section, Grantor's mineral ownership, on an acreage basis, shall be deemed to be a fraction, the numerator of which is the State Mineral Acreage and the denominator of which is the Storage Area Acreage. Grantee shall make payment of such royalty within 30 days from receipt by Grantee of the proceeds received from the sale of any such liquid hydrocarbons. Grantor and Grantee agree that oil and gas leases covering lands within the State Committed Lands are hereby modified to

2007 DEC 3 AM 8 24  
STATE LAND OFFICE  
SANTA FE, N.M.

incorporate the above-described royalty payment provisions in respect of the Storage Interval, to the extent of Grantee's interest in such leases.

12. OIL AND GAS RIGHTS:

- a. Certain lands within the State Committed Lands are presently covered by existing oil and gas leases, which leases are subject to Grantee's rights under the Unit Agreement and, in some instances, to provisions contained in assignments out of Grantee's predecessors in interest.
- b. Grantor agrees that any new, amended or replacement oil, gas and/or mineral lease or leases issued by Grantor covering any portion of the State Committed Lands, whether on lands presently unleased or on lands presently leased that may be surrendered, expire, or otherwise terminate, will be issued subject to the following provisions: (1) that the lessee thereunder, his successors and assigns, will conduct operations in such a manner as not to interfere with or in any way compromise the integrity of Grantee's gas storage operations under this Agreement, which Agreement will be expressly recited in any such leases; (2) that any drilling, testing, work-over, or any other construction, operations or maintenance activities by such lessee, his successors and assigns, will be conducted in such a manner as to protect the Storage Interval from damage and loss of gas; (3) that such lessee, his successors and assigns, will own no interest in any hydrocarbons, whether native or stored, produced from the Storage Interval nor will it own any interest in the proceeds received by

Grantee from any sale of such hydrocarbons; and (4) that such leases, and such lessee, its successors and assigns, are expressly subject to the Special Project Rules and Operating Procedures adopted in OCD Order R-11611, which order will be expressly referred to therein. Grantor further agrees to expressly exclude from any oil and gas leases surface use on all of the SW/4 of Section 34 and SE/4 of Section 33, both in Township 21 South, Range 34 East, NMPM and the NW/4 of Section 3, Township 22 South, Range 34 East, NMPM.

- c. Grantor agrees that the State of New Mexico is not entitled to a royalty payment on Gas withdrawn from the Storage Interval by Grantee and that all future oil and gas leases covering any portion of the State Committed Lands issued by Grantor will expressly incorporate a provision stating such agreement.

13. CHANGES TO STORAGE AREA: In the event Grantee determines, from time to time, that a portion of the State Committed Lands is no longer necessary for the Storage Facility, Grantee may eliminate said portion from the Storage Area and from the provisions hereof. Should there be, from time to time, a change in the Storage Area as a result of elimination or addition of acreage or a change in the amount of State Committed Lands, (a) Grantee shall notify Grantor in writing and (b) after such notice is given, the percentage factor for payments hereunder, including, without limitation, payment of the Injection and Withdrawal Fee and the Annual Storage Fee, payable to Grantor

will be adjusted accordingly and the resulting percentage factor will be applicable to all subsequent payments under this Agreement.

14. CONSERVATION: Operations under the Storage Facility shall be conducted to provide for the most economical and efficient recovery and storage of gas without waste as defined by or pursuant to the laws or regulations of the State of New Mexico.

15. COVENANTS: It is covenanted and agreed that each obligation hereunder shall constitute covenants running with the land and shall extend to and shall be binding upon and every benefit hereof shall inure to the successors or assigns of Grantor and Grantee. If any provision hereof should be found to be inconsistent with applicable laws, rules or regulations, this Agreement shall be conformed to any such laws, rules or regulations and shall continue in full force and effect.

16. NOTICES: All notices required under the terms and stipulations of this Agreement shall be deemed effective when received at the following addresses:

For Grantee:

Enstor Grama Ridge Storage and Transportation, LLC  
c/o Enstor Operating Company, LLC  
20333 State Hwy. 249, Suite 400  
Houston, Texas 77070  
Attn: Land Department

For Grantor:

Director, Surface Resources Management Division  
New Mexico State Land Office  
P.O. Box 1148  
Santa Fe, NM 87504-1148

Any adjustments to the above listed notice addresses shall be made in writing and shall not be effective until written confirmation of the acceptance of the adjustment is received by the requesting party from the receiving party.

Each provision of this Agreement shall be binding upon the parties hereto and their respective voluntary or involuntary successors in interest.

17. HOLD HARMLESS CLAUSE: Notwithstanding any of the provisions contained in these Stipulations, as between Grantor and Grantee, Grantee shall save, hold and protect the Commissioner of Public Lands and the State of New Mexico harmless from all claims and liabilities resulting from damages or injuries solely caused by Grantee in its operation of the Storage Facility.

**EXHIBIT B**

**HISTORICAL DOCUMENTS RELATING TO  
THE GRAMA RIDGE STORAGE FACILITY**

**1. STATE LAND OFFICE AGREEMENTS:** The Storage Area contains 1769.81 acres, more or less, of State of New Mexico surface lands and 1,887.16 acres, more or less, of State of New Mexico mineral lands. The following agreements with the New Mexico State Land Office concern the right to store gas as well as appurtenant rights necessary to operate the Storage Facility. The issuance of the Agreement is intended to amend and restate the following agreements and all gas storage operations rights in the Storage Interval underlying the State Committed Lands granted therein are expressly made part of the Agreement (the following, collectively, the "*Non-BLM Agreements*"):

- a) Unit Agreement for the Operation of the Grama Ridge Morrow Unit Area, Lea County, New Mexico, April 25, 1973;
- b) Consent and Ratification of Grama Ridge Morrow Unit Agreement and Amendment thereto, Lea County, New Mexico, November 2, 1976;
- c) Amendment to the Unit Agreement for the Operation of the Grama Ridge Morrow Unit Area, Lea County, New Mexico, September 1, 1976;
- d) Second Amendment to the Unit Agreement for the Operation of the Grama Ridge Unit Area, Lea County, New Mexico, May 23, 2001;
- e) Memorandum of Agreement Pursuant to the Unit Operating Agreement for the Operation of the Grama Ridge Unit Area, Lea County, New Mexico.
- f) Lease No. BL-1652, dated April 20, 2004 and Amendment No. 1 to BL-1652 dated November 17, 2004 [and Amendment No. 2 dated effective January 25, 2006] covering a tract of land in Section 3, Township 22 South, Range 34 East,

NMPM, Lea County, New Mexico, as assigned to Grama Ridge Storage and Transportation, LLC on May 4, 2005.

g) Lease No. BL-1662, dated October 4, 2004, covering a tract of land in Section 3, Township 22, South, Range 34 East, NMPM, Lea County, New Mexico, as assigned to Grama Ridge Storage and Transportation, LLC on May 4, 2005.

h) RW-16644, dated November 15, 1966, for a pipeline in Section 34 as assigned to Grama Ridge Storage and Transportation, LLC on May 4, 2005.

i) RW-16406, dated January 24, 1966, for a pipeline in Section 34 and Section 3 as assigned to Grama Ridge Storage and Transportation, LLC on May 4, 2005.

2. **BLM AGREEMENTS:** The Storage Area contains 1280 acres, more or less, of federal lands. The following agreements with the Bureau of Land Management concern the right to store gas in a certain portion of the Storage Area:

a) Agreement for Subsurface Storage of Natural Gas, Morrow Formation, Grama Ridge Area, Lea County, New Mexico, 14-08-0001-14277, November 1, 1975;

b) First Amendment to Agreement for Subsurface Storage of Natural Gas, Morrow Formation, Grama Ridge Area, Lea County, New Mexico, 14-08-0001-14277, April 1, 1981.

3. **OCD ORDERS:** The following New Mexico Oil Conservation Division Orders concern gas storage operations in the Storage Area:

- a) Order R-4473/4491 (Case Nos. 4895 & 4896)
- b) Order R-5995 (Case No. 6496)
- c) Order R-5996 (Case No. 6497)
- d) Order R-7569 (Case No. 8189)
- e) Order R-7582 (Case No. 8088)
- f) Order R-11611 (Case No. 12588)
- g) Order R-11768-B (Case Nos. 12622 & 12908)

### PORE SPACE LEASE

THIS PORE SPACE LEASE (this "Lease") is made effective as of the Effective Date (as defined below), by and between **Irma M. Bitner**, whose address is 2200 80th St NE, Bismarck ND 58501, (whether one or more, "Lessor"), and **Dakota Gasification Company**, a North Dakota corporation, whose address is 1717 East Interstate Avenue, Bismarck, North Dakota 58503 (whether one or more, "Lessee"). Lessor and Lessee may be individually referred to herein as a "Party" and collectively as the "Parties".

1. Leased Premises. Lessor, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, does hereby grant, demise, lease and let unto Lessee for Lessee's geologic storage operations and other purposes set forth herein, the following-described lands situated in Mercer County, North Dakota:

Township 145 North, Range 88 West  
Section 23: W2NE, NW

containing 240.00 acres, more or less (the "Leased Premises"), subject to the terms and conditions set forth herein. The entire project area includes 15,979.19 acres, more or less (the "Project Area").

2. Term.

(a) Primary Term. This Lease shall commence on the date Lessee executes this Lease ("Effective Date") and continue for an initial term of Fifteen (15) years ("Primary Term") unless sooner terminated in accordance with the terms of this Lease. On the Effective Date of this Lease and thereafter on or before each annual anniversary date of this Lease, Lessee shall pay to Lessor the sum of Twenty Five Dollar (\$25.00) per surface acre covered by this Lease. After the Primary Term, Lessee retains the right to extend this lease up to three (3) additional five (5) year terms by providing Lessor with at least a 60-day notice, as long as Lessee continues to pay to Lessor through any extension period, the annual lease rate provided for above and any royalty rates as set forth in Section 3 of this Lease.

(b) Operational Term. This Lease shall continue beyond the Initial Term for so long as any portion of the Leased Premises or Lessee's storage facilities located in, on or under the Leased Premises (including without limitation, any Reservoirs) are subject to a permit issued by the North Dakota Industrial Commission (the "Commission") (a "Permit") or under the ownership or control of the State of North Dakota; *provided, however*, that all of Lessee's obligations under this Lease shall terminate upon issuance of a certificate of project completion pursuant to Chapter 38-22 of the North Dakota Century Code (the "Operational Term"). If the Primary Term expires and no portion of the Leased Premises or Lessee's storage facilities located in, on or under the Leased Premises is subject to a Permit, this Lease shall terminate, and Lessee shall execute a document evidencing termination of this Lease in recordable form and shall record it in the official records of the county or counties in which any portion of the Leased Premises is located.

3. Royalty. Lessee shall pay to Lessor its proportionate share of One Dollar and Seventy Cents (\$1.70) per metric ton of carbon dioxide (CO<sub>2</sub>) injected into the reservoirs and subsurface pore spaces (as used herein, such terms shall have the meanings set forth in Chapter 38-22 and Chapter

47-31 of the North Dakota Century Code), stratum or strata underlying the Leased Premises (collectively, "Reservoirs"), or reservoirs and subsurface pore spaces, stratum or strata unitized or amalgamated therewith (the "Amalgamated Reservoirs"). Lessor's "proportionate share" shall be determined on a net acre basis and the Parties hereby stipulate that the acreage set forth in Section 1 shall be used to calculate Lessor's proportionate share of the Project Area. The quantity of carbon dioxide injected into the Reservoirs or any Amalgamated Reservoirs shall be determined through the use of metering equipment installed and operated by Lessee at the injection site. All royalties due hereunder for carbon dioxide injected into the Reservoirs or any Amalgamated Reservoirs during any calendar year shall be paid to Lessor within sixty (60) days of the end of said year. Lessor and Lessee agree that this Lease shall continue as specified herein even in the absence of injection operations and the payment of royalties.

4. Right to Pore Space/Storage of Carbon Dioxide. Lessor grants to Lessee the exclusive right to inject and store carbon dioxide and other incidental gaseous substances into and in the Reservoirs, together with the right of reasonable use of the surface of the Leased Premises as set forth in Section 5. Lessor shall not grant to any other person the right to inject or store carbon dioxide or any other gases, liquids, solids or semi-solids into the Reservoirs underlying the Leased Premises.

5. Surface Access. Lessor grants Lessee the right of reasonable use of the surface of the Leased Premises, including without limitation, the rights of ingress and egress over the Leased Premises, for purposes of any surveys and/or ongoing testing activities related to this Lease provided, however, that Lessee shall compensate Lessor, or its tenants, for any physical damages to growing crops, livestock and improvements located on the Leased Premises, if such damages are caused by Lessee's use of the Leased Premises.

6. Amalgamation. Lessee, in its sole discretion, shall have the right and power, at any time and from time to time during the term of this Lease to pool, unitize, or amalgamate any reservoirs or subsurface pore spaces, stratum or strata underlying the Leased Premises with any other lands or interests into which such reservoirs or subsurface pore spaces extend and document such unit in accordance with applicable law or agency order. Amalgamated units shall be of such shape and dimensions as Lessee may elect and as are approved by the Commission. Amalgamated areas may include, but are not required to include, land upon which injection or extraction wells have been completed or upon which the injection and/or withdrawal of carbon dioxide and/or related gaseous substances has commenced prior to the effective date of amalgamation. In exercising its amalgamation rights under this Lease and if required by law, Lessee shall record or cause to be recorded a copy of the Commission's amalgamation order or other notice thereof in the county or counties in which any portion of the amalgamated unit is located. Amalgamating in one or more instances shall, if approved by the Commission, not exhaust the rights of Lessee to amalgamate Reservoirs or portions of Reservoirs into other amalgamation areas, and Lessee shall have the recurring right to revise any amalgamated area formed under this Lease by expansion or contraction or both. Lessee may dissolve any amalgamated area at any time and document such dissolution by recording an instrument in accordance with applicable law or agency order. Lessee shall have the right to negotiate, on behalf of and as agent for Lessor, any unit, amalgamation, storage or operating agreements with respect to amalgamation of reservoir or pore space interests underlying the Leased Premises or the operation of any amalgamated areas formed under such agreements and Lessor shall ratify any such agreements upon Lessee's request. To the extent any of the terms of such agreements conflict with the terms of this Lease, the terms of such agreements

shall control and the provisions of this Lease shall be deemed modified to conform to the terms, conditions, and provisions of any such agreements which are approved by the Commission.

7. Lessee Obligations. Lessee shall have no obligation, express or implied, to begin, prosecute or continue storage operations in, upon or under the Leased Premises, or store and/or sell or use all or any portion of the gaseous substances stored thereon. The timing, nature, manner and extent of Lessee's operations, if any, under this Lease shall be at the sole discretion of Lessee. All obligations of Lessee are expressed herein, and there shall be no covenants implied under this Lease, it being agreed that all amounts paid hereunder constitute full and adequate consideration for this Lease.

8. Ownership. Lessee shall at all times be the owner of (i) the carbon dioxide and other gaseous substances stored in the Reservoirs or any Amalgamated Reservoirs, and (ii) all Facilities constructed or installed by Lessee on the Leased Premises. Lessee shall have the right, but not the obligation, at any time during this Lease to remove all or any portion of the property or fixtures placed by Lessee on the Lease Premises. Notwithstanding the foregoing, title to the storage facility and to the stored carbon dioxide or other gaseous substances shall be transferred to the State of North Dakota upon issuance of a certificate of project completion by the Commission in accordance with Chapter 38-22 of the North Dakota Century Code.

9. Minerals, Oil and Gas. This lease is not intended to grant or convey, nor does it grant or convey, any right to or obligation for lessee to explore for or produce minerals, including oil and gas, that may exist on or under the leased premises.

10. Surrender of Leased Premises. Lessee shall have the right, but not the obligation, at any time from time to time to execute and deliver to Lessor a surrender and/or release covering all or any part of the Leased Premises for which the Reservoirs are not being utilized for storage as set forth herein, and upon delivery of such surrender and/or release to Lessor this Lease shall terminate as to such lands, and Lessee shall be released from all further obligations and duties as to the lands so surrendered and/or released, including, without limitation, any obligation to make payments provided for herein, except obligations accrued as of the date of the surrender and/or release. Lessee shall be able to surrender any and or all of the Leased Premises if not utilizing the Reservoirs located thereunder.

11. Hold Harmless and Indemnification. The Lessee agrees to defend, indemnify, and hold harmless Lessor from any claims by any person that are a direct result of the Lessee's use of the Leased Premises or Reservoirs. Notwithstanding the foregoing, such indemnity/hold harmless obligation excludes (i) any claim or cause of action, or alleged or threatened claim or cause of action, damage, judgment, interest, penalty or other loss arising or resulting from the negligence or intentional acts of Lessor or Lessor's agents, invitees, or licensees; or third parties, and (ii) any claim for exemplary, punitive, special or consequential damages claimed by Lessor. Lessee further accepts liability and indemnifies Lessor for reasonable costs, expenses and attorneys' fees incurred in establishing and litigating the indemnification coverage provided above. The legal defense provided by Lessee to the Lessor under this paragraph must be free of any conflicts of interest even if this requires Lessee to retain separate legal counsel for Lessor.

12. Hazardous Substances. Lessee shall have no liability for any regulated hazardous substances located on the Leased Premises prior to the Effective Date or placed in, on or about the Leased

Premises by Lessor or any third-party on or after the Effective Date, and nothing in this Lease shall be construed to impose upon Lessee any obligation for the removal of such regulated hazardous substances. As used herein, "hazardous substances" shall have the meaning set forth in the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) and any amendments thereto, or any other local, state or federal statutes.

13. Termination. A material violation or default of any terms of this Lease by Lessee shall be grounds for termination of the Lease. Lessor shall provide Lessee written notice of violation or default and Lessee shall have sixty (60) days after receipt of said notice to substantially cure such violations or defaults. If Lessee fails to substantially cure such violations or defaults within the 60-day cure period, Lessor may terminate the Lease; *provided that*, if it is not reasonably possible to cure such violations or defaults within the 60-day cure period, Lessee shall have additional time as is reasonably necessary to cure such violations or defaults provided Lessee has commenced its efforts to cure within the initial sixty (60) day period and thereafter diligently pursues such cure. Lessee may terminate the lease with thirty (30) days written notice to Lessor. Upon termination of this Lease, Lessee shall have one hundred eighty (180) days to remove all facilities and property (except for carbon dioxide or other incidental gaseous substances which have been injected into the Reservoirs) of Lessee located on the Leased Premises.

14. Taxes. Lessee shall pay all taxes, if any, levied against its personal property or on its improvements to the Leased Premises. Lessor shall pay for all real estate taxes and other assessments levied upon the Leased Premises. Lessee shall have the right to pay all taxes, assessments and other fees on behalf of Lessor and to deduct the amount so paid from other payments due to Lessor hereunder.

15. Conduct of Operations. In conducting its operations hereunder, Lessee shall use its best efforts to comply with all applicable laws, rules and regulations and ordinances pertaining thereto. Lessee reserves and shall have the right to challenge and/or appeal any law, ruling, regulation, order or other determination and to carry on its operations in accordance with Lessee's interpretation of the same, pending final determination.

16. Force Majeure. Should Lessee be prevented from complying with any express covenant of this Lease, from utilizing the Lease Premises for underground storage purposes by reason of scarcity of or an inability to obtain or to use equipment or material or failure or breakdown of equipment, or by operation of force majeure, any federal or state law or any order, rule or regulation of governmental authority, then while so prevented, Lessee's obligation to comply with such covenant shall be suspended and this Lease shall be extended while and so long as Lessee is prevented by any such cause from utilizing the property for underground storage purposes and the time while Lessee is so prevented shall not be counted against Lessee, anything in this Lease to the contrary notwithstanding.

17. Warranty of Title. Lessor represents and warrants to Lessee that Lessor is the owner of the surface of the Leased Premises and the pore space located thereunder. Lessor hereby warrants and agrees to defend title to the Leased Premises and the pore space located thereunder and Lessor hereby agrees that Lessee, at its option, shall have the right to discharge any tax, mortgage, or other lien upon the Leased Premises, and in the event Lessee does so, Lessee shall be subrogated to such lien with the right to enforce the same and apply royalty payments or any other payments due to Lessor toward satisfying the same.

18. Quiet Enjoyment. Lessor shall have the quiet use and enjoyment of the Leased Premises in accordance with the terms of this Lease. Lessor's activities and any grant of rights Lessor makes to any person or entity, whether located on the Leased Premises or elsewhere, shall not interfere with the rights granted to Lessee hereunder.

19. Environmental Incentives and Tax Credits. Lessee shall be the owner of (i) any and all credits, benefits, emissions reductions, offsets, and allowances, howsoever entitled, attributable to Lessee's geologic storage operations, including any avoided emissions and the reporting rights related to these avoided emissions, such as 26 U.S.C. §45Q Tax Credits, and any other attributes of Lessee's ownership of the Facilities and Lessee's geologic storage operations ("Environmental Attributes"), and (ii) any and all credits, rebates, subsidies, payments or other incentives that relate to the use of technology incorporated into Lessee's geologic storage operations, environmental benefits of such operations, or other similar programs available from any regulated entity or any governmental authority ("Environmental Incentives"). Lessee is further entitled to the benefit of any and all (a) investment tax credits, (b) production tax credits, (c) credits under 26 U.S.C. §45Q credits, and (d) similar tax credits or grants under federal, state or local law relating to Lessee's geologic storage operations ("Tax Credits"). Lessor shall (i) cooperate with Lessee in obtaining, securing and transferring all Environmental Attributes and Environmental Incentives and the benefit of all Tax Credits, and (ii) shall allow Lessee to take any actions necessary to install additional equipment on the Facilities to comply with all monitoring and reporting obligations, and allow Lessee's personnel to enter the premises and collect any data Lessee requires to satisfy its obligations required in connection with obtaining Tax Credits and Environmental Attributes. Lessor shall not be obligated to incur any out-of-pocket costs or expenses in connection with such actions unless reimbursed by Lessee. If any Environmental Incentives are paid directly to Lessor, Lessor shall immediately pay such amounts over to Lessee.

20. Financing. Lessor acknowledges and agrees that Lessee may, at Lessee's own expense, seek equity or debt financing or refinancing in connection with Lessee's geologic storage operations, including any construction financing, whether on a project basis or a portfolio basis ("Financing"). In order to facilitate the Financing, Lessor agrees, at Lessee's expense, to cooperate and to execute all documents including, if applicable, any title policy affidavits reasonably necessary to obtain the Financing, provided that the foregoing shall not require Lessor to execute any documents that (a) result in Lessor incurring liabilities or obligations not contemplated in this Lease, or (b) encumber Lessor's fee interest in the Leased Premises, except to the extent any such interest is covered by this Lease. Lessor agrees that Lessor shall execute and deliver to Lessee any documents reasonably required by a financing party within five (5) business days after presentation of said documents by Lessee. Lessee shall have the absolute right in its sole and exclusive discretion, without obtaining the consent of Lessor, to mortgage, encumber, hypothecate, pledge, transfer, assign, or collateral assign, to one or more financing parties any or all of the rights granted to Lessee hereunder and/or any or all right or interest of Lessee in the Leased Premises or in any or all of the Facilities.

21. Assignment. The rights of either Party hereto may be assigned in whole or part. The assigning party shall provide written notice of any assignment within sixty (60) days after such assignment has become effective; *provided, however*, that an assigning party's failure to deliver written notice of assignment within such 60-day period shall not be deemed a breach of this Lease unless such

failure is willful and intentional. The Lessor's consent shall not be required for an assignment by the Lessee of this Lease, whether by way of a collateral assignment to its financiers or otherwise.

22. Change of Ownership. Lessee understands that this Lease runs with the land and transfers to any new owner of the surface acres. No change of ownership in the Leased Premises or assignment of Lessor's rights hereunder shall be binding on the Lessee for purpose of making payments to Lessor hereunder until the date Lessor, or Lessor's successors or assigns, furnishes Lessee the recorded original or a certified copy of the instrument evidencing the change in ownership or assignment.

23. Notices. All notices required to be given under this Lease shall be in writing and addressed to the respective Party at the addresses set forth at the beginning of this Lease unless otherwise directed by either Party.

24. No Waiver. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Lease or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provision or the relinquishment of any such rights, but the same shall continue and remain in full force and effect.

25. Notice of Lease. This Lease shall not be recorded in the real property records. Lessee shall cause a memorandum of this Lease to be recorded in the real property records of the county or counties in which any portion of the Leased Premises are situated. A recorded copy of said memorandum shall be furnished to Lessor within thirty (30) days of recording.

26. Confidentiality. Lessor shall maintain in the strictest confidence, for the benefit of Lessee, all information pertaining to the compensation paid under this Lease, any information regarding Lessee and its business or operations on the Leased Premises or on any other lands, the capacity and suitability of any Reservoir or Amalgamated Reservoir, and any other information that is deemed proprietary or that Lessee requests or identifies to be held confidential, in each such case whether disclosed by Lessee or discovered by Lessor.

27. Counterparts. This Lease may be executed in any number of counterparts, each of which, when executed and delivered, shall be an original, but all of which shall collectively constitute one and the same instrument.

28. Severability. If any provision of this Lease is found to be invalid, illegal or unenforceable in any respect, such provision shall be deemed to be severed from this Agreement, and the validity, legality and enforceability of the remaining provisions contained herein shall not in any way be affected or impaired thereby.

29. Governing Law. This Lease shall be governed by, construed and enforced in accordance with the laws of the State of North Dakota and the Parties hereby submit to the jurisdiction of the state or federal courts located in the State of North Dakota.

30. Further Assurances. Each Party will execute and deliver all documents, provide all information, and take or forbear from all actions as may be necessary or appropriate to achieve the purposes of this Lease, including without limitation executing a memorandum of this Lease and all documents required to obtain any necessary government approvals.

31. Entire Agreement. This Lease constitutes the entire agreement between the Parties and supersedes all prior negotiations, undertakings, notices, memoranda and agreement between the Parties, whether oral or written, with respect to the subject matter hereof. This Lease may only be amended or modified by a written agreement duly executed by Lessor and Lessee.

32. Electronic Signatures. This Lease, and any amendments hereto, to the extent signed and delivered by means of electronic transmission in portable document format (pdf) or by DocuSign or similar electronic signature process, shall be treated in all manner and respects as an original contract and shall be considered to have the same binding legal effect as if it were the original signed version thereof delivered in person.

IN WITNESS WHEREOF, the Parties have executed this Lease effective for all purposes as of the Effective Date.

<p style="text-align: right;">10</p> <p>1 (Pursuant to Notice to Take 30(b)(6)</p> <p>2 Deposition of <b>SUMMIT CARBON STORAGE #1, LLC, SUMMIT</b></p> <p>3 <b>CARBON STORAGE #2, LLC, and SUMMIT CARBON STORAGE</b></p> <p>4 <b>#3, LLC</b>, in the above-entitled cause, the following</p> <p>5 proceeding came on for taking before Stephanie A.</p> <p>6 Smith, a Registered Professional Reporter and a</p> <p>7 Notary Public in and for the State of North Dakota,</p> <p>8 at the Braaten Law Firm, 109 North Fourth Street,</p> <p>9 Suite 100, in the City of Bismarck, County of</p> <p>10 Burleigh, State of North Dakota, on the 6th day of</p> <p>11 June, 2024, commencing at 9:02 a.m., counsel</p> <p>12 appearing on behalf of the respective parties as</p> <p>13 hereinbefore indicated:)</p> <p>14 -----</p> <p>15 (The following proceedings were had and</p> <p>16 made of record:)</p> <p>17 THE VIDEOGRAPHER: This is the audiovisual</p> <p>18 30(b)(6) deposition of Summit Carbon Storage #1,</p> <p>19 LLC, Summit Carbon Storage #2, LLC, and Summit</p> <p>20 Carbon Storage #3, LLC, being taken on behalf of</p> <p>21 intervenor landowners in the matter of the</p> <p>22 applications of Summit Carbon Storage #1, LLC,</p> <p>23 Summit Carbon Storage #2, LLC, and Summit Carbon</p> <p>24 Storage #3, LLC, Case Numbers 30869, 30870, 30871,</p> <p>25 30872, 30873, 30874, 30875, 30876, 30877, 30878,</p>	<p style="text-align: right;">12</p> <p>1 with topics dated May 9, 2024, and was served on</p> <p>2 Lawrence Bender of Fredrikson &amp; Byron.</p> <p>3 We have now marked Deposition Exhibit 2</p> <p>4 electronically for the record. Deposition</p> <p>5 Exhibit 2 is Intervenor Landowners' Amended Notice</p> <p>6 of 30(b)(6) Deposition, which was dated May 31,</p> <p>7 2024, and served once intervention was granted to</p> <p>8 Intervenor Swenson Living Trust, Bauman, Gerving,</p> <p>9 Haupt, Jochim, Kraft, Liebelt, Maize, Metz, Rust</p> <p>10 and Smith, given an objection from Summit's counsel</p> <p>11 that intervenors could not serve a deposition</p> <p>12 notice until officially granted party status.</p> <p>13 Therefore, immediately upon being granted party</p> <p>14 status, the notice was re-served with the topics</p> <p>15 not changing at all.</p> <p>16 We have now electronically marked Exhibit</p> <p>17 No. 3 to the deposition, which is a letter dated</p> <p>18 June 4, 2024, from Lawrence Bender to Derrick</p> <p>19 Braaten. In that letter Mr. Bender indicates that</p> <p>20 the notice was served upon Summit Carbon Solutions,</p> <p>21 LLC, and he indicates that that entity is not a</p> <p>22 party to the proceeding and the three subsidiary</p> <p>23 entities, Summit Carbon Storage #1, #2 and #3, LLC,</p> <p>24 are the actual parties and, therefore, Summit</p> <p>25 Carbon Solutions, LLC, would require a subpoena.</p>
<p style="text-align: right;">11</p> <p>1 30879 and 30880 before the Oil and Gas Division of</p> <p>2 the North Dakota Industrial Commission.</p> <p>3 This is being taken on behalf of the</p> <p>4 intervenor landowners represented by Braaten Law</p> <p>5 Firm. This deposition is being held on June 6,</p> <p>6 2024, at the offices of Braaten Law Firm in</p> <p>7 Bismarck, North Dakota, commencing at 9:02 a.m.</p> <p>8 My name is Desirae Zaste of Braaten Law</p> <p>9 Firm, and I am recording the deposition</p> <p>10 supplementally. The officer, court reporter and</p> <p>11 notary public is Stephanie Smith of Emineth &amp;</p> <p>12 Associates.</p> <p>13 Will counsel please state their</p> <p>14 appearances.</p> <p>15 MR. BRAATEN: Derrick Braaten with Braaten</p> <p>16 Law Firm on behalf of the intervenors, including</p> <p>17 the Swenson Living Trust and other intervenors</p> <p>18 granted intervenor status in the proceeding by the</p> <p>19 Industrial Commission.</p> <p>20 I am going to put a few documents down on</p> <p>21 record to document the fact that the deponent is</p> <p>22 not going to appear for the deposition today.</p> <p>23 Okay. We have marked as Deposition</p> <p>24 Exhibit No. 1 Landowners Notice of 30(b)(6)</p> <p>25 Deposition. This is the original deposition notice</p>	<p style="text-align: right;">13</p> <p>1 We -- the intervenors disagree given that the</p> <p>2 application was submitted for those three</p> <p>3 subsidiary entities by Summit Carbon Solutions,</p> <p>4 LLC, in care of Summit Carbon Solutions, LLC.</p> <p>5 We will now mark three exhibits, Exhibit</p> <p>6 Nos. 4, 5 and 6. Beginning with 4, these are three</p> <p>7 amended notices of deposition, one each directed at</p> <p>8 Summit Carbon Storage #1, LLC; an amended notice</p> <p>9 directed at Summit -- Summit Carbon Storage #2,</p> <p>10 LLC, which is now marked as Exhibit 5 to the</p> <p>11 deposition; and an amended notice directed to</p> <p>12 Summit Carbon Storage #3, LLC, which is now</p> <p>13 electronically marked as Exhibit No. 6 to the</p> <p>14 deposition.</p> <p>15 These three notices were served within a</p> <p>16 couple hours of receiving Mr. Bender's letter</p> <p>17 indicating that he believed the Summit Carbon</p> <p>18 Solutions entity would require a subpoena. We</p> <p>19 believe that it is clear to who these notices were</p> <p>20 directed.</p> <p>21 Throughout all of these amended deposition</p> <p>22 notices there was not a single change to any of the</p> <p>23 topics that had been listed for this 30(b)(6)</p> <p>24 deposition.</p> <p>25 Following service of the subpoena</p>

<p style="text-align: right;">14</p> <p>1 deposition notices to Summit Carbon Storage #1, #2  2 and #3, we received a letter that has now been  3 marked electronically as Exhibit No. 7. That  4 letter is dated June 5 from Lawrence Bender to  5 Derrick Braaten. That letter then sets out a  6 number of additional objections that Mr. Bender and  7 his client raised to the deposition notice. This  8 letter was sent yesterday after close of business,  9 and also advised -- in the last paragraph  10 Mr. Bender states, "Ultimately, this letter is  11 intended to inform you that because of the  12 Intervenor Landowners' failure to comply with  13 Rule 30, my clients do not intend to appear for the  14 depositions tomorrow, June 6, 2024, as set forth in  15 the Deposition Notices."  16 In response to that letter from  17 Mr. Bender, I sent an email back to Mr. Bender that  18 has now been electronically marked as Exhibit  19 No. 8. That email responded to Mr. Bender's  20 objections and let him know that I disagreed with  21 all of those objections and particularly with the  22 use of such objections to avoid a deposition.  23 Given that Mr. Bender and his clients have  24 not filed any motions for protective order or  25 otherwise taken any other actions to comply with</p>	<p style="text-align: right;">16</p> <p>1 We also electronically marked as Exhibit  2 No. 10 an email from Derrick Braaten to Lawrence  3 Bender dated May 9, which was responding to the  4 service of the 30(b)(6) deposition notice upon  5 Mr. Bender. I indicated to Mr. Bender in that  6 email that I scheduled the deposition to get a date  7 down, and that I did try to look at Mr. Bender's  8 schedule and his PSC hearings and other matters to  9 find a date that I did not think he would have a  10 conflict. I told him I am nonetheless open to  11 rescheduling the deposition if there is another  12 mutually agreeable date.  13 Other than the communications I've put on  14 record in these exhibits from Mr. Bender, I have  15 not received other communications from him in  16 response to my numerous attempts over the course of  17 the last month to provide notice, meet with and  18 confer with Mr. Bender to conduct this deposition.  19 We will leave the record open for this  20 deposition and continue the deposition while we  21 file a motion to compel and seek sanctions for the  22 failure to appear.  23 And with that we can go off the record.  24 THE VIDEOGRAPHER: This is the end of the  25 audiovisual 30(b)(6) deposition of Summit Carbon</p>
<p style="text-align: right;">15</p> <p>1 the notice in the Rules of Civil Procedure, we  2 intend to seek to compel the deposition and to seek  3 sanctions for the failure to appear.  4 In my email marked as Exhibit 8, I let  5 Mr. Bender know that we intended to move forward  6 with the deposition this morning, which is what we  7 are doing right now, and I let him know that if  8 there is no witness, I will put that on record and  9 continue the deposition, which is what we intend to  10 do.  11 To that email, I also attached two  12 different attachments, one being a prior email as  13 well as a prior letter that I sent to Mr. Bender  14 offering to confer on these depositions in order to  15 address any concerns he might have. We have  16 electronically marked as Exhibit 9 one of those  17 attachments, which is a letter dated May 2, 2024,  18 from Derrick Braaten to Lawrence Bender, telling  19 him that I would like to conduct a 30(b)(6)  20 deposition of his client and that I am currently  21 working on a topic list. I indicate that I intend  22 to serve a couple rounds of written discovery and  23 would like to take a 30(b)(6) deposition and asked  24 Mr. Bender to sit down and confer and discuss  25 coordination.</p>	<p style="text-align: right;">17</p> <p>1 Storage #1, LLC, Summit Carbon Storage #2, LLC, and  2 Summit Carbon Storage #3, LLC, taken at the offices  3 of Braaten Law Firm in Bismarck, North Dakota, on  4 June 6, 2024.  5 We are off the video and off the record at  6 9:16 p.m. [sic], Central time.  7 MR. BRAATEN: And just to remain on record  8 for one moment, I should have noted this, but we  9 are going to leave the record open for the  10 continuance of the deposition.  11 (Recessed at 9:17 a.m., Thursday, the 6th  12 day of June, 2024.)  13 -----  14  15  16  17  18  19  20  21  22  23  24  25 BLF-000011</p>

## 1 CERTIFICATE OF COURT REPORTER

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**LANDOWNERS NOTICE OF 30(b)(6) DEPOSITION OF  
SUMMIT CARBON SOLUTIONS**

---

**TO:** Summit Carbon Solutions, by and through its attorney, Lawrence Bender, Fredrickson & Byron, P.A., 1133 College Drive, Suite 1000, Bismarck, North Dakota, 58501:

[¶1] PLEASE TAKE NOTICE that, pursuant to N.D.C.C. § 28-32-33 and Rule 30(b)(6) of the North Dakota Rules of Civil Procedure, Intervenor The Swenson Living Trust (“Landowners” or “Swenson Trust”) will take the deposition upon oral examination of Summit Carbon Solutions (“SCS” or “CO<sub>2</sub> injector”) through one or more of its officers, directors, managing agents, or other representatives who shall be designated to testify on the CO<sub>2</sub> injector’s behalf regarding all information known or reasonably available to the CO<sub>2</sub> injector with respect to the subject matters identified in Exhibit A.

[¶2] The deposition shall commence on June 6, 2024 at 9:00 a.m. (Central Time), and continue thereafter until complete, at the offices of Braaten Law Firm, 100 N. 4<sup>th</sup> St., Ste. 100, Bismarck, North Dakota 58501. The deposition shall be conducted before a court reporter, or other officer authorized by law to administer oaths, and shall be recorded by stenographic means and supplementally recorded by video. The deposition will be taken for the purposes of discovery, for use at hearings, or for other purposes as permitted under the North Dakota Rules of Civil Procedure and N.D.C.C. ch. 28-32.

Dated this 9<sup>th</sup> day of May, 2024.

**BRAATEN LAW FIRM**

/s/ Derrick Braaten

## EXHIBIT A TO NOTICE OF DEPOSITION OF SUMMIT CARBON SOLUTIONS

### DEFINITIONS

As used in this Notice, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”). and each of those entities’ authorized agents.

2. “Landowner” means The Swenson Living Trust.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review, as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit’s applications in NDIC Case No. 30869, and includes the confining layers/zones, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW¼ of the NE¼, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths

were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and each of its authorized agents.

### **TOPICS FOR EXAMINATION**

In accordance with N.D.R.Civ.P. 30(b)(6), The Swenson Living Trust designates the following topics and matters for examination.

- I. Summit’s applications and the information contained in and created or submitted in support of the applications and conclusions drawn therefrom in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) (all applications hereafter referred to collectively as “Summit’s applications”).
  - a. Summit’s applications include all documents submitted to the North Dakota Industrial Commission including its Department of Mineral Resources and its Oil and Gas Division (collectively “NDIC”) as part of or in support of or in relation to Summit’s applications, and all correspondence between Summit and NDIC whether in writing and whether electronic or physical, and whether written or oral. This topic and the scope of Summit’s applications as used herein includes all data files, spreadsheets, databases, and models (including loading files necessary to make data files useable with any model) and all of the information, data, documents, calculations, and non-attorney work product that was created in support of Summit’s applications or which was necessary to create or is materially supportive of Summit’s applications.
    - i. Without limiting the generality of the foregoing, this topic includes the following models and associated data:
      1. The data and interpretations and inputs for the geologic model created with SLB’s Petrel software (Schlumberger, 2020).
      2. The data and inputs and model referred to in Section 3.1 of the applications as follows:
        - a. “The geologic model and properties served as inputs for numerical simulations of CO<sub>2</sub> injection using Computer Modelling Group Ltd.’s (CMG’s) GEM software (Computer Modelling Group Ltd., 2021). Numerical simulations of CO<sub>2</sub> injection were conducted to assess potential CO<sub>2</sub> injection rate, disposition of injected CO<sub>2</sub>, wellhead pressure (WHP), bottomhole pressure (BHP), and pressure changes in the storage reservoir throughout the expected injection time frame and postinjection period. Results of the numerical simulations were then used to determine the

project's area of review (AOR) pursuant to North Dakota's geologic CO2 storage regulations."

3. United States Geological Survey's PHREEQC geochemical model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  4. The data and load files and data decks for the SLB Petrel model that was run for Summit's applications.
  5. Computer Modelling Group Ltd.'s GEM model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  6. 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Schlumberger SEclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format.
  7. Input files, field and analytical data, and the model geochemical database (and the sources of the foregoing) used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.
    - ii. These models also include the conclusions drawn from the models and the data inputs used, particularly as those conclusions were used to support Summit's applications as referenced in these topics.
    - iii. The identity of the person most familiar with the workflows described in Section 3.2.3 of Summit's application in NDIC Case No. 30869 and how it was performed for purposes of Summit's applications and the identity of the person who wrote this passage.
    - iv. The meaning and context and details of how the various processes and functions described in Section 3.2.3 of Summit's applications and how they were actually performed and the models and calculations used to support them.
- b. The factual documentation and information that might support or that Summit will use to support a finding "[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space" as required by N.D.C.C. § 38-22-08(5).
  - c. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding "[t]hat the proposed storage facility will not adversely affect surface waters or formations containing fresh water" as is stated at N.D.C.C. § 38-22-08(7).
  - d. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding that "[t]hat the storage facility will not

endanger human health nor unduly endanger the environment” as is stated at N.D.C.C. § 38-22-08(10).

- e. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding “[t]hat the horizontal and vertical boundaries of the storage reservoir are defined [and] include buffer areas to ensure that the storage facility is operated safely and as contemplated” as is stated at N.D.C.C. § 38-22-08(12).
- f. The factual documentation and information related to or that might support or that Summit will use to support any finding in this proceeding that “all nonconsenting pore space owners are or will be equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14) and any documentation, information, data sets, comparable sales, comparable transactions, appraisals, market reports, financial reports, or other documents related to or referencing compensation paid to nonconsenting pore space owners.
  - i. This subtopic I.b. includes all amounts paid by Summit to any individual or entity for use of or damages to pore space or property rights associated with or related to its storage facility that is the subject of Summit’s application and the Storage Reservoir, and all agreements for such use or damages or payments.
  - ii. This subtopic I.b. includes all reports and agreements in Summit’s possession indicating any amount of compensation paid for any kind of use of or damage to pore space or property for CO2 sequestration. If Summit has in its possession any agreement with any property owner for use of property or damage to property arising from use of pore space or property for storage or sequestration of CO2 it is included in this topic.

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**INTERVENOR LANDOWNERS' AMENDED NOTICE OF 30(b)(6) DEPOSITION OF  
SUMMIT CARBON SOLUTIONS**

---

**TO:** Summit Carbon Solutions, by and through its attorney, Lawrence Bender, Fredrickson & Byron, P.A., 1133 College Drive, Suite 1000, Bismarck, North Dakota, 58501:

[¶1] PLEASE TAKE NOTICE that, pursuant to N.D.C.C. § 28-32-33 and Rule 30(b)(6) of the North Dakota Rules of Civil Procedure, Intervenor Landowners the Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith ("Landowners") will take the deposition upon oral examination of Summit Carbon Solutions ("SCS" or "CO<sub>2</sub> injector") through one or more of its officers, directors, managing agents, or other representatives who shall be designated to testify on the CO<sub>2</sub> injector's behalf regarding all information known or reasonably available to the CO<sub>2</sub> injector with respect to the subject matters identified in Exhibit A.

[¶2] The deposition shall commence on June 6, 2024 at 9:00 a.m. (Central Time), and continue thereafter until complete, at the offices of Braaten Law Firm, 100 N. 4<sup>th</sup> St., Ste. 100, Bismarck, North Dakota 58501. The deposition shall be conducted before a court reporter, or other officer authorized by law to administer oaths, and shall be recorded by stenographic means and supplementally recorded by video. The deposition will be taken for the purposes of discovery, for use at hearings, or for other purposes as permitted under the North Dakota Rules of Civil Procedure and N.D.C.C. ch. 28-32.

Dated this 31<sup>st</sup> day of May, 2024.

**BRAATEN LAW FIRM**

## EXHIBIT A TO NOTICE OF DEPOSITION OF SUMMIT CARBON SOLUTIONS

### DEFINITIONS

As used in this Notice, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”). and each of those entities’ authorized agents.

2. “Landowners” means The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review, as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit’s applications in NDIC Case No. 30869, and includes the confining layers/zones, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW¼ of the NE¼, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic

resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and

includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and each of its authorized agents.

### **TOPICS FOR EXAMINATION**

In accordance with N.D.R.Civ.P. 30(b)(6), Landowners designate the following topics and matters for examination.

- I. Summit’s applications and the information contained in and created or submitted in support of the applications and conclusions drawn therefrom in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) (all applications hereafter referred to collectively as “Summit’s applications”).
  - a. Summit’s applications include all documents submitted to the North Dakota Industrial Commission including its Department of Mineral Resources and its Oil and Gas Division (collectively “NDIC”) as part of or in support of or in relation to Summit’s applications, and all correspondence between Summit and NDIC whether in writing and whether electronic or physical, and whether written or oral. This topic and the scope of Summit’s applications as used herein includes all data files, spreadsheets, databases, and models (including loading files necessary to make data files useable with any model) and all of the information, data, documents, calculations, and non-attorney work product that was created in support of Summit’s applications or which was necessary to create or is materially supportive of Summit’s applications.
    - i. Without limiting the generality of the foregoing, this topic includes the following models and associated data:
      1. The data and interpretations and inputs for the geologic model created with SLB’s Petrel software (Schlumberger, 2020).
      2. The data and inputs and model referred to in Section 3.1 of the applications as follows:
        - a. “The geologic model and properties served as inputs for numerical simulations of CO<sub>2</sub> injection using Computer Modelling Group Ltd.’s (CMG’s) GEM software (Computer Modelling Group Ltd., 2021). Numerical simulations of CO<sub>2</sub> injection were conducted to assess potential CO<sub>2</sub> injection rate, disposition of injected CO<sub>2</sub>, wellhead pressure (WHP), bottomhole pressure (BHP), and pressure

changes in the storage reservoir throughout the expected injection time frame and postinjection period. Results of the numerical simulations were then used to determine the project's area of review (AOR) pursuant to North Dakota's geologic CO2 storage regulations."

3. United States Geological Survey's PHREEQC geochemical model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  4. The data and load files and data decks for the SLB Petrel model that was run for Summit's applications.
  5. Computer Modelling Group Ltd.'s GEM model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  6. 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Schlumberger SEclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format.
  7. Input files, field and analytical data, and the model geochemical database (and the sources of the foregoing) used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.
- ii. These models also include the conclusions drawn from the models and the data inputs used, particularly as those conclusions were used to support Summit's applications as referenced in these topics.
  - iii. The identity of the person most familiar with the workflows described in Section 3.2.3 of Summit's application in NDIC Case No. 30869 and how it was performed for purposes of Summit's applications and the identity of the person who wrote this passage.
  - iv. The meaning and context and details of how the various processes and functions described in Section 3.2.3 of Summit's applications and how they were actually performed and the models and calculations used to support them.
- b. The factual documentation and information that might support or that Summit will use to support a finding "[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space" as required by N.D.C.C. § 38-22-08(5).
  - c. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding "[t]hat the proposed storage facility

will not adversely affect surface waters or formations containing fresh water” as is stated at N.D.C.C. § 38-22-08(7).

- d. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding that “[t]hat the storage facility will not endanger human health nor unduly endanger the environment” as is stated at N.D.C.C. § 38-22-08(10).
- e. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding “[t]hat the horizontal and vertical boundaries of the storage reservoir are defined [and] include buffer areas to ensure that the storage facility is operated safely and as contemplated” as is stated at N.D.C.C. § 38-22-08(12).
- f. The factual documentation and information related to or that might support or that Summit will use to support any finding in this proceeding that “all nonconsenting pore space owners are or will be equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14) and any documentation, information, data sets, comparable sales, comparable transactions, appraisals, market reports, financial reports, or other documents related to or referencing compensation paid to nonconsenting pore space owners.
  - i. This subtopic I.b. includes all amounts paid by Summit to any individual or entity for use of or damages to pore space or property rights associated with or related to its storage facility that is the subject of Summit’s application and the Storage Reservoir, and all agreements for such use or damages or payments.
  - ii. This subtopic I.b. includes all reports and agreements in Summit’s possession indicating any amount of compensation paid for any kind of use of or damage to pore space or property for CO<sub>2</sub> sequestration. If Summit has in its possession any agreement with any property owner for use of property or damage to property arising from use of pore space or property for storage or sequestration of CO<sub>2</sub> it is included in this topic.

**RE: NDIC Case Nos. 30869-30880**

Dear Derrick:

This letter concerns the Intervenor Landowners' Amended Notice of 30(b)(6) Deposition of Summit Carbon Solutions in NDIC Case Nos. 30869-30880, which I received via e-mail last Friday afternoon, May 31, 2024.

Summit Carbon Solutions, LLC is not a party to NDIC Case Nos. 30869-30880. "A non-party deponent's attendance may be compelled by subpoena under Rule 45." N.D.R.Civ.P. 30(a)(1). As a result, a notice of deposition alone is not sufficient to compel the attendance of Summit Carbon Solutions, LLC at a deposition. *See, e.g.,* N.D.R.Civ.P. 30(g)(2).

The notice we received is directed to "Summit Carbon Solutions" and gives no indication that a subpoena has been or will be served on Summit Carbon Solutions, LLC. Instead, the Intervenor Landowners' Amended Notice of 30(b)(6) Deposition of Summit Carbon Solutions appears to assume that Summit Carbon Solutions, LLC is a party to NDIC Case Nos. 30869-30880 and that a subpoena is unnecessary. If that is the case, please be advised the notice is ineffective.

Thank you for your attention to this matter. Should you have any questions, please advise.

Sincerely,

LAWRENCE BENDER

L.B./sdp

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**INTERVENOR LANDOWNERS' SECOND AMENDED NOTICE OF 30(b)(6)  
DEPOSITION OF SUMMIT CARBON STORAGE #1, LLC**

---

**TO:** Summit Carbon Storage #1, LLC, by and through its attorney, Lawrence Bender, Fredrickson & Byron, P.A., 304 East Front Avenue, Suite 400, Bismarck, North Dakota, 58504:

[¶1] PLEASE TAKE NOTICE that, pursuant to N.D.C.C. § 28-32-33 and Rule 30(b)(6) of the North Dakota Rules of Civil Procedure, Intervenor Landowners the Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith ("Landowners") will take the deposition upon oral examination of Summit Carbon Storage #1, LLC ("SCS" or "CO<sub>2</sub> injector") through one or more of its officers, directors, managing agents, or other representatives who shall be designated to testify on the CO<sub>2</sub> injector's behalf regarding all information known or reasonably available to the CO<sub>2</sub> injector with respect to the subject matters identified in Exhibit A.

[¶2] The deposition shall commence on June 6, 2024 at 9:00 a.m. (Central Time), and continue thereafter until complete, at the offices of Braaten Law Firm, 100 N. 4<sup>th</sup> St., Ste. 100, Bismarck, North Dakota 58501. The deposition shall be conducted before a court reporter, or other officer authorized by law to administer oaths, and shall be recorded by stenographic means and supplementally recorded by video. The deposition will be taken for the purposes of discovery, for use at hearings, or for other purposes as permitted under the North Dakota Rules of Civil Procedure and N.D.C.C. ch. 28-32.

Dated this 4<sup>th</sup> day of June, 2024.

**BRAATEN LAW FIRM**

## EXHIBIT A TO NOTICE OF DEPOSITION OF SUMMIT CARBON STORAGE #1, LLC

### DEFINITIONS

As used in this Notice, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) and each of those entities’ authorized agents.

2. “Landowners” means The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review, as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit’s applications in NDIC Case No. 30869, and includes the confining layers/zones, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW<sup>1</sup>/<sub>4</sub> of the NE<sup>1</sup>/<sub>4</sub>, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic

resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and

includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and each of its authorized agents.

### **TOPICS FOR EXAMINATION**

In accordance with N.D.R.Civ.P. 30(b)(6), Landowners designate the following topics and matters for examination.

- I. Summit’s applications and the information contained in and created or submitted in support of the applications and conclusions drawn therefrom in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) (all applications hereafter referred to collectively as “Summit’s applications”).
  - a. Summit’s applications include all documents submitted to the North Dakota Industrial Commission including its Department of Mineral Resources and its Oil and Gas Division (collectively “NDIC”) as part of or in support of or in relation to Summit’s applications, and all correspondence between Summit and NDIC whether in writing and whether electronic or physical, and whether written or oral. This topic and the scope of Summit’s applications as used herein includes all data files, spreadsheets, databases, and models (including loading files necessary to make data files useable with any model) and all of the information, data, documents, calculations, and non-attorney work product that was created in support of Summit’s applications or which was necessary to create or is materially supportive of Summit’s applications.
    - i. Without limiting the generality of the foregoing, this topic includes the following models and associated data:
      1. The data and interpretations and inputs for the geologic model created with SLB’s Petrel software (Schlumberger, 2020).
      2. The data and inputs and model referred to in Section 3.1 of the applications as follows:
        - a. “The geologic model and properties served as inputs for numerical simulations of CO<sub>2</sub> injection using Computer Modelling Group Ltd.’s (CMG’s) GEM software (Computer Modelling Group Ltd., 2021). Numerical simulations of CO<sub>2</sub> injection were conducted to assess potential CO<sub>2</sub> injection rate, disposition of injected CO<sub>2</sub>, wellhead pressure (WHP), bottomhole pressure (BHP), and pressure

changes in the storage reservoir throughout the expected injection time frame and postinjection period. Results of the numerical simulations were then used to determine the project's area of review (AOR) pursuant to North Dakota's geologic CO2 storage regulations."

3. United States Geological Survey's PHREEQC geochemical model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  4. The data and load files and data decks for the SLB Petrel model that was run for Summit's applications.
  5. Computer Modelling Group Ltd.'s GEM model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  6. 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Schlumberger SEclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format.
  7. Input files, field and analytical data, and the model geochemical database (and the sources of the foregoing) used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.
- ii. These models also include the conclusions drawn from the models and the data inputs used, particularly as those conclusions were used to support Summit's applications as referenced in these topics.
  - iii. The identity of the person most familiar with the workflows described in Section 3.2.3 of Summit's application in NDIC Case No. 30869 and how it was performed for purposes of Summit's applications and the identity of the person who wrote this passage.
  - iv. The meaning and context and details of how the various processes and functions described in Section 3.2.3 of Summit's applications and how they were actually performed and the models and calculations used to support them.
- b. The factual documentation and information that might support or that Summit will use to support a finding "[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space" as required by N.D.C.C. § 38-22-08(5).
  - c. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding "[t]hat the proposed storage facility

will not adversely affect surface waters or formations containing fresh water” as is stated at N.D.C.C. § 38-22-08(7).

- d. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding that “[t]hat the storage facility will not endanger human health nor unduly endanger the environment” as is stated at N.D.C.C. § 38-22-08(10).
- e. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding “[t]hat the horizontal and vertical boundaries of the storage reservoir are defined [and] include buffer areas to ensure that the storage facility is operated safely and as contemplated” as is stated at N.D.C.C. § 38-22-08(12).
- f. The factual documentation and information related to or that might support or that Summit will use to support any finding in this proceeding that “all nonconsenting pore space owners are or will be equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14) and any documentation, information, data sets, comparable sales, comparable transactions, appraisals, market reports, financial reports, or other documents related to or referencing compensation paid to nonconsenting pore space owners.
  - i. This subtopic I.b. includes all amounts paid by Summit to any individual or entity for use of or damages to pore space or property rights associated with or related to its storage facility that is the subject of Summit’s application and the Storage Reservoir, and all agreements for such use or damages or payments.
  - ii. This subtopic I.b. includes all reports and agreements in Summit’s possession indicating any amount of compensation paid for any kind of use of or damage to pore space or property for CO2 sequestration. If Summit has in its possession any agreement with any property owner for use of property or damage to property arising from use of pore space or property for storage or sequestration of CO2 it is included in this topic.

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**INTERVENOR LANDOWNERS' SECOND AMENDED NOTICE OF 30(b)(6)  
DEPOSITION OF SUMMIT CARBON STORAGE #2, LLC**

---

**TO:** Summit Carbon Storage #2, by and through its attorney, Lawrence Bender, Fredrickson & Byron, P.A., 304 East Front Avenue, Suite 400, Bismarck, North Dakota, 58504:

[¶1] PLEASE TAKE NOTICE that, pursuant to N.D.C.C. § 28-32-33 and Rule 30(b)(6) of the North Dakota Rules of Civil Procedure, Intervenor Landowners the Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith ("Landowners") will take the deposition upon oral examination of Summit Carbon Storage #2, LLC ("SCS" or "CO<sub>2</sub> injector") through one or more of its officers, directors, managing agents, or other representatives who shall be designated to testify on the CO<sub>2</sub> injector's behalf regarding all information known or reasonably available to the CO<sub>2</sub> injector with respect to the subject matters identified in Exhibit A.

[¶2] The deposition shall commence on June 6, 2024 at 9:00 a.m. (Central Time), and continue thereafter until complete, at the offices of Braaten Law Firm, 100 N. 4<sup>th</sup> St., Ste. 100, Bismarck, North Dakota 58501. The deposition shall be conducted before a court reporter, or other officer authorized by law to administer oaths, and shall be recorded by stenographic means and supplementally recorded by video. The deposition will be taken for the purposes of discovery, for use at hearings, or for other purposes as permitted under the North Dakota Rules of Civil Procedure and N.D.C.C. ch. 28-32.

Dated this 4<sup>th</sup> day of June, 2024.

**BRAATEN LAW FIRM**

## EXHIBIT A TO NOTICE OF DEPOSITION OF SUMMIT CARBON STORAGE #2, LLC

### DEFINITIONS

As used in this Notice, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”). and each of those entities’ authorized agents.

2. “Landowners” means The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review, as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit’s applications in NDIC Case No. 30869, and includes the confining layers/zones, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW<sup>1</sup>/<sub>4</sub> of the NE<sup>1</sup>/<sub>4</sub>, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic

resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and

includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and each of its authorized agents.

### **TOPICS FOR EXAMINATION**

In accordance with N.D.R.Civ.P. 30(b)(6), Landowners designate the following topics and matters for examination.

- I. Summit’s applications and the information contained in and created or submitted in support of the applications and conclusions drawn therefrom in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) (all applications hereafter referred to collectively as “Summit’s applications”).
  - a. Summit’s applications include all documents submitted to the North Dakota Industrial Commission including its Department of Mineral Resources and its Oil and Gas Division (collectively “NDIC”) as part of or in support of or in relation to Summit’s applications, and all correspondence between Summit and NDIC whether in writing and whether electronic or physical, and whether written or oral. This topic and the scope of Summit’s applications as used herein includes all data files, spreadsheets, databases, and models (including loading files necessary to make data files useable with any model) and all of the information, data, documents, calculations, and non-attorney work product that was created in support of Summit’s applications or which was necessary to create or is materially supportive of Summit’s applications.
    - i. Without limiting the generality of the foregoing, this topic includes the following models and associated data:
      1. The data and interpretations and inputs for the geologic model created with SLB’s Petrel software (Schlumberger, 2020).
      2. The data and inputs and model referred to in Section 3.1 of the applications as follows:
        - a. “The geologic model and properties served as inputs for numerical simulations of CO2 injection using Computer Modelling Group Ltd.’s (CMG’s) GEM software (Computer Modelling Group Ltd., 2021). Numerical simulations of CO2 injection were conducted to assess potential CO2 injection rate, disposition of injected CO2, wellhead pressure (WHP), bottomhole pressure (BHP), and pressure

changes in the storage reservoir throughout the expected injection time frame and postinjection period. Results of the numerical simulations were then used to determine the project's area of review (AOR) pursuant to North Dakota's geologic CO<sub>2</sub> storage regulations."

3. United States Geological Survey's PHREEQC geochemical model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  4. The data and load files and data decks for the SLB Petrel model that was run for Summit's applications.
  5. Computer Modelling Group Ltd.'s GEM model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  6. 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Schlumberger SEclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format.
  7. Input files, field and analytical data, and the model geochemical database (and the sources of the foregoing) used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.
- ii. These models also include the conclusions drawn from the models and the data inputs used, particularly as those conclusions were used to support Summit's applications as referenced in these topics.
  - iii. The identity of the person most familiar with the workflows described in Section 3.2.3 of Summit's application in NDIC Case No. 30869 and how it was performed for purposes of Summit's applications and the identity of the person who wrote this passage.
  - iv. The meaning and context and details of how the various processes and functions described in Section 3.2.3 of Summit's applications and how they were actually performed and the models and calculations used to support them.
- b. The factual documentation and information that might support or that Summit will use to support a finding "[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space" as required by N.D.C.C. § 38-22-08(5).
  - c. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding "[t]hat the proposed storage facility

will not adversely affect surface waters or formations containing fresh water” as is stated at N.D.C.C. § 38-22-08(7).

- d. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding that “[t]hat the storage facility will not endanger human health nor unduly endanger the environment” as is stated at N.D.C.C. § 38-22-08(10).
- e. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding “[t]hat the horizontal and vertical boundaries of the storage reservoir are defined [and] include buffer areas to ensure that the storage facility is operated safely and as contemplated” as is stated at N.D.C.C. § 38-22-08(12).
- f. The factual documentation and information related to or that might support or that Summit will use to support any finding in this proceeding that “all nonconsenting pore space owners are or will be equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14) and any documentation, information, data sets, comparable sales, comparable transactions, appraisals, market reports, financial reports, or other documents related to or referencing compensation paid to nonconsenting pore space owners.
  - i. This subtopic I.b. includes all amounts paid by Summit to any individual or entity for use of or damages to pore space or property rights associated with or related to its storage facility that is the subject of Summit’s application and the Storage Reservoir, and all agreements for such use or damages or payments.
  - ii. This subtopic I.b. includes all reports and agreements in Summit’s possession indicating any amount of compensation paid for any kind of use of or damage to pore space or property for CO2 sequestration. If Summit has in its possession any agreement with any property owner for use of property or damage to property arising from use of pore space or property for storage or sequestration of CO2 it is included in this topic.

**NORTH DAKOTA  
OIL AND GAS DIVISION**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**INTERVENOR LANDOWNERS' SECOND AMENDED NOTICE OF 30(b)(6)  
DEPOSITION OF SUMMIT CARBON STORAGE #3, LLC**

---

**TO:** Summit Carbon Storage #3, LLC, by and through its attorney, Lawrence Bender, Fredrickson & Byron, P.A., 304 East Front Avenue, Suite 400, Bismarck, North Dakota, 58504:

[¶1] PLEASE TAKE NOTICE that, pursuant to N.D.C.C. § 28-32-33 and Rule 30(b)(6) of the North Dakota Rules of Civil Procedure, Intervenor Landowners the Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith ("Landowners") will take the deposition upon oral examination of Summit Carbon Storage #3, LLC ("SCS" or "CO<sub>2</sub> injector") through one or more of its officers, directors, managing agents, or other representatives who shall be designated to testify on the CO<sub>2</sub> injector's behalf regarding all information known or reasonably available to the CO<sub>2</sub> injector with respect to the subject matters identified in Exhibit A.

[¶2] The deposition shall commence on June 6, 2024 at 9:00 a.m. (Central Time), and continue thereafter until complete, at the offices of Braaten Law Firm, 100 N. 4<sup>th</sup> St., Ste. 100, Bismarck, North Dakota 58501. The deposition shall be conducted before a court reporter, or other officer authorized by law to administer oaths, and shall be recorded by stenographic means and supplementally recorded by video. The deposition will be taken for the purposes of discovery, for use at hearings, or for other purposes as permitted under the North Dakota Rules of Civil Procedure and N.D.C.C. ch. 28-32.

Dated this 4<sup>th</sup> day of June, 2024.

## EXHIBIT A TO NOTICE OF DEPOSITION OF SUMMIT CARBON STORAGE #3, LLC

### DEFINITIONS

As used in this Notice, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) and each of those entities’ authorized agents.

2. “Landowners” means The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review, as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit’s applications in NDIC Case No. 30869, and includes the confining layers/zones, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW<sup>1</sup>/<sub>4</sub> of the NE<sup>1</sup>/<sub>4</sub>, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic

resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and

includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and each of its authorized agents.

### **TOPICS FOR EXAMINATION**

In accordance with N.D.R.Civ.P. 30(b)(6), Landowners designate the following topics and matters for examination.

- I. Summit’s applications and the information contained in and created or submitted in support of the applications and conclusions drawn therefrom in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) (all applications hereafter referred to collectively as “Summit’s applications”).
  - a. Summit’s applications include all documents submitted to the North Dakota Industrial Commission including its Department of Mineral Resources and its Oil and Gas Division (collectively “NDIC”) as part of or in support of or in relation to Summit’s applications, and all correspondence between Summit and NDIC whether in writing and whether electronic or physical, and whether written or oral. This topic and the scope of Summit’s applications as used herein includes all data files, spreadsheets, databases, and models (including loading files necessary to make data files useable with any model) and all of the information, data, documents, calculations, and non-attorney work product that was created in support of Summit’s applications or which was necessary to create or is materially supportive of Summit’s applications.
    - i. Without limiting the generality of the foregoing, this topic includes the following models and associated data:
      1. The data and interpretations and inputs for the geologic model created with SLB’s Petrel software (Schlumberger, 2020).
      2. The data and inputs and model referred to in Section 3.1 of the applications as follows:
        - a. “The geologic model and properties served as inputs for numerical simulations of CO2 injection using Computer Modelling Group Ltd.’s (CMG’s) GEM software (Computer Modelling Group Ltd., 2021). Numerical simulations of CO2 injection were conducted to assess potential CO2 injection rate, disposition of injected CO2, wellhead pressure (WHP), bottomhole pressure (BHP), and pressure

changes in the storage reservoir throughout the expected injection time frame and postinjection period. Results of the numerical simulations were then used to determine the project's area of review (AOR) pursuant to North Dakota's geologic CO<sub>2</sub> storage regulations."

3. United States Geological Survey's PHREEQC geochemical model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  4. The data and load files and data decks for the SLB Petrel model that was run for Summit's applications.
  5. Computer Modelling Group Ltd.'s GEM model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  6. 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Schlumberger SEclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format.
  7. Input files, field and analytical data, and the model geochemical database (and the sources of the foregoing) used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.
- ii. These models also include the conclusions drawn from the models and the data inputs used, particularly as those conclusions were used to support Summit's applications as referenced in these topics.
  - iii. The identity of the person most familiar with the workflows described in Section 3.2.3 of Summit's application in NDIC Case No. 30869 and how it was performed for purposes of Summit's applications and the identity of the person who wrote this passage.
  - iv. The meaning and context and details of how the various processes and functions described in Section 3.2.3 of Summit's applications and how they were actually performed and the models and calculations used to support them.
- b. The factual documentation and information that might support or that Summit will use to support a finding "[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space" as required by N.D.C.C. § 38-22-08(5).
  - c. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding "[t]hat the proposed storage facility

will not adversely affect surface waters or formations containing fresh water” as is stated at N.D.C.C. § 38-22-08(7).

- d. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding that “[t]hat the storage facility will not endanger human health nor unduly endanger the environment” as is stated at N.D.C.C. § 38-22-08(10).
- e. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding “[t]hat the horizontal and vertical boundaries of the storage reservoir are defined [and] include buffer areas to ensure that the storage facility is operated safely and as contemplated” as is stated at N.D.C.C. § 38-22-08(12).
- f. The factual documentation and information related to or that might support or that Summit will use to support any finding in this proceeding that “all nonconsenting pore space owners are or will be equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14) and any documentation, information, data sets, comparable sales, comparable transactions, appraisals, market reports, financial reports, or other documents related to or referencing compensation paid to nonconsenting pore space owners.
  - i. This subtopic I.b. includes all amounts paid by Summit to any individual or entity for use of or damages to pore space or property rights associated with or related to its storage facility that is the subject of Summit’s application and the Storage Reservoir, and all agreements for such use or damages or payments.
  - ii. This subtopic I.b. includes all reports and agreements in Summit’s possession indicating any amount of compensation paid for any kind of use of or damage to pore space or property for CO<sub>2</sub> sequestration. If Summit has in its possession any agreement with any property owner for use of property or damage to property arising from use of pore space or property for storage or sequestration of CO<sub>2</sub> it is included in this topic.

Bismarck, ND 58501-4003

**RE: NDIC Case Nos. 30869–30880**

Dear Derrick:

This letter concerns the following documents you served in the above-referenced cases: Intervenor Landowners' Second Amended Notice of 30(b)(6) Deposition of Summit Carbon Storage #1, LLC; Intervenor Landowners' Second Amended Notice of 30(b)(6) Deposition of Summit Carbon Storage #2, LLC; Intervenor Landowners' Second Amended Notice of 30(b)(6) Deposition of Summit Carbon Storage #3, LLC (collectively, the "Deposition Notices"). I received copies of these documents by e-mail yesterday, June 4, 2024.

Rule 30(b)(1) provides that a party who wants to depose a person by oral questions must give reasonable written notice "to every other party." The North Dakota Industrial Commission ("Commission") issued an order on Monday, June 3, 2024, granting the petition to intervene in NDIC Case Nos. 30869–30880 filed by Minnkota Power Cooperative, Inc. ("Minnkota"). The declaration of service accompanying the Deposition Notices does not indicate that Minnkota has been served with copies thereof. As a result, the Intervenor Landowners have not complied with Rule 30 and the Deposition Notices are ineffective. *Cf. Rolin Mfg., Inc. v. Mosbrucker*, 544 N.W.2d 132, 139 (N.D. 1996) (Noting that issuance of subpoena without written notice to other parties was "not consistent with" the Rules of Civil Procedure and affirming district court order quashing subpoena and imposing sanctions on issuing party).

If Minnkota has been given notice of the proposed depositions of my clients, there remain issues with the Deposition Notices that I believe are ultimately fatal. As noted above, Rule 30(b)(1) requires that a party seeking to depose another person must give "reasonable written notice" thereof. The Deposition Notices were served on June 4, 2024, for a deposition to take place on June 6, 2024. I am not aware of any court that has held less than two days' notice to be "reasonable" under Rule 30. For this reason, the Deposition Notices do not comply with Rule 30.

Rule 30(b)(6) requires that “[b]efore or promptly after the notice . . . is served, the serving party and the organization must confer in good faith about the matters for examination.” Intervenor Landowners have not attempted to confer in good faith with my clients regarding the matters for examination, nor does a June 6, 2024 deposition date allow for such conferral. As such, the Intervenor Landowners have not complied with Rule 30(b)(6) and the Deposition Notices are for that additional reason ineffective.

The Intervenor Landowners failure to confer in good faith regarding matters for examination is exacerbated by the fact that the Deposition Notices do not comply with Rule 30(b)(6)’s requirement they “describe with reasonable particularity the matters for examination.” As I read the Deposition Notices, I understand the topic for examination to be “Summit’s applications and the information contained in and created or submitted in support of the applications and conclusions drawn therefrom in NDIC Case Nos. [30869–30880].” This is analogous to listing “all allegations contained in the complaint” as a matter for examination, which courts routinely reject for failure to comply with the reasonable particularity requirement. *See, e.g., Washington-St. Tammany Elec. Coop., Inc. v. Louisiana Generating, L.L.C.*, No. CV 17-405-JWD-RLB, 2019 WL 1804849, at \*12 (M.D. La. Apr. 24, 2019) (concluding that 30(b)(6) deposition topic “which generally refers to allegations in the Complaint” is overly broad and fails to describe the topic with reasonable particularity); *Waste Mgmt. of Louisiana, LLC v. River Birch, Inc.*, No. CV 11-2405, 2017 WL 2831700, at \*3 (E.D. La. June 30, 2017) (finding that “The factual basis for the allegations contained in [the Plaintiff’s] RICO Statement” and “The factual basis for the allegations contained in [the Plaintiff’s] Third Amended Complaint” to be overly broad as written); *Carriage Hills Condo., Inc. v. Roofing*, 109 So.3d 329, 336 (Fla. App. 2013) (finding that “all allegations contained in the complaint” fails to meet reasonable particularity requirement); *E3 Biofuels, LLC v. Biothane, LLC*, No. 8:11CV44, 2013 WL 4400506, at \*2 (D. Neb. Aug. 15, 2013) (stating the most obvious example of a failure to particularize the areas of inquiry is a request for testimony regarding “[Plaintiff’s] claims as set forth in its Amended Complaint”). Because the Deposition Notices fail to comply with Rule 30(b)(6)’s “reasonable particularity” requirement, they are improper and ineffective.

Ultimately, this letter is intended to inform you that because of the Intervenor Landowners’ failure to comply with Rule 30, my clients do not intend to appear for the depositions tomorrow, June 6, 2024, as set forth in the Deposition Notices. Should you have any questions, please advise.

Sincerely,

/s/ Lawrence Bender

Bender ltr from DB re discovery and deposition.pdf

Lawrence,

I appreciate your sending this notice and letting me know in advance this evening.

I disagree that there is not an obligation for your client to produce a witness. I'll respond specifically to your points below.

I did provide notice to Minnkota. I was in a hearing all day today with Josh Swanson and explained it to him and he was aware of the deposition and apparently not intending to participate. But he did get notice. We also served him formally with the notice of deposition.

I offered to confer before I even served the notice, and that letter is attached. I then served you with the notice that included the topics for examination on May 9, and they have not changed since then. That was more than sufficient to provide you with reasonable notice as well. You were provided with the topics a month ago and they've not changed, and you were well aware of the date and time. My opening email also offered to confer and adjust the date or work with you on this depo, and you never took me up on that.

As to the particularity of the topics speak for themselves, and I clearly did not simply state "the applications." For example, I narrowed in from the broader category to very specifically request a witness prepared to discuss: "The data and inputs and model referred to in Section 3.1 of the applications as follows: [the] geologic model and properties served as inputs for numerical simulations of CO2 injection using Computer Modelling Group Ltd.'s (CMG's) GEM software (Computer Modelling Group Ltd., 2021). Numerical simulations of CO2 injection were conducted to assess potential CO2 injection rate, disposition of injected CO2, wellhead pressure (WHP), bottomhole pressure (BHP), and pressure changes in the storage reservoir throughout the expected injection time frame and postinjection period. Results of the numerical simulations were then used to determine the project's area of review (AOR) pursuant to North Dakota's geologic CO2 storage regulations." I also specified: "United States Geological Survey's PHREEQC geochemical model and both the data files and data inputs used to run this model and bases for using the chosen inputs."

I intend to move forward with the deposition tomorrow morning. If there is no witness I will put that on record and continue the deposition.

Thank you,  
Derrick

**Re: Summit Carbon Solutions – NDIC Case Nos. 30869-30880**

Lawrence:

I am writing to discuss discovery in this administrative proceeding. I would like to conduct a 30(b)(6) deposition of your client and am currently working on a topic list and will be providing that to you in the next few days. I understand you will need to see the topics in order to determine who at Summit will be testifying, but I would like to put aside some days in late May/early June for the deposition that work for our two schedules at least given how busy we both are and are likely to become. Please let me know what days you have available for a deposition. I also will be serving your client with a couple rounds of written discovery, and I want to give you a heads up that I intend to request that the NDIC expedite the discovery process.

I also would like to know if you would have any objection to my asking the commission for electronic data and files that were provided to the commission on behalf of your client, such as shape files, engineering files for the reservoir modeling and geological data. If I am able to get all data and electronic files the Commission has, that may be sufficient for my experts and their technical review if it contains all of the pertinent data. I'm also happy to sit down with you and anyone from Summit or the NDIC to discuss a way to efficiently exchange data and information prior to the hearing.

Sincerely,

Derrick Braaten

Lawrence,

I scheduled this to get a date down and I did try to look at what I know of your schedule between PSC hearings, etc. I am open to rescheduling this if we can find a mutually agreeable date though, so just wanted to let you know that right away. I realize we may also still get in a fight about whether you're going to show up or respond to anything I am doing until the NDIC responds to the petition, but assuming I move ahead with it just let me know on the date.

Thanks,  
Derrick

**Selected Project Experience****EXPERT TESTIMONY**

**ARCO (Anaconda, Montana)** - Developed permits for construction and discharge of 7 outfalls for a drain tile system to control high groundwater. Activities included a water quality evaluation, contaminant source mitigation, legal depositions, and permitting for MPDES, 310 and 404 Permits. Provided expert testimony in support of ARCO as part of the civil case.

**Braaten Law Partners, Peterson v. Petro Harvester Operating Company (Bottineau County, North Dakota)** - Provided a field assessment for numerous produced water spills from a salt water disposal facility and oil and gas production. Parameters of concern included a soils impact assessment of total dissolved solids, sodium adsorption ratio, chlorides, radium and extractable petroleum hydrocarbons and review of defendant's remediation report to an agricultural field. The expert report integrated multiple disciplines to include hydrogeology, regulatory compliance (NDIC, NDDoH, EPA), soil chemistry, and hydrogeology.

INDUSTRIAL COMMISSION  
STATE OF NORTH DAKOTA

DATE 6/13/24 CASE NO. 30869-880

Introduced By Braaten

Exhibit L0-81

Identified By Svenson

**Braaten Law Partners, (Belle Creek, Montana)** – Provided a field assessment for oil and gas production spill and clean-up. Field assessment included sampling soils for EPH, common cations/anions, and observations in support of surface owner documentation of clean-up.

**Crist Law Firm, McEwen v. MCR, LLC (Shelby, Montana)** – Provided expert services regarding an oil and gas produced water permitted outfall for a surface pond used as a stock water source for sheep. Evaluations included decommissioning the pond through land application of the water, and surface reclamation of the pond bed.

**Crowley Fleck, PLLP, Skari v. True Oil (Liberty County, Montana)** – Provided expert services regarding clean-up of produced water impacted alkaline soils. Subsequent work included the preparation of a soils remediation plan to address soil EC and SAR.

**D'Alton Law Firm, Morgan Farms v. Interstate Explorations, LLC (Billings, Montana)** – Provided expert services regarding clean up and disposal of petroleum contaminated soils, storm water permitting issues, and spill prevention, control and countermeasure plans for a former drill site on private surface.

**Doney Crowley, P.C., Yellowstone Disposal Landfill Environmental Assessment (Sidney, Montana)** – Provided expert services regarding public comment of the DEQ prepared Environmental Assessment for the permit application to construct and operate a special waste landfill southeast of Sidney, Montana on behalf of a citizen's group and their legal representation. Evaluation included ground and surface water, air quality, landfill operations, and waste acceptance criteria including NORM and TENORM.

**Moulton Bellingham, PC, Ralston v. City of Hardin (Hardin, Montana)** – Completed a site reconnaissance and expert witness opinion regarding plaintiff's expert disclosure regarding storm water and sanitary sewer impacts to properties as a result of significant rainfall events.

**Montana Board of Oil and Gas, (Montana)** – Project Manager and Lead Engineer to prepare draft an application to EPA for Underground Injection Control (UIC) Program Class VI Primacy Application for Carbon Sequestration. Reviewed all EPA guidance documentation regarding project planning, site characterization, well construction, testing and monitoring, AOR corrective action guidance, financial responsibility, and public participation considerations. Used the guidance to complete the draft of six core element, MIT, P&A, Groundwater Investigations, Environmental Monitoring, Emergency Response, and Enforcement and Compliance Procedures of the primacy application.

**Sweely Oil Company, (Sidney, Montana)** – Conducted a remedial investigation and provided expert testimony in support of challenges to land use of a former Standard Oil services station.

#### **NEPA/ MEPA- EIS/EA**

**Montana DEQ, Butte Highlands Mine EIS (Montana)** -Project Engineer for Montana DEQ under the Hard Rock Mining Bureau and USFS. Evaluated primary, secondary impacts from air quality and hazardous materials for compliance with MEPA/NEPA, MMRA, and CWA.

**Montana DEQ, Garnet Hill Mine EIS (Montana)** - Project Engineer for Montana DEQ under the Hard Rock Mining Bureau. Project Engineer for Montana DEQ under the Hard Rock Mining Bureau. Evaluated primary, secondary impacts from air quality and hazardous materials for compliance with MEPA, MMRA, and CWA.

**Montana DEQ, Cloud Peak Energy, Spring Creek Mine (Montana)** – Project Engineer Reviewed the expansion EA for the proposed Spring Creek Mine Transportation Corridor and evaluated primary, secondary impacts for compliance for air and water quality with MEPA, MSUMRA, and CWA. Final EIS pending DEQ approval.

**Montana DEQ, Golden Sunlight Mine, (Whitehall, Montana)** - Reviewed the expansion EA for the East Area Pit Expansion Amendment for MDEQ. Review included an evaluation of potential water quality and quantity to

the Primary Pit Flowpath for Montana DEQ under the Hard Rock Mining Bureau, and evaluated primary, secondary impacts for compliance with MEPA, MMRA, and CWA.

**Montana DEQ, Montana Resources (Montana)** - Project Engineer on the Montana Resources EIS and was responsible for air quality and geochemistry. He also served as technical editor for water quality, water treatment and mining operations for Montana DEQ under the Hard Rock Mining Bureau, and evaluated primary, secondary impacts from air quality and water quality of tailings water for compliance with MEPA/NEPA, MMRA, RCRA, CAA, and CWA. Completed a technical memorandum on air quality at the project site. Draft EIS has been published for comment.

**Montana DEQ, Outstanding Resource Water EIS, Gallatin River (Big Sky, Montana)** - Through MDEQ's consultant, Garcia and Associates, a measurable change impact evaluation on water quality of the Gallatin River was completed. Projected impacts by developments along the Gallatin River through nutrients (nitrogen and phosphorous) were made in support of baseline and impacts analysis for the EIS. This was based on modelling impacts based on single family entities waste water flows and nutrient loading in hydrologically connected aquifers to the stream. Footprint analysis was developed to determine areas conjunctive interaction between stream and groundwater for the over 30 mile stretch.

**Rosetta Resources Operating, LP Programmatic Environmental Assessment, Oil and Gas Exploration and Development (Shelby, West Shelby, Calk Butte Prospect Area (Cut Bank, Montana)** - This was an extensive EA with multiple cooperating agencies covering 270,000 acres within the Blackfeet Indian Reservation. As project engineer, an evaluation was completed of environmental conditions with respect to air quality and GHG of an existing, historical oil field with respect to proposed development of horizontal and fractured wells within the resource area. The EAs evolved over the years to include greenhouse gas (GHG) emission evaluation and air quality concerns for development and long term production. Preparation of the EA documents involved a team of specialists and scientists from the BIA regional office, BIA Blackfeet Agency, Blackfeet Tribe, BLM, and the operator. The Draft EA was finalized in October 2011.

**USFS Blacktail Road Restoration and Stabilization Project, Environmental Assessment (Flathead National Forest, Montana)** - Completed an air quality and GHG impacts analysis based on current and existing Forest Service data, ensuring that the EA was consistent with recent land management EIS documents, responding to all public comments, compiling the project record, and revising the final EA and Record of Decision. The Draft EA was issued in July 2016, and the Final EA and Record of Decision were issued in December 2016.

**USFS Butte Highlands Mine Haul Road Project, Environmental Assessment (Montana)** - Served as lead consultant for the Forest Service's comment analysis and final Environmental Assessment with regards to GHG and air quality concerns. The Draft EA was issued in March 2014, and the Final EA was issued in March 2015. HydroSolutions also assisted the Forest Service to address issues during the objection process.

**USFS Fern Hardy Resource Area, Supplemental Environmental Assessment, (Flathead National Forest, Idaho)** - Performed a GHG/Air Quality impacts analysis for resource development within the Flathead National Forest. The Draft S EA was issued in December 2016. The Final S EA is in process.

## **MINING and OTHER PERMITS**

**Cloud Peak Energy, Spring Creek Mine (Decker, Montana)** - Completed a geochemical evaluation of arsenic fate using USGS PHREEQC model to assess arsenic sources, speciation, and fate as a supplement to the mine's probable hydrologic consequences document.

**Echo Bay Minerals-Borealis Mine (Nevada)** - Reviewed and compiled data for effluent parameters from heap leach decommissioning rinse effluent for anticipated rinse water quality from spent leach pads. Water quality data was used in preparation of a heap leach closure permit.

**Golden Sunlight Mine (White Hall, Montana)** - Conducted this analysis to evaluate whether the East Area Pit would alter long-term predictions of groundwater quality and quantity along the Primary Pit Flowpath, or whether impacts would remain as disclosed in the April 1998 Final EIS (1998 FEIS) for Amendment 008 to Operating Permit No. 00065 and the July 2007 Supplemental EIS (2007 SEIS) for the Golden Sunlight Mine Pit Reclamation.

**Marc Rich Mining-Salsigne Mine et (Carcassonne, France)** - Investigated alternative forms of iron oxidation in mine water in order to precipitate the trace metals with organic flocculent. Investigated alternatives for the reduction of calcium sulfate scale by reagent selection and modification of operating parameters.

**Montana Department of State Lands, Abandon Mine Reclamation Bureau, Hazardous Mine Opening (Butte, Montana)** - Characterized waste rock dumps and profiled shaft water to evaluate potential environmental impacts prior to backfilling of historic hazardous mine openings. Parameters included assessment of acid generating materials, dissolved metals impact to groundwater, and beneficial use survey.

**Montana Department of State Lands, Abandon Mine Reclamation Bureau, Pony Hill Mine Tailings Decommissioning (Pony, Montana)** - Designed and installed a cyanide evaporation system to remediate weak acid dissociable cyanide from 27,000 yards of tailings located in a lined impoundment. Up to 6 million gallons of tailings surface and pore water were treated to drinking water standards during the fast track schedule.

**Landusky Mine Site, Swift Gulch Water Quality Evaluation (Landusky, Montana)** - Through Spectrum Engineering, site operator for MDEQ, a water quality evaluation of Swift Gulch was performed due to acid rock drainage seepage impacts. Water quality projections were completed along with the development of treatability options using lime addition.

**RTZ-Rössing Uranium Limited (Windhoek, Namibia, Africa)** - Evaluation and study of corrosion from high TDS process water in a uranium mine in NAMIBIA (Southwest Africa) due to high recycle rates within the milling circuit. High recycle rate of process water was due to the limited availability of water at the mine site.

## HAZARDOUS MATERIALS

**Marathon Oil Corporation (Wyoming)** - Prepared a hazardous waste handling document for hazardous materials handling including listed, characteristic and universal wastes for Marathon operations.

**Wyoming Land Quality Division (Wyoming)** - Reviewed adequacy of current Wyoming non-coal statutes, rules and regulations, guidelines, and standard operating procedure documents for the protection of the environment with regards to hazardous and Bevill exempted materials and implications of rare earth development. Specific attention was placed on rare earth elements and perpetual water treatment.

## AIR QUALITY

**Augustus Energy Partners, LLC (Wray, Colorado)** - Completed annual air quality and greenhouse gas (GHG) estimation and reporting for onshore natural gas EPA submittal. Ongoing work includes compliance with Federal (OOOO) and State of Colorado air quality regulations 3, 6 and 7, and minor source permitting of O&G production, compressor, and disposal/injection facilities.

**Genesis Energy, LP - Pronghorn Rail Facility (Douglas, Wyoming)** - Through the site consultant, Project Consulting Services, an air quality permit application was completed for a 40,000 barrel per day truck offloading facility with 6-2,000 barrel storage tanks. The facility also included 4-110,000 floating roof, above ground crude oil storage tanks, rail facility for loading upwards of 80,000 barrels per day of crude, 1-flare, with the facility powered by 4 natural gas fired RICE engines. Permit analysis included dispersion modelling for NOx using AERMOD.

**Intermountain Asphalt Supply (Fernly, Nevada)** - Estimated emissions for a proposed 100,000 ton per year asphalt storage and transfer facility and the associated 350 hp natural gas fired boiler and two 16 MM btu/hr natural gas fired heaters using AP-42 estimating procedures. Performed an MSDS, TSCA and HAPS review of on-site chemicals.

**Intermountain Asphalt Supply (Ogden, Utah)** - Estimated emissions for a proposed 150,000 ton per year asphalt storage and transfer facility and the associated 11.2 MM btu/hr natural gas fired boiler and two 11.2 MM btu/hr natural gas fired heaters using AP-42 estimating procedures. Performed an MSDS and TSCA review of on-site chemicals. Completed air quality permit applications.

**Marathon Oil Corporation (Wyoming)** - Completed five minor source air quality permits for grandfathered unitized facilities with over 100 wells per facility in basins with near 100 years of production.

**Marathon Oil Corporation (Wyoming)** - Completed evaluation of six facilities for hydrogen sulfide emission and dispersion. Evaluations included geochemical modelling of hydrogen sulfide in produced water using USGS PHREEQC model. Emissions were estimated using EPA's WATER9 model and dispersion evaluated using EPA's AERMOD.

**Marathon Oil Corporation (Wyoming)** - Completed a minor source emission inventory for all Marathon Wyoming oil and gas facilities for WyDEQ biannual reporting.

**Riverside Contracting (Pablo, Montana)** - Estimated emissions for a proposed 15,000 ton per year asphalt storage and transfer facility and the associated 200 hp boiler using AP-42 estimating procedures. Performed an MSDS and TSCA review of on-site chemicals.

**Rosetta Resources – Alberta Basin (Cut Bank, Montana)** - Completed an air quality and greenhouse gas impact analysis for a programmatic environmental assessment for oil and gas development within a region of historical oil and gas production.

**Saint Mary's Exploration (SME) formerly Nance Petroleum, Inc. (Eastern Montana/Western North Dakota)** - Completed over 140 minor source air quality permits/registration for oil and gas facilities with a three month completion date. Completed an air dispersion evaluation using SCREEN3 dispersion modelling software for hydrogen sulfide and VOC impacts to the area for BLM review.

**United States Exploration (DJ Basin, Colorado)** - Completed 15 minor source registrations for condensate and natural gas wells within the DJ basin.

## ENVIRONMENTAL ENGINEERING

**Big Horn County Museum (Hardin, Montana)** - Performed a preliminary domestic wastewater treatment wetland design incorporating subsurface and surface flow wetland treatment cells for the treatment of approximately 0.5 million gallons per year of domestic wastewater. Parameters of concern included nitrates, BOD, fecal coliform and TSS.

**CENEX Petroleum, Inc. (Billings, Montana)** - Designed and constructed a soil vapor extraction system for in-situ petroleum contaminated soil remediation and a dual completion sparge system to address the remediation of dissolved organic constituents in groundwater.

**Chaffin, Inc. (Billings, Montana)** - Designed and constructed a soil vapor extraction/sparge system for remediation of in-situ petroleum contaminated soil and dissolved organic constituents in groundwater.

**Hudstad Property (Helena, Montana)** – Designed an SVE system installed beneath a monolithic slab for remediation of PCE using horizontal boring techniques to install the vapor wells. Designed and implemented a granular activated carbon air treatment system to recover PCE.

**Montana Resources (Butte, Montana)** - Tasks included project management, sampling process outfall and approximately 40 wells ranging from 20 to 500 feet in depth. Sampling included measurement of numerous field parameters and evaluation of laboratory reports. Also performed hydraulic conductivity testing and evaluation of aquifers placed in both waste rock piles and tailing impoundments.

**Fidelity Exploration and Production Company, Wyoming** - Completed an injection feasibility study and for injection into the Eagle Formation-Shannon Sandstone in the Powder River Basin. Prepared dual UIC application of Class V and II w/ associated aquifer exemption rationale to EPA Region VIII.

**Golden Sunlight Mine, Barrick Minerals, (Whitehall, Montana)** - Reviewed expansion EA for the East Area Pit Expansion Amendment for MDEQ. Review included an evaluation of potential water quality and quantity to the Primary Pit Flowpath.

**Merit Energy Company (Formerly Marathon Oil Corporation), Wyoming** - Ongoing waste reduction evaluations for oil and grease and sulfide/sulfate reduction in produced water discharges and numerous facilities in the Rocky Mountain Operations at total flows exceeding 250,000 barrels of produced water per day. Evaluations have included degradation models, geochemical modelling, dynamic system modelling and treatment options.

**Miller Paint Company (Eugene, Oregon)** - Developed workplan and cost estimate for voluntary clean-up of chromic acid contaminated soils beneath a building and concrete slab. Established clean-up criteria and coordinated off-site disposal of both hazardous and non-hazardous waste.

**Montana Department of Environmental Quality (Big Sky, Montana)** - Performed field sampling and stream gauging and evaluated water quality data for the Big Sky Environmental Resource Assessment. Parameters of concern included nutrients and TSS associated with both natural and manmade sources.

**Montana Department of Environmental Quality, Helena Solvent Site (Helena, Montana)** - Completed a remediation evaluation, and designed/installed at 150 cubic feet per minute horizontal soil vapor extraction system to remove PCE from the vadose beneath a dry cleaner facility. Project included the design and implementation of a GAC system to remove vapors from the SVE exhaust stream

**Nance Petroleum, Inc. (SME) (Montana)** - Prepared a Class II and V UIC permit for injection of CBNG produced water into the Fox Hills in the Powder River Basin. Application included support for proposed aquifer exemption through EPA Region VIII for the Class II disposal well.

**Tristates Mint (Rapid City, South Dakota)** - Compiled data for USEPA administrative hearing. Data included calculation of various cyanide/metal concentrations and degradation rates in plating solutions. Researched literature related to industrial hygiene concerns of constituents emanating from gold and silver plating solutions.

## **WATER QUALITY PERMITTING**

**ARCO (Anaconda, Montana)** - Developed permits for construction and discharge of 7 outfalls for a drain tile system to control high groundwater. Activities included a water quality evaluation, contaminant source mitigation, legal depositions, and permitting for MPDES, 310 and 404 Permits. Provided expert testimony in support of ARCO as part of the civil case.

**Black Hills Power and Light-Kirk Power Plant (Rapid City, South Dakota)** - Developed regulatory contacts for permitting and approval prior to effluent pipe diffuser installation and coordinated all governmental permit applications. (Army Corp of Engineers, USEPA Region 8, South Dakota Department of Water and Natural Resources).

**Brewer Gold-Westmont Mining (Jefferson, South Carolina)** - Developed site specific criteria for NPDES permit for selected parameters in Little Fork Creek. Implemented a flow measurement apparatus and

engineered pipe modification for flow measurement of sediment pond discharge into Little Fork Creek for NPDES permit compliance.

**Confidential Client (Canada)** - Assisted in developing site specific criteria for ammonia in mine effluent water for the protection of salmonids in the receiving stream. Performed calculations for free ammonia criteria development based upon pH and temperature.

**Confidential Client (United States)** - Examined waste load allocation sensitivity to dilution and hardness related values for the development of effluent limitations for NPDES permit development. Developed site specific effluent criteria for silver and cyanide.

**Cyprus Minerals (Thompson Creek, Idaho)** - Compiled water quality data. Examined dilution and hardness measuring their effect on effluent limitations developed through waste load allocation computations. Performed a sensitivity analysis to optimize effluent discharge on the receiving stream currently being utilized as a trout fishery.

**FMC-Beartrack Mining (Salmon, Idaho)** - Assisted in the development of revised site specific criteria for the NPDES permit. Tasks included validation of USEPA criteria for waste load allocations and statistical evaluation. Assisted in developing discharge strategies using controlled hydrograph release to enhance dilution due to seasonal fluctuations in receiving stream volume.

**Homestake Mining (Lead, South Dakota)** - Examined sensitivity of hardness related parameters and dilution requirements for NPDES renewal permit for an existing outfall.

**Kraken Oil, O&G Facility, Richland County (Montana)** - Completed a Notice of Intent for coverage under an NPDES construction storm water general permit for construction disturbance for a highway turnout and well facility pad, and completed a Storm Water Pollution Prevention Plan.

**Linc Energy, Underground Coal Gasification Demonstration Project (Campbell County, Wyoming)** - Evaluated water quality baseline data and development of UCLs, permitting assistance, restoration of water quality evaluation and treatability options, and aquifer exemption.

**Phoenix Production – Breitburn Energy, O&G Facilities, North Sunshine Field (Wyoming)** - Completed a construction WYDPES storm water permit application for construction disturbance for a lease road and well facility pad, and completed a Storm Water Pollution Prevention Plan.

**Rosetta Resources – Tribal Big Rock Facility (Cut Bank, Montana)** - Completed an erosion control plan for lease road upgrades and well pad facility for a new O&G development on Tribal Lands through the BLM.

**Times Limited (Bozeman, Montana)** - Compiled water quality and bioassessment data to evaluate impacts from historic and active mine operations in Whitewood Creek drainage area near Lead, South Dakota.

**United Parcel Service (Alaska and Montana)** - Developed EPA Class V Underground Injection Control permits for discharges emanating from UPS facilities in EPA Regions 8 and 10.

**United Parcel Service (Billings, Montana)** - Developed pretreatment permit application for POTW discharge from a truck wash facility. Selected oil/water separator to meet effluent standards.

#### **PROCESS ENGINEERING - (ACID MINE DRAINAGE, METALS, AND CYANIDE TREATMENT)**

**Atlantic Richfield Company, ARCO (Butte, Montana)** - Assisted in engineering projects and installed instrumentation, piezometers and discrete interval samplers in constructed wetlands for treatment of metals and sulfide impacted mine waste runoff.

**Boliden Resources (Bald Mountain, Maine)** - Developed a process design and cost estimate for a 1.2 MGD wastewater treatment facility for the treatment of high selenium, chromium and acid mine drainage wastewater to meet primary drinking water standards. The treatment facility used pH adjustment, sulphide precipitation, water softening and multimedia sand filtration with either ion exchange or reverse osmosis for tertiary treatment of specific metals to reach effluent limitations. Anticipated wastewater characteristics were modelled over a 10 year life of mine.

**Brewer Gold (Jefferson, South Carolina)** - Performed an economic analysis and feasibility study for an AVR process for the recovery of cyanide from mine tailings. Conducted batch pilot plant study using AVR and the effect on acid mine drainage and precipitation of gypsum in tailings impoundments.

**Brewer Gold (Jefferson, South Carolina)** - Investigated alternative methods of acid mine drainage control via iron precipitation through trisodium phosphate addition. Performed an extensive investigation for previous acid rock drainage control through chemical application to include the use of apatite and surfactants. Specific types of chemicals containing phosphate were researched to evaluate availability, price, and phosphate content. Field trials were performed at the mine site and proved successful.

**Confidential Client (United States)** - Performed a process design and cost estimation for a 7.2 MGD acidification/volatilization/reneutralization (AVR) process to recover cyanide from mine tailings. This process was later patented as the Cyanasorb Process. Also, performed an economic and feasibility study of the process to predict cyanide recovery payback period.

**Cyprus Minerals (Thompson Creek, Idaho)** - Provided a process design and cost estimate for a 1.5 MGD treatment facility for acid mine drainage and metals removal for a potential mine outfall discharging to the Salmon River in Idaho.

**Minnova (Canada)** - Provided a process design and cost estimate for a 0.4 MGD treatment facility for acid mine drainage and metals removal for a mine outfall discharging to Sturgeon Lake in Ontario, Canada.

**Marathon Oil Company (Oregon Basin, Wyoming)** – Over the course of 10 years, performed ongoing water management, process engineering, and permitting services on facilities discharging up to 250,000 barrels of water per day.

**SME formerly Nance Petroleum (Billings, Montana)** – Provided ongoing water management services for coal bed methane development to include treatment, dynamic system modelling, and cost estimates to manage waste streams over 5 years of development.

**Nerco Minerals-Delamar Silver Mine (Jordan Valley, Oregon)** - Modified and operated a pilot plant and performed laboratory studies for the recovery of cyanide tailings slurry using the AVR process. Acid consumption and metals attenuation were studied on the reneutralized tailings. The data was used in the design of a 2.0 MGD facility. This plant was the first one of its kind in the United States. Reviewed existing technologies for the treatment of selenium and wad cyanide in tailings for economically feasible treatment methods.

## ENVIRONMENTAL SITE ASSESSMENTS- DUE DILIGENCE

**Augustus Energy Partners, (Colorado)** - Performed an Environmental Compliance Evaluation of approximately 700 gas and oil wells with associated compression, pipeline and salt water disposal wells. The project included site equipment inventories, regulatory compliance evaluation, Storm Water Permit, and UIC permit review.

**Breitbart Energy (Wyoming)** - Through their consultant, Golden Globe Engineering, a Phase I ESA was performed on O&G properties at Black Mountain, Gebo, Half Moon, Hidden Dome, North Sunshine, Rolff Lake, Sheldon Dome, West Oregon Basin fields, Wind River and Circle Ridge Pipelines. Properties included BLM, Tribal, Fee, and State surface and minerals.

**Department of Energy, RMOTC-NPR No. 3 (Casper, Wyoming)** - Performed a Phase I ESA on approximately 700 oil and gas properties to include industrial landfills, composting areas, a gas plant and crude, gas and salt water disposal (SWD) pipelines. Assessment included verification of UIC permits, MIT expiration, pit permits and reclamation requirements, and site equipment inventories.

**Double D Energy (Nevada)** - Performed a Phase I ESA on approximately 12 oil and gas properties to include a salt water disposal (SWD) pipeline. The project included site equipment inventories.

**MCR, LLC, Montana** - Performed a Phase I ESA on approximately 600 oil and gas properties to include a gas plant and crude, gas and salt water disposal (SWD) pipelines. Assessment included verification of UIC permits, MIT expiration, pit permits and reclamation requirements, and site equipment inventories.

**Montana Power Company (Billings, Montana)** - Performed a Phase I Environmental Site Assessment using ASTM Standard E-1527-93 on a 90 mile 6-inch crude/product Shoshone Pipeline prior to acquisition.

**Nance Petroleum, Inc. (Montana, Wyoming, Colorado, Nevada)** - Performed a Phase I ESA on approximately 500 oil and gas properties to include a gas plant and crude, gas and salt water disposal (SWD) pipelines. Assessment included verification of UIC permits, MIT expiration, pit permits and reclamation requirements, and site equipment inventories.

**Paul Button**

**SUMMARY OF QUALIFICATIONS**

**Petroleum Engineer** with diversified experience in reservoir and production engineering. Responsibilities include reservoir modeling, geologic engineering, rate transient analysis, property valuation, well completion optimization, detailed reservoir characterization, waterflood management, and EOR management.

**EMPLOYMENT HISTORY**

**TerraStor Energy Corporation**

**2021-Present**

**Chief Technology Officer**

**Butte, MT**

Perform geologic search for Compressed Air Energy Storage (CAES) sites. Determine electricity grid connectivity around geologic sites to determine if interconnection is possible. Liaison with consulting engineers and OEM providers on compression, turbo expansion, heat exchange and cavern design.

**Poplar Resources**

**2019-Present**

**Sr Vice President Resource Development**

**Billings, MT**

Supervise technical and operational staff on the implementation and monitoring of gas oil gravity drainage project at Poplar Dome.

Develop EOR development plan, schedule implementation operations, budget and monitoring of results.

**Button Petroleum Management**

**2016-2022**

**Consulting Reservoir Engineer**

**Billings, MT**

Consulting Reservoir Engineer that has performed field valuations and recovery forecasts on conventional and un-conventional fields at client's request.

- Constructed development plan for multiple water flood fields including economic model. Work with geology and land to determine unitization area and criteria.
- Conducted optimal spacing study for unconventional Bakken & Three Forks development. Reviewed multiple spacing tests and well performance to determine most economic development scenario for each reservoir in the client's subject land position.
- EOR review and valuation of field for acquisition. Included full reserve review and CO2 requirement review.
- Reservoir Simulation and EOR recovery project design and planning.
- Expert Witness and Advise on cases for Braaten Law Firm

**SM Energy**

**2005 - 2016**

**Senior Reservoir Engineer**

**Billings, MT**

Multi-disciplined team leader for Wyoming asset team, developing conventional, unconventional, and EOR reserves. Responsibilities include development planning, exploration evaluation, EOR project screening, and A&D evaluation.

- Multi discipline team lead responsible for the acquisition of 160,000 acres of stacked pay un-conventional resources in the Powder River Basin. Primary reservoir evaluator for over \$300 MM in acquisitions and

BLF-000001

over \$200 MM in appraisal drilling in the Frontier and Niobrara. Responsible for identifying key play drivers, developing optimal depletion plan, and maximizing net asset value. Key evaluation engineer on basin wide exploration effort focus on Muddy and Mowry.

- Lead reservoir engineer on team that developed the Niobrara and Codell resource plays in Laramie Co, Wyoming. Worked intricately with asset team to design innovative completion design to maximize recovery from Niobrara. Team drilled first long lateral (+9,000' lateral) which was key to economic exploitation of the Codell and Niobrara.
- Lead role in EOR evaluation of Wind River and Bighorn Basin Tensleep fields. Developed screening criteria and determined recovery potential on several legacy assets. Determined technical feasibility of miscible CO<sub>2</sub> but determined resource size was economically unfeasible.
- Primary reservoir engineer Nance Petroleum's early development of Elm Coulee Field Richland Co, MT. Instrumental in asset team's effort to improve recovery through spacing optimization, wellbore design and completion design.

## **Kinder Morgan**

**2003 - 2005**

### ***Reservoir Engineer***

***Midland, TX***

Multi-disciplined team member in Yates field, a highly fractured carbonate reservoir with 400 million barrels remaining reserves. Responsibilities include improving reservoir understanding, optimizing contact movement to improve reserve development, and providing analysis on EOR projects.

- Selected 40 horizontal well locations for drilling in early 2004. Prepared economic justification for each well, selected target interval within reservoir, developed detailed well plan, and provided production and reserve forecast for the program.
- Prepared detailed review of Surfactant and Thermal EOR projects that included review of production response, economic performance, and Texas EOR Severance Tax fillings.

## **MARATHON OIL COMPANY**

**1998 - 2003**

### ***Reservoir Engineer***

***Midland, TX***

Multi-disciplined team member in Yates field, a highly fractured carbonate reservoir with 400 million barrels remaining reserves. Responsibilities include improving reservoir understanding, optimizing contact movement to improve reserve development from double displacement gas injection, and providing analysis on EOR projects.

- Improve reservoir understanding for diversified team by proving simulation support that led to the optimization of the Double Displacement Process. Built and ran a variety of simulation models that led to increased understanding of oil drainage and mobilization. Recommendations resulted in improved oil rate and increased asset value.
- Recommended termination of 60 MMCFD of nitrogen injection to control reservoir pressure growth and moderate contact movement to maximize oil mobilization. Project included simulation, material balance, and economic analysis as well as contract negotiation. Resulted in a \$25 million improvement in asset net present value.
- Performed reserve evaluation of an immiscible CO<sub>2</sub> project. Determined that a potential 25 million barrels of reserves are probable. Analysis involved compositional modeling, equation of state tuning, coordinating PVT lab work, and economic analysis.

- Coordinated \$80 million dollar capital and expense budget for three years. Responsible for presenting to senior management, tracking expenditures, and making recommendations on projects for local management's approval.
- Project engineer responsible for testing and developing innovative, low cost completion methods in Yates field. Successfully modeled completion performance of both vertical and horizontal completions and recommended changes in our completion practices that improved the well production efficiency. Published an SPE paper on the modeling work and presented it at a convention in Villahermosa, Mexico.

#### EDUCATION

***Bachelor of Science in Petroleum Engineering (B.S.P.E.) December 1997***

Montana Tech of the University of Montana, Butte, Montana

#### SPECIAL SKILLS

Reservoir Simulation... Rate Transient Analysis... Aries... PHDWin... Spotfire... Excel... Word... Power Point...

**P. Ted Doughty, Ph.D., P.Geol., CPG.**

1427 Avenue F, Billings, MT 59102

## **EMPLOYMENT**

### **Founder: PRISEM Geoscience Consulting LLC, 2005-present**

#### Projects

- Unconventional prospect evaluation and generation throughout the Rockies
- Well site geology for exploration wells in Montana and North Dakota. Includes cuttings description, gas analysis, core point selection, core processing, log evaluation.
- Drilling supervisor for a three well coring program for Hess. Cut over 1,000' feet of core with 99% recovery, 2015
- Consulting structural geologist, central Utah thrust belt, PetroTerra Energy, 2015.
- US Exploration Manager for Amarok Energy Inc in WY-MT thrust belt 2010-2014
- Exploration for structural prospects in the Rockies and Ouachita thrust belts
- Regional structural studies and balanced cross-section construction for exploration and detailed well planning in the WY and MT thrust belt
- Multiple prospect evaluations and reserve estimates for clients in Montana and Wyoming
- Core description and evaluation for unconventional prospect analysis (Bakken and Heath)
- Leader of exclusive PRISEM Bakken field trips in west-central Montana (10 years and counting)
- Leading and organizing industry-tailored field trips to examine the hydrocarbon systems of the WY-UT-MT thrust belt

#### Clients

- Rosetta Resources, Petrobakken, Crescent Point. Wolverine Gas and Oil, Primary Petroleum, Talisman Energy, Manito Energy, Ballard Petroleum, Memphis Enterprises, British Gas, Husky Energy, Hess Corporation, Petroshale Energy, Amarok Energy, PetroTerra.

### **Talisman Energy, Contract Geologist, 2005-2010**

- US-based member of US Rockies Exploration Team. Technical work and coordination of US activities. Drilled two wells in Wyoming/Utah Overthrust.
- Member of New Ventures Exploration Team (2010). Unconventional play generation and exploration in the Rockies and East Texas/Louisiana, includes Haynesville, Utica, Niobrara, Woodford, Heath, Bakken, and others

### **Eastern Washington University, Cheney, 2000-2008**

- Tenured Associate Professor, structural geology, tectonics, petroleum geology

### **Pason Systems Corp, 2005**

- Well-site geologist, log analyst

### **Geologist: Exxon Exploration Company, 1998-1999**

- Seismic interpretation: Nigeria
- 2-D and 3-D trap fill-and-spill evaluation and column prediction (west Texas, North Sea)
- Top seal failure analysis
- Reservoir pressure evaluation and integration with fault seal prediction
- 3-D seismic structure mapping

## **Geologist: Exxon Production Research Company, 1996-1998**

- Fault-trap analysis for prospect evaluation and risking (Scotian Shelf, GOM)
- Balanced cross-section construction in complex fold and thrust belts (Nigeria, Mauritania)
- Regional structural studies for basin evolution, structure integrity, and trap evaluation
- Evaluation of anomalous fault seal processes (clay smear, cataclasis, cementation)
- Fault zone mapping and description in California, Utah, and Colorado
- Description of fault linkage geometry (relay ramps, breached relays)
- Project leader for using ground-penetrating radar to map fault zone materials

## **Exploration Geologist: Amoco Production Company, 1990-1991**

- Interpreted well logs, drill core, and 2-D seismic data
- Constructed structure maps, isopach maps, and stratigraphic correlations using well logs
- Thrust-belt exploration in the Arkoma basin of southeastern Oklahoma
- Stratigraphic trap exploration in the Green River Basin and eastern Colorado
- Operations geologist responsible for an 8-rig drilling program in Moxa Arch

### **BASIN EXPERIENCE**

Williston Basin	West-Northwest Africa (Nigeria)
Arkoma Basin/Fayetteville shale	Willamette-Puget Sound Basin
Gulf of Mexico onshore salt basins	North Sea (onshore Netherlands)
MT-WY-UT thrust belt	Scotia Shelf
Wyoming: Green River/Hanna Basin/Big Horn/Powder River	Termit Graben (Niger)
Colorado: North Park Basin	North Louisiana/East Texas salt basins
	West Texas/New Mexico basins

## EXCLUSIVE OPTION TO LEASE PORE SPACE

THIS EXCLUSIVE OPTION TO LEASE PORE SPACE (this "Agreement") is made and entered into this \_\_\_\_\_ day \_\_\_\_\_ 2021 ("Effective Date"), by and between \_\_\_\_\_ whose \_\_\_\_\_ address \_\_\_\_\_ is \_\_\_\_\_

(whether one or more, "Lessor(s)"), and Summit Carbon Solutions, LLC, an Iowa limited liability company, whose address is 1805 Collaboration Place, Suite 1200 Ames, IA 50010 ("Lessee"). Lessor and Lessee may be individually referred to herein as a "Party" and collectively as the "Parties".

## RECITALS

- A. Lessor is the owner of the surface estate of the lands described and incorporated herein by reference in Exhibit C attached (the "Property").
- B. Lessee desires to purchase an exclusive option to lease the Property for Carbon Dioxide geologic storage operations.
- C. Lessor is willing to grant an exclusive option to Lessee to lease the Property for such purposes, subject to the terms and conditions of this Agreement.

## DEFINITION

Carbon Dioxide for the purposes of this Agreement and subsequent Pore Space Lease and any Easements is defined 99% or higher concentration of carbon dioxide molecules. Carbon Dioxide may contain incidental impurities from the ethanol production process.

## AGREEMENT

NOW THEREFORE, in consideration of the mutual covenants and terms set forth in this Agreement and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

1. Grant of Option. Lessor, in consideration of TWENTY FIVE ONE HUNDRED and NO/100 DOLLARS (\$25100.00) per acre (the "Option Fee") and other good and valuable consideration paid by Lessee to Lessor, receipt of which is hereby acknowledged by Lessor, grants to Lessee the exclusive right and option to lease the Property for Carbon Dioxide geologic storage operations ("Option"). The Option Fee shall be paid to Lessor by Lessee within 5 business days of the Effective Date and prior to Access to Property as described in Section 6. Contemporaneously with the execution of this Agreement, Lessor shall sign the pore space lease attached hereto as Exhibit A and made part hereof (the "Pore Space Lease"); provided, however, that the Pore Space lease shall not become effective unless and until Lessee exercises the Option in accordance with Section 3. Lessee shall retain the original copy of the Pore Space Lease executed by Lessor and provide Lessor with a copy. In the event Lessee exercises the Option prior to the expiration of the Option Period, Lessee shall

INDUSTRIAL COMMISSION

STATE OF NORTH DAKOTA

DATE 6/13/24 CASE NO 30869-880

Introduced By Braaten

Exhibit 10-87

Identified By Swenson

BLF-000001

Formatted: Header

sign and date the Pore Space Lease effective as of the date Lessee exercised the Option and provide a copy of the fully executed Pore Space Lease to Lessor. Lessee shall cause a memorandum of the Pore Space Lease to be recorded in the real property records. In the event Lessee does not exercise the Option prior to expiration of the Option Period, the Pore Space lease shall be cancelled and void.

Formatted

... [8]

2. Option Period. The term of this Option shall commence on the Effective Date and shall continue until 11:59 p.m. central time on the date that is five (5) years from the Effective Date (the "Option Period").

Formatted

Formatted

... [9]

3. Exercise of Option. Lessee may exercise this Option by signing the "Exercise of Option" attached as Exhibit B to this Agreement and delivering a copy to Lessor prior to the expiration of the Option Period at the address of Lessor stated above. If the Option is exercised, the Parties shall there forth be bound by the terms and conditions of the Pore Space Lease.

Formatted

... [10]

4. Application of Option Fee. In the event Lessee does not exercise this Option prior to the expiration of the Option Period, Lessor shall retain the Option Fee as consideration for this Option.

Formatted: Font: 12 pt

Formatted

... [11]

5. Representations and Warranties and Covenants. Lessor represents, to the best of its knowledge and belief, and warrants that there are no unrecorded leases, options, or other agreements affecting the Property that have not been provided or otherwise disclosed to Lessee. Lessor shall not enter into any new agreements that affect the pore space without Lessee's written consent. Lessor represents, to the best of its knowledge and belief, and warrants to Lessee that (i) the Property has not been used for generating, transporting, storing, treating or disposing of "hazardous substances" (as that term is defined under applicable federal, state and local laws), (ii) the Property has not been used for disposal of waste or hazardous substances including agricultural chemicals such as fertilizers, herbicides or pesticides, and (iii) no underground storage tanks are presently or have been located on the Property. Lessor shall be responsible for removing any such waste or hazardous substances (including any such agricultural chemicals) at its own cost upon Lessee's exercise of the Option. Lessor further represents and warrants to Lessee that there exists no judgment, suit, action or legal, administrative, arbitration or other proceeding affecting the Property or that would prevent or limit Lessor from performing his obligations under this Agreement or the Pore Space Lease. During the Option Period, Lessor agrees to cooperate in good faith in connection with Lessee's Due Diligence Activities (as defined below) or inspection of the Property. During the Option Period, Lessor shall, subject to casualty and force majeure, maintain the existing condition of the Property and not take any action or fail to take any action that results in damage to the Property.

6. Access to Property. Upon execution of this Agreement, Lessor agrees to provide Lessee, its agents and representatives, access to the Property as may be reasonably requested with a minimum of 7 days advance notice to Lessor by Lessee for the purposes of doing those things reasonably convenient or necessary to study, survey, test and plan for the development of its Carbon Dioxide geologic storage operations, including but not limited to: drilling and installing test wells and monitoring wells; performing seismic testing and other similar activities; establishing ground and aerial survey control points and section corners;

conducting a feasibility study, which may cover subjects such as soil conditions, geological tests, engineering reports, topographic studies, flood protection, and environmental impact reports, zoning and planning regulations and any other tests and studies the Lessee may elect to perform on the Property (collectively, "Due Diligence Activities") all at the sole discretion and expense of the Lessee. Due Diligence Activities shall only be performed between the hours of 7 AM and 7 PM. Any vehicle traffic will be limited to existing roads and two tracks. Off-road access is to be performed only by foot or light UTV access. In the event Lessee constructs and installs any Facilities (as such term is defined in Section 5 of the Pore Space Lease) on the Property that vibroseis trucks access the Property or adjacent properties, Lessee agrees to compensate Lessor for the installation of any such Facilities in the same manner set forth in Section 5 of the Pore Space Lease attached hereto as Exhibit B. Lessee shall defend, indemnify and hold Lessor harmless from any costs or;

expenses incurred in connection with Lessee's access to the Property and its Due Diligence Activities and shall restore the Property to its condition immediately preceding such access:

- Pay for and coordinate competent 3<sup>rd</sup> party water flow and quality testing of all water sources identified by Lessor before and after vibroseis operations occur. Any degradation in water flow and quality up to two years from vibroseis activities shall be remedied by Lessee.
- Adhere to 3 times the minimum setbacks as required in North Dakota statutes or regulations.

7. INDEMNIFICATION. Lessee agrees to defend, indemnify and hold harmless Lessor, its family members, members, shareholders, directors, managers, partners, officers, employees, agents and contractors (the Indemnified Parties) from and against, and shall promptly reimburse each Indemnified Party with respect to any claim, demand or cause of action, including any actual loss, cost, expense, liability, fine or damage incurred or suffered by the Indemnified Party (including reasonable fees and expenses of attorneys, technical experts and expert witnesses, court costs and other out-of-pocket expenses) related to any bodily injury, death or property damage resulting from Lessor's breach of this Agreement, Lessee's violation of any law, rule or regulation or Lessee's negligence or willful misconduct, or any act of Lessee. Neither the coverage nor the limits of insurance required by this Agreement shall in any way restrict the foregoing indemnity obligation.

8. PROPERTY RESTORATION. Lessee shall restore the Property to its condition immediately preceding Access to Property as specified in Section 6 to the satisfaction of Lessor. Restoration of Property includes, but is not limited to, driveway and farm road maintenance, removing all compaction, depressions, imprints and tracks from overland travel and vibroseis truck plates, re-establishment of same type vegetation on pasture and hay lands, and weed control for as long as it takes to complete restoration activities.

Formatted: No bullets or numbering, Tab stops: Not at 0.58"

9. PERFORMANCE AND PAYMENT BONDS. Lessee shall furnish to Lessor security covering the faithful performance of Property Restoration and Lessor's payment and other obligations arising under this Agreement in the form of separate performance and payment bonds, each with a penal sum equal to TWO HUNDRED and NO/100 DOLLARS (\$200.00) per acre covered by this Agreement (Performance and Payment Bonds). The Performance and Payment Bonds must be obtained from a guaranty or surety company authorized to conduct business in North Dakota. Lessor shall deliver the security required by this Section 9 within 5 business days of the Effective Date and shall maintain the security in full force and effect until the end of the Option Period.

Formatted: No bullets or numbering, Tab stops: Not at 0.58"

10. INSURANCE REQUIREMENTS

- Prior to access on the Property, Lessee shall secure and maintain all insurance required as evidenced by Section 10 of this Agreement.
- Lessee shall maintain in effect at all times during the Option Period, insurance in accordance with the applicable laws relating to workers' compensation and employers' liability insurance, regardless of whether such coverage or insurance is mandatory or merely elective under the law.
- The failure to secure and provide proof of insurance as required in this Lease shall constitute a material breach of this Lease entitling Lessor to terminate this Agreement immediately.
- Required insurance coverage is to be purchased at Lessees' expense.

Exclusive Option to Lease Pore Space 5

- Lessee shall notify Lessor of any erosion of aggregate limits under any of the insurance policies, and if requested, purchase additional limits of coverage as may be deemed by the Lessor to satisfy Lessees' coverage obligations.
- All insurance policies must include a waiver of the insurer's right of subrogation against Lessor. Lessee also hereby waives all rights of subrogation against Lessor.
- All insurance policies will not be canceled, or their limits or coverage reduced or restricted without endeavoring to provide at least 30 days prior written notice to Lessor.
- Lessor will look to Lessees' insurer for coverage for claims arising from the negligent acts or omissions of Lessee and its Agents or Subcontractors.
- Insurance coverages, with the exception of workers' compensation and employers' liability shall be endorsed to name Lessor as an additional insured with respect to any liabilities assumed under this Agreement; and apply severally and not collectively to each insured against whom claim is made or suit is brought.
- Upon execution of this Agreement and prior to January 1<sup>st</sup> of each year, Lessee shall instruct and require its insurance agent/broker to complete and return an insurance certificate, in an ACORD form, as evidence that insurance policies providing the required coverage, limits and additional insured provisions as outlined in this Section 10 are in full force and effect. Lessee shall be fully responsible for all deductibles and self-insured retentions related to insurance provided herein. The insurance certificate shall be provided to Lessee prior to Access to Property as defined in Section 6.
- Minimum General Requirements.
  - \$5,000,000 General Liability
  - \$1,000,000 Automobile Liability
  - Statutory Workers' Compensation
  - Employers' Liability - \$1,000,000 each accident; \$1,000,000 disease - policy limit; and \$1,000,000 disease - each employee.
  - \$10,000,000 Excess Liability
  - \$5,000,000 Pollution Liability

7-11. Permits, Applications and Studies. During the Option Period, Lessee, its agents, affiliates, servants, employees, nominees and licensees shall be entitled to: (A) apply for and obtain any necessary permits, approvals and other governmental authorizations (collectively called "Governmental Authorizations") required for the development, construction, operation and maintenance of the Lessee's Carbon Dioxide geologic storage operations and Lessor agrees to co-operate, execute, obtain or join with Lessee in any applications or proceedings relating to the Governmental Authorizations upon Lessee's written request and at Lessee's direction, cost and expense; and (B) apply for any approvals and permits and any zoning amendment of any area of the Property required in connection with the Lessee's Carbon Dioxide geologic storage operations, and Lessor agrees to co-operate, execute, obtain or join with Lessee in any applications or proceedings relating to such approvals, permits and zoning

8.12. Entire Agreement. This Agreement, and its exhibits, constitute the entire agreement between the Parties and supersedes any and all previous agreements or understandings between the Parties concerning the subject matter hereof, and all prior agreements are deemed merged herein. No Party makes any representation or warranties to the other Party, unless expressly set forth in this Agreement.

9.13. Time of Essence. Time is of the essence to each and every aspect of this Agreement.

10.14. Successors and Assigns. All of the terms and conditions of this Agreement are hereby made binding on the successors and permitted assigns of the respective Parties.

11. Headings. The captions used in connection with the articles and sections of this Agreement are for convenience only and shall not be deemed to construe or limit the meaning of the language of this Agreement.

12. 15.

16. Governing Law and Venue. This Agreement shall be governed by and construed in accordance with the laws of the State of North Dakota without giving effect to principles of conflicts of laws. An action to enforce the terms of this Agreement shall be brought in a court of competent jurisdiction located in the state of North Dakota.

13.

17. Attorneys' Fees. The Parties/Lessee shall be responsible pay for their own attorneys' fees incurred Lessors' attorney's expense in negotiating connection with review and drafting negotiation of this Agreement and any ancillary documents within 5 business days of the Effective Date. In the event that legal action is required to enforce the terms of this Agreement, the prevailing Party shall be entitled to collect its costs of court, including reasonable attorneys' fees, from the non- prevailing Party.

14.18. Interpretation. The Parties acknowledge that each Party and its counsel have reviewed this Agreement with their respective counsel and agree that this Agreement has been fairly negotiated at arm's length. This Agreement shall not be construed against either Party and the principle of contract construction to the effect that any ambiguities are to be resolved against the drafting party shall not apply in construing or interpreting this Agreement.

Formatted: Header

15-19. Severability-Severability. If any provision(s) of this Agreement are held to be illegal, invalid or unenforceable under present or future laws, such provision(s) shall be fully, severable, and this Agreement shall be construed and enforced as if such illegal, invalid or unenforceable provision(s) had never comprised a part of this Agreement, and the remaining provisions of this Agreement shall remain in full force and effect and not be affected by the illegal, invalid or unenforceable provision or by its severance from this Agreement, provided that both Parties may still effectively realize the complete benefit of the transaction contemplated hereby.

3. ~~used herein, such terms shall have the meanings set forth in Chapter 38-22 and Chapter 47-31 of the North Dakota Century Code), stratum or strata underlying the Leased Premises (collectively, "Reservoirs"), or reservoirs and subsurface pore spaces, stratum or strata unitized or amalgamated therewith. The royalty shall increase TEN percent (10.0%) on January 1, 2026 and an additional TEN percent (10.0%) every five years thereafter, as outlined on attached Exhibit D. The quantity of CO<sub>2</sub> so injected shall be measured by meters installed by Lessee. Lessee shall pay to Lessor its proportionate share of three-sixteenths (3/16ths) of the Lessees' Gross Profits and any Credits realized by Lessee for use of the subsurface pore space. For the avoidance of doubt, Gross Profit, as defined by GAAP, shall be the difference between revenues plus the value of any credits, less the cost of capturing, processing, compressing, transporting and sequestering Carbon Dioxide. The Gross Profits derived from the withdrawal of Carbon Dioxide shall be included as in the Royalty calculation. Gross Profit shall not include Lessees' overhead and corporate operations. Credits shall include, but are not limited to 45Q federal tax credits, benefits, rebates, subsidies, payments, emissions reductions, offsets, investment tax credits, production tax credits, allowances or other incentives Lessee obtains through sequestration of Carbon Dioxide on the Leased Premises. Subject to Lessor's Right to Audit as defined in Section 35, Lessor's "proportionate share" shall be determined on a net acre basis, and the Parties hereby stipulate that the acreage set forth in Section 11, shall be used to calculate Lessor's proportionate share. The quantity of carbon dioxide/Carbon Dioxide injected into the Reservoirs or any reservoirs or subsurface pore spaces, stratum or strata unitized or amalgamated therewith shall be determined through the use of metering equipment installed and operated by Lessee at the injection site. All royalties due hereunder for carbon dioxide/Carbon Dioxide injected into the Reservoirs or any reservoirs or subsurface pore spaces, stratum or strata unitized or amalgamated therewith during any calendar month shall be paid to Lessor annually. Lessor and Lessee agree that this Lease shall continue as specified herein even in the absence of injection operations and the payment of royalties quarterly. Tax Credits will transfer to Lessor on an annual basis~~

... [38]

4. ~~Right to Pore Space/Storage of Carbon Dioxide. Lessor grants to Lessee the exclusive right to inject and store carbon dioxide (CO<sub>2</sub>) and other incidental gaseous substances/Carbon Dioxide into the Reservoirs, together with the right to and subject to appropriate Easements construct, replace, inspect, repair, monitor, maintain, relocate, change the size of such surface or subsurface facilities on the Leased Premises that Lessee determines necessary or desirable for Lessee's storage operations, including, but not limited to fences, pipelines, tanks, reservoirs, electric and communication lines, roadways, underground facilities and equipment, surface facilities and equipment, buildings, structures and other such facilities and appurtenances. Lessor shall not grant any other person the right to inject or store CO<sub>2</sub> or any other incidental substances/Carbon Dioxide.~~

#### ~~Facility Right of Ways~~

5. ~~Easements/Compensation. Subject to mutual execution of an appropriate Easement as shown in Exhibits D and/or E and payment of Consideration per schedule in Exhibit F, Lessor grants Lessee the right of reasonable use of the surface of the Leased Premises, including without limitation, subject to the terms of the Easement(s), the rights of ingress and egress over the Leased Premises together with the right of way over, under and across the Leased Premises and the right from time to time to construct, replace, inspect, repair, monitor, maintain, relocate, change the size of such surface or subsurface facilities on the Leased Premises that Lessee determines necessary or desirable for Lessee's storage operations, including, but not limited to fences, pipelines, tanks, reservoirs, electric and communication lines, roadways, underground facilities and equipment, surface facilities and equipment, buildings, structures and other such facilities and appurtenances, (each a "Facility" and collectively, the "Facilities"); provided, however, that Lessee shall provide~~

Formatted

... [40]

Formatted: Header

Lessor with notice of operations and an offer of damage, disruption and loss of production payments, as each may be applicable, prior to the installation of any such Facilities on the Leased Premises. Lessee shall be entitled to proceed with the installation of the Facilities while the amount of damage, disruption or loss is being agreed or determined."'). Lessee shall have the further right to fence the perimeter of any Facility on the Leased Premises and sufficiently illuminate the site for the safety and security of operations, subject to restrictions below. All facilities must be designed and located so noise and light does not impact Lessor's quiet use and enjoyment of Property.

- The location and extent of all surface and subsurface facilities shall be at the sole discretion of Lessor and be in concert with current and future land uses and maintain a minimum setback of 1/2 mile from any occupied residence unless approved in writing by Lessor.
- All external lighting for facilities shall be shielded, designed to reduce glare and not allow direct light to trespass.
- Lessee, at Lessee's expense, shall conduct noise testing while facilities are completed and in operation. The maximum noise at the boundary of any operating surface facility must be less than 62 dBA while in operation. If the noise level exceeds this level, Lessee shall promptly take any and all actions, including discontinuing use of the facilities to achieve the stated noise level.
- While conducting any construction activities for the Carbon Dioxide geologic storage facilities that cause traffic to utilize county gravel roads, Lessee shall incorporate a commercial dust control product into the gravel surface 1,000 feet each side of any occupied residences driveways and adjacent to any pastures and feedlots, whether or not the construction activity is within the Leased Premises.

Lessee agrees to fully remove and remediate the Leased Premises where facilities have been installed to the condition immediately preceding their installation within 1 year of the end of the Operational Term or 3 years after Carbon Dioxide is no longer being injected in to the pore space in the unit, unless Lessor agrees in writing to allow Lessee to abandon the Facilities in place. No structures, pipe, or other facility infrastructure may be abandoned in place unless Lessor agrees in writing to allow such abandonment with an approved procedure. Lessee shall furnish to Lessor security covering the faithful performance of facility removal and remediation and Lessee's payment and other obligations arising under this Agreement in the form of separate Performance and Payment Bonds, each with a penal sum equal to an amount as determined by the associated right of way agreement or surface use agreement for the estimated cost of facility removal and remediation. The Performance and Payment Bonds must remain in place until the facilities are removed and land is remediated. The Performance and Payment Bonds must be obtained from a guaranty or surety company authorized to conduct business in North Dakota.

6. ~~dimensions as Lessee may elect and as are approved by the Commission. Amalgamated areas may include, but are not required to include, land upon which injection or extraction wells have been completed or upon which the injection and/or withdrawal of carbon dioxide and/or related gaseous substances~~Carbon Dioxide has commenced prior to the effective date of amalgamation. In exercising its amalgamation rights under this Lease and if required by law, Lessee shall record or cause to be recorded a copy of the Commission's amalgamation order or other notice thereof in the county in which the amalgamated unit is located. Amalgamating in one or more instances shall, if approved by the Commission, not exhaust the rights of Lessee to amalgamate Reservoirs or portions of Reservoirs into other amalgamation areas, and Lessee shall have the recurring right to revise any amalgamated area formed under this Lease by expansion or contraction or both. Lessee may dissolve any amalgamated area at any time and document such dissolution by recording an instrument in accordance with applicable law or agency order. Lessee shall have the right to negotiate on behalf of and as agent for Lessor, any unit, amalgamation, storage or operating agreements with respect to amalgamation of reservoir or pore space interests underlying the Leased Premises or the operation of any amalgamated areas formed under such agreements. To the extent any of the terms of such agreements conflict with the terms of this Lease, the terms of such agreements shall control, and the provisions of this Lease shall be deemed modified to conform to the terms, conditions, and provisions of any such agreements which are approved by the Commission.

Formatted: Indent: Left: 0.08", First line: 0", Right: 0.08", Space Before: 3.8 pt

11.12. Hold Harmless and Indemnification. The Lessee agrees to defend, indemnify, and hold harmless Lessor from any claims by any person that are a direct result of the Lessee's use of the Leased Premises or Reservoirs. Notwithstanding the foregoing, such indemnity/hold harmless obligation excludes (i) any claim or cause of action, or alleged or threatened claim or cause of action, damage, judgment, interest, penalty or other loss arising or resulting from the negligence or intentional acts of Lessor or Lessor's agents, invitees, or licensees, or third parties, and (ii) any claim for exemplary, punitive, special or consequential damages claimed by Lessor. Lessee further accepts liability and indemnifies Lessor for reasonable costs, expenses and attorneys' fees incurred in establishing and litigating the indemnification coverage provided above. The legal defense provided by Lessee to the Lessor under this paragraph must be free of any conflicts of interest even if this requires Lessee to retain separate legal counsel for Lessor. Lessee agrees to defend, indemnify and hold harmless Lessor, its family members, members, shareholders, directors, managers, partners, officers, employees, agents and contractors (the Indemnified Parties) from and against, and shall promptly reimburse each Indemnified Party with respect to any claim, demand or cause of action, including any actual loss, cost, expense, liability, fine or damage incurred or suffered by the Indemnified Party (including reasonable fees and expenses of attorneys, technical experts and expert witnesses, court costs and other out-of-pocket expenses) related to any bodily injury, death or property damage resulting from Lessee's breach of this Agreement, Lessee's violation of any law, rule or regulation or Lessor's negligence or willful misconduct, or any act of Lessee. Neither the coverage nor the limits of insurance required by this Agreement shall in any way restrict the foregoing indemnity obligation.

13. Hazardous Substances. Lessee shall have no liability for any regulated hazardous substances located on the Leased Premises prior to the Effective Date or placed in, on or about the Leased Premises by Lessor or any third-party on or after the Effective Date, and nothing in this Lease shall be construed to impose upon Lessee any obligation for the removal of such regulated hazardous substances. As used herein, "hazardous substances" shall have the meaning set forth in the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) and any amendments thereto, or any other local, state or federal statutes. Lessee is responsible for any and all pollution caused by Lessee, its operations, agents, invitees or third parties. Any spill, leak or release of any Hazardous substance shall immediately be cleaned up and the Leased Premises restored to the condition immediately preceding the event. For avoidance of doubt, this includes any damages caused by a release or leak of Carbon Dioxide, whether from transportation, compression or storage operations.

Formatted: Font: 10 pt

Formatted: Space Before: 0.35 pt

Formatted ... [64]

13.14. Termination. A material violation or default of any terms of this Lease by Lessee shall be grounds for termination of the Lease. Lessor shall give Lessee written notice of violation or default and Lessee shall have sixty (60) days after receipt of said notice to substantially cure such violations or defaults. If Lessee fails to substantially cure such violations or defaults within the 60-day cure period, Lessor may terminate the Lease; provided that if it is not possible to cure such violations or defaults within the 60-day cure period, Lessee shall have a reasonable longer period of time to cure

Formatted: Font: 10.5 pt, Font color: Auto

such violations or defaults provided it commences cure within the initial 60-day cure period and thereafter diligently pursues such cure. Lessee may terminate the lease with thirty (30) days written notice to Lessor. Upon termination of this Lease, Lessee shall have one hundred eighty (180) days to remove all facilities and property of Lessee located on the Leased Premises. For the avoidance of doubt, Lessee shall not be required to remove any ~~CO2 or other incidental gaseous substances~~ Carbon Dioxide injected into the Reservoirs.

Formatted

[66]

Formatted

[67]

14.15. Taxes. Lessee shall pay all taxes, if any, levied against its personal property or on its improvements to the Leased Premises. Lessor shall pay for all real estate taxes and other assessments levied upon the Leased Premises. Lessee shall have the right to pay all taxes, assessments and other fees on behalf of Lessor and to deduct the amount so paid from other payments due to Lessor hereunder.

#### 16. Insurance Requirements.

- Prior to access on the Leased Premises, Lessee shall secure and maintain all insurance required as evidenced by Section 16 of this Agreement.
- The failure to secure and provide proof of insurance as required in this Lease shall constitute a material breach of this Lease entitling Lessor to terminate this Agreement immediately.
- Lessee shall maintain in effect at all times during the Option Period, insurance in accordance with the applicable laws relating to workers' compensation and employers' liability insurance, regardless of whether such coverage or insurance is mandatory or merely elective under the law.
- Required insurance coverage is to be purchased at Lessees' expense.
- Lessee shall notify Lessor of any erosion of aggregate limits under any of the insurance policies, and if requested, purchase additional limits of coverage as may be deemed by the Lessor to satisfy Lessees' coverage obligations.
- All insurance policies must include a waiver of the insurer's right of subrogation against Lessor. Lessee also hereby waives all rights of subrogation against Lessor.
- All insurance policies will not be canceled, or their limits or coverage reduced or restricted without providing 30 days prior written notice to Lessor.
- Lessor will look to Lessees' insurer for coverage for claims arising from the acts or omissions of Lessee and its Agents or Subcontractors.
- Insurance coverages, with the exception of workers' compensation and employers' liability shall be endorsed to name Lessor as an additional insured with respect to any liabilities assumed under this Agreement; and apply severally and not collectively to each insured against whom claim is made or suit is brought.
- Upon execution of this Lease and prior to January 1<sup>st</sup> of each year, Lessee shall instruct and require its insurance agent/broker to complete and return an insurance certificate to Lessor, in an ACORD form, as evidence that insurance policies providing the required coverage, limits and additional insured provisions as outlined in this Section 16 are in full force and effect. Lessee shall be fully responsible for all deductibles and self-insured retentions related to insurance provided herein.
- Minimum General Requirements.
  - \$5,000,000 General Liability

Pore Space Lease 7

16.18. Force Majeure. Should Lessee be prevented from complying with any express or implied covenant of this Lease or from utilizing the Lease Premises for underground storage purposes by reason of scarcity of or an inability to obtain or to use equipment or material or failure or breakdown of equipment, or by operation of force majeure, any federal or state law or any order, rule or regulation of governmental authority, then while so prevented, Lessee's obligation to comply with such covenant shall be suspended and the primary term of this Lease. In no event shall be extended while and so long as Lessee is prevented by any such cause from utilizing this Section 18 be construed to be precedent to Lessors' right to terminate the Lease under Section 11. For the property for underground storage purposes and avoidance of doubt, the time while Lessee is so prevented Lessee's obligation to pay the annual rent as described in section 2(a) shall not be counted against Lessee, anything in impacted by this Section 18 and the Term of this Lease to the contrary notwithstanding shall not be extended due to this Section 18.

19. Surface Damage Compensation Act. The bonus and royalty amounts contemplated and paid to Lessor hereunder is compensation for, among other things, damages sustained by Lessor for the lost use of and access to Lessor's land, pore space (to the extent required under North Dakota law), and any other damages which are contemplated under Chapter 38-11.1 of the North Dakota Century Code (if any and to the extent applicable). Subject to Lessee's obligation to compensate Lessor for the installation of any Facilities on the Leased Premises pursuant to Section 5 of this Agreement, Lessor agrees that such compensation is just and adequate for any and all damages contemplated under said Chapter 38-11.1 (if any and to the extent applicable), and all other damages which Lessor may sustain as a result of Lessee's use of the property for its storage operations.

17.

18.20. Warranty of Title and Quiet Enjoyment. Lessor represents and warrants to Lessee that Lessor is the owner of the surface of the Leased Premises and the pore space located thereunder. Lessor hereby warrants and agrees to defend title to the Leased Premises and the pore space located thereunder and Lessor hereby agrees that Lessee, at its option, shall have the right to discharge any tax, mortgage, or other lien upon the Leased Premises, and in the event Lessee does so, Lessee shall be subrogated to such lien with the right to enforce the same and apply royalty payments or any other payments due to Lessor toward satisfying the same.

Lessor warrants that, except as disclosed to Lessee in writing, there are no liens, encumbrances, leases, mortgages, deeds of trust, options, or other exceptions to Lessor's fee title ownership of the Leased Premises (collectively, "Liens") which are not recorded in the public records of the County in which the Leased Premises is located. Lienholders (including tenants), whether or not their Liens are recorded, shall be Lessor's responsibility, and Lessor shall cooperate with Lessee to obtain a non-disturbance agreement from each party that holds a Lien (recorded or unrecorded) that might interfere with Lessee's rights under this Lease. A non-disturbance agreement is an agreement between Lessee and a lienholder which provides that the lienholder shall not disturb Lessee's possession or rights under the Lease or terminate this Lease so long as Lessor is not entitled to terminate this Lease under the provisions hereof.

49-21. Environmental Incentives and Tax Credits. Except as determined by Section 3 Royalty and Lessors' proportionate share, Lessee shall be the owner of (i) any and all credits, benefits, emissions reductions, offsets, and allowances, howsoever entitled, attributable to Lessee's Carbon Dioxide geologic storage operations, including any avoided emissions and the reporting rights related to these avoided emissions, such as 26 U.S.C. §45Q Tax Credits, and any other attributes of Lessee's ownership of the Facilities and Lessee's Carbon Dioxide geologic storage operations ("Environmental Attributes"), and (ii) any and all credits, rebates, subsidies, payments or other incentives that relate to the use of technology incorporated into Lessee's Carbon Dioxide geologic storage operations, environmental benefits of such operations, or other similar programs available from any regulated entity or any governmental authority ("Environmental Incentives"). Lessee is further entitled to the benefit of any and all (a) investment tax credits, (b) production tax credits, (c) credits under 26 U.S.C. §45Q credits, and (d) similar tax credits or grants under federal, state or local law relating to Lessee's Carbon Dioxide geologic storage operations ("Tax Credits"). Lessor shall (i) cooperate with Lessee in obtaining, securing and transferring all Environmental Attributes and Environmental Incentives and the benefit of all Tax Credits, and (ii) shall allow Lessee to take any actions necessary to install additional equipment on the Facilities subject to Easements as defined in Section 5, to comply with all monitoring and reporting obligations, and allow Lessee's personnel to enter the premises and collect any data Lessee requires to satisfy its obligations required in connection with obtaining Tax Credits and Environmental Attributes. Lessor shall not be obligated to incur any out-of-pocket costs or expenses in connection with such actions unless reimbursed by Lessee. If any Environmental Incentives are paid directly to Lessor, Lessor shall immediately pay such amounts over to Lessee, less Lessor's appropriate share as determined by Section 3, Royalty.

22. Assignment. The rights and obligations of either Party hereto may be assigned in whole or part. The assigning party shall provide written notice of any assignment within sixty (60) days after such assignment has become effective; provided, however, that an assigning party's failure to deliver written notice of assignment within such 60-day period shall not be deemed a breach of this Lease unless such failure is willful and intentional. The Lessor's consent shall not be required for an assignment by the Lessee of this Lease, whether by way of a collateral assignment to its financiers or otherwise. For the avoidance of doubt, any assignment of these rights and obligations by Lessee shall not change the terms and conditions of this Lease or expand the use of the pore space, Surface Use Agreement or Right of Way Agreement for substances other than Carbon Dioxide.

20.

24-23. Change of Ownership. No change of ownership in the Leased Premises shall be binding on the Lessee for purpose of making payments to Lessor hereunder until the date Lessor, or Lessor's successors or assigns, furnishes Lessee the recorded original or a certified copy of the instrument evidencing the change in ownership. The Lessor's consent shall not be required for a change in the direct or indirect control of the Lessee.

22-24. Notices. All notices required to be given under this Lease shall be in writing and addressed to the respective Party at the addresses set forth at the beginning of this Lease unless otherwise directed by either Party.

25. Costs of Future Documentation. Lessee or any Mortgagee or Assignee requesting or receiving from Lessor additional, new or revised documents under the terms of this Lease shall pay Lessors' reasonable legal fees and other out of pocket expenses related to preparation, review, execution and delivery of the documents requested or received.

23-26. No Waiver. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Lease or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provision or the relinquishment of any such rights, but the same shall continue and remain in full force and effect.

35. Right to Audit. Lessor has the right to audit any and all records of the Lessee that are associated with this Lease or the storage facility as defined in Section 3. Audits will be conducted by a 3<sup>rd</sup> party firm, at Lessors' expense. If the results of the audit find any deficiency that should have been to the benefit of the Lessor, then Lessee will pay for the full cost of the audit and remedy the deficiency immediately.

33-36. Electronic Signatures. This Lease, and any amendments hereto, to the extent signed and delivered by means of electronic transmission in portable document format (pdf) or by DocuSign or similar electronic signature process, shall be treated in all manner and respects as an original contract and shall be considered to have the same binding legal effect as if it were the original signed version thereof delivered in person.

ROW (#)

**EXHIBIT D**

**Royalty Escalation Provision**

**EASEMENT: CARBON DIOXIDE SURFACE FACILITIES**

\_\_\_\_\_ whose address is \_\_\_\_\_ (GRANTOR),  
in consideration as defined in Section 1, which initial payment has been received, conveys to **Summit Carbon Solutions, LLC, an Iowa limited liability company, whose address is 1805 Collaboration Place, Suite 1200, Ames, IA 50010** (GRANTEE), an easement to construct, operate, maintain, and remove (Non-linear facilities such as compressor or pumping station, well site, storage or office building site, tower site, etc. (Surface Facilities), with the right of ingress and egress, over certain land hereafter referred to as the "easement area", which is described by the following metes and bounds survey:

**(qtr) of Section (#), T(#N, R(#)W, (County) County**

A Survey Plat and Written Narrative, titled Exhibit "A" shall be prepared by a Registered Land Surveyor and shall depict and describe the accurate as-built location of the facility(s). The boundary of the facility must be described using a metes and bounds (for non-linear or point facilities) or centerline survey (for linear or point facilities). The survey plat must be accompanied by a written narrative describing the boundary or centerline description, the number of acres and/or rods within the easement and the survey plat must depict, and the written narrative must include, the points of beginning and ending of the survey with said points tied to known and monumented government section or quarter corners of the property on which they occur. The completed survey plat and written narrative must be attached to the GRANTOR's signed Easement as Exhibit "A" and filed with the fully executed easement at the County Recorder's Office by Grantee or their representative immediately upon execution and easement consideration payment to GRANTOR.

The centerline is (ft) feet or (rods) rods long, and the easement area contains (acres) acres, more or less. The easement area is further described and illustrated in Exhibit "(Ltr)" which is attached to and is a part of this easement.

1. In Consideration for the rights conveyed to GRANTEE under this easement, GRANTEE agrees to pay GRANTOR an annual payment for the Surface Facilities of (Dollars spelled out), and (# or No) 100 Dollars (\$(\$)) on or before January 1st of each year with the first payment due upon execution of this Easement, and continuing each year thereafter until the Surface Facilities are removed and the site is reclaimed.
2. The only use to which this easement may be put is for Carbon Dioxide geologic storage purposes as defined in the Pore Space Lease, and therefore, it may not be used for any other purpose, such as for injection of any other substances than Carbon Dioxide as defined in the Pore Space Lease, a water source, or for stacking or storing equipment.
3. This easement will remain in effect for so long as Carbon Dioxide geologic storage injection operations continue at the Surface Facilities, but in no event after Termination of the Pore Space Lease Agreement ~~49~~. The kind of injection operations required to keep this easement in force is commercial injection during at least 20 days each month.

**ROW (#)**

4. Violation or default of any terms of this easement by GRANTEE shall be grounds for termination of this easement. GRANTOR shall give GRANTEE written notice of violation or default at the address written above and GRANTEE shall have 30 days after receipt of said notice to rectify such violations or defaults. In the event GRANTEE fails to comply, GRANTOR may terminate this easement and file notice of termination with the County Records Office.
5. If construction of the Surface Facilities is not completed within one year after GRANTOR signs this easement, this easement automatically terminates.
6. GRANTEE, or its agent, shall have a legible copy of this easement with them on site for reference during construction, operation, maintenance or reclamation and shall present the copy upon GRANTOR's request.
7. In addition to the consideration paid to the GRANTOR, GRANTEE shall make a satisfactory settlement with the surface tenant for damage to seeded annual crops, fences or other improvements owned by the tenant, caused by construction, operation, maintenance or removal of the well site and shall notify the surface tenant of the construction schedule at least one week before construction.
8. GRANTEE shall maintain the natural water flow and drainage.
9. If, prior to or during construction, archeological or paleontological items are discovered or such items are disturbed, GRANTEE shall cease construction activities immediately. GRANTEE shall then promptly notify GRANTOR and must not resume construction until written approval is given by GRANTOR.
10. Any fixtures, structures, installations or facilities constructed or installed by GRANTEE are the property of GRANTEE and may be removed by GRANTEE at any time during the Term of this Easement.
11. Prior to the end of the Term, GRANTEE shall remove all improvements, both above ground and underground, from the easement area when the easement is abandoned or in any other way terminated, unless authorized to do otherwise in writing by GRANTOR.
12. GRANTEE shall, prior to construction, maintenance or removal, reserve the top 12 inches of soil from areas subject to a Royalty Escalation. The royalty shall increase TEN percent (topsoil and subsoil mixing as depicted on Exhibit "B". The reserved soil must be stockpiled to minimize wind and water erosion. Upon completion of construction, and maintenance or removal, GRANTEE shall promptly reclaim the disturbed area. It must be recontoured to conform to the adjacent natural topography, rocks exposed by excavation must be hauled off or reburied on the property, the reserved soil must be evenly respread over the disturbed area, and the entire disturbed area must be revegetated with a mixture of native perennial grasses as shown in Exhibit C". Reclamation is not complete until rocks are removed from the surface, erosion is controlled and the surface is revegetated with a mixture of native perennial grasses.
13. After construction is complete, topsoil shall be evenly respread on all areas from which it was removed, except those areas covered by construction aggregate or any other surfacing material. The topsoil from those areas covered by construction aggregate or other surfacing material shall remain stockpiled for use during the reclamation of the well site. All exposed soil surfaces not covered by construction aggregate or other surfacing materials shall be revegetated with a mixture of native perennial grasses approved by Grantor prior to revegetation sufficient to prevent accelerated erosion and restore, as closely as possible, the original long-term productivity.
14. GRANTEE shall take necessary precautions to prevent fires. In the event of a fire caused by the GRANTEE or its agent, GRANTEE shall compensate the GRANTOR's surface lessee(s) for their losses including forage, crop and any other losses, and shall compensate GRANTOR for any loss it suffers due to the fire.
15. GRANTEE shall conduct all activities associated with the Surface Facilities in a manner that avoids the degradation of the area's air, land, water quality, audible and visual resources.
16. Prior to the end of the Term, GRANTEE shall dispose of all surface contaminated soil, remove debris, recontour the disturbed surface to conform with the original terrain, bury all rocks and evenly respread the reserved soil and reseed with a mixture of

Formatted: Font: 10.5 pt, Font color: Auto

Exhibit D - Royalty Escalation

ROW (#)

- native grasses as specified in Exhibit "C". After seeding, the entire disturbed area shall be fenced to exclude livestock. Reclamation shall not be deemed completed until erosion is controlled, the surface is revegetated with a mixture of native grasses or a mixture approved by GRANTOR, and written approval is received from the GRANTOR. Upon approval of reclamation by the GRANTOR, this easement shall automatically terminate and a Release or Termination of Easement document may be filed by GRANTOR at the County Recorder's Office.
17. GRANTEE shall implement reasonable measures to prevent accelerated erosion. If an erosion problem develops, GRANTEE shall promptly take the necessary actions to correct it and shall repair any erosion damage.
18. Through this easement, GRANTEE is not acquiring any subsurface interest. Subsurface interests include, but are not limited to oil, gas, coal, cement materials, water, sodium sulfate, sand and gravel, scoria, road material, building stone, chemical substances, metallic ores, uranium ores, or colloidal or other clays.
19. GRANTEE agrees to defend, indemnify and hold harmless GRANTOR from any claims by any person that are in any way related to GRANTEE's use of the easement area, including all costs, expenses, and attorney fees that in any manner result from or arise out of this agreement. It is GRANTEE's exclusive right and responsibility to construct, maintain, and remove the Surface Facilities. GRANTEE further accepts liability and indemnifies GRANTOR, and its family, officers and employees, from all costs, expenses and attorneys fees incurred in establishing and litigating the indemnification coverage provided above. The legal defense provided by GRANTEE to the GRANTOR under this paragraph must be free of any conflicts of interest, even if this requires GRANTEE to retain separate legal counsel for GRANTOR. The obligations of this paragraph shall continue after this agreement terminates.
20. GRANTEE shall not discharge any hazardous liquids or toxic substances onto the easement area or land adjacent to the easement area. All discharges of hazardous liquids or toxic substances shall be stopped as soon as possible after discovery and acted upon immediately to halt movement of such discharges. Any such discharges shall be reported immediately to the GRANTOR. The GRANTEE shall then restore the affected area as closely as possible to its original condition.
21. GRANTEE shall secure and keep in force during the Term of this Easement all Insurance Requirements as defined in the Pore Space Lease.
22. GRANTEE shall control all noxious weeds in the easement area.
23. GRANTOR neither warrants nor agrees to defend title to the easement area.
24. GRANTOR reserves the right to use the easement area and to allow others to use the easement area for purposes compatible with GRANTEE's use. If someone other than GRANTOR uses the easement area in a manner inconsistent with GRANTEE's use, GRANTOR is not liable or responsible.
25. GRANTEE shall not assign or in any way transfer, in whole or in part, this Easement or rights under it unless GRANTOR gives written consent. Any assignment or other transfer without GRANTOR's written consent is void and, at the GRANTOR's option, shall terminate this Easement.
26. This Easement is subject to all existing easements and nothing in this easement supersedes any rights previously granted.
27. This easement is also subject to the conditions in Exhibits "A" Survey Plat and Written Narrative, "B" Soil Reservation and Reclamation Requirements & "C" Native Grass Seeding Specifications which are attached and made a part of this easement.

EASEMENT: Surface Facilities Exhibit "B"

SOIL RESERVATION AND RECLAMATION SPECIFICATIONS

Required Method for Surface Facilities

Field Code Changed

Prior to construction or maintenance of the herein authorized easement area the top twelve (12) inches of soil shall be reserved and stockpiled from all areas to be disturbed, including the facility location site, fillslope and backslope areas, as shown above, and all other areas subject to topsoil and subsoil mixing. The reserved soil shall be stockpiled such that wind and water erosion are minimized. Following soil reservation, cut and fill operations can proceed. If the facility site will be permanent, then all or a portion of the reserved soil shall be respread as needed to stabilize facility cut and fill slopes. Structures (i.e., culverts, finger dikes, etc.) must be added to assure proper drainage and to stabilize erosion. All disturbed areas must be seeded to a native grass seed mixture found on Exhibit "C" attached.

CAUTION: Be sure to clean out the drill before seeding to avoid any contamination with smooth brome grass or crested wheatgrass that may remain in the drill from previous use on private land. These are invasive grasses in native prairie and are not allowed on school trust lands. Contamination with or use of crested wheatgrass or smooth brome will result in the applicant being required to spray out the grass and reseed with the above native grass seed mixture. Sweet clover and alfalfa are also not allowed - only the above native grass seed mixture may be used for revegetation.

Exhibit D - Royalty Escalation 1

BLF-000038

ROW #0

**EXHIBIT E**  
**EASEMENT: CARBON DIOXIDE LINEAR**

whose address is

(GRANTOR), in consideration as defined in Section 1, which initial payment has been received, conveys to Summit Carbon Solutions, LLC, an Iowa limited liability company, whose address is 1805 Collaboration Place, Suite 1200, Ames, IA 50010, (GRANTEE), an easement to construct, operate, maintain, and remove, (LINEAR infrastructure: number, type of structure, diameter, voltage, overhead, underground, etc.) with the right of ingress and egress, over certain land hereafter referred to as the "easement area", which is a strip of land (Width) feet wide, (Feet) feet on each side of the following described centerline:

(qtr) of Section (#), T(#N, R(#)W, (County)County

A Survey Plat and Written Narrative, titled Exhibit "A" shall be prepared by a Registered Land Surveyor and shall depict and describe the accurate as-built location of the facility(s). The boundary of the facility must be described using a mete and bounds (for non-linear or point facilities) or centerline survey (for linear or point facilities). The survey plat must be accompanied by a written narrative describing the boundary or centerline description, the number of acres and/or rods within the easement and the survey plat must depict, and the written narrative must include, the points of beginning and ending of the survey with said points tied to known and monumented government section or quarter corners of the property on which they occur. The survey must also depict and describe those segments subject to no surface disturbance which require horizontal boring (paragraph #2). The completed survey plat and written narrative must be attached to the GRANTOR' signed Easement as Exhibit "A" and filed with the fully executed easement at the County Recorder's Office by Grantee or their representative immediately upon execution and easement consideration payment to GRANTOR.

1. The (Type of Structure) shall be built only on the centerline(s) as described above. GRANTEE may also temporarily use an additional TEN percent (10.0%) every five years thereafter, (TemporaryFeet) feet of temporary right of way on the working side of the (Type of Structure) as a construction right of way. This construction right of way shall be subject to the topsoil reservation and reclamation provisions of this easement and must be abandoned upon the completion of construction and reclamation.
2. (OPTIONAL)GRANTEE agrees that there will be no surface disturbance or surface occupancy of the (number of segment(s)) segment(s) of the easement area that are designated for (Type of Structure) installation by horizontal boring as specifically shown on Exhibit "(exhibit letter)" without written permission from GRANTOR.
3. (OPTIONAL)The top of the (Type of Structure) must be buried at least 60 inches below the ground's surface.
4. GRANTEE may install the following described appurtenance(s) upon or below the surface: ( Pig Launcher/Receiver, Aboveground Valve Station, Cathodic Protection Anode Beds). For the avoidance of doubt, the royalty to be paid is calculated below: this/these additional appurtenance(s). GRANTEE has paid (N/A or dollar amount of additional compensation) as further consideration. GRANTEE shall, when necessary, protect all above ground appurtenances with a fence adequate to prevent livestock access and shall paint all above ground structures, except wire fences, anchors, guy wires, steel towers, and wood poles, with earth tone colors.
5. If construction of the (Type of Structure) is not completed within one year after GRANTOR signs this easement, this easement automatically terminates.
6. In addition to consideration payment to GRANTOR, GRANTEE shall make a satisfactory settlement with the surface tenant for damage to seeded annual crops, fences or other improvements owned by the tenant, caused by construction, operation, maintenance or removal of the (Type of Structure) and shall notify the surface tenant of the construction schedule at least one week before construction.

Formatted: Font: Helvetica, 10.5 pt, Underline, Font color: Auto

Exhibit D—Royalty Escalation—

BLF-000039

ROW #()

7. GRANTEE, or its agent, shall have a legible copy of this easement with them on site for reference during construction, operation, maintenance or reclamation and shall present the copy upon GRANTOR's request.
8. This easement is subject to all of the GRANTOR's existing rights and privileges.
9. If, prior to or during construction, archeological or paleontological items are discovered or such items are disturbed, GRANTEE shall cease construction activities immediately. GRANTEE shall then promptly notify GRANTOR and must not resume construction until written approval is given by GRANTOR.
10. GRANTEE shall, prior to construction, maintenance or removal, reserve the top 12 inches of soil from areas subject to topsoil and subsoil mixing. The reserved soil must be stockpiled to minimize wind and water erosion. Upon completion of construction, and maintenance or removal, GRANTEE shall promptly reclaim the disturbed area. It must be recontoured to conform to the adjacent natural topography, rocks exposed by excavation must be hauled off or reburied on the property, the reserved soil must be evenly respread over the disturbed area, and the entire disturbed area must be revegetated with a mixture of native perennial grasses as shown in Exhibit "B". Reclamation is not complete until rocks are removed from the surface, erosion is controlled and the surface is revegetated with a mixture of native perennial grasses.
11. In areas where temporary fencing is necessary to keep livestock out of the easement areas (i.e. non-cultivated pasture land), GRANTEE shall install temporary fencing around the total easement areas (temporary, additional, and permanent) before commencement of construction, which fences shall remain until the entire easement area has been reclaimed. At the conclusion of reclamation activities, temporary fencing shall become the property of the GRANTOR. Before construction of any fence by GRANTEE, GRANTEE will consult with GRANTOR as to the location of the fence and any gates along the easement areas. If GRANTOR Chooses, GRANTOR may notify GRANTEE in writing that GRANTOR will install this fencing, and provide and estimate for one of the types of fences described below. GRANTEE will reimburse GRANTOR for the cost of the estimate, unless GRANTEE believes the estimate is unreasonable, in which case GRANTEE will obtain a reasonable estimate and reimburse that amount to GRANTOR.
  - a. Unless otherwise agreed to in writing by GRANTOR and as long as GRANTOR supplies power to the fence, any fence installed by GRANTEE under this section will be reasonably similar to the two-wire power fence described in the NRCS spec sheet, which requires use of smooth, single-strand, 12.5 gauge high-tensile strength (170,000 psi, minimum), type III galvanized or better wire and a top wire (hot wire) at least 26 inches above ground line and the bottom wire (ground wire) 8 to 12 inches below the top wire. The bottom (ground) wire will be connected either directly to the negative side of the energizer or to the same grounding rod(s) as the energizer. In situations where the earth provides adequate ground to complete the circuit, both wires may be energized. Tension on each wire shall be sufficient to maintain proper wire spacing between line posts. In-line strainers will be installed on each wire to maintain correct tension on each wire between all brace corners and gate assemblies. Tension springs may be used on each wire to maintain proper tension. In the absence of power, GRANTEE shall install a basic four strand barbed-wire fence, utilizing Red Brand 2 point barbed wire with studded t posts weighing a minimum of 1.25 pounds/foot. Such barbed wire fence shall meet the installation specifications in the NRCS spec sheet.
12. GRANTEE shall implement reasonable measures to prevent accelerated erosion. If an erosion problem develops, GRANTEE shall promptly take the necessary actions to correct it and shall repair any erosion damage.
13. GRANTEE shall not discharge any hazardous liquids or toxic substances onto the easement area or land adjacent to the easement area. All discharges of hazardous liquids or toxic substances shall be stopped as soon as possible after discovery and acted upon immediately to halt movement of such discharges. Any such discharges shall be reported immediately to the GRANTOR. The GRANTEE shall then restore the affected area as closely as possible to its original condition.
14. GRANTEE shall secure and keep in force during the Term of this Easement all Insurance Requirements as defined in the Pore Space Lease.

BLF-000040

ROW #()

15. GRANTEE shall control all noxious weeds in the easement area.
16. GRANTEE may cut or trim trees and shrubs, but only to the extent they interfere with or endanger the operation or maintenance of the (Type of Structure).
17. GRANTEE shall maintain the natural water flow and drainage.
18. GRANTEE shall take necessary precautions to prevent fires. In the event of a fire caused by the GRANTEE or its agent, GRANTEE shall compensate the GRANTOR's surface lessee(s) for their losses including forage, crop and any other losses, and shall compensate GRANTOR for any loss it suffers due to the fire.
19. GRANTEE shall conduct all activities associated with the (Type of Structure) in a manner that avoids the degradation of air, land, and water quality and that protects the area's visual resources.
20. GRANTOR reserves the right to use the easement area and to allow others to use the easement area for purposes compatible with GRANTEE's use. If someone other than GRANTOR uses the easement area in a manner inconsistent with GRANTEE's use, GRANTOR is not liable or responsible.
21. Through this easement GRANTEE is not acquiring any subsurface interest. Subsurface interests include, but are not limited to oil, gas, coal, water, cement materials, sodium sulfate, sand and gravel, scoria, road material, building stone, chemical substances, metallic ores, uranium ores, or colloidal clays or other clays. If any subsurface interest is or will likely be excluded from mining or development because of the presence of this easement or the (Type of Structure) allowed by this easement, or if the location of the easement and (Type of Structure) interferes or will likely interfere with the mining or development of subsurface interests outside of the easement area, GRANTOR will give GRANTEE at least sixty (60) days written notice of the conflict between this easement and GRANTOR's right to mine and develop subsurface interests. At the end of the sixty day period GRANTEE must either pay GRANTOR the amount of lost royalties as determined by GRANTOR for the damages suffered because of GRANTOR's inability to mine or develop subsurface interests, or to benefit from their mining or development, or GRANTEE must agree to relocate the easement and the (Type of Structure) to another location within the tract, provided GRANTOR determines that a suitable substitute location exists on the tract. If GRANTEE selects relocation and if GRANTOR agrees that a suitable substitute location exists, this easement will be revised to describe the easement's new location and GRANTEE will move all structures and other physical features of the easement to the new location. Relocation does not entitle GRANTOR to additional compensation but GRANTEE must bear all relocation costs. GRANTEE must promptly complete relocation.
22. GRANTEE agrees to defend, indemnify and hold harmless GRANTOR from any claims by any person that are in any way related to GRANTEE's use of the easement area, including all costs, expenses, and attorney fees that in any manner result from or arise out of this agreement. It is GRANTEE's exclusive right and responsibility to construct, maintain, and remove the (Type of Structure). GRANTEE further accepts liability and indemnifies GRANTOR, and its family, officers and employees, from all costs, expenses and attorneys fees incurred in establishing and litigating the indemnification coverage provided above. The legal defense provided by GRANTEE to the GRANTOR under this paragraph must be free of any conflicts of interest, even if this requires GRANTEE to retain separate legal counsel for GRANTOR. The obligations of this paragraph shall continue after this agreement terminates.
23. Any fixtures, structures, installations or facilities constructed or installed by GRANTEE, are the property of GRANTEE and may be removed by GRANTEE at any time.

GRANTEE shall remove all improvements, both above ground and underground, from the easement area when the easement is abandoned or in any other way terminated, unless authorized to do otherwise in writing by GRANTOR. If a pipeline is to be abandoned in place, the following minimum requirements will apply. The pipeline must be disconnected and physically isolated from any operating facility or other pipeline(s), any pipeline

**ROW #0**

segments coming to the surface must be cut off no lower than 48 inches below the surface, purge the pipeline with fresh water, air, or inert gas in a manner that effectively removes all fluids, remove cathodic protection from the pipeline, permanently plug or cap all open ends by mechanical or welded means and document the abandonment procedure with written notes containing methods, dates, persons, companies and pictures.

24. This easement shall be a covenant running with the land and shall be binding on the heirs, successors, and assigns of the parties hereto.

25. This easement is subject to all existing easements and nothing in this easement supersedes any rights previously granted.

26. GRANTOR neither warrants nor agrees to defend title to the easement area.

27. This easement is also subject to the conditions in Exhibits "A" Survey Plat and Written Narrative, "B" Soil Reservation and Reclamation Requirements & "C" Native Grass Seeding Specifications which are attached and made a part of this easement.

**Re: Records Request**

I am writing to request a copy of records from your office, pursuant to N.D.C.C. § 44-04-18. Please provide the following data electronic files and/or load files submitted to the Oil and Gas Division by applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC:

- All the input files, field and analytical data, and the model geochemical database used to evaluate the CO<sub>2</sub> effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's USGS's PHREEQC model.
- All the input files, field and analytical data, and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.
- Geophysical Logs that penetrate injection and confining zones, seismic survey data and core sample measurements, all measurements and data for acoustic impedance, total porosity, effective porosity, permeability, and facies.
- All the input files, field and analytical data, and the model, including but not limited to all inputs and data files used to run SLB's Petrel model in any manner related to Summit's applications.
- All 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse or Petrel format, CMG (Canadian Modeling Group) Imex format, or other similar format.

To the maximum extent possible, I request that you provide all records to me in electronic format by emailing them to my paralegal Desirae Zaste at [desirae@braatenlawfirm.com](mailto:desirae@braatenlawfirm.com). If it is necessary to mail responsive records, they may be sent to me at the address below.

North Dakota Industrial Commission  
May 15, 2024

## Disclaimer

The Class VI injection well classification was established by the *Federal Requirements Under the Underground Injection Control (UIC) Program for Carbon Dioxide (CO<sub>2</sub>) Geologic Sequestration (GS) Wells* (75 FR 77230, December 10, 2010), referred to as the Class VI Rule, which establishes a new class of injection well (Class VI).

The Safe Drinking Water Act (SDWA) provisions and the United States Environmental Protection Agency (EPA) regulations cited in this document contain legally-binding requirements. In several sections, this guidance document makes suggestions and offers alternatives that go beyond the minimum requirements indicated by the Class VI Rule. This is intended to provide information and suggestions that may be helpful for implementation efforts. Such suggestions are prefaced by “may” or “should” and are to be considered advisory. They are not required elements of the Rule. Therefore, this document does not substitute for those provisions or regulations, nor is it a regulation itself, so it does not impose legally-binding requirements on the EPA, states, or the regulated community. The recommendations herein may not be applicable to each and every situation.

EPA and state decision makers retain the discretion to adopt approaches on a case-by-case basis that differ from this guidance where appropriate. Any decisions regarding a particular facility will be made based on the applicable statutes and regulations. Mention of trade names or commercial products does not constitute endorsement or recommendation for use. This guidance may change in the future without a formal notice and comment period.

While the EPA has made every effort to ensure the accuracy of the discussion in this document, the obligations of the regulated community are determined by statutes, regulations, or other legally binding requirements. In the event of a conflict between the discussion in this document and any statute or regulation, this document would not be controlling.

Note that this document only addresses issues covered by the EPA’s authorities under SDWA. Other EPA authorities, such as Clean Air Act (CAA) requirements to report carbon dioxide injection activities under the Greenhouse Gas Reporting Program, are not within the scope of this document.

## Executive Summary

The EPA's *Federal Requirements Under the Underground Injection Control (UIC) Program for Carbon Dioxide (CO<sub>2</sub>) Geologic Sequestration (GS) Wells*, codified in the U.S. Code of Federal Regulations (CFR) [40 CFR 146.81 *et seq.*], known as the Class VI Rule, establishes a class of injection well, Class VI, and sets minimum technical criteria for Class VI injection wells for the purposes of protecting underground sources of drinking water (USDWs). This document is one of a group of guidance documents developed to support owners or operators of Class VI wells and the UIC Program permitting authorities.

Under the Class VI Rule, owners or operators of Class VI wells are required to site, construct, and operate their wells according to the specific technical criteria that address specific GS activities: site characterization; area of review (AoR) delineation and corrective action; well construction and operation; financial responsibility; testing and monitoring; reporting and recordkeeping; post-injection site care (PISC) and site closure; and emergency and remedial response. Recordkeeping, reporting, and data management are important components of the UIC Program, helping to ensure that the activities and operations regulated under the program are conducted as planned, are compliant with the regulations and permit conditions, and, ultimately, are sufficiently protective of USDWs.

This guidance is intended to describe specific information that owners or operators of Class VI wells are required or recommended to submit during each GS activity under the Class VI Rule. It closely references other UIC Program Class VI guidance documents for technical details and its content complements the information in the *UIC Program Class VI Implementation Manual for Permitting Authorities*. This document will help owners or operators understand the type and format of information the EPA is seeking in order to make risk-based permitting decisions.

Additionally, the Class VI Rule, at 40 CFR 146.91(e), requires owners or operators of Class VI wells to submit all required reports, submittals, and notifications to the EPA in an approved electronic format. Therefore, this guidance document also provides recommendations for the use of the EPA's centralized, integrated electronic reporting and data management system, the Geologic Sequestration Data Tool (GSDT). The Introduction describes the purpose and organization of the document and provides background information on the GSDT. The GSDT provides a framework in which owners and operators should electronically submit information. Section 2 provides overarching information on the GSDT. Sections 3 through 6 describe reporting, recordkeeping, and data management activities that take place in the different phases of a Class VI project's life cycle.

## Definitions

Key to definition sources:

1: Class VI Rule Preamble.

2: 40 CFR 144.3.

3: 40 CFR 146.81(d).

4: This definition was developed for the purposes of this document.

5: 40 CFR 144.6(f) and 144.80(f).

**Annulus** means the space between the well casing and the wall of the borehole; the space between concentric strings of casing; or, the space between casing and tubing.<sup>1</sup>

**Aquifer exemption** means a process by which an aquifer or portion of an aquifer is removed from SDWA protection to allow injection that would otherwise be prohibited, where certain requirements [40 CFR 146.4] are met.<sup>4</sup>

**Area of review (AoR)** means the region surrounding the GS project where USDWs may be endangered by the injection activity. The AoR is delineated using computational modeling that accounts for the physical and chemical properties of all phases of the injected carbon dioxide stream and displaced fluids, and is based on available site characterization, monitoring, and operational data as set forth in 40 CFR 146.84.<sup>3</sup>

**Carbon dioxide plume** means the extent underground, in three dimensions, of an injected carbon dioxide stream.<sup>3</sup>

**Carbon dioxide stream** means carbon dioxide that has been captured from an emission source (e.g., a power plant), plus incidental associated substances derived from the source materials and the capture process, and any substances added to the stream to enable or improve the injection process. This subpart [subpart H of 40 CFR 146] does not apply to any carbon dioxide stream that meets the definition of a hazardous waste under 40 CFR Part 261.<sup>3</sup>

**Casing** means pipe material placed inside a drilled hole to prevent the hole from collapsing. The two types of casing in most injection wells are (1) surface casing, the outer-most casing that extends from the surface to the base of the lowermost USDW and (2) long-string casing, which extends from the surface to or through the injection zone.<sup>1</sup>

**Cement** means material used to support and seal the well casing to the rock formations exposed in the borehole. Cement also protects the casing from corrosion and prevents movement of injectate up the borehole. The composition of the cement may vary based on the well type and purpose; cement may contain latex, mineral blends, or epoxy.<sup>1</sup>

**Class I well** means a well that injects hazardous waste, other industrial and municipal waste, and radioactive wastes beneath the lowermost formation containing, within one quarter mile of the well bore, an underground source of drinking water.<sup>4</sup>

**Class II well** means a well that injects fluids (1) brought to the surface in connection with natural gas storage operations or conventional oil or natural gas production, (2) for enhanced recovery of oil or natural gas, and (3) for storage of hydrocarbons which are liquid at standard temperature and pressure.<sup>4</sup>

**Class V well** means a well designed and constructed for injection, but not included in the definitions of Class I, II, III, IV, or VI wells. Class V wells inject non-hazardous fluids into or above a USDW and are typically shallow, on-site disposal systems; however, this class also includes some deeper injection operations. There are approximately 20 subtypes of Class V wells.<sup>4</sup>

**Class VI wells** means wells that are not experimental in nature that are used for GS of carbon dioxide beneath the lowermost formation containing a USDW; or, wells used for GS of carbon dioxide that have been granted a waiver of the injection depth requirements pursuant to requirements at 40 CFR 146.95; or, wells used for GS of carbon dioxide that have received an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption pursuant to 40 CFR 146.4 and 144.7(d).<sup>5</sup>

**Computational code** refers to a series of interrelated mathematical equations solved by computer to represent the behavior of a complex system. For the purposes of GS, computational models represent, at a minimum, the flow and transport of multiple fluids and components in varying phases through porous media. Computational codes offer the ability to predict fluid flow in the subsurface using scientifically accepted mathematical approximations and theory. The use of computational codes is necessary because the mathematical formulations describing fluid flow are complicated and in many cases, non-linear. Several codes have been specifically developed or tailored for injection activities similar to GS, and can be used for this purpose.<sup>4</sup>

**Computational model** means a mathematical representation of the injection project and relevant features, including injection wells, site geology, and fluids present. For a GS project, site specific geologic information is used as input to a computational code, creating a computational model that provides predictions of subsurface conditions, fluid flow, and carbon dioxide plume and pressure front movement at that site. The computational model comprises all model input and predictions (i.e., output).<sup>4</sup>

**Confining zone** means a geologic formation, group of formations, or part of a formation stratigraphically overlying the injection zone(s) that acts as barrier to fluid movement. For Class VI wells operating under an injection depth waiver, confining zone means a geologic formation, group of formations, or part of a formation stratigraphically overlying and underlying the injection zone(s).<sup>3</sup>

**Corrective action** means the use of UIC Program Director-approved methods to ensure that wells within the AoR do not serve as conduits for the movement of fluids into USDWs.<sup>3</sup>

**Enhanced gas recovery** means the process of injecting a gas (i.e., carbon dioxide) into a gas-bearing formation to displace available gas to allow it to be produced.<sup>4</sup>

**Enhanced oil recovery** means the process of injecting carbon dioxide into an oil reservoir to thin (decrease the viscosity of) extractable oil, which is then available for recovery.<sup>4</sup>

**Enhanced recovery** means either enhanced oil recovery or enhanced gas recovery.<sup>4</sup>

**Fluid** means any material or substance which flows or moves, whether in a semisolid, liquid, sludge, gas, or other form or state.<sup>2</sup>

**Formation or geological formation** means a layer of rock that is made up of a certain type of rock or a combination of types.<sup>1</sup>

**Geologic sequestration (GS)** means the long-term containment of a gaseous, liquid, or supercritical carbon dioxide stream in subsurface geologic formations. This term does not apply to carbon dioxide capture or transport.<sup>3</sup>

**Geologic Sequestration Data Tool (GSDT)** means the EPA's centralized, integrated electronic reporting and data management system for Class VI projects.<sup>4</sup>

**GS project** means an injection well or wells used to emplace a carbon dioxide stream beneath the lowermost formation containing a USDW; or, wells used for GS of carbon dioxide that have been granted a waiver of the injection depth requirements pursuant to requirements at 40 CFR 146.95; or, wells used for GS of carbon dioxide that have received an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption pursuant to 40 CFR 146.4 and 144.7(d). It includes the subsurface three-dimensional extent of the carbon dioxide plume, associated area of elevated pressure, and displaced fluids, as well as the surface area above that delineated region.<sup>3</sup>

**Injectate** means the fluids injected. For the purposes of the Class VI Rule, this is also known as the carbon dioxide stream.<sup>1</sup>

**Injection depth waiver** refers to a waiver of the Class VI injection depth requirements by the UIC Program Director and the EPA Regional Administrator pursuant to provisions at 40 CFR 146.95.<sup>4</sup>

**Injection zone** means a geologic formation, group of formations, or part of a formation that is of sufficient areal extent, thickness, porosity, and permeability to receive carbon dioxide through a well or wells associated with a GS project.<sup>3</sup>

**Mechanical integrity** means the absence of significant leakage within the injection tubing, casing, or packer (known as internal mechanical integrity), or outside of the casing (known as external mechanical integrity).<sup>1</sup>

**Mechanical integrity test (MIT)** refers to a test performed on a well to confirm that a well maintains internal and external mechanical integrity. MITs are a means of measuring the adequacy of the construction of an injection well and a way to detect problems within the well system.<sup>1</sup>

**Model** means a representation or simulation of a phenomenon or process that is difficult to observe directly or that occurs over long time frames. Models that support GS can predict the flow of carbon dioxide within the subsurface, accounting for the properties and fluid content of the subsurface formations and the effects of injection parameters.<sup>1</sup>

**Owner or operator** means the owner or operator of any facility or activity subject to regulation under the UIC program.<sup>2</sup>

**Packer** means a mechanical device that seals the outside of the tubing to the inside of the long-string casing, isolating an annular space.<sup>1</sup>

**Phased corrective action** refers to a provision of the Class VI Rule [40 CFR 146.84(b)(2)(iv)] afforded to Class VI injection well owners or operators to defer some identified corrective action needed within the AoR, but farther away from the injection well, until after injection has commenced, but prior to carbon dioxide plume and pressure front movement into that particular area.<sup>4</sup>

**Post-injection site care (PISC)** means appropriate monitoring and other actions (including corrective action) needed following cessation of injection to ensure that USDWs are not endangered, as required under 40 CFR 146.93.<sup>3</sup>

**Pressure front** means the zone of elevated pressure that is created by the injection of carbon dioxide into the subsurface. For GS projects, the pressure front of a carbon dioxide plume refers to the zone where there is a pressure differential sufficient to cause the movement of injected fluids or formation fluids into a USDW.<sup>3</sup>

**Primacy (primary enforcement responsibility)** means the authority to implement the UIC Program. To receive primacy, a state, territory, or tribe must demonstrate to the EPA that its UIC program is at least as stringent as the federal standards; the state, territory, or tribal UIC requirements may be more stringent than the federal requirements. The EPA may grant primacy for all or part of the UIC program, e.g., for certain classes of injection wells.<sup>4</sup>

**Site closure** means the point/time, as determined by the UIC Program Director following the requirements under 40 CFR 146.93, at which the owner or operator of a GS site is released from PISC responsibilities.<sup>3</sup>

**Total dissolved solids (TDS)** refers to the measurement, usually in mg/L, for the amount of all inorganic and organic substances suspended in liquid as molecules, ions, or granules. For injection operations, TDS typically refers to the saline (i.e., salt) content of water-saturated underground formations.<sup>1</sup>

**Tubing** refers to a small-diameter pipe installed inside the casing of a well. Tubing conducts injected fluids from the wellhead at the surface to the injection zone and protects the long-string casing of a well from corrosion or damage by the injected fluids.<sup>4</sup>

**Underground Injection Control (UIC) Program** refers to the program that the EPA, or an approved state, is authorized to implement under SDWA that is responsible for regulating the

underground injection of fluids by well injection. This includes setting the federal minimum requirements for construction, operation, permitting, and closure of underground injection wells.<sup>4</sup>

**Underground Injection Control (UIC) Program Director** refers to the chief administrative officer of any state or tribal agency or the EPA Region that has been delegated to operate an approved UIC program.<sup>4</sup>

**Underground source of drinking water (USDW)** means an aquifer or its portion which supplies any public water system; or which contains a sufficient quantity of ground water to supply a public water system; and currently supplies drinking water for human consumption; or contains fewer than 10,000 mg/L TDS; and which is not an exempted aquifer.<sup>2</sup>

**Well bore** refers to the hole that remains throughout a geologic (rock) formation after a well is drilled.<sup>4</sup>

**Workover** refers to any maintenance activity performed on a well that involves ceasing injection or production and removing the wellhead.<sup>4</sup>

# 1 Introduction

To ensure the protection of underground sources of drinking water (USDWs), the United States Environmental Protection Agency (EPA) established minimum federal requirements for the proper management of carbon dioxide injection and storage under the authority of Part C of the Safe Drinking Water Act (SDWA) on December 10, 2010. The *Federal Requirements Under the Underground Injection Control (UIC) Program for Carbon Dioxide (CO<sub>2</sub>) Geologic Sequestration (GS) Wells*, found at 75 FR 77230 and hereafter referred to as the Class VI Rule, establishes a new class of injection wells, Class VI, for the injection of carbon dioxide for GS.

The Class VI Rule defines technical criteria for the safe deployment of Class VI projects, including site characterization; area of review (AoR) delineation and corrective action; well construction and operation; financial responsibility; testing and monitoring; reporting and recordkeeping; well plugging, post-injection site care (PISC) and site closure; and emergency and remedial response. It requires well owners or operators to collect, generate, and report specific information needed to inform permitting and compliance decisions related to siting, constructing, operating, monitoring, and closing a Class VI well [40 CFR 146.81 *et seq.*].

Pursuant to Section 1445 of SDWA, owners or operators subject to requirements under SDWA must establish and maintain records, conduct monitoring, and provide any information that the Administrator or a representative, such as a UIC Program Director, may require by regulation to comply with the Act. Therefore, reporting and recordkeeping are important components of the UIC Program to ensure that activities and operations regulated under the program are conducted as planned, are compliant with the regulations and permit conditions, and, ultimately, are sufficiently protective of USDWs.

## 1.1 Purpose of Guidance

This guidance is one of a group of guidance documents that describe Class VI well operations that are protective of USDWs and in compliance with the Class VI Rule. This document is designed to provide guidance to Class VI injection well owners or operators and their representatives regarding recordkeeping, reporting, and management of data associated with Class VI projects.

Specifically, the purpose of this guidance document is to provide:

- A comprehensive description of the reporting and recordkeeping requirements of the Class VI Rule, for each phase of a Class VI project (see Section 1.2 for a discussion of the Class VI project phases).
- A description of the reporting process, as guided by the EPA's Geologic Sequestration Data Tool (GSDT). The GSDT is an electronic reporting tool for Class VI owners, operators, and permitting authorities, developed by the EPA to facilitate compliance with 40 CFR 146.91(e).

- Information on how the reporting, recordkeeping, and data management activities will ensure USDW protection and support compliance determinations. The GSDT supports the creation and maintenance of a comprehensive administrative record for each project, which supports the EPA's permitting and compliance decisions.

The EPA recommends that this guidance document be used by owners or operators for support in navigating the reporting and recordkeeping requirements of the Class VI Rule. The tables and text boxes provided throughout the document give an overview of associated reporting processes/GSDT workflows, identify resources that owners or operators can use when developing their submissions, and can serve as a check to ensure that regulatory requirements have been met. In addition to these quick reference items, the document provides the basis for the reporting requirements of each project phase (as described in the text of this document), which is critical to ensuring efficiency in permitting and operations throughout the life of an injection project. The EPA's experience with issuing Class VI permits has informed the suggestions that are made throughout this document, and every effort has been made to maximize efficiency while adhering to the Class VI Rule and ensuring USDW protection.

As noted above, this document is one of a complementary suite of technical guidance documents that address various aspects of permitting and operating a Class VI injection well. This document focuses specifically on the reporting process for Class VI projects: *what* information to submit, *when* and *how* to submit it, and in *what format* the EPA recommends that it be submitted. Other Class VI guidance documents (see the box at right) provide recommendations for conducting the activities necessary to generate this information, and references to these other documents are noted in the text where appropriate. As they are finalized, all of the Class VI guidance documents will be made available on the EPA's website at <http://www.epa.gov/uic/class-vi-guidance-documents> and <https://www.epa.gov/uic/guidance-documents-underground-injection-control-financial-responsibilities>.

#### **Class VI Guidance Documents for Owners or Operators**

- *UIC Program Class VI Well Site Characterization Guidance*
- *UIC Program Class VI Well Area of Review Evaluation and Corrective Action Guidance*
- *UIC Program Class VI Financial Responsibility Guidance*
- *UIC Program Class VI Well Construction Guidance*
- *UIC Program Class VI Well Testing and Monitoring Guidance*
- *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*
- *UIC Program Class VI Well Project Plan Development Guidance*
- *UIC Program Class VI Well Injection Depth Waivers Guidance*
- *UIC Program Guidance on Transitioning Class II Wells to Class VI Wells*

The EPA has also developed the *UIC Program Class VI Implementation Manual for Permitting Authorities*, which describes requirements and provides recommendations specific to the activities of UIC Program Directors. This Implementation Manual may also be useful to owners or operators, helping them to understand the review and oversight process that will follow their submissions, and anticipate what the permitting authority will need to inform its review.

## 1.2 Class VI Project Phases and Reporting Requirements

The Class VI Rule requires owners or operators to submit information throughout the lifetime of a Class VI project to demonstrate protection of USDWs and maintain regulatory compliance. A Class VI project consists of four main phases: (1) the pre-operational phase prior to construction (also referred to as the pre-construction phase), (2) the pre-operational phase prior to operation (also referred to as the pre-operation phase), (3) the injection phase, and (4) the post-injection phase. Figure 1-1 (on the following page) illustrates these project phases, the milestones that separate them, and the sections of this guidance document that provide reporting recommendations for each. As shown in the figure, the GSDT user guides and related resources apply throughout all four phases of a Class VI project's life cycle. The paragraphs below summarize the key activities that take place during each project phase, along with the associated requirements for reporting, recordkeeping, and data management.

The **pre-construction phase** begins with the submission of a Class VI permit application. The Class VI Rule, at 40 CFR 146.82(a), requires prospective owners or operators to submit a permit application prior to the issuance of a permit for the construction of a new Class VI well or the conversion of an existing well to a Class VI well. The permit application (see Section 3.1) is a

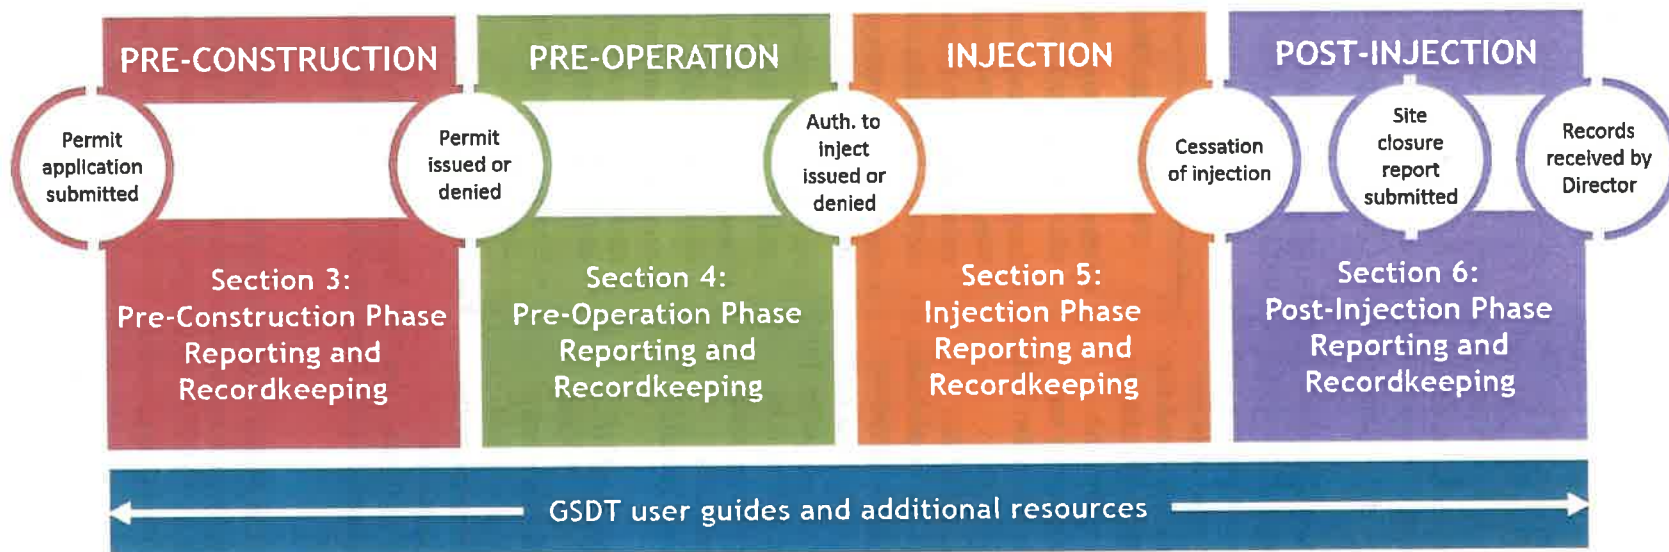

### Pre-Construction Phase Reporting

- Class VI permit application  
40 CFR 146.82(a)
- Injection depth waiver application report, if applicable  
40 CFR 146.95
- Aquifer exemption expansion request, if applicable  
40 CFR 144.7(d) and 146.4(d)

comprehensive collection of proposed project information, including a characterization of the site, an AoR delineation supported by computational modeling, proposed well construction and operation details, a demonstration of financial responsibility, and five project-specific plans (the AoR and Corrective Action Plan, the Testing and Monitoring Plan, the Injection Well Plugging Plan, the PISC and Site Closure Plan, and the Emergency and Remedial Response Plan). Owners or operators seeking to convert existing Class I, Class II, or Class V experimental technology wells to Class VI must demonstrate that the wells were engineered and constructed to meet the requirements at

40 CFR 146.86(a) and to ensure protection of USDWs, in lieu of requirements at 40 CFR 146.86(b) and 146.87(a).<sup>1</sup> Permit applicants seeking a waiver of the requirement to inject below the lowermost USDW must also submit a supplemental report as required at 40 CFR 146.95(a). This injection depth waiver application report (see Section 3.2) must be submitted concurrent with the permit application, pursuant to 40 CFR 146.82(d). In addition, owners or operators seeking to expand the areal extent of an existing aquifer exemption will need to apply to the UIC Program Director pursuant to the requirements at 40 CFR 144.7(d)(1). Recommendations for submittals associated with aquifer exemption expansions are presented in Section 3.3.

<sup>1</sup> While the Class VI Rule, at 40 CFR 146.81(c) and 146.82(a), specifically lists Class I, Class II, and Class V experimental technology wells as examples of wells that can transition to Class VI, EPA may also consider other types of wells (e.g., monitoring or stratigraphic test wells) for conversion to Class VI provided they meet all of the applicable regulatory requirements. When EPA considers other types of wells for conversion to Class VI, those wells are subject to the same regulatory requirements as those well types listed as examples in 40 CFR 146.81(c) and 146.82(a).

**Figure 1-1. Sections of this guidance document and other supporting documentation that apply to each of the Class VI project phases.**

The pre-construction phase includes an iterative evaluation process, during which permit applicants may be required to make subsequent submissions in response to requests for additional information from the UIC Program Director. These requests would be made to achieve compliance with the rule requirements and/or to provide clarification to the permitting authority; the Class VI Rule, at 40 CFR 146.82(a)(21), provides the Director discretion to request additional information to inform his or her evaluation. When all of the information identified at 40 CFR 146.82(a) has been submitted and evaluated, the UIC Program Director will evaluate it and determine whether to issue a Class VI permit that authorizes the owner or operator to construct a Class VI well (or to convert an existing well to Class VI, if applicable).

The **pre-operation phase** is the period during which the owner or operator and UIC Program Director comply with the requirements under 40 CFR 146.82(c) and previously established permit conditions. Before an owner or operator may inject carbon dioxide, the UIC Program Director must consider information generated in conjunction with drilling and construction, and the EPA expects that owners or operators will submit all of the information necessary to support the Director's review when that information has not otherwise been made available to the Director. This information, specified at 40 CFR 146.82(c), includes the results of logs, surveys, and tests conducted pursuant to 40 CFR 146.87; a final AoR delineation; site characterization updates based on data gathered during drilling and testing; final well construction information; and final project plans. In addition, updates to financial responsibility cost estimates and/or financial instruments may take place during this phase. Section 4 presents recommendations for pre-operation submittals.

Similar to the pre-construction phase, the UIC Program Director's evaluation of Class VI Rule compliance during the pre-operation phase may require an iterative process with submission of additional information and/or clarification by the owner or operator. When all of the required information has been submitted and evaluated, the UIC Program Director will determine whether to authorize injection operations. Issuance of the final decision to authorize injection marks the end of this phase.

During the **injection phase**—when the actual injection operation takes place—owners or operators are required to submit information at certain intervals to demonstrate compliance with the Class VI requirements. Pursuant to 40 CFR 146.91(a)-(d), owners or operators must submit semi-annual reports of testing and monitoring results; 30-day advance notifications of well tests; well test results within 30 days of each test; and notifications of emergency situations within 24 hours of their occurrence.

#### **Pre-Operation Phase Reporting**

- Site characterization updates  
40 CFR 146.82(c)(2)-(3)
- Amended AoR and Corrective Action Plan, including final AoR delineation and corrective action status  
40 CFR 146.82(c)(1), (6), (9)
- Injection well construction updates  
40 CFR 146.82(c)(3), (5)
- Pre-operational testing results  
40 CFR 146.82(c)(4), (7), (8)
- Amendments to other project plans  
40 CFR 146.82(c)(9)
- Any other information requested by the UIC Program Director  
40 CFR 146.82(c)(10)
- Financial responsibility updates  
40 CFR 146.85

### Injection Phase Reporting

- Semi-annual reports of testing and monitoring results  
*40 CFR 146.91(a)*
- Well test notifications and results  
*40 CFR 146.91(b), (d)*
- Project plan amendments and other periodic reporting  
*40 CFR 146.84(e)(4); 146.85; 146.90(j); 146.93(a)(4); 146.94(d)*
- Emergency and remedial response and other occasional reporting  
*40 CFR 146.85(d); 40 CFR 146.88(f)(4)-(5), 146.91(c), 146.94(b)-(c)*

Periodically throughout the injection phase, owners or operators must reevaluate the project's AoR and, if necessary, amend one or more of their project plans [40 CFR 146.84(e), 146.90(j), and 146.94(d)]. Owners or operators must also update financial responsibility information annually and under certain other conditions [40 CFR 146.85(a)(5)(ii)]. See Section 5 of this document for recommendations related to injection phase submittals.

The **post-injection phase** begins with the cessation of injection activities. During this phase, owners or operators must plug the injection well, perform post-injection monitoring activities, demonstrate that no additional monitoring is needed to ensure that the site does not pose an

endangerment to USDWs, and close the site, pursuant to 40 CFR 146.92 and 146.93. Because injection wells may be converted to monitoring wells after injection has ceased, injection well plugging is not required to take place at the beginning of the post-injection phase. However, pursuant to 40 CFR 146.93(f)(1), the site closure report must include documentation of appropriate injection well and monitoring well plugging as specified in 40 CFR 146.92 and 146.93(e) regardless of when the injection well plugging took place.

As necessary during the post-injection phase, the owner or operator will also perform AoR reevaluations and potentially amend the associated project plans, provide updates on financial responsibility, and conduct emergency and remedial response activities. Reporting associated with this phase of the Class VI project is described in Section 6 and includes: submitting a notice of intent to plug the well; submitting an injection well plugging report; submitting an amended PISC and Site Closure Plan; reporting the results of PISC monitoring; performing a non-endangerment demonstration; and submitting a site closure report. The post-injection phase ends when the site is closed and the UIC Program Director receives the site closure report; owners or operators must also deliver post-injection records to the UIC Program Director following a 10-year retention period, as required by 40 CFR 146.93(h).

### Post-Injection Phase Reporting

- Injection well plugging submissions  
*40 CFR 146.92(c)-(d)*
- PISC submissions, including the non-endangerment demonstration  
*40 CFR 146.93(a)-(b)*
- Site closure submissions  
*40 CFR 146.93(d), (f)*

## 2 Electronic Reporting and the GSDT

Under the Class VI Rule at 40 CFR 146.91(e), owners or operators are required to submit data generated and collected during the lifetime of a Class VI project directly to the EPA in an approved electronic format. The EPA developed the GSDT to facilitate compliance with this electronic reporting requirement. The requirement applies regardless of whether the project is located in a jurisdiction with primary enforcement responsibility (primacy) for Class VI wells, and UIC Program Directors of primacy states, tribes, and territories are encouraged to use the GSDT to eliminate duplicative reporting for owners and operators. The following subsections provide more information about electronic reporting in the context of the Class VI program, the key components and capabilities of the GSDT, and the recordkeeping requirements of the Class VI Rule.

### 2.1 Electronic Reporting under the Class VI Rule

Given the complex nature of Class VI well operations and the more comprehensive requirements of the Class VI Rule compared to those for other UIC well classes, a centralized and integrated reporting system that is managed by the EPA is essential for effective oversight of Class VI projects and management of GS data.

Centralized electronic reporting and data management offers several advantages, including:

- Reducing the burden on permit applicants/owners or operators for data submittal while also assisting with recordkeeping.
- Creating an instantaneous submission process, which is essential for the time-sensitive reporting required under the Class VI Rule, such as 24-hour emergency notifications.
- Facilitating collaboration among owner or operator project team members and between owners or operators and permitting authorities.
- Supporting consistency and continuity for projects with long lifetimes.
- Developing a complete, accurate, and reproducible administrative record for project permitting and compliance decisions.
- Reducing the burden on permitting authorities that receive and manage data.

In addition, centralized electronic reporting and recordkeeping facilitates transparency and supports the EPA's ability to respond to information requests from Congress, the public, and other interested parties. This characteristic is consistent with the recommendations of the *Report of the Interagency Task Force on Carbon Capture and Storage*: "State UIC primacy agencies' efforts could be aided by a national data system that would promote regulatory certainty, efficiency, and accountability, while allowing transparency of all geologic sequestration related information."<sup>2</sup>

---

<sup>2</sup> Interagency Task Force on Carbon Capture and Storage. 2010. *Report of the Interagency Task Force on Carbon Capture and Storage*, p. C-8. Available on the Internet at: <http://www.epa.gov/climatechange/Downloads/ccs/CCS-Task-Force-Report-2010.pdf>.

To determine the optimal way to address these electronic reporting needs, the EPA conducted a Joint Requirements Planning (JRP) process in 2011. During a JRP process, stakeholders and content experts participate in structured meetings to collaboratively identify, define, create, and refine user requirements. The EPA held JRP stakeholder meetings with participants from two groups: potential EPA users (particularly those from the EPA regional offices) and potential state and owner or operator users. The EPA then developed an Alternatives Analysis and conducted a cost-benefit evaluation of data system alternatives based on the information received from these stakeholders. Ultimately, the EPA determined that the most cost-effective alternative with the greatest operational value was a tool that relied on an existing system called the Geologic Sequestration Software Suite (GS<sup>3</sup>), which was developed by the Pacific Northwest National Laboratory (PNNL). The GSDT was developed using GS<sup>3</sup> as a starting point.

## 2.2 Introduction to the GSDT

The Class VI Rule is organized according to key UIC Program elements, such as AoR and corrective action, financial responsibility, testing and monitoring, etc. Owners or operators of Class VI wells will submit information for these various topic areas throughout the life of their projects, as described in Section 1.2. To facilitate the efficient submittal of Class VI information, the GSDT utilizes a modular structure for reporting that corresponds to topic areas within the Class VI Rule (see the box below). The GSDT modules are structured to reflect the Class VI

Rule requirements (as shown in Figure 2-2 in Section 2.4), and Sections 3 through 6 of this guidance document refer to the GSDT modules to describe information requirements and associated recommendations for information type and format.

### **GSDT Reporting Modules for Owners or Operators**

- Project Information Tracking  
*(for submitting/organizing general project data and permit applications)*
- AoR and Corrective Action
- Financial Responsibility Demonstration
- Pre-Operational Testing
- Project Plan Submissions
- Alternative PISC Timeframe Demonstration
- Injection Depth Waivers and Aquifer Exemption Expansions
- Non-Endangerment Demonstration
- Injection and Post-Injection Phase Reporting
- Information Request  
*(for responding to permitting authority requests for additional information)*

Class VI permit applicants, owners, and operators all access the GSDT through a centralized landing page, from which they can launch each of the reporting modules. The modules themselves consist of structured electronic forms that reflect the Class VI Rule requirements. Within the GSDT reporting modules, owners or operators provide information in three main ways: selections via check boxes, radio buttons, or drop-down menus; direct entry into text fields; and file uploads.

In some modules, the GSDT also provides templates that users can download, populate, upload, and submit. This helps users ensure that they have included all the necessary information to fulfill the applicable Class VI Rule requirements, while providing them the flexibility to tailor submissions to their particular projects.

Each reporting module has a user guide that describes the specific technical procedures necessary to populate and submit data using that module. These user guides can be downloaded

from within the modules and accessed from the operator landing page of the GSDT. Permitting authorities can also provide copies of the user guides to permit applicants/owners or operators. Because the GSDT modules may be updated over time (e.g., in response to user feedback), this guidance document focuses on the *content* and *timing* of submittals, with more specific technical recommendations described in the GSDT user guides and other resources. For the most up-to-date information on particular fields/actions within the GSDT, owners or operators should refer to the user guides or contact their permitting authority.

In light of the nearly universal use of computerized systems (particularly for wells as technically complex as Class VI wells), the EPA anticipates that most owners or operators will be able to submit data electronically using the GSDT. However, the EPA recognizes that there may be some circumstances where it will be necessary to submit data non-electronically or via an alternative electronic method. For example, the GSDT is not designed to receive confidential business information (CBI). Owners or operators who would like to claim information as CBI or otherwise discuss the possibility of submitting data outside of the GSDT should contact their permitting authority for further information and instructions. If any owners or operators cannot submit the required data using the GSDT, they should work with their UIC Program Director to identify an appropriate alternate reporting format or procedure to ensure regulatory compliance.

### 2.3 GSDT Registration and Access

The GSDT is for authorized users only and requires registration in compliance with the EPA's Cross-Media Electronic Reporting Regulation (CROMERR) and 40 CFR 144.32(a), under which UIC permit applications or other submittals by corporations must be signed by a responsible corporate officer or other authorized personnel. For permit applicants/owners or operators, there is a three-step process for establishing access to the GSDT (see Figure 2-1). This process includes establishing an Electronic Signature Agreement (ESA) to designate the authorized personnel who will submit information via the GSDT over the life of a Class VI well.

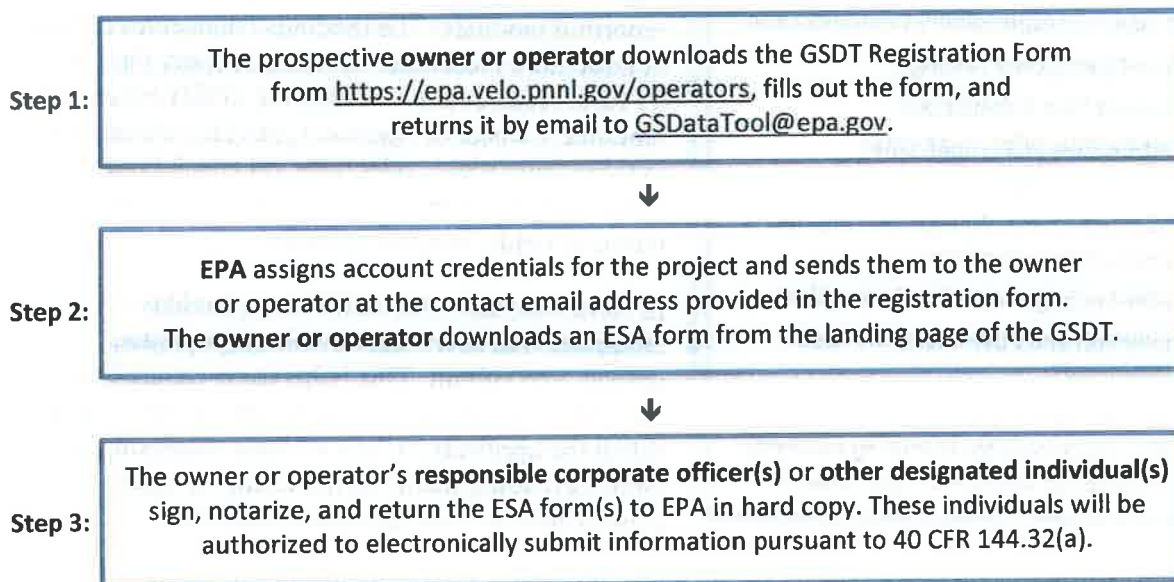

Figure 2-1. The GS Data Tool registration and ESA process.

GSDT accounts are issued on a per-project basis, meaning that there is one set of credentials for each project. This also means that data associated with a project is managed collectively regardless of the number of injection wells proposed for the project. (However, pursuant to 40 CFR 144.33, each injection well must be permitted separately with distinct Class VI permit numbers, and each well will be issued a unique UIC permit.) The project-level approach within the GSDT allows permit applicants/owners or operators to efficiently submit combined information that applies to all wells within a project (e.g., computational modeling results for AoR delineation).

Because only one set of credentials will be issued to an organization for a particular project, it is the owner or operator's responsibility to make sure that only appropriate individuals have access to the credentials. All users authorized by the owner or operator organization will need to establish an ESA with the EPA before they can make submissions using the GSDT.

## **2.4 Project Communications and the Administrative Record**

An administrative record is a collection of documents that forms the basis for an EPA decision, including the provisions of a draft or final permit where the EPA is the permitting authority (see 40 CFR 124.9 and 124.18). The administrative record for a Class VI permit decision will include all components of the permit application—including any supporting documentation or responses to requests for additional information—once the permit is issued. By capturing and preserving all submissions, the GSDT supports the development of this record in an efficient and transparent manner. The EPA continues to build the record throughout the life of a Class VI project to document all of the materials that support compliance and oversight decisions.

The EPA encourages permit applicants/owners or operators to communicate with their permitting authorities throughout the lifetime of a Class VI project and acknowledges that different modes of communication (such as email, conference calls, etc.) may be appropriate in different situations. Note that any information supporting the permitting decision (e.g., files sent in response to questions or requests for additional information from the permitting authority) is considered to be part of the administrative record by the EPA. For this reason, the EPA recommends using the GSDT for all submissions of permitting- and compliance-related materials. The Information Request module of the GSDT was designed specifically to facilitate this type of information sharing in a way that preserves a clear and complete record while tracking the submission of additional information by owners or operators.

Most modules within the GSDT are designed to be used during multiple Class VI project phases (see Figure 2-2). This allows owners or operators to come back to modules that they have already populated and provide updated information when necessary. For example, an owner or operator who needs to submit annual financial responsibility updates will only need to update those fields in the Financial Responsibility Demonstration module that have changed since the last submission. All submissions are time-stamped and preserved by the system so that the GSDT contains a comprehensive log for the administrative record.

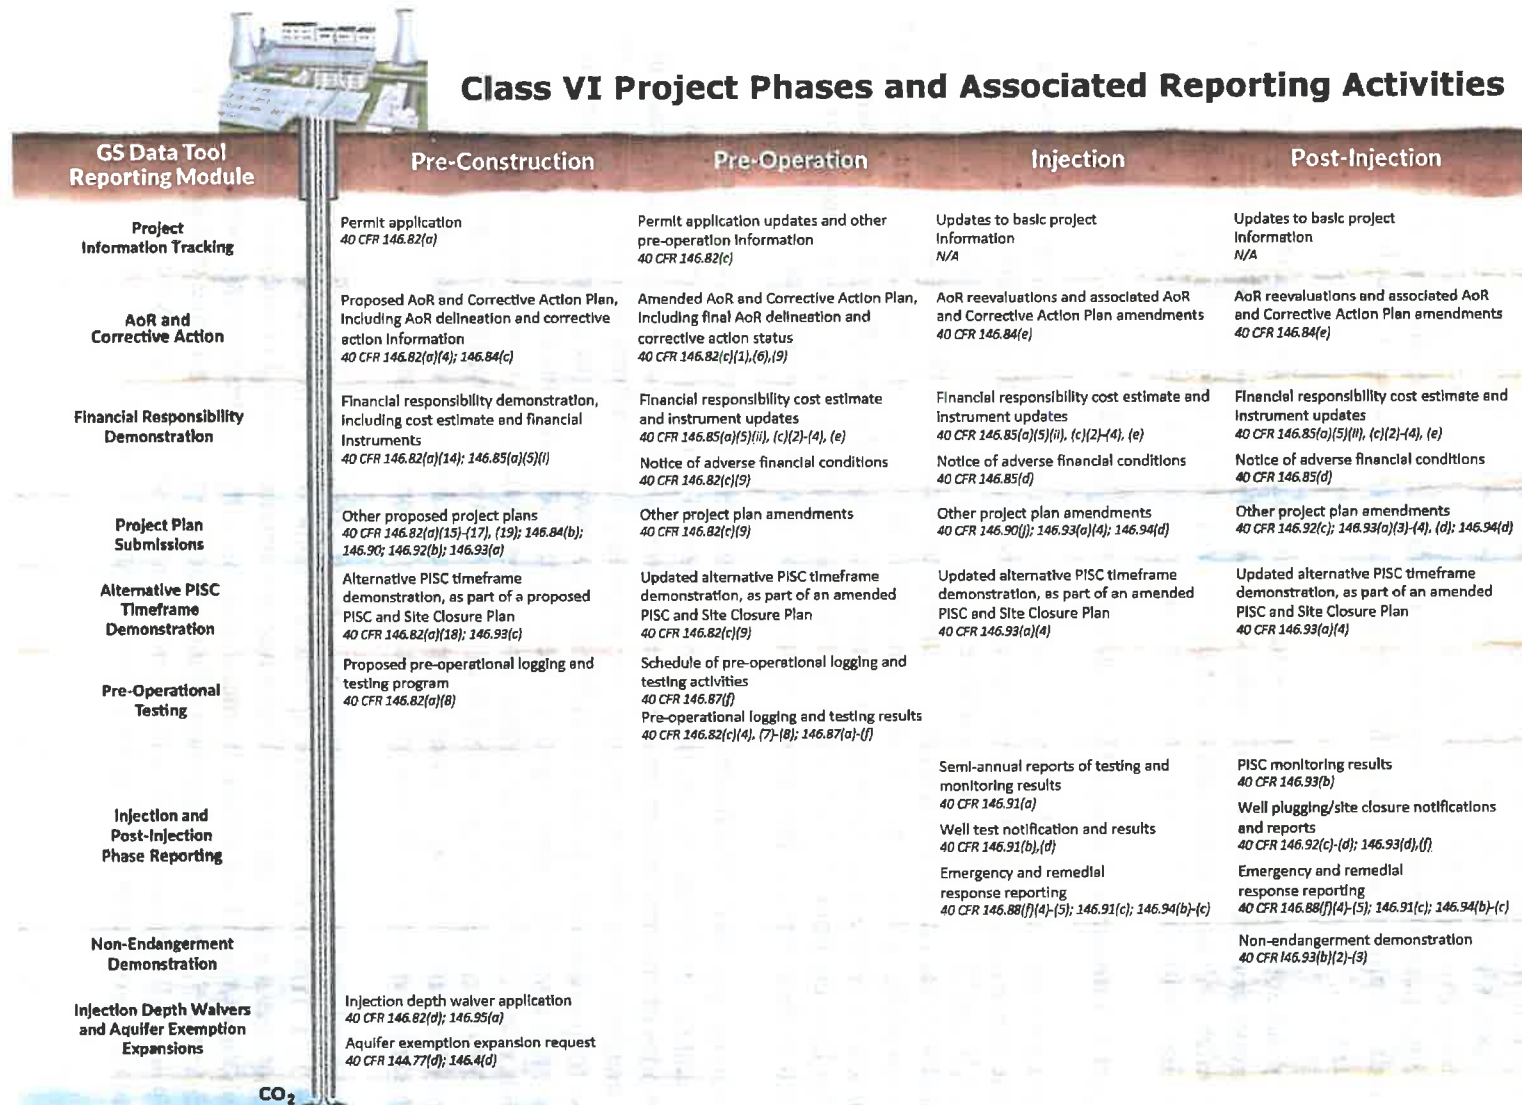

Figure 2-2. The GSDT reporting modules, mapped to project phases and Class VI Rule requirements.

## 2.5 Recordkeeping Requirements

Under the requirements outlined at 40 CFR 146.91(f), owners or operators of Class VI injection wells must retain records as follows:<sup>3</sup>

- All data collected under 40 CFR 146.82 for a Class VI permit application must be retained throughout the life of the Class VI project and for 10 years following site closure.
- Data on the nature and composition of all injected fluids collected under 40 CFR 146.90(a) must be retained until 10 years after site closure. The UIC Program Director may require the owner or operator to deliver the records at the conclusion of the retention period.
- All other monitoring data collected under 40 CFR 146.90(b) through (i) must be retained for 10 years after it is collected.
- Well plugging reports, post-injection data (including, if applicable, data and information used to develop the alternative PISC timeframe demonstration), and site closure reports, must be retained for 10 years following site closure.

The UIC Program Director also has the authority, pursuant to 40 CFR 146.91(f)(5), to require the owner or operator to retain records for longer than 10 years after site closure.

In compliance with CROMERR, materials submitted to the GSDT are time-stamped and preserved in a read-only format. These processes allow the EPA to build a comprehensive administrative record for each Class VI project (see Section 2.4) and support recordkeeping for both the owner or operator and the permitting authority. However, note that owners or operators must still comply with the recordkeeping requirements of the Class VI Rule, i.e., they must retain copies of all submittals as required by 40 CFR 146.91(f).

While the GSDT maintains a record of all previous submittals, allowing the permitting authority to build a comprehensive administrative record, the reporting modules available to owners or operators only display the current version of each submittal. In other words, owners or operators will only be able to access their most recently submitted information via the GSDT modules, and they cannot go back to review older submissions within the GSDT. Independent recordkeeping by owners or operators will ensure that they have access to the content of all previous submissions that may have been superseded by newer information.

---

<sup>3</sup> For the purposes of the recordkeeping requirements discussed throughout this section, “data collected” is inclusive of both submitted data and data that support a permit applicant’s decision-making process.

### 3 Pre-Construction Phase Reporting and Recordkeeping

Prospective owners or operators (i.e., permit applicants) must submit certain information before receiving a permit to begin construction of a new Class VI well or the conversion of an existing Class I, Class II, or Class V experimental technology well to a Class VI well [40 CFR 146.82(a)]. This submittal, which makes up the Class VI permit application, includes information related to site characterization, AoR delineation, corrective action, injection well construction, operating information, and other topic areas. In addition to the permit application, owners or operators seeking a waiver of the injection depth requirement must also concurrently submit a waiver application report [40 CFR 146.95(a)]. Owners or operators of existing Class II wells that have made the business decision to transition to Class VI and that are operating under an aquifer exemption may also need to submit information requesting the expansion of the areal extent of that aquifer exemption [40 CFR 144.7(d)].

The submittals to be made during this project phase are summarized in Table 3-1 and described in more detail in the subsections below. Note that, pursuant to 40 CFR 146.91(f)(1), all data collected for Class VI permit applications must be retained throughout the life of the Class VI project and for 10 years following site closure. While not required, the EPA recommends that owners or operators retain associated information related to injection depth waivers for the same timeframe. Additionally, where an owner or operator received a Class VI aquifer exemption expansion, the EPA recommends that the owner or operator retain aquifer exemption-related documents<sup>4</sup> indefinitely, particularly where the exempted aquifer may be used for injection in the future.

The EPA recommends that all prospective owners or operators contact their permitting authority before preparing a Class VI permit application, both to establish access to the GSDT (including its templates and other resources) and to discuss any project-specific considerations that may affect the preparation or review of the permit application.

**Table 3-1. Summary of submittals to be made during the pre-construction phase.**

Reporting Requirement	Relevant GSDT Modules	Recommended Format	Timing and Frequency
Class VI permit application [40 CFR 146.82(a)]	Project Information Tracking module (which contains a checklist of other modules to use for more detailed submissions; see subsections below)	Basic project information - directly entered into the module  Permit application narrative - uploaded file, with supplemental uploaded items as necessary (see below)  Detailed data submissions - other GSDT modules (see below)	Prior to well construction or conversion, per 40 CFR 146.82(a)

<sup>4</sup> The regulatory authority is an additional resource for aquifer-exemption records, retaining them indefinitely.

Reporting Requirement	Relevant GSDT Modules	Recommended Format	Timing and Frequency
Class VI permit application [40 CFR 146.82(a)], <i>continued</i>	Project Information Tracking module (which contains a checklist of other modules to use for more detailed submissions; see subsections below)	Additional information requested by the UIC Program Director - uploaded file(s)	Prior to well construction or conversion, per 40 CFR 146.82(a)
Injection depth waiver application [40 CFR 146.82(d)]	Injection Depth Waivers and Aquifer Exemption Expansions module	A combination of uploaded files and references to previously submitted materials	Concurrent with the permit application, per 40 CFR 146.95(a)
Application to expand the areal extent of an aquifer exemption [40 CFR 144.7(d) and 146.4(d)]	Injection Depth Waivers and Aquifer Exemption Expansions module	A combination of uploaded files and references to previously submitted materials	Concurrent with the permit application (recommended)

### 3.1 Class VI Permit Applications

Permit application requirements for Class VI wells are specified at 40 CFR 146.82(a) and are summarized in the box below. To fulfill these requirements, a Class VI permit application must include multiple types of information with varying levels of technical complexity. Ideally, when considered together, the components of a Class VI permit application will present an integrated, site-specific strategy for demonstrating site suitability and USDW protection. Recommendations for submitting each of these components are provided in the following subsections.

The Project Information Tracking module of the GSDT helps prospective owners or operators to successfully navigate the Class VI permit application process. To reduce the potential for redundancy and to organize permit application components in a manner that facilitates efficient review by the permitting authority, the EPA recommends that Class VI permit applicants submit both:

1. A narrative describing characterization of the proposed site and project, overall strategies for project operations, and other general project information (compiled into a single file and submitted using the Project Information Tracking module of the GSDT).
2. Specific, detailed information required by certain Class VI Rule provisions (submitted using other GSDT modules, which are tailored to the applicable Class VI Rule requirements).

The Project Information Tracking module provides a narrative template that permit applicants can download, complete, and upload back to the module. The EPA strongly recommends that permit applicants use the template, which includes specific instructions and examples for each section of the narrative. The Project Information Tracking module also provides a checklist of other GSDT modules to be populated during the permit application process. Information submitted with these other modules does not need to be repeated in the narrative, and the

narrative template includes placeholders indicating where certain rule requirements can be fulfilled directly in the GSDT. Because of this, the EPA recommends that permit applicants review the relevant GSDT modules and/or user guides described below before developing the narrative, to avoid duplicating efforts or information.

While the GSDT modules associated with the permit application can be submitted in any order, the EPA recommends the following process. First, permit applicants should complete the general project information sections of the Project Information Tracking module (including the project name, contact information, list of existing permits, etc.). Second, they should populate and submit the modules used to provide detailed information. This includes both the modules associated with the required permit application components, such as the AoR and Corrective Action module, and (if applicable) any optional modules, such as the Alternative PISC Timeframe Demonstration module. Third, they should finish populating the 40 CFR 146.82(a) section of the Project Information Tracking module (by uploading the narrative and filling out the checklist) and submit it.

For ease of submission and to facilitate the permitting authority's evaluation, the EPA recommends that the 40 CFR 146.82(a) narrative be provided as a single portable document format (PDF) file. Supplemental materials that accompany the narrative but are not compatible with this format, such as tabular data, high-resolution images, or geographic information system (GIS) files like shapefiles, may be provided separately, using the module field designated for "any other information requested by the UIC Program Director."

Pursuant to 40 CFR 146.82, owners or operators of Class I, Class II, or Class V experimental technology wells that are converting to Class VI may incorporate pre-existing information into their permit applications by reference. However, to be compliant with this regulatory requirement and the requirement to electronically report information pursuant to 40 CFR 146.91(e), this referenced information must be current, readily available to the UIC Program Director, sufficiently identified to allow retrieval, and available in an electronic format. For example, certain maps and cross-sections included with a well's original permit application may already be on file; if they meet the requirements at 40 CFR 146.82 and 146.91(e), these materials could be referenced in the Class VI permit application

#### **Permit Application Requirements**

- Basic project information  
40 CFR 146.82(a)(1), (20)
- Site characterization information  
40 CFR 146.82(a)(2)-(3), (5)-(6)
- Proposed AoR and Corrective Action Plan and associated modeling data  
40 CFR 146.82(a)(4), (13)
- Financial responsibility demonstration  
40 CFR 146.82(a)(14)
- Injection well construction data  
40 CFR 146.82(a)(9), (11), (12)
- Proposed pre-operational testing program  
40 CFR 146.82(a)(8)
- Proposed operating data  
40 CFR 146.82(a)(7), (10)
- Proposed Testing and Monitoring Plan  
40 CFR 146.82(a)(15)
- Proposed Injection Well Plugging Plan  
40 CFR 146.82(a)(16)
- Proposed PISC and Site Closure Plan  
40 CFR 146.82(a)(17), (18)
- Proposed Emergency and Remedial Response Plan  
40 CFR 146.82(a)(19)
- Any other information requested by the UIC Program Director  
40 CFR 146.82(a)(21)

instead of being re-submitted. The EPA encourages applicants interested in referencing information from previous permits to consult with their permitting authority and to consider the benefits of ensuring a complete record of the project within the GSDT for the duration of a Class VI project.

The EPA considers a permit application to be submitted when all associated components have been received in a way that complies with 40 CFR 146.91(e). Because of the technical complexity of a Class VI permit application, the EPA expects that the permitting process will be an iterative one. Permitting authorities may need to ask clarifying questions, request additional information, or discuss the content of the application with prospective owners or operators. (As described in Section 2.4, the GSDT's Information Request module will facilitate written communications between permit applicants and permitting authorities during this process.) Permit applicants should contact their permitting authority with any specific questions about the Class VI permit application review process.

### 3.1.1 Site Characterization

Site characterization information required under 40 CFR 146.82(a) includes information on the geologic, geomechanical, and hydrogeologic characteristics of the proposed storage site (including the proposed injection zone and overlying formations), as well as baseline geochemical data and other information on USDWs in the AoR. This information is used to demonstrate that the site meets the minimum criteria for suitability specified at 40 CFR 146.83,

and it also serves as the foundation, informing plans for site operation, computational modeling, testing and monitoring, and other aspects of the project.

#### Site Characterization Submissions

##### Class VI Rule requirements:

- 40 CFR 146.82(a)(2)-(3), (5)-(6)
- 40 CFR 146.83

##### Relevant GSDT modules:

- Project Information Tracking module
- AoR and Corrective Action module

##### Reference documents:

- *UIC Program Class VI Well Site Characterization Guidance*

##### Electronic resources:

- 40 CFR 146.82(a) narrative template
- GSDT user guides

Preparing the site characterization component of a Class VI permit application generally involves both desktop analysis of secondary information and the collection of primary data in the field, such as ground water sampling or geophysical surveying. Some of these analyses may be supported with literature reviews and summaries of existing information about the site. The *UIC Program Class VI Well Site Characterization Guidance* presents recommendations for gathering necessary data and demonstrating the suitability of a proposed GS site.

The site characterization material can be incorporated into the 40 CFR 146.82(a) narrative template,

available in the Project Information Tracking module of the GSDT. The narrative should integrate the information specified under 40 CFR 146.82(a)(2)-(3) and (5)-(6) to demonstrate a clear and data-driven understanding of the site and show how the site meets the criteria at 40 CFR 146.83. When the narrative is complete, it should be submitted using the Project Information Tracking module as part of the permit application. Note that certain site-related information will also be provided as part of the AoR delineation submission in the AoR and Corrective Action module (see Section 3.1.2).

As stated above, the EPA recommends that the 40 CFR 146.82(a) narrative be provided as a single PDF file, with supplemental materials provided separately using the module field designated for “any other information requested by the UIC Program Director.” Supplemental materials, such as legacy data, historical maps, or similar materials should be legible and clear (e.g., contour lines are unambiguous, legends are visible, acronyms are defined, images have an appropriate scale, etc.). If secondary data are used, sources should be clearly cited to support an evaluation of this information. For primary data, relevant reference information—such as the date/time, location/depth, method name, test conditions, assumptions, limitations, quality assurance (QA) protocols, etc.—associated with a sampling event should be included. This reference information is particularly important for baseline data, such as that required by 40 CFR 146.82(a)(6), because it will be used as a point of comparison for future monitoring results. If calculations or experimental results are provided in the permit application, the permitting authority will likely ask for documentation of assumptions and methods used to interpret the results.

The Class VI Rule recognizes that project sites will have varying levels of pre-existing information and that some data submitted with a permit application will be preliminary. As part of the site characterization narrative, the EPA recommends discussing data gaps and uncertainties that will be addressed through the formation testing program and other activities conducted after well construction/conversion, but before receiving authorization to inject (see Section 3.1.5 and Section 4). The ultimate goal of the site characterization information is to demonstrate that the site is suitable, pursuant to 40 CFR 146.83; the EPA encourages permit applicants to include any additional information they deem necessary to support this demonstration even if it is not explicitly identified in the rule.

Because many of the Class VI Rule requirements are designed to be site-specific, site characterization information forms the foundation for several other components of the permit application. Therefore, site characterization materials should be consistent with related permit application components. For example, site parameters entered into the AoR and Corrective Action module for the critical pressure calculation should not conflict with the content of the narrative. More broadly, the site characterization submission should support the other site-specific aspects of the permit application, such as the proposed well construction procedures, the injection and post-injection phase testing and monitoring strategies, the Emergency and Remedial Response Plan, etc.

Permit applicants should contact their permitting authority if questions arise about whether a certain type of information is necessary or if the recommended level of detail is unclear. The EPA recommends discussion of how certain Class VI Rule requirements apply to an individual project (e.g., whether a secondary confining zone is necessary) before permit application submittal.

### **3.1.2 AoR and Corrective Action**

The Class VI Rule, at 40 CFR 146.84(a), requires that the well’s AoR be delineated using computational modeling that accounts for the physical and chemical properties of all phases of the injected carbon dioxide stream, based on available site characterization, monitoring, and operational data. The purpose of this effort is to delineate a project area where USDWs may be

endangered due to the injection activity. AoR delineation also supports other components of the permit application and the project as a whole, such as defining the area where corrective action may be needed, determining financial responsibility cost estimates, developing project-specific testing and monitoring strategies for the injection and post-injection phases, and supporting alternative PISC timeframe demonstrations.

In the pre-construction phase, delineation of the AoR relies on existing site data and proposed project information. As new information becomes available throughout the lifetime of the project, the AoR will need to be reevaluated pursuant to 40 CFR 146.84(e). Therefore, permit applicants must submit an AoR and Corrective Action Plan that proposes site-specific procedures for delineating the AoR and periodically reevaluating this delineation, as well as for performing any necessary corrective action [40 CFR 146.84(b)]. In addition, 40 CFR 146.82(a)(4) specifically requires permit applicants to provide a tabulation of wells in the AoR to support the corrective action evaluation.

The computational modeling effort is the primary focus of the AoR and corrective action components of the permit application. However, in addition to the modeling information, well data (e.g., from state oil and gas databases) and proposed procedures for conducting AoR reevaluations and performing corrective action must also be submitted to fulfill Class VI Rule requirements under 40 CFR 146.84. Detailed information on model development and AoR delineation can be found in the *UIC Program Class VI Well Area of Review Evaluation and Corrective Action Guidance* and recommendations for developing project plans is presented in the *UIC Program Class VI Well Project Plan Development Guidance*.

The AoR and Corrective Action Plan and the detailed information that supports it (e.g., computational modeling data such as simulator information and model input, assumptions, output, etc., and the tabulation of wells in the AoR) can all be submitted using the AoR and Corrective Action module. This module contains a plan template that can be downloaded, populated, and uploaded back to the module. Recommendations for compiling and providing each component of the AoR and corrective action submittal are provided in the subsections below.

It may be helpful for permit applicants to discuss any questions related to data files and formats with their permitting authority prior to entering the information into the AoR and Corrective Action module. The EPA recommends that applicants work with their permitting authority to identify the best approach for submitting project-specific modeling information; this will also help the permitting authority determine the most efficient and effective process to evaluate this information. Following successful submission of information in the AoR and Corrective Action

### **AoR and Corrective Action Submissions**

#### Class VI Rule requirements:

- 40 CFR 146.82(a)(4), (13)
- 40 CFR 146.84

#### Relevant GSDT modules:

- Project Information Tracking module
- AoR and Corrective Action module

#### Reference documents:

- *UIC Program Class VI Well Area of Review Evaluation and Corrective Action Guidance*
- *UIC Program Class VI Well Project Plan Development Guidance*

#### Electronic resources:

- AoR and Corrective Action Plan template
- GSDT user guides

module, the relevant boxes in the Project Information Tracking module can be checked. Note that the permitting authority's evaluation depends on the submission of complete, accurate, and consistent information and cannot be completed before the full set of information is submitted.

### ***AoR and Corrective Action Plan***

The detailed computational modeling and corrective action data submitted via the AoR and Corrective Action module represent essential supporting information for the AoR and Corrective Action Plan. However, it is the plan itself that will be incorporated into the Class VI permit and will become directly enforceable per 40 CFR 146.84(b). In the plan, permit applicants should explain how they will demonstrate compliance with the Class VI requirements relevant to AoR delineation, corrective action, AoR reevaluation, and the plan itself. The EPA recommends that the plan consist of a narrative that describes procedures for delineating the AoR using computational modeling, addressing all deficient artificial penetrations within the AoR, and reevaluating the AoR periodically throughout the life of the project.

The EPA recommends that the AoR and Corrective Action Plan be provided as a single PDF file, uploaded to the AoR and Corrective Action module. As noted above, a template is available in the module to guide development of this document. The template was designed to help ensure that the plan meets all the Class VI Rule requirements while allowing for project-specific flexibility. Within the standardized format of the template, applicants are encouraged to tailor their plans to the needs of their particular projects. Information submitted elsewhere in the AoR and Corrective Action module may be referenced in the narrative (e.g., in the context of describing how the information is used in the delineation process, how it supports the proposed strategies for the corrective action or AoR reevaluation, etc.). Cross-references to other GSDT submittals are also encouraged wherever appropriate.

Pursuant to 40 CFR 146.84(b), the requirement to maintain and implement the AoR and Corrective Action Plan is directly enforceable regardless of whether that requirement is a condition of the Class VI permit. Supplemental or supporting material that informs evaluation of the plan but is not intended to become an enforceable requirement for the project (e.g., reference documents, descriptions of alternative methods considered for AoR delineation, etc.) should not be incorporated into the plan file but should be submitted elsewhere in the module.

### ***Detailed Computational Modeling and Corrective Action Data***

The EPA recommends that permit applicants submit all information that the UIC Program Director would need for an independent evaluation of the AoR delineation and the associated corrective action strategy. The AoR and Corrective Action module of the GSDT provides a structured approach to submitting (and, later, updating) the detailed data that support the narrative portion of the modeling information. This information serves to benchmark the AoR delineation at this phase, to provide continuity in decision making and support AoR reevaluations and the non-endangerment demonstration in later phases of the project.

The AoR and Corrective Action module facilitates submission of the following categories of information: model domain, processes modeled, rock properties, boundary conditions, initial conditions, operational information, model output, AoR pressure front delineation, and corrective

action. The module prompts users to provide information in several formats, including image files, tabular data, and short written descriptions. The EPA recommends following the instructions in the module itself and in the associated user guide to ensure that the appropriate type of information is submitted. Explanations for all data files, either in the file itself or in the description/comment fields of the module, should be submitted so that the data can be understood and evaluated appropriately. Explanations should include a description of what is included in each file, how the data are formatted, and any necessary identifying information (e.g., model domain coordinates, simulation duration, etc.). Because an important component of the permitting authority's review is evaluating the degree to which the model simulates actual conditions, all site-related information should be clearly presented and consistent with the site characterization narrative.

The EPA recognizes that some Class VI permit applications may rely on proprietary models, software, or inputs. Users should submit only non-proprietary information with the GSDT. The AoR and Corrective Action module does not necessitate user submittal of actual models or code—only the parameters, assumptions, results, and other supporting information that will allow the permitting authority to fully evaluate the AoR delineation are required. Also, remember that the GSDT is not designed to accept CBI. If permit applicants would like to claim information as CBI or otherwise discuss the possibility of submitting data outside of the GSDT, they should contact their permitting authority for further information and instructions.

In addition to the actual modeling data, the module includes a section for corrective action data. Users are encouraged to submit the population of wells in the AoR either in a tabular format (e.g., .CSV) or as a GIS file (e.g., shapefile). The well construction/plugging information required by 40 CFR 146.82(a)(4)—well type, construction, date drilled, depth, record of plugging and/or completion—can also be included directly in this file (e.g., as metadata associated with a shapefile).

Permit applicants should contact their permitting authority if they have questions about how to submit modeling information, e.g., to determine if certain file types are acceptable or for clarification on how to format output data. It may also be helpful to discuss how to most efficiently submit related information, such as modeling information associated with an alternative PISC timeframe demonstration. While the AoR and Corrective Action module provides flexibility in choosing the file formats for submission, the EPA recommends that permit applicants discuss which file formats to use, as well as any other questions they may have, with their permitting authority. This communication can help determine the best approach(es) for submitting this information and will facilitate the technical evaluation conducted by the permitting authority.

### **3.1.3 Financial Responsibility Demonstration**

The Class VI Rule, at 40 CFR 146.85, requires owners or operators of Class VI wells to demonstrate and maintain financial responsibility for performing corrective action, injection well plugging, PISC, site closure, and emergency and remedial response. The purpose of the financial responsibility demonstration submitted with the permit application, required by 40 CFR 146.82(a)(14), is to ensure that sufficient resources exist to carry out activities related to closing and (if necessary) remediating GS sites so that they do not endanger USDWs.

The financial responsibility demonstration in the permit application has two main components: cost estimates for the applicable project activities and financial instruments sufficient to cover those costs. Pursuant to 40 CFR 146.85(c), the cost estimate must reflect costs of hiring a third party to perform the required activities; as a result, the EPA expects that the cost estimate provided as part of the permit application will be an independent estimate generated by an organization that is not within the corporate structure of the owner or operator. Most financial instruments will be generated by a financial institution, but this depends on the instrument type. More detailed information on developing the financial responsibility demonstration is given in the *UIC Program Class VI Financial Responsibility Guidance*. Additional EPA resources that may be helpful for permit applicants are available at <http://www.epa.gov/uic/financial-responsibilities-underground-injection-well-owners-or-operators>.

#### **Financial Responsibility Submissions**

##### Class VI Rule requirements:

- 40 CFR 146.82(a)(14)
- 40 CFR 146.85

##### Relevant GSDT modules:

- Project Information Tracking module
- Financial Responsibility Demonstration module

##### Reference documents:

- *UIC Program Class VI Financial Responsibility Guidance*

##### Electronic resources:

- Online materials at <http://www.epa.gov/uic/financial-responsibilities-underground-injection-well-owners-or-operators>
- GSDT user guides

Both the cost estimate and the financial instruments are submitted using the Financial Responsibility Demonstration module. For the cost estimate, permit applicants should enter the costs for each covered activity and upload the independent cost estimate. Applicants may also include supplemental materials, such as engineering reports, that support the estimate.

Similarly, for the financial instruments, owners or operators should make the selections on the appropriate tab(s) and upload copies of the instrument(s) and/or documents that prove the third-party instrument or self-insurance is in place and sufficient to cover the estimated costs. Because banks, insurers, or other financial institutions may not provide the specific instruments until the applicant is prepared to purchase them, the initial permit application may only contain information about the types of financial instruments to be used rather than the instruments themselves. For insurance policies, the EPA recommends that a copy of the

policy be included in addition to the certificate of insurance, when it is available. Some instruments have special requirements; for example, the owner or operator must document the financial strength of the provider pursuant to 40 CFR 146.85(a)(6)(ii) for third-party instruments. The instructions within the Financial Responsibility Demonstration module guide the submission of information to fulfill these requirements.

Permit applicants should contact their permitting authority if they have questions about what information is necessary to include in the financial responsibility demonstration. It may be appropriate to request a preliminary, informal review of one or more aspects of the cost estimate before finalizing decisions about which financial instrument(s) to obtain. The Financial Responsibility Demonstration module is designed to accommodate this review by allowing cost estimate and financial instrument submissions to be made at different times. However, note that the permit application (as a whole) will not be considered complete until all components

(including either copies of financial instruments or descriptions of the instruments to be secured) are successfully submitted.

### 3.1.4 Well Construction and Operation

As part of the permit application, prospective owners or operators must submit proposed construction and operating data for the Class VI project, including:

- Proposed operational parameters and injectate characteristics [40 CFR 146.82(a)(7)].
- Proposed stimulation program, if applicable [40 CFR 146.82(a)(9)].
- Proposed operating procedures, outlining the steps necessary to conduct injection operation [40 CFR 146.82(a)(10)].
- Schematics or other appropriate drawings of injection well construction [40 CFR 146.82(a)(11)].
- Proposed injection well construction procedures [40 CFR 146.82(a)(12)].

These materials must meet the requirements at 40 CFR 146.86 (to demonstrate that the planned well construction is adequate to prevent movement of fluids into USDWs or other unauthorized zones) and at 40 CFR 146.88 (to demonstrate that the proposed operational procedures will be protective of USDWs). Refer to the *UIC Program Class VI Well Construction Guidance* for information on designing and constructing an injection well that meets the Class VI Rule requirements.

Permit application components associated with these requirements will likely be a combination of narrative description (including tables, charts, etc.) and figures/illustrations (such as from computer-aided design programs). This material can be incorporated into the 40 CFR 146.82(a) narrative, using the template provided in the Project Information Tracking module. As noted above, the EPA recommends that the 40 CFR 146.82(a) narrative be provided as a single PDF file. Supplemental materials that accompany the narrative but are not compatible with this format (such as high-resolution images) may be provided separately, using the module field designated for “any other information requested by the UIC Program Director.” Regardless of whether schematics and other images are incorporated into the narrative or provided separately, they should be legible and clear (e.g., legends and scales included, labels visible, etc.).

Specifically, the EPA recommends that the well schematics/drawings include the following elements: the wellhead; the surface casing, long-string casing, and any intermediate casings;

#### Well Construction and Operation Submissions

##### Class VI Rule requirements:

- 40 CFR 146.81(c)
- 40 CFR 146.82(a)(7), (9)-(12)
- 40 CFR 146.86
- 40 CFR 146.88

##### Relevant GSDT modules:

- Project Information Tracking module

##### Reference documents:

- *UIC Program Class VI Well Construction Guidance*

##### Electronic resources:

- 40 CFR 146.82(a) narrative template
- GSDT user guides

cement placement; the tubing and packer; the type and location of the safety valve(s) and any landing nipples, if used; and proposed completion details, including perforated zones and construction materials to be used. Examples of other documentation that may be submitted to demonstrate compliance with the construction requirements include: copies of construction specifications, references to any standards or best management practices to be followed during construction, and manufacturer specifications on materials used for well construction (e.g., corrosion and temperature resistance ratings or material strengths).

Pursuant to 40 CFR 146.81(c), owners or operators of Class I, Class II, or Class V experimental technology wells transitioning to Class VI do not need to meet the specific construction requirements at 40 CFR 146.86(b). Instead, they must demonstrate that their wells were engineered and constructed to meet the requirements at 40 CFR 146.86(a) and to ensure protection of USDWs. For example, an owner or operator might demonstrate adequate materials strength by providing computations showing calculated down-hole stresses on the casing, tubing, cement, and packer. Because this demonstration will be specific to each individual well, the EPA recommends that affected owners or operators communicate with their permitting authorities before submitting a Class VI permit application, to determine what information will be necessary to make the demonstration.

The EPA also recommends pre-construction discussions between permit applicants and permitting authorities if site- or project-specific considerations may require alternative construction procedures. For example, if cement cannot be recirculated to the surface, the UIC Program Director may approve an alternative method of cementing; if this is the case, owners or operators must submit logs to demonstrate that the cement does not allow fluid migration behind the well bore, pursuant to 40 CFR 146.86(b)(4). Appropriate communication with the permitting authority in the pre-construction stage will help ensure a more efficient permitting process. Additionally, this communication can help streamline the pre-operational testing process (see Section 4) because it provides an opportunity for permitting authorities and owners or operators to discuss whether any additional or alternative methods may be necessary to meet the requirements at 40 CFR 146.87.

### **3.1.5 Pre-Operational Testing Program**

With the permit application, the prospective owner or operator must submit a proposed pre-operational well and formation testing program to verify proper construction of the well and obtain an analysis of the chemical and physical characteristics of the injection zone(s) and confining zone(s) [40 CFR 146.82(a)(8)]. This proposed program must meet the requirements at 40 CFR 146.87, which include elements related to both site characterization (to reduce uncertainties associated with site characterization and the AoR delineation) and well integrity (to demonstrate that the well itself will not create a pathway for fluid migration into USDWs). The resulting data from these logs and tests will form the foundation of the pre-operation submissions under 40 CFR 146.82(c), as described in Section 4.

The Class VI Rule, at 40 CFR 146.87, specifies certain minimum requirements or options for the pre-operational testing program. Beyond that, owners or operators have the flexibility to design a program that will collect sufficient information about the well's integrity and the geology of the site to inform a determination that USDWs will be protected. Both the *UIC Program Class VI*

*Well Site Characterization Guidance* and the *UIC Program Class VI Well Construction Guidance* provide recommendations for this process.

The EPA recommends that the description of the proposed pre-operational testing program be submitted as a single PDF containing the necessary narrative description, tables/charts, maps, etc. While this submission is part of the permit application, it is uploaded separately in the Pre-Operational Testing module. This module will be used during the pre-operation phase to provide the results of the logging and testing (see Section 4); using the same module for the proposed activities and their results helps to ensure that all necessary materials are easily accessible for review (both by the owner or operator, when submitting the logging and testing results, and by the permitting authority, during evaluation of this material). The box indicating the submission of the pre-operational testing program in the Project Information Tracking module should be checked when finalizing the permit application submission.

Permit applicants should contact their permitting authority with questions about what materials to include in the pre-operational testing program submission. The Class VI Rule, at 40 CFR

#### **Pre-Operational Testing Program Submissions**

##### Class VI Rule requirements:

- 40 CFR 146.82(a)(8)
- 40 CFR 146.87

##### Relevant GSDT modules:

- Project Information Tracking module
- Pre-Operational Testing module

##### Reference documents:

- *UIC Program Class VI Well Site Characterization Guidance*
- *UIC Program Class VI Well Construction Guidance*

##### Electronic resources:

- GSDT user guides

147.87(a)(5), allows permit applicants to use alternative logging and testing methods that provide equivalent or better information, provided that they are approved by the UIC Program Director. The UIC Program Director may also require the use of alternative methods. The EPA recommends discussing the potential use of alternative methods with the permitting authority prior to submitting a permit application.

Owners or operators of existing wells transitioning to Class VI must demonstrate that the wells were engineered and constructed to meet the requirements at 40 CFR 146.86(a) and to ensure protection of USDWs, in lieu of conducting the logs/tests specified at 40 CFR 146.87(a). As with the construction requirements, the EPA recommends that owners or operators discuss the content of this demonstration with their permitting authorities to determine what, if any, information may be needed, e.g., results of

previous mechanical integrity tests (MITs) or data that may have been collected during the construction of the well. Note that owners or operators of transitioning wells are responsible for meeting all other requirements at 40 CFR 146.87.

### **3.1.6 Testing and Monitoring**

The Class VI Rule, at 40 CFR 146.82(a)(15) requires permit applicants to submit a Testing and Monitoring Plan describing how they will meet the requirements at 40 CFR 146.90. The Testing and Monitoring Plan describes the permit applicant's strategies for identifying potential endangerment of USDWs, demonstrating that the well is maintaining mechanical integrity, that

the project is operating as planned, and that the carbon dioxide plume and pressure front are behaving as predicted.

Testing and monitoring results are the primary method of assessing the performance of the project and provide points of comparison for modeled predictions. As a result, the Testing and Monitoring Plan should present data collection methods sufficient to support AoR reevaluations, demonstrations of whether project plan amendments or financial responsibility cost estimate updates are needed, and the non-endangerment demonstration that will be made before site closure. The *UIC Program Class VI Well Testing and Monitoring Guidance* and the *UIC Program Class VI Well Project Plan Development Guidance* provide recommendations for developing a plan that will meet the rule requirements and lead to the collection of the necessary data.

A template for the Testing and Monitoring Plan is available in the Project Plan Submissions module. Like the templates for the other Class VI project plans, this template was designed to help ensure that the plan meets all the Class VI Rule requirements while allowing for project-specific flexibility; within the standardized format of the template, applicants are encouraged to tailor their plans to the needs of their particular projects. The EPA recommends that the plan be provided as a single PDF that includes the Quality Assurance and Surveillance Plan (QASP) required by 40 CFR 146.90(k). Upload the completed plan to the Project Plan Submissions module. The box indicating the submission of the Testing and Monitoring Plan in the Project Information Tracking module should be checked when finalizing the permit application submission.

Pursuant to 40 CFR 146.90, the requirement to maintain and implement the Testing and Monitoring Plan is directly enforceable regardless of whether that requirement is a condition of the Class VI permit. There may be supplemental or supporting material that would inform evaluation of the submission but does not need to be in the enforceable plan (e.g., reference documents or example specifications from equipment vendors). These materials can instead be uploaded through the designated field in the module.

Permit applicants should contact their permitting authority if they have questions about what to include in the Testing and Monitoring Plan or QASP (including which information to include in the QASP rather than in the body of the plan). It may also be appropriate to discuss whether alternative/additional monitoring activities (e.g., surface air and/or soil gas monitoring, seismicity monitoring, alternative MITs, etc.) may be necessary for a given project.

#### **Testing and Monitoring Submissions**

##### Class VI Rule requirements:

- 40 CFR 146.82(a)(15)
- 40 CFR 146.90

##### Relevant GSDT modules:

- Project Information Tracking module
- Project Plan Submissions module

##### Reference documents:

- *UIC Program Class VI Well Testing and Monitoring Guidance*
- *UIC Program Class VI Well Project Plan Development Guidance*

##### Electronic resources:

- Testing and Monitoring Plan template
- GSDT user guides

### 3.1.7 Injection Well Plugging

Class VI permit applicants must submit an Injection Well Plugging Plan that describes how the owner or operator will meet the requirements at 40 CFR 146.92 [40 CFR 146.82(a)(16)]. As described at 40 CFR 146.92(b), the plan includes information such as planned tests or measures to determine bottom-hole reservoir pressure and ensure external mechanical integrity; the type and number of plugs to be used; the planned placement of each plug; the type, grade, and quantity of material to be used in plugging; and the proposed method for plug placement.

#### Injection Well Plugging Submissions

##### Class VI Rule requirements:

- 40 CFR 146.82(a)(16)
- 40 CFR 146.92

##### Relevant GSDT modules:

- Project Information Tracking module
- Project Plan Submissions module

##### Reference documents:

- *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*
- *UIC Program Class VI Well Project Plan Development Guidance*

##### Electronic resources:

- Injection Well Plugging Plan template
- GSDT user guides

Similar to the injection well construction component of the permit application, the EPA recommends that the Injection Well Plugging Plan consist of narrative description and schematics or other illustrations. As with the other Class VI project plans, a recommended template is provided in the Project Plan Submissions module of the GSDT. The template can be tailored as appropriate to reflect project-specific considerations and uploaded after completion to the Project Plan Submissions module. Any supplemental or supporting material should be submitted in the designated field, and the associated box in the Project Information Tracking module should be checked.

Permit applicants should contact their permitting authority if they have questions about what to include in the Injection Well Plugging Plan or if they wish to

discuss whether alternative/additional activities (e.g., alternative MITs) may be appropriate for a given project.

### 3.1.8 PISC and Site Closure

The Class VI Rule, at 40 CFR 146.82(a)(17), requires permit applicants to submit a PISC and Site Closure Plan that proposes post-injection monitoring strategies, describes how non-endangerment of USDWs will be ensured throughout the post-injection phase, and provides procedures for site closure in compliance with 40 CFR 146.93. Proper post-injection monitoring and site closure procedures ensure that neither the injectate nor any mobilized fluids/increased pressures endanger USDWs. The applicant may also submit a request for a PISC timeframe other than the 50-year default, pursuant to 40 CFR 146.82(a)(18).

Both the PISC and Site Closure Plan and the alternative PISC timeframe demonstration (if applicable) rely on predictions from the AoR modeling effort to support decisions about post-injection activities. As a result, narrative descriptions in these submissions should be accompanied by charts, graphs, tables, maps, and/or other materials showing the relevant results from the AoR delineation modeling process. Refer to the *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance* and the *UIC Program Class VI Well Project*

*Plan Development Guidance* for recommendations on preparing the PISC and Site Closure Plan and proposing an appropriate alternative PISC timeframe.

Like the other Class VI project plans, the PISC and Site Closure Plan can be completed using a template available in the Project Plan Submissions module. Pursuant to 40 CFR 146.93(a)(2)(v), the plan must state the duration of the PISC timeframe and demonstrate that this timeframe provides for an adequate duration of post-injection monitoring to ensure that the carbon dioxide plume and pressure front will not endanger USDWs. However, because of the specificity and technical complexity of the requirements for this demonstration, the EPA has designed a separate GSDT module to guide permit applicants through submitting the detailed data required to support an alternative PISC timeframe request. Permit applicants may refer to material submitted using this Alternative PISC Timeframe Demonstration module in their plans to meet the requirements at 40 CFR 146.93(a)(2)(v). Considerations for submitting both of these items are provided below.

#### **PISC and Site Closure Submissions**

##### Class VI Rule requirements:

- 40 CFR 146.82(a)(17)-(18)
- 40 CFR 146.93

##### Relevant GSDT modules:

- Project Information Tracking module
- Project Plan Submissions module
- Alternative PISC Timeframe Demonstration module

##### Reference documents:

- *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*
- *UIC Program Class VI Well Project Plan Development Guidance*

##### Electronic resources:

- PISC and Site Closure Plan template
- GSDT user guides

When finalizing the permit application submission in the Project Information Tracking module, the box indicating submittal of a PISC and Site Closure Plan and (if applicable) an alternative PISC timeframe demonstration should be checked.

#### ***PISC and Site Closure Plan***

While the PISC and Site Closure Plan must include the components specified by 40 CFR 146.93(a), the Class VI Rule allows for substantial flexibility regarding the post-injection testing and monitoring program. The PISC and Site Closure Plan template available for download in the Project Plan Submissions module provides a general structure for the plan, but it should be tailored to the needs of a particular project. In addition to the items specified in the Class VI Rule, the EPA encourages permit applicants to include criteria for the non-endangerment demonstration so that expectations for this demonstration are established from the beginning of the project.

As with other Class VI project plans, the EPA recommends that the PISC and Site Closure Plan be provided as a single PDF, with supplemental or supporting material not intended to be part of the enforceable plan uploaded separately in the designated GSDT module field. Any schematics or other images (e.g., for modeling results or monitoring well plugging) should be legible and clear. The EPA also recommends that permit applicants either include a copy of the QASP from the Testing and Monitoring Plan in the PISC and Site Closure Plan, or incorporate it into the PISC and Site Closure Plan by reference.

Permit applicants should contact their permitting authority if they have questions about what to include in the PISC and Site Closure Plan (e.g., how best to incorporate AoR modeling results or how to refer to information submitted with the Alternative PISC Timeframe Demonstration module) or if they wish to discuss the development of appropriate non-endangerment demonstration criteria.

### ***Alternative PISC Timeframe***

As stated above, the GSDT includes a separate module for the detailed data that support an alternative PISC timeframe demonstration. It can be used as a guide to ensure that all necessary information is provided to inform the permitting authority's decision-making process. Several of the requirements at 40 CFR 146.93(c) are related to other components of the permit application, such as site characterization and AoR delineation modeling. The Alternative PISC Timeframe Demonstration module allows users to submit a combination of new information and cross-references to materials submitted using other GSDT modules. Provided that the references are sufficiently specific and that the referenced material fulfills the specified requirement, no duplicate information needs to be submitted as part of the alternative PISC timeframe demonstration.

Some projects may not have sufficient data available in the pre-construction (or pre-operation) phase to demonstrate that an alternative PISC timeframe will be protective of USDWs. However, pursuant to 40 CFR 146.93(b)(2), an owner or operator may make a non-endangerment demonstration before the end of the timeframe specified in the PISC and Site Closure Plan, regardless of whether an alternative timeframe has been approved during permitting. The EPA recommends that, where possible, permit applicants and permitting authorities discuss this possibility at the outset of a project (for this reason, the EPA encourages owners or operators to identify criteria for the non-endangerment demonstration at the time of the permit application). Also, permit applicants should contact their permitting authority if they wish to discuss any

project-specific considerations related to the alternative PISC timeframe, such as whether additional site-specific factors will need to be included in the demonstration per 40 CFR 146.93(c)(xi).

#### **Emergency and Remedial Response Submissions**

##### Class VI Rule requirements:

- 40 CFR 146.82(a)(19)
- 40 CFR 146.94

##### Relevant GSDT modules:

- Project Information Tracking module
- Project Plan Submissions module

##### Reference documents:

- *UIC Program Class VI Well Project Plan Development Guidance*

##### Electronic resources:

- Emergency and Remedial Response Plan template
- GSDT user guides

### **3.1.9 Emergency and Remedial Response**

The Emergency and Remedial Response Plan is required by 40 CFR 146.82(a)(19). Emergency and remedial response planning pursuant to 40 CFR 146.94 helps ensure an expeditious and appropriate response to protect USDWs from endangerment in the event of an emergency during the lifetime of a Class VI project.

The Class VI Rule, at 40 CFR 146.94(a), does not specify the content of the Emergency and Remedial Response Plan; instead, the permit applicant must

provide appropriate site-specific information. The EPA anticipates that the Emergency and Remedial Response Plan will be a narrative report that may be supported by data sets and maps or other images (e.g., of potentially affected environmental resources or infrastructure such as public water system drinking water supply wells). The *UIC Program Class VI Well Project Plan Development Guidance* provides further recommendations for developing the plan.

The EPA recommends that permit applicants download the plan template from the Project Plan Submissions module, populate it with project-specific information, and submit it through the same module as a single PDF. As with the other Class VI project plans, applicants are encouraged to tailor their submissions to the needs of their particular projects; this is particularly important given the flexibility in the Class VI Rule requirements for emergency and remedial response. Any supplemental or supporting material not intended to be part of the enforceable plan can be uploaded separately in the designated GSDT module field.

Permit applicants should contact their permitting authority to discuss any questions related to the content of the Emergency and Remedial Response Plan or how proposed emergency and remedial response procedures may affect other aspects of the permit application.

### 3.2 Injection Depth Waivers

The Class VI Rule, at 40 CFR 146.95(a), requires owners or operators seeking a waiver of the Class VI injection depth requirements to submit additional information for a comprehensive assessment of site suitability to inject into a non-USDW above or between USDWs. Owners or operators must submit a waiver application report concurrent with the Class VI permit application [40 CFR 146.82(d) and 146.95(a)].<sup>5</sup> The waiver application report is a separate submittal which complements the Class VI permit application.

The EPA expects that the waiver application report will contain some information that is similar to (or references) information submitted in the permit application. However, the submittal must be tailored to demonstrate that all USDWs—above and below the injection zone—will be protected. There are also additional requirements that apply only to owners or operators requesting injection depth waivers. For more information, see the *UIC Program Class VI Well Injection Depth Waivers Guidance*.

The EPA recommends that injection depth waiver applications contain the same information

#### Injection Depth Waiver Requirements

- Suitability of the injection and confining zones  
40 CFR 146.95(a)(1)-(2)
- Computational modeling information  
40 CFR 146.95(a)(3)
- Injection well construction information  
40 CFR 146.95(a)(4)
- Testing and monitoring information  
40 CFR 146.95(a)(5)
- Water resource information  
40 CFR 146.95(a)(6)
- Any other information requested by the UIC Program Director to support the EPA Regional Administrator's evaluation  
40 CFR 146.95(a)(7)

<sup>5</sup> Should a USDW be identified below the injection zone after a Class VI project is permitted or operational, the requirements at 40 CFR 146.95 would apply and this section would remain applicable to such submittals.

types/data formats as Class VI permit applications, including narrative descriptions, tabular data, maps (in flat images and/or GIS files such as shapefiles), charts/graphs, construction schematics, and other types of visual information. As with all Class VI submissions, the files should be legible and clear (e.g., contour lines unambiguous, legends visible, acronyms defined, images have an appropriate scale, etc.). Sources of secondary data should be clearly cited. Primary data should include relevant reference information such as the date/time, location/depth, method name, test conditions, assumptions, limitations, QA protocols, etc., associated with a sampling event.

Injection depth waiver application reports are submitted using the Injection Depth Waiver and Aquifer Exemption Expansion module of the GSDT. In recognition that some aspects of the waiver application report may be the same as components of the permit application, the module allows users to submit a combination of new information and cross-references to materials

#### **Injection Depth Waiver Submissions**

##### Class VI Rule requirements:

- 40 CFR 146.82(d)
- 40 CFR 146.95

##### Relevant GSDT modules:

- Project Information Tracking module
- Injection Depth Waivers and Aquifer Exemption Expansions module

##### Reference documents:

- *UIC Program Class VI Well Injection Depth Waivers Guidance*

##### Electronic resources:

- GSDT user guides

submitted using other GSDT modules. Cross-references should point specifically to the relevant parts of the permit application (e.g., references to particular pages or subsections, rather than to an entire project plan) to facilitate the review. Also, referenced material should be sufficient to meet the applicable requirements for both the permit application and the injection depth waiver application report. When finalizing the permit application in the Project Information Tracking module, the owner or operator should check the box indicating application for an injection depth waiver.

Pursuant to 40 CFR 146.95(b)-(d), the determination to grant an injection depth waiver for a given Class VI project is the responsibility of the EPA Regional Administrator (even in states with primacy for implementing the Class VI program). This

determination is based not only on information provided by the permit applicant but also on consultation with the Public Water System Supervision (PWSS) Director(s) of the state(s) and/or tribe(s) in the AoR. Therefore, submitting a complete injection depth waiver application report via the GSDT is not a guarantee that a waiver will be granted.

The EPA recommends that owners or operators contact their permitting authorities before submitting an injection depth waiver application report to discuss any site-specific factors that may affect the development of the report. For example, the Class VI Rule, at 40 CFR 146.95(a)(7), gives the UIC Program Director the discretion to request any other information needed to inform the EPA Regional Administrator's decision to issue a waiver. This may include a subset of the information listed at 40 CFR 146.95(b). Discussing what additional information may be necessary to submit at the beginning of the process will help support efficiency and reduce the need for additional information requests after the report is submitted.

### 3.3 Aquifer Exemption Expansions

No new aquifer exemptions will be granted for Class VI wells [40 CFR 144.7(a)]. However, if an owner or operator of a Class II enhanced recovery well injecting into an exempted aquifer makes the business decision to transition to Class VI, the owner or operator may request an expansion of the areal extent of the previously approved aquifer exemption [40 CFR 144.7(d)], provided they demonstrate that the area to be exempted meets all of the requirements at 40 CFR 146.4(d).

The Class VI Rule, at 40 CFR 144.7(d)(1), requires aquifer exemption expansion requests to define (by narrative description, illustrations, maps, or other means) and describe, in clear and definite geographic and/or geometric terms (such as vertical/lateral limits and gradient), all aquifers or parts thereof that fall under the request. The *UIC Program Guidance on Transitioning Class II Wells to Class VI Wells* contains additional information about aquifer exemption expansions, including recommendations for the content to be submitted.

#### Aquifer Exemption Expansion Requirements

The area to be exempted:

- Does not currently serve as a source of drinking water  
40 CFR 146.4(d)(1)
- Has a TDS content more than 3,000 mg/L and less than 10,000 mg/L  
40 CFR 146.4(d)(2)
- Is not reasonably expected to supply a public water system  
40 CFR 146.4(d)(3)

Owners or operators may submit various types of information to support this demonstration, such as tabular data, maps (in flat images and/or GIS files), charts/graphs, reports developed by public water systems, etc. As with all Class VI submissions, files should be legible and clear (e.g., contour lines unambiguous, legends visible, acronyms defined, images have an appropriate scale). Sources of secondary data should be clearly cited. Primary data should include relevant reference information such as the date/time, location/depth, method name, test conditions, assumptions, limitations, QA protocols, etc., associated with each sampling event, particularly for total dissolved solids (TDS) measurements.

#### Aquifer Exemption Expansion Submissions

##### Class VI Rule requirements:

- 40 CFR 144.7(d); 146.4(d)

##### Relevant GSDT modules:

- Project Information Tracking module
- Injection Depth Waivers and Aquifer Exemption Expansions module

##### Reference documents:

- *UIC Program Guidance on Transitioning Class II Wells to Class VI Wells*

##### Electronic resources:

- GSDT user guides

Aquifer exemption expansion requests are submitted using the Injection Depth Waiver and Aquifer Exemption Expansion module of the GSDT. The Class VI Rule does not specify when a request must be submitted, but the EPA recommends that it be submitted at the same time as the Class VI permit application to allow sufficient time for review. Pursuant to 40 CFR 144.7(d), such requests must be treated as a revision to the applicable federal UIC Program under 40 CFR 147 or as a substantial revision to a state/tribal program under 40 CFR 145.32, and will not be final until approved by the EPA (even in states with primacy for implementing the Class VI program). Therefore, submitting a

complete aquifer exemption expansion request via the GSDT is not a guarantee that the request will be granted.

Like injection depth waiver submissions, some aspects of the request may be the same as components of the permit application, and the Injection Depth Waivers and Aquifer Exemption Expansions module allows users to submit a combination of new information and cross-references to materials submitted using other GSDT modules. Cross-references should point specifically to the relevant parts of the permit application (e.g., references to particular pages or subsections, rather than to an entire project plan) and the referenced material should be sufficient to meet all of the applicable requirements. When finalizing the permit application in the Project Information Tracking module, the owner or operator should check the box indicating a request for an aquifer exemption expansion.

The EPA encourages owners or operators to communicate with their permitting authorities prior to submitting an aquifer exemption expansion request. In particular, demonstrating that the aquifer is not reasonably expected to supply a public water system [40 CFR 146.4(d)(3)] requires a tailored, site-specific response, and the EPA recommends discussing this requirement with the permitting authority.

## 4 Pre-Operation Phase Reporting and Recordkeeping

Before receiving approval for the operation of a Class VI well, owners or operators must conduct certain pre-operational activities (as specified by 40 CFR 146.87) and submit the results to the EPA. The Class VI Rule, at 40 CFR 146.82(c), also requires the UIC Program Director to consider certain types of information before authorizing injection, and the EPA expects that owners or operators will submit all of the information necessary to support the Director's review when that information has not otherwise been made available to the Director.

Much of this pre-operation phase information serves to update or supplement the components of the permit application submitted pursuant to 40 CFR 146.82(a), though some is new and specific to the current phase. Overall, the purpose of the information specified by 40 CFR 146.82(c) is to demonstrate that the injection project will not endanger USDWs. The new data considered by the UIC Program Director address uncertainties identified in the permit application process and ensure that all of the planned project activities appropriately reflect the necessary site-specific considerations.

Like the components of a Class VI permit application, the pre-operation information includes data related to site characterization, AoR delineation, corrective action, injection well construction, operating information, and other topic areas. While the Class VI Rule does not specify any pre-operation phase submittals related to injection depth waivers or aquifer exemption expansions, owners or operators may also need to submit information related to these items if requested by the UIC Program Director. See Sections 3.2 and 3.3 for recommendations related to submitting injection depth waiver and aquifer exemption expansion materials.

The information relevant to the pre-operation phase is summarized in Table 4-1, and it is described in more detail in the subsections below. Submitting complete, accurate, and consistent information that clearly demonstrates compliance with the Class VI Rule requirements will support timely authorization to inject, provide information to inform the public and address any concerns about the project, support continuity in decision-making for the project, and facilitate the development of an administrative record documenting permitting authority decisions. As with information collected for a Class VI permit application, 40 CFR 146.91(f)(1) requires that information collected to support 40 CFR 146.82(c) be retained throughout the life of the Class VI project and for 10 years following site closure.

**Table 4-1. Summary of submittals to be made during the pre-operation phase, to support the determination to authorize injection.**

Reporting Requirement	Relevant GSDT Modules	Recommended Format	Timing and Frequency
Information for the UIC Program Director to consider before granting authorization to inject [40 CFR 146.82(c) and 146.85]	Project Information Tracking module (which contains a checklist of other modules to use for more detailed submissions; see subsections below)	Basic project information - directly entered into the module	Information for the UIC Program Director to consider before granting authorization to inject [40 CFR 146.82(c) and 146.85]

Reporting Requirement	Relevant GSDT Modules	Recommended Format	Timing and Frequency
Information for the UIC Program Director to consider before granting authorization to inject [40 CFR 146.82(c)] <i>continued</i>	Project Information Tracking module (which contains a checklist of other modules to use for more detailed submissions; see subsections below)	Detailed data submissions - other GSDT modules (see below)  Additional information requested by the UIC Program Director - uploaded file(s)	Information for the UIC Program Director to consider before granting authorization to inject [40 CFR 146.82(c) and 146.85]

The information specified by 40 CFR 146.82(c), which is summarized in the box below, is similar to that required under 40 CFR 146.82(a) with respect to the topic areas covered and the type/format of the information. The reporting process is also similar; like the permit application, the EPA recommends that owners or operators submit both:

1. A narrative summarizing the changes to site characterization, strategies for site operation, etc., as a result of pre-operational testing results (compiled into a single file and submitted using the Project Information Tracking module of the GSDT).
2. Specific, detailed information required by certain Class VI Rule provisions (submitted using other GSDT modules, which are tailored to the applicable rule requirements).

As with the 40 CFR 146.82(a) narrative, owners or operators should use the Project Information Tracking module to download a 40 CFR 146.82(c) narrative template, then upload the completed file to the module along with any supplemental materials. For ease of submission and to facilitate the permitting authority's evaluation, the EPA recommends that the 40 CFR 146.82(c) narrative be provided as a single PDF file. Supplemental materials that accompany the narrative but are not compatible with this format (such as tabular data, high-resolution images, or GIS shapefiles) may be provided separately, using the module field designated for "any other information requested by the UIC Program Director."

When owners or operators submit detailed information using the other GSDT modules, they will generally be updating previous submissions made during the pre-construction phase, either by entering new information directly into the module or by uploading updated files. This process is intended to streamline the reporting process as well as facilitate the permitting authority's review. One exception is the Pre-Operational Testing module, which is used to submit the results of the logging and testing activities required by 40 CFR

#### Pre-Operation Phase Requirements

- Site characterization updates  
40 CFR 146.82(c)(2), (3)
- Amended AoR and Corrective Action Plan, including final AoR delineation and corrective action status  
40 CFR 146.82(c)(1), (6), (9)
- Injection well construction updates  
40 CFR 146.82(c)(3), (5)
- Pre-operational testing results  
40 CFR 146.82(c)(4), (7), (8)
- Amendments to other project plans  
40 CFR 146.82(c)(9)
- Any other information requested by the UIC Program Director  
40 CFR 146.82(c)(10)
- Financial responsibility updates  
40 CFR 146.85

146.87; before the pre-operation phase of the project, owners or operators will have only used this module to submit their proposed pre-operational testing program files.

While the GSDT modules used during the pre-operation phase can be populated and submitted in any order, the EPA recommends the following process. First, owners or operators should review the general project information sections of the Project Information Tracking module (including the project name, contact information, etc.) to confirm that the information is accurate and up to date. Second, owners or operators should populate and submit the modules used to provide detailed information (e.g., the Pre-Operational Testing module). Third, they should finish populating the 40 CFR 146.82(c) section of the Project Information Tracking module (by uploading the completed narrative template and filling out the checklist) and submit it. The EPA recommends that, throughout this process, owners or operators delete or replace any obsolete information/files in the GSDT modules to ensure that the GSDT contains the most up-to-date information for the project. Note that deleting a file does not alter or hinder the reporting and recordkeeping requirements described in Section 2.5. The GSDT maintains a full record of all previously submitted materials; if an owner or operator deletes/removes a file, this simply means that the file will not be included in an owner or operator's next submission.

Also, similar to the permit application review process, the permitting authority's evaluation of the pre-operation information will likely be an iterative one. Permitting authorities may need to ask clarifying questions, request additional information, or discuss the content of a submittal with owners or operators. As described in Section 2.4, the GSDT's Information Request module will facilitate written communication between owners or operators and permitting authorities during this process (and throughout the life of a Class VI project). In addition to the specific information listed at 40 CFR 146.82(c)(1)–(9), the UIC Program Director may request any additional information necessary to inform his or her decision to authorize injection [40 CFR 146.82(c)(10)]. The EPA recommends that owners or operators contact their permitting authority with any questions about additional required information or the evaluation process.

Depending on a project's permit conditions and the timeframe of the permitting authority's evaluation, an owner or operator may also need to begin certain periodic reporting activities, such as providing financial responsibility updates using the Financial Responsibility Demonstration module (see Section 4.6). The EPA recommends that owners or operators discuss the need for such submittals with their permitting authority.

#### **4.1 Site Characterization**

The Class VI Rule, at 40 CFR 146.82(c)(2), describes updates that must be made to the project's site characterization information during the pre-operation phase. To support the UIC Program Director's evaluation, the EPA anticipates that the owner or operator will update the site characterization information from the permit application based on the results of the pre-operational testing required at 40 CFR 146.87 (see Section 4.4). As with the original site characterization information, these updates serve to demonstrate that the project meets the minimum criteria for site suitability specified at 40 CFR 146.83. They inform the final AoR delineation, as well as updated plans for site operation, testing and monitoring, and other aspects of the project.

### Site Characterization Submissions

#### Class VI Rule requirements:

- 40 CFR 146.82(c)(2), (3)
- 40 CFR 146.83

#### Relevant GSDT modules:

- Project Information Tracking module
- AoR and Corrective Action module

#### Reference documents:

- *UIC Program Class VI Well Site Characterization Guidance*

#### Electronic resources:

- 40 CFR 146.82(c) narrative template
- GSDT user guides

The data used to develop the site characterization updates will be generated during the logging and testing activities conducted pursuant to 40 CFR 146.87. Recommendations for gathering the data are provided in the *UIC Program Class VI Well Site Characterization Guidance*. In some cases, such as those in which additional relevant scientific publications or state well records become available during the pre-operation phase, the updates could also be supported by secondary data.

The site characterization updates can be incorporated into the 40 CFR 146.82(c) narrative, using the template available in the GSDT's Project Information Tracking module. In this narrative, the EPA recommends that owners or operators integrate the formation testing results into the existing site

description, highlighting any changes in the understanding of the site since submittal of the permit application. Ideally, the updates will address any key uncertainties identified in the permit application and provide additional evidence to demonstrate that the site meets the suitability criteria at 40 CFR 146.83. The narrative should also include new or updated information on the compatibility of the carbon dioxide stream with the properties of the injection and confining zones, based on the results of formation testing at 40 CFR 146.87(c)-(d) [40 CFR 146.82(c)(3)], as well as any other relevant information that can support an evaluation of the site's geology.

When complete, the compiled 40 CFR 146.82(c) narrative should be submitted using the Project Information Tracking module. As stated above, the EPA recommends that the 40 CFR 146.82(c) narrative be provided as a single PDF file, with supplemental materials provided separately using the module field designated for "any other information requested by the UIC Program Director." These may include updated maps, figures, or other summary items providing a synthesis of the logging and testing results. While the site characterization component of the 146.82(c) narrative relies on the results of pre-operational testing, the actual logging and testing results (e.g., log analyst reports) should be submitted separately, using the Pre-Operational Testing module (see Section 4.4). The EPA recommends that owners or operators cross-reference their pre-operational testing submittals in the 40 CFR 146.82(c) narrative file.

In addition to submitting the 146.82(c) narrative with the Project Information Tracking module, owners or operators may also need to update certain site-related information in the AoR and Corrective Action module, as part of the AoR and corrective action submission (see Section 4.2).

As with the site characterization components of the permit application, the pre-operation phase site characterization information forms the foundation on which other UIC Program Director decisions are based, pursuant to 40 CFR 146.82(c). Therefore, the EPA recommends that owners or operators review the site characterization materials for consistency with related items, such as the final AoR delineation, the Testing and Monitoring Plan, and (if applicable) the alternative PISC timeframe demonstration. Owners or operators should contact their permitting authority if

questions arise about site-specific considerations or about the level of detail necessary to fulfill the Class VI Rule requirements.

## 4.2 AoR and Corrective Action

The Class VI Rule, at 40 CFR 146.82(c)(1), (6), and (9), requires updates to the AoR and corrective action materials submitted with the permit application, including the delineation of the final AoR (based on data obtained during logging and testing of the well and the formation), an update on the corrective action status of wells in the AoR, and an amended AoR and Corrective Action Plan that reflects the pre-operation phase activities. To support the permitting authority's evaluation, the EPA recommends that owners or operators submit the following, using the AoR and Corrective Action module:

- An amended AoR and Corrective Action Plan. This plan should present the final AoR delineation, describe how the delineation is supported by the newly collected data, and contain any necessary updates to the procedures for corrective action (including phased corrective action, if proposed) and AoR reevaluation.
- Updates to the detailed modeling data or any other information supporting the final AoR delineation.
- Documentation of any corrective action that has been completed.

Specific recommendations for submitting each of these items are provided in the subsections below. The content and format of the submissions will likely be similar to those provided as part of the permit application: detailed modeling information such as input and output data, narrative descriptions, tabular well data, etc. (see Section 3.1.2). Recommendations for preparing these materials are provided in the *UIC Program Class VI Well Area of Review Evaluation and Corrective Action Guidance* and the *UIC Program Class VI Well Project Plan Development Guidance*.

The EPA recommends that owners or operators hold a discussion with their permitting authority prior to submitting any new modeling information, to address any questions related to data files/formats or the overall approach for submitting modeling data. Once these questions have been addressed, owners or operators should upload the amended AoR and Corrective Action Plan to the AoR and Corrective Action module and enter any updates to the detailed computational modeling/corrective action information. Following successful submission of information in this module, owners or operators can check the relevant boxes in the Project

### AoR and Corrective Action Submissions

#### Class VI Rule requirements:

- 40 CFR 146.82(c)(1), (6), (9)
- 40 CFR 146.84

#### Relevant GSDT modules:

- Project Information Tracking module
- AoR and Corrective Action module

#### Reference documents:

- *UIC Program Class VI Well Area of Review Evaluation and Corrective Action Guidance*
- *UIC Program Class VI Well Project Plan Development Guidance*

#### Electronic resources:

- AoR and Corrective Action Plan template
- GSDT user guides

Information Tracking module to confirm that they have completed this component of pre-operation phase reporting.

### ***AoR and Corrective Action Plan***

To fulfill the requirements at 40 CFR 146.82(c)(1), (6), and (9), the EPA recommends that owners or operators review the material in the approved AoR and Corrective Action Plan (i.e., as it was incorporated into the Class VI permit) and amend it to:

- Reflect the final AoR and the procedures used to delineate it.
- Provide a status update on corrective action activities, including both completed and remaining (planned) activities, in light of the final AoR delineation.
- Include any necessary changes to the procedures for AoR reevaluation.

The AoR and Corrective Action Plan will serve as a benchmark for future activities. The requirement to maintain and implement the approved plan is directly enforceable, pursuant to 40 CFR 146.84(b). Accordingly, the plan submitted during the pre-operation phase should reflect the most up-to-date site characterization information and computational modeling procedures, to most efficiently support these future activities.

At this stage of a Class VI project, the AoR and Corrective Action module should contain the last version of the plan submitted before the Class VI permit was issued. The EPA recommends that owners or operators delete this file and replace it with the up-to-date file.<sup>6</sup> As with the initial plan submittal, supplemental materials that are not part of the plan itself should be uploaded elsewhere in the module and not incorporated into the plan file. In addition to the examples of supplemental materials listed in Section 3.1.2, the EPA encourages owners or operators to submit an explanation of the changes that have been made to the plan, especially if substantial changes have been necessary.

In certain cases (e.g., for some well-characterized project sites with substantial existing data available in the pre-construction phase), only minimal updates to the computational model may be needed, and the final AoR delineation might be the same as the one included in the Class VI permit. If this is the case, the EPA recommends that owners or operators amend the AoR and Corrective Action Plan to include a technical description of how the newly obtained data support the final delineation.

### ***Detailed Computational Modeling Data***

The computational modeling data supporting the final AoR delineation should be submitted using the AoR and Corrective Action module, using the same procedures as the submittals made during the pre-construction phase (see Section 3.1.2). The EPA recommends that owners or operators review each component of the existing submission (as it appears in the module) and

---

<sup>6</sup> If the permitting authority made any changes to the plan before incorporating it into the permit, the file in the reporting module may not be exactly the same as the approved plan. When revising the plan file, EPA recommends that owners or operators ensure that they are using the final, approved plan as a starting point.

edit or replace information as necessary. Regardless of the extent to which the AoR delineation may change, the EPA recommends that owners or operators ensure that all fields in the module reflect the most up-to-date information so that the permitting authority can confirm that the modeling effort appropriately incorporates the results of the pre-operation phase activities.

Documentation supporting the corrective action status update described above can also be submitted in the AoR and Corrective Action module. This documentation may include tables of well information and/or plugging reports from any wells that have received corrective action.

### 4.3 Injection Well Construction

To support the review of final construction procedures required by 40 CFR 146.82(c)(5), the EPA recommends that owners or operators submit final as-built drawings/schematics of the injection well and a description of any deviations from the construction procedures included in the Class VI permit. The *UIC Program Class VI Well Construction Guidance* contains information on designing and constructing an injection well that meets the Class VI Rule requirements, including considerations related to the pre-operation phase.

EPA recommends that the final construction information be incorporated into the 40 CFR 146.82(c) narrative. This component of the narrative can also be used to provide information on the compatibility of the carbon dioxide stream with the materials used to construct the well [40

CFR 146.82(c)(3)]. As noted above, the EPA recommends that the 40 CFR 146.82(c) narrative be provided as a single PDF file. Supplemental materials that are not compatible with this format (such as high-resolution images) may be provided separately using the module field designated for “any other information requested by the UIC Program Director.” Regardless of whether as-built drawings and other images are incorporated into the narrative or provided separately, they should be legible, clear, and include all relevant legends, scales, labels, etc.

The EPA recommends that owners or operators hold a discussion with their permitting authority if the actual well construction procedures varied significantly from the approved procedures incorporated in the Class VI permit. (Ideally, owners or operators will notify the permitting authority as

soon as possible after identifying the need for such a change—e.g., if relevant information about subsurface formations arises during drilling—to ensure that the well, as built, meets the Class VI requirements.) The EPA also recommends that owners or operators and permitting authorities discuss the ramifications of any changes on other aspects of the project, including operations, well plugging, and associated financial responsibility costs.

#### Injection Well Construction Submissions

##### Class VI Rule requirements:

- 40 CFR 146.82(c)(3), (5)
- 40 CFR 146.86

- Project Information Tracking module

##### Reference documents:

- *UIC Program Class VI Well Construction Guidance*

##### Electronic resources:

- 40 CFR 146.82(c) narrative template
- GSDT user guides

## 4.4 Pre-Operational Testing

The Class VI Rule requires owners or operators to conduct certain activities to verify proper construction of the well and obtain data on the chemical and physical characteristics of the injection and confining zones [40 CFR 146.87]. These activities should be performed pursuant to the approved pre-operational testing program in the Class VI permit (see Section 3.1.5) and the results submitted during the pre-operation phase to inform the UIC Program Director's evaluation pursuant to 40 CFR 146.82(c)(4), (7), and (8).

Before conducting the logs and tests required by 40 CFR 146.87, owners or operators must notify their permitting authority and provide them with an opportunity to witness the logging and testing. An owner or operator must provide a testing schedule to the permitting authority at least 30 days before the first test takes place, and any changes to the schedule must be submitted at least 30 days before the next scheduled test [40 CFR 146.87(f)]. These notifications can be submitted using the Pre-Operational Testing module.

The EPA anticipates that the pre-operational testing results will include a combination of narrative information (including third-party materials, such as log analyst reports), graphs/figures, and tabular data. Log results may be submitted in Log ASCII Standard (LAS) format, if desired. Both the *UIC Program Class VI Well Site Characterization Guidance* and the *UIC Program Class VI Well Construction Guidance* provide recommendations for conducting the required logs and tests. In addition, the *UIC Program Class VI Well Testing and Monitoring Guidance* includes recommendations related to MITs.

The Pre-Operational Testing module was designed to facilitate submission of the logging and testing results. Unlike most other GSDT modules used during the pre-construction and pre-operation phases, owners or operators will not yet have used the applicable components of the Pre-Operational Testing module. Therefore, the EPA recommends that owners or operators contact their permitting authority before populating the module to discuss any questions about how to use the module or about the specific types of information to submit. Following successful submission of the module, owners or operators can check the corresponding box in the Project Information Tracking module to confirm that they have completed this component of pre-operation phase reporting.

During this phase of a Class VI project, the pre-operational testing results are likely to be the primary source of site-specific information informing the final AoR delineation, Testing and Monitoring Plan, and other project components. Therefore, the EPA recommends that interpretive materials submitted with the pre-operational testing results include a discussion of data limitations and remaining uncertainties at the site. The EPA also recommends that owners

### Pre-Operational Testing Submissions

#### Class VI Rule requirements:

- 40 CFR 146.82(c)(4), (7), (8)
- 40 CFR 146.87

#### Relevant GSDT modules:

#### Electronic resources:

- GSDT user guides

or operators provide information to document compliance with quality assurance/quality control (QA/QC) procedures for the logs and tests, such as equipment calibration information and QA/QC sample data (e.g., blanks, duplicates, or matrix spikes used during laboratory analyses).

The Pre-Operational Testing module provides a great deal of flexibility to owners or operators, reflecting the flexibility of the associated Class VI Rule requirements. The EPA encourages owners or operators to contact their permitting authority to discuss the best approach for submitting a particular project's pre-operational testing results.

#### 4.5 Other Project Plans

The Class VI Rule, at 40 CFR 146.82(c)(9), requires the UIC Program Director to consider any amendments to the proposed Testing and Monitoring Plan, Injection Well Plugging Plan, PISC and Site Closure Plan, and Emergency and Remedial Response Plan that are necessary to address new information collected during logging and testing of the well and the formation. (See Section 4.2 for a discussion of the AoR and Corrective Action Plan.) This requirement also includes consideration of any necessary updates to the alternative PISC timeframe demonstration, if one

has been proposed. The EPA expects that owners or operators will submit amended project plan files to support this evaluation.

##### Other Project Plan Submissions

###### Class VI Rule requirements:

- 40 CFR 146.82(c)(9)
- 40 CFR 146.90
- 40 CFR 146.92(b)
- 40 CFR 146.93(a), (c)
- 40 CFR 146.94(a)

###### Relevant GSDT modules:

- Project Information Tracking module
- Project Plan Submissions module
- Alternative PISC Timeframe Demonstration module

###### Reference documents:

- *UIC Program Class VI Well Project Plan Development Guidance*
- *UIC Program Class VI Well Testing and Monitoring Guidance*
- *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*

###### Electronic resources:

- Project plan templates
- GSDT user guides

The EPA anticipates that the amended project plans will have a similar content and format as the original approved plans (e.g., PDF files developed using the templates provided in the Project Plan Submissions module). See the *UIC Program Class VI Well Project Plan Development Guidance* for more information on the project plans, and refer to the *UIC Program Class VI Well Testing and Monitoring Guidance* and the *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance* for recommendations on the information to be included in these submittals.

At this stage of a Class VI project, the Project Plan Submissions module should contain the last versions of the project plans that were submitted before the Class VI permit was issued. The EPA recommends that owners or operators delete these files and replace them with the most up-to-date files.<sup>7</sup> Supplemental materials that are not part of the plans can be uploaded in the designated fields in the Project Plan Submissions module. In addition to the examples of

<sup>7</sup> If the permitting authority made any changes to the plan before incorporating it into the permit, the file in the Project Plan Submissions module may not be exactly the same as the approved plan. When updating the plan, EPA recommends that owners or operators ensure that they are using the final, approved plan as a starting point.

supplemental materials provided for the original proposed plans (see Sections 3.1.6, 3.1.7, 3.1.8 and 3.1.9), the EPA recommends that owners or operators consider submitting an explanation of the changes that have been made to each plan, particularly if substantial changes were necessary.

Any revisions to the alternative PISC timeframe demonstration materials can be made directly in the Alternative PISC Timeframe Demonstration module. The EPA recommends that owners or operators delete any obsolete information from that module and replace it with information that reflects the most up-to-date understanding of the site. Because this demonstration relies heavily on computational modeling results, owners or operators are encouraged to reference the detailed modeling submission as appropriate in their submission.

Following successful submission in the Project Plan Submissions module and (if applicable) the Alternative PISC Timeframe Demonstration module, owners or operators can check the relevant boxes in the Project Information Tracking module to confirm that they have completed the corresponding components of pre-operation phase reporting.

In certain cases, it may not be necessary to amend one or more of the project plans. For example, if sufficient project-specific data were available during the pre-construction phase and the AoR delineation has not changed substantially, the existing strategy outlined in the Emergency and Remedial Response Plan may still be appropriate. If owners or operators believe this may be the case for their project, the EPA recommends that they discuss this possibility with the permitting authority before making the relevant pre-operation phase submittals. In lieu of an amended plan, the UIC Program Director may request a technical justification of why no amendment is needed. This justification can be submitted using the supplemental materials field of the Project Plan Submissions module.

#### 4.6 Financial Responsibility

If amendments to the AoR and Corrective Action Plan, Injection Well Plugging Plan, PISC and Site Closure Plan, or Emergency and Remedial Response Plan lead to increased costs for the covered activities, the owner or operator must update the cost estimate supporting the financial responsibility demonstration within 60 days [40 CFR 146.85(c)(3)]. Also, owners or operators must update their cost estimates annually [40 CFR 146.85(c)(2)]. Given the likelihood that one or more project plans will change and the time needed to construct the well and perform all required pre-operational testing, it is likely that an updated cost estimate will be needed during the pre-operation phase.

Updated cost estimates should be submitted using the Financial Responsibility Demonstration module, with the same procedures used to submit the initial cost estimate materials during the pre-construction phase (see Section 3.1.3). The EPA recommends that owners or operators delete any obsolete information

##### Financial Responsibility Submissions

###### Class VI Rule requirements:

- 40 CFR 146.85(c)(2), (4), and (e)
- 40 CFR 146.85(a)(5)(ii), (c)(4), and (d)(3)

###### Relevant GSDT modules:

- Project Information Tracking module
- Financial Responsibility Demonstration module

###### Reference documents:

- *UIC Program Class VI Financial Responsibility Guidance*

###### Electronic resources:

- GSDT user guides

from the module and replace it with an up-to-date version. If final copies of financial instruments were not provided during the pre-construction phase, they should be provided whenever they become available. See Section 3.1.3 for more information about submitting materials related to financial instruments. Once the updated financial responsibility information is submitted, the owner or operator can check the corresponding box in the Project Information Tracking module.

Owners or operators are encouraged to contact their permitting authority to discuss the need for (or the timing of) cost estimate updates or any other questions related to submitting financial responsibility information.

## 5 Injection Phase Reporting and Recordkeeping

During the injection phase, owners or operators must submit information at certain intervals as specified by the project's permit and the Class VI Rule. The goal of injection phase information collection and reporting is to demonstrate that the project is in compliance with the Class VI permit, to identify any endangerment of USDWs, and to generate a body of data to support project milestones (such as AoR reevaluations and the demonstration of non-endangerment made at the end of the project). Specifically, owners or operators must submit periodic reports of testing and monitoring results; notifications and results of well tests; and documentation related to AoR reevaluations, financial responsibility updates, and project plan amendments, as well as notifications and other information associated with emergency and remedial response activities or adverse financial conditions. Table 5-1 summarizes these requirements and the associated Class VI Rule citations, and further details are provided in the subsections below.

The Class VI Rule also specifies certain recordkeeping requirements for injection phase information. Pursuant to 40 CFR 146.91(f)(2), data on the nature and composition of injected fluids must be retained for 10 years after site closure, and the UIC Program Director may require the owner or operator to deliver these records to him or her at the end of this retention period. In addition, 40 CFR 146.91(f)(3) requires monitoring data collected pursuant to 40 CFR 146.90(b)-(i) to be retained for 10 years after it is collected, and 40 CFR 146.84(g) requires that modeling data and inputs used to support AoR reevaluations be retained for 10 years as well.

**Table 5-1. Summary of submittals to be made during the injection phase.**

Reporting Requirement	Relevant GSDT Modules	Recommended Format	Timing and Frequency
Semi-annual reports of testing and monitoring results [40 CFR 146.91(a)]	Injection and Post-Injection Phase Reporting module	A single uploaded PDF containing the narrative component of each semi-annual report, with supporting data and other supplemental materials uploaded separately as necessary	Semi-annually, on the schedule set in the plan or permit
Notifications of well tests and stimulation activities [40 CFR 146.91(d)]	Injection and Post-Injection Phase Reporting module	An uploaded PDF letter	At least 30 days before the event
Results of MITs, workovers, and other tests of the injection well, if required by UIC Program Director [40 CFR 146.91(b)]	Injection and Post-Injection Phase Reporting module	An uploaded PDF, with supporting data and other supplemental materials uploaded separately as necessary	Within 30 days of the event  With the next semi-annual report, for certain types of activities per 40 CFR 146.91(a)(7)

Reporting Requirement	Relevant GSDT Modules	Recommended Format	Timing and Frequency
Submissions associated with an AoR reevaluation, including AoR and Corrective Action Plan amendments, or justification that no amendment is needed [40 CFR 146.84(e)]	AoR and Corrective Action module	A combination of uploaded PDF files (including a single uploaded PDF containing the narrative component of the plan) and data files in other formats, as well as information entered directly into the module	According to the schedule (or triggering criteria) set in the permit or the approved AoR and Corrective Action Plan
Testing and Monitoring Plan amendments, or justification that no amendment is needed [40 CFR 146.90(j)]	Project Plan Submissions module	A single uploaded PDF, with supporting data and other supplemental materials uploaded separately as necessary	Within 1 year of an AoR reevaluation, following significant changes to the facility, or when required by the UIC Program Director (as specified in the permit or the approved Testing and Monitoring Plan)
Emergency and Remedial Response Plan amendments, or justification that no amendment is needed [40 CFR 146.94(d)]	Project Plan Submissions module	A single uploaded PDF, with supporting data and other supplemental materials uploaded separately as necessary	Within 1 year of an AoR reevaluation, following significant changes to the facility, or when required by the UIC Program Director (as specified in the permit or the approved Emergency and Remedial Response Plan)
Financial responsibility cost estimate updates [40 CFR 146.85(c)(2), (c)(4), and (e)]	Financial Responsibility Demonstration module	A combination of uploaded PDF files and information entered directly into the module	Annually, 60 days before instrument anniversary  Within 60 days of project plan amendment or notification by UIC Program Director
Financial responsibility instrument updates [40 CFR 146.85(a)(5)(ii), (c)(4), and (d)(3)]	Financial Responsibility Demonstration module	A combination of uploaded PDF files and information entered directly into the module	Annually  Within 60 days of cost estimate increase to greater than value of current instrument  Within 60 days of notification of third-party adverse financial conditions

Reporting Requirement	Relevant GSDT Modules	Recommended Format	Timing and Frequency
Emergency notifications [40 CFR 146.88(f)(3), 146.91(c), 146.94(b)(3)]	Injection and Post- Injection Phase Reporting module	An uploaded PDF letter, with other supplemental materials uploaded separately as necessary	Within 24 hours  Included in the semi- annual report, for certain types of events per 40 CFR 146.91(a)(3)-(4)
Follow-up submissions after an emergency shutdown or loss of mechanical integrity [40 CFR 146.88(f)(4)-(5), 146.94(c)]	Injection and Post- Injection Phase Reporting module	One or more uploaded file(s)	Before resuming injection or as required by the UIC Program Director
Notifications of adverse financial conditions [40 CFR 146.85(d)]	Financial Responsibility Demonstration module	An uploaded PDF letter (submission by certified mail also required)	Within 10 days of the start of bankruptcy proceedings

## 5.1 Semi-Annual Reports of Testing and Monitoring Results

The Class VI Rule, at 40 CFR 146.91(a), requires owners or operators to submit semi-annual reports of testing and monitoring results. These reports must contain the results of monitoring conducted pursuant to 40 CFR 146.90, as specified in the approved Testing and Monitoring Plan, as well as certain summary statistics of operational parameters and descriptions of permit exceedances and emergency shut-offs. Recommendations for submitting each of these components are provided in the subsections below.

### Semi-Annual Report Requirements

- Changes to the characteristics of the carbon dioxide stream compared to the proposed operating data  
40 CFR 146.91(a)(1)
- Operational monitoring results, including monthly and cumulative summary statistics  
40 CFR 146.91(a)(2), (5)-(6)
- Description of permit exceedances or events that triggered shut-off devices  
40 CFR 146.91(a)(3)-(4)
- Results of monitoring prescribed under 40 CFR 146.90, including corrosion monitoring, ground water monitoring, external MITs, pressure fall-off tests, plume and pressure front monitoring, surface air and/or soil gas monitoring (if required), and any other activities included in the approved Testing and Monitoring Plan  
40 CFR 146.91(a)(7)

The Injection and Post-Injection Phase Monitoring module of the GSDT facilitates submission of the semi-annual reports and any supplemental information supporting those reports. The module provides a semi-annual report template that can be downloaded, populated, and uploaded back to the module. The EPA recommends that owners or operators use the template, which includes specific instructions and examples for each required component.

For ease of submission and to facilitate the permitting authority's evaluation, the EPA recommends that each semi-annual report be provided as a single PDF file. This file should include a summary of the activities conducted and

an interpretation (supported by graphics/charts) that synthesizes the results of these activities and their relevance to the permit conditions and Class VI Rule requirements. Supplemental materials or appendices that accompany the report but are not compatible with this format (such as tabular data, high-resolution images, and GIS files) may be provided separately in the designated module field.

Because injection phase testing and monitoring activities are conducted according to the project-specific Testing and Monitoring Plan, the specific content of the semi-annual report will vary among projects, and, potentially, among different reporting periods for a single project. However, in general, EPA recommends that owners or operators submit the following types of information for each testing and monitoring activity, if applicable:

- The purpose, date, time, and location of sampling event, test, or survey.
- A list or brief description of methods used.
- Interpretation of results with respect to permit conditions/regulatory requirements and past results.
- Any identified data gaps.
- The QA/QC procedures employed.
- The names of any contractors or laboratories involved in sampling and analysis (and their certifications, if applicable).
- Any identified amendments to the Testing and Monitoring Plan that may be necessary to continue protection of USDWs.

Additional recommendations for reporting the results of specific types of monitoring are provided in the subsections below. Again, these general recommendations may not apply to all projects or to all components of an individual project's semi-annual report. The EPA recommends that owners or operators contact their permitting authority before submitting their first semi-annual report, to discuss any questions about how to submit particular types of information. Background information on conducting all required testing and monitoring for Class VI projects can be found in the *UIC Program Class VI Well Testing and Monitoring Guidance*.

### **5.1.1 Carbon Dioxide Stream Monitoring Results**

The Class VI Rule, at 40 CFR 146.91(a)(1), requires the semi-annual report to include any changes to the physical, chemical, and other relevant characteristics of the carbon dioxide stream compared to the proposed operating data. Carbon dioxide stream monitoring is also a required component of the Testing and Monitoring Plan, pursuant to 40 CFR 146.90. As a result, the requirement at 40 CFR 146.91(a)(7) to include the results of 40 CFR 146.90 monitoring activities in the semi-annual report applies to this information. This means that the overall results of carbon dioxide stream monitoring must also be included in the semi-annual report, not just changes compared to what was proposed.

Changes in the carbon dioxide stream may lead to changes in the potential for interactions with the injection formation, subsurface fluids, and/or injection well construction materials. Additionally, monitoring the chemical and physical characteristics of the carbon dioxide stream may help distinguish the injectate from the native fluids in case of fluid migration out of the injection zone. An individual project's Class VI permit may also specify certain carbon dioxide stream characteristics (e.g., water content, concentrations of certain impurities) that must be maintained to remain in compliance with the permit.

Data on the carbon dioxide stream's characteristics will be generated during periodic injectate monitoring, which is required to be included in the Testing and Monitoring Plan by 40 CFR 146.90. The monitoring frequency, parameters, procedures, etc., will be specified in the approved plan. Owners or operators can consult Section 3.1 of the *UIC Program Class VI Well Testing and Monitoring Guidance* for further information on conducting carbon dioxide stream monitoring.

Carbon dioxide stream monitoring results can be incorporated into the semi-annual report template available in the GSDT. The EPA recommends that owners or operators include a list of chemicals analyzed (including carbon dioxide and any other constituents specified in the approved Testing and Monitoring Plan), a description of the sampling methodology, a tabulation of the analytical results, including results from any QA/QC samples, and a synthesis of the results interpreting any changes in the characteristics of the injected carbon dioxide stream. The EPA also recommends that owners or operators submit the results of previous analyses to facilitate evaluation of temporal trends. In general, owners or operators should provide any information necessary to demonstrate compliance with the Class VI permit and the approved Testing and Monitoring Plan, including the approved QASP.

When complete, the compiled semi-annual report file should be submitted using the Injection and Post-Injection Phase Reporting module. As stated above, the EPA recommends that the semi-annual report be provided as a single PDF file, with supplemental materials (e.g., copies of laboratory reports or tabular monitoring data) uploaded separately using the designated field in the module.

### 5.1.2 Operational Monitoring Results

The Class VI Rule requires that the following types of operational monitoring information be included in the semi-annual report:

- Monthly average, maximum, and minimum values for injection pressure, flow rate, and volume and annular pressure [40 CFR 146.91(a)(2)].

#### Carbon Dioxide Stream Submissions

##### Class VI Rule requirements:

- 40 CFR 146.90(a)
- 40 CFR 146.91(a)(1), (7)

##### Relevant GSDT modules:

- Injection and Post-Injection Phase Reporting module

##### Reference documents:

- *UIC Program Class VI Well Testing and Monitoring Guidance*

##### Electronic resources:

- Semi-annual report template
- GSDT user guides

- The monthly volume and/or mass of the carbon dioxide stream injected over the reporting period and the volume injected cumulatively over the life of the project [40 CFR 146.91(a)(5)].
- The monthly annulus fluid volume added [40 CFR 146.91(a)(6)].

Continuous monitoring of each of these parameters is a required component of the Testing and Monitoring Plan pursuant to 40 CFR 146.90(b), and 40 CFR 146.91(a)(7) requires that results of these activities are included in the semi-annual report. Operational monitoring results are used to demonstrate compliance with permit conditions and identify any deviations from permitted conditions that may result in USDW endangerment.

#### **Operational Monitoring Submissions**

##### Class VI Rule requirements:

- 40 CFR 146.90(b)
- 40 CFR 146.91(a)(2), (5)-(7)

##### Relevant GSDT modules:

- Injection and Post-Injection Phase Reporting module

##### Reference documents:

- *UIC Program Class VI Well Testing and Monitoring Guidance*

##### Electronic resources:

- Semi-annual report template
- GSDT user guides

Data to support this reporting requirement will be generated by continuous recording devices required by 40 CFR 146.88(e)(1) and 146.90(b), as specified in the approved Testing and Monitoring Plan. Sections 3.2 and 3.3 of the *UIC Program Class VI Well Testing and Monitoring Guidance* provide information on conducting continuous monitoring during injection.

Continuous monitoring results can be incorporated into the semi-annual report template available in the GSDT. The EPA recommends that the monthly and cumulative data required by 40 CFR 146.91(a)(2), (5), and (6) be presented in one or more tables within the semi-annual report file. EPA also recommends that, to ensure compliance with 40 CFR 146.91(a)(7), owners or operators submit all available results for

these parameters; the EPA recommends a summary tabular and/or graphical format for these data (i.e., owners or operators should not only submit the monthly/cumulative values). The data can either be incorporated directly into the semi-annual report file or uploaded separately using the field for supplemental information.

### **5.1.3 Description of Exceedances or Shut-Offs**

The semi-annual report must include a description of any event that exceeded or otherwise diverged from permitted levels for annulus pressure or injection pressure, pursuant to 40 CFR 146.91(a)(3). In addition, the semi-annual report must include a description of any event that triggered a shut-off device, as well as a description of the activities conducted in response to such an event. Importantly, permit exceedances and automatic shut-offs may also require 24-hour reporting pursuant to 40 CFR 146.91(c), as described in Section 5.4.1; this section only describes the requirements applicable to the semi-annual report. The purpose of including this information in the semi-annual report is to allow the permitting authority to evaluate it in the context of other monitoring results, with the ultimate goal of ensuring USDW protection.

The underlying data for this component of the semi-annual report will be generated during the continuous monitoring required by 40 CFR 146.90(b), with supplemental information potentially coming from the project's operational records (e.g., internal incident reports) or emergency reporting submissions (see Section 5.4.1). The continuous monitoring information in Sections 3.2 and 3.3 of the *UIC Program Class VI Well Testing and Monitoring Guidance* may be useful to owners or operators when preparing this component of their semi-annual report.

The EPA recommends that owners or operators incorporate these event descriptions directly into the semi-annual report file, using the template available in the GSDT. The EPA recommends that the descriptions consist of brief narrative explanations, supported by tables, charts, graphs, or images as appropriate. Appendices (e.g., a record of 24-hour emergency notifications), attachments, etc., can also be incorporated into the semi-annual report PDF or be uploaded separately in the designated GSDT module field.

In general, the EPA recommends that the event descriptions include a brief overview of what occurred, any identified causes, the duration of the exceedance, and a description of the owner or operator's response. If any emergency reporting was conducted pursuant to 40 CFR 146.91(c), owners or operators are encouraged to include cross-references to those previous submissions.

#### 5.1.4 Other Testing and Monitoring Results

In addition to the specific components listed at 40 CFR 146.91(a)(1)-(6), the Class VI Rule requires that the semi-annual report include the results of monitoring prescribed under 40 CFR 146.90 [40 CFR 146.91(a)(7)]. This means that the semi-annual report must include the results of monitoring conducted to comply with the approved Testing and Monitoring Plan. Because testing and monitoring strategies (and, therefore, the associated results) will vary from project to project, the following recommendations may not apply to all projects in all situations. The EPA recommends that owners or operators consult with their permitting authorities to determine how best to present results from their individual projects, especially if a project's approved Testing and Monitoring Plan includes monitoring methods not specified under 40 CFR 146.90.

#### ***Corrosion Monitoring***

The Class VI Rule, at 40 CFR 146.90(c), requires quarterly corrosion monitoring of well materials, by analyzing coupons of well material, routing the carbon dioxide stream through a loop of well material, or an alternate method approved by the UIC Program Director. Furthermore, the UIC Program Director may require casing inspection logs to be run [40 CFR 146.89(d)]. Section 3.4 of the *UIC Program Class VI Well Testing and Monitoring Guidance* provides information related to corrosion monitoring.

#### **Exceedance and Shut-off Submissions**

##### Class VI Rule requirements:

- 40 CFR 146.91(a)(3)-(4)

##### Relevant GSDT modules:

- Injection and Post-Injection Phase Reporting module

##### Reference documents:

- *UIC Program Class VI Well Testing and Monitoring Guidance*

##### Electronic resources:

- Semi-annual report template
- GSDT user guides

The EPA recommends that corrosion monitoring results be incorporated directly into the semi-annual report file, using the template provided in the GSDT. The EPA recommends that owners or operators provide a brief narrative describing the method of sampling/measurement (e.g., the method for retrieval of coupons, the material from which coupons or loops are made, etc.) and an interpretation of the measured or observed results. This should be accompanied by the actual measurements of mass and thickness loss in any corrosion coupons or loops used (e.g., in a

tabular or graphical format), presented in the context of all previous results. If casing inspection logs were run, the owner or operator may submit information about the measured casing inspection logs and comparison to previous logs; information about the thickness of the casing (referencing the original casing thickness); and the locations of any detected anomalies such as pits, scratches, and splits. Supplemental items such as photographs can be incorporated into the semi-annual report file or uploaded separately in the designated field.

#### **Other Testing and Monitoring Submissions**

##### Class VI Rule requirements:

- 40 CFR 146.90(c)-(i)
- 40 CFR 146.91(a)(7)

##### Relevant GSDT modules:

- Injection and Post-Injection Phase Reporting module

##### Reference documents:

- *UIC Program Class VI Well Testing and Monitoring Guidance*

##### Electronic resources:

- Semi-annual report template
- GSDT user guides

#### **External MITs**

The Class VI Rule, at 40 CFR 146.89(c) and 40 CFR 146.90(e), requires annual external MITs. This testing may take the form of a tracer survey (e.g., oxygen activation log), a temperature log, a noise log, or another test required or allowed by the UIC

Program Director, as specified in the approved Testing and Monitoring Plan. External MITs are described in Section 2.3 of the *UIC Program Class VI Well Testing and Monitoring Guidance*.

MITs are subject to special reporting requirements under 40 CFR 146.91(b) and (d), as described in Section 5.2. Because MIT results must be submitted within 30 days of the test, owners or operators may have already submitted these results by the time they prepare their semi-annual report in a given reporting period. To avoid duplicative reporting, the EPA recommends that owners or operators include a short statement in the semi-annual report indicating the date of the test, the outcome, and a cross-reference to the previous submission that includes the complete results.

#### **Pressure Fall-Off Testing**

Pressure fall-off testing is required by the Class VI Rule at least once every five years, unless more frequent testing is required by the UIC Program Director, pursuant to 40 CFR 146.90(f). The schedule for pressure fall-off testing and the associated reporting will be specified in a project's approved Testing and Monitoring Plan. Section 3.5 of the *UIC Program Class VI Well Testing and Monitoring Guidance* provides more detailed information about pressure fall-off testing.

Results of pressure fall-off testing must be reported within 30 days of the test, if required by the UIC Program Director [40 CFR 146.91(b)(3)] (see Section 5.2). If pressure fall-off test results

were submitted within the 6 months covered by the semi-annual report, the EPA recommends that owners or operators include a short statement in the semi-annual report indicating the date of the test, any notable results, and a cross-reference to a previous submission that includes the previous results. (If the UIC Program Director/the project's Testing and Monitoring Plan does not require 30-day reporting of pressure fall-off results, owners or operators should include the full set of results in their semi-annual report.)

### ***Ground Water Quality Monitoring Above the Confining Zone***

Periodic monitoring of ground water quality above the confining zone(s) is required by the Class VI Rule [40 CFR 146.90(d)]. Owners or operators of wells operating under injection depth waivers must also sample ground water below the lower confining zone [40 CFR 146.95(f)(3)(i)]. The parameters, methods, schedule, and other specifics of this monitoring activity will be established in the project's approved Testing and Monitoring Plan. Recommendations for conducting ground water monitoring are covered in Section 4 of the *UIC Program Class VI Well Testing and Monitoring Guidance*.

Ground water monitoring results can be incorporated directly into the semi-annual report template available in the GSDT. The EPA recommends that owners or operators include a list of parameters analyzed (as specified in the approved Testing and Monitoring Plan), a description of the sampling locations and methodology, a tabulation of the analytical results (including results for any QA/QC samples), and a synthesis of the results in the context of permit/regulatory compliance (e.g., an interpretative narrative that discusses any changing trends, any evidence of fluid leakage/fluid migration above the confining zone, and any implications for project operations or USDW protection, supported by maps and graphs as appropriate). To facilitate identification and evaluation of temporal trends, the EPA recommends that owners or operators submit the results of previous analyses, including baseline data. Any supplemental materials that owners or operators wish to provide (e.g., copies of laboratory reports) can be provided separately using the designated field in the module.

### ***Carbon Dioxide Plume and Pressure-Front Tracking***

The Class VI Rule, at 40 CFR 146.90(g), requires the owner or operator to perform direct and indirect monitoring to track the carbon dioxide plume and pressure front. As described in Section 5 of the *UIC Program Class VI Well Testing and Monitoring Guidance*, owners or operators may incorporate a variety of methods/techniques into their Testing and Monitoring Plans to fulfill this requirement. Accordingly, the specific types of information submitted related to plume and pressure-front tracking will vary from project to project.

In general, the EPA recommends that owners or operators incorporate the following items into their semi-annual report files (as applicable):

- One or more maps showing the locations/spatial extents (including, if applicable, depths/elevations), dates, and types of monitoring activities.
- Time-series graphs/charts showing monitoring results over time (including the current reporting period, previous reporting periods, and baseline data). For example, pressure or

saturation profiles at a given location or profiles of carbon dioxide trapping indicators could be submitted in this manner.

- Snapshot figures showing distributions of parameters over a given spatial extent at a particular time, such as one or more images showing the interpreted location of the carbon dioxide plume and pressure front in cross-sectional and plan/map view.
- A description of data processing methods used for geophysical surveys, as well as the major assumptions employed when analyzing monitoring results.
- Instrument calibration data, method sensitivity information, QA sample results, or other information to demonstrate compliance with the approved QASP.

In addition to the actual monitoring results, the EPA recommends that owners or operators include an interpretative narrative that synthesizes the results from the various monitoring methods, compares the results to the predictions generated during AoR delineation modeling, identifies any anomalies, and discusses any implications for project operations or USDW protection. Owners or operators should keep in mind that plume and pressure-front monitoring results are a key component of AoR reevaluations (see Section 5.3.1), as well as the project's ultimate non-endangerment demonstration (see Section 6.2.3). Submitting clear, organized, relevant, and complete results in the semi-annual reports will support efficient evaluations of these other Class VI project components.

To supplement the information included in the semi-annual report file, owners or operators may submit contractor's reports, GIS files, well log results, or other types of information that would not be practical to incorporate directly into the report PDF. These supplemental materials can be uploaded separately in the designated field in the GSDT.

### ***Surface Air and/or Soil Gas Monitoring***

The Class VI Rule allows the UIC Program Director, at his or her discretion, to require surface air and/or soil gas monitoring [40 CFR 146.90(h)]. If such activities are determined to be necessary, they will be incorporated into the approved Testing and Monitoring Plan. See Section 6 of the *UIC Program Class VI Well Testing and Monitoring Guidance* for more information.

Similar to the other types of testing and monitoring results, the EPA recommends that surface air and/or soil gas monitoring results be incorporated directly into the semi-annual report template. The EPA recommends that owners or operators include a list of parameters analyzed (as specified in the approved Testing and Monitoring Plan), a description of the sampling locations and methodology, and a tabulation of the analytical results, including results from any QA/QC samples. To facilitate identification and evaluation of temporal trends, the EPA recommends that owners or operators submit the results of previous analyses, including baseline data. In addition to the analytical testing results, the EPA recommends that owners or operators include an interpretative narrative that discusses any changing trends, any evidence of carbon dioxide reaching the surface, and any implications for project operations or USDW protection. This narrative may be supported by maps and graphs, as appropriate. In general, owners or operators should provide any information necessary to demonstrate compliance with the Class VI permit and the approved Testing and Monitoring Plan, including the approved QASP. Any supplemental

materials that owners or operators wish to provide (e.g., copies of laboratory reports, GIS files) can be provided separately using the designated field in the module. If any emergency reporting was conducted pursuant to 40 CFR 146.91(c)(5), as described in Section 5.4, the EPA recommends that owners or operators include a cross-reference to the associated submittals.

## 5.2 Well Testing Notifications and Results

The Class VI Rule contains special reporting requirements for well tests and related activities, including MITs, stimulation activities, and workovers. First, owners or operators must notify the UIC Program Director in writing 30 days before any planned workovers, stimulation activities (other than those conducted for formation testing under 40 CFR 146.82), and other planned tests of the injection well [40 CFR 146.91(d)]. Second, owners or operators must submit the results of MITs, workovers, and other tests of the injection well (if required by the UIC Program Director) within 30 days of the activity [40 CFR 146.91(b)]. The EPA expects that any project-specific requirements, such as which well tests require 30-day reporting under 40 CFR 146.91(b)(3), will be incorporated into the project's permit conditions and/or the approved Testing and Monitoring Plan.

### Well Testing Notifications and Results Requirements

- Notifications of planned workovers, stimulations, and well tests  
40 CFR 146.91(d)
- Results of MITs, workovers, and other well tests (if required by the UIC Program Director)  
40 CFR 146.91(b)

Both types of submissions described above can be made using the GSDT's Injection and Post-Injection Phase Reporting module. Background information on well testing and the associated Class VI Rule requirements can be found in the *UIC Program Class VI Well Testing and Monitoring Guidance*.

For notifications made pursuant to 40 CFR 146.91(d), the EPA recommends that owners or operators upload a PDF letter stating the date/time/location of the planned activity and providing

a brief description of what will be done. Owners or operators may also want to state the purpose of the activity or the applicable permit condition/Class VI Rule requirement that it will fulfill. The EPA does not anticipate that owners or operators will need to submit any supplemental materials to accompany this notification letter, but the Injection and Post-Injection Phase Reporting module does provide the option to do so.

When submitting the results of well tests and other activities pursuant to 40 CFR 146.91(b), the EPA recommends that owners or operators upload a brief narrative report (in PDF) summarizing the procedures used and any key interpretations/outcomes. Owners or operators may use the field for supplemental materials to upload items such as log

### Well Testing Notifications and Results Submissions

#### Class VI Rule requirements:

- 40 CFR 146.91(d)
- 40 CFR 146.91(b)

- Injection and Post-Injection Phase Reporting module

#### Reference documents:

- *UIC Program Class VI Well Testing and Monitoring Guidance*

#### Electronic resources:

- GSDT user guides

files or log analyst reports; alternatively, these items may be incorporated directly into the owner or operator's narrative file.

While the specific information to be submitted will vary depending on the type and purpose of the test or other activity, owners or operators are encouraged to submit details such as the following (as applicable):

- Operating conditions during testing, including injection rate, pressure, and temperature, or the conditions and timing associated with shutting-in the well.
- The numbers and locations of measurement stations (e.g., for oxygen activation logs).
- The name of the logging company and log analyst(s) responsible for preparing or interpreting the results.
- Plots of results (e.g., for pressure fall-off tests, a plot of change in pressure as a function of time) and information on any data processing methods used.
- Details on instrumentation, including relevant information related to calibration or QA/QC.
- A description of any anomalous results, including records of any corrective action or other activities undertaken in response to the test results.
- A comparison of the current results to previous results and any implications for project plans, predictions, or operations.

The EPA encourages owners or operators to contact their permitting authority to discuss any questions related to submitting well test results. Note that any failure to maintain mechanical integrity must be reported within 24 hours, pursuant to 40 CFR 146.91(c); see Section 5.4.1 for more information on the associated submissions.

### 5.3 Project Plan Amendments and Other Periodic Reporting

In addition to the specific reporting requirements at 40 CFR 146.91, owners or operators must also submit information related to AoR reevaluations, project plan amendments, and financial responsibility during the injection phase. Like other planned reporting during the injection phase, the purpose of these submissions is to demonstrate compliance with permit and Class VI Rule requirements and to demonstrate that the project is operating in a way that is protective of USDWs.

While the Class VI Rule includes minimum timing requirements for these periodic reporting activities, the actual reporting schedule for an individual project (including criteria that would trigger

#### Project Plan Amendments and Other Periodic Reporting Requirements

- AoR reevaluations, including an amended AoR and Corrective Action Plan or a demonstration that no amendment is needed  
40 CFR 146.84(e)(4)
- Other amended project plans, or (if applicable) justifications that no amendments are needed  
40 CFR 146.90(j), 146.93(a)(4), 146.94(d)
- Financial responsibility cost estimate and instrument updates  
40 CFR 146.85(a)(5)(ii), (c)(2), (c)(4), (d)(3), (e)

unscheduled AoR reevaluations or plan reviews) will be specified in that project's permit and approved project plans. Depending on the item to be submitted, owners or operators will use the AoR and Corrective Action module, the Project Plan Submissions module, and/or the Financial Responsibility Demonstration module to make these submissions. The subsections below provide recommendations for each action.

### 5.3.1 AoR Reevaluations and Corrective Action

Owners or operators of Class VI injection wells are required to reevaluate the AoR delineation at a fixed frequency not to exceed five years, as specified in the AoR and Corrective Action Plan, or when warranted by monitoring and operational conditions [40 CFR 146.84(e)]. The purpose of the reevaluation is to ensure that the AoR delineation continues to represent the area where USDWs may be endangered by the injection activities, as required by 40 CFR 146.84(a).

Procedures and processes associated with AoR reevaluations are described in Section 4 of the *UIC Program Class VI Well Area of Review Evaluation and Corrective Action Guidance*. In general, the EPA anticipates that owners or operators will compare testing and monitoring results and other newly acquired project data to the modeled predictions generated during AoR delineation. Depending on the project and the approach that the owner or operator chooses to take, this may or may not involve additional computational modeling. Regardless of the approach used, the owner or operator will ultimately need to submit one of two items:

1. A technical demonstration, supported by project data, that the existing AoR delineation (and the AoR and Corrective Action Plan) remains appropriate; or
2. An amended AoR and Corrective Action Plan with a modified AoR delineation based on computational modeling (and, potentially, an updated corrective action strategy).

#### **AoR Reevaluation and Corrective Action Submissions**

##### Class VI Rule requirements:

- 40 CFR 146.84(e)

##### Relevant GSDT modules:

- AoR and Corrective Action module

##### Reference documents:

- *UIC Program Class VI Well Area of Review Evaluation and Corrective Action Guidance*
- *UIC Program Class VI Well Project Plan Development Guidance*

##### Electronic resources:

- AoR and Corrective Action Plan template
- GSDT user guides

Owners or operators can submit all reevaluation information using the AoR and Corrective Action module of the GSDT. For a demonstration that the existing AoR remains appropriate, the EPA recommends that owners or operators submit a narrative PDF document that compares all available, relevant project data (e.g., from site characterization, operations, and testing and monitoring) to the computational predictions and/or the inputs that supported the existing AoR delineation. The EPA recommends that data presentation formats such as maps, diagrams, and charts/graphs be incorporated into the narrative; the actual data supporting this synthesis can be submitted separately as a supplement to the narrative PDF. Owners or operators are also encouraged to cross-reference semi-annual reports or other testing and monitoring submissions. If any computational modeling was conducted to support the demonstration, the owner or

operator may also need to update some of the other tabs in the module to reflect the changes to the associated parameters, results, etc. When considered together, this submission will serve as the demonstration that no plan amendment is needed, pursuant to 40 CFR 146.84(e)(4).

If the owner or operator is submitting an amended AoR and Corrective Action Plan as a result of the reevaluation, the EPA expects that an analysis of the reevaluation and its outcome (similar to that described above) will also be submitted. The owner or operator should use the AoR and Corrective Action module to submit a description of inconsistencies found during the reevaluation and all necessary changes to the modeling data (e.g., associated with the calibration of the model) used for the delineation of the new AoR. The amended AoR and Corrective Action Plan should benchmark any changes to the AoR delineation process and provide an updated corrective action strategy (or a demonstration that one is not needed). Note that, if the permitting authority made any changes to the submitted plan before incorporating it into the permit, the existing file in the module may not be exactly the same as the approved plan. When amending the plan, the EPA recommends that owners or operators ensure that they are using the current, approved plan as a starting point.

Because of the flexibility that the Class VI Rule allows for AoR reevaluations and associated reporting, the EPA encourages owners or operators to contact their permitting authority prior to submitting their first AoR reevaluation documentation to discuss any questions related to the reevaluation approach or what information should be submitted.

If a revised AoR has been delineated, owners or operators must also identify all wells in the reevaluated AoR that require corrective action [40 CFR 146.84(e)(2)]. For any newly identified wells (i.e., wells that were not within the previously delineated AoR), the owner or operator must submit a description of each well's type, construction, date drilled, location, depth, and record of plugging and/or completion, as well as any additional information required by the UIC Program Director [40 CFR 146.84(c)(2)] and, if necessary, perform corrective action on these wells [40 CFR 146.84(e)(3)]. The EPA recommends that owners or operators communicate with their permitting authorities before conducting corrective action on wells that were not previously identified in the AoR and Corrective Action Plan. As described above, the AoR and Corrective Action module is designed to facilitate submission of all corrective action materials, including any documentation of corrective action that has been performed, such as plugging reports, records of any remedial cementing, etc.

The AoR and Corrective Action module can also be used to submit documentation of corrective action conducted on a phased schedule during the injection phase (i.e., pre-scheduled corrective action that is not associated with an AoR reevaluation), if such activities are included in the approved AoR and Corrective Action Plan. For these phased corrective action submissions, owners or operators may update just the corrective action section of the reporting module; no modeling or project plan submissions are necessary.

### **5.3.2 Other Project Plan Amendments**

Owners or operators must periodically review their Testing and Monitoring Plan and Emergency and Remedial Response Plan, and either make amendments or demonstrate that no amendments are needed [40 CFR 146.90(j) and 146.94(d)]. These reviews will occur after AoR reevaluations

and/or significant changes to the facility; like AoR reevaluations, the actual reporting schedule for an individual project (including criteria that would trigger unscheduled plan reviews) will be specified in that project's permit and approved project plans. The Class VI Rule does not require formal periodic reviews and amendments of the Injection Well Plugging Plan or the PISC and Site Closure Plan during the injection phase; however, 40 CFR 146.93(a)(4) states that owners or operators may submit a modified PISC and Site Closure Plan at any time during the life of the project.

Depending on the results of the most recent AoR reevaluation (see Section 5.3.1), the extent of any recent changes to the project, and other factors, owners or operators may submit either an amended project plan or a demonstration that no amendment is needed. More information on completing and documenting project plan amendments can be found in the *UIC Program Class VI Well Testing and Monitoring Guidance*, the *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*, and the *UIC Program Class VI Well Project Plan Development Guidance*.

Both the amended project plans and the justifications that no plan amendments are needed can be submitted using the Project Plan Submissions module. If owners or operators determine that no plan amendment is necessary, the EPA recommends that, to meet the requirements for this demonstration, owners or operators submit a narrative document describing the approach used to evaluate the plan (which should be consistent with the approach outlined in the existing approved plan) and the outcome of this evaluation. Owners or operators should support this discussion with project data presented in the form of maps, graphs/charts, tables, diagrams, or other formats as appropriate. The EPA recommends that the demonstration document be provided as a single PDF; supplemental items that are not compatible with this format, like GIS files, can be uploaded separately in the field designated for appendices and supporting materials.

The EPA expects that amended project plans will have a similar content and format as the original approved plans: PDF files developed using the templates provided in the Project Plan Submissions module, with any materials that cannot or are not intended to be incorporated into the plan uploaded separately. Owners or operators can use the same procedures to submit amended plans as in previous project phases (see Section 4.5). Note that, if the permitting authority made any changes to a plan before incorporating it into the permit, the existing file in the Project Plan Submissions module may not be exactly the same as the approved plan. When amending a project plan, the EPA recommends that owners or operators ensure that they are using the current, approved plan as a starting point.

#### Other Project Plan Submissions

##### Class VI Rule requirements:

- 40 CFR 146.90(j)
- 40 CFR 146.93(a)(4)
- 40 CFR 146.94(d)

- GSDT user guides

### 5.3.3 Financial Responsibility Updates

The Class VI Rule requires that owners or operators update their financial responsibility cost estimates on an annual basis to adjust for inflation [40 CFR 146.85(c)(2)]. The cost estimate must also be updated if the AoR and Corrective Action Plan, the Injection Well Plugging Plan,

#### Financial Responsibility Submissions

##### Class VI Rule requirements:

- 40 CFR 146.85(a)(5)(ii), (c)(2) and (4), and (e)

##### Relevant GSDT modules:

- Financial Responsibility Demonstration module

##### Reference documents:

##### Electronic resources:

- Online materials at <http://www.epa.gov/uic/financial-responsibilities-underground-injection-well-owners-or-operators>
- GSDT user guides

the PISC and Site Closure Plan, or the Emergency and Remedial Response Plan are amended [40 CFR 146.85(c)(2)], or if the UIC Program Director determines during the annual adjustment that the estimate is no longer adequate [40 CFR 146.85(e)]. In addition, the Class VI Rule requires that the financial responsibility instruments be updated (or additional instruments secured) if the cost estimate increases to an amount greater than the face amount of the financial instrument(s) currently in use [40 CFR 146.85(c)(4)].

Recommendations for generating these materials (including developing cost estimates) is provided in the *UIC Program Class VI Financial Responsibility Guidance*. The EPA anticipates that the content and format of the updated documentation will be similar to that of the items submitted during the permit application process or the previous financial responsibility update (see Sections 3.1.3 and 4.6).

Both cost estimate and financial instrument updates can be submitted using the GSDT's Financial Responsibility Demonstration module, using the tabs associated with the applicable activity or instrument. When preparing these submissions, the EPA recommends that owners or operators delete any obsolete information from the module (including both directly entered data and uploaded files) and replace it with an up-to-date version. The EPA encourages owners or operators to contact their permitting authority to discuss the timing of cost estimate or financial instrument updates or any other questions related to submitting financial responsibility information.

### 5.4 Emergency and Remedial Response and Other Occasional Reporting

In certain situations, owners or operators must submit notifications and other documentation associated with unexpected events. The Class VI Rule includes specific requirements for reporting associated with emergency and remedial response, as well as for adverse financial conditions (such as bankruptcy) experienced by either the owner or operator or a third-party provider of a financial responsibility instrument. While the EPA

#### Emergency and Remedial Response and Other Occasional Reporting Requirements

- Emergency notifications and follow-up submissions  
*40 CFR 146.88(f)(3)-(5), 146.91(c) and (e), 146.94(b)-(c)*
- Notifications of adverse financial conditions  
*40 CFR 146.85(d)*

anticipates that emergency situations will likely require direct (non-GSDT) communication between the owner or operator and the permitting authority, all notifications, reports, and other required submissions must still be submitted electronically in compliance with 40 CFR 146.91(e).

The GSDT's Injection and Post-Injection Phase Reporting module and Financial Responsibility Demonstration modules facilitate the submission of emergency and remedial response materials and notifications of adverse financial conditions, respectively. The subsections below provide recommendations specific to both of these types of submissions. The Injection and Post-Injection Phase Reporting module can also be used to submit other types of materials that may be required by a Class VI permit and are not otherwise accommodated by the GSDT. Owners or operators can use the Other Submissions tab of the module for this purpose and enter a brief description of the item they are submitting in the designated text-entry field.

#### 5.4.1 Emergency and Remedial Response

The Class VI Rule lists several situations or events that require owners or operators to submit emergency notifications. Specifically, the owner or operator must report any of the following within 24 hours:

- Any evidence that the injected carbon dioxide stream or associated pressure front may cause endangerment of a USDW [40 CFR 146.91(c)(1), 146.94(b)(3)].
- Any noncompliance with permit conditions or equipment malfunctions that may cause fluid movement into a USDW [40 CFR 146.91(c)(2)].
- Any triggering of the automatic shut-off system [40 CFR 146.88(f)(3), 146.91(c)(3)].
- Any failure to maintain mechanical integrity [40 CFR 146.91(c)(4)].
- Any release of carbon dioxide to the atmosphere or biosphere, for projects with surface air and/or soil gas monitoring [40 CFR 146.91(c)(5)].

##### **Emergency and Remedial Response Submissions**

###### Class VI Rule requirements:

- 40 CFR 146.88(f)(3)-(5), 146.91(c) and (e), 146.94(b)-(c)

###### Relevant GSDT modules:

- Injection and Post-Injection Phase Reporting module

###### Reference documents:

- UIC Program Class VI Project Plan Development Guidance

###### Electronic resources:

- GSDT user guides

The EPA anticipates that the initial emergency notification will likely take the form of a phone call or other immediate mode outlined in the Emergency and Remedial Response Plan. However, the formal notification must still be submitted electronically in compliance with 40 CFR 146.91(e). In addition, after an emergency event has occurred, an owner or operator may need to submit follow-up information, such as a demonstration that USDWs will not be endangered by resuming injection [40 CFR 146.94(c)], a demonstration that mechanical integrity has been restored [40 CFR 146.88(f)(4)], or documentation that remedial actions or other procedures have been carried out according to the Emergency and Remedial Response Plan or as requested by the UIC Program Director. Any project-

specific requirements associated with these notifications and follow-up submissions will be established in the project's approved Emergency and Remedial Response Plan. See the *UIC Program Class VI Well Project Plan Development Guidance* for further information.

Both notifications and follow-up submissions can be submitted using the Emergency and Remedial Response tab of the Injection and Post-Injection Phase Reporting module. The EPA recommends that notifications consist of a PDF letter containing the date/time/location of the event and a brief description of what occurred. Follow-up documentation may take various formats, such as narrative descriptions of remedial activities, results of MITs, monitoring data, or additional notifications (e.g., notifications that injection will resume, per 40 CFR 146.88(f)(5)). Because of the wide variety of potential follow-up submissions, the EPA recommends that owners or operators review their Emergency and Remedial Response Plan and consult with their permitting authority to determine the appropriate materials to submit.

#### 5.4.2 Notifications of Adverse Financial Conditions

The Class VI Rule requires owners or operators to notify their UIC Program Director of any adverse financial conditions that may affect their ability to cover the costs of any of the required activities guaranteed by the financial responsibility instruments [40 CFR 146.85(d)]. These events could include bankruptcy or other adverse financial conditions experienced by the owner or operator, a third-party provider of a financial instrument, or a corporate guarantor.

The EPA anticipates that specific conditions associated with these notifications will be stated in the financial instruments themselves. The *UIC Program Class VI Financial Responsibility Guidance* provides further information on this. Unless otherwise specified in the permit or financial instruments, the EPA recommends that the notification consist of a PDF letter describing the situation and the owner or operator's plans to establish other means of financial assurance.

Note that, in the case of bankruptcy proceedings, the Class VI Rule requires that a notification be sent by certified mail within 10 days of commencement of the proceedings [40 CFR 146.85(d)(1)]. The EPA recommends that owners or operators submit the notification first using the GSDT and follow it with the certified mail letter. Submitting the notification via the GSDT allows owners or operators to rapidly alert their permitting authority, as well as to comply with the Class VI Rule's electronic reporting requirement under 40 CFR 146.91(e).

##### Adverse Financial Conditions Submissions

###### Class VI Rule requirements:

###### Electronic resources:

- GSDT user guides

## 6 Post-Injection Phase Reporting and Recordkeeping

Following cessation of injection, a Class VI project enters the post-injection phase. During this phase, owners or operators will plug the injection well, perform PISC testing and monitoring, demonstrate that the site no longer poses an endangerment to USDWs, and close the site, pursuant to 40 CFR 146.92 and 146.93. These activities (and their associated reporting requirements) are intended to demonstrate that the site is managed and monitored properly following the cessation of injection, to maintain protection of USDWs through the end of the project's lifespan. Because injection wells may be converted to monitoring wells after injection has ceased, injection well plugging is not required to take place at the beginning of the post-injection phase. However, pursuant to 40 CFR 146.93(f)(1), the site closure report must include documentation of appropriate injection well and monitoring well plugging as specified in 40 CFR 146.92 and 146.93(e), regardless of when the injection well plugging took place.

Information that owners or operators will submit during this phase of a Class VI project is summarized below in Table 6-1. The Class VI Rule, at 40 CFR 146.91(f)(4), states that well plugging reports, PISC data (including information used to develop the alternative PISC timeframe), and site closure reports must be retained for 10 years following site closure. Pursuant to 40 CFR 146.93(h), the owner or operator must deliver the records to the UIC Program Director at the conclusion of this retention period. Owners or operators should discuss plans for this transfer with their permitting authority. Note that the Class VI Rule, at 40 CFR 146.91(f)(5), also grants the UIC Program Director the authority to require owners or operators to retain records from any project phase for more than 10 years after site closure.

**Table 6-1. Summary of submittals to be made during the post-injection phase.**

Reporting Requirement	Relevant GSDT Modules	Recommended Format	Timing and Frequency
Injection Well Plugging Plan amendments, if necessary [40 CFR 146.92(c)]	Project Plan Submissions module	A single uploaded PDF, with supporting data and other supplemental materials uploaded separately as necessary	Upon cessation of injection
Notice of intent to plug the injection well [40 CFR 145.92(c)]	Injection and Post-Injection Phase Reporting module	Uploaded PDF letter	At least 60 days before scheduled well plugging
Well plugging report [40 CFR 146.92(d)]	Injection and Post-Injection Phase Reporting module	A single uploaded PDF, with supporting data and other supplemental materials uploaded separately as necessary	Within 60 days of well plugging
PISC and Site Closure Plan Amendments or justification that no amendment is needed [40 CFR 146.93(a)(3)]	Project Plan Submissions module	A single uploaded PDF, with supporting data and other supplemental materials uploaded separately as necessary	Upon cessation of injection

Reporting Requirement	Relevant GSDT Modules	Recommended Format	Timing and Frequency
PISC monitoring results [40 CFR 146.93(b)]	Injection and Post- Injection Phase Reporting module	A single uploaded PDF containing the narrative component of each report, with supporting data and other supplemental materials uploaded separately as necessary	As specified in the approved PISC and Site Closure Plan
Non-endangerment demonstration [40 CFR 146.93(b)(3)]	Non-Endangerment Demonstration module	Uploaded files in PDF and other formats and references to previously submitted materials	At end of 50 years or the approved alternative PISC timeframe, or based on site-specific data
Notice of intent for site closure [40 CFR 146.93(d)]	Injection and Post- Injection Phase Reporting module	Uploaded PDF letter	At least 120 days before site closure
Notice of intent to plug monitoring wells [N/A*]	Injection and Post- Injection Phase Reporting module	Uploaded PDF letter	N/A
Site closure report [40 CFR 146.93(f)]	Injection and Post- Injection Phase Reporting module	A single uploaded PDF, with supporting data and other supplemental materials uploaded separately as necessary	Within 90 days of site closure

\*This item is not specifically required by the Class VI Rule; however, the EPA recommends that owners or operators provide notification before plugging monitoring wells. The requirement to plug monitoring wells appears in the Class VI Rule at 40 CFR 146.93(e).

In addition to the reporting requirements that are specific to the post-injection phase, some injection phase reporting requirements continue to apply after injection has ceased. (Other injection phase reporting requirements, such as those associated with operational monitoring, do not.) To avoid redundancy, the injection phase reporting activities that continue through the post-injection phase activities are not discussed in the subsections below; refer to Section 5 for recommendations on submitting the associated materials. Injection phase reporting requirements that continue to apply through the post-injection phase are as follows:

- AoR reevaluations and corrective action updates, including amendments to the AoR and Corrective Action Plan, if necessary (see Section 5.3.1).
- Other project plan reviews and amendments (see Section 5.3.2). While the Testing and Monitoring Plan will no longer be in effect after the cessation of injection, the Emergency and Remedial Response Plan may need to be amended following AoR reevaluations or other project-specific criteria. Note that there are also post-injection phase requirements related to the Injection Well Plugging Plan and the PISC and Site Closure Plan, which are discussed in Sections 6.1.1, 6.2.1, and 6.3.1 below.

- Financial responsibility cost estimate and financial instrument updates (see Section 5.3.3). Note that, pursuant to 40 CFR 146.85(b)(2), an owner or operator may be released from a financial instrument by the UIC Program Director if the associated project phase has been completed and the owner or operator has fulfilled all necessary financial obligations.
- Emergency and remedial response reporting, if necessary (see Section 5.4.1).
- Notifications of adverse financial conditions, if necessary (see Section 5.4.2).

The post-injection phase reporting schedule for each of these items will likely vary among projects and will be specified in each project's permit conditions and/or the applicable approved project plans. The EPA encourages owners or operators to contact their permitting authorities to discuss any questions or concerns related to post-injection phase reporting of these activities.

## 6.1 Injection Well Plugging

Requirements for injection well plugging are provided in the Class VI Rule at 40 CFR 146.92. Before plugging the injection well, owners or operators must notify the UIC Program Director and (if necessary) submit an amended Injection Well Plugging Plan [40 CFR 146.92(c)]. After

### Injection Well Plugging Requirements

- Notice of intent to plug  
40 CFR 146.92(c)
- Amended Injection Well Plugging Plan, if necessary  
40 CFR 146.92(c)
- Well plugging report  
40 CFR 146.92(d)

the plugging activities are complete, the owner or operator must submit an injection well plugging report [40 CFR 146.92(d)]. The Injection and Post Injection Phase Reporting module and the Project Plan Submissions module of the GSDT were designed to facilitate submission of these items.

As noted above, injection wells may be converted to monitoring wells after injection has ceased, so injection well plugging is not required to take place at the beginning of the post-injection phase. The only timing requirement specified in the Class VI

Rule is that plugging take place before site closure, so that the necessary plugging records can be incorporated into the site closure report per 40 CFR 146.93(f)(1). The EPA recommends that owners or operators notify their permitting authorities before and after converting the injection well to a monitoring well, including a general description of what activities (e.g., removal of well equipment) will take place/have taken place.

### 6.1.1 Pre-Plugging Submissions

The owner or operator must notify the UIC Program Director at least 60 days before plugging the injection well (though a shorter notice period may be allowed by the Director), pursuant to 40 CFR 146.92(c). As noted above, the Class VI Rule allows injection well plugging to occur at any time during the post-injection phase. However, if injection well plugging does take place at the beginning of the post-injection phase, it may be necessary to submit the notice of intent to plug *before* injection ends, in order to meet the 60-day requirement. In addition, if any changes have been made to the original, approved Injection Well Plugging Plan, the owner or operator must also provide the amended plan at this time. More details about the injection well plugging

requirements can be found in the *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*, and recommendations related to the Injection Well Plugging Plan are provided in the *UIC Program Class VI Well Project Plan Development Guidance*.

The notice of intent to plug can be submitted using the Injection and Post-Injection Phase module of the GSDT, on the Other Submissions tab. The EPA recommends that owners or operators upload a PDF letter stating the time and date of the planned activity and providing a brief description of what will be done. A template to guide the development of this letter is available for download from the GSDT. The EPA does not anticipate that owners or operators will need to submit any supplemental materials to accompany this notification letter, but the Injection and Post-Injection Phase Reporting module provides the option to do so.

#### **Pre-Plugging Submissions**

- Project Plan Submissions module

##### Reference documents:

- *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*
- *UIC Program Class VI Well Project Plan Development Guidance*

##### Electronic resources:

- Injection Well Plugging Plan template
- Notice of intent to plug template
- GSDT user guides

Owners or operators can use the Project Plan Submissions module to submit the amended Injection Well Plugging Plan, if necessary. The EPA expects that the plan will have a similar content and format as the original approved plan: a PDF file developed using the template provided in the Project Plan Submissions module, with any materials that cannot or are not intended to be incorporated into the plan itself uploaded separately. Owners or operators can use the same procedures to submit amended plans as in previous project phases (see Section 4.5). Note that, if the permitting authority made any changes to the plan before incorporating it into the permit, the existing file in the Project Plan Submissions module may not be exactly the same as the approved plan. When revising the plan file, the EPA recommends that owners or operators ensure that they are using the current, approved plan as a starting point.

The Class VI Rule does not require that owners or operators submit a justification that no amendment to the Injection Well Plugging Plan is needed. However, the EPA recommends that owners or operators submit a statement to this effect in the Project Plan Submissions module (e.g., in the form of a brief letter in PDF), so that the GSDT contains a full record of documentation for the project. The EPA recommends that owners or operators contact their permitting authority if there is uncertainty about whether an amended plan is needed.

In addition to the notice of intent to plug and the amended Injection Well Plugging Plan, owners or operators may also need to conduct reporting related to the preparatory activities specified at 40 CFR 146.92(a). For example, the external MIT required before plugging the injection well is subject to the notification and reporting requirements under 40 CFR 146.91(b) and (d). See Section 5.2 for more information on these reporting requirements.

## 6.1.2 Well Plugging Report

Following plugging of the injection well, owners or operators must submit a report detailing how the well was plugged, pursuant to 40 CFR 146.92(d). The Class VI Rule specifies that this report must be certified as accurate by the owner or operator and by the person who performed the

plugging operation (if other than the owner or operator). The plugging report serves to demonstrate that plugging was carried out in compliance with the Class VI Rule and the approved Injection Well Plugging Plan, so that the well does not pose an endangerment to USDWs.

### Well Plugging Report Submissions

#### Class VI Rule requirements:

- 40 CFR 146.92(d)

#### Relevant GSDT modules:

- Injection and Post-Injection Reporting Phase module

#### Reference documents:

- *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*

#### Electronic resources:

- Well plugging report template
- GSDT user guides

The Class VI Rule does not specify the contents of the plugging report, but recommendations are provided in the *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*, and a template is available for download from the GSDT. In general, the EPA recommends that the well plugging report include a description of both the pre-plugging activities conducted pursuant to 40 CFR 146.92(a), including the results of the final external MIT, and the procedures/outcomes of the actual plugging operation (including any

schematic/drawings). The EPA recommends that the well plugging report be compiled into a single PDF and uploaded to the Other Submissions tab of the Injection and Post-Injection Phase Reporting module. Supplemental materials not compatible with this format can be uploaded separately in the designated field.

## 6.2 PISC Reporting

The Class VI Rule, at 40 CFR 146.93(a)-(b), provides a set of requirements for PISC activities. Upon cessation of injection, the owner or operator must submit an amended PISC and Site Closure Plan or a demonstration that no amendment is needed [40 CFR 146.93(a)(3)]. During the post-injection phase, owners or operators must conduct monitoring and submit the results as specified in the approved PISC and Site Closure Plan, until they can demonstrate that no additional monitoring is needed to ensure that the project does not pose an endangerment to USDWs [40 CFR 146.93(b)]. In the GSDT, owners or operators can use designated sections of the Project Plan Submissions module, the Injection and Post-Injection Phase Reporting module, and the Non-Endangerment Demonstration module to submit the required materials.

### PISC Reporting Requirements

- Amended PISC and Site Closure Plan, if necessary  
*40 CFR 146.93(a)(3)*
- PISC testing and monitoring results  
*40 CFR 146.93(a)(2)(iv), (b)*
- Non-endangerment demonstration  
*40 CFR 146.93(b)(3)*

### 6.2.1 PISC and Site Closure Plan

Upon cessation of injection, the Class VI Rule requires that owners or operators either submit an amended PISC and Site Closure Plan or demonstrate to the UIC Program Director through monitoring data and modeling results that no amendment to the plan is needed [40 CFR 146.93(a)(3)]. More information on completing and documenting this plan amendment can be found in the *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance* and the *UIC Program Class VI Well Project Plan Development Guidance*.

Both the amended project plan and the justification that no plan amendment is needed (whichever is appropriate for the individual project) can be submitted using the Project Plan Submissions module. If owners or operators determine that no plan amendment is necessary, the EPA recommends that they submit a narrative document describing the approach used to evaluate the plan and the outcome of this evaluation. The EPA recommends that the narrative address all of the elements in the approved plan and be based on both monitoring data related to ground water quality and plume and pressure front tracking collected during injection and recent revisions of the site computational model, to ensure compliance with 40 CFR 146.93(a)(3). Owners or operators should support this discussion with project data presented in the form of maps, graphs/charts, tables, diagrams, or other formats as appropriate. If an owner or operator proposes an alternative PISC timeframe as part of the Post-Injection Site Care Plan amendment, the EPA recommends that they thoroughly justify the alternative timeframe using the criteria at 40 CFR 146.93(c). The EPA recommends that the demonstration document be provided as a single PDF; supplemental items that are not compatible with this format, like GIS files, can be uploaded separately in the field designated for appendices and supporting materials.

The EPA anticipates that the amended PISC and Site Closure Plan, if one is needed, will have a similar content and format as the existing approved plan (e.g., a PDF file developed using the template provided in the Project Plan Submissions module, with any supplemental materials uploaded separately in the designated field). The EPA recommends that owners or operators discuss the need for plan amendments with their permitting authority, keeping in mind the need to collect a sufficient amount of data to inform the non-endangerment demonstration and the UIC Program Director's assessment that site closure is appropriate (see Sections 6.2.3 and 6.3).

### 6.2.2 PISC Monitoring Results

During the post-injection period, the owner or operator must implement the approved PISC and Site Closure Plan and report the results of PISC monitoring as specified in the plan. Post-injection monitoring must be performed for the duration of the PISC timeframe (either the default 50-year period or an approved alternative timeframe) or until the owner or operator can demonstrate non-endangerment to USDWs [40 CFR 146.93(b)(1)].

Similar to monitoring results submitted during the injection phase, post-injection monitoring submissions serve to demonstrate that the project is in compliance with the Class VI permit, to identify any endangerment of USDWs, and to generate data to support AoR reevaluations and the demonstration of non-endangerment.

The Class VI Rule does not specify the content, format, or timing of PISC monitoring submissions; the EPA expects that these will be determined on a project-specific basis in each project's PISC and Site Closure Plan. However, in general, the EPA anticipates that these submissions will have a similar format to the semi-annual reports of testing and monitoring results submitted during the injection phase: a PDF document containing a compilation of monitoring results (e.g., of MITs, ground water analysis, and plume and pressure front tracking) and associated interpretation, accompanied by attachments or other supplemental materials as necessary. The GSDT provides a template that owners or operators can download and use to guide the development of this document.

#### **PISC Monitoring Results Submissions**

##### Class VI Rule requirements:

- 40 CFR 146.93(a)(2)(iv), (b)

##### Relevant GSDT modules:

- Injection and Post-Injection Phase Reporting module

##### Reference documents:

- *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*
- *UIC Program Class VI Well Testing and Monitoring Guidance*

##### Electronic resources:

- PISC monitoring report template
- GSDT user guides

Owners or operators can use the Other Submissions tab of the Injection and Post-Injection Phase Reporting module to submit their PISC monitoring results. The *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance* and the *UIC Program Class VI Well Testing and*

*Monitoring Guidance* provide recommendations for conducting PISC monitoring activities and submitting the results.

### **6.2.3 Non-Endangerment Demonstration**

Prior to receiving authorization for site closure, the owner or operator must submit a demonstration, based on monitoring results and other site-specific information, that no additional monitoring is needed to ensure that the Class VI project does not pose an endangerment to USDWs [40 CFR 146.93(b)(3)]. Pursuant to 40 CFR 146.93(b)(2), owners or operators may submit this non-endangerment demonstration at any time during the post-injection phase, even before the end of the designated PISC timeframe. This means that, if non-endangerment is demonstrated to the satisfaction of the UIC Program Director, an owner or operator could potentially receive authorization for site closure before the end of the PISC timeframe.

The data supporting the non-endangerment demonstration will be generated throughout the life of the Class VI project, during injection- and post-injection-phase monitoring and modeling. While the content of the demonstration will necessarily be site specific, the EPA recommends that it address ground water monitoring data, information on the

#### **Non-Endangerment Demonstration Submissions**

##### Class VI Rule requirements:

- 40 CFR 146.93(b)(3)

##### Relevant GSDT modules:

- Non-Endangerment Demonstration module

##### Reference documents:

- *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*

##### Electronic resources:

- Non-endangerment demonstration template
- GSDT user guides

behavior of the carbon dioxide plume and pressure front, and the monitoring results' agreement with any AoR modeling predictions that are being used to support the demonstration, as well as an evaluation of potential conduits for fluid movement. The *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance* provides some additional recommendations for making the non-endangerment demonstration.

The GSDT includes a specific reporting module for non-endangerment demonstrations. The Non-Endangerment Demonstration module provides substantial flexibility to owners or operators, while helping ensure that all the necessary information is submitted. The EPA anticipates that the non-endangerment demonstration will be composed of one or more uploaded files, supplemented by references to previously submitted information (e.g., modeling results submitted using the AoR and Corrective Action module following the last AoR reevaluation). The module provides a template that owners or operators can download and use to guide the development of their submission.

The EPA recommends that owners or operators contact their permitting authorities to discuss any questions related to the non-endangerment demonstration submission, especially if the content of the demonstration is not specified in the approved PISC and Site Closure Plan.

### 6.3 Site Closure Reporting

Site closure is the final stage of a Class VI project, during which owners or operators submit a notice of intent to close the site, plug all monitoring wells, submit a site closure report, and record a notation on the deed to the facility property or other documents that the land has been used to sequester carbon dioxide [40 CFR

#### Site Closure Requirements

- Notice of intent for site closure  
40 CFR 146.93(d)
- Amended PISC and Site Closure Plan, if necessary  
40 CFR 146.93(d)
- Site closure report  
40 CFR 146.93(f)

146.93(d)-(g)]. The purpose of site closure reporting is to demonstrate compliance with the Class VI Rule and the permit, to demonstrate that monitoring wells are plugged appropriately in a way that is protective of USDWs, and to ensure that future land owners are made aware of the injection history of the site.

The Injection and Post-Injection Phase Reporting module of the GSDT is designed to facilitate the submission of site closure-related materials.

#### 6.3.1 Pre-Site Closure Submissions

Owners or operators must notify the UIC Program Director of their intent to close a Class VI project site at least 120 days in advance of the intended site closure date, or on a schedule with a shorter notice period if allowed by the Director [40 CFR 146.93(d)]. At this time, if any changes have been made to the original PISC and Site Closure Plan, the owner or operator must also provide the amended plan. More details about the site closure process and templates for the submittals can be found in the *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*, and recommendations related to the PISC and Site Closure Plan are provided in the *UIC Program Class VI Well Project Plan Development Guidance*.

The notice of intent for site closure can be submitted using the Injection and Post-Injection Phase module of the GSDT, on the Other Submissions tab. The EPA recommends that owners or operators upload a PDF letter stating the date/time/location of the planned activities (e.g., monitoring well plugging, site restoration tasks) and providing a brief description of what will be done. The GSDT provides a template that owners or operators can download and use to guide the development of this letter. The EPA does not anticipate that owners or operators will need to submit any supplemental materials to accompany this notification letter, but the Injection and Post-Injection Phase Reporting module does provide the option to do so.

Owners or operators can use the Project Plan Submissions module to submit the amended PISC and Site Closure Plan, if one is needed. The EPA expects that the plan will have a similar content and format as the existing, approved plan: a PDF file developed using the template provided in the Project Plan Submissions module, with any materials that cannot or are not intended to be incorporated into the plan itself uploaded separately. Owners or operators can use the same procedures to submit amended plans as in previous project phases (see Section 4.5). Note that, if the permitting authority made any changes to the plan before incorporating it into the permit, the existing file in the Project Plan Submissions module may not be exactly the same as the approved plan. When revising the plan file, the EPA recommends that owners or operators ensure that they are using the current, approved plan as a starting point.

The Class VI Rule does not require that owners or operators submit a justification that no plan amendment is needed prior to site closure. However, the EPA recommends that owners or operators submit a statement to this effect in the Project Plan Submissions module (e.g., in the form of a brief letter in PDF), so that the GSDT contains a full record of documentation for the project. The EPA recommends that owners or operators contact their permitting authority if there is uncertainty regarding whether an amended plan is needed.

The Class VI Rule, at 40 CFR 146.93(e) requires owners or operators to plug all monitoring wells after the UIC Program Director has authorized site closure. (If the injection well was repurposed for use as a monitoring well, it must be plugged in accordance with the Injection Well Plugging Plan, per 40 CFR 146.92(b); see Section 6.1.) While the Class VI Rule does not specifically require advance notification of monitoring well plugging, the EPA recommends that owners or operators notify the UIC Program Director before carrying out these activities (if the specifics are not included in the initial notification of intent for site closure). The EPA recommends that owners or operators use a letter similar to the one submitted in advance of

#### **Pre-Site Closure Submissions**

##### Class VI Rule requirements:

- 40 CFR 146.93(d)

##### Relevant GSDT modules:

- Injection and Post-Injection Reporting Phase module
- Project Plan Submissions module

##### Reference documents:

- *UIC Program Guidance on Class VI Well Plugging, Post-Injection Site Care, and Site Closure*

- Notice of intent for site closure template
- GSDT user guides

injection well plugging and upload it to the Other Submissions tab of the Injection and Post-Injection Phase Reporting module.

### 6.3.2 Site Closure Report

The Class VI Rule requires owners or operators to submit a report within 90 days of site closure [40 CFR 146.93(f)]. The Class VI Rule, at 40 CFR 146.93(f)(1)-(3) specifies that the site closure report must include documentation of appropriate injection and monitoring well plugging; a copy of a survey plat that has been submitted to the local zoning authority, showing the location of the injection well; documentation of appropriate notification to applicable state, local, and tribal entities; and records reflecting the nature, composition, and volume of the carbon dioxide stream. Recommendations for notifying the relevant authorities and preparing the site closure report are provided in the *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*.

#### Site Closure Report Submissions

##### Class VI Rule requirements:

- 40 CFR 146.93(f)

##### Relevant GSDT modules:

- Injection and Post-Injection Reporting Phase module

##### Reference documents:

- *UIC Program Class VI Well Plugging, Post-Injection Site Care, and Site Closure Guidance*

##### Electronic resources:

- Site closure report template
- GSDT user guides

The EPA recommends that the site closure report be submitted as a single PDF file. The GSDT provides a template that owners or operators can download and use to guide the development of this document. Supplemental materials that are not compatible with this format (e.g., GIS files) can be uploaded separately in the designated field in the reporting module.

The owner or operator must also record a notation on the deed to the facility property or any other document that is normally examined during a title search [40 CFR 146.93(g)]. Pursuant to 40 CFR 146.93(g)(1)-(3), the notation must state that the land has been used for GS; the name of the government agency with which the survey plat was filed and the address of the EPA regional office to which it was

submitted; and the volume of carbon dioxide injected, the injection zone(s), and the period over which the injection occurred. While the Class VI Rule does not require any formal submissions associated with the deed notation, the EPA recommends that the owner or operator provide evidence of this notation to the EPA, for example by attaching copies of it to the site closure report or uploading the documents separately within the Injection and Post-Injection Reporting module.

INDUSTRIAL COMMISSION  
STATE OF NORTH DAKOTA  
DATE 6/13/24 CASE NO. 30869-880  
Introduced By Braaten  
Exhibit LO-88  
Identified By Svenson

February 9, 2023

Ms. Jessica Petrick  
Public Information Officer II  
ND Oil and Gas Division  
600 E Boulevard Ave Dept 405  
Bismarck ND 58503

Dear Ms. Petrick:

Under the North Dakota Open Records Statute, N.D.C.C. §44-04-18 et seq., I am requesting an opportunity to inspect or obtain copies of public records, including spreadsheets, analysis, correspondence by letter, email or phone records that would be used to determine how "non-consenting pore space owners are or will be equitably compensated" for the Minnkota Power Project Tundra and Red Trail Energy carbon sequestration projects under 38-22-08.14.

Also, I request the information, be it from the same sources as mentioned above, that Mr. Lynn Helms used to formulate/support his statements on January 13<sup>th</sup>, 2023 to the joint Senate and House Energy and Natural Resource Committee members that landowners are receiving a "significant share of that 14% return on investment that's going to the landowners" and "it's in the neighborhood of 10 or 15% of that return on investment". How were these figures arrived at?

If there are any fees for searching or copying these records, please inform me if the cost will exceed \$50. I would request a prompt response to this request. If you expect a significant delay in responding to or in fulfilling this request, please contact me with information about when I might expect copies or the ability to inspect the requested records.

If you deny any or all of this request, please cite each specific exemption you feel justifies the refusal to release the information and notify me of the appeal procedures available to me under the law.

Thank you for considering my request.

Sincerely,

*Michael L. Haupt*

**Attachments:** FOIRnonconsenting.pdf; Guide\_Open-Records.pdf

Please see the below Open Records Request.

If there are questions, please let me know.

Requestor: Michael Haupt

Records Requested:

All records used to determine how "non-consenting pore space owners are or will be equitably compensated" for the Minnkota Power Project Tundra and Red Trail Energy Carbon Sequestration projects. See attached letter request.

*"Record" means recorded information of any kind, regardless of physical form or characteristic by which the information is stored. Record does not include unrecorded thought processes or mental impressions but does include preliminary drafts and working papers.*

Action Requested:

If less than one hour of time, please place documents here: **M:\Open Records-FOIA-AG Opinions\Haupt FOIA**  
If MORE than one of time, please let me know an estimate by the end of Monday, February 13<sup>th</sup>.

Re: Your request for records

DATE

**Records Request:**

See attached request.

- ☒ The records you requested cannot be provided because no such records exist, OR the requested records are not records of this agency. **All negotiations for compensation were private conversations with pore space owners.**
- ☐ Attached are the records as defined by N.D.C.C. § 44-04-17.1(16) and pursuant to N.D.C.C. § 44-04-18(4).
- ☐ Some information is redacted because it is exempt and/or confidential pursuant to:

- ☐ To the extent the requested/other records may exist, the records are/would be confidential or exempt in entirety, under N.D.C.C. §§44-04-19.1(3),(7), 44-04-18.7; 44-04-18(10)
- ☐ The records you requested can be provided however the estimated cost for the requested records is calculated as follows:

\_\_\_\_\_ pages @ 25¢ per page \$\_\_\_\_\_  
\_\_\_\_\_ custom queries resulting in \_\_\_\_\_ rows of data in Excel @ \$1 per 1,000 rows \$\_\_\_\_\_  
\_\_\_\_\_ custom queries resulting in \_\_\_\_\_ rows of data in Excel @ \$50 per 1 GB of Data \$\_\_\_\_\_  
\_\_\_\_\_ other copies @ \$\_\_\_\_\_ each \$\_\_\_\_\_  
\_\_\_\_\_ hours for locating the records @ \$25/hr each [after the first hour] \$\_\_\_\_\_  
\_\_\_\_\_ hours for redacting the records @ \$25/hr each [after the first hour] \$\_\_\_\_\_  
**Total Charges: 0**

Estimated costs are payable *in advance*. We do not waive estimated costs. When we receive payment, we will begin work on your request. The law allows a public entity to charge for electronic records pursuant to N.D.C.C. § 44-04-18(2).

- ☐ If we do not receive payment/hear from you within ten (10) days from today's date, we will assume you have withdrawn your request.
- ☐ Your request for records is extensive. We estimate it will take \_\_\_\_\_ business days to complete your request, *after* we receive full payment.
- ☐ Your request did not provide sufficient information for us to identify specific records. We cannot comply with your request without clarification. Please call me at (701) 328-8036.
- ☒ Please note that all or some of the information you have requested is available through the Oil & Gas Division's Basic or Premium Subscription services. If you are currently a subscriber and have questions regarding using the services or the location of files, please contact our offices. If you are not a subscriber but would like more information, visit our website at [www.dmr.nd.gov/oilgas](http://www.dmr.nd.gov/oilgas)

**To:** Magrum, Jeffery <jmagrum@ndlegis.gov>  
**Subject:** carbon dioxide information

Senator,

The carbon dioxide pipeline information documents are attached.

Also attached is the Mississippi pipeline break report. The Mississippi pipeline is the same size as the Summit Carbon pipeline so I think it would be better to use the volume leaked instead of the length of time of the leak like I did before. The Mississippi break leaked 31,405 barrels which is 5,587 tons.

Following is the link to the air dispersion model:

[RMP\\*Comp | US EPA](#)

To run the model you click on the link then click on begin.

Scroll down and click on carbon oxysulfide. (COS is the model input chemical with the physical and toxicity properties most similar to carbon dioxide).

Scenario type: worst case

Physical state: Liquefied under pressure

Quantity released: type in 5587 and select tons.

Click on submit

For this volume the distance to "safe" levels is 1 mile.

February 25, 2024

To: [oilandgasinfo@nd.gov](mailto:oilandgasinfo@nd.gov)

To whom it may concern,

I am requesting an opportunity to inspect or obtain copies of public records, including spreadsheets, analysis, correspondence by letter, email or phone records that would support the NDIC statutory obligation (38-22-08.10), prior to issuing a permit, to find "That the storage facility will not endanger human health..." for the "Permit for carbon dioxide class VI injection" issued to Blue Flint Sequester Company, LLC, storage facility # 90000373, issued May 31, 2023"

Specifically, I am requesting all related records relating to a carbon dioxide release to atmosphere from the storage facility related equipment, including flow lines, compression and wellbore, including

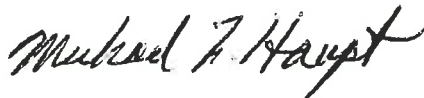

- Means and methods of analysis
- Scenarios modeled, such as
  - o Releases from pressure relief valves
  - o Maximum release downstream of compression facilities due to flowline, pipe, flange or valve failure
  - o Please include the weather assumptions for each scenario (temperature, humidity, wind speed, wind direction)
- Name of software utilized to determine the extent of the CO2 plume
- Name, employer, certifications and North Dakota professional engineering license # of the individual that performed the modeling
- CO2 concentration level delineation at which the commission has determined is safe for human health if there is a release
- Geographic topography assumed

If there are any fees for searching or copying these records, please inform me if the cost will exceed \$50. I would request a prompt response to this request. If you expect a significant delay in responding to or in fulfilling this request, please contact me with information about when I might expect copies or the ability to inspect the requested records.

If you deny any or all of this request, please cite each specific exemption you feel justifies the refusal to release the information and notify me of the appeal procedures available to me under the law.

Thank you for considering my request.

Sincerely,

Michael Haupt

CAUTION: EXTERNAL

Good Afternoon, Michael,

Dispersion models for specific release scenarios from the storage facility isn't information that is provided to our office.

The storage facility permit application within the case file (C29888) does include an Emergency and Remedial Response Plan (ERRP) which discusses the necessary actions that the storage operator will take during a potential emergency event including release of carbon dioxide from storage facility, whether that be from wellbore integrity failure, flow line leak, or other storage facility equipment.

There was also verbal testimony provided during the hearing on what the radius of impact where human life would be endangered during a release would be.

Access to the case file and hearing audio can be found on the Department of Mineral Resources website under premium subscription service.

## STORAGE FACILITY PERMIT APPLICATION COMPARISON SUMMARY

This document categorizes the various SFP application section documents across three storage facility permits:

Category 1) section content that include predominantly the same or similar information (e.g., application/site/well names may vary but remaining information is essentially the same); and

Category 2) section content that is more focused on site-specific data (e.g., unique well or location differences, but predominantly similar processes and analyses).

<p style="text-align: center;"><u>Differences Between SCS Applications</u></p> <p style="text-align: center;">The following highlights sections containing site-specific data differences (beyond applicant/site/well names):</p>			
SFP Permit Section	 <b>SUMMIT CARBON STORAGE #1, LLC</b> TB Leingang / Milton Flemmer 1	 <b>SUMMIT CARBON STORAGE #2, LLC</b> BK Fischer / Archie Erickson 2	 <b>SUMMIT CARBON STORAGE #3, LLC</b> KJ Hintz / Slash Lazy H 5
<u>Project Summary</u>	Applicant name listed first in each application.	Applicant name listed first in each application.	Applicant name listed first in each application.
<u>Section 1</u> Pore Space Access	Minimal content changes between SCS1/TB Leingang & SCS3/KJ Hintz permit applications.	Specific to the SCS2/BKF: due to Coyote Creek Mining Company's Coyote Creek Mine & Dakota Westmoreland Company's Beulah Mine being located within the Hearing Notification Area (HNA) language was added only to SCS2/BK Fischer's Section 1.0.	Minimal content changes between SCS1/TB Leingang & SCS3/KJ Hintz permit applications.

Slash Lazy H 5 – Casing-conveyed gauges</p> <p>2. An in-situ micro-fracture test will be performed in one of the KJ Hintz injection wells.</p>
<b><u>Section 6</u></b> <b>Postinjection Site Care and Facility Closure Plan</b>	<p>There are minimal differences related to monitoring well-specific details (e.g., max pressure differential at the cessation of CO2 injection).</p>	<p>There are minimal differences related to monitoring well-specific details (e.g., max pressure differential at the cessation of CO2 injection).</p>	<p>There are minimal differences related to monitoring well-specific details (e.g., max pressure differential at the cessation of CO2 injection).</p>

<p style="text-align: center;"><b><u>Differences Between SCS Applications</u></b></p> <p style="text-align: center;">The following highlights sections containing site-specific data differences (beyond applicant/site/well names):</p>			
SFP Permit Section	 <b>SUMMIT CARBON STORAGE #1, LLC</b> <b>TB Leingang / Milton Flemmer 1</b>	 <b>SUMMIT CARBON STORAGE #2, LLC</b> <b>BK Fischer / Archie Erickson 2</b>	 <b>SUMMIT CARBON STORAGE #3, LLC</b> <b>KJ Hintz / Slash Lazy H 5</b>
<b><u>Section 7</u></b> <b>Emergency and Remedial Response Plan</b>	Section 7 content is the same between all three SCS permit applications.	Section 7 content is the same between all three SCS permit applications.	Section 7 content is the same between all three SCS permit applications.
<b><u>Section 8</u></b> <b>Worker Safety Plan</b>	Section 8 content is the same between all three SCS permit applications.	Section 8 content is the same between all three SCS permit applications.	Section 8 content is the same between all three SCS permit applications.
<b><u>Section 9</u></b> <b>Well Casing and Cementing Program</b>	1. Stratigraphic and reservoir-monitoring well A. The Milton Flemmer 1 well is constructed and drilled to total depth at over 12,000 feet.	1. Stratigraphic and reservoir-monitoring well A. The Archie Erickson 2 well is constructed and drilled to total depth at approximately 6,400 feet.	1. Stratigraphic and reservoir-monitoring well A. The Slash Lazy H 5 well is constructed and drilled to total depth at approximately 6,100 feet.
<b><u>Section 10</u></b> <b>Plugging Plan</b>	1. Stratigraphic and reservoir-monitoring well A. The Milton Flemmer 1 well is constructed and drilled to total depth at over 12,000 feet.	1. Stratigraphic and reservoir-monitoring well A. The Archie Erickson 2 well is constructed and drilled to total depth at approximately 6,400 feet.	1. Stratigraphic and reservoir-monitoring well A. The Slash Lazy H 5 well is constructed and drilled to total depth at approximately 6,100 feet.

<p style="text-align: center;"><b><u>Differences Between SCS Applications</u></b></p> <p style="text-align: center;">The following highlights sections containing site-specific data differences (beyond applicant/site/well names):</p>			
SFP Permit Section	 <b>SUMMIT CARBON STORAGE #1, LLC</b> <b>TB Leingang / Milton Flemmer 1</b>	 <b>SUMMIT CARBON STORAGE #2, LLC</b> <b>BK Fischer / Archie Erickson 2</b>	 <b>SUMMIT CARBON STORAGE #3, LLC</b> <b>KJ Hintz / Slash Lazy H 5</b>
<b><u>Section 11</u></b> <b>Injection Well and Storage Operations</b>	1. Stratigraphic and reservoir-monitoring well: A. Tubing will be installed in the Milton Flemmer 1 to deploy pressure/temperature gauges B. Milton Flemmer 1 well will be plugged back to the Amsden prior to injection operations.	1. Stratigraphic and reservoir-monitoring well: A. No tubing will be installed in the Archie Erickson	1. Stratigraphic and reservoir-monitoring well: A. No tubing will be installed in the Slash Lazy H 5.
<b><u>Section 12</u></b> <b>Financial Assurance &amp; Demonstration Plan</b>	Total Bond: \$20,316,000 1. There were minimal differences related to : A. Postinjection site care (PISC) plan and facility closure cost estimates: B. Number of wells (monitoring) at each site. C. Reservoir-monitoring well design characteristics. D. Flow line lengths E. Endangerment of USDWs	Total Bond: \$20,868,800 1. There were minimal differences related to: A. Postinjection site care (PISC) plan and facility closure cost estimates B. Number of wells (monitoring) at each site. C. Reservoir-monitoring well design characteristics. D. Flow line lengths E. Endangerment of USDWs	Total Bond: \$20,817,800 1. There were minimal differences related to: A. Postinjection site care (PISC) plan and facility closure cost estimates B. Number of wells (monitoring) at each site. C. Reservoir-monitoring well design characteristics. D. Flow line lengths E. Endangerment of USDWs  2. Additional groundwater monitoring well and soil gas profile station (SGPS) added to the monitoring plan for legacy well No. 4942 is addressed.
<b><u>Appendix A</u></b> <b>Well and Well Formation Fluid Sampling Lab Analysis</b>	Samples from both Broom Creek and Inyan Kara are specific to stratigraphic test well.	Samples from both Broom Creek and Inyan Kara are specific to stratigraphic test well.	Samples from both Broom Creek and Inyan Kara are specific to stratigraphic test well.

<p style="text-align: center;"><b><u>Differences Between SCS Applications</u></b></p> <p style="text-align: center;">The following highlights sections containing site-specific data differences (beyond applicant/site/well names):</p>			
SFP Permit Section	 <b>SUMMIT CARBON STORAGE #1, LLC</b> <b>TB Leingang / Milton Flemmer 1</b>	 <b>SUMMIT CARBON STORAGE #2, LLC</b> <b>BK Fischer / Archie Erickson 2</b>	 <b>SUMMIT CARBON STORAGE #3, LLC</b> <b>KJ Hintz / Slash Lazy H 5</b>
<b><u>Appendix B</u></b> <b>Freshwater Well Sampling Analysis</b>	Existing groundwater sampling locations and results are site-specific.	Existing groundwater sampling locations and results are site-specific; BK Fischer includes data from adjacent mining activities at the Beulah Mine & Coyote Creek Mine.	Existing groundwater sampling locations and results are site-specific
<b><u>Appendix C</u></b> <b>Geochemical Interactions</b>	<p>1. Strat well-specific x-ray diffraction (XRD) data used to inform mineralogical compositions for injection zone and confining zones.</p> <p>2. Strat well-specific ionic compositions used for formation water.</p> <p>3. Simulation results are site-specific.</p>	<p>1. SCS #3 BROOM CREEK – SECURE GEOLOGIC STORAGE  
OLIVER COUNTY, NORTH DAKOTA**

**THIS AGREEMENT** (“Agreement”) is entered into as of the \_\_\_\_ day of \_\_\_\_\_, 20\_\_, by the parties who have signed the original of this instrument, a counterpart thereof, ratification and joinder or other instrument agreeing to become a Party hereto.

**RECITALS:**

A. It is in the public interest to promote the geologic storage of carbon dioxide in a manner which will benefit the state and the global environment by reducing greenhouse gas emissions and in a manner which will help ensure the viability of the state's coal and power industries, to the economic benefit of North Dakota and its citizens;

B. To further geologic storage of carbon dioxide, a potentially valuable commodity, may allow for its ready availability if needed for commercial, industrial, or other uses, including enhanced recovery of oil, gas, and other minerals; and

C. For geologic storage, however, to be practical and effective it requires cooperative use of surface and subsurface property interests and the collaboration of property owners, which may require procedures that promote, in a manner fair to all interests, cooperative management, thereby ensuring the maximum use of natural resources.

**AGREEMENT:**

It is agreed as follows:

**ARTICLE 1  
DEFINITIONS**

As used in this Agreement:

1.1 **Carbon Dioxide** means carbon dioxide in gaseous, liquid, or supercritical fluid state together with incidental associated substances derived from the source materials, capture

process and any substances added or used to enable or improve the injection process.

1.2 **Commission** means the North Dakota Industrial Commission (NDIC) acting by and through the Department of Mineral Resources.

1.3 **Effective Date** is the time and date this Agreement becomes effective as provided in Article 14.

1.4 **Facility Area** is the land described by Tracts in Exhibit “B” and shown on Exhibit “A” containing 31,238.68 acres, more or less.

1.5 **Party** is any individual, corporation, limited liability company, partnership, association, receiver, trustee, curator, executor, administrator, guardian, tutor, fiduciary, or other representative of any kind, any department, agency, or instrumentality of the state, or any governmental subdivision thereof, or any other entity capable of holding an interest in the Storage Reservoir.

1.6 **Pore Space** means a cavity or void, whether natural or artificially created, in any subsurface stratum.

1.7 **Pore Space Interest** is a right to or interest in the Pore Space in any Tract within the boundaries of the Facility Area.

1.8 **Pore Space Owner** is a Party hereto who owns Pore Space Interest.

1.9 **Storage Equipment** is any personal property, lease, easement, and well equipment, plants and other facilities and equipment for use in Storage Operations.

1.10 **Storage Expense** is all costs, expense or indebtedness incurred by the Storage Operator pursuant to this Agreement for or on account of Storage Operations.

1.11 **Storage Facility** is the unitized or amalgamated Storage Reservoir created pursuant to an order of the Commission.

1.12 **Storage Facility Participation** is the percentage shown on Exhibit “C” for allocating payments for use of the Pore Space under each Tract identified in Exhibit “B”.

1.13 **Storage Operations** are all operations conducted by the Storage Operator pursuant to this Agreement or otherwise authorized by any lease covering any Pore Space Interest.

1.14 **Storage Operator** is the person or entity named in Section 4.1 of this Agreement.

1.15 **Storage Reservoir** consists of the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Slash Lazy H 5 well (NDIC File No. 38701) located in Lot 1, Section 6, Township 142 North, Range 86 West, Oliver County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW¼ of the NE¼, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The logging suite included triple combo (Gamma Ray [GR], density, porosity, and resistivity), caliper, spectral GR, combinable magnetic resonance (CMR), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic-line covering an area totaling 208 miles in and around the Slash Lazy H 5 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the top of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,336 feet total vertical depth (TVD). The

average depth of the base of the Amsden Formation (Lower Confining Zone) across the storage facility area is 6,033 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 698 feet.

1.16 **Storage Rights** are the rights to explore, develop, and operate lands within the Facility Area for the storage of Storage Substances.

1.17 **Storage Substances** are Carbon Dioxide and incidental associated substances, fluids, and minerals.

1.18 **Tract** is the land described as such and given a Tract number in Exhibit "B."

1.19 **Transfer Storage Facility** has the meaning given such term in Section 3.7 of this Agreement.

## **ARTICLE 2 EXHIBITS**

2.1 **Exhibits.** The following exhibits, which are attached hereto, are incorporated herein by reference:

2.1.1 Exhibit "A" is a map that shows the boundary lines of the SCS #3 Broom Creek Facility Area and the tracts therein;

2.1.2 Exhibit "B" is a schedule that describes the acres of each Tract in the SCS #3 Broom Creek Facility Area;

2.1.3 Exhibit "C" is a schedule that shows the Storage Facility Participation of each Tract; and

2.1.4 Exhibit "D" is a form of Pore Space Lease.

2.2 **Reference to Exhibits.** When reference is made to an exhibit, it is to the exhibit as originally attached or, if revised, to the last revision.

2.3 **Exhibits Considered Correct.** Exhibits "A," "B," "C" and "D" shall be considered to be correct until revised as herein provided.

2.4 **Correcting Errors.** The shapes and descriptions of the respective Tracts have been established by using the best information available. If it subsequently appears that any Tract, mechanical miscalculation or clerical error has been made, Storage Operator, with the approval of Pore Space Owners whose interest is affected, shall correct the mistake by revising the exhibits to conform to the facts. The revision shall not include any re-evaluation of engineering or geological interpretations used in determining Storage Facility Participation. Each such revision of an exhibit made prior to thirty (30) days after the Effective Date shall be effective as of the Effective Date. Each such revision thereafter made shall be effective at 7:00 a.m. on the first day of the calendar month next following the filing for record of the revised exhibit or on such other date as may be determined by Storage Operator and set forth in the revised exhibit.

2.5 **Filing Revised Exhibits.** If an exhibit is revised, Storage Operator shall execute an appropriate instrument with the revised exhibit attached and file the same for record in the county or counties in which this Agreement or memorandum of the same is recorded and shall also file the amended changes with the Commission.

### **ARTICLE 3 CREATION AND EFFECT OF STORAGE FACILITY**

3.1 **Unleased Pore Space Interests.** Any Pore Space Owner in the Storage Facility who owns a Pore Space Interest in the Storage Reservoir that is not leased for the purposes of this Agreement and during the term hereof, shall be treated as if it were subject to the Pore Space Lease attached hereto as Exhibit "D".

3.2 **Amalgamation of Pore Space.** All Pore Space Interests in and to the Tracts are hereby amalgamated and combined insofar as the respective Pore Space Interests pertain to the Storage Reservoir, so that Storage Operations may be conducted with respect to said Storage Reservoir as if all of the Pore Space Interests in the Facility Area had been included in a single lease executed by all Pore Space Owners, as lessors, in favor of Storage Operator, as lessee and as

if the lease contained all of the provisions of this Agreement.

3.3 **Amendment of Leases and Other Agreements.** The provisions of the various leases, agreements, or other instruments pertaining to the respective Tracts or the storage of the Storage Substances therein, including the Pore Space Lease attached hereto as Exhibit “D”, are amended to the extent necessary to make them conform to the provisions of this Agreement, but otherwise shall remain in effect.

3.4 **Continuation of Leases and Term Interests.** Injection in to any part of the Storage Reservoir, or other Storage Operations, shall be considered as injection in to or upon each Tract within said Storage Reservoir, and such injection or operations shall continue in effect as to each lease as to all lands and formations covered thereby just as if such operations were conducted on and as if a well were injecting in each Tract within said Storage Reservoir.

3.5 **Titles Unaffected by Storage.** Nothing herein shall be construed to result in the transfer of title of the Pore Space Interest of any Party hereto to any other Party or to Storage Operator.

3.6 **Injection Rights.** Storage Operator is hereby granted the right to inject into the Storage Reservoir any Storage Substances in whatever amounts Storage Operator may deem expedient for Storage Operations, together with the right to drill, use, and maintain injection wells in the Facility Area, and to use for injection purposes.

3.7 **Transfer of Storage Substances from Storage Facility.** Storage Operator may transfer from the Storage Facility any Storage Substances, in whatever amounts Storage Operator may deem expedient for Storage Operations, to any other reservoir, subsurface stratum or formation permitted by the Commission for the storage of carbon dioxide under Chapter 38-22 of the North Dakota Century Code (a “Transfer Storage Facility”), *provided that*, the Pore Space ownership between the Storage Facility and Transfer Storage Facility is common.

3.8 **Receipt of Storage Substances.** Storage Operator may accept and receive into the Storage Facility any Storage Substances, in whatever amounts Storage Operator may deem expedient for Storage Operations, being stored in any other Transfer Storage Facility, *provided that*, the Pore Space ownership between the Storage Facility and Transfer Storage Facility is common.

3.9 **Royalty Payments Upon Transfer.** The transfer or receipt of Storage Substances to or from a Transfer Storage Facility in accordance with Section 3.7 and Section 3.8 shall be disregarded for the purposes of calculating the royalty under any lease covering a Pore Space Interest (including Exhibit “D”) and shall not affect the allocation of Storage Substances injected into the Storage Facility through the surface of the Facility Area in accordance with Article 6 of this Agreement.

3.10 **Cooperative Agreements.** Storage Operator may enter into cooperative agreements with respect to lands adjacent to the Facility Area for the purpose of coordinating Storage Operations. Such cooperative agreements may include, but shall not be limited to, agreements regarding the transfer and receipt of Storage Substances pursuant to Sections 3.7 and 3.8 of this Agreement.

3.11 **Border Agreements.** Storage Operator may enter into an agreement or agreements with owners of adjacent lands or operators within the Storage Reservoir with respect to operations which may enhance the injection of the Storage Substances in the Storage Reservoir in the Facility Area or which may otherwise be necessary for the conduct of Storage Operations.

3.12 **Border Agreement(s) with Minnkota Power Cooperative, Inc.** Summit Carbon Storage #3, LLC (“Summit Carbon Storage”) agrees to enter into a certain border agreement (“Border Agreement”) with Minnkota Power Cooperative, Inc., its affiliates or successors in interest to the DCC Permits (as defined herein) (“Minnkota”) which terms and conditions if more

stringent than those contained herein shall supplement conditions contained in orders issued or arising from Summit Carbon Storage's application to the Commission in Case Nos. Case Nos. 30877 – 30880 including any revisions thereto (the "Summit Carbon Storage Application"), and Minnkota's prior vested approved permits from the Commission, including but not limited to those issued in Case Nos. 29029 – 29034, and 30122 – 30125, including all related Orders issued to Minnkota's (collectively referred to as "DCC Permits"). Summit Carbon Storage agrees that prior to the Commission's authorization to inject under NDAC 43-05-01-09(3) on any injection facility and/or facilities, identified, arising from, or developed as a result of Summit Carbon Storage Application and/or prior to any future application of Summit Carbon Storage under the authority of the Commission, which seek to establish operating rights, or to locate or site facilities within an Area of Review containing Minnkota's facilities as described in or interests vested by the DCC Permits Summit must get the written consent and authorization of Minnkota. These conditions are necessary to protect Minnkota's rights and interests vested under the DCC Permits, from any damage and/or adverse impacts caused by Summit Carbon Storage's operations, including but not limited to, location of injection or extraction facilities, rates of injection. Any violation of the terms of the Border Agreement, or the terms contained in this Article 3.12, will result in irreparable harm to Minnkota, and that as a result, Minnkota is entitled to immediate relief from the Commission to enforce the terms of thereof, and that the terms of the Border Agreement are a condition of the issuance of any permits to Summit Carbon Storage by the Commission. To the extent anything in the Border Agreement is inconsistent with, or otherwise conflicts with, the terms in this Article 3.12, the terms in Article 3.12 control and will be enforced. If Minnkota unreasonably withholds consent and authorization, Summit Carbon Storage may apply to the Commission for waiver of the requirements of this Article 3.12 prior to first injection, in accordance with NDAC 43-05-01-09(3), or at any point during operation, in accordance NDAC

43-05-01-12(1)(n), which application shall include supporting data and information, that establishes that Summit Carbon Storage's operations as described in the Summit Carbon Storage Application do not damage or adversely impact Minnkota's rights under the DCC Permits. Upon at least a thirty-day notice to Minnkota and after an evidentiary hearing, the Commission will determine and set appropriate operating standards consistent with correlative rights and the efficient development of resources.

#### **ARTICLE 4 STORAGE OPERATIONS**

4.1 **Storage Operator.** Summit Carbon Storage #3, LLC is hereby designated as the initial Storage Operator. Storage Operator shall have the exclusive right to conduct Storage Operations, which shall conform to the provisions of this Agreement and any lease covering a Pore Space Interest. If there is any conflict between such agreements, this Agreement shall govern.

4.2 **Successor Operators.** The initial Storage Operator and any subsequent operator may, at any time, transfer operatorship of the Storage Facility with and upon the approval of the Commission.

4.3 **Method of Operation.** Storage Operator shall engage in Storage Operations with diligence and in accordance with good engineering and injection practices.

4.4 **Change of Method of Operation.** As permitted by the Commission nothing herein shall prevent Storage Operator from discontinuing or changing in whole or in part any method of operation which, in its opinion, is no longer in accord with good engineering or injection practices. Other methods of operation may be conducted or changes may be made by Storage Operator from time to time if determined by it to be feasible, necessary or desirable to increase the injection or storage of Storage Substances.

#### **ARTICLE 5 TRACT PARTICIPATIONS**

5.1 **Tract Participations.** The Storage Facility Participation of each Tract is shown in Exhibit “C.” The Storage Facility Participation of each Tract shall be based 100% upon the ratio of surface acres in each Tract to the total surface acres for all Tracts within the Facility Area.

5.2 **Relative Storage Facility Participations.** If the Facility Area is enlarged or reduced, the revised Storage Facility Participation of the Tracts remaining in the Facility Area and which were within the Facility Area prior to the enlargement or reduction shall remain in the same ratio to one another.

## **ARTICLE 6 ALLOCATION OF STORAGE SUBSTANCES**

6.1 **Allocation of Tracts.** All Storage Substances injected shall be allocated to the several Tracts in accordance with the respective Storage Facility Participation effective during the period that the Storage Substances are injected. The amount of Storage Substances allocated to each tract, regardless of whether the amount is more or less than the actual injection of Storage Substances from the well or wells, if any, on such Tract, shall be deemed for all purposes to have been injected into such Tract. Storage Substances transferred or received pursuant to Sections 3.7 and 3.8 of this Agreement shall be disregarded for the purposes of this Section 6.1.

6.2 **Distribution within Tracts.** The Storage Substances injected and allocated to each Tract shall be distributed among, or accounted for to the Pore Space Owners who own a Pore Space Interest in such Tract in accordance with each Pore Space Owner’s Storage Facility Participation effective during the period that the Storage Substances were injected. If any Pore Space Interest in a Tract hereafter becomes divided and owned in severalty as to different parts of the Tract, the owners of the divided interests, in the absence of an agreement providing for a different division, shall be compensated for the storage of the Storage Substances in proportion to the surface acreage of their respective parts of the Tract. Subject to Section 3.9, Storage

Substances transferred or received pursuant to Sections 3.7 and 3.8 of this Agreement shall be disregarded for the purposes of this Section 6.2.

## **ARTICLE 7 TITLES**

7.1 **Warranty and Indemnity.** Each Pore Space Owner who, by acceptance of revenue for the injection of Storage Substances into the Storage Reservoir, shall be deemed to have warranted title to its Pore Space Interest, and, upon receipt of the proceeds thereof to the credit of such interest, shall indemnify and hold harmless the Storage Operator and other Parties from any loss due to failure, in whole or in part, of its title to any such interest.

7.2 **Injection When Title Is in Dispute.** If the title or right of any Pore Space Owner claiming the right to receive all or any portion of the proceeds for the storage of any Storage Substances allocated to a Tract is in dispute, Storage Operator shall require that the Pore Space Owner to whom the proceeds thereof are paid to furnish security for the proper accounting thereof to the rightful Pore Space Owner, if the title or right of such Pore Space Owner fails in whole or in part.

7.3 **Payments of Taxes to Protect Title.** The owner of surface rights to lands within the Facility Area is responsible for the payment of any *ad valorem* taxes on all such rights, interests or property, unless such owner and the Storage Operator otherwise agree. If any *ad valorem* taxes are not paid by or for such owner when due, Storage Operator may at any time prior to tax sale or expiration of period of redemption after tax sale, pay the tax, redeem such rights, interests or property, and discharge the tax lien. Storage Operator shall, if possible, withhold from any proceeds derived from the storage of Storage Substances otherwise due any Pore Space Owner who is a delinquent taxpayer up to an amount sufficient to defray the costs of such payment or redemption; *provided* that such withholding to be credited to the Storage Operator. Such withholding shall be without prejudice to any other remedy available to Storage Operator.

7.4 **Pore Space Interest Titles.** If title to a Pore Space Interest fails, but the tract to which it relates is not removed from the Facility Area, the Party whose title failed shall not be entitled to share under this Agreement with respect to that interest.

## **ARTICLE 8 EASEMENTS OR USE OF SURFACE**

8.1 **Grant of Easement.** Storage Operator shall have the right to use as much of the surface of the land within the Facility Area as may be reasonably necessary for Storage Operations and the injection of Storage Substances.

8.2 **Use of Water.** Storage Operator shall have and is hereby granted free use of water from the Facility Area for Storage Operations, except water from any well, lake, pond or irrigation ditch of a Pore Space Owner; notwithstanding the foregoing, Storage Operator may access any well, lake, or pond as provided in Exhibit “D”.

8.3 **Surface Damages.** Storage Operator shall pay surface owners for damage to growing crops, timber, fences, improvements and structures located on the Facility Area that result from Storage Operations.

8.4 **Surface and Sub-Surface Operating Rights.** Except to the extent modified in this Agreement, Storage Operator shall have the same rights to use the surface and sub-surface and use of water and any other rights granted to Storage Operator in any lease covering Pore Space Interests. Except to the extent expanded by this Agreement or the extent that such rights are common to the effected leases, the rights granted by a lease may be exercised only on the land covered by that lease. Storage Operator will to the extent possible minimize surface impacts.

## **ARTICLE 9 ENLARGEMENT OF STORAGE FACILITY**

9.1 **Enlargement of Storage Facility.** The Storage Facility may be enlarged from time to time to include acreage and formations reasonably proven to be geologically capable of storing

Storage Substances. Any expansion must be approved in accordance with the rules and regulations of the Commission.

9.2 **Determination of Tract Participation.** Storage Operator, subject to Section 5.2, shall determine the Storage Facility Participation of each Tract within the Storage Facility as enlarged, and shall revise Exhibits “A”, “B” and “C” accordingly and in accordance with the rules, regulations and orders of the Commission.

9.3 **Effective Date.** The effective date of any enlargement of the Storage Facility shall be effective as determined by the Commission.

**ARTICLE 10**  
**TRANSFER OF TITLE PARTITION**

10.1 **Transfer of Title.** Any conveyance of all or part of any interest owned by any Party hereto with respect to any Tract shall be made expressly subject to this Agreement. No change of title shall be binding upon Storage Operator, or any Party hereto other than the Party so transferring, until 7:00 a.m. on the first day of the calendar month following thirty (30) days from the date of receipt by Storage Operator of a photocopy, or a certified copy, of the recorded or filed instrument evidencing such a change in ownership.

10.2 **Waiver of Rights to Partition.** Each Party hereto agrees that, during the existence of this Agreement, it will not resort to any action to partition any Tract or parcel within the Facility Area or the facilities used in the development or operation thereof, and to that extent waives the benefits or laws authorizing such partition.

**ARTICLE 11**  
**RELATIONSHIP OF PARTIES**

11.1 **No Partnership.** The duties, obligations and liabilities arising hereunder shall be several and not joint or collective. This Agreement is not intended to create, and shall not be construed to create, an association or trust, or to impose a partnership duty, obligation or liability with regard to any one or more of the Parties hereto. Each Party hereto shall be individually responsible for its own obligations as herein provided.

11.2 **No Joint Marketing.** This Agreement is not intended to provide, and shall not be construed to provide, directly or indirectly, for any joint marketing of Storage Substances.

11.3 **Pore Space Owners Free of Costs.** This Agreement is not intended to impose, and shall not be construed to impose, upon any Pore Space Owner any obligation to pay any Storage Expense unless such Pore Space Owner is otherwise so obligated.

11.4 **Information to Pore Space Owners.** Each Pore Space Owner shall be entitled to all information in possession of Storage Operator to which such Pore Space Owner is entitled by an existing lease or a lease imposed by this Agreement.

## **ARTICLE 12 LAWS AND REGULATIONS**

12.1 **Laws and Regulations.** This Agreement shall be subject to all applicable federal, state and municipal laws, rules, regulations and orders.

## **ARTICLE 13 FORCE MAJEURE**

13.1 **Force Majeure.** All obligations imposed by this Agreement on each Party, except for the payment of money, shall be suspended while compliance is prevented, in whole or in part, by a labor dispute, fire, war, civil disturbance, or act of God; by federal, state or municipal laws; by any rule, regulation or order of a governmental agency; by inability to secure materials; or by any other cause or causes, whether similar or dissimilar, beyond reasonable control of the Party. No Party shall be required against their will to adjust or settle any labor dispute. Neither this Agreement nor any lease or other instrument subject hereto shall be terminated by reason of suspension of Storage Operations due to any one or more of the causes set forth in this Article.

## **ARTICLE 14 EFFECTIVE DATE**

14.1 **Effective Date.** This Agreement shall become effective as determined by the Commission.

14.2 **Certificate of Effectiveness.** Storage Operator shall file for record in the county or counties in which the land affected is located a certificate stating the Effective Date of this Agreement.

## **ARTICLE 15**

### **TERM**

15.1 **Term.** Unless sooner terminated in the manner hereinafter provided or by order of the Commission, this Agreement shall remain in full force and effect until the Commission has issued a certificate of project completion with respect to the Storage Facility in accordance with § 38-22-17 of the North Dakota Century Code.

15.2 **Termination by Storage Operator.** This Agreement may be terminated at any time by the Storage Operator with the approval of the Commission.

15.3 **Effect of Termination.** Upon termination of this Agreement all Storage Operations shall cease. Each lease and other agreement covering Pore Space within the Facility Area shall remain in force for ninety (90) days after the date on which this Agreement terminates, and for such further period as is provided by Exhibit “D” or other agreement.

15.4 **Salvaging Equipment Upon Termination.** If not otherwise granted by Exhibit “D” or other instruments affecting each Tract, Pore Space Owners hereby grant Storage Operator a period of six (6) months after the date of termination of this Agreement within which to salvage and remove Storage Equipment.

15.5 **Certificate of Termination.** Upon termination of this Agreement, Storage Operator shall file for record in the county or counties in which the land affected is located a certificate that this Agreement has terminated, stating its termination date.

## **ARTICLE 16**

### **APPROVAL**

16.1 **Original, Counterpart or Other Instrument.** A Pore Space Owner may approve this Agreement by signing the original of this instrument, a counterpart thereof, ratification or joinder or other instrument approving this instrument hereto. The signing of any such instrument shall have the same effect as if all Parties had signed the same instrument.

16.2 **Joinder in Dual Capacity.** Execution as herein provided by any Party as either a Pore Space Owner or the Storage Operator shall commit all interests owned or controlled by such Party and any additional interest thereafter acquired in the Facility Area.

16.3 **Approval by the North Dakota Industrial Commission.** Notwithstanding anything in this Article to the contrary, all Tracts within the Facility Area shall be deemed to be qualified for participation if this Agreement is duly approved by order of the Commission.

## **ARTICLE 17 GENERAL**

17.1 **Amendments Affecting Pore Space Owners.** Amendments hereto relating wholly to Pore Space Owners may be made with approval by the Commission.

17.4 **Construction.** This agreement shall be construed according to the laws of the State of North Dakota.

## **ARTICLE 18 SUCCESSORS AND ASSIGNS**

18.1 **Successors and Assigns.** This Agreement shall extend to, be binding upon, and inure to the benefit of the Parties hereto and their respective heirs, devisees, legal representatives, successors and assigns and shall constitute a covenant running with the lands, leases and interests covered hereby.

TO: OWNER, LESSEE OR OPERATOR OF RECORD

RE: **APPLICATION OF SUMMIT CARBON STORAGE #1, LLC  
FOR A CARBON DIOXIDE STORAGE FACILITY**

Dear Sir/Madam:

Summit Carbon Storage #1, LLC ("Summit") has made application to the North Dakota Industrial Commission ("Commission") requesting an order providing approval of a carbon dioxide storage facility project ("Project"). A hearing to consider the application of Summit for the Project has been scheduled before the Commission as set forth in the attached Notice of Hearing ("Notice"). You are receiving this Notice because you have been identified as an owner, lessee or operator of record within the lands identified in the Notice or within one-half mile of the outside boundary of the proposed Project.

Details concerning the Project are included in the enclosed information pamphlet or are available from the Commission; however, should you have any questions regarding the Project or Summit's application, please leave a message at (701) 505-8676 or email [option-info@summitcarbon.com](mailto:option-info@summitcarbon.com). A qualified representative will respond promptly to answer your questions.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jeffrey L. Skaare".

Jeffrey L. Skaare, J.D., C.P.L.  
Summit Carbon Storage #1, LLC

Enclosure(s)  
#80961283v1

**BEFORE THE INDUSTRIAL COMMISSION**

**STATE OF NORTH DAKOTA**

**CASE NOS. 30869 - 30872**

**On a motion of the Commission to consider the application of Summit Carbon Storage #1, LLC for a storage facility permit for geologic storage of carbon dioxide pursuant to NDCC Ch. 38-22 and NDAC Ch. 43-05-01.**

**NOTICE OF HEARING**

**PLEASE TAKE NOTICE** that Summit Carbon Storage #1, LLC ("Summit") has made application to the North Dakota Industrial Commission ("Commission") requesting an order providing approval of a carbon dioxide storage facility permit as follows.

1. The carbon dioxide storage facility will be located south of the city of Beulah, in Oliver, Morton, and Mercer Counties, North Dakota, and comprised of the following described lands:

**Oliver County**

**Township 142 North, Range 87 West**

Section 31: Lots 3 (38.84), 4 (38.49), E2SW, E2

Section 32: All

Section 33: NW, S2

Section 34: S2SW, SWSE

**Township 141 North, Range 87 West**

Section 02: Lot 4 (39.90), SWNW, W2SW

Section 03: Lots 1 (39.83), 2 (39.71), 3 (39.60), 4 (39.48), S2N2, S2

Section 04: Lots 1 (39.48), 2 (39.60), 3 (39.72), 4 (39.84), S2N2, S2

Section 05: Lots 1 (39.92), 2 (39.92), 3 (39.91), 4 (39.90), S2N2, S2  
 Section 06: Lots 1 (39.90), 2 (39.93), 3 (39.96), 4 (38.36), 5 (38.45),  
                 6 (38.54), 7 (38.62), S2NE, SENW, E2SW, SE  
 Section 07: Lots 1 (38.75), 2 (38.92), 3 (39.10), 4 (39.27), E2W2, E2

2. A hearing to consider the application of Summit will be held before the Commission at 9:00 AM CDT Tuesday, June 11, 2024 – Wednesday, June 12, 2024, at the Department of Mineral Resources Conference Room, Oil and Gas Division, 1000 East Calgary Avenue, Bismarck, North Dakota.
3. A copy of the permit application and draft permit may be obtained from the Commission.
4. All comments regarding the application for the storage facility permit must be in writing and submitted to the Commission prior to hearing or presented at the hearing.
5. Amalgamation of the storage reservoirs pore space is required to operate the storage facility and the Commission may require that the pore space owned by nonconsenting owners be

included in the storage facility and subject to geologic storage. The amalgamation of pore space will be considered at the hearing.

DATED this 15<sup>th</sup> day of April, 2024.

FREDERICKSON & BYRON, P.A.

By 

LAWRENCE WENDER, ND Bar #03908

## Why am I Receiving This Letter?

Summit Carbon Solutions (Summit) is developing a large-scale Carbon Capture and Underground Storage (CCUS) project across the Midwest, with injection wells located in the Mercer, Oliver and Morton County, ND regions. Recently, Summit submitted *Class VI Storage Facility Permits* to the North Dakota Industrial Commission.

North Dakota Administrative Code 43-05-01-08 entitled, **Storage facility permit hearing**, states, the commission shall hold a public hearing before issuing a storage facility permit. At least 45 days prior to the hearing, the applicant shall give notice of the hearing to the following:

- Each **operator of mineral extraction activities** within the facility area and within ½ mile of its outside boundary
- Each **mineral lessee of record** within the facility area and within ½ mile of its outside boundary
- Each **owner of record of the surface** within the facility area and within ½ mile of its outside boundary
- Each **owner of record of minerals** within the facility area and within ½ mile of its outside boundary
- Each **owner and each lessee of record of the pore space** within the facility area and within ½ mile of its outside boundary; and
- Any other persons as required by the commission.

You are receiving this letter because you fit one of the above descriptions.

## Why is This Project Important?

Summit Carbon Solutions will open new economic opportunities for the **ethanol** and **agricultural** industries that are so critical to the Midwest economy. Our carbon capture and storage project will put the ethanol produced at our 57 partner facilities on track to *become eligible for emerging low carbon fuel markets*. This will allow these plants to sell their product at a premium in the growing number of states and countries that have adopted low carbon fuel standards.

Over the last 10 years, the U.S. ethanol industry has created a market for 53 billion bushels of corn. Today, ethanol supports 360,000 jobs and contributes \$45 billion to the annual U.S. GDP. But maybe most importantly, **ethanol plants purchase approximately half of all the corn produced in the United States**. Summit Carbon Solutions' investment will strengthen this marketplace even further for farmers, while maintaining strong land and commodity prices.

Once completed, Summit Carbon Solutions' Project will be the largest carbon capture and storage project in the world.

ETHANOL AND AGRICULTURE WORK TOGETHER TO ADD VALUE ACROSS THE SUPPLY CHAIN AS WELL AS CREATE ECONOMIC IMPACT AND JOBS FOR RURAL AMERICA.

## Hearing Details

Pursuant to the enclosed notice, a hearing to consider the application of Summit Carbon Solutions will be held before the Commission at the Department of Mineral Resources Conference Room, Oil and Gas Division, 1000 East Calgary Avenue, Bismarck, North Dakota. A copy of the permit application and draft permit can be found on NDIC's website, <https://www.dmr.nd.gov/dmr/oilgas/ClassVI>. All comments regarding the application for the storage facility permit must be in writing and submitted to the Commission prior to the hearing or presented at the hearing. These can be sent to the Department of Mineral Resources, Oil and Gas Division, 1000 East Calgary Avenue, Bismarck, North Dakota 58503.

---

## Who is Summit Carbon Solutions?

Summit Carbon Solutions is a U.S. company with U.S. roots committed to driving job growth across the Midwest, reducing emissions, and providing a substantial boost to the ethanol and agricultural industries that are so critical to the economy. We believe in advancing communities through decarbonization solutions. Currently, the company has announced a partnership with 57 ethanol plants across the Midwest. Utilizing proven technology, Summit Carbon Solutions will capture carbon dioxide before it is emitted into the atmosphere and channel it to North Dakota where it will be permanently and safely stored deep underground.

## What is the Timeline?

While there are variables when it comes to a project of this size, particularly one that requires permits at the federal, state, and local levels, we anticipate construction will begin in 2025.

## Mineral Rights and Pore Space Rights

Pore space is owned by surface owners. That is not always the case when it comes to mineral rights. Summit Carbon Solutions believes that these different rights can live and operate in harmony. Summit chose an area with little to no hydrocarbon exploration. In addition, Summit chose injection zones that are nonhydrocarbon bearing zones. Nonetheless, should a mineral owner wish to develop its interests in these areas, there are still extraction methods, such as horizontal drilling, that would allow development.

---

## Determining Storage Zones

Summit Carbon Solutions drilled three stratigraphic test wells and collected stratigraphic information to investigate the feasibility of developing permanent and safe CO<sub>2</sub> storage. Methodologies include extracting whole cores, wireline logging, injectivity test and more. Information collected from the coring activities along with data from wireline logging, testing and existing information help scientists verify that the deep rock layers overlying and underlying the study zone will safely and permanently store CO<sub>2</sub>. Summit successfully extracted over 3,500 ft of whole cores across three wells, the deepest core interval being over two miles deep below ground level. Results from core and log analysis show ideal geological and reservoir characteristics for storage with impermeable cap rocks above and below the study zone.

## What is Amalgamation?

Effective geologic storage requires cooperative use of subsurface property interests and the collaboration of property owners. Obtaining consent to store CO<sub>2</sub> from all owners in a unit may not be feasible, thus requiring procedures that promote, in a manner fair to all interests, cooperative management, thereby ensuring the maximum use of our natural resources. North Dakota Century Code 38-22-10 entitled **Amalgamating property interests**, provides: *"If a storage operator does not obtain the consent of all persons who own the storage reservoir's pore space, the commission may require that the pore space owned by nonconsenting owners be included in a storage facility and subject to geologic storage."*

Should you have any questions regarding the Project or Summit's application, please leave a message at (701) 505-8676 or email [option-info@summitcarbon.com](mailto:option-info@summitcarbon.com). A qualified representative will respond promptly to answer your questions.

BEFORE THE INDUSTRIAL COMMISSION

STATE OF NORTH DAKOTA

CASE NOS. 30869 - 30872

On a motion of the Commission to consider the application of Summit Carbon Storage #1, LLC for a storage facility permit for geologic storage of carbon dioxide pursuant to NDCC Ch. 38-22 and NDAC Ch. 43-05-01.

AFFIDAVIT OF SERVICE BY MAIL

STATE OF NORTH DAKOTA     )  
  ) ss.  
COUNTY OF BURLEIGH     )

Jessica Pulver Biesterfeld, being first duly sworn, deposes and says that she served the attached:

**Memo  
Notice of Hearing; and  
Summit Carbon Solutions Project Pamphlet**

as a second mailing to an updated address by placing a true and correct copy thereof in an envelope addressed as follows:

**See attached Exhibit A**

and deposited the same, with postage prepaid, certified mail, return receipt requested, in the United States mail at Bismarck, North Dakota.

  
Jessica Pulver Biesterfeld

Subscribed and sworn to before me this 7 day of June, 2024.

  
Notary Public  
My Commission expires: Sept. 16, 2026

April 15, 2024

TO: OWNER, LESSEE OR OPERATOR OF RECORD

**RE: APPLICATION OF SUMMIT CARBON STORAGE #1, LLC  
FOR A CARBON DIOXIDE STORAGE FACILITY**

Dear Sir/Madam:

Summit Carbon Storage #1, LLC ("Summit") has made application to the North Dakota Industrial Commission ("Commission") requesting an order providing approval of a carbon dioxide storage facility project ("Project"). A hearing to consider the application of Summit for the Project has been scheduled before the Commission as set forth in the attached Notice of Hearing ("Notice"). You are receiving this Notice because you have been identified as an owner, lessee or operator of record within the lands identified in the Notice or within one-half mile of the outside boundary of the proposed Project.

Details concerning the Project are included in the enclosed information pamphlet or are available from the Commission; however, should you have any questions regarding the Project or Summit's application, please leave a message at (701) 505-8676 or email [option-info@summitcarbon.com](mailto:option-info@summitcarbon.com). A qualified representative will respond promptly to answer your questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey L. Skaare".

Jeffrey L. Skaare, J.D., C.P.L.  
Summit Carbon Storage #1, LLC

Enclosure(s)  
#80961283v1

**BEFORE THE INDUSTRIAL COMMISSION**

**STATE OF NORTH DAKOTA**

**CASE NOS. 30869 - 30872**

**On a motion of the Commission to consider the application of Summit Carbon Storage #1, LLC for a storage facility permit for geologic storage of carbon dioxide pursuant to NDCC Ch. 38-22 and NDAC Ch. 43-05-01.**

**NOTICE OF HEARING**

**PLEASE TAKE NOTICE** that Summit Carbon Storage #1, LLC ("Summit") has made application to the North Dakota Industrial Commission ("Commission") requesting an order providing approval of a carbon dioxide storage facility permit as follows.

1. The carbon dioxide storage facility will be located south of the city of Beulah, in Oliver, Morton, and Mercer Counties, North Dakota, and comprised of the following described lands:

**Oliver County**

**Township 142 North, Range 87 West**

Section 31: Lots 3 (38.84), 4 (38.49), E2SW, E2

Section 32: All

Section 33: NW, S2

Section 34: S2SW, SWSE

**Township 141 North, Range 87 West**

Section 02: Lot 4 (39.90), SWNW, W2SW

Section 03: Lots 1 (39.83), 2 (39.71), 3 (39.60), 4 (39.48), S2N2, S2

Section 04: Lots 1 (39.48), 2 (39.60), 3 (39.72), 4 (39.84), S2N2, S2

Section 05: Lots 1 (39.92), 2 (39.92), 3 (39.91), 4 (39.90), S2N2, S2  
 Section 06: Lots 1 (39.90), 2 (39.93), 3 (39.96), 4 (38.36), 5 (38.45),  
 6 (38.54), 7 (38.62), S2NE, SENW, E2SW, SE  
 Section 07: Lots 1 (38.75), 2 (38.92), 3 (39.10), 4 (39.27), E2W2, E2  
 Section 08: All  
 Section 09: All  
 Section 10: All  
 Section 11: W2  
 Section 14: W2  
 Section 15: All  
 Section 16: All  
 Section 17: All  
 Section 18: Lots 1 (39.38), 2 (39.41), 3 (39.45), 4 (39.48), E2W2, E2  
 Section 19: Lots 1 (39.53), 2 (39.59), 3 (39.65), 4 (39.71), E2W2, E2  
 Section 20: All  
 Section 21: All  
 Section 22: All

Section 14: All

Section 15: SENE, E2SE

Section 22: E2E2

Section 23: All

Section 24: All

Section 25: All

Section 26: All

Section 35: N2

Section 36: All

2. A hearing to consider the application of Summit will be held before the Commission at 9:00 AM CDT Tuesday, June 11, 2024 – Wednesday, June 12, 2024, at the Department of Mineral Resources Conference Room, Oil and Gas Division, 1000 East Calgary Avenue, Bismarck, North Dakota.
3. A copy of the permit application and draft permit may be obtained from the Commission.
4. All comments regarding the application for the storage facility permit must be in writing and submitted to the Commission prior to hearing or presented at the hearing.
5. Amalgamation of the storage reservoirs pore space is required to operate the storage facility and the Commission may require that the pore space owned by nonconsenting owners be

included in the storage facility and subject to geologic storage. The amalgamation of pore space will be considered at the hearing.

DATED this 15<sup>TH</sup> day of April, 2024.

FREDERICKSON & BYRON, P.A.

## Why am I Receiving This Letter?

Summit Carbon Solutions (Summit) is developing a large-scale Carbon Capture and Underground Storage (CCUS) project across the Midwest, with injection wells located in the Mercer, Oliver and Morton County, ND regions. Recently, Summit submitted *Class VI Storage Facility Permits* to the North Dakota Industrial Commission.

North Dakota Administrative Code 43-05-01-08 entitled, **Storage facility permit hearing**, states, the commission shall hold a public hearing before issuing a storage facility permit. At least 45 days prior to the hearing, the applicant shall give notice of the hearing to the following:

- Each **operator of mineral extraction activities** within the facility area and within ½ mile of its outside boundary
- Each **mineral lessee of record** within the facility area and within ½ mile of its outside boundary
- Each **owner of record of the surface** within the facility area and within ½ mile of its outside boundary
- Each **owner of record of minerals** within the facility area and within ½ mile of its outside boundary
- Each **owner and** each **lessee of record of the pore space** within the facility area and within ½ mile of its outside boundary; and
- Any other persons as required by the commission.

You are receiving this letter because you fit one of the above descriptions.

## Why is This Project Important?

Summit Carbon Solutions will open new economic opportunities for the **ethanol** and **agricultural** industries that are so critical to the Midwest economy. Our carbon capture and storage project will put the ethanol produced at our 57 partner facilities on track to *become eligible for emerging low carbon fuel markets*. This will allow these plants to sell their product at a premium in the growing number of states and countries that have adopted low carbon fuel standards.

*Over the last 10 years, the U.S. ethanol industry has created a market for 53 billion bushels of corn.* Today, ethanol supports 360,000 jobs and contributes \$45 billion to the annual U.S. GDP. But maybe most importantly, **ethanol plants purchase approximately half of all the corn produced in the United States**. Summit Carbon Solutions' investment will strengthen this marketplace even further for farmers, while maintaining strong land and commodity prices.

Once completed, Summit Carbon Solutions' Project will be the largest carbon capture and storage project in the world.

ETHANOL AND AGRICULTURE WORK TOGETHER TO ADD VALUE ACROSS THE SUPPLY CHAIN AS WELL AS CREATE ECONOMIC IMPACT AND JOBS FOR RURAL AMERICA.

## Hearing Details

Pursuant to the enclosed notice, a hearing to consider the application of Summit Carbon Solutions will be held before the Commission at the Department of Mineral Resources Conference Room, Oil and Gas Division, 1000 East Calgary Avenue, Bismarck, North Dakota. A copy of the permit application and draft permit can be found on NDIC's website, <https://www.dmr.nd.gov/dmr/oilgas/ClassVI>. All comments regarding the application for the storage facility permit must be in writing and submitted to the Commission prior to the hearing or presented at the hearing. These can be sent to the Department of Mineral Resources, Oil and Gas Division, 1000 East Calgary Avenue, Bismarck, North Dakota 58503.

---

## Who is Summit Carbon Solutions?

Summit Carbon Solutions is a U.S. company with U.S. roots committed to driving job growth across the Midwest, reducing emissions, and providing a substantial boost to the ethanol and agricultural industries that are so critical to the economy. We believe in advancing communities through decarbonization solutions. Currently, the company has announced a partnership with 57 ethanol plants across the Midwest. Utilizing proven technology, Summit Carbon Solutions will capture carbon dioxide before it is emitted into the atmosphere and channel it to North Dakota where it will be permanently and safely stored deep underground.

## What is the Timeline?

While there are variables when it comes to a project of this size, particularly one that requires permits at the federal, state, and local levels, we anticipate construction will begin in 2025.

## Mineral Rights and Pore Space Rights

Pore space is owned by surface owners. That is not always the case when it comes to mineral rights. Summit Carbon Solutions believes that these different rights can live and operate in harmony. Summit chose an area with little to no hydrocarbon exploration. In addition, Summit chose injection zones that are nonhydrocarbon bearing zones. Nonetheless, should a mineral owner wish to develop its interests in these areas, there are still extraction methods, such as horizontal drilling, that would allow development.

## Determining Storage Zones

Summit Carbon Solutions drilled three stratigraphic test wells and collected stratigraphic information to investigate the feasibility of developing permanent and safe CO<sub>2</sub> storage. Methodologies include extracting whole cores, wireline logging, injectivity test and more. Information collected from the coring activities along with data from wireline logging, testing and existing information help scientists verify that the deep rock layers overlying and underlying the study zone will safely and permanently store CO<sub>2</sub>. Summit successfully extracted over 3,500 ft of whole cores across three wells, the deepest core interval being over two miles deep below ground level. Results from core and log analysis show ideal geological and reservoir characteristics for storage with impermeable cap rocks above and below the study zone.

## What is Amalgamation?

Effective geologic storage requires cooperative use of subsurface property interests and the collaboration of property owners. Obtaining consent to store CO<sub>2</sub> from all owners in a unit may not be feasible, thus requiring procedures that promote, in a manner fair to all interests, cooperative management, thereby ensuring the maximum use of our natural resources. North Dakota Century Code 38-22-10 entitled **Amalgamating property interests**, provides: "*If a storage operator does not obtain the consent of all persons who own the storage reservoir's pore space, the commission may require that the pore space owned by nonconsenting owners be included in a storage facility and subject to geologic storage.*"

---

Should you have any questions regarding the Project or Summit's application, please leave a message at (701) 505-8676 or email [option-info@summitcarbon.com](mailto:option-info@summitcarbon.com). A qualified representative will respond promptly to answer your questions.

Ms. Forsberg,

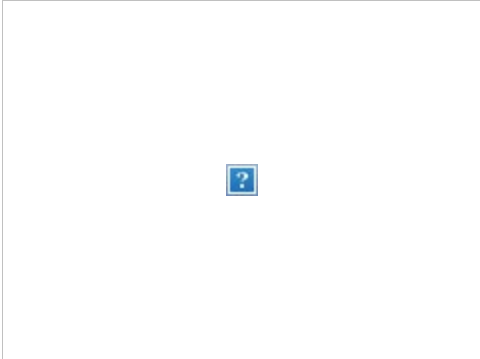

Carbon capture and sequestration is an underregulated industry that needs greater consideration for people, community, and resources protection and safety before pipelines of this nature can even be considered.

CO2 pipelines are less than 1% of the 3.4 million miles of regulatory pipelines in the U.S. Predominantly, they have been used to transport natural underground CO2 to oil fields for oil fracking, or enhanced oil recovery (EOR) across sparsely-populated areas. CO2 pipelines in first-in-kind concentrations right up on people is a disaster waiting to happen with the inadequate regulations.

25 years ago today, June 10, 1999, three boys were killed in a horrific gas pipeline explosion in Bellingham, Washington because pipelines were under-regulated.

Watch here:

<https://www.youtube.com/watch?v=kJaeQ5ziX4s>

### The June 10, 1999 Olympic Pipeline Tragedy

On June 10, 1999, the Olympic pipeline ruptured and spilled nearly 250,000 gallons of gasoline into Whatcom Creek which ignited and killed two boys and a young man in Bellingham, WA. To learn more about the tragedy and Bellingham's response, visit the link below.

[www.youtube.com](https://www.youtube.com/watch?v=kJaeQ5ziX4s)

The intentions of these pipelines has not been clear. First, it was climate change mitigation. Then, it was a savior for corn and the ethanol industry, After that, it was sustained aviation fuel. It has been rumored from the start and supporting evidence exist for oil fracking. In any case, monetary profits are being put ahead of people.

## Carbon Capture Will Extend Oil Production by 84 Years, Industry Study Finds

The study focuses on a Canadian oil field that should have shut down in 2016 but could now keep producing oil until 2100.

Regarding the injection wells for CO2 storage:

Can ANYONE be really certain that this dangerous product will STAY where Summit claims it will stay? Summit, after all, has never built a highly pressurized, highly hazardous pipeline, much less had any experience with injection wells.

Can anyone know that the CO2 will not travel via multiple strata, reaching and contaminating underground water sources? Those same sources so very critical to the survival and economics of the North Dakota citizens?

Are the citizens of North Dakota FULLY informed of what may lie beneath them? Of what will be traveling beneath them? Of what could contaminate the water for them, for their families, for their livestock, for their crops? When CO2 mixes with water, it creates carbonic acid. If wells and water sources are contaminated, it might not be known for years, when it will be far too late to correct.

You've seen letters & emails & comments with statistics and documentation, but I am writing from the heart. I may be in Iowa, but I have friends in North Dakota that don't want this beneath their feet.

To be completely fair, it should not be the ND Governor, AG, and Ag commissioner who make this decision. Governor in particular has made no secret of his stance on CO2 pipelines; he can hardly be expected to be unbiased.

Say NO to these injection wells. The CO2 projects are being proposed for one reason only : money. To harvest taxpayer dollars as well as oil fracking income. It is greed, plain & simple.

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

## MOTION TO COMPEL

---

Intervenor Landowners, by and through its undersigned counsel, hereby moves to compel Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC. This Motion is supported by the Brief in Support, Declaration, and Exhibits filed herewith.

DATED this 10<sup>th</sup> day of June, 2024.

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

## BRIEF IN SUPPORT OF MOTION TO COMPEL

---

[¶1] Intervenor Landowners are a group of North Dakota landowners whose property rights stand to be significantly impacted by the acts of Summit Carbon Solutions, LLC through its related entities, Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, “Summit”). To protect their rights, Intervenor Landowners intervened in these proceedings and, from the beginning, have diligently pursued information concerning Summit’s proposal to conduct activities that will irreversibly affect their properties. In response, Summit has refused to engage with them in good faith and has applied narrow interpretations of the rules of discovery to hide information from the Intervenor Landowners necessary to fully assess Summit’s proposal *on their land*. The Commission should see past this gamesmanship and grant Intervenor Landowner’s motion to compel and allow procedural due process in this proceeding for the landowners with the most to lose.

### **I. FACTS**

[¶2] Six weeks ago, on May 2, 2024, Intervenor Landowners advised Summit of their intention to conduct discovery, including written discovery and a 30(b)(6) deposition, and invited Summit to engage in a dialogue regarding the timing and best methods to complete this sharing of information prior to the NDIC hearing. Ex. 9, May 2, 2024 Letter, attached to the Decl. of Derrick Braaten.

[¶3] One week later, after being met with silence, Intervenor Landowners proceeded with noticing a 30(b)(6) deposition of Summit Carbon Solutions, LLC for June 6, 2024. Ex. 1, May 9, 2024 30(b)(6) Notice, attached to the Decl. of Derrick Braaten. Along with the notice, Intervenor Landowners advised Summit by email that the June 6, 2024 date was chosen because it appeared

to work with their counsel's schedule and invited Summit to choose a different, mutually agreed upon date in case June 6 was not feasible. Ex. 10, May 9, 2024 Email, attached to the Decl. of Derrick Braaten.

[¶4] The Commission formally granted Intervenor Landowner's motion to intervene on May 31, 2024. Intervenor Landowners then promptly filed an amended notice of 30(b)(6) deposition merely to indicate on the notice that the landowners were now intervenors. Ex. 2, May 31, 2024 First Am. Notice, attached to the Decl. of Derrick Braaten.

[¶5] On June 4, 2024, Summit responded to the May 31, 2024 amended notice, advising Intervenor Landowners of the notice's purported technical insufficiencies due to the fact Summit Carbon Solutions, LLC, as a nonparty, should have been served a *subpoena* as opposed to a *notice*. Ex. 3, June 4, 2024 Letter, attached to the Decl. of Derrick Braaten. The correspondence included no other challenges to the notice.

[¶6] In response to the letter, Intervenor Landowners filed three second amended notices of the 30(b)(6) deposition, specifically naming the three LLC subsidiaries— Summit Cabon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC. Exs. 4-6, June 4, 2024 Sec. Am. Notice, attached to the Decl. of Derrick Braaten. No changes were made to the topics listed in the notice at any time. *Id.*

[¶7] Then, Summit gave *new* reasons as to why it believed it need not comply with the amended notices—objections related to notice to other parties (Minnkota Power Cooperative, Inc.), notice to Summit, the time for conferral, and the description of the deposition topics. Ex. 7, June 5, 2024 Letter, attached to the Decl. of Derrick Braaten.

[¶8] On June 5, 2024, Intervenor Landowners responded to Summit's objections, advising Summit that Minnkota did have notice, that Intervenor Landowner's have been attempting to

confer for weeks, and that the notice was reasonably particular with respect to the proposed topics of questioning. Ex. 8, June 5, 2024 Email, attached to the Decl. of Derrick Braaten. The email was sent on June 5, 2024, but AgileLaw converted it to an alternate time zone when it was uploaded via its system for the deposition exhibit. The native email file as attached to the Decl. of Derrick Braaten indicates the email was sent on June 5, 2024 in response. Ex. 11, June 5, 2024 Native Email.

[¶9] The deposition went forward on June 6, 2024. Although Summit had notice of the deposition since May 9, 2024 and was given ample opportunity to confer about selecting a different date, Summit refused to appear. Ex. 12, Dep. 30(b)(6) Summit Carbon Storage #1, #2, #3 attached to the Decl. of Derrick Braaten.

## **II. LAW & ANALYSIS**

[¶10] North Dakota allows broad discovery, whereby “[p]arties may obtain discovery regarding any nonprivileged matter that is relevant to any party’s claim or defense.” N.D. R. CIV. P. 26(b)(1)(A). The discovery rules should be construed “liberally.” *See Marmon v. Hodny*, 287 N.W.2d 470, 476 (N.D. 1980). Additionally, courts have “broad discretion” under Rule 37 to compel discovery upon a party’s motion. *Voracheck v. Citizens State Bank of Lankin*, 421 N.W.2d 45, 50 (N.D. 1988); *see* N.D. R. CIV. P. 37(a)(1).

[¶11] Intervenor Landowners have attempted to confer with Summit in good faith multiple times, but Summit rebuffed those efforts. The record is clear that the Summit entities had ample notice of the deposition, and the topics of questioning were reasonably particular. The Summit entities stand to gain from the use of the property of Intervenor Landowners and have critical information concerning their proposed activities. Under North Dakota’s liberal discovery rules, the

Commission should therefore use its discretion to enter an order compelling the depositions of the three Summit entities.

**A. The Summit Entities & Minnkota Had Sufficient Notice**

[¶12] Summit had notice that Intervenor Landowners wished to take a 30(b)(6) deposition concerning its application as early as May 2, 2024. Ex. 9. It then received notice of the particular topics of questioning on May 9, 2024, nearly a month before the date of the deposition. Ex. 1. Summit then received additional notice of the topics in the form of the First Amended Notice. Ex. 2. And throughout this time, Intervenor Landowners invited Summit to confer so that discovery could be completed in a mutually agreed upon manner. Ex. 9; Ex. 10.

[¶13] The topics of questioning have remained unchanged since the first notice was filed. Therefore, since May 9, 2024, Summit has been on notice of what information Intervenor Landowner's seek. It cannot credibly claim lack of notice now.

[¶14] Summit's argument regarding notice to Minnkota is also unfounded. Indeed, counsel for Minnkota communicated that it did have notice. Ex. 11.

**B. The Notice Is Reasonably Particular**

[¶15] Summit also contends that the deposition notices are insufficient due to a lack of specificity concerning the matters of questioning, but even a cursory review of the notices demonstrates this argument is without merit.

[¶16] The topics of questioning span more than two pages, single spaced. They start with the category of Summit's application which is then finely narrowed to specific models and data, including but not limited to the following:

1. The data and interpretations and inputs for the geologic model created with SLB's Petrel software (Schlumberger, 2020).
2. The data and inputs and model referred to in Section 3.1 of the applications as follows:

- a. “The geologic model and properties served as inputs for numerical simulations of CO<sub>2</sub> injection using Computer Modelling Group Ltd.’s (CMG’s) GEM software (Computer Modelling Group Ltd., 2021). Numerical simulations of CO<sub>2</sub> injection were conducted to assess potential CO<sub>2</sub> injection rate, disposition of injected CO<sub>2</sub>, wellhead pressure (WHP), bottomhole pressure (BHP), and pressure changes in the storage reservoir throughout the expected injection time frame and postinjection period. Results of the numerical simulations were then used to determine the project’s area of review (AOR) pursuant to North Dakota’s geologic CO<sub>2</sub> storage regulations.”
3. United States Geological Survey’s PHREEQC geochemical model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
4. The data and load files and data decks for the SLB Petrel model that was run for Summit’s applications.
5. Computer Modelling Group Ltd.’s GEM model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
6. 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Schlumberger SEclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format.
7. Input files, field and analytical data, and the model geochemical database (and the sources of the foregoing) used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.

Exs. 1, 2, 4, 5, 6.

[¶17] The level of specificity required under Rule 30(b)(6) is “reasonable particularity.” N.D.R.Civ.P. 30(b)(6). If the above level of detail is insufficient for Summit to be apprised of what information the Intervenor Landowners are requesting, it is difficult to imagine what would be sufficient.

### **III. CONCLUSION**

[¶18] Intervenor Landowners have been trying to work with Summit to schedule a 30(b)(6) deposition regarding its application for six weeks. As parties, they deserve to have information prior to the hearing—the hearing at which decisions will be made that greatly affect their property

rights. The Commission should not reward Summit's refusal to engage in good faith and its gamesmanship of the discovery rules. Rather, the Commission should see Summit's tactics for what they are and grant Intervenor Landowner's motion.

DATED this 10<sup>th</sup> day of June, 2024.

**DECLARATION OF DERRICK BRAATEN IN SUPPORT OF MOTION TO COMPEL**

---

1. I am an attorney for the Intervenor Landowners (“Landowners”), in the above-captioned matter.
2. I represent the Landowners in matters involving the applications submitted by Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, and Summit Carbon Storage #3, LLC (“SCS”).
3. Attached hereto as Exhibit 1 is a true and correct copy of Landowners Notice of 30(b)(6) Deposition of Summit Carbon Solutions which was served on May 9, 2024.
4. Attached hereto as Exhibit 2 is a true and correct copy of Intervenor Landowners’ Amended Notice of 30(b)(6) Deposition of Summit Carbon Solutions which was served on May 31, 2024. None of the substance of the topics had changed when the amended notice was issued.
5. Attached hereto as Exhibit 3 is a true and correct copy of Letter from Lawrence Bender regarding the Amended Notice of Deposition dated June 4, 2024.
6. Attached hereto as Exhibit 4 is a true and correct copy of Intervenor Landowners’ Second Amended Notice of 30(b)(6) Deposition of Summit Carbon Storage #1, LLC which was served on June 4, 2024. None of the substance of the topics had changed when the second amended notice was issued.
7. Attached hereto as Exhibit 5 is a true and correct copy of Intervenor Landowners’ Second Amended Notice of 30(b)(6) Deposition of Summit Carbon Storage #2, LLC

which was served on June 4, 2024. None of the substance of the topics had changed when the second amended notice was issued.

8. Attached hereto as Exhibit 6 is a true and correct copy of Intervenor Landowners' Second Amended Notice of 30(b)(6) Deposition of Summit Carbon Storage #3, LLC which was served on June 4, 2024. None of the substance of the topics had changed when the second amended notice was issued.
9. Attached hereto as Exhibit 7 is a true and correct copy of Letter from Lawrence Bender dated June 5, 2024 which was received at 5:55 PM CT, the day before the deposition and less than 24 hours before the start of the deposition.
10. Attached hereto as Exhibit 8 is a true and correct copy of my email response on June 5, 2024 to Mr. Bender's email response.
11. Attached hereto as Exhibit 9 is a true and correct copy of letter dated May 2, 2024 asking to confer regarding a 30(b)(6) deposition.
12. Attached hereto as Exhibit 10 is a true and correct copy of email correspondence dated May 9, 2024 regarding willingness to confer on a date for the 30(b)(6) deposition.
13. Attached hereto as Exhibit 11 is a true and correct copy of the Native Outlook Email regarding Exhibit 8 above indicating my response to Mr. Bender's letter on June 5, 2024 was sent June 5, 2024 at 7:39 PM CT.
14. Attached hereto as Exhibit 12 is a true and correct copy of the Transcript of Proceedings regarding the nonappearance deposition of Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC.

**I declare under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.**

Executed this 10<sup>th</sup> day of June, 2024 in Bismarck, North Dakota.

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**LANDOWNERS NOTICE OF 30(b)(6) DEPOSITION OF  
SUMMIT CARBON SOLUTIONS**

---

**TO:** Summit Carbon Solutions, by and through its attorney, Lawrence Bender, Fredrickson & Byron, P.A., 1133 College Drive, Suite 1000, Bismarck, North Dakota, 58501:

[¶1] PLEASE TAKE NOTICE that, pursuant to N.D.C.C. § 28-32-33 and Rule 30(b)(6) of the North Dakota Rules of Civil Procedure, Intervenor The Swenson Living Trust (“Landowners” or “Swenson Trust”) will take the deposition upon oral examination of Summit Carbon Solutions (“SCS” or “CO<sub>2</sub> injector”) through one or more of its officers, directors, managing agents, or other representatives who shall be designated to testify on the CO<sub>2</sub> injector’s behalf regarding all information known or reasonably available to the CO<sub>2</sub> injector with respect to the subject matters identified in Exhibit A.

[¶2] The deposition shall commence on June 6, 2024 at 9:00 a.m. (Central Time), and continue thereafter until complete, at the offices of Braaten Law Firm, 100 N. 4<sup>th</sup> St., Ste. 100, Bismarck, North Dakota 58501. The deposition shall be conducted before a court reporter, or other officer authorized by law to administer oaths, and shall be recorded by stenographic means and supplementally recorded by video. The deposition will be taken for the purposes of discovery, for use at hearings, or for other purposes as permitted under the North Dakota Rules of Civil Procedure and N.D.C.C. ch. 28-32.

Dated this 9<sup>th</sup> day of May, 2024.

**BRAATEN LAW FIRM**

## EXHIBIT A TO NOTICE OF DEPOSITION OF SUMMIT CARBON SOLUTIONS

### DEFINITIONS

As used in this Notice, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) and each of those entities’ authorized agents.

2. “Landowner” means The Swenson Living Trust.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review, as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit’s applications in NDIC Case No. 30869, and includes the confining layers/zones, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW<sup>1</sup>/<sub>4</sub> of the NE<sup>1</sup>/<sub>4</sub>, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths

were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and each of its authorized agents.

### **TOPICS FOR EXAMINATION**

In accordance with N.D.R.Civ.P. 30(b)(6), The Swenson Living Trust designates the following topics and matters for examination.

- I. Summit’s applications and the information contained in and created or submitted in support of the applications and conclusions drawn therefrom in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) (all applications hereafter referred to collectively as “Summit’s applications”).
  - a. Summit’s applications include all documents submitted to the North Dakota Industrial Commission including its Department of Mineral Resources and its Oil and Gas Division (collectively “NDIC”) as part of or in support of or in relation to Summit’s applications, and all correspondence between Summit and NDIC whether in writing and whether electronic or physical, and whether written or oral. This topic and the scope of Summit’s applications as used herein includes all data files, spreadsheets, databases, and models (including loading files necessary to make data files useable with any model) and all of the information, data, documents, calculations, and non-attorney work product that was created in support of Summit’s applications or which was necessary to create or is materially supportive of Summit’s applications.
    - i. Without limiting the generality of the foregoing, this topic includes the following models and associated data:
      1. The data and interpretations and inputs for the geologic model created with SLB’s Petrel software (Schlumberger, 2020).
      2. The data and inputs and model referred to in Section 3.1 of the applications as follows:
        - a. “The geologic model and properties served as inputs for numerical simulations of CO<sub>2</sub> injection using Computer Modelling Group Ltd.’s (CMG’s) GEM software (Computer Modelling Group Ltd., 2021). Numerical simulations of CO<sub>2</sub> injection were conducted to assess potential CO<sub>2</sub> injection rate, disposition of injected CO<sub>2</sub>, wellhead pressure (WHP), bottomhole pressure (BHP), and pressure changes in the storage reservoir throughout the expected injection time frame and postinjection period. Results of the numerical simulations were then used to determine the

project's area of review (AOR) pursuant to North Dakota's geologic CO2 storage regulations.”

3. United States Geological Survey's PHREEQC geochemical model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  4. The data and load files and data decks for the SLB Petrel model that was run for Summit's applications.
  5. Computer Modelling Group Ltd.'s GEM model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  6. 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Schlumberger SEclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format.
  7. Input files, field and analytical data, and the model geochemical database (and the sources of the foregoing) used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.
- ii. These models also include the conclusions drawn from the models and the data inputs used, particularly as those conclusions were used to support Summit's applications as referenced in these topics.
  - iii. The identity of the person most familiar with the workflows described in Section 3.2.3 of Summit's application in NDIC Case No. 30869 and how it was performed for purposes of Summit's applications and the identity of the person who wrote this passage.
  - iv. The meaning and context and details of how the various processes and functions described in Section 3.2.3 of Summit's applications and how they were actually performed and the models and calculations used to support them.
- b. The factual documentation and information that might support or that Summit will use to support a finding “[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space” as required by N.D.C.C. § 38-22-08(5).
  - c. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding “[t]hat the proposed storage facility will not adversely affect surface waters or formations containing fresh water” as is stated at N.D.C.C. § 38-22-08(7).
  - d. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding that “[t]hat the storage facility will not

endanger human health nor unduly endanger the environment” as is stated at N.D.C.C. § 38-22-08(10).

- e. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding “[t]hat the horizontal and vertical boundaries of the storage reservoir are defined [and] include buffer areas to ensure that the storage facility is operated safely and as contemplated” as is stated at N.D.C.C. § 38-22-08(12).
- f. The factual documentation and information related to or that might support or that Summit will use to support any finding in this proceeding that “all nonconsenting pore space owners are or will be equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14) and any documentation, information, data sets, comparable sales, comparable transactions, appraisals, market reports, financial reports, or other documents related to or referencing compensation paid to nonconsenting pore space owners.
  - i. This subtopic I.b. includes all amounts paid by Summit to any individual or entity for use of or damages to pore space or property rights associated with or related to its storage facility that is the subject of Summit’s application and the Storage Reservoir, and all agreements for such use or damages or payments.
  - ii. This subtopic I.b. includes all reports and agreements in Summit’s possession indicating any amount of compensation paid for any kind of use of or damage to pore space or property for CO<sub>2</sub> sequestration. If Summit has in its possession any agreement with any property owner for use of property or damage to property arising from use of pore space or property for storage or sequestration of CO<sub>2</sub> it is included in this topic.

**NORTH DAKOTA  
OIL AND GAS DIVISION**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**INTERVENOR LANDOWNERS' AMENDED NOTICE OF 30(b)(6) DEPOSITION OF  
SUMMIT CARBON SOLUTIONS**

---

**TO:** Summit Carbon Solutions, by and through its attorney, Lawrence Bender, Fredrickson & Byron, P.A., 1133 College Drive, Suite 1000, Bismarck, North Dakota, 58501:

[¶1] PLEASE TAKE NOTICE that, pursuant to N.D.C.C. § 28-32-33 and Rule 30(b)(6) of the North Dakota Rules of Civil Procedure, Intervenor Landowners the Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith (“Landowners”) will take the deposition upon oral examination of Summit Carbon Solutions (“SCS” or “CO<sub>2</sub> injector”) through one or more of its officers, directors, managing agents, or other representatives who shall be designated to testify on the CO<sub>2</sub> injector’s behalf regarding all information known or reasonably available to the CO<sub>2</sub> injector with respect to the subject matters identified in Exhibit A.

[¶2] The deposition shall commence on June 6, 2024 at 9:00 a.m. (Central Time), and continue thereafter until complete, at the offices of Braaten Law Firm, 100 N. 4<sup>th</sup> St., Ste. 100, Bismarck, North Dakota 58501. The deposition shall be conducted before a court reporter, or other officer authorized by law to administer oaths, and shall be recorded by stenographic means and supplementally recorded by video. The deposition will be taken for the purposes of discovery, for use at hearings, or for other purposes as permitted under the North Dakota Rules of Civil Procedure and N.D.C.C. ch. 28-32.

Dated this 31<sup>st</sup> day of May, 2024.

**BRAATEN LAW FIRM**

/s/ Derrick Braaten

## EXHIBIT A TO NOTICE OF DEPOSITION OF SUMMIT CARBON SOLUTIONS

### DEFINITIONS

As used in this Notice, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) and each of those entities’ authorized agents.

2. “Landowners” means The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review, as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit’s applications in NDIC Case No. 30869, and includes the confining layers/zones, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW<sup>1</sup>/<sub>4</sub> of the NE<sup>1</sup>/<sub>4</sub>, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic

resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and

includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and each of its authorized agents.

### **TOPICS FOR EXAMINATION**

In accordance with N.D.R.Civ.P. 30(b)(6), Landowners designate the following topics and matters for examination.

- I. Summit’s applications and the information contained in and created or submitted in support of the applications and conclusions drawn therefrom in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) (all applications hereafter referred to collectively as “Summit’s applications”).
  - a. Summit’s applications include all documents submitted to the North Dakota Industrial Commission including its Department of Mineral Resources and its Oil and Gas Division (collectively “NDIC”) as part of or in support of or in relation to Summit’s applications, and all correspondence between Summit and NDIC whether in writing and whether electronic or physical, and whether written or oral. This topic and the scope of Summit’s applications as used herein includes all data files, spreadsheets, databases, and models (including loading files necessary to make data files useable with any model) and all of the information, data, documents, calculations, and non-attorney work product that was created in support of Summit’s applications or which was necessary to create or is materially supportive of Summit’s applications.
    - i. Without limiting the generality of the foregoing, this topic includes the following models and associated data:
      1. The data and interpretations and inputs for the geologic model created with SLB’s Petrel software (Schlumberger, 2020).
      2. The data and inputs and model referred to in Section 3.1 of the applications as follows:
        - a. “The geologic model and properties served as inputs for numerical simulations of CO<sub>2</sub> injection using Computer Modelling Group Ltd.’s (CMG’s) GEM software (Computer Modelling Group Ltd., 2021). Numerical simulations of CO<sub>2</sub> injection were conducted to assess potential CO<sub>2</sub> injection rate, disposition of injected CO<sub>2</sub>, wellhead pressure (WHP), bottomhole pressure (BHP), and pressure

changes in the storage reservoir throughout the expected injection time frame and postinjection period. Results of the numerical simulations were then used to determine the project's area of review (AOR) pursuant to North Dakota's geologic CO<sub>2</sub> storage regulations."

3. United States Geological Survey's PHREEQC geochemical model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  4. The data and load files and data decks for the SLB Petrel model that was run for Summit's applications.
  5. Computer Modelling Group Ltd.'s GEM model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  6. 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Schlumberger SEclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format.
  7. Input files, field and analytical data, and the model geochemical database (and the sources of the foregoing) used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.
- ii. These models also include the conclusions drawn from the models and the data inputs used, particularly as those conclusions were used to support Summit's applications as referenced in these topics.
  - iii. The identity of the person most familiar with the workflows described in Section 3.2.3 of Summit's application in NDIC Case No. 30869 and how it was performed for purposes of Summit's applications and the identity of the person who wrote this passage.
  - iv. The meaning and context and details of how the various processes and functions described in Section 3.2.3 of Summit's applications and how they were actually performed and the models and calculations used to support them.
- b. The factual documentation and information that might support or that Summit will use to support a finding "[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space" as required by N.D.C.C. § 38-22-08(5).
  - c. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding "[t]hat the proposed storage facility

will not adversely affect surface waters or formations containing fresh water” as is stated at N.D.C.C. § 38-22-08(7).

- d. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding that “[t]hat the storage facility will not endanger human health nor unduly endanger the environment” as is stated at N.D.C.C. § 38-22-08(10).
- e. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding “[t]hat the horizontal and vertical boundaries of the storage reservoir are defined [and] include buffer areas to ensure that the storage facility is operated safely and as contemplated” as is stated at N.D.C.C. § 38-22-08(12).
- f. The factual documentation and information related to or that might support or that Summit will use to support any finding in this proceeding that “all nonconsenting pore space owners are or will be equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14) and any documentation, information, data sets, comparable sales, comparable transactions, appraisals, market reports, financial reports, or other documents related to or referencing compensation paid to nonconsenting pore space owners.
  - i. This subtopic I.b. includes all amounts paid by Summit to any individual or entity for use of or damages to pore space or property rights associated with or related to its storage facility that is the subject of Summit’s application and the Storage Reservoir, and all agreements for such use or damages or payments.
  - ii. This subtopic I.b. includes all reports and agreements in Summit’s possession indicating any amount of compensation paid for any kind of use of or damage to pore space or property for CO<sub>2</sub> sequestration. If Summit has in its possession any agreement with any property owner for use of property or damage to property arising from use of pore space or property for storage or sequestration of CO<sub>2</sub> it is included in this topic.

**RE: NDIC Case Nos. 30869–30880**

Dear Derrick:

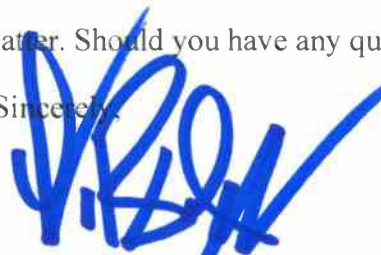

This letter concerns the Intervenor Landowners' Amended Notice of 30(b)(6) Deposition of Summit Carbon Solutions in NDIC Case Nos. 30869–30880, which I received via e-mail last Friday afternoon, May 31, 2024.

Summit Carbon Solutions, LLC is not a party to NDIC Case Nos. 30869–30880. "A non-party deponent's attendance may be compelled by subpoena under Rule 45." N.D.R.Civ.P. 30(a)(1). As a result, a notice of deposition alone is not sufficient to compel the attendance of Summit Carbon Solutions, LLC at a deposition. *See, e.g.,* N.D.R.Civ.P. 30(g)(2).

The notice we received is directed to "Summit Carbon Solutions" and gives no indication that a subpoena has been or will be served on Summit Carbon Solutions, LLC. Instead, the Intervenor Landowners' Amended Notice of 30(b)(6) Deposition of Summit Carbon Solutions appears to assume that Summit Carbon Solutions, LLC is a party to NDIC Case Nos. 30869–30880 and that a subpoena is unnecessary. If that is the case, please be advised the notice is ineffective.

Thank you for your attention to this matter. Should you have any questions, please advise.

Sincerely,

LAWRENCE BENDER

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**INTERVENOR LANDOWNERS' SECOND AMENDED NOTICE OF 30(b)(6)  
DEPOSITION OF SUMMIT CARBON STORAGE #1, LLC**

---

**TO:** Summit Carbon Storage #1, LLC, by and through its attorney, Lawrence Bender, Fredrickson & Byron, P.A., 304 East Front Avenue, Suite 400, Bismarck, North Dakota, 58504:

[¶1] PLEASE TAKE NOTICE that, pursuant to N.D.C.C. § 28-32-33 and Rule 30(b)(6) of the North Dakota Rules of Civil Procedure, Intervenor Landowners the Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith (“Landowners”) will take the deposition upon oral examination of Summit Carbon Storage #1, LLC (“SCS” or “CO<sub>2</sub> injector”) through one or more of its officers, directors, managing agents, or other representatives who shall be designated to testify on the CO<sub>2</sub> injector’s behalf regarding all information known or reasonably available to the CO<sub>2</sub> injector with respect to the subject matters identified in Exhibit A.

[¶2] The deposition shall commence on June 6, 2024 at 9:00 a.m. (Central Time), and continue thereafter until complete, at the offices of Braaten Law Firm, 100 N. 4<sup>th</sup> St., Ste. 100, Bismarck, North Dakota 58501. The deposition shall be conducted before a court reporter, or other officer authorized by law to administer oaths, and shall be recorded by stenographic means and supplementally recorded by video. The deposition will be taken for the purposes of discovery, for use at hearings, or for other purposes as permitted under the North Dakota Rules of Civil Procedure and N.D.C.C. ch. 28-32.

Dated this 4<sup>th</sup> day of June, 2024.

**BRAATEN LAW FIRM**

## EXHIBIT A TO NOTICE OF DEPOSITION OF SUMMIT CARBON STORAGE #1, LLC

### DEFINITIONS

As used in this Notice, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) and each of those entities’ authorized agents.

2. “Landowners” means The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review, as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit’s applications in NDIC Case No. 30869, and includes the confining layers/zones, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW $\frac{1}{4}$  of the NE $\frac{1}{4}$ , Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic

resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and

includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and each of its authorized agents.

### **TOPICS FOR EXAMINATION**

In accordance with N.D.R.Civ.P. 30(b)(6), Landowners designate the following topics and matters for examination.

- I. Summit’s applications and the information contained in and created or submitted in support of the applications and conclusions drawn therefrom in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) (all applications hereafter referred to collectively as “Summit’s applications”).
  - a. Summit’s applications include all documents submitted to the North Dakota Industrial Commission including its Department of Mineral Resources and its Oil and Gas Division (collectively “NDIC”) as part of or in support of or in relation to Summit’s applications, and all correspondence between Summit and NDIC whether in writing and whether electronic or physical, and whether written or oral. This topic and the scope of Summit’s applications as used herein includes all data files, spreadsheets, databases, and models (including loading files necessary to make data files useable with any model) and all of the information, data, documents, calculations, and non-attorney work product that was created in support of Summit’s applications or which was necessary to create or is materially supportive of Summit’s applications.
    - i. Without limiting the generality of the foregoing, this topic includes the following models and associated data:
      1. The data and interpretations and inputs for the geologic model created with SLB’s Petrel software (Schlumberger, 2020).
      2. The data and inputs and model referred to in Section 3.1 of the applications as follows:
        - a. “The geologic model and properties served as inputs for numerical simulations of CO<sub>2</sub> injection using Computer Modelling Group Ltd.’s (CMG’s) GEM software (Computer Modelling Group Ltd., 2021). Numerical simulations of CO<sub>2</sub> injection were conducted to assess potential CO<sub>2</sub> injection rate, disposition of injected CO<sub>2</sub>, wellhead pressure (WHP), bottomhole pressure (BHP), and pressure

changes in the storage reservoir throughout the expected injection time frame and postinjection period. Results of the numerical simulations were then used to determine the project's area of review (AOR) pursuant to North Dakota's geologic CO2 storage regulations."

3. United States Geological Survey's PHREEQC geochemical model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  4. The data and load files and data decks for the SLB Petrel model that was run for Summit's applications.
  5. Computer Modelling Group Ltd.'s GEM model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  6. 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Schlumberger SEclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format.
  7. Input files, field and analytical data, and the model geochemical database (and the sources of the foregoing) used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.
- ii. These models also include the conclusions drawn from the models and the data inputs used, particularly as those conclusions were used to support Summit's applications as referenced in these topics.
  - iii. The identity of the person most familiar with the workflows described in Section 3.2.3 of Summit's application in NDIC Case No. 30869 and how it was performed for purposes of Summit's applications and the identity of the person who wrote this passage.
  - iv. The meaning and context and details of how the various processes and functions described in Section 3.2.3 of Summit's applications and how they were actually performed and the models and calculations used to support them.
- b. The factual documentation and information that might support or that Summit will use to support a finding "[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space" as required by N.D.C.C. § 38-22-08(5).
  - c. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding "[t]hat the proposed storage facility

will not adversely affect surface waters or formations containing fresh water” as is stated at N.D.C.C. § 38-22-08(7).

- d. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding that “[t]hat the storage facility will not endanger human health nor unduly endanger the environment” as is stated at N.D.C.C. § 38-22-08(10).
- e. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding “[t]hat the horizontal and vertical boundaries of the storage reservoir are defined [and] include buffer areas to ensure that the storage facility is operated safely and as contemplated” as is stated at N.D.C.C. § 38-22-08(12).
- f. The factual documentation and information related to or that might support or that Summit will use to support any finding in this proceeding that “all nonconsenting pore space owners are or will be equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14) and any documentation, information, data sets, comparable sales, comparable transactions, appraisals, market reports, financial reports, or other documents related to or referencing compensation paid to nonconsenting pore space owners.
  - i. This subtopic I.b. includes all amounts paid by Summit to any individual or entity for use of or damages to pore space or property rights associated with or related to its storage facility that is the subject of Summit’s application and the Storage Reservoir, and all agreements for such use or damages or payments.
  - ii. This subtopic I.b. includes all reports and agreements in Summit’s possession indicating any amount of compensation paid for any kind of use of or damage to pore space or property for CO<sub>2</sub> sequestration. If Summit has in its possession any agreement with any property owner for use of property or damage to property arising from use of pore space or property for storage or sequestration of CO<sub>2</sub> it is included in this topic.

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**INTERVENOR LANDOWNERS' SECOND AMENDED NOTICE OF 30(b)(6)  
DEPOSITION OF SUMMIT CARBON STORAGE #2, LLC**

---

**TO:** Summit Carbon Storage #2, by and through its attorney, Lawrence Bender, Fredrickson & Byron, P.A., 304 East Front Avenue, Suite 400, Bismarck, North Dakota, 58504:

[¶1] PLEASE TAKE NOTICE that, pursuant to N.D.C.C. § 28-32-33 and Rule 30(b)(6) of the North Dakota Rules of Civil Procedure, Intervenor Landowners the Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith (“Landowners”) will take the deposition upon oral examination of Summit Carbon Storage #2, LLC (“SCS” or “CO<sub>2</sub> injector”) through one or more of its officers, directors, managing agents, or other representatives who shall be designated to testify on the CO<sub>2</sub> injector’s behalf regarding all information known or reasonably available to the CO<sub>2</sub> injector with respect to the subject matters identified in Exhibit A.

[¶2] The deposition shall commence on June 6, 2024 at 9:00 a.m. (Central Time), and continue thereafter until complete, at the offices of Braaten Law Firm, 100 N. 4<sup>th</sup> St., Ste. 100, Bismarck, North Dakota 58501. The deposition shall be conducted before a court reporter, or other officer authorized by law to administer oaths, and shall be recorded by stenographic means and supplementally recorded by video. The deposition will be taken for the purposes of discovery, for use at hearings, or for other purposes as permitted under the North Dakota Rules of Civil Procedure and N.D.C.C. ch. 28-32.

Dated this 4<sup>th</sup> day of June, 2024.

**BRAATEN LAW FIRM**

## EXHIBIT A TO NOTICE OF DEPOSITION OF SUMMIT CARBON STORAGE #2, LLC

### DEFINITIONS

As used in this Notice, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) and each of those entities’ authorized agents.

2. “Landowners” means The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review, as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit’s applications in NDIC Case No. 30869, and includes the confining layers/zones, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW¼ of the NE¼, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic

resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and

includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and each of its authorized agents.

### **TOPICS FOR EXAMINATION**

In accordance with N.D.R.Civ.P. 30(b)(6), Landowners designate the following topics and matters for examination.

- I. Summit’s applications and the information contained in and created or submitted in support of the applications and conclusions drawn therefrom in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) (all applications hereafter referred to collectively as “Summit’s applications”).
  - a. Summit’s applications include all documents submitted to the North Dakota Industrial Commission including its Department of Mineral Resources and its Oil and Gas Division (collectively “NDIC”) as part of or in support of or in relation to Summit’s applications, and all correspondence between Summit and NDIC whether in writing and whether electronic or physical, and whether written or oral. This topic and the scope of Summit’s applications as used herein includes all data files, spreadsheets, databases, and models (including loading files necessary to make data files useable with any model) and all of the information, data, documents, calculations, and non-attorney work product that was created in support of Summit’s applications or which was necessary to create or is materially supportive of Summit’s applications.
    - i. Without limiting the generality of the foregoing, this topic includes the following models and associated data:
      1. The data and interpretations and inputs for the geologic model created with SLB’s Petrel software (Schlumberger, 2020).
      2. The data and inputs and model referred to in Section 3.1 of the applications as follows:
        - a. “The geologic model and properties served as inputs for numerical simulations of CO<sub>2</sub> injection using Computer Modelling Group Ltd.’s (CMG’s) GEM software (Computer Modelling Group Ltd., 2021). Numerical simulations of CO<sub>2</sub> injection were conducted to assess potential CO<sub>2</sub> injection rate, disposition of injected CO<sub>2</sub>, wellhead pressure (WHP), bottomhole pressure (BHP), and pressure

changes in the storage reservoir throughout the expected injection time frame and postinjection period. Results of the numerical simulations were then used to determine the project's area of review (AOR) pursuant to North Dakota's geologic CO<sub>2</sub> storage regulations."

3. United States Geological Survey's PHREEQC geochemical model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  4. The data and load files and data decks for the SLB Petrel model that was run for Summit's applications.
  5. Computer Modelling Group Ltd.'s GEM model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  6. 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Schlumberger SEclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format.
  7. Input files, field and analytical data, and the model geochemical database (and the sources of the foregoing) used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.
- ii. These models also include the conclusions drawn from the models and the data inputs used, particularly as those conclusions were used to support Summit's applications as referenced in these topics.
  - iii. The identity of the person most familiar with the workflows described in Section 3.2.3 of Summit's application in NDIC Case No. 30869 and how it was performed for purposes of Summit's applications and the identity of the person who wrote this passage.
  - iv. The meaning and context and details of how the various processes and functions described in Section 3.2.3 of Summit's applications and how they were actually performed and the models and calculations used to support them.
- b. The factual documentation and information that might support or that Summit will use to support a finding "[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space" as required by N.D.C.C. § 38-22-08(5).
  - c. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding "[t]hat the proposed storage facility

will not adversely affect surface waters or formations containing fresh water” as is stated at N.D.C.C. § 38-22-08(7).

- d. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding that “[t]hat the storage facility will not endanger human health nor unduly endanger the environment” as is stated at N.D.C.C. § 38-22-08(10).
- e. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding “[t]hat the horizontal and vertical boundaries of the storage reservoir are defined [and] include buffer areas to ensure that the storage facility is operated safely and as contemplated” as is stated at N.D.C.C. § 38-22-08(12).
- f. The factual documentation and information related to or that might support or that Summit will use to support any finding in this proceeding that “all nonconsenting pore space owners are or will be equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14) and any documentation, information, data sets, comparable sales, comparable transactions, appraisals, market reports, financial reports, or other documents related to or referencing compensation paid to nonconsenting pore space owners.
  - i. This subtopic I.b. includes all amounts paid by Summit to any individual or entity for use of or damages to pore space or property rights associated with or related to its storage facility that is the subject of Summit’s application and the Storage Reservoir, and all agreements for such use or damages or payments.
  - ii. This subtopic I.b. includes all reports and agreements in Summit’s possession indicating any amount of compensation paid for any kind of use of or damage to pore space or property for CO<sub>2</sub> sequestration. If Summit has in its possession any agreement with any property owner for use of property or damage to property arising from use of pore space or property for storage or sequestration of CO<sub>2</sub> it is included in this topic.

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**INTERVENOR LANDOWNERS' SECOND AMENDED NOTICE OF 30(b)(6)  
DEPOSITION OF SUMMIT CARBON STORAGE #3, LLC**

---

**TO:** Summit Carbon Storage #3, LLC, by and through its attorney, Lawrence Bender, Fredrickson & Byron, P.A., 304 East Front Avenue, Suite 400, Bismarck, North Dakota, 58504:

[¶1] PLEASE TAKE NOTICE that, pursuant to N.D.C.C. § 28-32-33 and Rule 30(b)(6) of the North Dakota Rules of Civil Procedure, Intervenor Landowners the Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith (“Landowners”) will take the deposition upon oral examination of Summit Carbon Storage #3, LLC (“SCS” or “CO<sub>2</sub> injector”) through one or more of its officers, directors, managing agents, or other representatives who shall be designated to testify on the CO<sub>2</sub> injector’s behalf regarding all information known or reasonably available to the CO<sub>2</sub> injector with respect to the subject matters identified in Exhibit A.

[¶2] The deposition shall commence on June 6, 2024 at 9:00 a.m. (Central Time), and continue thereafter until complete, at the offices of Braaten Law Firm, 100 N. 4<sup>th</sup> St., Ste. 100, Bismarck, North Dakota 58501. The deposition shall be conducted before a court reporter, or other officer authorized by law to administer oaths, and shall be recorded by stenographic means and supplementally recorded by video. The deposition will be taken for the purposes of discovery, for use at hearings, or for other purposes as permitted under the North Dakota Rules of Civil Procedure and N.D.C.C. ch. 28-32.

Dated this 4<sup>th</sup> day of June, 2024.

**BRAATEN LAW FIRM**

## EXHIBIT A TO NOTICE OF DEPOSITION OF SUMMIT CARBON STORAGE #3, LLC

### DEFINITIONS

As used in this Notice, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) and each of those entities’ authorized agents.

2. “Landowners” means The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review, as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit’s applications in NDIC Case No. 30869, and includes the confining layers/zones, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW<sup>1</sup>/<sub>4</sub> of the NE<sup>1</sup>/<sub>4</sub>, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic

resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and

includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and each of its authorized agents.

### **TOPICS FOR EXAMINATION**

In accordance with N.D.R.Civ.P. 30(b)(6), Landowners designate the following topics and matters for examination.

- I. Summit’s applications and the information contained in and created or submitted in support of the applications and conclusions drawn therefrom in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) (all applications hereafter referred to collectively as “Summit’s applications”).
  - a. Summit’s applications include all documents submitted to the North Dakota Industrial Commission including its Department of Mineral Resources and its Oil and Gas Division (collectively “NDIC”) as part of or in support of or in relation to Summit’s applications, and all correspondence between Summit and NDIC whether in writing and whether electronic or physical, and whether written or oral. This topic and the scope of Summit’s applications as used herein includes all data files, spreadsheets, databases, and models (including loading files necessary to make data files useable with any model) and all of the information, data, documents, calculations, and non-attorney work product that was created in support of Summit’s applications or which was necessary to create or is materially supportive of Summit’s applications.
    - i. Without limiting the generality of the foregoing, this topic includes the following models and associated data:
      1. The data and interpretations and inputs for the geologic model created with SLB’s Petrel software (Schlumberger, 2020).
      2. The data and inputs and model referred to in Section 3.1 of the applications as follows:
        - a. “The geologic model and properties served as inputs for numerical simulations of CO<sub>2</sub> injection using Computer Modelling Group Ltd.’s (CMG’s) GEM software (Computer Modelling Group Ltd., 2021). Numerical simulations of CO<sub>2</sub> injection were conducted to assess potential CO<sub>2</sub> injection rate, disposition of injected CO<sub>2</sub>, wellhead pressure (WHP), bottomhole pressure (BHP), and pressure

changes in the storage reservoir throughout the expected injection time frame and postinjection period. Results of the numerical simulations were then used to determine the project's area of review (AOR) pursuant to North Dakota's geologic CO<sub>2</sub> storage regulations."

3. United States Geological Survey's PHREEQC geochemical model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  4. The data and load files and data decks for the SLB Petrel model that was run for Summit's applications.
  5. Computer Modelling Group Ltd.'s GEM model and both the data files and data inputs used to run this model and bases for using the chosen inputs.
  6. 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Schlumberger SEclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format.
  7. Input files, field and analytical data, and the model geochemical database (and the sources of the foregoing) used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.
- ii. These models also include the conclusions drawn from the models and the data inputs used, particularly as those conclusions were used to support Summit's applications as referenced in these topics.
  - iii. The identity of the person most familiar with the workflows described in Section 3.2.3 of Summit's application in NDIC Case No. 30869 and how it was performed for purposes of Summit's applications and the identity of the person who wrote this passage.
  - iv. The meaning and context and details of how the various processes and functions described in Section 3.2.3 of Summit's applications and how they were actually performed and the models and calculations used to support them.
- b. The factual documentation and information that might support or that Summit will use to support a finding "[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space" as required by N.D.C.C. § 38-22-08(5).
  - c. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding "[t]hat the proposed storage facility

will not adversely affect surface waters or formations containing fresh water” as is stated at N.D.C.C. § 38-22-08(7).

- d. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding that “[t]hat the storage facility will not endanger human health nor unduly endanger the environment” as is stated at N.D.C.C. § 38-22-08(10).
- e. The factual documentation and information that might support or that Summit will use to support any finding in this proceeding “[t]hat the horizontal and vertical boundaries of the storage reservoir are defined [and] include buffer areas to ensure that the storage facility is operated safely and as contemplated” as is stated at N.D.C.C. § 38-22-08(12).
- f. The factual documentation and information related to or that might support or that Summit will use to support any finding in this proceeding that “all nonconsenting pore space owners are or will be equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14) and any documentation, information, data sets, comparable sales, comparable transactions, appraisals, market reports, financial reports, or other documents related to or referencing compensation paid to nonconsenting pore space owners.
  - i. This subtopic I.b. includes all amounts paid by Summit to any individual or entity for use of or damages to pore space or property rights associated with or related to its storage facility that is the subject of Summit’s application and the Storage Reservoir, and all agreements for such use or damages or payments.
  - ii. This subtopic I.b. includes all reports and agreements in Summit’s possession indicating any amount of compensation paid for any kind of use of or damage to pore space or property for CO<sub>2</sub> sequestration. If Summit has in its possession any agreement with any property owner for use of property or damage to property arising from use of pore space or property for storage or sequestration of CO<sub>2</sub> it is included in this topic.

**VIA E-MAIL***derrick@braatenlawfirm.com*Derrick L. Braaten  
Braaten Law Firm  
109 N. Fourth St., Ste. 100  
Bismarck, ND 58501-4003**RE: NDIC Case Nos. 30869–30880**

Dear Derrick:

This letter concerns the following documents you served in the above-referenced cases: Intervenor Landowners’ Second Amended Notice of 30(b)(6) Deposition of Summit Carbon Storage #1, LLC; Intervenor Landowners’ Second Amended Notice of 30(b)(6) Deposition of Summit Carbon Storage #2, LLC; Intervenor Landowners’ Second Amended Notice of 30(b)(6) Deposition of Summit Carbon Storage #3, LLC (collectively, the “Deposition Notices”). I received copies of these documents by e-mail yesterday, June 4, 2024.

Rule 30(b)(1) provides that a party who wants to depose a person by oral questions must give reasonable written notice “to every other party.” The North Dakota Industrial Commission (“Commission”) issued an order on Monday, June 3, 2024, granting the petition to intervene in NDIC Case Nos. 30869–30880 filed by Minnkota Power Cooperative, Inc. (“Minnkota”). The declaration of service accompanying the Deposition Notices does not indicate that Minnkota has been served with copies thereof. As a result, the Intervenor Landowners have not complied with Rule 30 and the Deposition Notices are ineffective. *Cf. Rolin Mfg., Inc. v. Mosbrucker*, 544 N.W.2d 132, 139 (N.D. 1996) (Noting that issuance of subpoena without written notice to other parties was “not consistent with” the Rules of Civil Procedure and affirming district court order quashing subpoena and imposing sanctions on issuing party).

If Minnkota has been given notice of the proposed depositions of my clients, there remain issues with the Deposition Notices that I believe are ultimately fatal. As noted above, Rule 30(b)(1) requires that a party seeking to depose another person must give “reasonable written notice” thereof. The Deposition Notices were served on June 4, 2024, for a deposition to take place on June 6, 2024. I am not aware of any court that has held less than two days’ notice to be “reasonable” under Rule 30. For this reason, the Deposition Notices do not comply with Rule 30.

Rule 30(b)(6) requires that “[b]efore or promptly after the notice . . . is served, the serving party and the organization must confer in good faith about the matters for examination.” Intervenor Landowners have not attempted to confer in good faith with my clients regarding the matters for examination, nor does a June 6, 2024 deposition date allow for such conferral. As such, the Intervenor Landowners have not complied with Rule 30(b)(6) and the Deposition Notices are for that additional reason ineffective.

The Intervenor Landowners failure to confer in good faith regarding matters for examination is exacerbated by the fact that the Deposition Notices do not comply with Rule 30(b)(6)’s requirement they “describe with reasonable particularity the matters for examination.” As I read the Deposition Notices, I understand the topic for examination to be “Summit’s applications and the information contained in and created or submitted in support of the applications and conclusions drawn therefrom in NDIC Case Nos. [30869–30880].” This is analogous to listing “all allegations contained in the complaint” as a matter for examination, which courts routinely reject for failure to comply with the reasonable particularity requirement. *See, e.g., Washington-St. Tammany Elec. Coop., Inc. v. Louisiana Generating, L.L.C.*, No. CV 17-405-JWD-RLB, 2019 WL 1804849, at \*12 (M.D. La. Apr. 24, 2019) (concluding that 30(b)(6) deposition topic “which generally refers to allegations in the Complaint” is overly broad and fails to describe the topic with reasonable particularity); *Waste Mgmt. of Louisiana, LLC v. River Birch, Inc.*, No. CV 11-2405, 2017 WL 2831700, at \*3 (E.D. La. June 30, 2017) (finding that “The factual basis for the allegations contained in [the Plaintiff’s] RICO Statement” and “The factual basis for the allegations contained in [the Plaintiff’s] Third Amended Complaint” to be overly broad as written); *Carriage Hills Condo., Inc. v. Roofing*, 109 So.3d 329, 336 (Fla. App. 2013) (finding that “all allegations contained in the complaint” fails to meet reasonable particularity requirement); *E3 Biofuels, LLC v. Biothane, LLC*, No. 8:11CV44, 2013 WL 4400506, at \*2 (D. Neb. Aug. 15, 2013) (stating the most obvious example of a failure to particularize the areas of inquiry is a request for testimony regarding “[Plaintiff’s] claims as set forth in its Amended Complaint”). Because the Deposition Notices fail to comply with Rule 30(b)(6)’s “reasonable particularity” requirement, they are improper and ineffective.

Ultimately, this letter is intended to inform you that because of the Intervenor Landowners’ failure to comply with Rule 30, my clients do not intend to appear for the depositions tomorrow, June 6, 2024, as set forth in the Deposition Notices. Should you have any questions, please advise.

Sincerely,

/s/ Lawrence Bender

Lawrence,

I appreciate your sending this notice and letting me know in advance this evening.

I disagree that there is not an obligation for your client to produce a witness. I'll respond specifically to your points below.

I did provide notice to Minnkota. I was in a hearing all day today with Josh Swanson and explained it to him and he was aware of the deposition and apparently not intending to participate. But he did get notice. We also served him formally with the notice of deposition.

I offered to confer before I even served the notice, and that letter is attached. I then served you with the notice that included the topics for examination on May 9, and they have not changed since then. That was more than sufficient to provide you with reasonable notice as well. You were provided with the topics a month ago and they've not changed, and you were well aware of the date and time. My opening email also offered to confer and adjust the date or work with you on this depo, and you never took me up on that.

As to the particularity of the topics speak for themselves, and I clearly did not simply state "the applications." For example, I narrowed in from the broader category to very specifically request a witness prepared to discuss: "The data and inputs and model referred to in Section 3.1 of the applications as follows: [the] geologic model and properties served as inputs for numerical simulations of CO2 injection using Computer Modelling Group Ltd.'s (CMG's) GEM software (Computer Modelling Group Ltd., 2021). Numerical simulations of CO2 injection were conducted to assess potential CO2 injection rate, disposition of injected CO2, wellhead pressure (WHP), bottomhole pressure (BHP), and pressure changes in the storage reservoir throughout the expected injection time frame and postinjection period. Results of the numerical simulations were then used to determine the project's area of review (AOR) pursuant to North Dakota's geologic CO2 storage regulations." I also specified: "United States Geological Survey's PHREEQC geochemical model and both the data files and data inputs used to run this model and bases for using the chosen inputs."

I intend to move forward with the deposition tomorrow morning. If there is no witness I will put that on record and continue the deposition.

Thank you,  
Derrick

**Re: Summit Carbon Solutions – NDIC Case Nos. 30869-30880**

Lawrence:

I am writing to discuss discovery in this administrative proceeding. I would like to conduct a 30(b)(6) deposition of your client and am currently working on a topic list and will be providing that to you in the next few days. I understand you will need to see the topics in order to determine who at Summit will be testifying, but I would like to put aside some days in late May/early June for the deposition that work for our two schedules at least given how busy we both are and are likely to become. Please let me know what days you have available for a deposition. I also will be serving your client with a couple rounds of written discovery, and I want to give you a heads up that I intend to request that the NDIC expedite the discovery process.

I also would like to know if you would have any objection to my asking the commission for electronic data and files that were provided to the commission on behalf of your client, such as shape files, engineering files for the reservoir modeling and geological data. If I am able to get all data and electronic files the Commission has, that may be sufficient for my experts and their technical review if it contains all of the pertinent data. I'm also happy to sit down with you and anyone from Summit or the NDIC to discuss a way to efficiently exchange data and information prior to the hearing.

Sincerely,

Derrick Braaten

Lawrence,

I scheduled this to get a date down and I did try to look at what I know of your schedule between PSC hearings, etc. I am open to rescheduling this if we can find a mutually agreeable date though, so just wanted to let you know that right away. I realize we may also still get in a fight about whether you're going to show up or respond to anything I am doing until the NDIC responds to the petition, but assuming I move ahead with it just let me know on the date.

Thanks,  
Derrick

 7, 8, 9, 10, 11, 14, 15, 16, 17, :  
 18, 19, 20, 21, 22, 23, 25, 26, :  
 27, 28, 29, 30, 31, 32, 33, 34, :  
 and 35, Township 141 North, Range :  
 87 West, Sections 1, 2, 3, and 12,:  
 Township 140 North, Range 88 West :  
 and Sections 4, 5, 6, and 7, :  
 Township 140 North, Range 87 West,:  
 Mercer, Morton, and Oliver :  
 Counties, ND, in the Broom Creek :  
 Formation. :

In re motion to consider :  
 establishing the field and pool :  
 limits for lands located in :  
 Sections 31, 32, 33, and 34, :  
 Township 142 North, Range 87 West,:  
 Sections 1, 11, 12, 13, 14, 15, :  
 22, 23, 24, 25, 26, 35, and 36, :  
 Township 141 North, Range 88 West,:  
 Sections 2, 3, 4, 5, 6, 7, 8, 9, :  
 10, 11, 14, 15, 16, 17, 18, 19, :  
 20, 21, 22, 23, 25, 26, 27, 28, :  
 29, 30, 31, 32, 33, 34, and 35, :  
 Township 141 North, Range 87 West,:  
 Sections 1, 2, 3, and 12, Township:

140 North, Range 88 West and :  
 Sections 4, 5, 6, and 7, Township :  
 140 North, Range 87 West, Mercer, :  
 Morton, and Oliver Counties, ND, :  
 subject to the application of :  
 Summit Carbon Storage #1, LLC for :  
 the geologic storage of carbon :  
 dioxide in the Broom Creek :  
 Formation. :

In re application of Summit :  
 Carbon Storage #2, LLC requesting :  
 consideration for the geologic :  
 storage of carbon dioxide in the :  
 Broom Creek Formation from the :  
 Midwest Carbon Express Pipeline :  
 in the storage facility located in :  
 Sections 27, 28, 29, 32, 33, 34, :  
 and 35, Township 143 North, Range :  
 88 West, Sections 1, 2, 3, 4, 5, :  
 6, 7, 8, 9, 10, 11, 12, 13, 14, :  
 15, 16, 17, 18, 19, 20, 21, 22, :  
 23, 24, 25, 26, 27, 28, 29, 30, :  
 32, 33, 34, 35, and 36, Township :  
 142 North, Range 88 West, Sections :  
 5, 6, 7, 8, 17, 18, 19, 20, 29, :  
 30, and 31, Township 142 North, :  
 Range 87 West, and Sections 1, 2, :  
 and 3, Township 141 North, Range :  
 88 West, Mercer and Oliver :  
 Counties, ND. :

In re application of Summit :  
 Carbon Storage #2, LLC to :  
 consider the amalgamation of the :  
 storage reservoir pore space, in :  
 which the Commission may require :  
 that the pore space owned by :  
 nonconsenting owners be included :  
 in the geologic storage, as :  
 required to operate the Summit :  
 Carbon Storage #2, LLC storage :  
 facility located in Sections 27, :  
 28, 29, 32, 33, 34, and 35, :  
 Township 143 North, Range 88 West, :  
 Sections 1, 2, 3, 4, 5, 6, 7, 8, :  
 9, 10, 11, 12, 13, 14, 15, 16, 17, :  
 18, 19, 20, 21, 22, 23, 24, 25, :

26, 27, 28, 29, 30, 32, 33, 34, :  
 35, and 36, Township 142 North, :  
 Range 88 West, Sections 5, 6, 7, :  
 8, 17, 18, 19, 20, 29, 30, and 31, :  
 Township 142 North, Range 88 West, :  
 Sections 5, 6, 7, 8, 17, 18, 19, :  
 20, 29, 30, 31, Township 142 :  
 North, Range 87 West, and Sections :  
 1, 2, and 3, Township 141 North, :  
 Range 88 West, Mercer and Oliver :  
 Counties, ND in the Broom Creek :  
 Formation. :

In re application of Summit :  
 Carbon Storage #2, LLC to :  
 consider the application of Summit :  
 Carbon Storage #2, LLC for an :  
 order of the Commission :  
 determining the amount of :  
 financial responsibility for the :  
 geologic storage of carbon dioxide :  
 from the Midwest Carbon Express :  
 Pipeline in the storage facility :  
 located in Sections 27, 28, 29, :  
 32, 33, 34, and 35, Township 143 :  
 North, Range 88 West, Sections 1, :  
 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, :  
 12, 13, 14, 15, 16, 17, 18, 19, :  
 20, 21, 22, 23, 24, 25, 26, 27, :  
 28, 29, 30, 32, 33, 34, 35, and :  
 36, Township 142 North, Range 88 :  
 West, Sections 5, 6, 7, 8, 17, 18, :  
 19, 20, 29, 30, and 31, Township :  
 142 North, Range 87 West, and :  
 Sections 1, 2, and 3, Township 141 :  
 North, Range 88 West, Mercer and :  
 Oliver Counties, ND, in the Broom :  
 Creek Formation. :

In re motion of the Commission to :  
 consider establishing the field :  
 and pool limits for lands located :  
 in Sections 27, 28, 29, 32, 33, :  
 34, and 35, Township 143 North, :  
 Range 88 West, Sections 1, 2, 3, :  
 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, :  
 14, 15, 16, 17, 18, 19, 20, 21, :  
 22, 23, 24, 25, 26, 27, 28, 29, :

30, 32, 33, 34, 35, and 36, :  
 Township 142 North, Range 88 West, :  
 Sections 5, 6, 7, 8, 17, 18, 19, :  
 20, 29, 30, and 31, Township 142 :  
 North, Range 87 West, and Sections :  
 1, 2, and 3, Township 141 North, :  
 Range 88 West, Mercer and Oliver :  
 Counties, ND, subject to the :  
 application of Summit Carbon :  
 Storage #2, LLC for the geologic :  
 storage of carbon dioxide in the :  
 Broom Creek Formation, and enact :  
 such special field rules as may :  
 be necessary. :

In re application of Summit :  
 Carbon Storage #3, LLC requesting :  
 consideration for the geologic :  
 storage of carbon dioxide in the :  
 Broom Creek Formation from the :  
 Midwest Carbon Express Pipeline in :  
 the storage facility located in :  
 Section 36, Township 143 North, :  
 Range 87 West, Sections 19, 20, :  
 21, 28, 29, 30, 31, 32, 33, 34, :  
 35, and 36, Township 143 North, :  
 Range 87 West, Sections 19, 20, :  
 21, 28, 29, 30, 31, 32, 33, 34, :  
 35, and 36, Township 143 North, :  
 Range 86 West, Sections 1, 2, 11, :  
 12, 13 14, and 24, Township 142 :  
 North, Range 87 West, Sections 1, :  
 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, :  
 12, 13, 14, and 24, Township 142 :  
 North, Range 87 West, Sections 1, :  
 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, :  
 12, 13, 14, 15, 16, 17, 18, 19, :  
 20, 21, 22, 23, 25, 26, 26, 27, :  
 28, 29, 30, 32, 33, 34, and 35, :  
 Township 142 North, Range 86 West, :  
 and Sections 6, 7, 17, 18, 19, :  
 and 20, Township 142 North, Range :  
 85 West, Oliver County, ND. :

In re application of Summit :  
 Carbon Storage #3, LLC to consider :  
 the amalgamation of the storage :  
 reservoir space, in which the :

Commission may require that the :  
 pore space owned by nonconsenting :  
 owners be included in the geologic :  
 storage, as required to operate :  
 the Summit Carbon Storage #3, LLC :  
 storage facility located in :  
 Section 36, Township 143 North, :  
 Range 87 West, Sections 19, 20, :  
 21, 28, 29, 30, 31, 32, 33, 34, :  
 35, and 36, Township 143 North, :  
 Range 86 West, Sections 1, 2, 11, :  
 12, 13, 14, and 24, Township 142 :  
 North, Range 87 West, Sections 1, :  
 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, :  
 12, 13, 14, 15, 16, 17, 18, 19, :  
 20, 21, 22, 23, 24, 25, 26, 27, :  
 28, 29, 30, 32, 33, 34, and 35, :  
 Township 142 North, Range 86 West, :  
 and Sections 6, 7, 17, 18, 19, and :  
 20, Township 142 North, Range 85 :  
 West, Oliver County, ND, in the :  
 Broom Creek Formation. :

In re application of Summit :  
 Carbon Storage #3, LLC for an :  
 order of the Commission :  
 determining the amount of :  
 financial responsibility for the :  
 geologic storage of carbon dioxide :  
 from the Midwest Carbon Express :  
 Pipeline in the storage facility :  
 located in Section 36, Township :  
 143 North, Range 87 West, Sections :  
 19, 20, 21, 28, 29, 30, 31, 32, :  
 33, 34, 35, and 36, Township 143 :  
 North, Range 86 West, Sections 1, :  
 2, 11, 12, 13, 14, and 24, :  
 Township 142 North, Range 87 West, :  
 Sections 1, 2, 3, 4, 5, 6, 7, 8, :  
 9, 10, 11, 12, 13, 14, 15, 16, 17, :  
 18, 19, 20, 21, 22, 23, 24, 25, :  
 26, 27, 28, 29, 30, 32, 33, 34, :  
 and 35, Township 142 North, Range :  
 86 West, and Sections 6, 7, 17, :  
 18, 19, and 20, Township 142 :  
 North, Range 85 West, Oliver :  
 County, ND, in the Broom Creek :  
 Formation. :

In re motion of the Commission to :  
 consider establishing the field :  
 and pool limits for lands located :  
 in Section 36, Township 143 North, :  
 Range 87 West, Sections 19, 20, :  
 21, 28, 29, 30, 31, 32, 33, 34, :  
 35, and 36, Township 143 North, :  
 Range 86 West, Sections 1, 2, 11, :  
 12, 13, 14, and 24, Township 142 :  
 North, Range 87 West, Sections 1, :  
 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, :  
 12, 13, 14, 15, 16, 17, 18, 19, :  
 20, 21, 22, 23, 24, 25, 26, 27, :  
 28, 29, 30, 32, 33, 34, and 35, :  
 Township 142 North, Range 86 West, :  
 and Sections 6, 7, 17, 18, 19, and :  
 20, Township 142 North, Range 85 :  
 West, Oliver county, ND, subject :  
 to the application of Summit :  
 Carbon Storage #3, LLC for the :  
 geologic storage of carbon dioxide :  
 in the Broom Creek Formation, and :  
 enact such special field rules as :  
 may be necessary. :

1 (Pursuant to Notice to Take 30(b)(6))

2 Deposition of **SUMMIT CARBON STORAGE #1, LLC, SUMMIT**

3 **CARBON STORAGE #2, LLC, and SUMMIT CARBON STORAGE**

4 **#3, LLC**, in the above-entitled cause, the following

5 proceeding came on for taking before Stephanie A.

6 Smith, a Registered Professional Reporter and a

7 Notary Public in and for the State of North Dakota,

8 at the Braaten Law Firm, 109 North Fourth Street,

9 Suite 100, in the City of Bismarck, County of

10 Burleigh, State of North Dakota, on the 6th day of

11 June, 2024, commencing at 9:02 a.m., counsel

12 appearing on behalf of the respective parties as

13 hereinbefore indicated:)

14 -----

15 (The following proceedings were had and

16 made of record:)

17 THE VIDEOGRAPHER: This is the audiovisual

18 30(b)(6) deposition of Summit Carbon Storage #1,

19 LLC, Summit Carbon Storage #2, LLC, and Summit

20 Carbon Storage #3, LLC, being taken on behalf of

21 intervenor landowners in the matter of the

22 applications of Summit Carbon Storage #1, LLC,

23 Summit Carbon Storage #2, LLC, and Summit Carbon

24 Storage #3, LLC, Case Numbers 30869, 30870, 30871,

25 30872, 30873, 30874, 30875, 30876, 30877, 30878,

11

1 30879 and 30880 before the Oil and Gas Division of

2 the North Dakota Industrial Commission.

3 This is being taken on behalf of the

4 intervenor landowners represented by Braaten Law

5 Firm. This deposition is being held on June 6,

6 2024, at the offices of Braaten Law Firm in

7 Bismarck, North Dakota, commencing at 9:02 a.m.

8 My name is Desirae Zaste of Braaten Law

9 Firm, and I am recording the deposition

10 supplementally. The officer, court reporter and

11 notary public is Stephanie Smith of Emineth &

12 Associates.

13 Will counsel please state their

14 appearances.

15 MR. BRAATEN: Derrick Braaten with Braaten

16 Law Firm on behalf of the intervenors, including

17 the Swenson Living Trust and other intervenors

18 granted intervenor status in the proceeding by the

19 Industrial Commission.

20 I am going to put a few documents down on

21 record to document the fact that the deponent is

22 not going to appear for the deposition today.

23 Okay. We have marked as Deposition

24 Exhibit No. 1 Landowners Notice of 30(b)(6)

25 Deposition. This is the original deposition notice

12

1 with topics dated May 9, 2024, and was served on

2 Lawrence Bender of Fredrikson & Byron.

3 We have now marked Deposition Exhibit 2

4 electronically for the record. Deposition

5 Exhibit 2 is Intervenor Landowners' Amended Notice

6 of 30(b)(6) Deposition, which was dated May 31,

7 2024, and served once intervention was granted to

8 Intervenor Swenson Living Trust, Bauman, Gerving,

9 Haupt, Jochim, Kraft, Liebelt, Maize, Metz, Rust

10 and Smith, given an objection from Summit's counsel

11 that intervenors could not serve a deposition

12 notice until officially granted party status.

13 Therefore, immediately upon being granted party

14 status, the notice was re-served with the topics

15 not changing at all.

16 We have now electronically marked Exhibit

17 No. 3 to the deposition, which is a letter dated

18 June 4, 2024, from Lawrence Bender to Derrick

19 Braaten. In that letter Mr. Bender indicates that

20 the notice was served upon Summit Carbon Solutions,

21 LLC, and he indicates that that entity is not a

22 party to the proceeding and the three subsidiary

23 entities, Summit Carbon Storage #1, #2 and #3, LLC,

24 are the actual parties and, therefore, Summit

25 Carbon Solutions, LLC, would require a subpoena.

13

1 We -- the intervenors disagree given that the

2 application was submitted for those three

3 subsidiary entities by Summit Carbon Solutions,

4 LLC, in care of Summit Carbon Solutions, LLC.

5 We will now mark three exhibits, Exhibit

6 Nos. 4, 5 and 6. Beginning with 4, these are three

7 amended notices of deposition, one each directed at

8 Summit Carbon Storage #1, LLC; an amended notice

9 directed at Summit -- Summit Carbon Storage #2,

10 LLC, which is now marked as Exhibit 5 to the

11 deposition; and an amended notice directed to

12 Summit Carbon Storage #3, LLC, which is now

13 electronically marked as Exhibit No. 6 to the

14 deposition.

15 These three notices were served within a

16 couple hours of receiving Mr. Bender's letter

17 indicating that he believed the Summit Carbon

18 Solutions entity would require a subpoena. We

19 believe that it is clear to who these notices were

20 directed.

21 Throughout all of these amended deposition

22 notices there was not a single change to any of the

23 topics that had been listed for this 30(b)(6)

24 deposition.

25 Following service of the amended

14

1 deposition notices to Summit Carbon Storage #1, #2  
2 and #3, we received a letter that has now been  
3 marked electronically as Exhibit No. 7. That  
4 letter is dated June 5 from Lawrence Bender to  
5 Derrick Braaten. That letter then sets out a  
6 number of additional objections that Mr. Bender and  
7 his client raised to the deposition notice. This  
8 letter was sent yesterday after close of business,  
9 and also advised -- in the last paragraph  
10 Mr. Bender states, "Ultimately, this letter is  
11 intended to inform you that because of the  
12 Intervenor Landowners' failure to comply with  
13 Rule 30, my clients do not intend to appear for the  
14 depositions tomorrow, June 6, 2024, as set forth in  
15 the Deposition Notices."

16 In response to that letter from  
17 Mr. Bender, I sent an email back to Mr. Bender that  
18 has now been electronically marked as Exhibit  
19 No. 8. That email responded to Mr. Bender's  
20 objections and let him know that I disagreed with  
21 all of those objections and particularly with the  
22 use of such objections to avoid a deposition.  
23 Given that Mr. Bender and his clients have  
24 not filed any motions for protective order or  
25 otherwise taken any other actions to comply with

15

1 the notice in the Rules of Civil Procedure, we  
2 intend to seek to compel the deposition and to seek  
3 sanctions for the failure to appear.

4 In my email marked as Exhibit 8, I let  
5 Mr. Bender know that we intended to move forward  
6 with the deposition this morning, which is what we  
7 are doing right now, and I let him know that if  
8 there is no witness, I will put that on record and  
9 continue the deposition, which is what we intend to  
10 do.

11 To that email, I also attached two  
12 different attachments, one being a prior email as  
13 well as a prior letter that I sent to Mr. Bender  
14 offering to confer on these depositions in order to  
15 address any concerns he might have. We have  
16 electronically marked as Exhibit 9 one of those  
17 attachments, which is a letter dated May 2, 2024,  
18 from Derrick Braaten to Lawrence Bender, telling  
19 him that I would like to conduct a 30(b)(6)  
20 deposition of his client and that I am currently  
21 working on a topic list. I indicate that I intend  
22 to serve a couple rounds of written discovery and  
23 would like to take a 30(b)(6) deposition and asked  
24 Mr. Bender to sit down and confer and discuss  
25 coordination.

16

1 We also electronically marked as Exhibit  
2 No. 10 an email from Derrick Braaten to Lawrence  
3 Bender dated May 9, which was responding to the  
4 service of the 30(b)(6) deposition notice upon  
5 Mr. Bender. I indicated to Mr. Bender in that  
6 email that I scheduled the deposition to get a date  
7 down, and that I did try to look at Mr. Bender's  
8 schedule and his PSC hearings and other matters to  
9 find a date that I did not think he would have a  
10 conflict. I told him I am nonetheless open to  
11 rescheduling the deposition if there is another  
12 mutually agreeable date.

13 Other than the communications I've put on  
14 record in these exhibits from Mr. Bender, I have  
15 not received other communications from him in  
16 response to my numerous attempts over the course of  
17 the last month to provide notice, meet with and  
18 confer with Mr. Bender to conduct this deposition.

19 We will leave the record open for this  
20 deposition and continue the deposition while we  
21 file a motion to compel and seek sanctions for the  
22 failure to appear.

23 And with that we can go off the record.

24 THE VIDEOGRAPHER: This is the end of the  
25 audiovisual 30(b)(6) deposition of Summit Carbon

17

1 Storage #1, LLC, Summit Carbon Storage #2, LLC, and  
2 Summit Carbon Storage #3, LLC, taken at the offices  
3 of Braaten Law Firm in Bismarck, North Dakota, on  
4 June 6, 2024.

5 We are off the video and off the record at  
6 9:16 p.m. [sic], Central time.

7 MR. BRAATEN: And just to remain on record  
8 for one moment, I should have noted this, but we  
9 are going to leave the record open for the  
10 continuance of the deposition.

11 (Recessed at 9:17 a.m., Thursday, the 6th  
12 day of June, 2024.)

1 CERTIFICATE OF COURT REPORTER

2

3 I, Stephanie A. Smith, a Registered  
4 Professional Reporter,

5 DO HEREBY CERTIFY that I recorded in  
6 shorthand the foregoing proceedings had and made of  
7 record at the time and place hereinbefore  
8 indicated.

9 I DO HEREBY FURTHER CERTIFY that the  
10 foregoing typewritten pages contain an accurate  
11 transcript of my shorthand notes then and there  
12 taken.

13 Dated at Bismarck, North Dakota, this 6th  
14 day of June, 2024.

Dear Ms. Forsberg,

I am writing to voice my objection to the issuance of carbon dioxide storage facility permits for Summit Carbon Storage in Cases 30869, 30873, and 30877.

### Alignment with Federal Policy

In 2022, the EPA presented a report highlighting significant improvements needed in the Class VI well permitting process. Despite North Dakota's authority over these wells, it is crucial that we take federal guidelines into account to maintain a transparent and equitable permitting system. A notable gap exists in addressing environmental justice (EJ) concerns, which the EPA further emphasized in their 2023 guidance. The EPA's recommendations for integrating EJ principles outline five critical areas: identifying communities that may be disproportionately affected, ensuring early and inclusive public engagement throughout the permitting process, conducting thorough EJ assessments, maintaining transparency in decision-making, and implementing mitigation measures to protect underground sources of drinking water (USDWs). Given the significance of these recommendations, the Commission should uphold these values to create a just and thorough permitting process for the benefit of North Dakotans.

### Constitutionality

With ongoing legal challenges to North Dakota's amalgamation laws, it would be both prudent and necessary to suspend further actions until the Court reaches a definitive resolution. Advancing permit requests amidst such legal ambiguity not only risks undermining the rule of law but could also cause undue hardship for stakeholders. By waiting for a clear legal direction, the Commission can ensure all actions respect constitutional standards, protecting the interests and rights of all involved parties.

### Economic Fallout

Granting Summit the ability to annually store up to 18 million metric tons of CO<sub>2</sub> could severely disrupt industries dependent on carbon dioxide, such as fruit and vegetable preservation, beverage production, and pharmaceutical manufacturing. Ethanol plants supply a significant portion of domestic CO<sub>2</sub> needed for industrial use; diverting this to underground storage will exacerbate the current CO<sub>2</sub> shortage, adversely affecting several sectors crucial to North Dakota's economy. This potential economic damage, affecting jobs and consumers, must be seriously weighed against the claimed benefits of Summit's project.

### Information within the Application/Fact Sheet

Summit's applications, submitted on February 6, 2024, fail to acknowledge their expansion with additional ethanol plants in January and March. This oversight, along with discrepancies in their stated CO2 sources (anthropogenic vs. biogenic), necessitates a more detailed review to ensure accurate and transparent information before any decisions are made.

#### Additional Concerns

I have several additional concerns. The risk of induced seismic activity from CO2 injection has been documented and poses a potentially significant threat. CO2 leakage into water sources could acidify groundwater, leading to heavy metal contamination. The long-term stability of CO2 storage is not guaranteed, risking re-release into the atmosphere and health impacts. Additionally, with CCS technology still evolving and unproven on the proposed scale, North Dakotans should not bear the risk of this experimental approach.

In conclusion, granting permits to Summit Carbon Storage at this juncture seems premature given the numerous unresolved issues. A cautious, thorough review that considers policy, legal, economic, and environmental impacts is essential for protecting North Dakota's communities.

Thank you for considering my comments.

Sincerely,

Janet Miller

Dear Ms. Forsberg,

Included below are my comments objecting to the issuance of carbon dioxide storage facility permits for Summit Carbon Storage in Cases [30869](#), 30873, and 30877.

### **Alignment with Federal Policy**

As you may be aware, in 2022 the Environmental Protection Agency (EPA) submitted a report to Congress outlining improvements that should be made to the Class VI well permitting process. Many of these recommendations have not been implemented in North Dakota. While acknowledging North Dakota's primacy over underground injection wells, it is still advisable for the Commission to consider federal policy suggestions to ensure a fair, transparent, and thorough permitting process. Of particular concern is the lack of environmental justice (EJ) considerations. In 2023, EPA issued guidance for integrating environmental justice principles into Class VI well permitting procedures. Within the guidance, EPA strongly encouraged states to incorporate five aspects of environmental justice into their primacy programs. These five themes are included below.

1. Identify communities with potential EJ concerns: : UIC well owners/operators, permit applicants, and EPA Regions should [...] identify communities potentially adversely and disproportionately affected by human health, environmental, climate-related, and/or other cumulative harms or risks – that is, affected communities with potential EJ concerns – to help ensure proactive community engagement and promote the just treatment and meaningful involvement of the affected community in UIC permitting actions.
2. Enhance public involvement: Permit applicants and regulators should enhance community engagement and implement an inclusive public participation process. Community outreach should be conducted early in the permit application process for all Class VI projects, and,

especially for those permits that may have EJ concerns, before the permit application is submitted. This practice creates the opportunity to identify resources or any additional information that would facilitate understanding the potential effects of a permitting action on the community and promote just treatment and meaningful participation throughout the permitting process. Early engagement may also facilitate the early identification of mitigation measures that the applicant can take to address potential adverse and disproportionate effects of the permitting action. It is important for EPA and primacy agencies to communicate throughout the permitting process and to address concerns affecting the community.

3. Conduct appropriately scoped EJ assessments: Evaluate whether the siting of a Class VI project at the proposed location will create any new risks or exacerbate any existing impacts on affected communities, including on affected lower-income communities and communities of color. Such evaluations might consider the demographic composition of surrounding communities, the presence of existing environmental hazards, potential exposure pathways, and susceptible sub-populations, as well as the likely distribution of any environmental and public health impacts from the proposed Class VI project in affected communities. These assessments will provide valuable information for facilitating meaningful public engagement, as well as identify concerns (i.e., risks to USDWs) that may need to be addressed in the permitting decision.

4. Enhance transparency throughout the permitting process: It is important that there is transparency in decision making throughout the UIC Class VI permitting process. For example, the administrative record for the permit should be readily available in a format and location that is easily accessible to the affected community. Authoritative agencies should clearly document the affected community's concerns and address those concerns to the greatest extent practicable and permitted by law.

5. Minimize adverse effects to USDWs and the communities they may serve: Proactively work to prevent any adverse impacts to USDWs from all activities throughout the lifetime of the project. Owner/operators should employ a range of project specific mitigation measures to ensure Class VI projects do not increase environmental impacts, resource issues, and public health risks in already overburdened communities.

The issuance of permits for Summit should be approached with caution, particularly in light of

the EPA's recent guidelines and the broader concerns regarding environmental justice. The recommendations from the 2022 EPA report to Congress and the 2023 EJ guidance highlight critical areas for improvement in the permitting process. It is imperative that these considerations are fully addressed to promote a just and balanced permitting process that prioritizes the well-being of North Dakotan communities.

### **Constitutionality**

Given the ongoing court proceedings challenging the legality of North Dakota's amalgamation laws, it is both prudent and necessary to delay any further actions on ventures related to these laws until the constitutionality has been definitively resolved by the Court. Proceeding with the permitting requests in the midst of legal uncertainty could not only undermine the rule of law but also expose stakeholders to significant and unnecessary hardship. Furthermore, it is essential to ensure that any actions taken are in full compliance with constitutional principles, safeguarding the rights and interests of all parties involved. By postponing further action until the Court has rendered a clear decision, the Commission can uphold the integrity of the legal process and avoid the complications that may arise from premature enforcement of constitutionally challenged laws. This cautious approach will provide a stable and lawful foundation, ensuring that the Commission's decisions are undertaken with due respect for legal and constitutional standards.

### **Economic Fallout**

Allowing Summit to store up to 18 mmt of carbon annually would negatively impact various industries that rely on CO<sub>2</sub>. Since 2020, there has been a shortage of carbon dioxide for industrial use and it's a trend anticipated to continue. Ethanol provides 43% of domestic CO<sub>2</sub> byproduct for industrial use. Diverting the ethanol industry's CO<sub>2</sub> to underground storage would further such shortages. Concern surrounding this issue has led to the formation of a national coalition made up of both CO<sub>2</sub> suppliers and end-users in opposition to sequestration to prevent the undersupply of CO<sub>2</sub> byproduct for industrial use.

Many industries, including fruit and vegetable preservation, beverage production, and pharmaceutical manufacturing rely on carbon dioxide. Those same industries are also top areas of production job growth in North Dakota's manufacturing sphere. The damage Summit's project would have on existing industries, and in turn, the consumers, employees, and communities who rely upon them should be weighed against the 150 direct and indirect

jobs Summit purports will be brought to North Dakota should their project be approved.

### **Information within the Application/Fact Sheet**

Summit submitted the applications on February 6, 2024. On January 24, 2024 Summit partnered with POET to add an additional 17 ethanol plants, none of which are included in the Project Summary. In March, an additional 8 Valero ethanol facilities were incorporated into the proposed project – again, none of which are included in the Project Summary.

Additionally, both the Application and the Fact Sheet attached to the Draft Storage Facility Permit claim Summit would sequester anthropogenic CO<sub>2</sub>. This is in direct contrast with statements made by Summit in the media, on their website, and in various state proceedings where they claim they will be capturing and storing biogenic CO<sub>2</sub>. These issues need to be addressed before a decision is finalized.

### **Additional Concerns**

A variety of areas for concern are condensed in this section under the assumption that many of these issues are likely to be addressed by others.

**Seismic Activity:** Injection of carbon dioxide into underground reservoirs could induce seismic activity.. This has been observed in other regions where similar practices are employed. We've also seen operators underreport seismic activity caused by the injection of CO<sub>2</sub> underground. Given the project provides limited, if any, benefits to the people of North Dakota, the possibility of any increase in seismic activity is an unnecessary risk.

**Water Contamination:** There is a non-zero chance of CO<sub>2</sub> leaking into underground water sources. Carbon can dissolve in water, resulting in the formation of carbonic acid . This weak acid can lead to the acidification of groundwater, making it unsuitable for consumption.

Acidified water can also cause leaching of toxic metals such as lead and arsenic from surrounding rocks, leading to further water contamination.

**Long-Term Storage Uncertainty:** The long-term stability and effectiveness of carbon storage are not fully understood. Over time, carbon can escape back into the atmosphere, undermining the purpose of sequestration and potentially risking the health of nearby residents.

**Technological Challenges:** Despite decades of investments and demo-projects, the technology for CCS is still developing. Given that CCS has never been practiced on the scale proposed by

Summit, there may be technical challenges that could compromise the effectiveness and safety of CO2 storage. There is no reason for North Dakotans to be the test subjects for a risky and proven-to-fail technology.

In light of the significant concerns outlined above, it is clear that the permit requests for Summit Carbon Storage in Cases 30869, 30873, and 30877 should be tabled or outright denied at this point in time. Until the many issues surrounding Summit's proposal have been adequately resolved, North Dakotans should not be subjected to the uncertainties and potential hazards of this project. A thorough and cautious approach to the permitting process for Summit Carbon Storage is imperative. The Commission should ensure that all policy recommendations, constitutional considerations, economic impacts, and potential environmental and public health risks are fully considered and addressed before making any decisions in order to promote a just, transparent, and balanced process that protects the interests and well-being of North Dakota's communities.

Thank you for your consideration,  
Emma Schmit

Dear Commission,

Please find attached a letter from Minnkota Power Cooperative, Inc., for Case Nos. 30869 – 30880, along with the Exhibit A referenced in the letter.

As stated in the letter, based on an agreement reached between Minnkota and Summit, Minnkota will not be offering testimony or appearing in the proceedings subject to Summit submitting an amendment to Section 3.12 of the Storage Agreement at the hearing for the KJ Hintz storage facility permit application, and that amended language agreed to (as stated in Exhibit A) being included in the storage agreement at Section 3.12.

If you have any questions, please let me know.

Thank you.

**Re:      Case Nos. 30869 – 30880**  
**Our File No.: 021130.24018**

Dear Industrial Commission:

On June 3, 2024, the Commission granted Minnkota Power Cooperative, Inc.’s (“Minnkota”), Motion to Intervene in these proceedings, at Case Nos. 30869 - 30880. In its Order, the Commission stated that, “Minnkota must demonstrate the existence of the above-described correlative rights.” See Order at ¶ 4.

Earlier today, June 10, 2024, Minnkota and Summit reached an agreement with respect to Minnkota’s concerns as evidenced by the e-mail attached hereto and marked Exhibit A. In relevant part, as stated by Summit in Exhibit A, Summit and Minnkota agreed as follows: “Summit will submit an amendment to section 3.12 of the storage agreement in the KJ Hintz storage facility permit at the hearing for the KJ Hintz storage facility permit application inserting the language below.”

The terms that Summit and Minnkota agreed to, which are provided at Exhibit A, provide for Summit agreeing to submit to the Commission an amendment to Section 3.12 of the storage agreement in the KJ Hintz storage facility permit, as follows:

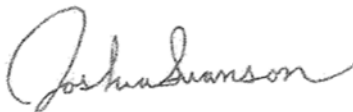

3.12      Border Agreement(s) with Minnkota Power Cooperative, Inc. Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, “Summit Carbon Storage”) agrees to enter into a certain border agreement (“Border Agreement”) with Minnkota Power Cooperative, Inc., its affiliates or successors in interest to the DCC Permits (as defined herein) (“Minnkota”) which terms and conditions if more stringent than those contained herein shall supplement conditions contained in orders issued or arising from Summit Carbon Storage’s applications to the Commission in Case Nos. Case Nos. 30869 – 30880 including any revisions thereto (the “Summit Carbon Storage Applications”), and Minnkota’s prior vested approved permits from the Commission, including but not limited to those issued in Case Nos. 29029 – 29034, and 30122 – 30125,

218 NP Avenue | Fargo, ND 58102  
PO Box 1389 | Fargo, ND 58107-1389 | Fargo, ND 58107-1389  
Phone: 701.237.6983 | Fax: 701.237.0847 | Toll Free: 800.677.5024

including all related Orders issued to Minnkota's (collectively referred to as "DCC Permits"). Summit Carbon Storage agrees that prior to the Commission's authorization to inject under NDAC 43-05-01-09(3) on any injection facility and/or facilities, identified, arising from, or developed as a result of Summit Carbon Storage Applications and/or prior to any future Summit Carbon Storage applications under the authority of the Commission, which seek to establish operating rights, or to locate or site facilities within an Area of Review containing Minnkota's facilities as described in or interests vested by the DCC Permits Summit must get the written consent and authorization of Minnkota. These conditions are necessary to protect Minnkota's rights and interests vested under the DCC Permits, from any damage and/or adverse impacts caused by Summit Carbon Storage's operations, including but not limited to, location of injection or extraction facilities, rates of injection. Any violation of the terms of the Border Agreement, or the terms contained in this Article 3.12, will result in irreparable harm to Minnkota, and that as a result, Minnkota is entitled to immediate relief from the Commission to enforce the terms of thereof, and that the terms of the Border Agreement are a condition of the issuance of any permits to Summit Carbon Storage by the Commission. To the extent anything in the Border Agreement is inconsistent with, or otherwise conflicts with, the terms in this Article 3.12, the terms in Article 3.12 control and will be enforced. If Minnkota unreasonably withholds consent and authorization, Summit Carbon Storage may apply to the Commission for waiver of the requirements of this Article 3.12 prior to first injection, in accordance with NDAC 43-05-01-09(3), or at any point during operation, in accordance NDAC 43-05-01-12(1)(n), which application shall include supporting data and information, that establishes that Summit Carbon Storage's operations as described in the Summit Carbon Storage Application do not damage or adversely impact Minnkota's rights under the DCC Permits. Upon at least a thirty-day notice to Minnkota and after an evidentiary hearing, the Commission will determine and set appropriate operating standards consistent with correlative rights and the efficient development of resources.

Based on Summit agreeing to this, and such language being included in the storage agreement at section 3.12, Minnkota does not anticipate offering testimony in Case Nos. 30869 – 30880 or appearing in these proceedings. If you have any questions, please let me know.

Respectfully,

Mac,

Pursuant to our discussion. Summit and Minnkota agree as follows:

1. Summit will submit an amendment to section 3.12 of the storage agreement in the KJ Hintz storage facility permit at the hearing for the KJ Hintz storage facility permit application inserting the language below.

*3.12 Border Agreement(s) with Minnkota Power Cooperative, Inc. Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, "Summit Carbon Storage") agrees to enter into a certain border agreement ("Border Agreement") with Minnkota Power Cooperative, Inc., its affiliates or successors in*

*interest to the DCC Permits (as defined herein) (“Minnkota”) which terms and conditions if more stringent than those contained herein shall supplement conditions contained in orders issued or arising from Summit Carbon Storage’s applications to the Commission in Case Nos. Case Nos. 30869 – 30880 including any revisions thereto (the “Summit Carbon Storage Applications”), and Minnkota’s prior vested approved permits from the Commission, including but not limited to those issued in Case Nos. 29029 – 29034, and 30122 – 30125, including all related Orders issued to Minnkota’s (collectively referred to as “DCC Permits”). Summit Carbon Storage agrees that prior to the Commission’s authorization to inject under NDAC 43-05-01-09(3) on any injection facility and/or facilities, identified, arising from, or developed as a result of Summit Carbon Storage Applications and/or prior to any future Summit Carbon Storage applications under the authority of the Commission, which seek to establish operating rights, or to locate or site facilities within an Area of Review containing Minnkota’s facilities as described in or interests vested by the DCC Permits Summit must get the written consent and authorization of Minnkota. These conditions are necessary to protect Minnkota’s rights and interests vested under the DCC Permits, from any damage and/or adverse impacts caused by Summit Carbon Storage’s operations, including but not limited to, location of injection or extraction facilities, rates of injection. Any violation of the terms of the Border Agreement, or the terms contained in this Article 3.12, will result in irreparable harm to Minnkota, and that as a result, Minnkota is entitled to immediate relief from the Commission to enforce the terms of thereof, and that the terms of the Border Agreement are a condition of the issuance of any permits to Summit Carbon Storage by the Commission. To the extent anything in the Border Agreement is inconsistent with, or otherwise conflicts with, the terms in this Article 3.12, the terms in Article 3.12 control and will be enforced. If Minnkota unreasonably withholds consent and authorization, Summit Carbon Storage may apply to the Commission for waiver of the requirements of this Article 3.12 prior to first injection, in accordance with NDAC 43-05-01-09(3), or at any point during operation, in accordance NDAC 43-05-01-12(1)(n), which application shall include supporting data and information, that establishes that Summit Carbon Storage’s operations as described in the Summit Carbon Storage Application do not damage or adversely impact Minnkota’s rights under the DCC Permits. Upon at least a thirty-day notice to Minnkota and after an evidentiary hearing, the Commission will determine and set appropriate operating standards consistent with correlative rights and the efficient development of resources.*

Please review and respond with your concurrence.

Wade

Lake View Services, LLC is a local crane & trucking company located in Beulah and Trenton, ND. We have been serving western ND for 13 years. The last two years we have had the privilege of working with Summit to maintain their current well sites. Our working relationship with them is one we definitely enjoy! They are very easy to communicate with, they pay their bills promptly and are always willing to assist us in helping to assist them. We support this project and are proud of Summit for utilizing local ND contractors and look forward to continuing our working relationship with them.

Good afternoon.

Please accept this letter in support of the Summit project. Thank you.

Rep Anna Novak

To: NDIC

Re: Summit Carbon Storage Facility Permits

From: Anna Novak, State Representative District 33

Thank you for the opportunity to offer my support of Summit in their applications for the storage facility permits.

We have significant history of carbon management in North Dakota, dating back to the 1990's with the adoption of the legislative framework, and the construction and operation of the Dakota Gasification Company (DGC) pipeline. DGC has a 20+ year history of safely transporting carbon dioxide through a 200-mile pipeline from Beulah to Weyburn Saskatchewan. In addition, DGC has recently begun carbon dioxide injection and sequestration locally. We have also seen the addition of storage facility permits for Red Trail Ethanol. With the steps taken by Summit to ensure safety and compliance with the laws of North Dakota, I have no doubt that this can be done both safely and properly.

Also, the monetization of our landowners' pore space is an important consideration that will lead to improved economics for many in our area, as well as the economic development for our area businesses.

The level of voluntary landowner support in these storage areas has been extremely high, which is an important benchmark for this project. I was told that voluntary landowner easements for storage are at 93%. While 100% voluntary easements are the goal, it is important to understand that both the 93% and the 7% of landowners have rights. Currently, it is highly unlikely that 100% landowner support on any project can be attained. If we would reject projects because of this, we would not have oil pipelines, electrical transmission lines or water projects that provide clean water to all parts of the state or prevent flooding.

I am aware of the ongoing search for technology to enhance the oil recovery in the maturing oil fields of North Dakota. Lynn Helms has testified that significant amounts of carbon dioxide could be necessary to attain the goal of additional reserves that are not available based on our current technologies but could be soon. I am hopeful that the carbon dioxide from this project in addition to the carbon dioxide from our coal-fired power plants will be used for enhanced oil recovery in the not-so-distant future. It is important that we continue working towards that goal and this project gets us closer to enhanced oil recovery in the Bakken.

For these reasons, I support the approval of these storage facility permits.

## **No to Summit Carbon Solutions**

*Addressed to: North Dakota Industrial Commission | slforsberg@nd.gov*

Regarding Summit Carbon Solutions Storage #1, LLC; Summit Carbon Solutions Storage #2, LLC; and Summit Carbon Solutions Storage #3, LLC.

Summit's proposal serves an old, dying, and harmful industry: the Oil, Gas, and Chemical Industry

Agreement to Summit's proposal:

- Continues the ongoing reliance on OGC, including that of its key components—ethanol in this case. This is counter to modern climate science, which calls for the reduction and eventual elimination of OGC reliance, not continued investment in this industry and its ongoing viability.
- Puts ND's safety at potential risk—new carbon dioxide capture, transport, and storage has a short history and little record of the best, most reliable means and methods to capture and store carbon dioxide in a continuously safe manner. Recent release across the nation demonstrates the unreliability of technology planned to be employed.
- Allocates ND resources to other jurisdictions and owners. Only one ethanol plant is a planned contributor to the proposed CO2 pipeline and storage facilities. Majority contributors come from out of state, causing ND's resources (pore space, etc) to be consumed for the benefit of those out-of state others, Summit, and its investors. In fact, Summit is expected to experience an \$85/metric tonne tax credit on its planned storage of 352 metric tonnes over 20 years equal to nearly a \$30 billion dollar windfall, and with a plan to only return \$0.50/metric tonne or \$176 million to the property owner affected returning only six-tenths of a percent of Summit's tax savings to those that give the most for Summit's project. This inequity is further compounded by the property owners' inability to measure the actual tonnage stored on their property, making it impossible to calculate an equitable compensation value.
- Allows Summit to take what is not theirs to take: approval of this project would unjustly harm the surface and mineral property owners of ND and, in so doing, would reward Summit and its investors without demonstrating an equivalent or greater value to the public—the citizens of ND.
  - What is the cost of the impacts to the land and air and wildlife during construction?
  - What energy will be used to construct, operate, and maintain the system? And, shouldn't that energy be conserved in keeping with the latest climate science, which calls for the dismantling of coal-fired power plants, petroleum extraction and refining, and supporting ethanol production, not the continued use of same?
  - Summit plans to consume pore space that may be void, or may contain other gases that hold value, which should be retained by the existing surface- or mineral-owners; these other gases should not be given freely to Summit as they have indicated would be their plan. Understand, the typical ND property owner does not have the means or methods to determine the contents of the void space or how to measure it, making it difficult or impossible to challenge or refute any claim made by Summit.
  - Summit highly encumbers or completely severs any minerals that exist below any storage space by limiting access only via horizontal drilling that may be infeasible due to length of required drilling or access points to initiate and conduct the drilling—access points which may be located on another's property. What is the value of the lost minerals? What is the

cost to access minerals to maintain value and who ensures it remains viable and puts in effort to ensure it occurs at a price equal to or less that paid by Summit as part of the pore space deal that is being considered now?

- What will be the cost of any unplanned, consequential damages to ND and its citizens resulting from the proposed project? Who inherits that risk and cost into the future after Summit is no longer an storage facility owner as allowed by ND law after a 10-year period?

Who are these people—Executive Vice President Wade Boeshans, Chief Operating Officer Jimmy Powell, and Land Appraiser Jeff Olson who come to sell North Dakotans a bill of goods that benefit Summit, its investors, and relieve other out-of-state ethanol plants and the OGC industry (Harold Hamm) generally? Are they North Dakotans? Are their roots here? Do they understand and appreciate the prairie, the waving fields of grain, the sunflowers tracking the sun across the expansive blue sky that stretches across the horizon and frees the eye to see forever? Do they fish in ND's clean waters enjoying walleye caught that day with their families or the reward of a day of walking the fields in search of pheasant, turkey, or a buck? Are they proposing this project because it protects that which is most precious to North Dakotans and their children for today and tomorrow? These men have served the OGC and coal industries their entire careers. All have spent their careers ensuring the ongoing reliance on the old technology. Are these the people that we want to entrust North Dakota's future to?

As North Dakotans, we must say:

- NO to Summit's plan to transport and store carbon dioxide
- NO to Summit's plan to take our pore space without just compensation and means to verifiably measure used pore space for each and every owner affected
- NO to Summit's plan to take any displaced gases without just compensation and a means to verifiably identify and measure that which is displaced
- NO to burdening property owners with an overly complicated, costly, and potentially impossible means of accessing minerals
- NO to increasing risks of consequential damages as a result of this project
- NO to giving up our resources for the benefit of Summit, its investors, and out-of-state producers. Each state and its ethanol plants should solve its own carbon dioxide-generation problems. ND is not a dumping ground.

It is time to look for new energy sources. Summit calls on ND to be "early adopters." Yes, ND should be leaders as they have always been. North Dakotans are innovative problem solvers who are tenacious in overcoming challenges like the pressing problem of climate change. North Dakotans should be early innovators and adaptors of new technology that frees us from the costs, burdens, negative affects of dependence upon fossil fuels and similar or constituent products.

Summit's project holds us back. It does not propel us forward. Will North Dakotans be trend setters or trend followers?

I call on ND Industrial Commission to heartily reject Summit's proposals.

Respectfully,

*ND Property Owner and Native, Meda J Schultz | medajo@comcast.net*

Re: Summit Carbon Solutions Storage #1, LLC (Case No.'s 30869, 30870, 30871, 30872)

Via Email: [ndicinfo@nd.gov](mailto:ndicinfo@nd.gov) (6/7/2024), [slforsberg@nd.gov](mailto:slforsberg@nd.gov) (6/10/2024)

Mr. Chairman and Members of the Industrial Commission:

I am communicating my support for the Summit Carbon Solutions Storage #1, LLC facility permit applications being Case No.'s 30869, 30870, 30871, and 30872. I am a property owner with land directly to the south in Township 141 North, Range 87 West, Section 18-S2 and to the east in Township 141 North, Range 87 West, Section 17-W2 of the proposed TB Leingang injection site. I support the proposed location of the TB Leingang injection site and carbon dioxide storage facility and encourage approval of the permit applications.

Respectfully,

Jason Pulver

To Whom this may concern:

My name is Paul Schock and I am a landowner in Mercer County. I own land in township 142N.R88W section 19/33. This email is being sent to show my support for Summit Carbon Solution's quest for a pipeline to bring CO2 into Mercer, Oliver and Morton counties. From the beginning of the project Summit Carbon has been very transparent, open and honest in their dealings with me. This project for me represents the future in sustaining and enhancing the agriculture corridor for years to come. It will provide jobs and it will bring in the tax revenue for the counties and state along with providing supplemental income to the farmers and ranchers.

In Mercer county the Dakota Gasification Company sends CO2 to Canada which has proven safe and reliable for years. With this being said, I would ask you to be open and positive to the completion of this project. Thank you.

Regards,  
Paul Schock

Hi,

Please see Dakota Resource Council's attached comments regarding cases: 30869-30880.

Best,

Scott Skokos

Honorable Members of the North Dakota Industrial Commission,

Enclosed Dakota Resource Council Comments re: Case nos. 30869-30880

About Dakota Resource Council:

Founded in 1978, Dakota Resource Council is a family farm and conservation organization that advocates for the sustainable use of North Dakota's natural resources and works to keep family farms in the hands of family farm operators. With over 700 members statewide DRC works with a wide range of people from geographies across North Dakota.

Introduction:

The case before the North Dakota Industrial Commission is complicated in our view due the ongoing litigation over the constitutionality of the amalgamation law in North Dakota. The purpose of our comments will be to first outline why the current laws allowing for amalgamation are unconstitutional, and second urge the North Dakota Industrial Commission to reject the permits in this case or take no action until the courts are able to rule on the constitutionality of North Dakota's amalgamation laws.

Constitutional Issues with North Dakota Amalgamation Law:

In our view North Dakota's amalgamation law is unconstitutional due to the way in which the property owner is compensated under the law. Under the current amalgamation law non-consenting pore space are to be 'equitably compensated' for their pore space, but 'equitable compensation' is not a substitute for the safeguards guaranteed by the Constitution of North Dakota and Chapter 32-15 of the Century Code, which require 'just compensation' to be paid for land or real property that is taken by eminent domain. 'Just compensation' unlike 'equitable compensation' requires a condemnation hearing with a jury that is tasked to decide how much the property owner is compensated for the taking.

The need to pay 'just compensation' for a taking not 'equitable compensation' was recently affirmed by the North Dakota Supreme Court in *Northwest Landowners Association vs State of North Dakota (2022)*. And the recent *Northwest Landowners Association vs State of North Dakota (2023)*, which is challenging the use of amalgamation specifically, is to our knowledge, progressing through the court system. With both the 2022 ruling that 'equitable compensation' was not constitutional and the 2023 case still in progress, it is our view that it would be prudent for this body to wait to rule on this case or any other case until the courts determine the constitutionality of North Dakota's amalgamation law.

Conclusion:

With the constitutionality surrounding amalgamation (the fundamental reason for the cases in front of the NDIC) under scrutiny, we believe that the NDIC should wait to rule on this case until

the courts settle the constitutionality issue. This is a very important case to get right due to the scale of development and the amount of property owners impacted. We think courts are a more fair venue than the North Dakota Industrial Commission, which has, despite its purported impartiality, ruled in favor of industry in nearly every case for the past decade. Thank you for the opportunity to comment on this matter.

**WRITTEN COMMENTS OF INTERVENORS THE SWENSON LIVING TRUST,  
MICHAEL BAUMAN, GLENN AND LISA GERVING, MICHAEL AND BONNIE  
HAUPT, JOHN M. JOCHIM, KEVIN AND KIMBERLY KRAFT, CHARMAYNE  
LIEBELT, KIRK AND LINDA MAIZE AND ALLEN MAIZE, PAUL AND CHRISTY  
METZ, JOLENE RUST, AND GARY AND CASSIE SMITH**

---

.  
[¶1] Intervenor Swenson Living Trust by and through its trustees, Bauman, Gerving, Haupt, Jochim, Kraft, Liebelt, Maize, Metz, Rust, and Smith submit the following as their written comments and objection to the issuance of any permits in the above-captioned proceedings. Attached hereto are declarations from the intervenors which set out their land ownership as it relates to the above-captioned proceedings, and identifies the encumbrances to that land. *See **Attachment A*** (combined declarations of Intervenor with Exhibits, also filed into the docket in the above-captioned proceedings).

[¶2] The North Dakota Industrial Commission (“NDIC”) has violated Intervenor’s due process rights by failing to provide procedural due process and substantive due process, and is without jurisdiction to issue the permits in this proceeding because the laws by which it is conducting these proceedings are unconstitutional. Because the laws and regulations for issuance of Class VI permits for North Dakota are inextricably intertwined with the unconstitutional provisions of the laws and regulations being challenged in other litigation, the NDIC should deny the applications and dismiss the proceeding.

[¶3] As was explained in the Intervenor’s prior briefing, the failure to provide the model parameters and electronic data used to run the computer models for these applications is fatal to the permit proceedings and the applications must be denied for failure to afford procedural and substantive due process.

[¶4] Hearing officers have broad discretion in scheduling, granting continuances, and controlling discovery in adjudicative proceedings. *Berger v. North Dakota Dept. Of Transp.*, 2011 ND 55, ¶ 7, 795 N.W.2d 707, ¶ 7 (rejecting plaintiff's claim that he was entitled to have his hearing held at its originally scheduled time). Section 28-32-33, N.D.C.C., provides that discovery may be obtained in an adjudicative proceeding in accordance with the North Dakota Rules of Civil Procedure. This section also grants authority to the hearing officer to issue discovery orders. Rule 34 of the North Dakota Rules of Civil Procedure governs how a party may request and obtain documents from another party. The default rule is that a party to whom a request for production is directed has 30 days in which to respond after being served. But as is relevant here, a shorter time may be ordered by the court (or here, the hearing examiner). Rule 34(b)(2)(A). In other words, under § 28-32-33, N.D.C.C., the hearing officer/examiner is authorized to expedite responses to discovery requests and control the proceeding in a manner that afford due process.

The Administrative Agencies Practice Act expressly directs that, in all adjudicative proceedings, "[t]he administrative agency shall designate the time and place for the hearing." N.D.C.C. § 28-32-21(1)(c). Furthermore, **the hearing officer has broad discretion to regulate the course of the administrative proceeding.** N.D.C.C. § 28-32-35; Medical Arts Clinic, P.C. v. Franciscan Initiatives, Inc., 531 N.W.2d 289, 300 (N.D. 1995); Knudson v. Director, North Dakota Dep't of Transp., 530 N.W.2d 313, 316 (N.D. 1995). A hearing officer in an adjudicative administrative proceeding functions in a quasi-judicial capacity, and shares the broad discretion accorded to judicial officers. See Medical Arts Clinic, at 297, 300; Loran v. Iszler, 373 N.W.2d 870, 876 (N.D. 1985). Thus, it has been recognized that hearing officers have discretion to control procedural matters such as discovery and admission of evidence. See, e.g., State ex rel. Workforce Safety & Ins. v. Altru Health Sys., 2007 ND 38, ¶ 11, 729 N.W.2d 113; May v. Sprynczynatyk, 2005 ND 76, ¶ 24, 695 N.W.2d 196. Trial courts have broad discretion over the progress and conduct of a trial or hearing, including scheduling and the determination whether to continue a trial or hearing. See Hartleib v. Simes, 2009 ND 205, ¶ 15, 776 N.W.2d 217; State v. Ripley, 2009 ND 105, ¶ 12, 766 N.W.2d 465; State v. Schmidkunz, 2006 ND 192, ¶ 22, 721 N.W.2d 387; Peterson v. Zerr, 443 N.W.2d 293, 297 n.3 (N.D. 1989). A hearing officer conducting an adjudicative administrative proceeding has the same scope of discretion in conducting the hearing, including scheduling and continuances. See Medical Arts Clinic, at 297, 300.

*Berger v. N.D. DOT*, 2011 ND 55, ¶ 7, 795 N.W.2d 707, 710 (emphasis added).

[¶5] Procedural fairness is required at an administrative hearing. *Schlittenhart v. North Dakota Dept. of Transp.*, 2015 ND 179, ¶ 27, 865 N.W.2d 825, ¶ 27 (noting that the Court reviews administrative proceedings to “ensure procedural fairness”). “Procedural due process requires fundamental fairness, which, at a minimum, necessitates notice and a meaningful opportunity for a hearing appropriate to the nature of the case.” *Id.* (quoting *In re G.R.H.*, 2006 ND 56, ¶ N.W.2d 587).

[¶6] An agency overseeing an adjudicative proceeding that involves an opportunity to comment and a hearing must present “the data underlying its proposed action *before* the close of the comment and hearing period.” *National Wildlife Federation v. Marsh*, 568 F.Supp. 985, 994 (D. D.C. 1983) (emphasis in original). This is because the right to comment or be heard cannot be meaningful “when one is not apprised of the issues and positions to which the argument is relevant.” *Id.* at 993 (quoting *U.S. Lines v. Federal Maritime Commission*, 584 F.2d 519, 540 (D.C.Cir. 1978)). In other words, an exchange of views and dialogue is only possible if the public is adequately informed, and “without such dialogue any notion of real public participation is necessarily an illusion.” *Id.*; see also *Chemical Mfrs. Ass’n v. U.S. E.P.A.*, 870 F.2d 177, 200 (“[F]airness requires that the agency afford interested parties an opportunity to challenge the underlying factual data relied on by the agency.”).

[¶7] Section 28-32-29, N.D.C.C. also authorizes an agency to conduct a prehearing conference. The only conditions for doing so are giving reasonable notice to all parties and interested persons and conducting the conference in a way that does not substantially prejudice or infringe on the rights of any party. § 28-32-29, N.D.C.C. The NDIC’s outright refusal to even attempt to conduct

a fair hearing in this matter is fatal to the permit applications and they should be denied accordingly.

[¶8] The amalgamation laws being administered by the NDIC as well as the laws related to all applications in the above-captioned proceeding, because they are inextricably intertwined, are all unconstitutional. They are the subject of a facial challenge in *Northwest Landowners Association, et al. v. State of North Dakota, et al.*, Case No. 05-2023-CV-00065. The briefing on these legal issues by NWLA is attached hereto as **Attachment B**.

[¶9] Further, the laws by which the NDIC proposes to “amalgamate” Intervenor’s property result in a *per se* taking of Intervenor’s property and property rights. “From farming to original homesteads, it is in the blood of North Dakota landowners to be protective of their real estate. From family ties to the need for farmers to grow crops, property ownership is near and dear to those who maintain it.” *WBI Energy Transmission, Inc. v. Easement & Right-Of-Way*, No. 1:18-cv-078, Doc. ID 131, at \*12 (D.N.D. Nov. 1, 2022). These words from the United States District Court for the District of North Dakota are equally applicable to this case. Our North Dakota Constitution begins with the declaration: “All individuals are by nature equally free and independent and have certain inalienable rights, among which are those of ... acquiring, possessing and protecting property.” N.D. Const. art. I, § 1. The United States Supreme Court agrees: “Property rights are necessary to preserve freedom, for property ownership empowers persons to shape and to plan their own destiny in a world where governments are always eager to do so for them.” *Murr v. Wisconsin*, 582 U.S. 383, 394, 137 S. Ct. 1933, 1943 (2017).

[¶10] The NDIC is currently conducting its Class VI program in a manner that flies in the face of the intent of the program’s drafters and puts the Class VI primacy of North Dakota in jeopardy.

This risk is being taken to avoid providing due process to North Dakota citizens. It is wrong, legally and morally.

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

## DECLARATION OF MICHAEL BAUMAN

---

[¶1] I, Michael Bauman, declare the following based on personal knowledge:

[¶2] I have ownership interest in the following property that lies within the boundaries of the BK Fischer Storage Facility.

- Township 142 North, Range 88 West  
Section 24: SW1/4, less a 20-acre parcel & ROW  
Mercer County, ND

[¶3] To the best of my knowledge, the property listed in ¶ 2 above is encumbered by the following easements:

- Oliver-Mercer Electric Cooperative, Inc. Right-of-Way Easement executed by John Jochim on June 25, 1980 (209443).
- West River Telephone Right-of-Way Easement executed by John B. Jochim on April 13, 1993 (153703).
- ND Water State Water Commission Pipeline Easement executed by Rick and Valerie Bauman on August 19, 2010 (195749).
- Southwest Water Authority Right-of-Way Easement executed by Michael Bauman on October 16, 2014 (206892).

[¶4] Attached is the deed which I believe indicates my ownership in the property listed above.

[¶5] Attached are the easements currently encumbering these properties based on the information I have.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 30 day of May, 2024 at Beulah, ND, United States.

  
Mike Bauman (May 30, 2024 14:29 EDT)

Michael Bauman

# WARRANTY DEED

This deed is made by **Rick Bauman and Valerie K. Bauman**, husband and wife, Grantors, to **Michael P. Bauman**, Grantee, whose post office address is 572 Oemler Loop, Savanna, GA 31410.

For valuable consideration, Grantors' grant and convey to Grantee the following real property (the premises) located in Mercer County, North Dakota:

Township 142 North, Range 88 West

Section 24: SW¼ less a 20 acre parcel described as follows:

Commencing at the NE corner of SW¼, thence West along the North boundary of the SW¼ a distance of 950 feet; thence South in a line parallel to the East boundary of the SW¼ a distance of 915 feet; thence East in a line parallel to the North boundary of the SW¼ a distance of 950 feet to the East boundary of the SW¼; thence North along the East boundary of the SW¼ to the point of beginning.

The legal description was obtained from ☒ a previously recorded instrument ☐ or prepared by Jeffrey T. Landon of Lange & Donovan, PLLP, PO Box 488, Hazen, ND 58545.

Grantor covenants that they are well seized in fee of the premises, which he has the right to sell and convey, and which are free from encumbrances except those of record. Further, they covenant that they will warrant and defend the premises in the quiet and peaceable possession of the Grantee.

Dated this 9<sup>th</sup> day of May, 2011.

GRANTOR:

Rick Bauman

Rick Bauman

Valerie K. Bauman

Valerie K. Bauman

State of North Dakota )  
 )ss.  
County of Mercer )

On this 9<sup>th</sup> day of May, 2011, before me, a notary public, personally appeared **Rick Bauman and Valerie Bauman**, husband and wife, who acknowledged to me their execution of the foregoing instrument.

RIGHT-OF-WAY EASEMENT

KNOW ALL MEN BY THESE PRESENTS, that we the undersigned, (whether one or more)

JOHN JOCHIM

(unmarried) (husband and wife) for a good and valuable consideration, the receipt whereof is hereby acknowledged, do hereby grant unto the Oliver-Mercer Electric Cooperative, Inc., a cooperative corporation (hereinafter called the "Cooperative") whose post office address is Hazen, North Dakota 58545, and to its successors or assigns, the right to enter upon the lands of the undersigned, situated in the County of Mercer, State of North Dakota, and more particularly described as follows:

Right-of-way \_\_\_\_\_ feet Township 142 Range 88 Section W 1/2 OF NW 1/4 OF 24  
 Right-of-way \_\_\_\_\_ feet Township \_\_\_\_\_ Range \_\_\_\_\_ Section W 1/2 OF SW 1/4 OF 13  
W 1/2 OF NW 1/4 OF 24

and to construct, operate, maintain and move or relocate on the above-described lands and/or in or upon all streets, roads or highways abutting said lands, an electric transmission line or system, and to cut and trim trees and shrubbery that may interfere with or threaten to endanger the operation and maintenance of said line or system. The easement shall include only that part of the above described land located within 15 feet on each side of the proposed line.

The undersigned agree that all poles, wires and other facilities, installed on the above described lands at the Cooperative's expense shall remain the property of the Cooperative, removable at the option of the Cooperative.

The Cooperative agrees to pay a reasonable sum for any damage caused to crops or fences by the construction, operation, maintenance, or repair of said line or system. The overall operating height of vehicles and equipment known to cultivate or traverse lands within the easement, is less than fourteen (14) feet, unless otherwise noted below.

IN WITNESS WHEREOF, the undersigned have set their hands and seals this 25 day of June, 1980.

Signed, sealed and delivered in the presence of:

John Jochim

# West River Telephone Right-of-Way Easement

KNOW ALL MEN BY THESE PRESENT, that we the undersigned, (whether one or more) John B Jochim, Grantor(s), do hereby grant and convey unto West River Telecommunications Cooperative, a cooperative corporation (hereafter called the "Cooperative"), grantee, whose address is P.O Box 467, Hazen, North Dakota, and its respective successors, assigns, lessees and agents, an easement to survey, construct, reconstruct, operate, upgrade, maintain, relocate, replace and remove such communication systems as the grantee may from time to time require, consisting of but not limited to cables, wires, poles, splicing boxes, surface testing terminals, repeaters, repeater housings and markers, and other appurtenances, upon and over the land which the undersigned owns or in which the undersigned has any interest in the County of Mercer, State of North Dakota, and more particularly described as follows:

W/2 24 142 88

also the right of ingress and egress over and across the lands of the undersigned for the purpose of exercising the rights herein granted; to place surface markers beyond said strip, to clear and keep clear all trees, roots brush and other obstructions from the surface and subsurface of said strip of land and within seven feet thereof. The boundary of said strip shall be a line parallel to and 25 feet either side of the first cable laid, which cable shall have its location indicated by surface markers set at intervals on the land of the undersigned or on adjacent lands. The undersigned for himself, his heirs, executors, administrators, successors, and assigns, hereby covenants that no structure shall be erected on said strip.

The undersigned agrees that all poles, wire and other facilities, including telephone equipment, installed on the above described premises at the Cooperative's expense, shall remain the property of the Cooperative, removable at the option of the Cooperative.

The undersigned covenant that they are the owners of the above described lands and that the said lands are free and clear of encumbrances and liens of whatsoever character except those held by the following persons:

The term of this easement shall be for as long as needed by the grantee, and until a release of this easement is recorded, but to not extend beyond the maximum term authorized by law.

Access is hereby granted for a state or federal historical survey of the cable route, should one be required, unless checked. Access denied ☐

IN WITNESS WHEREOF, this instrument has been executed by the undersigned this the 13 day of April, 1993.

## **PIPELINE EASEMENT**

North Dakota State Water Commission  
County of Mercer  
Parcel H-MER-131

### **ALL PERSONS TAKE NOTICE:**

That the undersigned, Rick Bauman and Valerie K. Bauman, whether one or more, called the Grantor, being the owner of, or having an interest in, land situated in the County of Mercer, State of North Dakota, more fully described below, in consideration of One and No/100 Dollars (\$1.00) and other valuable consideration, does hereby grant, convey, and warrant to the State of North Dakota, acting by and through the North Dakota State Water Commission, a state agency and public corporation, with its principal office at 900 East Boulevard Ave., Bismarck, North Dakota 58505, called the Grantee, and to its successors and assigns, the right, privilege, and easement to construct, maintain, operate, inspect, repair, alter, replace, change the size of or remove a pipeline, and appurtenances thereto, for the transportation of water under, across, and through:

#### **Parcel H-MER-131**

A 40 foot wide strip of land 20 feet wide on each side of the pipeline centerline lying within the W1/2 SW1/4 and S1/2 SW1/4 all in Section 24, Township 142 North, Range 88 West of the 5th P.M.

Said tract contains 4.84 acres, more or less.

#### **Temporary Construction Easement**

An additional 20 feet of temporary right-of-way lying adjacent to the above described tract for a total construction easement width of 60 feet.

Said tract contains 2.42 acres, more or less.

together with the right to utilize additional land for a period up to three years from the date of this easement, adjacent to the above described tract, for purposes of temporary working space during initial construction of the pipeline, and the right of ingress to and egress from said strip of land across the adjacent lands of the Grantor, for the purposes specified above at the will of the Grantee.

### **THE GRANTOR AND THE GRANTEE FURTHER AGREE:**

- 1. Use of right-of-way by Grantor.** Grantor reserves the right to use the surface of the easement strip provided, however, that Grantor, without prior approval of Grantee, shall neither construct nor permit to be constructed any building, structure, or other improvement upon the easement strip which would interfere with Grantee's exercise of the rights conveyed by this pipeline easement, including access to the easement strip.
- 2. Appurtenances.** The Grantee shall have the right to install and construct necessary appurtenances upon the surface of the easement strip. Prior to construction, the Grantee will notify the Grantor of the approximate location of such appurtenances if any, to be located on the easement strip, and shall pay to the Grantor the sum of \$500 for each appurtenance located at a distance of more than 5 feet from a field boundary or fence line. Such payments shall be paid prior to construction.
- 3. Damages.** The Grantee will pay to Grantor or Grantor's tenants, as their respective interests may appear, for damages caused by the operations or activities of the Grantee; provided, however, that the Grantee shall have the right, without liability for damages, to clear, and keep cleared, all trees, brush, and other obstructions from the easement strip that may, in the Grantee's judgment, interfere with the rights and privileges of the Grantee under this pipeline easement.

If the amount of any damage which Grantor may sustain as a result of Grantee's exercise of rights hereunder cannot be mutually agreed upon, such damages shall be ascertained and determined by three (3) disinterested person; one to be appointed by the Grantor, one by Grantee, and a third by the two so appointed, and the award of such three persons shall be final and conclusive.

4. **Restoration of surface.** The Grantee will restore the surface of the construction area to its original contour as nearly as practicable.
5. **Topsoil segregation.** When excavating the pipeline trench with a backhoe/trackhoe, the Grantee will remove the topsoil separately during the construction of the pipeline for the full width of the pipe trench to a depth of twelve (12) inches or the actual topsoil depth, whichever is less, and to be replaced at the top of the backfill over the pipe trench.
6. **Assignment and covenant by parties.** The rights of either party may be assigned in whole or in part. The terms and provisions of this easement shall constitute covenants running with the land and shall be binding upon, and inure to the benefit of, the parties hereto, their successors, assigns, personal representatives, and heirs.
7. **Grantor's title.** Grantor warrants that he is the owner of, or has an interest in, the land described in this easement, and that he has full right and authority to enter into and deliver this easement. This instrument may be executed in counterparts and each counterpart shall constitute a separate agreement between the parties thereto. Any payments pursuant to this pipeline easement shall be in proportion to the Grantor's interest in the undivided fee simple estate.
8. **Entire agreement.** This instrument contains the entire agreement of the parties and there are no other, or different, agreements or understandings between the Grantor and the Grantee, or its agents. The Grantor, in executing this pipeline easement, has not relied upon any promises, inducements, or representatives of the Grantee, or its agents, except as are set forth herein.
9. **Term of easement.** The term of this easement shall be as long as it is needed by the Grantee, or its assigns, and until a release of this easement is recorded, but shall not exceed ninety-nine (99) years pursuant to NDCC §47-05-02.1.
10. **Tenants.** The Grantor represents that the land described in this easement is (not rented) (rented to) NO.

Dated this 19th day of August, 2010.

**RIGHT-OF-WAY EASEMENT**

**ALL PERSONS TAKE NOTICE:**

In consideration of one dollar (\$1.00) and other good and valuable consideration **MICHAEL P. BAUMAN 4717 S 197TH E AVE BROKEN ARROW, OK 74014** hereinafter referred to as Grantor, does hereby grant, bargain, sell, transfer and convey to the Southwest Water Authority, hereinafter referred to as the Grantee, its successor and assigns, a perpetual easement with right to erect, construct, install and lay, and thereafter use, operate, inspect, repair, maintain, replace, and remove water pipelines, connections, valves and all other appurtenant facilities used in connection with the construction, operation and maintenance of the Southwest Pipeline Project, over above, across and through the land of the Grantor, situated in **MERCER** County, State of North Dakota, and said land as identified in Exhibit A described as follows: **SW1/4 SW1/4 SW1/4 SW1/4 & E1/2 E1/2 E1/2 SW1/4 SECTION 24 TOWNSHIP 142 RANGE 88 (the tract that contains 1.24 acres, more or less).**

1. The permanent easement will be thirty (30) feet in width, fifteen (15) feet on each side of the center line of the pipeline as constructed, with an additional ten (10) feet of temporary right-of-way for a total construction easement width of forty (40) feet, twenty (20) feet on each side of the center line.

2. The Grantee covenants to maintain the easement in good repair so that no unreasonable damage will result from its use to the adjacent land of the Grantor, successors and assigns. The Grantor will receive compensation for damages to growing crops caused by the construction or operation. The Grantor will report any damages within three (3) years of the construction of the project.

The grant and other provisions of this easement shall constitute a covenant running with the land for the benefit of the Grantee, its successors and assigns.

## DECLARATION OF GLENN GERVING

---

[¶1] I, Glenn Gerving, declare the following statements based on personal knowledge:

[¶2] I have ownership interest in the following properties that lie within the boundaries of the proposed TB Leingang Storage Facility.

- Township 141 North, Range 88 West  
Section 13: South fifty-four (54) acres of the South Half of the South Half (S1/2 S1/2)  
Mercer County, ND
- Township 141 North, Range 88 West  
Section 24: S1/2 SW1/4; S1/2 SW1/4 NW1/4  
Mercer County, ND

[¶3] To the best of my knowledge, the properties listed in ¶ 2 above are encumbered by the following easements:

- Section 13:
  - i. Southwest Water Authority Right-of-Way Easement executed by Dean and Tania Gerving on June 22, 2015 (207742).
- Section 24:
  - i. Southwest Water Authority Right-of-Way Easement executed by Glenn and Lisa Gerving on May 8, 2015 (207178).

[¶4] I have ownership interest in the following properties that lie within the boundaries of the Review Area of the proposed TB Leingang Storage Facility:

- Township 142 North, Range 87 West  
Section 34: E1/2 SE1/4  
Oliver County, ND
- Township 142 North, Range 87 West  
Section 35: S1/2 SW1/4  
Oliver County, ND

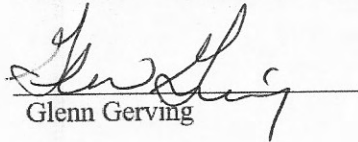

[¶5] Attached are the deeds which I believe indicate my ownership in each of the properties listed above.

[¶6] Attached are the easements currently encumbering these properties based on the information I have.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 30 day of May, 2024 at Glen Ullin, ND, United States.

  
Glenn Gervig

QUIT CLAIM DEED  
\*\*\*\*\*

THIS INDENTURE made this 24 day of October, 2018, between Dean Gerving, 2506 LaCorte Place, Bismarck, ND 58503, formerly of 607 9<sup>th</sup> Avenue SW, Mandan, ND 58554, Grantor; and Glenn Gerving, P.O. Box 607, Glen Ullin, ND 58631-0607, Grantee;

For and in consideration of One Dollar and other good and valuable consideration, Grantor does hereby QUIT CLAIM to Grantee, an undivided one-half (1/2) interest in all those tracts or parcels of land lying and being in the County of Mercer, and State of North Dakota, and described as follows, to wit:

The South fifty-three (53) acres of the South Half of the South Half (S1/2S1/2) of Section Thirteen (13), in Township One Hundred Forty-One (141) North, Range Eighty-Eight (88) West of the Fifth Principal Meridian, LESS a tract of land deeded to the State of North Dakota for the use of the State Highway Deptment described as follows:

All that portion of the South fifty-four (54) acres of the South Half of the South Half (S 1/2 S 1/2) of Section Thirteen (13), Township One Hundred Forty-One (141) North, Range Eighty-Eight (88) West, lying within a strip of land 100.00 feet wide, located on the Easterly side of and measured at right angles to the following described highway center line, as surveyed and staked: Beginning at a point 154.58 feet East of the Southwest corner of said Section Thirteen (13), thence from a tangent bearing North 0.09' West running along a 0.30' curve to the left 446.7 feet, more or less, until said stip crosses the North Line of said South 54 acres, also including all that portion lying Westerly of the above described strip except all that portion lying within 33 feet of the section line, tract contains 1.92 acres, more or less.

The North one hundred six (106) acres of the South Half of the South Half (S 1/2 S 1/2) of Section Thirteen (13) in Township One Hundred

Quit Claim Deed Dean Gerving to Glenn Gerving, Page -2-

Forty-One (41) North, Range Eighty-Eight (88) West of the Fifth Principal Meridian in Mercer County, North Dakota, subject to all conveyances of record and to all existing easements and rights-of-way.

The South fifty-three (53) acres of the North one hundred six (106) acres of the South Half (S 1/2) and the South fifty-four (54) acres of the North Half of the South Half (N 1/2 S 1/2) of Section Thirteen (13), in Township One Hundred Forty-one (141) North, Range Eighty-Eight (88) West of the Fifth Principal Meridian in Mercer County, North Dakota, subject to all conveyances of record and to all existing easements and rights-of-way.

These descriptions were obtained from a previously recorded instrument, namely that Warranty Deed dated March 12, 2007, recorded as Document No. 184674.

## TRUSTEE'S WARRANTY DEED

M159382

THIS INDENTURE Made this 15<sup>th</sup> day of December, 2021,  
 between **Darren D. Senger and Francis M. Senger, Successor Trustees  
 of the Senger Family Joint Asset Trust dated June 26, 2009, and any  
 amendments thereto**, grantors, whether one or more, to **Glenn Gerving  
 and Lisa Gerving**, grantees, whose post office address is \_\_\_\_\_  
Po Box 607 Glen Ullin ND 58631.

**WITNESSETH** for and in consideration of the sum of \$10.00 and more  
 consideration, grantors do hereby GRANT to the grantees, as joint tenants  
 and not as tenants in common, all of the following real property lying and  
 being in the County of Oliver, State of North Dakota, and described as  
 follows, to-wit:

The E $\frac{1}{2}$ SE $\frac{1}{4}$  of Section 34, and the S $\frac{1}{2}$ SW $\frac{1}{4}$  of Section 35, all in Township  
 142 North, Range 87 West of the 5<sup>th</sup> P.M., Oliver County, North Dakota.

Reserving unto the Grantors 100% of whatever mineral interests (rights  
 and royalties) currently owned by the Grantors or determined at a later  
 date, including but not limited to oil, coal, gas, uranium and hydrocarbons  
 owned as of record today.

Subject to easements, rights of way, restrictions and mineral severances  
 and reservations of record.

I certify that the full consideration paid for the property described in this  
 deed is \$ 432,000.00.

Date: 12-15-21 (Sgd.): Glenn Gerving  
 Grantee or Agent

And the said grantors for themselves, their heirs, executors and  
 administrators, do covenant with the grantees that they are well seized in  
 fee of the land and premises aforesaid and have good right to sell and  
 convey the same in manner and form aforesaid; that the same are free  
 from encumbrances, except installments of special assessments or  
 assessments for special improvements which have not been certified to the  
 County Auditor for collection, and the above granted lands and premises in  
 the quiet and peaceable possession of said grantees, against all persons  
 lawfully claiming or to claim the whole or any part thereof, the said grantors  
 will warrant and defend.

## DECLARATION OF MICHAEL & BONNIE HAUPT

---

[¶1] We, Michael and Bonnie Haupt, declare the following based on personal knowledge:

[¶2] We have ownership interest in the following properties that lie within the boundaries of the Review Area of the proposed TB Leingang Storage Facility.

- Township 141 North, Range 88 West  
Section 27: SW1/4  
Mercer County, ND
- Township 141 North, Range 88 West  
Section 35: SE1/4  
Mercer County, ND

[¶3] To the best of our knowledge, the properties listed in ¶ 2 above are encumbered by the following easements:

- Section 27:
  - i. Oliver-Mercer Electric Cooperative, Inc. Right-of-Way Easement executed by John and Frances Bechhold on March 23, 1945.
  - ii. Glen Ullin Energy Center, LLC Wind Project Easement Agreement executed by Michael and Bonnie Haupt effective as of July 10, 2018
- Section 35:
  - i. Mercer Co. Indenture executed by Michael and Elizabeth Bode on October 12, 1933.
  - ii. State of North Dakota Indenture executed by Michael and Elizabeth Bode on July 14, 1959.
  - iii. West River Telecommunications Right-of-Way Easement executed by Milton Flemmer on April 29, 1996.
  - iv. Southwest Water Authority Potable Water Easement executed by Michael and Bonnie Haupt on July 14, 2015.
  - v. Oliver-Mercer Electric Cooperative, Inc. Right-of-Way Easement executed by Michael and Elizabeth Bode in July, 1949.

- vi. Northwest Bell Telephone Company Right-of-Way Easement executed by Milton Flemmer on July 11, 1969.
- vii. Dakota Access, LLC Easement Agreement executed by Bonnie and Michael Haupt on March 4, 2016.

[¶4] Attached are the deeds which we believe indicate our ownership in each of the properties listed above.

[¶5] Attached are the easements currently encumbering these properties based on the information we have.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 3 day of June, 2024 at Bismarck, ND, United States.

*Mike Haupt*  
Mike Haupt (Jun 3, 2024 14:12 CDT)  
Michael Haupt

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 3 day of June, 2024 at Bismarck, ND, United States.

RIGHT-OF-WAY EASEMENT

KNOW ALL MEN BY THESE PRESENTS, that the undersigned John Beechhold

and Frances Beechhold, his wife for a good and valuable consideration, the receipt whereof is hereby acknowledged, does hereby grant unto the

Oliver-Mercer Electric Cooperative, Inc.

a corporation, whose post office address is Hazen, N. Dak. North Dakota, and to its successors or assigns, the right to enter upon the lands of the undersigned, situated in the county of Mercer, State of North Dakota and more partic-

ularly described as follows:

NE $\frac{1}{4}$ , S $\frac{1}{2}$ , of Sec. 27; NW $\frac{1}{4}$ , NE $\frac{1}{4}$ SW $\frac{1}{4}$  of Sec 34, all in Twp 141 Rgs 88.

and to place, construct, operate, repair, maintain, relocate and replace thereon and in or upon all streets, roads or highways abutting said lands an electric transmission or distribution line or system, and to cut and trim trees and shrubbery to the extent necessary to keep them clear of said electric line or system and to cut down from time to time all dead, weak, leaning or dangerous trees that are tall enough to strike the wires in falling.

In granting this easement it is understood that at pole locations, only a single pole and arrangement will be used, and that the location of the pole will be such as to form the least possible interference to farm operations, so long as it does not materially increase the cost of construction.

The undersigned covenants that he is the owner of the above described lands and that the said lands are free and clear of encumbrances and liens of whatsoever character except those held by the following persons:

none

It is further understood that, whenever necessary, words in this instrument in the singular shall be construed to read in the plural and that words used in the masculine gender shall be construed to read in the feminine.

IN WITNESS WHEREOF, the undersigned have set their hand and seals this 23rd day of March, 1945.

Signed, sealed and delivered in the presence of:

John Beechhold  
Frances Beechhold

**MEMORANDUM OF WIND PROJECT OPTION AGREEMENT**

THIS MEMORANDUM OF WIND PROJECT OPTION AGREEMENT (this "Memorandum") is made, dated and effective as of July 10, 2018 (the "Effective Date"), between Michael Haupt and Bonnie Haupt, husband and wife ("Owner"), and Glen Ullin Energy Center, LLC, a Delaware limited liability company ("Grantee"), in light of the following facts and circumstances:

**RECITALS:**

WHEREAS, Owner and Grantee have entered a Wind Project Option Agreement dated as of the Effective Date with respect to property more specifically described herein for wind energy purposes (as it may be hereinafter amended, restated or supplemented from time to time, the "Option Agreement"); and

WHEREAS, Owner and Grantee desire to set forth certain terms and conditions of the Option Agreement in a manner suitable for recording in the Public Records of Mercer County, North Dakota, in order to provide record notice of the Option Agreement and Grantee's rights in and to the land subject to the Option Agreement, as provided herein.

NOW, THEREFORE, in consideration of mutual covenants contained in the Option Agreement and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree and stipulate as follows:

1. Terms of Option Agreement Incorporated. All of the terms, conditions, provisions and covenants of the Option Agreement are hereby incorporated into this Memorandum by

reference as though fully set forth herein, and the Option Agreement and this Memorandum shall be deemed to constitute a single instrument or document. Should there be any inconsistency between the terms of this Memorandum and the Option Agreement, the terms of the Option Agreement shall prevail.

2. Description of Property. The land subject to the Option Agreement is described on Exhibit A attached hereto, and by this reference made a part hereof (the "Property").

3. Grant of Option. Owner grants and conveys and warrants to Grantee an option for an easement for the purposes described in the Option Agreement and, if exercised the Wind Project Easement Agreement ("Easement Agreement") attached to the Option Agreement.

4. Term of Option Agreement. The term of the Option Agreement shall be Five (5) years (the "Option Term"), unless earlier terminated by Grantee. Grantee may terminate this Option at any time upon thirty (30) days' written notice to Owner.

5. Names and Addresses of Parties. The names and addresses of the parties to the Option Agreement are as follows:

OWNER:

Michael & Bonnie Haupt  
5631 Apple Creek Drive  
Bismarck, ND 58504

GRANTEE:

Glen Ullin Energy Center, LLC  
30 W. Superior St.  
Duluth, MN 55802

6. Successors and Assigns. The terms of this Memorandum and the Option Agreement are covenants running with the land and inure to the benefit of, and are binding upon, the parties and their respective successors and assigns, including all subsequent owners of all or any portion of the Property. References to Owner and Grantee include their respective successors and assigns. References to the Option Agreement includes any amendments thereto.

7. Miscellaneous. This Memorandum is executed for the purpose of recording in the Public Records of Mercer County, North Dakota, in order to provide public record notice of the Option Agreement. The entire Option Agreement is hereby incorporated into this Memorandum by reference. Notwithstanding anything to the contrary contained herein, the provisions of this Memorandum do not in any way alter, amend, supplement, change or affect the terms, covenants or conditions of the Option Agreement, all of which terms, covenants and conditions shall remain in full force and effect. In the event of any conflict between the terms of this Memorandum and the Option Agreement, the terms of the Option Agreement shall prevail. This instrument may for convenience be executed in any number of original counterparts, each of which shall be an original and all of which taken together shall constitute one instrument.

IN WITNESS WHEREOF, Owner and Grantee, acting through its duly authorized representative, have made and entered into this Memorandum as of the Effective Date.

County# [ ]

W.O.# 96-111

We the undersigned, (whether one or more) *Milton H Flemmer*, Grantor(s), do hereby grant and convey unto *West River Telecommunications Cooperative*, a cooperative corporation (hereafter called the "Cooperative"), grantee, whose address is P.O. Box 467, Hazen, North Dakota, and its respective successors, assigns, lessees and agents, an easement to survey, construct, repair, operate, upgrade, maintain, relocate, replace and remove such communication systems as the grantee may from time to time require, consisting of but not limited to cables, wires, poles, splicing boxes, and other appurtenances, upon, over and under the land which the undersigned owns or in which the undersigned has any interest in the County of *Mercer*, State of *North Dakota*, and more particularly described as follows:

## E/2 of Section 35, Township 141, Range 88 Less ND Highway ROW

also the right of ingress and egress over and across the lands of the undersigned for the purpose of exercising the rights herein granted; to place surface markers beyond said strip, to clear and keep clear all trees, roots brush and other obstructions from the surface and subsurface of said strip of land. The boundary of said strip shall be a line parallel to and 25 feet either side of the first cable laid on the land of the undersigned or on adjacent lands. The undersigned for himself, his heirs, executors, administrators, successors, and assigns, hereby covenants that no structure shall be erected on said strip.

The undersigned agrees that all poles, wire and other facilities, including telephone equipment, installed on the above described premises at the Cooperative's expense, shall remain the property of the Cooperative, removable at the option of the Cooperative. The undersigned agrees to this easement with the understanding the Grantor, his heirs, executors, administrators, successors, and assigns, may continue to have access to and use of the easement area in any manner consistent with the rights herein granted to the Cooperative, and that the Cooperative will restore the said strip to as near as reasonable to the pre-plowed condition, and that the Cooperative will erect no buildings on said strip.

The undersigned covenant that they are the owners of the above described lands and that the said lands are free and clear of encumbrances and liens of whatsoever character except those held by the following persons:

The term of this easement shall be for as long as needed by the grantee, and until a release of this easement is recorded, but to not extend beyond the maximum term authorized by law.

Access is hereby granted for a state or federal historical survey of the cable route, should one be required, unless checked. Access denied ☐

MORTGAGE  
MORTGAGOR  
GRANTOR  
GRANTEE  
INDEXED

Michael L. and Bonnie L. Haupt, 5631 Apple Creek Drive, Bismarck ND, 58504 (GRANTOR), in consideration of \$1.00, conveys to Southwest Water Authority, 4665 2nd Street Southwest, Dickinson ND 58601-7231 (GRANTEE), an easement to construct, operate, maintain and remove one 4-inch diameter poly Potable Water Pipeline with the right of ingress and egress, over certain land hereafter referred to as the "easement area", which is a strip of land 33.0 feet wide, 16.5 feet on each side of the following described centerline:

SE4 of Section 35, T141N, R88W, Mercer County

Commencing at the Southeast Section corner of said Section 35; thence N88°59'43"W along the south section line of said Section 35, a distance of 1519.95 feet to the Point of Beginning; thence N00°22'55"E, a distance of 883.28 feet; thence N10°54'15"E, a distance of 49.62 feet; thence N19°34'06"E, a distance of 93.19 feet; thence N12°28'11"E, a distance of 50.86 feet; thence N26°53'07"W, a distance of 84.38 feet; thence N12°42'49"W, a distance of 55.64 feet; thence N00°07'44"W, a distance of 121.45 feet; thence N00°41'06"E, a distance of 1318.50 feet to the east/west quarter line of said Section 35 and thus terminating, said ending point being located N89°00'25"W along said quarter line, a distance of 1542.10 feet from the East Quarter Corner of said Section 35. The centerline is 2,656.92 feet or 161.03 rods long, and the easement area contains 2.01 acres, more or less. The easement area is further described and illustrated in Exhibits "A1-A2" which are attached to and are a part of this easement.

1. The Potable Water Pipeline shall be built only on the centerline as described above. GRANTEE may also temporarily use an additional 17.0 feet of right-of-way on the working side of the Potable Water Pipeline as a construction right-of-way. This construction right-of-way shall be subject to the topsoil reservation and reclamation provisions of this easement and must be abandoned upon the completion of construction and reclamation.
2. The top of the Potable Water Pipeline must be buried at least 72 inches below the ground's surface.
3. GRANTEE may install the following described appurtenance(s) upon the surface or at a depth less than 72 inches; (NA). For this/these additional appurtenance(s), GRANTEE has paid (NA) as further consideration. GRANTEE shall, when necessary, protect all above-ground appurtenances with a fence adequate to prevent livestock access and shall paint all above ground structures, except wire fences, anchors, guy wires, steel towers, and wood poles, with earth tone colors.
4. If construction of the Potable Water Pipeline within the easement area, is not completed within two (2) years after GRANTOR signs this easement, this easement automatically terminates.
5. For the initial construction of the Potable Water Pipeline, GRANTEE shall pay for labor and new materials for any fences or other improvements owned by the GRANTOR, that are moved or damaged by construction, operation, maintenance, or removal of the Potable Water Pipeline, and shall notify the surface GRANTOR of the construction schedule at least one week before construction within the easement area.
6. GRANTEE, or its agent, shall have a legible copy of this easement with them on-site for reference during construction, operation, maintenance or reclamation and shall present the copy upon GRANTOR's request.
7. This easement is subject to all of the GRANTOR's existing rights and privileges.
8. If, prior to or during construction, archeological or paleontological items are discovered or such items are disturbed, GRANTEE shall cease construction activities immediately. GRANTEE shall then promptly notify GRANTOR and must not resume construction until written approval is given by GRANTOR.

9. GRANTEE shall, prior to construction, maintenance or removal, reserve the top 12 inches of soil from areas subject to topsoil and subsoil mixing. The reserved soil must be stockpiled to minimize wind and water erosion. Upon completion of construction, maintenance, or removal, GRANTEE shall promptly reclaim the disturbed area. The disturbed area must be re-contoured to conform to the adjacent natural topography, rocks exposed by excavation must be hauled off the property or piled on one common pile within the easement area. The reserved soil must be evenly re-spread over the disturbed area, and the entire disturbed area must be re-vegetated with a mixture of native perennial grasses on the native grassland and alfalfa on the hayland, as shown in Exhibit "B". Reclamation is not complete until the activities described in this section are complete and the GRANTOR has approved completion in writing to GRANTEE.
10. GRANTEE shall implement reasonable measures to prevent accelerated erosion. If an erosion problem develops, GRANTEE shall promptly take the necessary actions to correct it and shall repair any erosion damage.
11. GRANTEE shall not discharge oil, gas liquids, salt water, or any other hazardous liquids or toxic substances onto the right-of-way or land adjacent to the right-of-way. All discharges of oil, gas liquids, salt water, or other hazardous liquids or toxic substances shall be stopped as soon as possible after discovery and acted upon immediately to halt movement of such discharges. Any such discharges shall be reported immediately to the GRANTOR. The GRANTEE shall then restore the affected area as closely as possible to its original condition.
12. GRANTEE shall control all noxious weeds in the easement area.
13. GRANTEE may cut or trim trees and shrubs, but only to the extent they interfere with or endanger the construction, operation, maintenance, or removal of the Potable Water Pipeline.
14. GRANTEE shall maintain the natural water flow and drainage.
15. GRANTEE shall take necessary precautions to prevent fires. In the event of a fire caused by the GRANTEE or its agent, GRANTEE shall compensate the GRANTOR and GRANTOR's surface lessee(s) for any losses due to the fire.
16. GRANTEE shall conduct all activities associated with the Potable Water Pipeline in a manner that avoids the degradation of air, land, and water quality and that protects the area's visual resources.
17. GRANTOR reserves the right to use the easement area and to allow others to use the easement area for purposes compatible with GRANTEE's use. If someone other than GRANTOR uses the easement area in a manner inconsistent with GRANTEE's use, GRANTOR is not liable or responsible.
18. Through this easement, GRANTEE is not acquiring any subsurface mineral interest. If any subsurface mineral interest is excluded from mining or development because of the presence of this easement or the Potable Water Pipeline, or if the location of the easement or Potable Water Pipeline interferes with the mining or development of subsurface mineral interests outside of the easement area, GRANTOR will give GRANTEE at least sixty days' written notice of the conflict between this easement and GRANTOR's right to mine and develop subsurface interests. At the end of the sixty-day period, GRANTEE must either pay GRANTOR the amount of lost royalties for the damages suffered because of GRANTOR's inability to mine or develop subsurface mineral interests, or GRANTEE must agree to relocate the easement and the Potable Water Pipeline. If GRANTEE selects relocation, this easement will be revised to describe the easement's new location and GRANTEE will move all structures and other physical features of the easement to the new location. Relocation does not entitle GRANTOR to additional compensation, but GRANTEE must bear all relocation costs. GRANTEE must promptly complete relocation.
19. Any fixtures, structures, installations or facilities constructed or installed by GRANTEE, are the property of GRANTEE and may be removed by GRANTEE at any time.

**EASEMENT: Potable Water Pipeline**

Page 3

20. GRANTEE shall remove all improvements from the easement area if the easement is abandoned or terminated, unless authorized to do otherwise in writing by GRANTOR.
21. This easement shall be a covenant running with the land and shall be binding on the heirs, successors, agents, and assigns of the parties.
22. This easement is subject to all existing easements and does not supersede any rights previously granted.
23. GRANTOR neither warrants nor agrees to defend title to the easement area.

Dated this 14<sup>th</sup> day of July, 2015, at Bismarck, North Dakota.

**Native Grass Seeding Specifications**

<u>Species</u>	<u>lbs.</u> <u>PLS*/acre</u>
Western wheatgrass	8
Slender wheatgrass	5
Green needlegrass	4
Side-oats grama	<u>2</u>
	19

\*PLS - Pure Live Seed (based on 50 PLS/sq. feet)

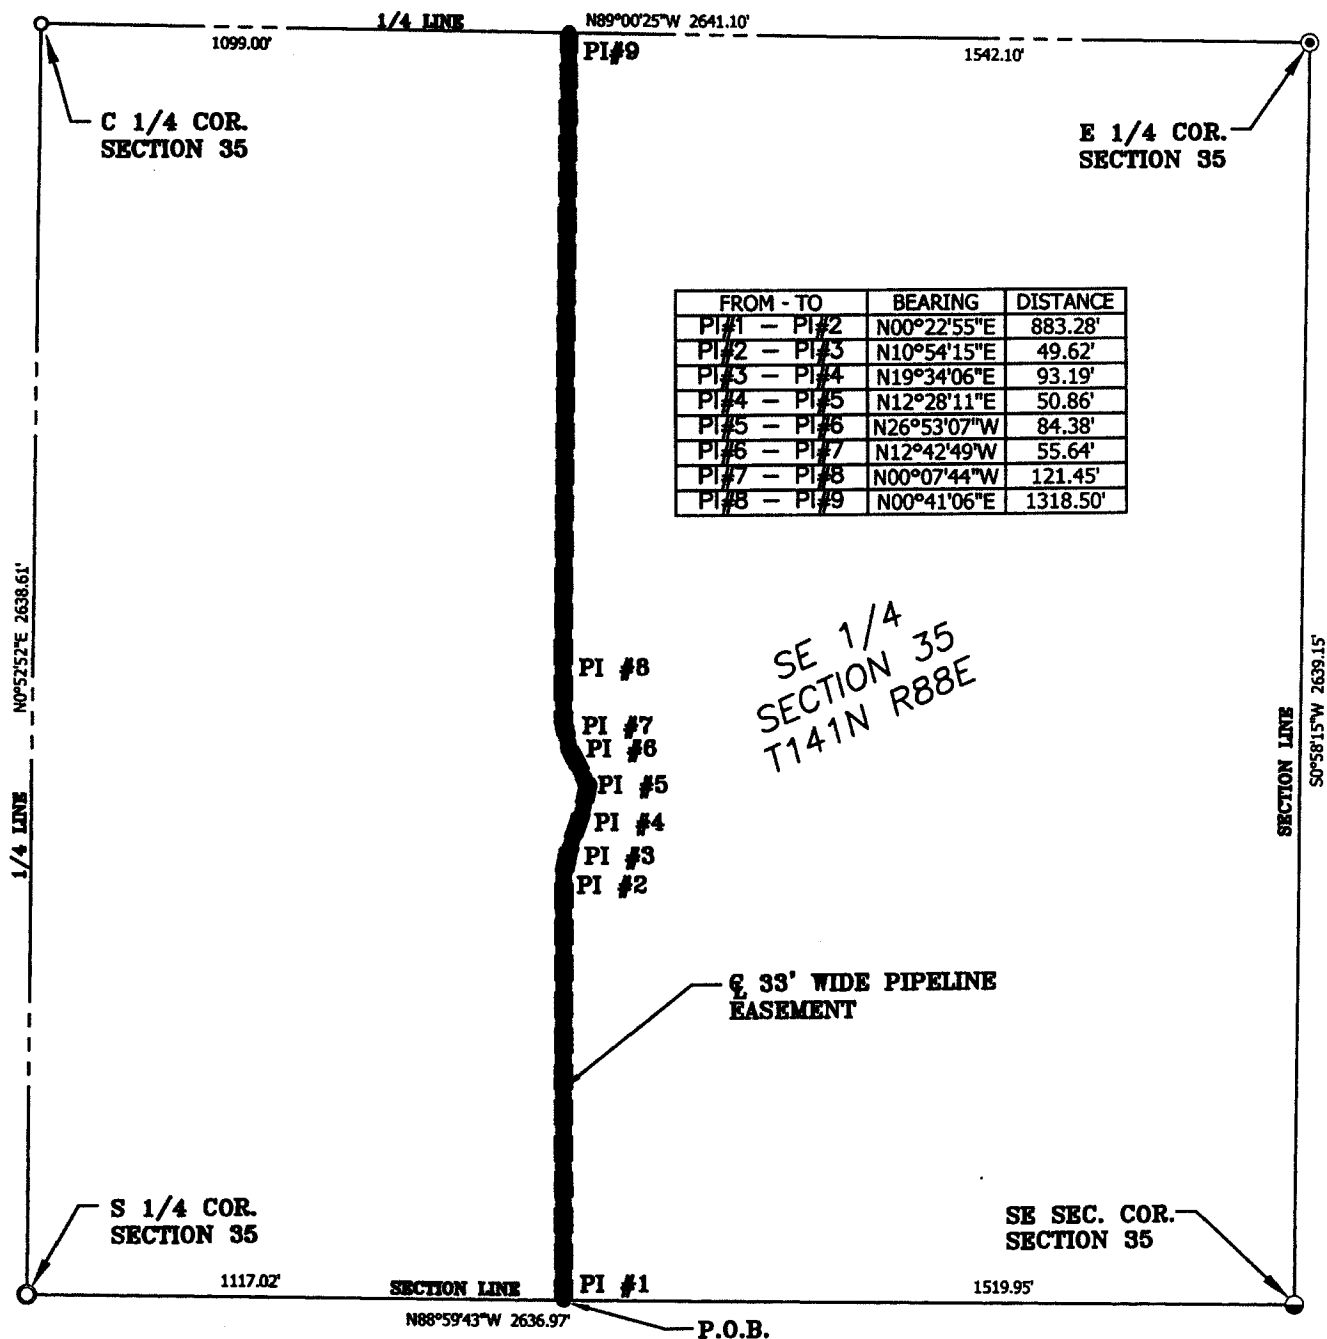

1. The seed bed should be firmly packed (footprints left in the soil should be less than 1/2 inch deep).
2. An early spring seeding (before May 24th) is preferred. A dormant fall seeding (after October 20th) is acceptable.
3. A cover crop of oats at 10 lbs. PLS/acre must be seeded on the disturbed area.
4. A drill designed specifically for native grass seeding will give the best seeding results. The seed should be planted at a depth of 1/2 to 1 inch. Precaution must be taken not to plant the seed too deeply in the soil or poor germination will result.
5. On areas where equipment cannot be used, broadcast seed and rake or drag to cover seed. Where seed is broadcast, double the seeding rate.
6. Use only North Dakota certified seed.

**Caution:** Be sure to clean out the drill before seeding to avoid any contamination with smooth brome grass or crested wheatgrass that may remain in the drill from previous use on private land. These are invasive grasses in native prairie and are not allowed on school trust lands. Contamination with or use of crested wheatgrass or smooth brome will result in the applicant being required to spray out the grass and reseed with the above native grass seed mixture. Sweet clover and alfalfa are also not allowed – only the above native grass seed mixture may be used for revegetation on school trust land.

**Alfalfa-Hayland Seeding: Rate 8 lbs. PLS per Acre**

SURVEYOR'S CERTIFICATE

I, Bruce P. Zelmer, a Professional Land Surveyor in and for the State of North Dakota, do hereby certify that at the request of the Michael Haupt, did complete a survey for the purpose of establishing the permanent pipeline easement located in Southeast Quarter (SE 1/4) of Section 35, Township 141 North, Range 88 West of the 5th P.M., Mercer County, North Dakota, said easement being comprised of a strip of land 33 feet in width, lying 16.5 feet on each side of the following described centerline:

**LEGAL DESCRIPTION OF PERMANENT EASEMENT:** Commencing at the Southeast Section corner of said Section 35; thence N88°59'43"W along the south section line of said Section 35, a distance of 1519.95 feet to the Point of Beginning; thence N00°22'55"E, a distance of 883.28 feet; thence N10°54'15"E, a distance of 49.62 feet; thence N19°34'06"E, a distance of 93.19 feet; thence N12°28'11"E, a distance of 50.86 feet; thence N26°53'07"W, a distance of 84.38 feet; thence N12°42'49"W, a distance of 55.64 feet; thence N00°07'44"W, a distance of 121.45 feet; thence N00°41'06"E, a distance of 1318.50 feet to the east/west quarter line of said Section 35 and thus terminating, said ending point being located N89°00'25"W along said quarter line, a distance of 1542.10 feet from the East Quarter Corner of said Section 35 and containing 2.01 acres, more or less.

This Certificate is to the best of my knowledge and belief a true description of said survey. I hereby certify that I have executed this document this 11<sup>th</sup> day of JANUARY, 2017.

## RIGHT OF WAY EASEMENT

KNOW ALL MEN BY THESE PRESENTS, that we the undersigned, (Whether one or more) Mike Bode & Elizabeth Bode

~~(underrise)~~ (husband and wife), for a good and valuable consideration, the receipt whereof is hereby acknowledged, do hereby grant unto Oliver Mercer Electric Cooperative, Inc., a cooperative corporation (hereinafter called the "Cooperative"), whose post office address is Wahpeton, North Dakota, and to its successors or assigns, the right to enter upon the lands of the undersigned, situated in the County of McRae, State of North Dakota, and more particularly described as follows:

A tract of land approximately ----- acres in area, located

----- miles in a ----- direction from the

town of -----, and further described as

being in the

E4 Section 36 Township 14N Range 2E

----- Section ----- Township ----- Range -----

----- Section ----- Township ----- Range -----

----- Section ----- Township ----- Range -----

and to contract, operate and maintain on the above described lands, and/or in or upon all streets, roads or highways abutting said lands, an electric transmission or distribution line or system, and to cut and trim trees and shrubbery that may interfere with or threaten to endanger the operation and maintenance of said line or system.

The undersigned agree that all poles, wires, and other facilities, including any main service entrance equipment, installed on the above-described lands at the Cooperative's expense shall remain the property of the Cooperative, removable at the option of the Cooperative, upon the termination of service to or on said lands.

The undersigned covenant that they are the owners of the above described lands and that the said lands are free and clear of encumbrances and liens of whatsoever character except those held by the following persons:

IN WITNESS WHEREOF, the undersigned have set their hands and seals this

26 day of July 1947

Mike Bode (L.S.)

Elizabeth Bode (L.S.)

RIGHT OF WAY EASEMENT

KNOW ALL MEN BY THESE PRESENTS, that for and in consideration of a good and valuable consideration, the receipt whereof is hereby acknowledged, Milton D. Blommer and \_\_\_\_\_, his wife, for themselves, their heirs and assigns, hereby grant to Northwestern Bell Telephone Company, a corporation, and its successors and assigns, a perpetual easement and right of way to construct, operate, maintain, replace and enlarge buried or underground telephone and communications lines, cables, wires and conduits, manholes, drains and splicing boxes, surface testing terminals, markers and other appurtenances under, through, across and upon the following described property in the County of Mercer and State of Mo., to wit:

E/2 Sec. 35 T-141N R88W.

consisting of that strip of land one foot wider (6 inches on each side) than that amount of land required by the telephone cable and its associated plant which the Telephone Company shall bury or place underground in or on the real property described above, in, along or near the following route across the property described above:

communication line to be buried in a north to south.  
direction adjacent to and west of Hwy.

together with the right of ingress and egress for the purpose of exercising the rights herein granted and the right to clear and keep cleared all trees, roots, branches and other obstructions within seven feet of any telephone plant placed in or on this right of way.

The undersigned, for themselves, their heirs and assigns, hereby covenant that they have good and lawful right to grant this easement and right of way and that no structure shall be erected or permitted on or over the telephone plant to be put in or on the property described above.

WITNESS their hands and seal this 11 day of July, 1969.

Witness C. B. Nygaard.

## EASEMENT AGREEMENT

This easement agreement ("Agreement"), dated the 4 day of March, 2016, is between **Bonnie Haupt and Michael Haupt, her husband, as joint tenants with right of survivorship, and not as tenants in common**, whose mailing address is 531 Apple Creek Drive, Bismarck, ND 58504, (hereinafter referred to as "Grantor", whether one or more), and Dakota Access, LLC, whose mailing address is 1300 Main Street, Houston, Texas 77002, and its successors and assigns (such entity and its successors and assigns are collectively referred to as the "Grantee").

For the consideration of TEN AND No/100 Dollars (\$10.00) and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Grantor hereby sells and conveys unto Grantee:

- (i) a ninety-nine year fifty foot (50') wide non-exclusive pipeline easement ("Pipeline Easement"), as more particularly described below,
- (ii) a temporary construction easement one hundred feet (100') in width and any such additional areas indicated on the Exhibit A more particularly described below ("Temporary Construction Easement"), and
- (iii) an easement for access to and from the Pipeline Easement and the Temporary Construction Easement ("Access Easement") as specifically indicated on the attached Exhibit A.

The Pipeline Easement, the Temporary Construction Easement, and the Access Easement (collectively, the "Easements" or "right-of-way") are being sold and conveyed from Grantor to Grantee for the purposes of constructing, maintaining, repairing, and removing at will one steel crude oil transmission pipeline not to exceed thirty inches (30") in diameter, which is more particularly described as follows:

All that certain lot, tract or parcel of land, containing 147.88 acres of land, more or less, being all of the SE¼ of Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota, more particularly described in Warranty Deed dated May 19, 1998 from Milton Flemmer, a/k/a Milton H. Flemmer and Anita Flemmer, a/k/a Anita B. Flemmer, husband and wife, to Bonnie Haupt and Michael Haupt, her husband, as joint tenants with right of survivorship, and not as tenants in common, recorded under Document No. 165421, Deed Records, Mercer County, North Dakota, less and except any conveyances heretofore made.

Exhibit A attached hereto is an image of all or part of the Grantor's Property showing the approximate location of the Pipeline Easement, Temporary Construction Easement, and Access Easement. The precise location of the Temporary Construction Easement or "workspace" will be in an area immediately adjacent to the planned or actual Pipeline Easement and shall not exceed one hundred feet (100') in width exclusive of the Pipeline Easement, and any additional areas indicated on Exhibit A, if any.

Within one hundred eighty (180) days following the completion of construction of the pipeline, Grantee shall supplement Exhibit A with a new Exhibit A-1 that will:

- (i) show the definite location of the installed pipeline as determined by an as-built survey, and
- (ii) provide the legal description of the definite location of the Pipeline Easement and the Access Easement based on a public land survey corner as defined by N.D.C.C. § 47-20.1-02(7).

Grantor hereby agrees that Grantee shall have the right to and is hereby authorized, with or without the joinder of Grantor, to file Exhibit A-1 by affidavit, to amend this Agreement to include such new Exhibit A-1 or to attach such new Exhibit A-1 to this Agreement, and to record or re-record such affidavit, amendment or Agreement with the new Exhibit A-1. Grantee shall provide Grantor with a copy of the recorded affidavit, amendment or re-recorded Agreement.

Except for pipeline markers and cathodic protection test leads, all other pipeline fittings, cathodic protection equipment, pig launchers and traps, and any other equipment, facilities, or appurtenances that are located above-ground must be consented to in writing by the Grantor. Grantee agrees to place such markers and test leads at property lines, fence lines, points of inflection, or foreign pipeline crossings when practicable to do so.

The rights of the parties to this Easement shall be subject to the following terms and conditions:

## **SECTION 1. GENERAL**

1.1 Grantee shall have the right to select the exact location of the Pipeline Easement and the location of the pipeline within the Pipeline Easement, such that the centerline of the pipeline may not, in all instances, lie in the middle of the Pipeline Easement as it is approximately shown in Exhibit A; but regardless of the location of the pipeline, the Pipeline Easement shall not exceed fifty feet (50') in width. Generally, the boundary of the pipeline easement will be located within twenty-five feet (25') of the pipeline centerline as it is approximately shown in Exhibit A, unless otherwise agreed to in writing by Grantor which, such agreement will not be unreasonably withheld.

1.2 The Temporary Construction Easement or workspace will be used to construct the single pipeline and any appurtenant facilities in, over, through, across, under, and along the Pipeline Easement area, subject to the limitations on above-ground appurtenances and facilities indicated above. The term of this Temporary Construction Easement shall be for a period to extend eighteen (18) months from the date of construction commencement on Grantor's property, except that if Grantee has conducted any operations or construction which have disturbed the surface of Grantor's land, then Grantee will remain obligated to fulfill all reclamation and remediation as described herein, and will remain liable for damages and indemnification as described herein and will have access to and the ability to reclaim and remediate any such disturbance until such time as the land is reclaimed or remediated. The Grantee will notify the Grantor of the date construction will begin in writing 30 days prior to the date of construction commencement. However, if Grantee has completed its use of this Temporary Construction Easement prior to the end of the eighteen (18) month period, then the Temporary Construction Easement shall immediately terminate.

1.3 Grantee's Easement is subject to Grantor's existing rights and privileges. Grantor reserves the right to use and enjoy Grantee's Right-of-Way and to allow Grantor's invitees, employees, and agents to use any part of it so long as such use does not unreasonably interfere with Grantee's rights as specified in this Easement. Subject to those rights, Grantee shall allow any surface use of the Right-of-Way by the Grantor(s), their permittees, and lessees so long as such use does not interfere with Grantee's rights and no permanent or temporary structure(s), above or below ground are located within 25 feet of the pipeline centerline. Grantor may use the Right-of-Way for any and all purposes not inconsistent with the purposes set forth in this Easement. Without limiting the foregoing, Grantor's uses may include but shall not be limited to using the Right-of-Way for agricultural and open spaces. Grantor is permitted, after review by Grantee, to construct any and all streets and roadways, at any angle of not less than forty five (45) degrees to Grantee's pipeline, across the Right-of-Way which do not damage, destroy or alter the operation of the pipeline and its appurtenant facilities. Grantor may also construct and/or install water, sewer, gas, electric, cable TV, telephone or other utility lines across the Right-of-Way at any angle of not less than forty five (45) degrees to Grantee's pipeline, provided that all of Grantee's required and applicable spacing's, including depth separation limits of at least 24-inches and other protective requirements as established by statute, regulation or industry best practice are met by Grantor. The use of the Right-of-Way by Grantor shall be regulated by all appropriate ordinances, regulations, resolutions or laws of the governmental entity with authority over the Right-of-Way. Grantor must notify Grantee in writing before streets, roadways, utilities or other encroachments are installed. Grantor may not use any part of the Right-of-Way if such use may damage, destroy, injure, and/or interfere with the Grantee's use of the Right-of-Way for the purposes for which the permanent easement is being sought by Grantee. Grantor is not permitted to conduct any of the following activities on the Right-of-Way without the written permission of Grantee: (1) construct any temporary or permanent building or site improvements; (2) drill or operate any well; (3) remove soil or change the grade or slope;

(4) impound surface water; or (5) plant trees or landscaping. Grantor further agrees that no above or below ground obstruction that may interfere with the purposes for which this Easement is being acquired may be placed, erected, installed or permitted upon the Right-of-Way without the written permission of Grantee. In the event the terms of this paragraph are violated, such violation shall be eliminated within thirty days of receipt of written notice from Grantee or Grantee shall have the immediate right to correct or eliminate such violation at the sole expense of Grantor. Grantor shall promptly reimburse Grantee for any expense related thereto. Grantor further agrees that it will not interfere with the purposes for which the Easement is conveyed. Any improvements, whether above or below ground, installed by Grantor subsequent to the date that Grantee acquires possession of the Right-of-Way, may be removed by Grantee without liability to Grantor for damages if Grantee first gives written notice to Grantor and Grantor does not remove the improvement within thirty days.

1.4 If Grantee has not commenced construction of its pipeline on this easement within two (2) years of receipt of all permits necessary for construction of the pipeline in North Dakota, then the easement will become void.

1.5 Prior to construction of the pipeline, Grantee shall contact Grantor to review the timing of construction and discuss site-specific issues and implementation of mitigation and rehabilitation measures in accordance with this Pipeline Easement. Grantee shall review the location of any above-ground structures, other than pipeline markers and cathodic protection test leads, that will be located on the premises and to which Grantor has consented prior to installing such above-ground structures.

1.6 The Easement Agreement may not be recorded without the written consent of both Grantor and Grantee. Grantor and Grantee agree to execute a memorandum version of the Easement Agreement, to be prepared by Grantee, which shall include a plat depicting the location of the Right-of Way and shall be recorded immediately upon execution.

## **SECTION 2. WEED CONTROL**

2.1 Prior to construction activities, Grantee will document, to the best of its ability and as reasonably able to depending upon time of year of construction and assuming the plants germinate and grow during the year of construction, all noxious and invasive weeds along the pipeline or access road easements including those identified by the North Dakota Department of Agriculture, and county and city weed boards, including the following: Russian knapweed (*Acroptilon repens*), absinth wormwood (*Artemisia absinthium*), musk thistle (*Carduus nutans*), diffuse knapweed (*Centaurea diffusa*), yellow toadflax (*Linaria vulgaris*), spotted knapweed (*Centaurea maculosa*), Canada thistle (*Cirsium arvense*), leafy spurge (*Euphorbia esula*), dalmatian toadflax (*Linaria dalmatica*), purple loosestrife (*Lythrum salicaria*), and saltcedar (*Tamarix chinensis*), black henbane (*Hyoscyamus niger*), common burdock (*Arctium minus*), houndstongue (*Hieracium cynoglossoides*), halogeton (*Halogeton glomeratus*), baby's breath (*Gypsophila paniculata*), common tansy (*Tanacetum vulgare*), houndstongue (*Hieracium cynoglossoides*), cheatgrass (*Bromus tectorum*), and Japanese brome (*Bromus japonicas*). Grantee does not warrant or guarantee its documentation will be an all-inclusive list or identification of all noxious and invasive weeds that could be located within the pipeline and road easements.

2.2 Grantee will be liable for the introduction of any noxious or invasive weeds caused by Grantee onto Grantor's property and will indemnify Grantor for any violations, enforcement actions, and mitigation requirements imposed by any entity under N.D.C.C. ch. 4.1-47.

2.3 Grantee shall control, to the best of its ability, all noxious weeds resulting from Grantee's activities in the easement areas, and will take steps to control the introduction and spread of weeds, including but not limited to the following:

- a. The equipment will be inspected by Grantee or its contractor to verify that it is adequately clean of soil and debris capable of transporting weed propagules prior to commencing work on the project.

- b. Areas of noxious and invasive weed infestation along the right-of-way or in other construction areas will be marked by Grantee with staking, flagging, and/or signs prior to clearing activities. To the extent reasonably practicable, all viable propagules (roots, seed, and stems) from noxious and invasive weeds will be destroyed by herbicide application or physical destruction prior to the construction activity.
- c. Cleared vegetation and segregated topsoil from areas of weed infestation will be placed adjacent to the areas from which they were removed.
- d. Signs will be posted to identify the stockpiles or reaches of stockpiles containing noxious weed material or material from the species listed in Section 2.1. During reclamation, the materials will be returned to the areas from which they were obtained.
- e. Materials used for erosion control (e.g., hay bales or straw mulch) will be certified as weed-free.

2.4 Prior to re-seeding, Grantee will control all weeds in the right-of-way by cultivation, disking or herbicide applications. After seeding is completed, Grantee will monitor for and maintain the rights-of-way to control any identified noxious or invasive weeds resulting from Grantee's activities prior to seed maturation for a minimum of two (2) years following construction activities, unless otherwise agreed to by Grantor.

### **SECTION 3. SOIL RESERVATION**

3.1 All topsoil in pasture land, range land, grassland, and crop land will be stripped to the first layer of color change as determined by a qualified individual and segregated from subsoils (except as indicated in subsection b below).

- a. Except as stated in section 3.1(b), all topsoil will be stripped to the first layer of color change as determined by a qualified individual, and color change is to be understood in the context of the Munsell soil color chart colors.
- b. For the specific locations where the first color change of soil is less than 8-inches and as agreed to by Grantor and Grantee in writing and prior to construction commencement, Grantee agrees to strip topsoil and subsoil together to a depth of eight inches (8") and to segregate and preserve this topsoil and subsoil together. Mixing of subsoil with topsoil will be allowed only for the soil types specified in section 3.1(b)(i-v), and only as specified in this section, unless otherwise agreed to in writing by Grantor. If the soil types listed in this section are present on Grantor's land, Grantee will conduct a pre-construction meeting or phone call with Grantor to determine whether topsoil and subsoil should be mixed as indicated above.

- 5) E0515C – Rhoades-Daglum complex, 6 to 9 percent slopes
- 6) E0617B – Belfield-Salvage-Daglum complex, 2 to 6 percent slopes
- 7) E0701F – Dogtooth-Janesburg-Cabba complex, 6 to 35 percent slopes
- 8) E3247C – Lambert-Vanda, high precipitation-Rhoades, barren complex, 0 to 9 percent slopes
- 9) E4005A – Harriet loam, 0 to 2 percent slopes, occasionally flooded
- 10) E4101A – Belfield-Korell loams, 0 to 2 percent slopes, rarely flooded
- 11) E4181A – Korell-Rhoades-Daglum complex, 0 to 2 percent slopes, rarely flooded (only Rhoades-Daglum Saline)
- 12) E4729A – Heil silty clay loam, 0 to 1 percent slopes

iv. Morton County Saline Mapping Units

- 1) E0415A – Belfield-Daglum complex, 0 to 2 percent slopes
- 2) E0454B – Daglum-Rhoades complex, 0 to 6 percent slopes
- 3) E0454C – Daglum-Rhoades complex, 6 to 9 percent slopes
- 4) E0457C – Rhoades-Daglum-Ekalaka fine sandy loams, 0 to 9 percent slopes
- 5) E0515B – Rhoades-Daglum complex, 0 to 6 percent slopes
- 6) E0541C – Rhoades-Rhoades, barren-Daglum complex, 0 to 9 percent slopes
- 7) E0559B – Dogtooth-Janesburg silt loams, 0 to 6 percent slopes
- 8) E0701F – Dogtooth-Janesburg-Cabba complex, 6 to 35 percent slopes
- 9) E1227B – Desert-Ekalaka-Telfer complex, 0 to 6 percent slopes
- 10) E1239B – Ekalaka-Lakota fine sandy loams, 0 to 6 percent slopes
- 11) E1243C – Lakota-Ekalaka-Sham, high precipitation, gullied, occasionally flooded complex, 0 to 9 percent slopes
- 12) E1263D – Evridge-Whitebird fine sandy loams, 6 to 15 percent slopes
- 13) E4005A – Harriet loam, 0 to 2 percent slopes, occasionally flooded
- 14) E4181A – Korell-Rhoades-Daglum complex, 0 to 2 percent slopes, rarely flooded (only Rhoades-Daglum Saline)
- 15) E4729A – Heil silty clay loam, 0 to 1 percent slopes

v. Williams County Saline Mapping Units

- 1) 1871 – Vallery loam, saline, 0 to 1 percent slopes
- 2) 2270 – Harriet and Stirum soils, 0 to 2 percent slopes
- 3) 2345 – Daglum-Rhoades complex, 0 to 6 percent slopes

- 4) C23A – Vallers, saline-Parnell complex, 0 to 1 percent slopes
  - 5) C75A – Vallers loam, saline, 0 to 1 percent slopes
  - 6) C526B – Daglum-Rhoades silt loams, 2 to 6 percent slopes
  - 7) C580A – Harriet-Regan-Stirum complex, 0 to 2 percent slopes, occasionally flooded
  - 8) E4005A – Harriet loam, 0 to 2 percent slopes, occasionally flooded
- c. No subsoil will be placed on top of topsoil except as necessary for stripping and mixing of the soils listed in subsection b above.
  - d. Soils in mapping units identified by the NRCS Web Soil Survey as containing saline, sodic, or saline/sodic series components will not be mixed with non-saline, non-sodic, or non-saline/sodic series components.

#### **SECTION 4. RESTORATION, REVEGETATION, AND EROSION CONTROL**

4.1 Reseeding and stand establishment for native prairie will be considered successful when the following criteria are met:

- a. All construction easement areas have been restored to a minimum of 70 percent cover as compared to similarly situated and undisturbed adjacent land. The percent cover will be determined utilizing standard vegetation sampling techniques.

4.2 If these criteria are not met within five years of the date of reseeded, Grantor may give notice to Grantee that success has not been achieved and Grantor and Grantee will work cooperatively together to develop an alternate reseeded plan, of which Grantee will be responsible for any reasonable expenses incurred therefor. At any time when Grantee believes it has met the above-described criteria, it will notify Grantor and Grantor will have Grantor's third party inspectors verify Grantee's compliance.

4.3 For any permanent herbaceous plantings (hay land, pasture land, and native prairie), Grantor's property will be seeded in strict compliance with the specifications contained in the NRCS Herbaceous Vegetation Establishment Guide ("Guide") available at [http://efotg.sc.egov.usda.gov/references/public/ND/Herbaceous\\_Veg\\_Est\\_Guide.pdf](http://efotg.sc.egov.usda.gov/references/public/ND/Herbaceous_Veg_Est_Guide.pdf) (last updated April, 2015). Any areas where soil reclamation is not completed such that Grantee is able to comply with the planting deadlines contained in the Guide, Grantee will have erosion control measures applied as specified in Section 4.6 and will have an annual cover crop planted so that proper seeding can take place in the spring of the following year. The cover crop will be drilled cross-wise or zig-zag on the slopes. The cover crop seed mix shall be as follows:

- a. June: Two bushels of spring small grains per acre.
- b. July and August: Thirty pounds of Sudan grass per acre.
- c. September and October: Two bushels of winter wheat or winter rye per acre.

4.4 Soil productivity levels will be measured with reference to re-vegetation success. Re-vegetation on hay land, pasture land, and native prairie shall be considered successful if the density and cover of non-nuisance, desirable plant species is equal to or greater than similarly situated and undisturbed adjacent land. On cropland, re-vegetation shall be considered successful if crop yields are equal to adjacent undisturbed portions of the same field. On hay land, the land will be re-vegetated with similar vegetation as compared to the undisturbed land within the same hay field, which could include an adapted variety of alfalfa at the rate of 5.5 PLS lb./acre, and a cover crop such as oats will be used as necessary to establish the alfalfa on the hay land, or as otherwise agreed to by Grantor. On native prairie, the land will be re-vegetated pursuant to the specifications contained in the Guide hereto with the seed mix specified in Section 9.5 of the Dakota Access, LLC Environmental Construction Plan unless a different, reasonable seed mix is attached hereto as an addendum.

4.5 Grantee will remove stones measuring 3 inches in diameter and larger from the top twelve (12) inches of topsoil. Said stones will be removed from the Premises entirely or moved to a location on the Premises consented to by Grantor in writing.

4.6 Erosion will be controlled according to a Storm Water Pollution Prevention Plan in its final approved form as filed with or approved by the North Dakota Public Service Commission. Following soil replacement, slopes having a length and steepness of slope (LS) factor of 1.0 or greater, as defined by NRCS, or a slope of 5% or greater, will have a blanket mulch, erosion nets or erosion control blankets, and straw wattles applied following soil reclamation. Slopes that are to be planted to permanent vegetative cover with an LS factor of 1.0 or higher that will not be seeded to grass/forbs within 30 days after soil replacement or that are not seeded to grass/forbs before June 1 (unless a different date is agreed to in writing by Grantor), will have a straw mulch cover of two tons per acre applied and anchored according to NRCS specifications for the Mulching-484 conservation practice found in Section IV of the NRCS Field Office Technical Guide (<http://efotg.sc.egov.usda.gov/>), followed by planting of temporary cover crops as listed in section 4.3. If detrimental erosion is occurring or likely to occur on the Premises, Grantee agrees to consult in good faith with Grantor or Grantor's inspector or other agent to address and mitigate the erosion.

## **SECTION 5. SOIL COMPACTION**

5.1 Grantee will test for and mitigate compaction. The Grantee will test topsoil and subsoil for compaction at regular intervals in lands disturbed by construction activities. The Grantee will conduct tests on the same soil type under similar moisture conditions in undisturbed and adjacent areas to approximate preconstruction conditions. The Grantee will use penetrometers or other appropriate devices to conduct tests. If compaction has a deleterious impact on productivity or revegetation success, Grantee will plow compacted areas in dry conditions with a paraplow or other deep tillage implement to achieve compaction equal to that on adjacent undisturbed lands. Grantee will plow the subsoil in dry conditions before replacing the segregated topsoil.

## **SECTION 6. CONSTRUCTION REQUIREMENTS**

6.1 Temporary Fencing. In areas where temporary fencing is necessary to keep livestock out of the easement areas (*i.e.* non-cultivated pasture land), Grantee shall install temporary fencing around the total easement areas (temporary, additional, and permanent) before commencement of construction, which fences shall remain until the entire easement area has been reclaimed. At the conclusion of reclamation activities, temporary fencing shall become the property of Grantor. Before construction of any fence by Grantee, Grantee will consult with Grantor as to the location of the fence and any gates along the easement areas. If Grantor chooses, Grantor may notify Grantee in writing that Grantor will install this fencing, and provide an estimate for one of the types of fences described below. Grantee will reimburse Grantor for the cost of the estimate, unless Grantee believes the estimate is unreasonable, in which case Grantee will obtain a reasonable estimate and reimburse that amount to Grantor.

- a. Unless otherwise agreed to in writing by Grantor and as long as Grantor supplies power to the fence, any fence installed by Grantee under this section will be reasonably similar to the two-wire power fence described in the NRCS spec sheet, which requires use of smooth, single-strand, 12.5 gauge high-tensile strength (170,000 psi, minimum), type III galvanized or better wire and a top wire (hot wire) at least 26 inches above ground line and the bottom wire (ground wire) 8 to 12 inches below the top wire. The bottom (ground) wire will be connected either directly to the negative side of the energizer or to the same grounding rod(s) as the energizer. In situations where the earth provides an adequate ground to complete the circuit, both wires may be energized. Tension on each wire shall be sufficient to maintain proper wire spacing between line posts. In-line strainers will be installed on each wire to maintain correct tension on each wire between all brace corners and gate assemblies. Tension springs may be used on each wire to maintain proper tension. In the absence of power, Grantee shall install a basic three strand barbed-wire fence using typical industry practices.

12 1/2 gauge red-brand barbed wire  
Minimum 5 1/2 foot steel t-post

6.2 Open Trench. Except where Grantee has installed temporary fencing, Grantee will limit the amount of time any trench is open on Grantor's property to twenty one (21) days from the time the trench is opened. Grantee is strictly liable for any cattle or other livestock killed or injured as a result of an open trench on the Subject Property.

6.3 Cover of Pipeline. Grantee shall install the pipeline with a minimum of forty-eight inches (48") of cover from the top of the pipe.

6.4 Integrity of Land and Services. Grantee shall unless otherwise negotiated with Grantor and agreed to in writing:

- a. Provide reasonable passage and land access for agricultural equipment during construction and servicing of the pipeline, and in no case shall Grantee entirely prevent access to any parcel of Grantor's land as a result of Grantee's construction activities;
- b. Supply temporary service in the event water or utility lines are interrupted and provide said temporary service before planned interruption or immediately after any interruption if the interruption is unplanned;
- c. Provide confirmation to Grantor that Grantee has contacted North Dakota One Call prior to any trenching activities;
- d. Install temporary gates at fence crossings at Grantor's reasonable request;
- e. Immediately provide temporary water to livestock where temporary fencing has removed livestock from their normal water supply;
- f. Immediately repair or replace any fences damaged by Grantee;
- g. Grantee agrees to provide training to its staff and contractors on the content of this Easement Agreement sufficient to ensure that Grantee's staff and contractors are aware of the provisions of the Easement Agreement as necessary for Grantee to fully comply with the Easement Agreement. Grantee will ensure that, to the extent necessary for Grantee to comply with this Easement Agreement, it will make its staff and contractors aware of the terms of the Easement Agreement.

## **SECTION 7. DRAINAGE AND SURFACE CONTOUR**

7.1 Grantee shall restore soils to pre-construction grade as reasonably practicable. Without limiting the foregoing statement, Grantee will ensure no ruts or ridges greater than four inches deep or high remain after post-construction grading.

7.2 Grantee shall repair and restore all surface drainage system functionality to pre-construction condition. Grantee shall cooperate with Grantor to accommodate planned surface drainage systems to the extent that plans are affected by the existence of Grantee's pipeline. Final contours of reconstructed surface drainage systems will be replaced so as to result in the same drainage slope and profile as existed prior to disturbance. Soil settling may occur for an extended period of time after disturbance within reconstructed surface drainage systems. All soil settling in the reconstructed drainage-way will be repaired so that no water will be backed up or retained in the drainage.

7.3 Grantee will excavate the trench so that the pipeline may be laid over or under drain tile with a minimum clearance of 12 inches. If drain tiles are cut during trenching, Grantee will: identify the location of the damaged tile at the trench and at both sides of the construction right-of-way; install a temporary flume to maintain drainage; cap the ends to prevent clogging drains with dirt or debris and; keep plugs in place until the damaged tile is repaired.

7.4 Before backfilling, Grantee will determine whether any drain tiles crossed during trenching were damaged during construction. Grantee will use a sewer rod or pipe snake to probe open ends of tiles and will repair any damaged tiles by inserting a competent support

around the tile to prevent settling. If damage is extensive, broken tile will be removed and replaced with new tile. Drain tiles damaged during construction must be repaired to their pre-construction condition. Grantee will backfill around drain tiles in lifts and compact each lift.

## **SECTION 8. WATER WELLS AND SURFACE WATERS**

8.1 In the event blasting is required, Grantee shall conduct pre-construction and post-construction certified water quality testing and yield testing and/or sampling of any water well registered with the North Dakota State Engineer or any other water well within 300 feet of the construction right-of-way. Regardless of blasting, Grantee will also conduct certified water quality and reasonable water quantity testing on any other surface waters such as dugouts, ponds, and creeks identified by Grantor and located within 150 feet of the construction right-of-way. Grantee shall analyze any damaged well or water supply system or surface water and perform necessary repairs and/or modifications to return it to its former capacity and quality. In the event that a private well or water supply system or surface water is damaged beyond repair due to Grantee's activities, Grantee will provide a temporary water source and will also replace the well or water source with one of equal or greater quality and quantity (and flow rate). The results of water quality and yield test reports shall be provided to Grantor free of charge. Grantee will also be responsible for any damage to groundwater caused by its operations.

## **SECTION 9. INDEMNIFICATION**

9.1 Grantee hereby agrees to indemnify and hold Grantor harmless from and against any claim or liability or loss from personal injury or property damage resulting from or arising out of the use of the Easements by Grantee, its servants, agents or invitees, excepting, however, such claims, liabilities or damages as may be due to or caused by the acts of Grantor, or its servants, agents or invitees. Grantee will hold Grantor harmless from any claim or liability or loss caused by trespassers or other third parties who are not the agents or invitees of Grantor. GRANTEE SHALL ALSO INDEMNIFY, DEFEND AND HOLD HARMLESS GRANTOR, GRANTOR'S HEIRS, SUCCESSORS, ASSIGNS, TRANSFEREES, EMPLOYEES, AGENTS, LESSEES, CONTRACTORS, SUBCONTRACTORS, AS WELL AS TRUSTEES, BENEFICIARIES, RELATIVES, PARTNERS, OFFICERS, DIRECTORS AND RELATED OR AFFILIATED ENTITIES FROM AND AGAINST ANY LOSS, LIABILITY, COST, EXPENSE OR CLAIM ARISING FROM THE INCURRING OF COSTS OF REQUIRED REPAIRS, CLEAN UP, OR DETOXIFICATION AND REMOVAL UNDER ANY HAZARDOUS MATERIAL LAW WHICH MAY RESULT FROM GRANTEE'S ACTS OR OMISSIONS ON GRANTOR'S LANDS, OR GRANTOR'S OPERATIONS THEREON. SPECIFICALLY EXCLUDED FROM THE FOREGOING INDEMNITIES IS ANY CLAIM FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES UNLESS CAUSED BY GRANTEE'S GROSS NEGLIGENCE, OR ANY CLAIM FOR THE DISCOVERY OF ADVERSE ENVIRONMENTAL CONDITIONS NOT CAUSED BY GRANTEE. IT IS FURTHER EXPRESSLY AGREED AND UNDERSTOOD THAT THE ABOVE INDEMNITY IS NOT INTENDED TO PROTECT GRANTOR FROM GRANTOR'S OWN NEGLIGENCE OR WILLFUL MISCONDUCT. THE OBLIGATIONS OF GRANTEE HEREUNDER SHALL SURVIVE THE TERMINATION OF THE PIPELINE RIGHT-OF-WAY FOR A PERIOD OF TIME EQUAL TO THE STATUTE OF LIMITATIONS APPLICABLE TO THE RESPECTIVE OBLIGATION.

9.2 Grantee will prevent the filing of Construction Liens, Well and Pipeline Construction Liens, and all other liens resulting from its activities on the lands described above. If any liens are filed on the above-described lands because of Grantee's activities, Grantee shall, at its own expense, bond around the lien or provide other security which provides clear title to Grantor within 30 days of recordation of any lien.

## **SECTION 10. SUBSURFACE AND MINERAL INTERESTS**

10.1 Grantor reserves all subsurface and surface aggregate or mineral interests. These interests include, but are not limited to, oil, gas, coal, pore space, cement materials, potash, sodium sulfate, sand and gravel, scoria, road material, building stone, chemical substances, metallic ores, uranium ores, or colloidal or other clays that are on and under the Right-of-Way; provided,

however, that Grantor shall not be permitted to drill or operate equipment for the production or development of minerals on the Right-of-Way, but it will be permitted to extract the oil and other minerals from and under the Right-of-Way by directional drilling and other means, so long as such activities do not damage, destroy, injure, and/or interfere with the Grantee's use of the Right-of-Way for the purposes for which the permanent easement is being sought by Grantee.

10.2 Grantee acknowledges that Grantor intends to conduct gravel mining activities adjacent to the Pipeline Easement, and that coal mining might be conducted in the future. Grantee agrees that Grantor may complete its mining activities on all of Grantor's property excluding the area at and from the boundaries of the Pipeline Easement; provided, however, in connection with mining activities on lands adjacent to the Pipeline Easement, Grantor shall maintain a 3:1 slope for thirty-five feet (35') from the boundary lines of the Pipeline Easement, as measured horizontally from the boundary lines of the Pipeline Easement. Upon the commencement of gravel or coal mining up to the thirty-five foot (35') setback from the boundary lines of the Pipeline Easement, Grantee shall pay Grantor for the reasonable prevailing value of the gravel or coal reserves minus the cost of mining the gravel. If a coal reserve is stranded and becomes uneconomical to mine because of the pipeline, Grantee will pay for all of the uneconomical coal minus the cost of mining the coal. Grantor shall have no liability to Grantee for damage to or interference with the pipeline and other facilities of Grantee within the Pipeline Easement, or for disruption of services provided by Grantee with respect to loss of lateral support for the pipeline, if Grantor excavates to and maintains a 3:1 slope over the thirty-five (35) foot area adjacent to the boundaries of the Pipeline Easement. If, prior to commencing mining activities in an area or areas adjacent to the Pipeline Easement, Grantor and Grantee, determine, due to soil stability or otherwise, that it may be desirable to maintain a sloped buffer zone greater than thirty-five feet (35') from the boundary lines of the Pipeline Easement, Grantor shall provide Grantee with written evidence of Grantor's calculation of the amount of recoverable reserves. Within thirty (30) days of receipt of such written evidence, Grantee shall pay to Grantor an additional amount for the minable reserves over the thirty-five (35') mining set back equal to the reasonable prevailing value of the gravel or coal reserves less the costs of mining the reserves that will be rendered un-minable as a result of the expanded, sloped buffer zone, and in that event, Grantor shall maintain an expanded sloped buffer zone for such distance and at such slope as Grantor and Grantee may agree. If Grantee elects not to pay Grantor for the additional value of the gravel or coal reserves that would be rendered un-minable as a result of the expanded, sloped buffer zone, then Grantor shall be obligated to maintain only a 3:1 sloped buffer zone over the thirty-five (35) foot area adjacent to the boundary lines of the Pipeline Easement and Grantor shall have no liability to Grantee for damage to or interference with the pipeline and other facilities of Grantee within the Pipeline Easement, or for disruption of services provided by Grantee with respect to loss of lateral support for the facilities, if Grantor excavates to and maintains a 3:1 slope over the thirty-five (35) foot area adjacent to the boundaries of the Pipeline Easement. In the alternative, Grantor can request that Grantee remove and relocate the pipeline at Grantor's sole cost and expense, to a location on the lands that has been mined and reclaimed. If Grantee elects to remove and relocate the pipeline, Grantee shall not be required to do so until Grantee has received permission and all consents and permissions to abandon the old pipeline and construct the new pipeline. Grantor shall grant Grantee a new easement and Grantee shall pay the entire actual cost and expense of the removal and relocation, including but not limited to the cost to Grantee of permits, materials, installation, surveying, inspection, x-ray, environmental studies, regulatory filings, attorneys' fees, and other expenses or overhead that may be required.

## **SECTION 11. GENERAL ENVIRONMENTAL PROTECTIONS**

11.1 Grantee shall not discharge oil, gas liquids, salt water, or any other hazardous liquids or toxic substances (including substances with toxic characteristics even if such substances are excluded from the definition of hazardous waste under federal statutes) onto the Right-of-Way or on land adjacent to the Right-of-Way. Grantee shall act immediately to halt movement of all discharges of oil, gas liquids, salt water, or other hazardous liquids or toxic substances after discovery. Grantee shall report any and all discharges of oil, gas liquids, salt water, or other hazardous liquids or toxic substances immediately to the Grantor and to the appropriate regulatory agencies and shall restore the affected area as closely as possible to its original condition.

11.2 Grantee shall take necessary precautions to prevent fires. Grantee will provide local fire departments with reasonable information and maps of temporary access roads along the Right-of-Way to facilitate access in the event of an emergency. In the event a fire is caused by Grantee, Grantee shall compensate the Grantor, or its lessees for all losses including forage, crop, buildings, animals, and any other losses.

11.3 Grantee may cut, trim or remove trees, brush and shrubs to keep the Right-of-Way clear of all obstructions that may, injure, endanger or interfere with the construction, operation or maintenance of the pipeline. Grantee shall consult with Grantor prior to cutting or trimming any trees, brush or shrubs located in the Temporary Construction Easement to determine if any reasonable alternatives exist. In non-cultivated uplands, the entire permanent easement may be maintained by the Grantee in an herbaceous state. In wetlands, a corridor centered on the pipeline and up to 30 feet wide may be maintained by the Grantee in a herbaceous state. In addition, trees within 15 feet of the pipeline centerline in wetlands that are greater than 15 feet in height may be selectively cut and removed. Should it be necessary to remove a tree or shrub off the right-of-way in order for Grantee to construct the pipeline, at the request of Grantor, Grantee will plant or compensate landowner to plant replacement trees on a 2:1 ratio in areas outside the Right-of-Way reasonably satisfactory to Grantor in accordance with the State of North Dakota's Tree and Shrub Mitigation Specifications.

## **SECTION 12. NO WARRANTY**

12.1 Grantor neither warrants nor agrees to defend title to the Right-of-Way, and disclaims any warranty against encumbrances. Grantor asserts, however, that to the best of Grantor's knowledge, Grantor is unaware of any title defects or adverse claims against Grantor's property interest. Grantor further agrees to notify Grantee in writing within thirty (30) days if Grantor learns of any title defects or adverse claims to the Right-of-Way within the term of the Easement Agreement.

## **SECTION 13. DAMAGES**

13.1 Grantee agrees to pay for damage to crops, pasture, timber, livestock, fences, drain tiles, water supply pipelines, or any other structures, utilities, and improvements that may result from Grantee's exercise of its rights under this Agreement. In lieu of paying for the cost of repairing damaged improvements, Grantee shall have the right to repair such damage caused by Grantee. The amount to be paid for damage to crops and other improvements and/or the repairs requested to be performed by Grantee shall be mutually agreed upon by Grantor and Grantee based on current market rates. If Grantor and Grantee cannot mutually agree on damage compensation, then Grantor reserves any rights associated with seeking proper compensation, including legal action.

13.2 Grantor and Grantee shall negotiate in good faith when determining damages not already paid for in advance. Grantee specifically agrees that, if soil productivity or re-vegetation has not been achieved as required by Section 4 of this Agreement by the expiration of any negotiated period of advance damages then Grantor shall be entitled to additional damage payments for each subsequent year, made on an annual basis, until soil productivity is restored or re-vegetation is successful. If advance damages are agreed upon, they will be indicated on the attached Exhibit B.

## **SECTION 14. COMPENSATION**

14.1 In consideration for this easement, Grantee will pay to Grantor an amount per rod as specified on Exhibit B.

14.2 Any payment to be made to Grantor under this Agreement may be made or mailed to Grantor at the address shown above, or to \_\_\_\_\_, at this address \_\_\_\_\_, who is hereby appointed agent and authorized to receive and receipt for same, and who is also appointed the true and lawful attorney in fact for the undersigned. The agency and power of attorney granted by Grantor to its agent hereunder shall not be deemed revoked until written notice from Grantor has been received by Grantee.

## **SECTION 15. EXECUTION REQUIRED**

15.1 The Easement Agreement shall be valid and enforceable upon execution by Grantor and Grantee, and may be executed in counterparts, each of which shall be considered an original for all purposes, but all of which together constitute one and the same instrument.

## **SECTION 16. CORPORATE SUCCESSION**

16.1 All the terms and provisions of the Easement Agreement shall be binding upon, shall inure to the benefit of and shall be enforceable by the respective representatives, successors and assigns of the Parties.

## **SECTION 17. ASSIGNMENT**

17.1 This Easement shall inure to and be applicable to Grantor and Grantee and their respective heirs, representatives, successors and assigns. Except for any assignment to Grantee's parent, subsidiary or affiliated entities, Grantee shall not assign this Easement to any other party without the prior written consent of Grantor, with Grantor's consent not to be unreasonably withheld, provided, however, that in the event of any assignment by Grantee or any successive Grantee, the assignor shall remain fully responsible for all obligations, responsibilities and liabilities of Grantee under this Easement (including, but not limited to, requirements as to indemnity and insurance).

## **SECTION 18. COMPLIANCE**

18.1 In addition to any requirements contained in this Easement, Grantee shall comply with the construction procedures and mitigation measures described in its application and supplements (including responses to staff data requests) to the North Dakota Public Service Commission for its permit in Docket No. PU-14-842, and as identified in the pertinent Environmental Plan, and any final Order of the North Dakota Public Service Commission.

## **SECTION 19. COVENANTS RUNNING WITH THE LAND**

19.1 By signing this Agreement and accepting the payment and other consideration described in this Agreement, Grantor shall be deemed to have agreed to be bound by the covenants applicable to Grantee hereunder, and the easement and related rights granted to Grantee herein create easements and covenants running with Grantor's land.

## **SECTION 20. MISCELLANEOUS**

20.1 Grantor acknowledges that Grantee has made no representations, promises, agreements, guarantees, or inducements to Grantor that are not expressly set forth in this Agreement and any simultaneously executed agreements, and that this Agreement is intended to reflect the entire agreement between the parties. The easement and related rights granted in this Agreement may be assigned, from time to time, in whole, by Grantee, and shall apply to each of the Pipeline Facilities installed by Grantee. This Agreement shall be governed by the law of the State in which the land is situated. Grantor's spouse, if not a titleholder, executes this Agreement for the purpose of subordinating all spousal rights to the easement and related rights granted to Grantee in this Agreement. No guns or firearms will be allowed in the Premises by Grantee or its agents or employees, and Grantee will not remove any cultural artifacts without Grantor's consent. Words and phrases herein shall be construed as in the singular or plural number, and as masculine, feminine or neuter gender according to the context. From and after the transfer by any Grantee to a successor Grantee, Grantor shall look solely to the successor Grantee in connection with matters arising after the date of the transfer. If any provision of this Agreement is adjudicated as being unenforceable, the balance of this Agreement shall remain in full force and effect.

## **SECTION 21. ARMS-LENGTH NEGOTIATION**

21.1 The Easement Agreement has been prepared by the joint efforts of Grantor and Grantee and shall be considered the product of collective, arms-length negotiation.

## **SECTION 22. CONFLICT WITH LAWS OR REGULATIONS**

22.1 If Grantee is unable, in whole or in part, by reason of any law, regulation, or order enacted or issued by any state or federal agency or court to carry out any of its obligations under this agreement, then such obligation, or any part thereof, shall be suspended.

## **SECTION 23. INSURANCE**

23.1 Grantee shall maintain in effect at all times comprehensive general liability insurance covering operations on the property of Grantor in an amount not less than Five Million Dollars (\$5,000,000) per occurrence and Ten Million Dollars (\$10,000,000) in the aggregate and provide Grantor reasonable evidence of the maintenance of such insurance.

## **SECTION 24. ABANDONMENT OF PIPELINE**

24.1 Grantee agrees that commencing five (5) years following the installation of the pipeline, in the event of the complete non-use of said pipeline by Grantee, its successors or assigns, for a continuous period of two (2) consecutive years this Easement and right of way shall be considered abandoned and Grantee shall furnish at its expense, upon receipt of written request from Grantor, a release of the Easement and right of way, in which event Grantee shall have the right to abandon the pipeline in place or remove said pipeline. "Use" of the pipeline as defined herein shall be defined as being the time period in which Grantee, or its assigns, carries the pipeline on its books. Upon final abandonment of said pipelines, Grantee shall comply with any rule or regulation concerning the condition the pipeline including, but not limited to (i) remediating any contaminants related to the pipeline according to all federal, state, county, township, or other applicable ordinances, rules, and regulations, (ii) removing all liquids from the pipeline, (iii) pipeline shall be severed at the ends and capped to seal the entire pipeline, (iv) all above ground pipeline related appurtenances will be removed from the property, and (v) restore the surface to its original condition as near as practical according to the requirements herein. Grantee shall remain responsible for any hazardous or dangerous condition resulting from the pipeline if it is abandoned in place. If Grantor needs abandoned pipeline removed in order to allow or accommodate full use and enjoyment of property, such as for construction of buildings, then upon Grantor's request, Grantee shall remove at minimum the portion of pipeline impacting such use and enjoyment. Any such removal requests must be made within 2 years of such pipeline abandonment.

EXECUTED this 4 day of March, 2016

GRANTOR:

Bonnie Haupt  
Bonnie Haupt

**ACKNOWLEDGMENT**

State of NORTH DAKOTA )  
County of Burleigh )ss

BEFORE ME, the undersigned authority, on this day personally appeared Bonnie Haupt, known to me to be the person(s) whose name is subscribed to the foregoing instrument and acknowledged to me that he/she/they executed the same for the purposes and consideration therein expressed.

IN TESTIMONY WHEREOF, I have hereunto set my hand and official seal this 4th day of March, 2016.

## MEMORANDUM OF EASEMENT AGREEMENT

THIS MEMORANDUM OF EASEMENT AGREEMENT is to provide notice of that certain EASEMENT AGREEMENT ("Easement") dated 4 March, 2016, by and between Bonnie Haupt and Michael Haupt, her husband, as joint tenants with right of survivorship, and not as tenants in common, whose mailing address is 531 Apple Creek Drive, Bismarck, ND 58504, (hereinafter referred to as "Grantor," whether one or more), and Dakota Access, LLC, whose address is 1300 Main Street, Houston, Texas 77002 (hereinafter referred to as "Grantee").

### PLEASE TAKE NOTICE AS FOLLOWS:

1. Capitalized terms contained herein and not otherwise defined herein shall have the meanings given to such terms in the Easement Agreement.

2. The Easement Agreement grants to Grantee a Right-of-Way for the purposes constructing, maintaining, repairing, and removing at will one steel crude oil transmission pipeline not to exceed thirty inches (30") in diameter together with all fittings, cathodic protection equipment, pipeline markers, and all other equipment, facilities, and appurtenances used or useful in connection with the foregoing pipeline (collectively "Pipeline Facilities"), along routes convenient for Grantee's operations, on, over, under, across and/or through certain land in the following tracts ("the Premises") located in Mercer County, State of North Dakota:

Township 141 North, Range 88 West  
Section 35: SE¼

("Subject Lands") and more specifically described or depicted on the plat or survey attached as Exhibit A to this Memorandum of Easement Agreement.

3. The Easement Agreement grants to Grantee a 99-year easement for the Right-of-Way described and depicted in Exhibit A, as well as the right to use, on a temporary basis, workspace adjacent to the Right-of-Way so as to allow Grantee to exercise any of the rights granted to Grantee in the Easement Agreement.

4. This Memorandum of Easement Agreement is placed of record in the county in which the Subject Lands are located for the purpose of placing all persons on notice of the existence of the Easement Agreement.

5. An executed copy of the Easement Agreement with all exhibits attached is on file in the office of the Grantee at the above-referenced address.

6. The terms and conditions of the Easement Agreement are incorporated by reference into this Memorandum of Easement Agreement as if fully set forth herein.

7. This Memorandum of Easement Agreement is executed by Grantee as of the date of the acknowledgment of the signature below, but is effective for all purposes as of the date of the Easement Agreement.

EXECUTED this 4 day of March, 2016

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

## DECLARATION OF JOHN M. JOCHIM

---

[¶1] I, John M. Jochim, declare the following based on personal knowledge:

[¶2] I have ownership interest in the following property that lies within the boundaries of the proposed BK Fischer Storage Facility.

- Township 142 North, Range 88 West  
Section 24: NW1/4  
Mercer County, ND

[¶3] The property listed in ¶ 2 above is encumbered by the following easements:

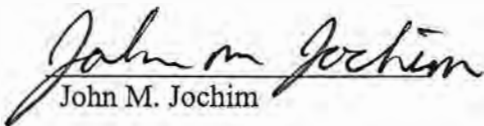

- Oliver Mercer Electric Cooperative Right-of-Way Easement executed by John Jochim on June 25, 1980 (209443).
- West River Telephone Right-of-Way Easement executed by John B. Jochim on April 13, 1993 (153703)
- West River Telecommunications Right-of-Way Easement executed by John M. Jochim on May 29, 2009 (191999).
- ND State Water Commission Pipeline Easement executed by John M. Jochim on July 1, 2010 (195955).

[¶4] Attached are the deeds which I believe indicate my ownership in each of the properties listed above.

[¶5] Attached are the easements currently encumbering these properties based on the information I have.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 23 day of may, 2024 at West Fargo, ND, United States.

  
John M. Jochim

## WARRANTY DEED

THIS INDENTURE, made this 30 day of Apr., 2001, between **John Jochim a/k/a John B. Jochim and Violet Jochim**, husband and wife, grantor, whether one or more, and **John M. Jochim**, grantee, whose post office address is 371 6<sup>th</sup> Ave. North. Castleton, ND 58012.

WITNESSETH, for and in consideration of the sum of Ten Dollars and other valuable consideration, grantor does hereby GRANT to the grantee, all of the following real property lying and being in the County of MERCER and State of North Dakota, and described as follows, to-wit:

**TOWNSHIP 142 NORTH, RANGE 88 WEST**  
**Section 24: NW/4**

Subject to prior mineral reservations and conveyances and reserving to grantor,  
John B. Jochim, a life estate in the premises conveyed,

And the said grantor for himself, his heirs, executors and administrators, does covenant with the grantee that he is well seized in fee of the land and premises aforesaid and has good right to sell and convey the same in manner and form aforesaid; that the same are free from all encumbrances, except installments of special assessments or assessments for special improvements which have not been certified to the County Auditor for collection; and the above granted lands and premises in the quiet and peaceable possession of said grantees, against all persons lawfully claiming or to claim the whole or any part thereof, the said grantor will warrant and defend.

**WITNESS, the hand of the grantor:**

John Jochim  
John Jochim

Violet Iochim

I certify that the requirement for a report or statement of full consideration paid does not apply because this deed is for one of the transactions exempted by Subdivision "c" of Section 6 of Section 11-18-02.2 NDCC.

### ***West River Telecommunications Right-of-Way Easement***

We the undersigned, (whether one or more) **John M. Jochim**, Grantor(s), do hereby grant and convey unto **West River Telecommunications Cooperative**, a cooperative corporation (hereafter called the "Cooperative"), grantee, whose address is P.O. Box 467, Hazen, North Dakota, and its respective successors, assigns, lessees and agents, an easement to survey, construct, repair, operate, upgrade, maintain, relocate, replace and remove such communication systems as the grantee may from time to time require, consisting of but not limited to cables, wires, poles, splicing boxes, and other appurtenances, upon, over and under the land which the undersigned owns or in which the undersigned has any interest in the County of **Mercer**, State of **North Dakota**, and more particularly described as follows:

#### ***NW/4NW/4 Sec. 24 T142N R88W***

also the right of ingress and egress over and across the lands of the undersigned for the purpose of exercising the rights herein granted; to place surface markers beyond said strip, to clear and keep clear all trees, roots, brush and other obstructions from the surface and subsurface of said strip of land. The boundary of said strip shall be a line parallel to and 10 feet either side of the first cable laid on the land of the undersigned. The undersigned for Grantor(s), their heirs, executors, administrators, successors, and assigns, hereby covenants that no structure shall be erected on said strip.

The undersigned agrees that all poles, wire and other facilities, including telephone equipment, installed on the above described land, shall remain the property of the Cooperative, removable at the option of the Cooperative. The undersigned agrees to this easement with the understanding the Grantor(s), their heirs, executors, administrators, successors, and assigns, may continue to have access to and use of the easement area in any manner consistent with the rights herein granted to the Cooperative, and that the Cooperative will restore the said strip to as near as reasonable to the pre-constructed condition, and that the Cooperative will erect no buildings on said strip.

The undersigned covenant that they are the owners of the above described lands and that the said lands are free and clear of encumbrances and liens of whatsoever character except those held by the following persons:

The term of this easement shall be for as long as needed by the grantee, and until a release of this easement is recorded, but to not extend beyond the maximum term authorized by law.

Access is hereby granted for a state or federal historical survey of the cable route, should one be required, unless checked. Access denied ☐

# West River Telephone Right-of-Way Easement

KNOW ALL MEN BY THESE PRESENT, that we the undersigned, (whether one or more) John B Jochim, Grantor(s), do hereby grant and convey unto West River Telecommunications Cooperative, a cooperative corporation (hereafter called the "Cooperative"), grantee, whose address is P.O Box 467, Hazen, North Dakota, and its respective successors, assigns, lessees and agents, an easement to survey, construct, reconstruct, operate, upgrade, maintain, relocate, replace and remove such communication systems as the grantee may from time to time require, consisting of but not limited to cables, wires, poles, splicing boxes, surface testing terminals, repeaters, repeater housings and markers, and other appurtenances, upon and over the land which the undersigned owns or in which the undersigned has any interest in the County of Mercer, State of North Dakota, and more particularly described as follows:

W/2 24 142 88

also the right of ingress and egress over and across the lands of the undersigned for the purpose of exercising the rights herein granted; to place surface markers beyond said strip, to clear and keep clear all trees, roots brush and other obstructions from the surface and subsurface of said strip of land and within seven feet thereof. The boundary of said strip shall be a line parallel to and 25 feet either side of the first cable laid, which cable shall have its location indicated by surface markers set at intervals on the land of the undersigned or on adjacent lands. The undersigned for himself, his heirs, executors, administrators, successors, and assigns, hereby covenants that no structure shall be erected on said strip.

The undersigned agrees that all poles, wire and other facilities, including telephone equipment, installed on the above described premises at the Cooperative's expense, shall remain the property of the Cooperative, removable at the option of the Cooperative.

The undersigned covenant that they are the owners of the above described lands and that the said lands are free and clear of encumbrances and liens of whatsoever character except those held by the following persons:

The term of this easement shall be for as long as needed by the grantee, and until a release of this easement is recorded, but to not extend beyond the maximum term authorized by law.

Access is hereby granted for a state or federal historical survey of the cable route, should one be required, unless checked. Access denied ☐

## PIPELINE EASEMENT

North Dakota State Water Commission  
County of Mercer  
Parcel H-MER-130

### ALL PERSONS TAKE NOTICE:

That the undersigned, John Jochim, whether one or more, called the Grantor, being the owner of, or having an interest in, land situated in the County of Mercer, State of North Dakota, more fully described below, in consideration of One and No/100 Dollars (\$1.00) and other valuable consideration, does hereby grant, convey, and warrant to the State of North Dakota, acting by and through the North Dakota State Water Commission, a state agency and public corporation, with its principal office at 900 East Boulevard Ave., Bismarck, North Dakota 58505, called the Grantee, and to its successors and assigns, the right, privilege, and easement to construct, maintain, operate, inspect, repair, alter, replace, change the size of or remove a pipeline, and appurtenances thereto, for the transportation of water under, across, and through:

Parcel H-MER-130

A 40 foot wide strip of land 20 feet wide on each side of the pipeline centerline lying within the W1/2 NW1/4 Section 24, Township 142 North, Range 88 West of the 5th P.M.

Said tract contains 2.42 acres, more or less.

Temporary Construction Easement

An additional 20 feet of temporary right-of-way lying adjacent to the above described tract for a total construction easement width of 60 feet.

Said tract contains 1.21 acres, more or less.

together with the right to utilize additional land for a period up to three years from the date of this easement, adjacent to the above described tract, for purposes of temporary working space during initial construction of the pipeline, and the right of ingress to and egress from said strip of land across the adjacent lands of the Grantor, for the purposes specified above at the will of the Grantee.

### THE GRANTOR AND THE GRANTEE FURTHER AGREE:

1. **Use of right-of-way by Grantor.** Grantor reserves the right to use the surface of the easement strip provided, however, that Grantor, without prior approval of Grantee, shall neither construct nor permit to be constructed any building, structure, or other improvement upon the easement strip which would interfere with Grantee's exercise of the rights conveyed by this pipeline easement, including access to the easement strip.
2. **Appurtenances.** The Grantee shall have the right to install and construct necessary appurtenances upon the surface of the easement strip. Prior to construction, the Grantee will notify the Grantor of the approximate location of such appurtenances if any, to be located on the easement strip, and shall pay to the Grantor the sum of \$500 for each appurtenance located at a distance of more than 5 feet from a field boundary or fence line. Such payments shall be paid prior to construction.
3. **Damages.** The Grantee will pay to Grantor or Grantor's tenants, as their respective interests may appear, for damages caused by the operations or activities of the Grantee; provided, however, that the Grantee shall have the right, without liability for damages, to clear, and keep cleared, all trees, brush, and other obstructions from the easement strip that may, in the Grantee's judgment, interfere with the rights and privileges of the Grantee under this pipeline easement.

If the amount of any damage which Grantor may sustain as a result of Grantee's exercise of rights hereunder cannot be mutually agreed upon, such damages shall be ascertained and determined by three (3) disinterested person; one to be appointed by the Grantor, one by

4. **Restoration of surface.** The Grantee will restore the surface of the construction area to its original contour as nearly as practicable.
5. **Topsoil segregation.** When excavating the pipeline trench with a backhoe/trackhoe, the Grantee will remove the topsoil separately during the construction of the pipeline for the full width of the pipe trench to a depth of twelve (12) inches or the actual topsoil depth, whichever is less, and to be replaced at the top of the backfill over the pipe trench.
6. **Assignment and covenant by parties.** The rights of either party may be assigned in whole or in part. The terms and provisions of this easement shall constitute covenants running with the land and shall be binding upon, and inure to the benefit of, the parties hereto, their successors, assigns, personal representatives, and heirs.
7. **Grantor's title.** Grantor warrants that he is the owner of, or has an interest in, the land described in this easement, and that he has full right and authority to enter into and deliver this easement. This instrument may be executed in counterparts and each counterpart shall constitute a separate agreement between the parties thereto. Any payments pursuant to this pipeline easement shall be in proportion to the Grantor's interest in the undivided fee simple estate.
8. **Entire agreement.** This instrument contains the entire agreement of the parties and there are no other, or different, agreements or understandings between the Grantor and the Grantee, or its agents. The Grantor, in executing this pipeline easement, has not relied upon any promises, inducements, or representatives of the Grantee, or its agents, except as are set forth herein.
9. **Term of easement.** The term of this easement shall be as long as it is needed by the Grantee, or its assigns, and until a release of this easement is recorded, but shall not exceed ninety-nine (99) years pursuant to NDCC §47-05-02.1.
10. **Tenants.** The Grantor represents that the land described in this easement is (not rented) (rented to) \_\_\_\_\_

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

## DECLARATION OF KEVIN KRAFT

---

[¶1] I, Kevin Kraft, declare the following based on personal knowledge:

[¶2] I have ownership interest in the following properties that lie within the boundaries of the Review Area of the proposed TB Leingang Storage Facility.

- Township 142 North, Range 87 West  
Section 27: A tract of land located in the S1/2  
Oliver County, ND

more particularly described as follows:

Commencing at the Southeast corner of said Section 27; thence N 89°59'36" W a distance of 2070.02 feet to the point of beginning; thence continuing N 89° 59'36" W a distance of 824.50 feet; thence N 0°40'27" E a distance of 2642.32 feet to the mid-section line; thence along the mid-section line S 89°54'53" E a distance of 824.50 feet; thence S 0°40'27" W a distance of 2641.19 feet to the point of beginning. Said tract contains 50.00 acres more or less.

- Township 142 North, Range 87 West  
Section 27: SE1/4 LESS AND EXCEPT a tract of land previously conveyed  
Oliver County, ND

[¶3] To the best of my knowledge, the properties listed in ¶ 2 above are encumbered by the following easements:

- Oliver Mercer Electric Cooperative Right-of-Way Easement executed by Mike and Mary Keller on April 9, 1949.
- Roughrider Electric Cooperative, Inc. Right of Way Easement executed by Kevin Kraft on February 24, 2016.
- Greg Skalsky Right-of-Way Easement granted by Kevin Kraft on July 29, 2022.
- Southwest Water Authority Right-of-Way Easement executed by Kevin Kraft on February 6, 2014.

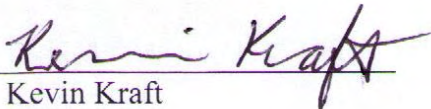

[¶4] Attached are the deeds which I believe indicate my ownership in each of the properties listed above.

[¶5] Attached are the easements currently encumbering these properties based on the information I have.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 24 day of May, 2024 at Beulah, ND, United States.

  
Kevin Kraft

WARRANTY DEED

THIS INDENTURE, Made this 28<sup>th</sup> day of September, 2001, between **JOSEPH A. KELLER and ELAINE M. KELLER**, husband and wife, whose post office address is P.O. Box 542, Beulah, North Dakota 58523, Grantors, and **KEVIN KRAFT**, a single person, whose post office address is 5651 23<sup>rd</sup> Street SW, Beulah, North Dakota 58523, Grantee.

WITNESSETH, For and in consideration of the sum of Sixty-Nine Thousand Nine Hundred Dollars (\$69,900.00) And Other Good and Valuable Consideration, Grantors do hereby GRANT to the Grantee, all of the following real property lying and being in the County of Oliver and State of North Dakota, and described as follows, to-wit:

**A tract of land located in the South Half (S1/2), Section Twenty-Seven (27), Township One Hundred Forty-Two (142) North, Range Eighty-Seven (87) West, Fifth Principle Meridian, Oliver County, North Dakota and more particularly described as follows:**

Commencing at the Southeast corner of Section 27 thence N 89°59'36"W a distance of 2070.02 feet to the Point of beginning; thence continuing N 89°59'36"W a distance of 824.50 feet; thence N 0°40'27"E a distance of 2642.32 feet to the mid-section line; thence along the mid-section line S 89°54'53"E a distance of 824.50 feet; thence S 0°40'27"W a distance of 2641.19 feet to the Point of Beginning.

Said tract contains 50.00 acres more or less.

The above legal description was obtained from a plat drawn by Roy Jensen, a North Dakota Registered Land Surveyor - LS. 4654.

And the said Grantors, for themselves, their heirs, executors and administrators, does covenant with the Grantee that they are well seized in fee of the land and premises aforesaid and has good right to sell and convey the same in manner and form aforesaid; that

the same are free from all encumbrances, except installments of special assessments or assessments for special improvements which have not been certified to the County Auditor for collection, and easements of record, if any, and the above granted lands and premises in the quiet and peaceable possession of said Grantee, against all persons lawfully claiming or to claim the whole or any part thereof, the said Grantors will warrant and defend.

WITNESS, The hand of the Grantors:

I (We), the Grantor in this Deed, do hereby certify that the amount shown as consideration above is the full consideration paid for the property conveyed.

## WARRANTY DEED

THIS INDENTURE, made this 13<sup>th</sup> day of August, 2013, between **Joseph A. Keller and Elaine M. Keller**, husband and wife, Grantors, and **Kevin Kraft**, whose address is 5651 23<sup>rd</sup> Street SW, Beulah, ND 58523, Grantee.

WITNESSETH, for and in consideration of the sum of Ten and no/100 and other good and valuable consideration (\$10.00 & OGVC), Grantors do hereby grant to the Grantee all of the following real property lying and being in the County of **OLIVER**, State of North Dakota, and described as follows, to-wit:

The Southeast Quarter (SE¼) of Section Twenty-Seven (27), Township One Hundred Forty-Two (142), Range Eighty-Seven (87), Oliver County, North Dakota, LESS AND EXCEPT a tract of land previously conveyed, described as follows:

A tract of land located in the South Half (S½) of Section Twenty-Seven (27), Township One Hundred Forty-Two (142) North, Range Eighty-Seven (87) West of the Fifth Principal Meridian, Oliver County, North Dakota, and more particularly described as follows:

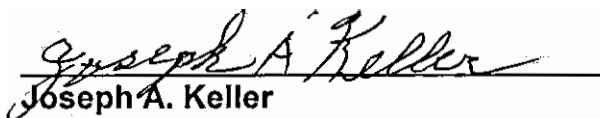

Commencing at the Southeast corner of said Section 27; thence N 89°59'36" W a distance of 2070.02 feet to the point of beginning; thence continuing N 89°59'36" W a distance of 824.50 feet; thence N 0°40'27" E a distance of 2642.32 feet to the mid-section line; thence along the mid-section line S 89°54'53" E a distance of 824.50 feet; thence S 0°40'27" W a distance of 2641.19 feet to the point of beginning.  
Said tract contains 50.00 acres more or less.

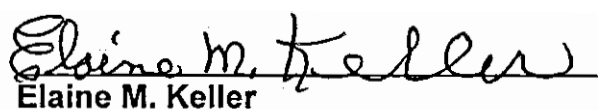

The above description taken from a previously recorded instrument.

Grantors hereby reserve to themselves as joint tenants Ninety percent (90%) of all minerals presently owned by them. It is the intention of Grantors to convey to Grantee Ten percent (10%) of all minerals presently owned by Grantors.

And the said Grantors for themselves, their heirs, executors and administrators, do covenant with the Grantee that they are well seized in fee of the land and premises aforesaid and have a good right to sell and convey the same in manner and form aforesaid; that the same are free from all encumbrances, except installments of special assessments or assessments for special improvements which have not been certified to the County Auditor for collection and the above granted lands and premises in the quiet and peaceable possession of said Grantee, against all persons lawfully claiming or to claim the whole or any part thereof, the said Grantors will warrant and defend.

RIGHT OF WAY EASEMENT

KNOW ALL MEN BY THESE PRESENTS, that we the undersigned, (Whether one or more) Mike Keller Mary Keller (unmarried) (husband and wife), for a good and valuable consideration, the receipt thereof is hereby acknowledged, do hereby grant unto Oliver-Mercer Electric Cooperative, Inc. a cooperative corporation, (hereinafter called the "Cooperative"), whose post office address is Hazen, North Dakota, and to its successors or assigns, the right to enter upon the lands of the undersigned, situated in the County of Oliver, State of North Dakota, and more particularly described as follows:

A tract of land approximately \_\_\_\_\_ acres in area, located \_\_\_\_\_ miles in a \_\_\_\_\_ direction from the town of \_\_\_\_\_, and further described as being in NE $\frac{1}{4}$ , SW $\frac{1}{4}$  and NW $\frac{1}{4}$  Section 26, Township 142 Range 87 ✓ NE $\frac{1}{4}$  and S $\frac{1}{2}$  Section 27, Township 142 Range 87 \_\_\_\_\_ Section \_\_\_\_\_, Township \_\_\_\_\_ Range \_\_\_\_\_

and to contract, operate and maintain on the above described lands, and/or in or upon all streets, roads or highways abutting said lands, an electric transmission or distribution line or system, and to cut and trim trees and shrubbery that may interfere with or threaten to endanger the operation and maintenance of said line or system.

The undersigned agree that all poles, wires, and other facilities, including any main service entrance equipment, installed on the above-described lands at the Cooperative's expense shall remain the property of the Cooperative, removable at the option of the Cooperative, upon termination of service to or on said lands.

The undersigned covenant that they are the owners of the above-described lands and that the said lands are free and clear of encumbrances and liens of whatsoever character except those held by the following persons:

IN WITNESS WHEREOF, the undersigned have set their hands and seals this 9 day of April, 1949.

## RIGHT OF WAY EASEMENT

THIS AGREEMENT made and entered into this 24<sup>th</sup> day of February, 20 16, between Kevin Kraft of 5651 23<sup>rd</sup> St SW, Beulah, ND 58523, hereinafter called "Owner" (whether one or more) and ROUGHRIDER ELECTRIC COOPERATIVE, INC., whose post office address is 800 Highway Drive, Hazen, North Dakota 58545-4737, hereinafter called "COOPERATIVE".

WITNESSETH that for valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Owner grants unto Cooperative, its successors and assigns, for a term of 99 years from the date hereof, an easement to construct, reconstruct, operate and maintain an electric distribution system, overhead, underground or both including all poles, guys, anchors wires, surface terminals, and all accessories and appurtenances necessary or desirable in connection therewith, under, over, upon and across lands of Owner and/or in or upon all streets, roads or highways abutting said lands situated in Oliver County, North Dakota, and more particularly described as follows, to-wit:

A parcel of land in the S1/2 of Section 27, Township 142 North, Range 87 West of the Fifth Principal Meridian, 20 feet in width, 10 feet on each side of a centerline described as follows:

Beginning at the east line of the southeast quarter of Section 27, Township 142 North, Range 87 West, at a point which bears N0°56'07"E a distance of 37.91 feet from the southeast corner of Section 27, Township 142N, Range 87W; thence N89°07'40"W a distance of 2894.69 feet more or less; to the POINT OF TERMINATION at a point which bears N89°58'50"E a distance of 2377.36 feet from the southwest corner of Section 27, Township 142N, Range 87W.

In Section 27, Township 142 North, Range 87 West of the Fifth Principal Meridian described as follows:

The facilities erected hereunder shall remain the property of the Cooperative. Cooperative shall have the right to inspect, rebuild, remove, repair, improve and make such changes, alterations, substitutions and additions in and to its facilities as Cooperative may from time to time deem advisable, including the right to increase or decrease the size or capacity of its system, together with necessary accessories and appurtenances; the right to increase or decrease the size of the facilities and equipment situated upon the premises; the right to permit or otherwise agree to the joint use or occupancy of the overhead lines or the trench and related underground facilities by other persons, associations or corporations; and the right to at any time use the property described above to extend lines and facilities to serve the property of persons other than the Owner.

Any damages to the surface of the right-of-way or to crops, fences, gates, drains, ditches, or lines of the Owner, caused by the Cooperative in the installation, repair maintenance, reconstruction or removal of said electrical properties and appurtenances, shall be promptly repaired, replaced or paid for by the Cooperative, provided a claim therefore is presented to the Cooperative at its General Office within ninety (90) days after such damages occur. If the amount of said damages cannot be agreed upon, the Cooperative and the Owner shall each select an arbitrator, and these two shall select a third arbitrator, and the decision and award of the arbitrators shall be final.

Cooperative shall at all times have the right to keep the easement clear of all buildings, structures or other obstructions, trees, shrubbery, undergrowth and roots.

Owner, his successors and assigns, may use the land within the easement for any purpose not inconsistent with the rights granted, provided such use does not interfere with or endanger the Cooperative's facilities or the rights granted under this easement.

For the purpose of constructing, inspecting, maintaining or operating its facilities, Cooperative shall have the right of ingress to and egress from the easement over the lands of Owner adjacent to the easement and lying between public or private roads and the easement, such right to be exercised in such manner as shall occasion the least practicable damage and inconvenience to Owner.

Owner covenants that he is seized of and has the right to convey the said easement, rights and privileges; that Cooperative shall have quiet and peaceable possession, use and enjoyment of the aforesaid easement, rights and privileges, and that Owner shall execute such further assurances thereof as may be requested by the Cooperative.

## DECLARATION OF KIRK MAIZE

---

[¶1] I, Kirk Maize, declare the following statements based on personal knowledge:

[¶2] I have ownership interest in the following property that lies within the boundaries of the proposed TB Leingang Storage Facility.

- Township 141 North, Range 87 West  
Section 20: S1/2 SE1/4  
Oliver County, ND

[¶3] To the best of my knowledge, the property listed in ¶ 2 above is encumbered by the following easements:

- Minnesota Power Wind Project Easement Agreement executed by Kirk and Linda Maize on September 30, 2013 (88510).
- Southwest Water Authority Right-of-Way Easement executed by Kirk and Linda Maize on November 7, 2014 (89766).
- West River Telecommunications Right-of-Way Easement executed by Kirk and Linda Maize on May 2, 2017 (93550).

[¶4] Attached are the deeds which I believe indicate my ownership in the property listed above.

[¶5] Attached are the easements currently encumbering the property based on the information I have.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 4<sup>th</sup> day of June, 2024 at Boulah, ND, United States.

  
Kirk Maize

WARRANTY DEED

THIS INDENTURE, Made this 11th day of February, 1992, between ROWENE J. SKALSKY, Personal Representative of the Estate of John Rausch, Deceased, Grantor, whether one or more, and KIRK E. MAIZE and LINDA MAIZE, husband and wife, Grantee, whether one or more, whose post office address is Beulah, North Dakota 58523.

WITNESSETH, For and in consideration of the sum of One Dollar (\$1.00), and other good and valuable consideration, Grantor does hereby GRANT to the Grantee, as joint tenants and not as tenants in common, all of the following real property lying and being in the County of Oliver, State of North Dakota, and described as follows, to-wit:

The South Half of the Southeast Quarter (S $\frac{1}{2}$ SE $\frac{1}{4}$ ) of Section Twenty (20), Township One Hundred Forty-One (141) North, Range Eighty-Seven (87) West of the Fifth Principal Meridian.

EXCEPTING AND RESERVING unto the Estate of John Rausch, Deceased, all right, title and interest in and to any interest now owned by the decedent in and to all of the oil, gas, coal and other minerals, of any nature whatsoever, which may be found on or underlying said lands, together with the right of ingress and egress at all times for the purpose of mining, drilling, exploring, operating and developing said lands for said minerals and storing, handling, transporting and marketing the same therefrom;

FURTHER SUBJECT to all prior valid mineral reservations, conveyances, easements and leases now of record.

This deed is in fulfillment of a Contract for Deed dated February 17, 1984.

And the Grantor, as Personal Representative of the Estate of John Rausch, Deceased, does covenant with the Grantee that said decedent and said estate are well seized in fee of the land and premises aforesaid and have good right to sell and convey the same in manner and form aforesaid; that the same are free from all encumbrances, except installments of special assessments or assessments for special improvements which have not been certified to the County Treasurer for collection, and the above granted lands and premises in the quiet and peaceable possession of the Grantee, against all persons lawfully claiming or to claim the whole or any part thereof, the Grantor will warrant and defend.

WITNESS, the hand of the Grantor:

### MEMORANDUM OF EASEMENTS

This Memorandum of Easements evidences a Wind Project Easement Agreement dated Sept. 30, 2013 by and between **Kirk E. Maize and Linda Maize, husband and wife** (“Owner”), as owner(s) of the real property described on attached **Exhibit A** (“Owner’s Property”) and Minnesota Power a division of ALLETE, Inc., a Minnesota corporation (“Minnesota Power” or “Developer”) (the “Easement Agreement”). Capitalized terms used herein are given the same meaning as in the Easement Agreement.

The Easement Agreement provides, among other things, that for and in consideration of the payments therein provided for, and upon the terms, conditions, covenants, and provisions set forth at length therein, that Owner grants to Minnesota Power the following irrevocable and exclusive easements, covering all or portions of the Owner’s Property, in connection with the development, construction, and operation of a wind energy project (individually each an “Easement” and collectively the “Easements”):

1. Turbine Site Easement
2. Access Easement
3. Collection Easement
4. Construction Easement
5. Wind Non-Obstruction Easement
6. Noise Easement
7. Overhang Easement
8. Met Tower Site Easement
9. Met Tower Access Easement

Attached as **Exhibit B** is a preliminary Easement Plan showing the approximate planned location of all Wind Project Improvements and Easements located on the Owner's Property. Within 180 days after completion of construction, Developer will deliver a final as-built Easement Plan to Owner showing the exact locations of all Wind Project Improvements as constructed on Owner's Property and all Easements. Such as-built Easement Plan (Exhibit C) will replace the attached Exhibit B and Developer may record Exhibit C in the public records.

The Easements are granted subject to Owner's retained right to use the affected portions of the Owner's Property for agricultural purposes that do not interfere with the Easements or the other rights granted to Developer in the Easement Agreement.

The Easement Agreement also provides as follows:

"Owner grants Developer an irrevocable, exclusive easement for the right and privilege to use, maintain and capture the free and unobstructed flow of wind currents over and across the Owner's Property."

And

"Owner shall not engage in any activity on Owner's Property that might interfere with wind speed or wind direction over any portion of the Wind Project; cause a decrease in the output or efficiency of any Turbine or accuracy of any meteorological equipment; or otherwise interfere with Developer's operation of the Wind Project or exercise of any rights or the Easements granted in this Agreement"

Unless earlier terminated as provided therein, the Easement Agreement runs through November 30, 2064.

The Easements and any rights or obligations in the Easement Agreement run with the Owner's Property affected and are binding on, and inure to the benefit of, Owner and Developer and their respective mortgagees, successors and assigns, heirs, personal representatives, tenants, or persons claiming through them

Reference is hereby made to the Easement Agreement as to all remaining terms thereof. This Memorandum of Easements is prepared, signed, and acknowledged solely for recording purposes and does not modify, increase, decrease, or in any other way affect the rights, duties, and obligations of Owner or Minnesota Power under the Easement Agreement.

IN WITNESS WHEREOF, the parties hereto have executed this Memorandum of Easements effective the date set forth above:

RIGHT-OF-WAY EASEMENT

ALL PERSONS TAKE NOTICE:

In consideration of one dollar (\$1.00) and other good and valuable consideration KIRK MAIZE 5851 28TH STREET SW BEULAH, ND 58523 hereinafter referred to as Grantor, does hereby grant, bargain, sell, transfer and convey to the Southwest Water Authority, hereinafter referred to as the Grantee, its successor and assigns, a perpetual easement with right to erect, construct, install and lay, and thereafter use, operate, inspect, repair, maintain, replace, and remove water pipelines, connections, valves and all other appurtenant facilities used in connection with the construction, operation and maintenance of the Southwest Pipeline Project, over, above, across and through the land of the Grantor, situated in Oliver County, State of North Dakota, said land being described as follows: S1/2 SE1/4 SECTION 20 TOWNSHIP 141 RANGE 87 (the tract that contains 3.72 acres, more or less), together with the right of ingress and egress over the adjacent lands of the Grantor, successors and assigns for the purposes of this easement.

1. The permanent easement will be thirty (30) feet in width, fifteen (15) feet on each side of the center line of the pipeline as constructed, with an additional ten (10) feet of temporary right-of-way for a total construction easement width of forty (40) feet, twenty (20) feet on each side of the center line.
2. The Grantee covenants to maintain the easement in good repair so that no unreasonable damage will result from its use to the adjacent land of the Grantor, successors and assigns. The Grantor will receive compensation for damages to growing crops caused by the construction or operation. The Grantor will report any damages within three (3) years of the construction of the project.

The grant and other provisions of this easement shall constitute a covenant running with the land for the benefit of the Grantee, its successors and assigns.

IN WITNESS WHEREOF, the Grantor has executed this instrument this 7th day of November, 2014.

***West River Telecommunications Right-of-Way Easement***

We the undersigned, (whether one or more) ***Kirk Maize and Linda Maize***, Grantor(s), do hereby grant and convey unto ***West River Telecommunications Cooperative***, a cooperative corporation (hereafter called the "Cooperative"), grantee, whose address is P.O. Box 467, Hazen, North Dakota, and its respective successors, assigns, lessees and agents, an easement to survey, construct, repair, operate, upgrade, maintain, relocate, replace and remove such communication systems as the grantee may from time to time require, consisting of but not limited to cables, wires, poles, splicing boxes, and other appurtenances, upon, over and under the land which the undersigned owns or in which the undersigned has any interest in the County of ***Oliver***, State of ***North Dakota***, and more particularly described as follows:

***SE/4 Sec. 20 T141N R87W***

also the right of ingress and egress over and across the lands of the undersigned for the purpose of exercising the rights herein granted; to place surface markers beyond said strip, to clear and keep clear all trees, roots, brush and other obstructions from the surface and subsurface of said strip of land. The boundary of said strip shall be a line parallel to and 10 feet either side of the first cable laid on the land of the undersigned. The undersigned for Grantor(s), their heirs, executors, administrators, successors, and assigns, hereby covenants that no structure shall be erected on said strip.

The undersigned agrees that all poles, wire and other facilities, including telephone equipment, installed on the above described land, shall remain the property of the Cooperative, removable at the option of the Cooperative. The undersigned agrees to this easement with the understanding the Grantor(s), their heirs, executors, administrators, successors, and assigns, may continue to have access to and use of the easement area in any manner consistent with the rights herein granted to the Cooperative, and that the Cooperative will restore the said strip to as near as reasonable to the pre-constructed condition, and that the Cooperative will erect no buildings on said strip.

The undersigned covenant that they are the owners of the above described lands and that the said lands are free and clear of encumbrances and liens of whatsoever character except those held by the following persons:

The term of this easement shall be for as long as needed by the grantee, and until a release of this easement is recorded, but to not extend beyond the maximum term authorized by law.

## DECLARATION OF CHRISTY METZ

---

[¶1] I, Christy Metz, declare the following based on personal knowledge:

[¶2] I have ownership interest in the following property that lies within the boundaries of the TB Leingang Storage Facility.

- Township 141 North, Range 87 West  
Section 4: Auditor's Lot 1, parcel in N1/2 SE1/4  
Oliver County, ND

[¶3] The property listed in ¶ 2 above is encumbered by the following easements:

- Oliver-Mercer Electric Cooperative, Inc. Right-of-Way Easement executed by Anna Skalsky on July 20, 1949 (91532).
- Roughrider Electric Cooperative, Inc. Right-of-Way Easement executed by Paul and Christie Metz on April 25, 2016 (92777).
- Southwest Water Authority Right-of-Way Easement.

[¶4] Attached are the deeds which I believe indicate my ownership in each of the properties listed above.

[¶5] Attached are the easements currently encumbering these properties based on the information I have.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 06 day of 03, 2024 at Beulahh, ND, United States.

Christy Metz  
Christy Metz (Jul-5-2024 17:44 CDT)

WARRANTY DEED

This deed is made by David L. Skalsky and Carol J. Skalsky, husband and wife, whose post office address is 7311 Badger Dr., Bismarck, ND 58503, and Leonard Hueske and Mary Hueske, husband and wife, whose post office address is P.O. Box 311, Richardton, ND 58652, **Grantors**, to Paul R. Metz and Christie E. Metz, husband and wife, as joint tenants, whose post office address is 2451 57<sup>th</sup> Ave SW, Beulah, ND 58523, **Grantees**.

For valuable consideration, Grantors grant and convey to Grantees the following real property located in Oliver County, North Dakota:

Auditor's Lot 1, a parcel of land in the N½ of the SE¼ of Section 4 Township 141 North Range 87 West of the Fifth Principal Meridian, Oliver County, North Dakota, more particularly described as follows:

Commencing at the East ¼ Corner said Section 4; thence S.00°03'34"E., 774.60', along the East Line of Said Section 4, to the Point of Beginning; thence continuing along the said East line S.00°03'34"E., 58.66'; thence N.63°25'13"W., 803.38'; thence S.01°13'58"E., 416.27'; thence S.74°08'23"W., 204.26'; thence N.61°33'16"W., 577.21'; thence N.60°45'05"W., 404.12'; thence N.01°56'26"W., 407.78'; thence N.89°47'04"E., 1045.86'; thence S.01°48'11"E., 412.49'; thence S.63°30'12"E., 805.92', to the Point of Beginning and containing 18.88 acres more or less.

Subject to prior mineral reservations and conveyances, and other limitations of record.

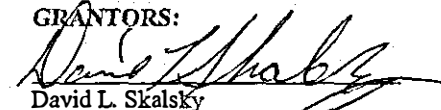

This deed is given in full satisfaction of that Contract for Deed between the parties dated December 10, 2009, recorded in Book 38 of Deeds, pages 485-493.

The legal description was obtained from a previously recorded instrument or prepared by Steven G. Podoll of Lange & Donovan, PLLP, PO Box 488, Hazen, ND 58545.

Grantors covenant that they are well seized in fee of the premises, which they have the right to sell and convey, and which are free from encumbrances except those of record, and excepting installments of special assessments or assessments for special improvements which have not been certified to the County Auditor for collection. Further, they covenant that they will warrant and defend the premises in the quiet and peaceable possession of the Grantees.

Dated this 12<sup>th</sup> day of November, 2013.

GRANTORS:

## RIGHT OF WAY EASEMENT

KNOW ALL MEN BY THESE PRESENTS, that we the undersigned, (Whether one or more) Anna Skalsky

widow (unmarried) (~~husband and wife~~),  
for a good and valuable consideration, the receipt whereof is hereby acknowledged, do hereby grant unto Oliver Mercer Electric Cooperative, Inc., a cooperative corporation, (hereinafter called the "Cooperative"), whose post office address is Hazen, North Dakota, and to its successors or assigns, the right to enter upon the lands of the undersigned, situated in the County of Oliver, State of North Dakota, and more particularly described as follows:

A tract of land approximately \_\_\_\_\_ acres in area, located \_\_\_\_\_ miles in a \_\_\_\_\_ direction from the town of \_\_\_\_\_, and further described as

being in the

SW 4 Section 3 Township 141 Range 87

SE 4 Section 4 Township 141 Range 87

\_\_\_\_\_ Section \_\_\_\_\_ Township \_\_\_\_\_ Range \_\_\_\_\_

\_\_\_\_\_ Section \_\_\_\_\_ Township \_\_\_\_\_ Range \_\_\_\_\_

and to contract, operate and maintain on the above described lands, and/or in or upon all streets, roads or highways abutting said lands, an electric transmission or distribution line or system, and to cut and trim trees and shrubbery that may interfere with or threaten to endanger the operation and maintenance of said line or system.

The undersigned agree that all poles, wires, and other facilities, including any main service entrance equipment, installed on the above described lands at the Cooperative's expense shall remain the property of the Cooperative, removable at the option of the Cooperative, upon the termination of service to or on said lands.

The undersigned covenant that they are the owners of the above described lands and that the said lands are free and clear of encumbrances and liens of whatsoever character except those held by the following persons:

IN WITNESS WHEREOF, the undersigned have set their hands and seals this

20 day of July 1949.

ROUGH RIDER ELECTRIC COOPERATIVE  
800 HWY DR

HAZEN, ND 58545

## RIGHT OF WAY EASEMENT

THIS AGREEMENT made and entered into this 25<sup>th</sup> day of April, 2016, between Paul Metz and Christie Metz of 2451 57<sup>th</sup> Ave SW, Beulah, ND 58523, hereinafter called "Owner" (whether one or more) and ROUGHRIDER ELECTRIC COOPERATIVE, INC., whose post office address is 800 Highway Drive, Hazen, North Dakota 58545-4737, hereinafter called "COOPERATIVE".

WITNESSETH that for valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Owner grants unto Cooperative, its successors and assigns, for a term of 99 years from the date hereof, an easement to construct, reconstruct, operate and maintain an electric distribution system, overhead, underground or both including all poles, guys, anchors wires, surface terminals, and all accessories and appurtenances necessary or desirable in connection therewith, under, over, upon and across lands of Owner and/or in or upon all streets, roads or highways abutting said lands situated in Oliver County, North Dakota, and more particularly described as follows, to-wit:

A parcel of land in the SE1/4 of Section 4, Township 141 North, Range 87 West of the Fifth Principal Meridian, 20 feet in width, 10 feet on each side of a centerline described as follows:

Beginning at the north line of Lot "A" in Section 4, Township 141 North, Range 87 West at a point which bears S3°54'37"W a distance of 755.50 feet from the east quarter corner of Section 4, Township 141N, Range 87W; thence S0°49'11"W a distance of 58.39 feet more or less; to the POINT OF TERMINATION at the south line of Lot "A" in Section 4, Township 141N, Range 87W at a point which bears N0°27'54"W a distance of 1809.76 feet from the southeast corner of Section 4, Township 141N, Range 87W.

In Section 4, Township 141 North, Range 87 West of the Fifth Principal Meridian described as follows:

The facilities erected hereunder shall remain the property of the Cooperative. Cooperative shall have the right to inspect, rebuild, remove, repair, improve and make such changes, alterations, substitutions and additions in and to its facilities as Cooperative may from time to time deem advisable, including the right to increase or decrease the size or capacity of its system, together with necessary accessories and appurtenances; the right to increase or decrease the size of the facilities and equipment situated upon the premises; the right to permit or otherwise agree to the joint use or occupancy of the overhead lines or the trench and related underground facilities by other persons, associations or corporations; and the right to at any time use the property described above to extend lines and facilities to serve the property of persons other than the Owner.

Any damages to the surface of the right-of-way or to crops, fences, gates, drains, ditches, or lines of the Owner, caused by the Cooperative in the installation, repair maintenance, reconstruction or removal of said electrical properties and appurtenances, shall be promptly repaired, replaced or paid for by the Cooperative, provided a claim therefore is presented to the Cooperative at its General Office within ninety (90) days after such damages occur. If the amount of said damages cannot be agreed upon, the Cooperative and the Owner shall each select an arbitrator, and these two shall select a third arbitrator, and the decision and award of the arbitrators shall be final.

Cooperative shall at all times have the right to keep the easement clear of all buildings, structures or other obstructions, trees, shrubbery, undergrowth and roots.

Owner, his successors and assigns, may use the land within the easement for any purpose not inconsistent with the rights granted, provided such use does not interfere with or endanger the Cooperative's facilities or the rights granted under this easement.

For the purpose of constructing, inspecting, maintaining or operating its facilities, Cooperative shall have the right of ingress to and egress from the easement over the lands of Owner adjacent to the easement and lying between public or private roads and the easement, such right to be exercised in such manner as shall occasion the least practicable damage and inconvenience to Owner.

## DECLARATION OF JOLENE RUST

---

[¶1] I, Jolene Rust, declare the following based on personal knowledge:

[¶2] I have ownership interest in the following property that lies within the boundaries of the proposed BK Fischer Storage Facility.

- Township 142 North, Range 88 West  
Section 13: SW1/4  
Mercer County, ND

[¶3] To the best of my knowledge, the property listed in ¶ 2 above is encumbered by the following easements:

- Oliver Mercer Electric Cooperative Right-of-Way Easement executed by John Jochim on June 25, 1980.
- West River Telecommunications Right-of-Way Easement executed by Jolene M. Rust on June 1, 2009.
- Roughrider Electric Cooperative, Inc. Right of Way Easement executed by Jolene Rust on June 1, 2009.
- ND State Water Commission Pipeline Easement executed by Jolene Rust on July 1, 2010.
- Southwest Water Authority Right-of-Way Easement executed by Jolene Rust on March 28, 2014.
- Badlands Cellular of North Dakota d/b/a Verizon Wireless Land Lease Agreement executed by Jolene Rust on November 14, 2008.

[¶4] Attached is the deed which I believe indicates my ownership in the property listed above.

[¶5] Attached are the easements currently encumbering that property based on the information I have.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 23 day of May, 2024 at Turtle Lake, ND, United States.

  
Jolene Rust

## WARRANTY DEED

THIS INDENTURE, made this 30 day of April, 2001, between **John Jochim a/k/a John B. Jochim and Violet Jochim**, husband and wife, grantor, whether one or more, and **Jolene M. Rust**, grantee, whose post office address is 115 W. Railroad Ave., Mercer, ND 58559.

WITNESSETH, for and in consideration of the sum of Ten Dollars and other valuable consideration, grantor does hereby GRANT to the grantee, all of the following real property lying and being in the County of MERCER and State of North Dakota, and described as follows, to-wit:

**TOWNSHIP 142 NORTH, RANGE 88 WEST**  
**Section 13: SW/4**

Subject to prior mineral reservations and conveyances and reserving to grantor,  
John B. Jochim, a life estate in the premises conveyed.

And the said grantor for himself, his heirs, executors and administrators, does covenant with the grantee that he is well seized in fee of the land and premises aforesaid and has good right to sell and convey the same in manner and form aforesaid; that the same are free from all encumbrances, except installments of special assessments or assessments for special improvements which have not been certified to the County Auditor for collection; and the above granted lands and premises in the quiet and peaceable possession of said grantees, against all persons lawfully claiming or to claim the whole or any part thereof, the said grantor will warrant and defend.

**WITNESS, the hand of the grantor:**

John 13. Joachim  
John Joachim

Violet J. Jochim  
Violet Jochim

**I certify that the requirement for a report or statement of full consideration paid does not apply because this deed is for one of the transactions exempted by Subdivision "c" of Section 6 of Section 11-18-02.2 NDCC.**

RIGHT-OF-WAY EASEMENT

KNOW ALL MEN BY THESE PRESENTS, that we the undersigned, (whether one or more)

JOHN JOCHIM

(unmarried) (husband and wife) for a good and valuable consideration, the receipt whereof is hereby acknowledged, do hereby grant unto the Oliver-Mercer Electric Cooperative, Inc., a cooperative corporation (hereinafter called the "Cooperative") whose post office address is Hazen, North Dakota 58545, and to its successors or assigns, the right to enter upon the lands of the undersigned, situated in the County of Mercer, State of North Dakota, and more particularly described as follows:

Right-of-way \_\_\_\_\_ feet Township 142 Range 88 Section W 1/2 OF NW 1/4 OF 24  
 Right-of-way \_\_\_\_\_ feet Township \_\_\_\_\_ Range \_\_\_\_\_ Section W 1/2 OF SW 1/4 OF 13  
W 1/2 OF NW 1/4 OF 24

and to construct, operate, maintain and move or relocate on the above-described lands and/or in or upon all streets, roads or highways abutting said lands, an electric transmission line or system, and to cut and trim trees and shrubbery that may interfere with or threaten to endanger the operation and maintenance of said line or system. The easement shall include only that part of the above described land located within 15 feet on each side of the proposed line.

The undersigned agree that all poles, wires and other facilities, installed on the above described lands at the Cooperative's expense shall remain the property of the Cooperative, removable at the option of the Cooperative.

The Cooperative agrees to pay a reasonable sum for any damage caused to crops or fences by the construction, operation, maintenance, or repair of said line or system. The overall operating height of vehicles and equipment known to cultivate or traverse lands within the easement, is less than fourteen (14) feet, unless otherwise noted below.

IN WITNESS WHEREOF, the undersigned have set their hands and seals this 25 day of June, 1980.

Signed, sealed and delivered in the presence of:

***West River Telecommunications Right-of-Way Easement***

We the undersigned, (whether one or more) **Jolene M. Rust**, Grantor(s), do hereby grant and convey unto ***West River Telecommunications Cooperative***, a cooperative corporation (hereafter called the "Cooperative"), grantee, whose address is P.O. Box 467, Hazen, North Dakota, and its respective successors, assigns, lessees and agents, an easement to survey, construct, repair, operate, upgrade, maintain, relocate, replace and remove such communication systems as the grantee may from time to time require, consisting of but not limited to cables, wires, poles, splicing boxes, and other appurtenances, upon, over and under the land which the undersigned owns or in which the undersigned has any interest in the County of ***Mercer***, State of ***North Dakota***, and more particularly described as follows:

***SW/4 Sec. 13 T142N R88W***

also the right of ingress and egress over and across the lands of the undersigned for the purpose of exercising the rights herein granted; to place surface markers beyond said strip, to clear and keep clear all trees, roots, brush and other obstructions from the surface and subsurface of said strip of land. The boundary of said strip shall be a line parallel to and 10 feet either side of the first cable laid on the land of the undersigned. The undersigned for Grantor(s), their heirs, executors, administrators, successors, and assigns, hereby covenants that no structure shall be erected on said strip.

The undersigned agrees that all poles, wire and other facilities, including telephone equipment, installed on the above described land, shall remain the property of the Cooperative, removable at the option of the Cooperative. The undersigned agrees to this easement with the understanding the Grantor(s), their heirs, executors, administrators, successors, and assigns, may continue to have access to and use of the easement area in any manner consistent with the rights herein granted to the Cooperative, and that the Cooperative will restore the said strip to as near as reasonable to the pre-constructed condition, and that the Cooperative will erect no buildings on said strip.

The undersigned covenant that they are the owners of the above described lands and that the said lands are free and clear of encumbrances and liens of whatsoever character except those held by the following persons:

The term of this easement shall be for as long as needed by the grantee, and until a release of this easement is recorded, but to not extend beyond the maximum term authorized by law.

Access is hereby granted for a state or federal historical survey of the cable route, should one be required, unless checked. Access denied ☐

# RIGHT OF WAY EASEMENT

THIS AGREEMENT made and entered into this 18<sup>th</sup> day of June, 2009, between **JOLENE RUST**, hereinafter called "Owner" (whether one or more) and **ROUGH RIDER ELECTRIC COOPERATIVE, INC.**, whose post office address is 800 Highway Drive, Hazen, North Dakota 58545-4737, hereinafter called "COOPERATIVE".

WITNESSETH that for valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Owner grants unto Cooperative, its successors and assigns, for a term of 99 years from the date hereof, an easement to construct, reconstruct, operate and maintain an electric distribution system, overhead, underground or both including all poles, guys, anchors wires, surface terminals, and all accessories and appurtenances necessary or desirable in connection therewith, under, over, upon and across lands of Owner and/or in or upon all streets, roads or highways abutting said lands situated in Mercer County, North Dakota, and more particularly described as follows, to-wit:

A strip of land 20 feet in width, the same being 10 feet on each side of a centerline described as follows.

TOWNSHIP 142 NORTH, RANGE 88 WEST  
Section 13: SW/4

The facilities erected hereunder shall remain the property of the Cooperative. Cooperative shall have the right to inspect, rebuild, remove, repair, improve and make such changes, alterations, substitutions and additions in and to its facilities as Cooperative may from time to time deem advisable, including the right to increase or decrease the size or capacity of its system, together with necessary accessories and appurtenances; the right to increase or decrease the size of the facilities and equipment situated upon the premises; the right to permit or otherwise agree to the joint use or occupancy of the overhead lines or the trench and related underground facilities by other persons, associations or corporations; and the right to at any time use the property described above to extend lines and facilities to serve the property of persons other than the Owner.

Any damages to the surface of the right-of-way or to crops, fences, gates, drains, ditches, or lines of the Owner, caused by the Cooperative in the installation, repair maintenance, reconstruction or removal of said electrical properties and appurtenances, shall be promptly repaired, replaced or paid for by the Cooperative, provided a claim therefore is presented to the Cooperative at its General Office within ninety (90) days after such damages occur. If the amount of said damages cannot be agreed upon, the Cooperative and the Owner shall each select an arbitrator, and these two shall select a third arbitrator, and the decision and award of the arbitrators shall be final.

Cooperative shall at all times have the right to keep the easement clear of all buildings, structures or other obstructions, trees, shrubbery, undergrowth and roots.

Owner, his successors and assigns, may use the land within the easement for any purpose not inconsistent with the rights granted, provided such use does not interfere with or endanger the Cooperative's facilities or the rights granted under this easement.

For the purpose of constructing, inspecting, maintaining or operating its facilities, Cooperative shall have the right of ingress to and egress from the easement over the lands of Owner adjacent to the easement and lying between public or private roads and the easement, such right to be exercised in such manner as shall occasion the least practicable damage and inconvenience to Owner.

Owner covenants that he is seized of and has the right to convey the said easement, rights and privileges; that Cooperative shall have quiet and peaceable possession, use and enjoyment of the aforesaid easement, rights and privileges, and that Owner shall execute such further assurances thereof as may be requested by the Cooperative.

## **PIPELINE EASEMENT**

North Dakota State Water Commission  
County of Mercer  
Parcel H-MER-129

### **ALL PERSONS TAKE NOTICE:**

That the undersigned, Jolene Rust, whether one or more, called the Grantor, being the owner of, or having an interest in, land situated in the County of Mercer, State of North Dakota, more fully described below, in consideration of One and No/100 Dollars (\$1.00) and other valuable consideration, does hereby grant, convey, and warrant to the State of North Dakota, acting by and through the North Dakota State Water Commission, a state agency and public corporation, with its principal office at 900 East Boulevard Ave., Bismarck, North Dakota 58505, called the Grantee, and to its successors and assigns, the right, privilege, and easement to construct, maintain, operate, inspect, repair, alter, replace, change the size of or remove a pipeline, and appurtenances thereto, for the transportation of water under, across, and through:

#### **Parcel H-MER-129**

A 40 foot wide strip of land 20 feet wide on each side of the pipeline centerline lying within the W1/2 SW1/4 Section 13, Township 142 North, Range 88 West of the 5th P.M.

Said tract contains 2.42 acres, more or less.

#### **Temporary Construction Easement**

An additional 20 feet of temporary right-of-way lying adjacent to the above described tract for a total construction easement width of 60 feet.

Said tract contains 1.21 acres, more or less.

together with the right to utilize additional land for a period up to three years from the date of this easement, adjacent to the above described tract, for purposes of temporary working space during initial construction of the pipeline, and the right of ingress to and egress from said strip of land across the adjacent lands of the Grantor, for the purposes specified above at the will of the Grantee.

### **THE GRANTOR AND THE GRANTEE FURTHER AGREE:**

1. **Use of right-of-way by Grantor.** Grantor reserves the right to use the surface of the easement strip provided, however, that Grantor, without prior approval of Grantee, shall neither construct nor permit to be constructed any building, structure, or other improvement upon the easement strip which would interfere with Grantee's exercise of the rights conveyed by this pipeline easement, including access to the easement strip.
2. **Appurtenances.** The Grantee shall have the right to install and construct necessary appurtenances upon the surface of the easement strip. Prior to construction, the Grantee will notify the Grantor of the approximate location of such appurtenances if any, to be located on the easement strip, and shall pay to the Grantor the sum of \$500 for each appurtenance located at a distance of more than 5 feet from a field boundary or fence line. Such payments shall be paid prior to construction.
3. **Damages.** The Grantee will pay to Grantor or Grantor's tenants, as their respective interests may appear, for damages caused by the operations or activities of the Grantee; provided, however, that the Grantee shall have the right, without liability for damages, to clear, and keep cleared, all trees, brush, and other obstructions from the easement strip that may, in the Grantee's judgment, interfere with the rights and privileges of the Grantee under this pipeline easement.

If the amount of any damage which Grantor may sustain as a result of Grantee's exercise of rights hereunder cannot be mutually agreed upon, such damages shall be ascertained and determined by three (3) disinterested person; one to be appointed by the Grantor, one by

Grantee, and a third by the two so appointed, and the award of such three persons shall be final and conclusive.

4. **Restoration of surface.** The Grantee will restore the surface of the construction area to its original contour as nearly as practicable.
5. **Topsoil segregation.** When excavating the pipeline trench with a backhoe/trackerhoe, the Grantee will remove the topsoil separately during the construction of the pipeline for the full width of the pipe trench to a depth of twelve (12) inches or the actual topsoil depth, whichever is less, and to be replaced at the top of the backfill over the pipe trench.
6. **Assignment and covenant by parties.** The rights of either party may be assigned in whole or in part. The terms and provisions of this easement shall constitute covenants running with the land and shall be binding upon, and inure to the benefit of, the parties hereto, their successors, assigns, personal representatives, and heirs.
7. **Grantor's title.** Grantor warrants that he is the owner of, or has an interest in, the land described in this easement, and that he has full right and authority to enter into and deliver this easement. This instrument may be executed in counterparts and each counterpart shall constitute a separate agreement between the parties thereto. Any payments pursuant to this pipeline easement shall be in proportion to the Grantor's interest in the undivided fee simple estate.
8. **Entire agreement.** This instrument contains the entire agreement of the parties and there are no other, or different, agreements or understandings between the Grantor and the Grantee, or its agents. The Grantor, in executing this pipeline easement, has not relied upon any promises, inducements, or representatives of the Grantee, or its agents, except as are set forth herein.
9. **Term of easement.** The term of this easement shall be as long as it is needed by the Grantee, or its assigns, and until a release of this easement is recorded, but shall not exceed ninety-nine (99) years pursuant to NDCC §47-05-02.1.
10. **Tenants.** The Grantor represents that the land described in this easement is (not rented) (rented to) Rick Bauman.

Dated this 1 day of July, 2010.

**RIGHT-OF-WAY EASEMENT**

**ALL PERSONS TAKE NOTICE:**

In consideration of one dollar (\$1.00) and other good and valuable consideration JOLENE RUST PO BOX 86 MERCER, ND 58559 hereinafter referred to as Grantor, does hereby grant, bargain, sell, transfer and convey to the Southwest Water Authority, hereinafter referred to as the Grantee, its successor and assigns, a perpetual easement with right to erect, construct, install and lay, and thereafter use, operate, inspect, repair, maintain, replace, and remove water pipelines, connections, valves and all other appurtenant facilities used in connection with the construction, operation and maintenance of the Southwest Pipeline Project, over, above, across and through the land of the Grantor, situated in Mercer County, State of North Dakota, said land being described as follows: SW1/4 LESS R/W SECTION 13 TOWNSHIP 142 RANGE 88 (the tract that contains 0.18 acres, more or less), together with the right of ingress and egress over the adjacent lands of the Grantor, successors and assigns for the purposes of this easement.

1. The permanent easement will be thirty (30) feet in width, fifteen (15) feet on each side of the center line of the pipeline as constructed, with an additional ten (10) feet of temporary right-of-way for a total construction easement width of forty (40) feet, twenty (20) feet on each side of the center line.
2. The Grantee covenants to maintain the easement in good repair so that no unreasonable damage will result from its use to the adjacent land of the Grantor, successors and assigns. The Grantor will receive compensation for damages to growing crops caused by the construction or operation. The Grantor will report any damages within three (3) years of the construction of the project.

The grant and other provisions of this easement shall constitute a covenant running with the land for the benefit of the Grantee, its successors and assigns.

IN WITNESS WHEREOF, the Grantor has executed this instrument this 28 day of March, 2014.

### MEMORANDUM OF LAND LEASE AGREEMENT

THIS MEMORANDUM OF LAND LEASE AGREEMENT is made this 14<sup>th</sup> day of November, 2008, between Jolene M. Rust and Ryan J. Rust, wife and husband, with a mailing address of 115 West Railroad Street, Mercer, North Dakota 58559, hereinafter referred to as ("LESSOR"), and Badlands Cellular of North Dakota Limited Partnership d/b/a Verizon Wireless, with its address for notice located at 180 Washington Valley Road, Bedminster, New Jersey 07921, hereinafter referred to as ("LESSEE"). LESSOR and LESSEE are at times collectively referred to hereinafter as the "Parties" or individually as the "Party".

1. LESSOR and LESSEE entered into a Land Lease Agreement (the "Agreement") on Nov. 14, 2008, for an initial term of five (5) years, commencing on the Commencement Date. The Agreement shall automatically be extended for four (4) additional five (5) year terms unless LESSEE terminates it at the end of the then current term by giving LESSOR written notice of the intent to terminate at least six (6) months prior to the end of the then current term. If at the end of the fourth (4<sup>th</sup>) five (5) year extension term the Agreement has not been terminated by either Party by giving to the other written notice of an intention to terminate it at least three (3) months prior to the end of such term, the Agreement shall continue in force upon the same covenants, terms and conditions for a further term of five (5) years and for five (5) year terms thereafter until terminated by either Party by giving to the other written notice of its intention to terminate at least three (3) months prior to the end of such term.

2. Pursuant to the Agreement, LESSOR leased to LESSEE a portion of that certain parcel of property (the entirety of LESSOR's property is referred to hereinafter as the "Property") located near the intersection of Mercer County Road 34 and North Dakota Highway 49, in the City of Beulah, County of Mercer, State of North Dakota, and being legally described on Exhibit "A", together with the non-exclusive right for ingress and egress, seven (7) days a week, twenty-four (24) hours a day, on foot or motor vehicle, including trucks, and for the installation and maintenance of utility wires, poles, cables, conduits, and pipes over, under, or along a right-of-way extending from the nearest public right-of-way, North Dakota Highway 49, to the demised premises. The demised premises and right-of-way are referred to as the "Premises." In the event any public utility is unable to use the aforementioned right-of-way, LESSOR has agreed to grant an additional right-of-way either to the LESSEE or to the public utility at no cost to the LESSEE.
3. The Agreement shall commence based upon the date LESSEE commences installation of the equipment on the Premises.
4. LESSEE has the right of first refusal to purchase the Premises during the initial term and all renewal terms of the Agreement.
5. The terms, covenants and provisions of the Agreement, the terms of which are hereby incorporated by reference into this Memorandum, shall extend to and be binding upon the respective executors, administrators, heirs, successors and assigns of LESSOR and LESSEE.

IN WITNESS WHEREOF, hereunto and to a duplicate hereof, LESSOR and LESSEE have caused this Memorandum to be duly executed on the date written herein below.

## DECLARATION OF GARY A. SMITH

---

[¶1] I, Gary A. Smith, declare, based on personal knowledge, as follows:

[¶2] I have ownership interest in the following property that lies within the boundaries of the Review Area of the proposed KJ Hintz Storage Facility.

- Township 142 North, Range 87 West  
Section 15: NE1/4  
Oliver County, ND

[¶3] To the best of my knowledge, the property listed in ¶ 2 above is encumbered by the following easements:

- Oliver-Mercer Electric Cooperative, Inc. Right-of-Way Easement executed by Ralph Smith on June 6, 1946 (91050).
- Roughrider Electric Cooperative, Inc. Right-of-Way Easement executed by Faye Swenson on August 11, 2014 (90519).

[¶4] I have ownership interest in the following properties that lie within the boundaries of the Review Area of the proposed BK Fischer Storage Facility:

- Township 142 North, Range 87 West  
Section 20: NE1/4  
Oliver County, ND
- Township 142 North, Range 87 West  
Section 23: W1/2  
Oliver County, ND

[¶5] To the best of my knowledge, the properties listed in ¶ 4 above are encumbered by the following easements:

- Section 20:
  - i. Oliver-Mercer Electric Cooperative, Inc. Right-of-Way Easement executed by George Fetch and Mrs. George Fetch on October 20, 1950 (91054).
  - ii. ND State Water Commission Pipeline Easement granted by John and Jordan Smith on March 25, 2011 (86782).

- Section 23:
  - i. ND State Water Commission Pipeline Easement granted by John and Jordan Smith on April 8, 2011 (86783).
  - ii. Southwest Water Authority Right-of-Way Easement executed by Jennifer Rudolph on May 26, 2015 (90466).
  - iii. Roughrider Electric Cooperative, Inc. Right-of-Way Easement executed by Gary Smith on February 25, 2016 (92455).

[¶6] I have ownership interest in the following properties that lie between, and will be impacted by, the proposed Storage Facilities:

- Township 142 North, Range 87 West  
Section 15: NW1/4  
Oliver County, ND
- Township 142 North, Range 87 West  
Section 22: SE1/4  
Oliver County, ND
- Township 142 North, Range 87 West  
Section 22: LOT A, within the SE1/4  
Oliver County, ND

described as follows;

COMMENCING at the East Quarter Corner of Section 22;  
 THENCE S 00°00'00" W, along the east line of Section 22, a distance of 120.00',  
 to the true point of beginning;  
 THENCE S 00°00'00" W, along said line, a distance of 660.00';  
 THENCE S 90°00'00" W, a distance of 660.00';  
 THENCE N 00°00'00" E, a distance of 660.00';  
 THENCE N 90°00'00" E, a distance of 660.00', back to the point of beginning.  
 This parcel contains 10.0 acres, more or less.

[¶7] To the best of my knowledge, the properties listed in ¶ 6 above are encumbered by the following easements:

- Section 15:
  - i. Roughrider Electric Cooperative, Inc. Right-of-Way Easement executed by Faye Swenson on August 11, 2014 (90519).

- Section 22:
  - i. Oliver-Mercer Electric Cooperative, Inc. Right-of-Way Easement executed by S.H. Tjaden and Hannah Tjaden on April 23, 1945 (91056).
  - ii. Southwest Water Authority Right-of-Way Easement executed by Jennifer Rudolph on May 26, 2015 (90466).

[¶8] Attached are the deeds which I believe indicate my ownership in each of the properties listed above.

[¶9] Attached are the easements currently encumbering these properties based on the information I have.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 3 day of June, 2024 at 7:18, ND, United States.

## WARRANTY DEED

THIS INDENTURE, Made this 30<sup>th</sup> day of September, in the year of our Lord two thousand fourteen, between JOHN A. SMITH, single, whose postoffice address is 2144 56<sup>th</sup> Avenue SW, Beulah, ND 58523, party of the first part, and GARY A. SMITH, whose postoffice address is 6800 81<sup>st</sup> Street NE, Bismarck, ND 58503, and JENNIFER L. RUDOLPH, whose post office address is 5400 Kayley Drive, Bismarck, ND 58504, parties of the second part;

WITNESSETH, That the said party of the first part, for and in consideration of the sum of ONE DOLLAR AND OTHER VALUABLE CONSIDERATION to him in hand paid by said parties of the second part, the receipt whereof is hereby acknowledged, does by these presents GRANT, BARGAIN, SELL AND CONVEY unto the said party of the second part, their heirs and assigns, FOREVER, all the tract or parcel of land lying and being in the County of Oliver and State of North Dakota, and described as follows, to-wit:

All of the Grantor's interest in the following:

TOWNSHIP 142 NORTH, RANGE 87 WEST:

Section 22: SW $\frac{1}{4}$  and E $\frac{1}{2}$

Section 23: W $\frac{1}{2}$

Section 24: E $\frac{1}{2}$ SW $\frac{1}{4}$ ; W $\frac{1}{2}$ SE $\frac{1}{4}$

Subject to all existing easements and rights of way, prior mineral reservations and to all exceptions, conditions, or limitations expressed in Government Patents or in deeds of record.

GRANTOR RESERVES UNTO HIMSELF, A LIFE ESTATE IN THE ABOVE DESCRIBED PROPERTY. THIS LIFE ESTATE SHALL INCLUDE THE RIGHT TO EXECUTE MINERAL LEASES AND RECEIVE ANY ROYALTIES PRODUCED FROM THIS REAL ESTATE DURING THE LIFE OF THE GRANTOR.

TO HAVE AND TO HOLD THE SAME, Together with all the hereditaments and appurtenances thereunto belonging or in anywise appertaining, to the said parties of the second part, their heirs and assigns FOREVER. And the said JOHN A. SMITH, single, said party of the first part, for himself, his heirs and assigns, that he is well seized in fee of the land and premises aforesaid, and has good right to sell and convey the same in manner and form aforesaid; that the same are free from all incumbrances,

and the above bargained and granted land and premises in the quiet and peaceable possession of said parties of the second part, their heirs and assigns, against all persons lawfully claiming or to claim the whole or any part thereof, the said party of the first part will warrant and defend.

## WARRANTY DEED

THIS INDENTURE, Made this 30<sup>th</sup> day of September, in the year of our Lord two thousand fourteen, between JOHN A. SMITH, single, whose postoffice address is 2144 56<sup>th</sup> Avenue SW, Beulah, ND 58523, party of the first part, and GARY A. SMITH, whose postoffice address is 6800 81<sup>st</sup> Street NE, Bismarck, ND 58503, and JENNIFER L. RUDOLPH, whose post office address is 5400 Kayley Drive, Bismarck, ND 58504, parties of the second part;

WITNESSETH, That the said party of the first part, for and in consideration of the sum of ONE DOLLAR AND OTHER VALUABLE CONSIDERATION to him in hand paid by said parties of the second part, the receipt whereof is hereby acknowledged, does by these presents GRANT, BARGAIN, SELL AND CONVEY unto the said party of the second part, their heirs and assigns, FOREVER, all the tract or parcel of land lying and being in the County of Oliver and State of North Dakota, and described as follows, to-wit:

All of the Grantor's interest in the following:

TOWNSHIP 142 NORTH, RANGE 87 WEST:

Section 22: SW $\frac{1}{4}$  and E $\frac{1}{2}$

Section 23: W $\frac{1}{2}$

Section 24: E $\frac{1}{2}$ SW $\frac{1}{4}$ ; W $\frac{1}{2}$ SE $\frac{1}{4}$

Subject to all existing easements and rights of way, prior mineral reservations and to all exceptions, conditions, or limitations expressed in Government Patents or in deeds of record.

GRANTOR RESERVES UNTO HIMSELF, A LIFE ESTATE IN THE ABOVE DESCRIBED PROPERTY. THIS LIFE ESTATE SHALL INCLUDE THE RIGHT TO EXECUTE MINERAL LEASES AND RECEIVE ANY ROYALTIES PRODUCED FROM THIS REAL ESTATE DURING THE LIFE OF THE GRANTOR.

TO HAVE AND TO HOLD THE SAME, Together with all the hereditaments and appurtenances thereunto belonging or in anywise appertaining, to the said parties of the second part, their heirs and assigns FOREVER. And the said JOHN A. SMITH, single, said party of the first part, for himself, his heirs and assigns, that he is well seized in fee of the land and premises aforesaid, and has good right to sell and convey the same in manner and form aforesaid; that the same are free from all incumbrances,

and the above bargained and granted land and premises in the quiet and peaceable possession of said parties of the second part, their heirs and assigns, against all persons lawfully claiming or to claim the whole or any part thereof, the said party of the first part will warrant and defend.

RIGHT-OF-WAY EASEMENT

TO YTMUCC

KNOW ALL MEN BY THESE PRESENTS, that the undersigned

Ralph Smith (single)

for a good and valuable consideration, the receipt whereof is hereby acknowledged, does hereby grant unto the Oliver-Mercer Electric Cooperative, Inc. a as a corporation, whose post office address is Hazen, N. Dak. North Dakota, and to its successors or assigns, the right to enter upon the lands of the undersigned, situated in the county of Oliver, State of North Dakota and more particularly described as follows:

Section 15, 142-87, T14S, R10E, N14W

State of North Dakota

and to place, construct, operate, repair, maintain, relocate and replace thereon and in or upon all streets, roads or highways abutting said lands an electric transmission or distribution line or system, and to cut and trim trees and shrubbery to the extent necessary to keep them clear of said electric line or system and to cut down from time to time all dead, weak, leaning or dangerous trees that are tall enough to strike the wires in falling.

In granting this easement it is understood that at pole locations, only a single pole and arrangement will be used, and that the location of the pole will be such as to form the least possible interference to farm operations, so long as it does not materially increase the cost of construction.

The undersigned covenants that he is the owner of the above described lands and that the said lands are free and clear of encumbrances and liens of whatsoever character except those held by the following persons:

It is further understood that, whenever necessary, words in this instrument in the singular shall be construed to read in the plural and that words used in the masculine gender shall be construed to read in the feminine.

IN WITNESS WHEREOF, the undersigned has set his hand and seal this 21st day of June, 1946

Signed, sealed and delivered in the presence of:

Ralph Smith

RIGHT OF WAY EASEMENT

THIS AGREEMENT made and entered into this 11<sup>th</sup> day of AUGUST, 2014, between Faye Swenson, hereinafter called "Owner" (whether one or more) and **ROUGH RIDER ELECTRIC COOPERATIVE, INC.**, whose post office address is 800 Highway Drive, Hazen, North Dakota 58545-4737, hereinafter called "COOPERATIVE".

WITNESSETH that for valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Owner grants unto Cooperative, its successors and assigns, for a term of 99 years from the date hereof, an easement to construct, reconstruct, operate and maintain an electric distribution system, overhead, underground or both including all poles, guys, anchors wires, surface terminals, and all accessories and appurtenances necessary or desirable in connection therewith, under, over, upon and across lands of Owner and/or in or upon all streets, roads or highways abutting said lands situated in Oliver County, North Dakota, and more particularly described as follows, to-wit:

A strip of land 20 feet in width, the same being 10 feet on each side of a centerline described as follows.

TOWNSHIP 142 NORTH, RANGE 87 WEST  
Section 15

The facilities erected hereunder shall remain the property of the Cooperative. Cooperative shall have the right to inspect, rebuild, remove, repair, improve and make such changes, alterations, substitutions and additions in and to its facilities as Cooperative may from time to time deem advisable, including the right to increase or decrease the size or capacity of its system, together with necessary accessories and appurtenances; the right to increase or decrease the size of the facilities and equipment situated upon the premises; the right to permit or otherwise agree to the joint use or occupancy of the overhead lines or the trench and related underground facilities by other persons, associations or corporations; and the right to at any time use the property described above to extend lines and facilities to serve the property of persons other than the Owner.

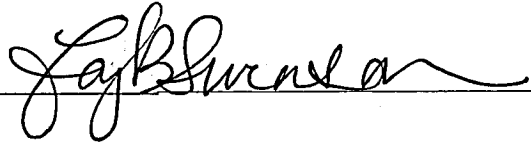

Any damages to the surface of the right-of-way or to crops, fences, gates, drains, ditches, or lines of the Owner, caused by the Cooperative in the installation, repair maintenance, reconstruction or removal of said electrical properties and appurtenances, shall be promptly repaired, replaced or paid for by the Cooperative, provided a claim therefore is presented to the Cooperative at its General Office within ninety (90) days after such damages occur. If the amount of said damages cannot be agreed upon, the Cooperative and the Owner shall each select an arbitrator, and these two shall select a third arbitrator, and the decision and award of the arbitrators shall be final.

Cooperative shall at all times have the right to keep the easement clear of all buildings, structures or other obstructions, trees, shrubbery, undergrowth and roots.

Owner, his successors and assigns, may use the land within the easement for any purpose not inconsistent with the rights granted, provided such use does not interfere with or endanger the Cooperative's facilities or the rights granted under this easement.

For the purpose of constructing, inspecting, maintaining or operating its facilities, Cooperative shall have the right of ingress to and egress from the easement over the lands of Owner adjacent to the easement and lying between public or private roads and the easement, such right to be exercised in such manner as shall occasion the least practicable damage and inconvenience to Owner.

Owner covenants that he is seized of and has the right to convey the said easement, rights and privileges; that Cooperative shall have quiet and peaceable possession, use and enjoyment of the aforesaid easement, rights and privileges, and that Owner shall execute such further assurances thereof as may be requested by the Cooperative.

#### Parcel H-OL-138

A 40 foot wide strip of land 20 feet wide on each side of the pipeline centerline lying within the NE1/4 Section 20, Township 142 North, Range 87 West of the 5th P.M.

Said tract contains 2.42 acres, more or less.

#### Temporary Construction Easement

An additional 20 feet of temporary right-of-way lying adjacent to the above described tract for a total construction easement width of 60 feet.

Said tract contains 1.21 acres, more or less.

together with the right to utilize additional land for a period up to three years from the date of this easement, adjacent to the above described tract, for purposes of temporary working space during initial construction of the pipeline, and the right of ingress to and egress from said strip of land across the adjacent lands of the Grantor, for the purposes specified above at the will of the Grantee.

### **THE GRANTOR AND THE GRANTEE FURTHER AGREE:**

- Use of right-of-way by Grantor.** Grantor reserves the right to use the surface of the easement strip provided, however, that Grantor, without prior approval of Grantee, shall neither construct nor permit to be constructed any building, structure, or other improvement upon the easement strip which would interfere with Grantee's exercise of the rights conveyed by this pipeline easement, including access to the easement strip.
- Appurtenances.** The Grantee shall have the right to install and construct necessary appurtenances upon the surface of the easement strip. Prior to construction, the Grantee will notify the Grantor of the approximate location of such appurtenances if any, to be located on the easement strip, and shall pay to the Grantor the sum of \$500 for each appurtenance located at a distance of more than 5 feet from a field boundary or fence line. Such payments shall be paid prior to construction.
- Damages.** The Grantee will pay to Grantor or Grantor's tenants, as their respective interests may appear, for damages caused by the operations or activities of the Grantee; provided, however, that the Grantee shall have the right, without liability for damages, to clear, and keep cleared, all trees, brush, and other obstructions from the easement strip that may, in the Grantee's judgment, interfere with the rights and privileges of the Grantee under this pipeline easement.

If the amount of any damage which Grantor may sustain as a result of Grantee's exercise of rights hereunder cannot be mutually agreed upon, such damages shall be ascertained and

determined by three (3) disinterested person; one to be appointed by the Grantor, one by Grantee, and a third by the two so appointed, and the award of such three persons shall be final and conclusive.

4. **Restoration of surface.** The Grantee will restore the surface of the construction area to its original contour as nearly as practicable.
5. **Topsoil segregation.** When excavating the pipeline trench with a backhoe/trackhoe, the Grantee will remove the topsoil separately during the construction of the pipeline for the full width of the pipe trench to a depth of twelve (12) inches or the actual topsoil depth, whichever is less, and to be replaced at the top of the backfill over the pipe trench.
6. **Assignment and covenant by parties.** The rights of either party may be assigned in whole or in part. The terms and provisions of this easement shall constitute covenants running with the land and shall be binding upon, and inure to the benefit of, the parties hereto, their successors, assigns, personal representatives, and heirs.
7. **Grantor's title.** Grantor warrants that he is the owner of, or has an interest in, the land described in this easement, and that he has full right and authority to enter into and deliver this easement. This instrument may be executed in counterparts and each counterpart shall constitute a separate agreement between the parties thereto. Any payments pursuant to this pipeline easement shall be in proportion to the Grantor's interest in the undivided fee simple estate.
8. **Entire agreement.** This instrument contains the entire agreement of the parties and there are no other, or different, agreements or understandings between the Grantor and the Grantee, or its agents. The Grantor, in executing this pipeline easement, has not relied upon any promises, inducements, or representatives of the Grantee, or its agents, except as are set forth herein.
9. **Term of easement.** The term of this easement shall be as long as it is needed by the Grantee, or its assigns, and until a release of this easement is recorded, but shall not exceed ninety-nine (99) years pursuant to NDCC §47-05-02.1.
10. **Tenants.** The Grantor represents that the land described in this easement is (not rented) (rented to) \_\_\_\_\_.

Dated this 23<sup>rd</sup> day of May, 2011.

**ALL PERSONS TAKE NOTICE:**

That the undersigned, Rose M. Heth, called the Grantor, being the owner of, or having an interest in, land situated in the County of Oliver, State of North Dakota, more fully described below, in consideration of One and No/100 Dollars (\$1.00) and other valuable consideration, does hereby grant, convey, and warrant to the State of North Dakota, acting by and through the North Dakota State Water Commission, a state agency and public corporation, with its principal office at 900 East Boulevard Ave., Bismarck, North Dakota 58505, called the Grantee, and to its successors and assigns, the right, privilege, and easement to construct, maintain, operate, inspect, repair, alter, replace, change the size of or remove a pipeline, and appurtenances thereto, for the transportation of water under, across, and through:

**Parcel H-OL-138**

A 40 foot wide strip of land 20 feet wide on each side of the pipeline centerline lying within the NE1/4 Section 20, Township 142 North, Range 87 West of the 5th P.M.

Said tract contains 2.42 acres, more or less.

**Temporary Construction Easement**

An additional 20 feet of temporary right-of-way lying adjacent to the above described tract for a total construction easement width of 60 feet.

Said tract contains 1.21 acres, more or less.

together with the right to utilize additional land for a period up to three years from the date of this easement, adjacent to the above described tract, for purposes of temporary working space during initial construction of the pipeline, and the right of ingress to and egress from said strip of land across the adjacent lands of the Grantor, for the purposes specified above at the will of the Grantee.

**THE GRANTOR AND THE GRANTEE FURTHER AGREE:**

- 1. Use of right-of-way by Grantor.** Grantor reserves the right to use the surface of the easement strip provided, however, that Grantor, without prior approval of Grantee, shall neither construct nor permit to be constructed any building, structure, or other improvement upon the easement strip which would interfere with Grantee's exercise of the rights conveyed by this pipeline easement, including access to the easement strip.
- 2. Appurtenances.** The Grantee shall have the right to install and construct necessary appurtenances upon the surface of the easement strip. Prior to construction, the Grantee will notify the Grantor of the approximate location of such appurtenances if any, to be located on the easement strip, and shall pay to the Grantor the sum of \$500 for each appurtenance located at a distance of more than 5 feet from a field boundary or fence line. Such payments shall be paid prior to construction.
- 3. Damages.** The Grantee will pay to Grantor or Grantor's tenants, as their respective interests may appear, for damages caused by the operations or activities of the Grantee; provided, however, that the Grantee shall have the right, without liability for damages, to clear, and keep cleared, all trees, brush, and other obstructions from the easement strip that may, in the Grantee's judgment, interfere with the rights and privileges of the Grantee under this pipeline easement.

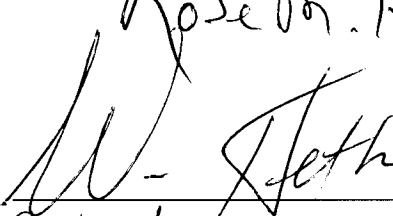

If the amount of any damage which Grantor may sustain as a result of Grantee's exercise of rights hereunder cannot be mutually agreed upon, such damages shall be ascertained and determined by three (3) disinterested person; one to be appointed by the Grantor, one by

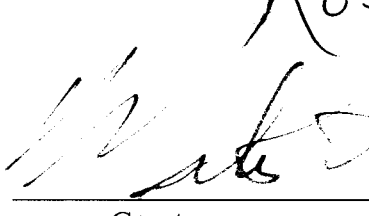

Grantee, and a third by the two so appointed, and the award of such three persons shall be final and conclusive.

4. **Restoration of surface.** The Grantee will restore the surface of the construction area to its original contour as nearly as practicable.
5. **Topsoil segregation.** When excavating the pipeline trench with a backhoe/trackerhoe, the Grantee will remove the topsoil separately during the construction of the pipeline for the full width of the pipe trench to a depth of twelve (12) inches or the actual topsoil depth, whichever is less, and to be replaced at the top of the backfill over the pipe trench.
6. **Assignment and covenant by parties.** The rights of either party may be assigned in whole or in part. The terms and provisions of this easement shall constitute covenants running with the land and shall be binding upon, and inure to the benefit of, the parties hereto, their successors, assigns, personal representatives, and heirs.
7. **Grantor's title.** Grantor warrants that he is the owner of, or has an interest in, the land described in this easement, and that he has full right and authority to enter into and deliver this easement. This instrument may be executed in counterparts and each counterpart shall constitute a separate agreement between the parties thereto. Any payments pursuant to this pipeline easement shall be in proportion to the Grantor's interest in the undivided fee simple estate.
8. **Entire agreement.** This instrument contains the entire agreement of the parties and there are no other, or different, agreements or understandings between the Grantor and the Grantee, or its agents. The Grantor, in executing this pipeline easement, has not relied upon any promises, inducements, or representatives of the Grantee, or its agents, except as are set forth herein.
9. **Term of easement.** The term of this easement shall be as long as it is needed by the Grantee, or its assigns, and until a release of this easement is recorded, but shall not exceed ninety-nine (99) years pursuant to NDCC §47-05-02.1.
10. **Tenants.** The Grantor represents that the land described in this easement is (~~not rented~~) (rented to) Hidnell Doll & Lance Doll thru 12-31-2012.

### **ALL PERSONS TAKE NOTICE:**

That the undersigned, John Smith and Jordan Smith, called the Grantor, being the owner of, or having an interest in, land situated in the County of Oliver, State of North Dakota, more fully described below, in consideration of One and No/100 Dollars (\$1.00) and other valuable consideration, does hereby grant, convey, and warrant to the State of North Dakota, acting by and through the North Dakota State Water Commission, a state agency and public corporation, with its principal office at 900 East Boulevard Ave., Bismarck, North Dakota 58505, called the Grantee, and to its successors and assigns, the right, privilege, and easement to construct, maintain, operate, inspect, repair, alter, replace, change the size of or remove a pipeline, and appurtenances thereto, for the transportation of water under, across, and through:

#### Parcel H-OL-138

A 40 foot wide strip of land 20 feet wide on each side of the pipeline centerline lying within the NE1/4 Section 20, Township 142 North, Range 87 West of the 5th P.M.

Said tract contains 2.42 acres, more or less.

#### Temporary Construction Easement

An additional 20 feet of temporary right-of-way lying adjacent to the above described tract for a total construction easement width of 60 feet.

Said tract contains 1.21 acres, more or less.

together with the right to utilize additional land for a period up to three years from the date of this easement, adjacent to the above described tract, for purposes of temporary working space during initial construction of the pipeline, and the right of ingress to and egress from said strip of land across the adjacent lands of the Grantor, for the purposes specified above at the will of the Grantee.

### **THE GRANTOR AND THE GRANTEE FURTHER AGREE:**

- Use of right-of-way by Grantor.** Grantor reserves the right to use the surface of the easement strip provided, however, that Grantor, without prior approval of Grantee, shall neither construct nor permit to be constructed any building, structure, or other improvement upon the easement strip which would interfere with Grantee's exercise of the rights conveyed by this pipeline easement, including access to the easement strip.
- Appurtenances.** The Grantee shall have the right to install and construct necessary appurtenances upon the surface of the easement strip. Prior to construction, the Grantee will notify the Grantor of the approximate location of such appurtenances if any, to be located on the easement strip, and shall pay to the Grantor the sum of \$500 for each appurtenance located at a distance of more than 5 feet from a field boundary or fence line. Such payments shall be paid prior to construction.
- Damages.** The Grantee will pay to Grantor or Grantor's tenants, as their respective interests may appear, for damages caused by the operations or activities of the Grantee; provided, however, that the Grantee shall have the right, without liability for damages, to clear, and keep cleared, all trees, brush, and other obstructions from the easement strip that may, in the Grantee's judgment, interfere with the rights and privileges of the Grantee under this pipeline easement.

If the amount of any damage which Grantor may sustain as a result of Grantee's exercise of rights hereunder cannot be mutually agreed upon, such damages shall be ascertained and determined by three (3) disinterested person; one to be appointed by the Grantor, one by

Grantee, and a third by the two so appointed, and the award of such three persons shall be final and conclusive.

4. **Restoration of surface.** The Grantee will restore the surface of the construction area to its original contour as nearly as practicable.
5. **Topsoil segregation.** When excavating the pipeline trench with a backhoe/trackhoe, the Grantee will remove the topsoil separately during the construction of the pipeline for the full width of the pipe trench to a depth of twelve (12) inches or the actual topsoil depth, whichever is less, and to be replaced at the top of the backfill over the pipe trench.
6. **Assignment and covenant by parties.** The rights of either party may be assigned in whole or in part. The terms and provisions of this easement shall constitute covenants running with the land and shall be binding upon, and inure to the benefit of, the parties hereto, their successors, assigns, personal representatives, and heirs.
7. **Grantor's title.** Grantor warrants that he is the owner of, or has an interest in, the land described in this easement, and that he has full right and authority to enter into and deliver this easement. This instrument may be executed in counterparts and each counterpart shall constitute a separate agreement between the parties thereto. Any payments pursuant to this pipeline easement shall be in proportion to the Grantor's interest in the undivided fee simple estate.
8. **Entire agreement.** This instrument contains the entire agreement of the parties and there are no other, or different, agreements or understandings between the Grantor and the Grantee, or its agents. The Grantor, in executing this pipeline easement, has not relied upon any promises, inducements, or representatives of the Grantee, or its agents, except as are set forth herein.
9. **Term of easement.** The term of this easement shall be as long as it is needed by the Grantee, or its assigns, and until a release of this easement is recorded, but shall not exceed ninety-nine (99) years pursuant to NDCC §47-05-02.1.
10. **Tenants.** The Grantor represents that the land described in this easement is (not rented) (rented to) Linnel & Lance Doll.

COUNTY OF OLIVER  
Filed for record this 16 day  
of Sept A.D. 2011  
at 11:57 o'clock A M.,  
and recorded as document No. 86783  
in book FF of Misc page 413-415  
D. Wilkins  
County Recorder Deputy 16

**ALL PERSONS TAKE NOTICE:**

That the undersigned, John Smith and Jordan Smith, whether one or more, called the Grantor, being the owner of, or having an interest in, land situated in the County of Oliver, State of North Dakota, more fully described below, in consideration of One and No/100 Dollars (\$1.00) and other valuable consideration, does hereby grant, convey, and warrant to the State of North Dakota, acting by and through the North Dakota State Water Commission, a state agency and public corporation, with its principal office at 900 East Boulevard Ave., Bismarck, North Dakota 58505, called the Grantee, and to its successors and assigns, the right, privilege, and easement to construct, maintain, operate, inspect, repair, alter, replace, change the size of or remove a pipeline, and appurtenances thereto, for the transportation of water under, across, and through:

**Parcel H-OL-142**

A 40 foot wide strip of land 20 feet wide on each side of the pipeline centerline lying within the North 200 feet of the East 200 feet of the NE1/4 Section 22, Township 142 North, Range 87 West of the 5th P.M.

Said tract contains 0.18 acres, more or less.

**Temporary Construction Easement**

An additional 20 feet of temporary right-of-way lying adjacent to the above described tract for a total construction easement width of 60 feet.

Said tract contains 0.10 acres, more or less.

**Parcel H-OL-144**

A 40 foot wide strip of land 20 feet wide on each side of the pipeline centerline lying within the NW1/4 Section 23, Township 142 North, Range 87 West of the 5th P.M.

Said tract contains 2.42 acres, more or less.

**Temporary Construction Easement**

An additional 20 feet of temporary right-of-way lying adjacent to the above described tract for a total construction easement width of 60 feet.

Said tract contains 1.21 acres, more or less.

together with the right to utilize additional land for a period up to three years from the date of this easement, adjacent to the above described tract, for purposes of temporary working space during initial construction of the pipeline, and the right of ingress to and egress from said strip of land across the adjacent lands of the Grantor, for the purposes specified above at the will of the Grantee.

**THE GRANTOR AND THE GRANTEE FURTHER AGREE:**

- Use of right-of-way by Grantor.** Grantor reserves the right to use the surface of the easement strip provided, however, that Grantor, without prior approval of Grantee, shall neither construct nor permit to be constructed any building, structure, or other improvement upon the easement strip which would interfere with Grantee's exercise of the rights conveyed by this pipeline easement, including access to the easement strip.

2. **Appurtenances.** The Grantee shall have the right to install and construct necessary appurtenances upon the surface of the easement strip. Prior to construction, the Grantee will notify the Grantor of the approximate location of such appurtenances if any, to be located on the easement strip, and shall pay to the Grantor the sum of \$500 for each appurtenance located at a distance of more than 5 feet from a field boundary or fence line. Such payments shall be paid prior to construction.
3. **Damages.** The Grantee will pay to Grantor or Grantor's tenants, as their respective interests may appear, for damages caused by the operations or activities of the Grantee; provided, however, that the Grantee shall have the right, without liability for damages, to clear, and keep cleared, all trees, brush, and other obstructions from the easement strip that may, in the Grantee's judgment, interfere with the rights and privileges of the Grantee under this pipeline easement.

If the amount of any damage which Grantor may sustain as a result of Grantee's exercise of rights hereunder cannot be mutually agreed upon, such damages shall be ascertained and determined by three (3) disinterested person; one to be appointed by the Grantor, one by Grantee, and a third by the two so appointed, and the award of such three persons shall be final and conclusive.

4. **Restoration of surface.** The Grantee will restore the surface of the construction area to its original contour as nearly as practicable.
5. **Topsoil segregation.** When excavating the pipeline trench with a backhoe/trackhoe, the Grantee will remove the topsoil separately during the construction of the pipeline for the full width of the pipe trench to a depth of twelve (12) inches or the actual topsoil depth, whichever is less, and to be replaced at the top of the backfill over the pipe trench.
6. **Assignment and covenant by parties.** The rights of either party may be assigned in whole or in part. The terms and provisions of this easement shall constitute covenants running with the land and shall be binding upon, and inure to the benefit of, the parties hereto, their successors, assigns, personal representatives, and heirs.
7. **Grantor's title.** Grantor warrants that he is the owner of, or has an interest in, the land described in this easement, and that he has full right and authority to enter into and deliver this easement. This instrument may be executed in counterparts and each counterpart shall constitute a separate agreement between the parties thereto. Any payments pursuant to this pipeline easement shall be in proportion to the Grantor's interest in the undivided fee simple estate.
8. **Entire agreement.** This instrument contains the entire agreement of the parties and there are no other, or different, agreements or understandings between the Grantor and the Grantee, or its agents. The Grantor, in executing this pipeline easement, has not relied upon any promises, inducements, or representatives of the Grantee, or its agents, except as are set forth herein.
9. **Term of easement.** The term of this easement shall be as long as it is needed by the Grantee, or its assigns, and until a release of this easement is recorded, but shall not exceed ninety-nine (99) years pursuant to NDCC §47-05-02.1.
10. **Tenants.** The Grantor represents that the land described in this easement is (not rented) (rented to) \_\_\_\_\_.

## RIGHT-OF-WAY EASEMENT

### ALL PERSONS TAKE NOTICE:

In consideration of one dollar (\$1.00) and other good and valuable consideration JORDAN B. SMITH 36497 320<sup>TH</sup> ST. BENSON, MN 56215 hereinafter referred to as Grantor, does hereby grant, bargain, sell, transfer and convey to the Southwest Water Authority, hereinafter referred to as the Grantee, its successor and assigns, a perpetual easement with right to erect, construct, install and lay, and thereafter use, operate, inspect, repair, maintain, replace, and remove water pipelines, connections, valves and all other appurtenant facilities used in connection with the construction, operation and maintenance of the Southwest Pipeline Project, over, above, across and through the land of the Grantor, situated in Oliver County, State of North Dakota, said land being described as follows: SE1/4 SECTION 22 & NW1/4, SW1/4 SECTION 23 TOWNSHIP 142 RANGE 87 (the tract that contains 6.38 acres, more or less), together with the right of ingress and egress over the adjacent lands of the Grantor, successors and assigns for the purposes of this easement.

1. The permanent easement will be thirty (30) feet in width, fifteen (15) feet on each side of the center line of the pipeline as constructed, with an additional ten (10) feet of temporary right-of-way for a total construction easement width of forty (40) feet, twenty (20) feet on each side of the center line.

2. The Grantee covenants to maintain the easement in good repair so that no unreasonable damage will result from its use to the adjacent land of the Grantor, successors and assigns. The Grantor will receive compensation for damages to growing crops caused by the construction or operation. The Grantor will report any damages within three (3) years of the construction of the project.

The grant and other provisions of this easement shall constitute a covenant running with the land for the benefit of the Grantee, its successors and assigns.

IN WITNESS WHEREOF, the Grantor has executed this instrument this 29 day of May, 2015.

## RIGHT OF WAY EASEMENT

THIS AGREEMENT made and entered into this 25<sup>th</sup> day of February, 2016, between Jennifer Rudolph of 5400 Kayley Drive, Bismarck, ND 58504, hereinafter called "Owner" (whether one or more) and ROUGHRIDER ELECTRIC COOPERATIVE, INC., whose post office address is 800 Highway Drive, Hazen, North Dakota 58545-4737, hereinafter called "COOPERATIVE".

WITNESSETH that for valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Owner grants unto Cooperative, its successors and assigns, for a term of 99 years from the date hereof, an easement to construct, reconstruct, operate and maintain an electric distribution system, overhead, underground or both including all poles, guys, anchors wires, surface terminals, and all accessories and appurtenances necessary or desirable in connection therewith, under, over, upon and across lands of Owner and/or in or upon all streets, roads or highways abutting said lands situated in Oliver County, North Dakota, and more particularly described as follows, to-wit:

A parcel of land in the W1/2 of Section 23, Township 142 North, Range 87 West of the Fifth Principal Meridian, 20 feet in width, 10 feet on each side of a centerline described as follows:

Beginning at the east line of the northwest corner of Section 23, Township 142 North, Range 87 West, at a point which bears S87°41'07"E a distance of 2634.65 feet from the northwest corner of Section 23, Township 142N, Range 87W; thence N89°21'16"W a distance of 2599.21 feet; thence S0°56'27"W a distance of 5192.35 feet more or less; to the POINT OF TERMINATION at the south line of the southwest quarter of Section 23, Township 142N, Range 87W, at a point which bears N1°48'17"E a distance of 2637.57 feet from the west quarter of Section 26, Township 142N, Range 87W.

In Section 23, Township 142 North, Range 87 West of the Fifth Principal Meridian described as follows:

The facilities erected hereunder shall remain the property of the Cooperative. Cooperative shall have the right to inspect, rebuild, remove, repair, improve and make such changes, alterations, substitutions and additions in and to its facilities as Cooperative may from time to time deem advisable, including the right to increase or decrease the size or capacity of its system, together with necessary accessories and appurtenances; the right to increase or decrease the size of the facilities and equipment situated upon the premises; the right to permit or otherwise agree to the joint use or occupancy of the overhead lines or the trench and related underground facilities by other persons, associations or corporations; and the right to at any time use the property described above to extend lines and facilities to serve the property of persons other than the Owner.

Any damages to the surface of the right-of-way or to crops, fences, gates, drains, ditches, or lines of the Owner, caused by the Cooperative in the installation, repair maintenance, reconstruction or removal of said electrical properties and appurtenances, shall be promptly repaired, replaced or paid for by the Cooperative, provided a claim therefore is presented to the Cooperative at its General Office within ninety (90) days after such damages occur. If the amount of said damages cannot be agreed upon, the Cooperative and the Owner shall each select an arbitrator, and these two shall select a third arbitrator, and the decision and award of the arbitrators shall be final.

Cooperative shall at all times have the right to keep the easement clear of all buildings, structures or other obstructions, trees, shrubbery, undergrowth and roots.

Owner, his successors and assigns, may use the land within the easement for any purpose not inconsistent with the rights granted, provided such use does not interfere with or endanger the Cooperative's facilities or the rights granted under this easement.

For the purpose of constructing, inspecting, maintaining or operating its facilities, Cooperative shall have the right of ingress to and egress from the easement over the lands of Owner adjacent to the easement and lying between public or private roads and the easement, such right to be exercised in such manner as shall occasion the least practicable damage and inconvenience to Owner.

Owner covenants that he is seized of and has the right to convey the said easement, rights and privileges; that Cooperative shall have quiet and peaceable possession, use and enjoyment of the aforesaid easement, rights and privileges, and that Owner shall execute such further assurances thereof as may be requested by the Cooperative.

RIGHT-OF-WAY EASEMENT TO YTHUOO

KNOW ALL MEN BY THESE PRESENTS that the undersigned and to him at

S. H. Tjaden and Hannah Tjaden (wife) for a good and valuable consid-  
eration, the receipt whereof is hereby acknowledged, does hereby grant unto the  
Oliver-Mercer Electric Cooperative, Inc. a corporation, whose post office address is Hazen, N. Dak.  
North Dakota, and to its successors or assigns, the right to enter upon the lands of the undersigned, situated in the county of  
of Oliver, State of North Dakota and more particu-

larly described as follows:

Sec. 22 Township 142-87 North Dakota

and to place, construct, operate, repair, maintain, relocate and replace thereon and in or upon all streets, roads or highways abutting said lands an electric transmission or distribution line or system, and to cut and trim trees and shrubbery to the extent necessary to keep them clear of said electric line or system and to cut down from time to time all dead, weak, leaning or dangerous trees that are tall enough to strike the wires in falling.

In granting this easement it is understood that at pole locations, only a single pole and arrangement will be used, and that the location of the pole will be such as to form the least possible interference to farm operations, so long as it does not materially increase the cost of construction.

The undersigned covenants that he is the owner of the above described lands and that the said lands are free and clear of encumbrances and liens of whatsoever character except those held by the following persons:

None

(S)  
It is further understood that, whenever necessary, words in this instrument in the singular shall be construed to read in the plural and that words used in the masculine gender shall be construed to read in the feminine.

IN WITNESS WHEREOF, the undersigned have set their hands and seals this 23rd day of April, 1945.

Signed, sealed and delivered in the presence of:

Edna Michael Hannah Tjaden

## DECLARATION OF KURT SWENSON

---

[¶1] I, Kurt Swenson, as trustee of The Swenson Living Trust, declare, on behalf of the Trust and based on personal knowledge, as follows :

[¶2] I have ownership interest in the following properties that lie within the boundaries of the proposed BK Fischer Storage Facility.

- Township 142 North, Range 87 West  
Section 7: Outlot B in E1/2 NW1/4 LESS Lot One  
Oliver County, ND
- Township 142 North, Range 88 West  
Section 14: W1/2 NE1/4  
Mercer County, ND
- Township 143 North, Range 88 West  
Section 27: S1/2 SE1/4  
Mercer County, ND

[¶3] To the best of my knowledge, the properties listed in ¶ 2 above are encumbered by the following easements:

- Section 7:
  - i. Southwest Water Authority Easement executed by James Kusler, Johnell Kusler, and Milda Hedblom dated February 3, 2014 (90188/90189/90190).
  - ii. Trent T. Martin Easement (Water Well and Tank) executed by Johnell Kusler (PR), et al. and dated May 31, 2022 (97087).
  - iii. Trent T. Martin Easement (Corrected Reciprocal Access) executed by Johnell Kusler (PR), et al. and dated May 31, 2022 (97731).
- Section 14:
  - i. Oliver-Mercer Electric Coop Easement executed by John Scheidt and dated April 22, 1949 (209412).
  - ii. Oliver-Mercer Electric Coop Easement executed by Gladys Scheidt and dated July 3, 1990 (209427).
  - iii. West River Telecommunications Coop Easement executed by Gladys Scheidt and dated June 29, 1993 (153687).

- Section 27:
  - i. Oliver-Mercer Electric Coop Easement executed by Leland Erickson and dated November 6, 1974 (208123).
  - ii. Southwest Water Authority Easement executed by James Kusler and dated February 3, 2014 (211517).
  - iii. Roughrider Electric Coop, Inc. Right of Way Easement executed by James Kusler and dated June 19, 2014 (206136).
  - iv. Southwest Water Authority Easement executed by James Kusler, dated May 22, 2015 (207510).

[¶4] I have ownership interest in the following properties that lie within the boundaries of the

Review Area of the proposed BK Fischer Storage Facility:

- Township 142 North, Range 87 West  
Section 9: SW1/4  
Oliver County, ND
- Township 142 North, Range 87 West  
Section 21: W1/2  
Oliver County, ND
- Township 143 North, Range 88 West  
Section 27: N1/2 SE1/4  
Mercer County, ND

[¶5] To the best of my knowledge, the properties listed in ¶ 4 above are encumbered by the following easements:

- Section 21:
  - i. Oliver-Mercer Electric Coop. Easement executed by Norman Smith and dated June 6, 1946 (91055).
- Section 27:
  - i. Oliver-Mercer Electric Coop Easement executed by Leland Erickson and dated November 6, 1974 (208123).
  - ii. Southwest Water Authority Easement executed by James Kusler and dated February 3, 2014 (211517).
  - iii. Southwest Water Authority Easement executed by James Kusler and dated May 22, 2015 (207510).

[¶6] I have ownership interest in the following properties that lie between, and will be impacted by, the proposed Storage Facilities:

- Township 142 North, Range 87 West  
Section 21: E1/2  
Oliver County, ND
- Township 142 North, Range 87 West  
Section 22: NW1/4  
Oliver County, ND

[¶7] To the best of my knowledge, the property listed in ¶ 6 above are encumbered by the following easements:

- Section 21:
  - i. Roughrider Electric Coop, Inc. Easement executed by Faye Swenson and dated July 1, 2008 (88076).
  - ii. Southwest Water Authority Easement executed by Kurt Swenson, et ux. and dated April 2, 2015 (89860).
  - iii. West River Telecommunications Cooperative Right-of-Way Easement executed by Donna M. Smith and dated November 18, 2015 (92299).
- Section 22:
  - i. West River Telecommunications Cooperative Right-of-Way Easement executed by Donna M. Smith and dated November 18, 2015 (92299).

[¶8] I have ownership interest in the following property that lies within the boundaries of the Review Area of the proposed KJ Hintz Storage Facility:

- Township 142 North, Range 87 West  
Section 15: SE1/4  
Oliver County, ND

[¶9] To the best of my knowledge, the property listed in ¶ 8 above is encumbered by the following easements:

- Section 15:
  - i. Oliver-Mercer Electric Coop. Easement executed by Ralph Smith and dated June 6, 1946 (91055).
  - ii. Oliver-Mercer Electric Coop. Easement executed by Ralph E. Smith and dated November 20, 1975 (90409).
  - iii. North Dakota State Water Commission Pipeline Easement executed by Jule Silbernagel, et al. and dated February 21, 2011 (86785).
  - iv. Roughrider Electric Coop, Inc. Easement executed by Faye Swenson and dated August 11, 2014 (90519).

[¶10] Attached are the deeds which I believe indicate my ownership in each of the properties listed above.

[¶11] Attached are the easements currently encumbering these properties based on the information I have.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 23<sup>RD</sup> day of MAY, 2024 at BEULAH ND, United States.

## **WARRANTY DEED**

THIS INDENTURE, made this 16<sup>th</sup> day of June, 2023, between **JOHNELL J. KUSLER and GEOFFREY E. TAYLOR**, wife and husband, whose post office address is 1884 Hillcrest Avenue, St. Paul, Minnesota 55116 AND **MILDA L. HEDBLUM, a/k/a MILDA K. HEDBLUM and EDWIN FOGELMAN, wife and husband**, whose post office address is 1801 Summit Avenue, St. Paul, Minnesota 55105, Grantors; and **KURT M. SWENSON and FAYE B. SWENSON Trustees of the Swenson Living Trust dated May 19, 2023**, whose post office address is 5774 21<sup>st</sup> Street SW, Beulah, North Dakota 58523, Grantees.

WITNESSETH, for and in consideration of the sum of One Hundred Eighty-Four Thousand Four Hundred and Eighty-Six Dollars (\$184,486.00), Grantors do hereby GRANT to said Grantees all of the following real property lying and being in the County of Oliver, and State of North Dakota and described as follows, to-wit:

**Outlot "B" located in the East Half (E½) of the Northwest Quarter (NW¼) of Section Seven (7), Township One Hundred Forty-Two (142) North, Range Eighty-Seven (87) West of the 5<sup>th</sup> P.M., Oliver County, North Dakota LESS Lot One (1) of said Outlot "B".**

The above legal description was obtained from a previously recorded instrument.

The Grantors except and reserve unto themselves all of the oil, gas, coal, and all other minerals presently owned by them and located in and under the above described real property, together with the right of ingress and egress at all times for the purpose of mining, drilling, exploring, operating and developing said lands for oil, gas, coal, and all other minerals containing fissionable materials, and all other minerals, and storing, handling, transporting and marketing the same therefrom with the right to remove from said land all of the Grantees' property and improvements.

And the said Grantors, for themselves, their successors and assigns, do covenant with the

By Deputy *Amber Gabut*  
Return To: CREATIVE PLANNING LEGAL, PA, 5454 W. 110TH STREET  
OVERLAND PARK, KS 66211

**WARRANTY DEED**

THIS INDENTURE, made this 19<sup>th</sup> day of MAY, 2022<sup>3</sup>, between  
Kurt M. Swenson and FayE B. Swenson, a married couple, GRANTORS; and Kurt M. Swenson  
and FayE B. Swenson, Trustees of the Swenson Living Trust, dated MAY 19  
2023, and any amendments thereto, 5774 21<sup>st</sup> Street SW, Beulah, North Dakota 58523,  
GRANTEES.

WITNESSETH, that the Grantors, for and in consideration of the sum of Ten Dollars  
(\$10.00) and other valuable considerations paid by the Grantees, the receipt of which is hereby  
acknowledged, do by these presents, GRANT, CONVEY AND WARRANT unto the Grantees  
all of their right, title, and interest in the following described real property, situated in the County  
of Mercer, State of North Dakota, described as follows, to-wit:

**Southeast Quarter (SE¼) of Section Twenty-Seven (27), Township One  
Hundred Forty-Three (143) North, Range Eighty-Eight (88) West of the Fifth  
Principal Meridian, Mercer County, North Dakota.**

Grantors covenant that they are well seized in fee of the premises, which they have the  
right to sell and convey, and which are free from encumbrances except those of record. Further,  
the Grantors covenant that they will warrant and defend the premises in the quiet and peaceable  
possession of the Grantees.

IN WITNESS WHEREOF, the Grantors have set their hands the day and year first above  
written.

*Kurt M. Swenson*  
Kurt M. Swenson, Grantor  
*FayE B. Swenson*  
FayE B. Swenson, Grantor

STATE OF NORTH DAKOTA )

COUNTY OF Mercer )

On this 19 day of May, 2023 before me personally appeared Kurt M. Swenson and FayE B. Swenson, a married couple, known to me to be the same persons described in and who executed the within and foregoing instrument and acknowledged to me that they executed the same as their free act and deed.

Amelia Uly  
Notary Public  
My Commission Expires: May 04, 2027

**STATEMENT OF FULL CONSIDERATION**

We certify that the requirement for a report or statement of the full consideration paid does not apply because this deed is for one of the transactions exempted by N.D.C.C. § 11-18-02.2(6)(c).

Dated this 19<sup>th</sup> day of MAY, 2023.

  
Kurt M. Swenson, Grantee  
Trustee

Dated this 19<sup>th</sup> day of MAY, 2023.

  
Fay E Swenson a/k/a FayE Swenson, Grantee  
Trustee

### RIGHT-OF-WAY EASEMENT

#### ALL PERSONS TAKE NOTICE:

In consideration of one dollar (\$1.00) and other good and valuable consideration JAMES O KUSLER 5968 19TH STREET SW BEULAH, ND 58523 hereinafter referred to as Grantor, does hereby grant, bargain, sell, transfer and convey to the Southwest Water Authority, hereinafter referred to as the Grantee, its successor and assigns, a perpetual easement with right to erect, construct, install and lay, and thereafter use, operate, inspect, repair, maintain, replace, and remove water pipelines, connections, valves and all other appurtenant facilities used in connection with the construction, operation and maintenance of the Southwest Pipeline Project, over, above, across and through the land of the Grantor, situated in Oliver County, State of North Dakota, said land being described as follows: NW1/4 SECTION 7 TOWNSHIP 142 RANGE 87 (the tract that contains 1.33 acres, more or less), together with the right of ingress and egress over the adjacent lands of the Grantor, successors and assigns for the purposes of this easement.

1. The permanent easement will be thirty (30) feet in width, fifteen (15) feet on each side of the center line of the pipeline as constructed, with an additional ten (10) feet of temporary right-of-way for a total construction easement width of forty (40) feet, twenty (20) feet on each side of the center line.
2. The Grantee covenants to maintain the easement in good repair so that no unreasonable damage will result from its use to the adjacent land of the Grantor, successors and assigns. The Grantor will receive compensation for damages to growing crops caused by the construction or operation. The Grantor will report any damages within three (3) years of the construction of the project.

The grant and other provisions of this easement shall constitute a covenant running with the land for the benefit of the Grantee, its successors and assigns.

IN WITNESS WHEREOF, the Grantor has executed this instrument this 3 day of February, 2014.

## WATER WELL AND WATER TANK EASEMENT

THIS INDENTURE, made and entered into this 31<sup>st</sup> day of May, 2022, by and between **JOHNELL J. KUSLER**, as personal representative of the Estate of **James O. Kusler**, whose post office address is 1884 Hillcrest Avenue, St. Paul, Minnesota 55116, **JOHNELL J. KUSLER**, whose post office address is 1884 Hillcrest Avenue, St. Paul, Minnesota 55116, AND **MILDA L. HEDBLOM**, a/k/a **MILDA K. HEDBLOM**, whose post office address is 1801 Summit Avenue, St. Paul, Minnesota 55105, hereafter "**Party of the First Part**"; and **TRENT T. MARTIN and DAWN MARTIN**, husband and wife, whose post office address is 1943 62<sup>ND</sup> Avenue SW, Beulah, North Dakota 58523, hereafter "**Party of the Second Part**".

WITNESSETH, that the Party of the First Part owns the following described parcel of land located in Oliver County, North Dakota, to-wit:

See Exhibit A attached hereto and incorporated herein by reference.

That the Party of the Second Part owns the following described parcel of land located in Oliver County, North Dakota, to-wit:

See Exhibit B attached hereto and incorporated herein by reference.

SOLEM LAW OFFICE  
109 CENTRAL AVENUE S  
P.O. BOX 249  
BEULAH, ND 58523  
PH. (701) 873-5555  
FAX (701) 873-4958  
e-mail: beulaw@westriv.com

That the said Party of the Second Part for and in consideration of the sum of One Dollar (\$1.00) and other good and valuable consideration, the receipt of which is hereby acknowledged by the Party of the Second Part, does by these presents grant and convey until the Party of the First Part for their use and benefit upon the parcel of land identified and described in Exhibit A attached hereto and incorporated herein by reference, a Water Well and Water Tank Easement allowing the Party of the First Part, their successors and assigns, access to and use of existing water wells and water tanks located upon the above described parcel of land owned by the Party of the Second Part and described in Exhibit B, attached hereto and incorporated herein by reference. The Party of the First Part may, in the future, add one additional waterline from the existing water wells located on the Party of the Second Part's property described in Exhibit B, which said waterline may extend onto the Party of the First Part's property described in Exhibit A. The Party of the First Part, and their successors and assigns, may use this one future additional waterline for livestock purposes only and this waterline may not be used to service a residence or be sold to another party to be used to service a residence.

This Easement shall be binding and obligatory upon the heirs, administrators, personal representatives, survivors, and assigns of the parties hereto, and this easement shall continue for a term of ninety-nine (99) years or for such longer period of time as may be allowed by state law. It is further understood that the Party of the First Part shall be under no obligation to maintain any existing water wells and water tanks owned by the Party of the Second Party. Any new additional waterline to be established as herein provided by the Party

of the First Part shall be established at their sole expense and maintained solely by the Party of the First Part.

IN WITNESS WHEREOF, the said parties hereto set their hands and seals the day and year first above written.

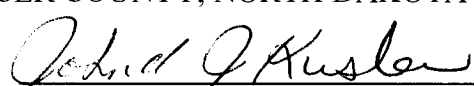

WITNESS, The hands of the parties of the first part:

## **CORRECTED** **RECIPROCAL ACCESS EASEMENT**

THIS INDENTURE, made and entered into this 31<sup>st</sup> day of May, 2022, by and between **JOHNELL J. KUSLER, as personal representative of the Estate of James O. Kusler**, whose post office address is 1884 Hillcrest Avenue, St. Paul, Minnesota 55116, **JOHNELL J. KUSLER**, whose post office address is 1884 Hillcrest Avenue, St. Paul, Minnesota 55116, AND **MILDA L. HEDBLOM, a/k/a MILDA K. HEDBLOM**, whose post office address is 1801 Summit Avenue, St. Paul, Minnesota 55105, hereafter "Party of the First Part"; and **TRENT T. MARTIN and DAWN MARTIN**, husband and wife, whose post office address is 1943 62<sup>ND</sup> Avenue SW, Beulah, North Dakota 58523, hereafter "Party of the Second Part".

WITNESSETH, that the said Party of the First Part and the said Party of the Second Part, for and in consideration of the sum of One Dollar (\$1.00) and other good and valuable consideration, the receipt of which is hereby acknowledged by each party, due by these presents grant and convey unto each other, their heirs, successors, and assigns for their use a Reciprocal Access Easement for purposes of ingress and egress allowing each party, their heirs, successors, and assigns to cross the land of each other specifically identified herein on

existing roads and trails.

The Party of the First Part owns the following described parcel of land located in Oliver County, North Dakota, to-wit:

See Exhibit A attached hereto and incorporated herein by reference.

The Party of the Second Part owns the following described parcel of land located in Oliver County, North Dakota, to-wit:

See Exhibit B attached hereto and incorporated herein by reference.

It is understood that this Reciprocal Access Agreement is being granted by the parties herein to each other for ingress and egress access purposes allowing each party to cross the land of the other to access their own parcels and that this Reciprocal Access Easement shall be binding and obligatory upon the heirs, administrators, personal representatives, survivors, and assigns of the parties hereto, and shall continue for a term of ninety-nine (99) years or for such longer time as may be allowed by state law. It is further understood that neither party is obligated to the other to maintain the trails and roads located upon the parcels described herein.

IN WITNESS WHEREOF, the said parties have hereunto set their hands and seals the day and year first above written.

WITNESS, the hands of the Parties of the First Part:
