

BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA

CASE NO. 30869  
ORDER NO. 33529

IN THE MATTER OF A HEARING CALLED  
ON A MOTION OF THE COMMISSION TO  
CONSIDER THE APPLICATION OF  
SUMMIT CARBON STORAGE #1, LLC  
REQUESTING CONSIDERATION FOR THE  
GEOLOGIC STORAGE OF CARBON  
DIOXIDE IN THE BROOM CREEK  
FORMATION FROM THE MIDWEST  
CARBON EXPRESS PIPELINE IN THE  
STORAGE FACILITY LOCATED IN  
SECTIONS 31, 32, 33, AND 34, TOWNSHIP  
142 NORTH, RANGE 87 WEST, SECTIONS 1,  
11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, AND  
36, TOWNSHIP 141 NORTH, RANGE 88  
WEST, SECTIONS 2, 3, 4, 5, 6, 7, 8, 9, 10, 11,  
14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27,  
28, 29, 30, 31, 32, 33, 34, AND 35, TOWNSHIP  
141 NORTH, RANGE 87 WEST, SECTIONS 1,  
2, 3, AND 12, TOWNSHIP 140 NORTH,  
RANGE 88 WEST AND SECTIONS 4, 5, 6,  
AND 7, TOWNSHIP 140 NORTH, RANGE 87  
WEST, MERCER, MORTON, AND OLIVER  
COUNTIES, ND PURSUANT TO NORTH  
DAKOTA ADMINISTRATIVE CODE  
CHAPTER 43-05-01.

ORDER OF THE COMMISSION

PROCEDURAL HISTORY:

(1) This cause came on for hearing at 9:00 a.m. on the 11th of June, 2024. The hearing ran June 11 through June 13, 2024.

(2) Summit Carbon Storage #1, LLC (SCS #1) made application to the Commission for an order requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline (MCE Pipeline) in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West; Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West; Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and

35, Township 141 North, Range 87 West; Sections 1, 2, 3, and 12, Township 140 North, Range 88 West; and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, North Dakota, pursuant to North Dakota Administrative Code (NDAC) Chapter 43-05-01.

(3) SCS #1 submitted an application for a Storage Facility Permit and attachments pursuant to NDAC Section 43-05-01-05 and all other provisions of NDAC Chapter 43-05-01 as necessary.

(4) Case Nos. 30869, 30870, 30871, 30872, 30873, 30874, 30875, 30876, 30877, 30878, 30879, and 30880 were combined for the purposes of hearing.

(5) Case No. 30870, also heard on the June 11, 2024 docket, is a motion of the Commission to consider the amalgamation of storage reservoir pore space, pursuant to a Storage Agreement by SCS #1 for use of pore space falling within portions of Sections 31, 32, 33, and 34, Township 142 North, Range 87 West; Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West; Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West; Sections 1, 2, 3, and 12, Township 140 North, Range 88 West; and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, North Dakota, in the Broom Creek Formation, and to determine it has been signed, ratified, or approved by owners of interest owning at least sixty percent of the pore space interest within said lands, pursuant to North Dakota Century Code (NDCC) Section 38-22-10.

(6) Case No. 30871, also heard on the June 11, 2024 docket, is a motion of the Commission to determine the amount of financial responsibility required of SCS #1 for the geologic storage of carbon dioxide from the MCE Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West; Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West; Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West; Sections 1, 2, 3, and 12, Township 140 North, Range 88 West; and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, North Dakota, in the Broom Creek Formation, pursuant to NDAC Section 43-05-01-09.1.

(7) Case No. 30872, also heard on the June 11, 2024 docket, is a motion of the Commission to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West; Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West; Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West; Sections 1, 2, 3, and 12, Township 140 North, Range 88 West; and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, North Dakota, subject to the application of SCS #1 for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

(8) Case No. 30873, also heard on the June 11, 2024 docket, is an application by Summit Carbon Storage #2, LLC (SCS #2) for an order requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the MCE Pipeline in the storage facility

located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West; Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West; Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West; and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, North Dakota, pursuant to NDAC Chapter 43-05-01.

(9) Case No. 30874, also heard on the June 11, 2024 docket, is a motion of the Commission to consider the amalgamation of storage reservoir pore space, pursuant to a Storage Agreement by SCS #2 for use of pore space falling within portions of Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West; Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West; Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West; and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, North Dakota, in the Broom Creek Formation, and to determine it has been signed, ratified, or approved by owners of interest owning at least sixty percent of the pore space interest within said lands, pursuant to NDCC Section 38-22-10.

(10) Case No. 30875, also heard on the June 11, 2024 docket, is a motion of the Commission to determine the amount of financial responsibility required of SCS #2 for the geologic storage of carbon dioxide from the MCE Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West; Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West; Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West; and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, North Dakota, in the Broom Creek Formation, pursuant to NDAC Section 43-05-01-09.1.

(11) Case No. 30876, also heard on the June 11, 2024 docket, is a motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West; Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West; Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West; and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, North Dakota, subject to the application of SCS #2 for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

(12) Case No. 30877, also heard on the June 11, 2024 docket, is an application by Summit Carbon Storage #3, LLC (SCS #3) for an order requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the MCE Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West; Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West; Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West; Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West; and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, North Dakota, pursuant to NDAC Chapter 43-05-01.

(13) Case No. 30878, also heard on the June 11, 2024 docket, is a motion of the Commission to consider the amalgamation of storage reservoir pore space, pursuant to a Storage Agreement by SCS #3 for use of pore space falling within portions of Section 36, Township 143 North, Range 87 West; Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West; Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West; Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West; and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, North Dakota, in the Broom Creek Formation, and to determine it has been signed, ratified, or approved by owners of interest owning at least sixty percent of the pore space interest within said lands, pursuant to NDCC Section 38-22-10.

(14) Case No. 30879, also heard on the June 11, 2024 docket, is a motion of the Commission to determine the amount of financial responsibility required of SCS #3 for the geologic storage of carbon dioxide from the MCE Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West; Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West; Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West; Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West; and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, North Dakota, in the Broom Creek Formation, pursuant to NDAC Section 43-05-01-09.1.

(15) Case No. 30880, also heard on the June 11, 2024 docket, is a motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West; Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West; Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West; Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West; and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, North Dakota, subject to the application of SCS #3 for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

(16) The record in these matters was left open to receive additional information from SCS #1, SCS #2, and SCS #3. Such information was received on June 24, 2024 and the record was closed.

(17) The Commission gave at least a thirty-day public notice and comment period for the draft storage facility permit and issued all notices using methods required of all entities under NDCC Section 38-22-06 and NDAC Section 43-05-01-08. Publications were made in The Bismarck Tribune on April 17, May 1, and May 8, 2024, the Center Republican on April 18, May 9, and May 16, 2024, The Mandan News on April 19, May 3, and May 10, 2024, and The Hazen Star on May 2 and May 9, 2024. SCS #1 hand-delivered affidavits to the Commission on June 11, 2024 stating it provided at least a forty-five day notice as required by NDAC Section 43-05-0108. The comment period for written comments ended at 5:00 PM CDT June 10, 2024. The hearing was open to the public to appear and provide comments.

(18) Counsel for the following landowners (the Landowner Intervenor) filed petitions to intervene in Case Nos. 30869, 30870, 30871, 30872, 30873, 30874, 30875, 30876, 30877, 30878, 30879, and 30880.

- (a) The Swenson Living Trust (Swenson Trust) filed a petition on April 18, 2024. The Swenson Trust owns the SE/4 of Section 27, Township 143 North, Range 88 West and the W/2 NE/4 of Section 14, Township 142 North, Range 88 West, Mercer County, North Dakota. The Swenson Trust owns Outlot B of the E/2 NW/4 Less Lot 1 of Section 7, the SW/4 of Section 9, the SE/4 of Section 15, Section 21, and the NW/4 of Section 22, Township 142 North, Range 87 West, Oliver County, North Dakota.
- (b) Michael and Bonnie Haupt (Haupt) filed a petition on May 15, 2024. Haupt owns the SW/4 of Section 27 and the SE/4 of Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota.
- (c) Paul and Christy Metz (Metz) filed a petition on May 15, 2024. Metz owns Lot 1 of the N/2 SE/4 of Section 4, Township 141 North, Range 87 West, Oliver County, North Dakota.
- (d) John Jochim (Jochim) filed a petition on May 15, 2024. Jochim owns the NW/4 of Section 24, Township 142 North, Range 88 West, Mercer County, North Dakota.
- (e) Kirk, Linda, and Allen Maize (Maize) filed a petition on May 16, 2024. Maize owns the S/2 SE/4 of Section 20, Township 141 North, Range 87 West, Oliver County, North Dakota.
- (f) Glenn and Lisa Gerving (Gerving) filed a petition on May 16, 2024. Gerving owns the E/2 SE/4 of Section 34 and the S/2 SW/4 of Section 35, Township 142 North, Range 87 West, Oliver County, North Dakota and the south 54 acres of the S/2 S/2 of Section 13 and the S/2 SW/4 NW/4 and S/2 SW/4 of Section 24, Township 141 North, Range 88 West, Mercer County, North Dakota.
- (g) JoLene M. Rust (Rust) filed a petition on May 16, 2024. Rust owns the SW/4 of Section 13, Township 142 North, Range 88 West, Mercer County, North Dakota.
- (h) Michael Bauman (Bauman) filed a petition on May 16, 2024. Bauman owns the SW/4 of Section 24, Township 142 North, Range 88 West, Mercer County, North Dakota.
- (i) Gary A. Smith and Cassie Smith (Smith) filed a petition on May 16, 2024. Smith owns the NE/4 and NW/4 of Section 15, the NE/4 of Section 20, the SE/4 including Lot A of Section 22, and the W/2 of Section 23, Township 142 North, Range 87 West, Oliver County, North Dakota.

(j) Kevin and Kimberly Kraft (Kraft) filed a petition on May 22, 2024. Kraft owns a tract of land located in the S/2 (Document No. 80055 at Oliver County) and the SE/4 less and except the previously stated tract in Section 27, Township 142 North, Range 87 West, Oliver County, North Dakota.

(k) Charmayne Liebelt (Liebelt) filed a petition on May 24, 2024. Liebelt owns the S/2 SW/4 of Section 32, Township 143 North, Range 86 West, Oliver County, North Dakota.

(19) Counsel for Intervenor Swenson Trust filed a Motion to Continue Hearing and Request for Scheduling Conference on April 25, 2024. Counsel for SCS #1, SCS #2, and SCS #3 filed a response on April 30, 2024 requesting the Commission deny Intervenor Swenson Trust's Motion for Continuance.

(20) Counsel for Intervenor Swenson Trust filed a Motion to Expedite Discovery on May 16, 2024. Counsel for SCS #1, SCS #2, and SCS #3 filed a response on May 28, 2024 requesting the Commission deny Intervenor Swenson Trust's Motion to Expedite Discovery.

(21) Counsel for Minnkota Power Cooperative, Inc. (Minnkota) petitioned to intervene in Case Nos. 30869, 30870, 30871, 30872, 30873, 30874, 30875, 30876, 30877, 30878, 30879, and 30880 on May 20, 2024. Minnkota holds three carbon dioxide storage facility permits, in Oliver County, North Dakota, the Minnkota Center MRYS Broom Creek Storage Facility #1 (Order No. 31584 entered in Case No. 29030), the Minnkota Center MRYS Deadwood Storage Facility #1 (Order No. 31587 entered in Case No. 29033), and the DCC West Broom Creek Storage Facility #1 (Order No. 32806 entered in Case No. 30122), herein referred to as Project Tundra. The location of Project Tundra is located immediately adjacent to the east of SCS #1, SCS #2, and SCS #3's proposed injection sites. Minnkota seeks to intervene to protect its interest in Project Tundra.

(22) Counsel for SCS #1, SCS #2, and SCS #3 filed a consolidated response to the Landowner Intervenor's Petitions to Intervene on May 28, 2024 requesting the Commission deny Swenson Trust's Petition to Intervene and approve the remaining Landowner Intervenor's Petitions to Intervene only in the proposed storage facilities in which they own acreage within the horizontal boundaries of the storage facility proposed and/or within the one-half mile notice area surrounding the storage facility proposed. The response stated the Landowner Intervenor's own the following acreage:

(a) Swenson Trust owns approximately 359.4 acres located within the horizontal boundaries of the storage facility proposed by SCS #2 and/or the one-half mile notice area surrounding the storage facility proposed by SCS #2.

(b) Haupt owns approximately 160 acres located within the horizontal boundaries of the storage facility proposed by SCS #1 and/or the one-half mile notice area surrounding the storage facility proposed by SCS #1.

(c) Metz owns approximately 18.88 acres located within the horizontal boundaries of the storage facility proposed by SCS #1.

- (d) Jochim owns approximately 160 acres located within the horizontal boundaries of the storage facility proposed by SCS #2.
- (e) Maize owns approximately 80 acres located within the horizontal boundaries of the storage facility proposed by SCS #1.
- (f) Gerving owns approximately 393.5 acres located within the horizontal boundaries of the storage facility proposed by SCS #1 and/or the one-half mile notice area surrounding the storage facility proposed by SCS #1.
- (g) Rust owns approximately 160 acres located within the horizontal boundaries of the storage facility proposed by SCS #2.
- (h) Bauman owns approximately 140 acres located within the horizontal boundaries of the storage facility proposed by SCS #2.
- (i) Smith owns approximately 15 acres located within the horizontal boundaries of the storage facility proposed by SCS #2 and/or the one-half mile notice area surrounding the storage facility proposed by SCS #2.
- (j) Kraft owns approximately 174.58 acres in the vicinity of the proposed carbon dioxide storage facilities but owns no acreage located within the horizontal boundaries and/or the one-half mile notice area surrounding the storage facilities.
- (k) Liebelt owns approximately 80 acres located within the horizontal boundaries of the storage facility proposed by SCS #3.

(23) The Hearing Officer on May 31, 2024 granted the Landowner Intervenor's Petition to Intervene on a limited basis. Haupt, Metz, Maize, and Gerving are granted intervention as it relates to SCS #1 (Case Nos. 30869, 30870, 30871, and 30872). Swenson Trust, Jochim, Rust, Bauman, and Smith are granted intervention as it relates to SCS #2 (Case Nos. 30873, 30874, 30875, and 30876). Liebelt is granted intervention as it relates to SCS #3 (Case Nos. 30877, 30878, 30879, and 30880). Kraft's intervention will not be considered insofar as it falls outside the lands proposed by SCS #1, SCS #2, and SCS #3.

(24) The Hearing Officer on June 3, 2024 granted Minnkota's Petition to Intervene, however at the hearing Minnkota must demonstrate its correlative rights are impacted by SCS #1, SCS #2, and SCS #3's proposed storage facilities.

(25) Counsel for the Landowner Intervenor's submitted a Request for Telephonic Testimony on June 6, 2024. Counsel for SCS #1, SCS #2, and SCS #3 submitted a Request for Telephonic Testimony on June 7, 2024.

(26) The Hearing Officer granted Landowner Intervenor's and SCS #1, SCS #2, and SCS #3's Requests for Telephonic Testimony on June 7, 2024.

(27) The Hearing Officer denied Intervenor Swenson Trust's Motion to Continue Hearing, Request for Scheduling Conference, and Motion to Expedite Discovery on June 7, 2024. These motions were filed on the grounds that Intervenor Swenson Trust was not afforded adequate time to review, analyze, and assess the impacts the storage facility permit would have on Intervenor Swenson Trust's property. The following facts are relevant to the Commission's denial of the motions:

- (a) Swenson Trust was served notice of the hearing on April 16, 2024 pursuant to NDAC Section 43-05-01-08 by the applicant, SCS #2.
- (b) Swenson Trust's legal counsel, Braaten Law Firm, submitted an open records request to the Commission on June 14, 2023 requesting all documents and correspondence related to the SCS #1, SCS #2, and SCS #3 (collectively called Summit in Paragraphs (b) through (d)) storage facility permit applications and Commission staff provided Reservoir Characterization Using Epicentre (RESCUE) files from Petrel and Computer Modeling Group (CMG) software packages to Braaten Law Firm on June 23, 2023 as part of that request. RESCUE files are an open standard for the transfer of data from geologic models. The RESCUE files alongside the technical details within the storage facility permit applications could be used to evaluate and assess the impacts of the storage facility permits.
- (c) Braaten Law Firm, submitted a subsequent open records request to the Commission on August 24, 2023 requesting all new documents and correspondence related to the Summit storage facility permit applications and Commission staff provided the CMG DAT file, as part of that request by file transfer share on August 25, 2023. The CMG DAT file contains information about a numerical model used to review, analyze, and assess the impacts of the storage facility permits.
- (d) Braaten Law Firm submitted a subsequent open records request to the Commission on March 12, 2024. Commission staff responded on March 18, 2024 that the request was too broad. Braaten Law Firm responded on March 27, 2024 disagreeing the request was too vague but understanding the Commission's position and would respond accordingly. Braaten Law Firm submitted a later request on May 15, 2024 (Exhibit LO-83), requesting all electronic data files and load files related to the Summit applications for geochemical modeling, geological model, and numerical simulation, including all input files and geophysical logs. The Commission has discovered that an incorrect date was referenced in its response to the May 15, 2024 request asking for the CMG numerical reservoir simulation model files. The CMG numerical reservoir simulation model files were previously provided to Braaten Law Firm as part of the August 24, 2023 request instead of the referenced September 21, 2023 which was an open records request submitted by Braaten Law Firm requesting information on gas storage applications pursuant to NDCC Chapter 38-25.
- (e) If, as Braaten Law Firm contends, any of the open records requests were not fulfilled, Braaten Law Firm did not inform Commission staff that numerical modeling files

were not received and did not take any action under NDCC Chapter 44-04 including requesting an attorney general's opinion on the alleged denial pursuant to NDCC Section 44-04-21.1.

(28) Counsel for Minnkota filed a letter dated June 10, 2024 stating Minnkota and SCS #1, SCS #2, and SCS #3 (collectively called Summit in this paragraph) had reached an agreement with respect to Minnkota's concerns. Summit and Minnkota agreed to language that is being proposed to be added to SCS #3's Storage Agreement's Section 3.12 – Border Agreements. Minnkota no longer anticipates offering testimony in Case Nos. 30869, 30870, 30871, 30872, 30873, 30874, 30875, 30876, 30877, 30878, 30879, and 30880. Minnkota did not appear at the hearings on June 11 through June 13, 2024 to provide testimony and the language proposed in this letter was included in the amended Storage Agreement provided by SCS #3 on June 24, 2024.

(29) Counsel for the Landowner Intervenor filed a Motion to Compel on June 10, 2024. Counsel for SCS #1, SCS #2, and SCS #3 (collectively called Summit in this paragraph) testified at the hearing on June 11, 2024 that Summit did not have the opportunity to review the Motion to Compel yet but would respond. Counsel for Summit provided a response on June 20, 2024 requesting the Commission deny the Motion to Compel.

(30) The record in these matters was closed on June 24, 2024.

(31) Counsel for the Landowner Intervenor filed multiple motions and briefs after the record had closed. The Commission has recorded these motions but finds they are not part of the official record and sufficient information has not been provided to reconsider the prior denial noted in aforementioned Paragraph (27):

- (a) Counsel for the Landowner Intervenor filed an Objection to SCS #1, SCS #2, and SCS #3's submittal of supplements on June 27, 2024. Counsel for SCS #1, SCS #2, and SCS #3 filed a response on July 8, 2024 stating the Objection is meritless as the Commission could make a decision on the applications with or without the supplements provided on June 24, 2024.
- (b) Counsel for the Landowner Intervenor filed a Petition of Reconsideration of Denial of Motion to Continue Hearing on July 2, 2024. Counsel for SCS #1, SCS #2, and SCS #3 filed a response on July 12, 2024 requesting the Commission deny the request. Counsel for the Landowner Intervenor filed a subsequent response to SCS #1, SCS #2, and SCS #3 on July 18, 2024.
- (c) The Hearing Officer denied the Petition of Reconsideration of Denial of Motion to Continue Hearing on August 15, 2024 on the basis that sufficient information was not provided to reconsider the prior denial decision.
- (d) Counsel for the Landowner Intervenor filed a Motion for Supplemental Hearing and Motion to Compel SCS #1, SCS #2, and SCS #3 to produce discovery requests on August 29, 2024. Counsel for SCS #1, SCS #2, and SCS #3 filed a response on September 12, 2024 requesting the Commission deny both requests. Counsel for the

Landowner Intervenor subsequently submitted a brief to further support their Motion for Supplemental Hearing and Motion to Compel on September 18, 2024.

- (e) Counsel for the Landowner Intervenor filed declarations on November 4, 2024 indicating they have ran two versions of the model and are looking at submitting comments within the next 30 days on their model runs to the Commission. Counsel for SCS #1, SCS #2, and SCS #3 filed a response on November 12, 2024 requesting the Commission reject the Landowner Intervenor's attempts to stall the proceedings and deny their request for a supplemental hearing and proceed with a decision.
- (f) Counsel for the Landowner Intervenor filed a declaration on December 9, 2024 stating they submitted an open records request to the Commission for the model files on November 13, 2024 and received the files on November 20, 2024 by flash drive; that the Landowner Intervenor's expert confirmed the files received by the Commission were the same files received from the Energy and Environmental Research Center (EERC); and that Landowner Intervenor requires additional time now that they have received the model files from the Commission. The Commission notes the Landowner Intervenor's filing from August 29, 2024 stated EERC provided the modeling files to the Landowner Intervenor's Counsel on July 2, 2024.

(32) As of June 24, 2024 the record was closed. The Motion to Compel seeks to admit evidence after the record was closed and is hereby denied. The Commission finds that Landowner Intervenor's Motion to Compel is untimely because it was filed after the Commission held an evidentiary hearing on SCS #1, SCS #2, and SCS #3's applications, and since then the record has been closed with respect to accepting evidence. As such, the Commission finds that Landowner Intervenor's Discovery request would not serve any purpose.

(33) The Motion for Supplemental Hearing also seeks to introduce evidence after the record was closed. Moreover, the motion seeks to require the production of evidence that the Commission has already provided to Counsel for the Landowner Intervenor. Landowner Intervenor disputes that the Commission provided this information. Notwithstanding Landowner Intervenor's argument, Counsel for them did not raise the issue until the hearings had begun. Following the initial open records request, Landowner Intervenor never informed the Commission it did not receive the materials or take any action under NDCC Chapter 44-04 including request an attorney general's opinion, arguing that the Commission failed to respond to its initial request for the production of the materials. The Commission stands by its position that it provided the information pursuant to the open records request. As such, Landowner Intervenor was in possession of the information before the hearings and had ample opportunity to consider it. The Motion for Supplemental Hearing is hereby denied.

(34) At the hearings and in their various motions the Landowner Intervenor argues the Commission has violated their constitutional rights including due process. As part of issuing this order, however, the Commission notes it does not determine the constitutionality of North Dakota statutes and laws. The Commission finds NDCC Section 38-22-10 to be the current law.

**THE COMMISSION FINDS:**PUBLIC COMMENTS:

(35) The Commission received a letter dated April 28, 2024 from Fay Horn (Horn) formerly known as Fay Hill of Washburn, North Dakota. The letter states Horn is strongly opposed to the proposed carbon dioxide storage facility as it could negatively affect the land, environment, and minerals. Horn also states that Summit Carbon Storage has a bad reputation with landowners, such as going onto property without consent. The Commission notes Horn was identified as a mineral owner or surface owner for the BK Fischer storage facility requiring notification by SCS #2.

SCS #1 provided supplements on June 24, 2024 including a response to Horn that applicants have acquired in excess of 92% of the pore space lease agreements across all three units with broad landowner support and have acquired 100% voluntary easements for its flow lines in the sequestration area. The Commission notes Exhibit 5A, 5B, and 5C show SCS #1, SCS #2, and SCS #3 have leased approximately 89.14%, 92.43%, and 96.77%, respectively, across the three proposed storage facilities. The Commission finds Horn provided no evidence to support her position that the carbon dioxide storage facility would negatively affect the land, environment, and minerals and finds the storage facility permit application as proposed will not endanger the environment or negatively affect the land or minerals located within the storage facility area.

(36) The Commission received a letter May 6, 2024 from Gary Boeckel (Boeckel) of Stanton, North Dakota. The letter states Boeckel is opposed to the storage of carbon dioxide because the roads will be ruined, and the other states should build their own storage facilities rather than send it to North Dakota. The Commission notes Boeckel was identified as a mineral owner or surface owner, for the BK Fischer storage facility requiring notification by SCS #2.

SCS #1 provided supplements on June 24, 2024 including a response to Boeckel that applicants have worked with and will continue working with the appropriate townships and counties regarding road use and road repair. The Commission notes it does not have jurisdiction over road use or road repair and NDCC Section 38-22-01 states in part, that it is in the public interest to promote the geologic storage of carbon dioxide and that doing so will help benefit the state and global environment by reducing greenhouse gas emissions.

(37) The Commission received a letter from the State Historical Society of North Dakota (SHPO) dated May 15, 2024 indicating it reviewed the application of SCS #1. SHPO stated seismic testing can adversely affect certain types of sensitive cultural sites and is requesting its office be contacted regarding areas to avoid prior to any seismic testing. Additionally, SHPO states a Class III (pedestrian survey) of cultural resources is underway for the pipeline but is unable to verify if the survey includes all the injection wells, monitoring wells, and any of the new ground disturbance associated with access to these wells and recommends each of those sites be surveyed and that the survey follow “North Dakota SHPO Guidelines Manual for Cultural Resource Inventory Projects”.

SCS #1 was questioned by Commission staff on June 11, 2024 if they intended to meet SHPO’s requests. SCS #1 responded it would.

(38) The Commission received a similarly templated letter from five mineral owners listed below opposing the proposed storage facility permit because it will interfere and negatively impact their mineral right property interests. The mineral owners state that future development of their minerals will be more difficult, costly, and very likely unfeasible if the application is approved. If the application is allowed to proceed as proposed, Summit [sic; reference to Summit is equivalent to SCS #1] would be permitted to declare without challenge that minerals do not exist in the pore space or are of such little value as to not warrant compensation, which encourages a taking of property without compensation to the surface and mineral owner. Additionally, the mineral owners state that the proposal is in direct opposition to NDCC Section 47-31-08, which states, “In the relationship between a severed mineral owner and a pore space estate, this chapter does not change or alter the common law as of April 9, 2009, as it relates to the rights belonging to, or the dominance of, the mineral estate.” The mineral owners state that prior to any approval, SCS #1 must first be required to negotiate with them, as a mineral owner, a fair price for the severance or use of their property and any consequential impacts to their mineral interest.

- (a) A letter dated May 30, 2024 from Victorie Brown of Solomons, Maryland.
- (b) A letter dated June 7, 2024 from Mark Schultz of Reston, Virginia.
- (c) A letter dated June 8, 2024 from Brenda L. Lipp of Bismarck, North Dakota.
- (d) A letter dated June 9, 2024 from Eric Schultz of Almont, North Dakota.
- (e) A letter dated June 10, 2024 from Meda Schultz of Maple Valley, Washington.

SCS #1 filed a copy of the “Notice of Hearing” pursuant to NDAC Section 43-05-01-08(2) and the affidavit of service lists the five mineral owners or their addresses above as notified parties.

There has been no historic hydrocarbon exploration, production, or studies suggesting there is an economically viable supply of hydrocarbons from formations above or below the Broom Creek Formation within the proposed storage facility area. There has been historic production approximately 19 miles to the northwest of the storage facility from the Entze #29 1 well (File No. 7616). SCS #1 testified at the hearing and summarized in a provided supplement on June 24, 2024 that the storage facility area will not negatively impact mineral interests and future development. SCS #1 states that in the event hydrocarbons are discovered in commercial quantities below the Broom Creek Formation, a horizontal well could be used to produce the hydrocarbons while avoiding drilling through the carbon dioxide plume or a vertical well could be drilled using proper controls via increased drilling mud weight determined from real-time Broom Creek Formation bottom hole pressure data. SCS #1 also testified there are no existing mines that have plans to mine coal within the storage facility area during the project’s operational period.

NDCC Section 47-31-03, states “title to pore space in all strata underlying the surface of lands and waters is vested in the owner of the overlying surface estate.” The Commission notes that when the surface and mineral estate is severed, the surface estate owns the pore space and is compensated for storage. Pursuant to NDCC Section 38-22-08(6) if minerals are present in the pore space the mineral owner must be compensated. The Commission received no compelling information to

indicate the storage reservoir contains commercially valuable minerals, or that underlying or overlying minerals would be stranded.

(39) The Commission received a letter dated June 7, 2024 from Jason Pulver (Pulver) in support of the proposed carbon dioxide storage facility. Pulver is the surface owner for the W/2 of Section 17 and the S/2 of Section 18, Township 141 North, Range 87 West, Oliver County, North Dakota. Pulver states he supports the location of the TB Leingang injection site and carbon dioxide storage facility and approval of the permit. The Commission notes Pulver was identified as a surface owner for the proposed location of the injection site for the TB Leingang storage facility requiring notification by SCS #1.

(40) The Commission received an email on June 10, 2024 from Meda Schultz (Schultz) in general opposition of all three storage facility permit applications submitted by SCS #1, SCS #2, and SCS #3 (collectively called Summit in this paragraph). Schultz brings up the following concerns, not previously stated in the aforementioned Paragraph (38).

- (a) Schultz believes an agreement to Summit's proposal is a continuance to the ongoing reliance of the old, dying, and harmful oil, gas, and chemical industries. Schultz states it is time to look for new energy sources.
- (b) Schultz believes Summit's proposal puts North Dakota's safety at potential risk as carbon dioxide capture, transport, and storage has a limited history to demonstrate it can be done in a safe manner.
- (c) Schultz believes Summit's proposal allocates North Dakota's resources to other jurisdictions and owners, as the majority of the contributors come from out of state causing North Dakota's resources to be consumed for the benefit of those out-of state. Additionally, Summit is expected to receive an \$85 per metric ton tax credit but only provide \$0.50 per metric ton back to the property owner, resulting in further inequity.
- (d) Schultz believes Summit's proposal allows it to take what is not its to take. Summit plans to consume pore space that may be void or may contain other gases that could hold value, which should be retained by the existing surface or mineral owners.
- (e) Schultz questions who inherits the risk and cost after Summit is no longer a storage facility owner after a 10-year period as allowed by North Dakota law.

The Commission notes Schultz was identified as a mineral owner for the TB Leingang and BK Fischer storage facilities requiring notification by SCS #1 and SCS #2.

Summit provided supplements on June 24, 2024 including a response to Schultz, stating the project serves to support the bio-fuel and agricultural industries, not the oil, gas and chemical industries.

NDCC Section 38-22-10 states “If a storage operator does not obtain the consent of all persons who own the storage reservoir’s pore space, the commission may require that the pore space owned by nonconsenting owners be included in a storage facility and subject to geologic storage.”

NDCC Section 38-22-08(14) states “That all nonconsenting pore space owners are or will be equitably compensated.” Summit testified all pore space owners would be compensated in the same fashion regardless of if they signed a pore space lease. The Commission notes pore space owners within the storage facility will economically benefit from the development of their pore space resource for the storage of carbon dioxide.

The Commission notes the following in response to Schultz’s question related to who inherits the risk and cost after a storage facility is closed. NDCC Section 38-22-17(6) states in part, that once a certificate of project completion is issued, title to the storage facility and to the stored carbon dioxide is acquired by the state, including rights and interests in and all responsibilities associated with, the stored carbon dioxide; and monitoring and managing the storage facility is the state’s responsibility to be overseen by the Commission. Storage operators shall pay the Commission a fee, pursuant to NDCC Section 38-22-15, on each ton of carbon dioxide injected for storage to be deposited in the carbon dioxide storage facility trust fund. This special fund is appropriated to defray expenses the Commission may incur in long-term monitoring and management of a closed facility. The Commission notes that NDCC Section 38-22-17 states in part, that a certificate of project completion may not be issued until at least ten years after carbon dioxide injections end, provided the storage operator can show the carbon dioxide in the storage reservoir has become stable and is reasonably expected to remain within the storage reservoir boundary.

The information and opinions included in Schultz’s letter that were not herein addressed are either inapplicable, irrelevant to the application, unsubstantiated, or previously addressed.

(41) The Commission received an email from Dakota Resource Council (DRC) on June 10, 2024. DRC believes North Dakota’s amalgamation law is unconstitutional because equitable compensation is not a substitute for the safeguards guaranteed by the Constitution of North Dakota and NDCC Chapter 32-15, which require just compensation, by condemnation hearing with jury, to be paid for land or real property taken by eminent domain. Northwest Landowners Association has a pending lawsuit in district court on this issue. DRC is requesting the North Dakota Industrial Commission (NDIC) wait to rule on Case Nos. 30869-30880, or any other case until the courts determine the constitutionality of North Dakota’s amalgamation law.

SCS #1 provided supplements on June 24, 2024 including a response to DRC, stating the NDIC should continue to proceed according to the NDCC [sic; SCS #1 meant to reference NDCC Chapter 38-22] and that DRC’s comments are tantamount to judicial activism. The Commission notes the constitutionality of NDCC Section 38-22-10 has been previously responded to in Paragraph (34) above.

(42) The Commission received similarly templated emails from Emma Schmit and Janet Miller (Schmit and Miller) on June 10, 2024. They are in opposition to the three storage facility permits submitted by SCS #1, SCS #2, and SCS #3 (collectively called Summit in this paragraph) for the following reasons:

- (a) Schmit and Miller believe North Dakota's Class VI program has a notable gap from the Environmental Protection Agency (EPA) in addressing environmental justice concerns.
- (b) Schmit and Miller believe North Dakota should suspend further actions until the ongoing legal challenges to North Dakota's amalgamation laws reach a definitive resolution in Court to protect the interests and rights of all involved parties.
- (c) Schmit and Miller believe allowing Summit to annually store up to 18 million metric tons of carbon dioxide could severely disrupt industries that depend on carbon dioxide, such as fruit and vegetable preservation, beverage production, and pharmaceutical manufacturing.
- (d) Schmit and Miller believe Summit's applications, submitted on February 6, 2024, fail to acknowledge its expansion with additional ethanol plants and this change necessitates a more detailed review to ensure accurate and transparent information before any decisions are made.
- (e) Schmit and Miller also believe the environmental risks, including induced seismicity and leakage into water sources, are too high considering the long-term stability of carbon dioxide is not guaranteed and carbon capture storage technology is still evolving and unproven on the proposed scale and North Dakota should not bear the risk of this experimental approach.

The Commission notes that neither Schmit nor Miller were identified as a mineral owner or surface owner requiring notification for any of the three storage facilities.

Summit provided supplements on June 24, 2024 including a response to Schmit and Miller, stating it believes the NDIC has jurisdiction.

The Commission notes the following in response to Schmit and Miller's concerns relating to the addition of more ethanol plants since the applications were submitted on February 6, 2024:

Summit testified the applications are requesting commercial permits for operation and injection of carbon dioxide that allow the flexibility to receive carbon dioxide from a variety of industrial sources. Summit referenced Exhibit 3A that includes the addition of 27 ethanol plants to the revised Figure PS-2 included with the applications submitted on February 6, 2024. Summit explained the MCE Pipeline system is designed to accommodate a carbon dioxide stream that is at least 95% carbon dioxide with the anticipated stream being greater than 98.25% carbon dioxide once delivered to the storage facilities. Summit testified the 57 ethanol plants currently contracted emit approximately 16 million metric tons of carbon dioxide that could be captured.

NDAC Section 43-05-01-07.2 requires the Commission to prepare a draft permit and fact sheet when a storage facility permit application is complete. The description of the facilities and the quantity and quality of the carbon dioxide stream testified to reflect what was provided on the fact sheet for the draft permits.

NDAC Section 43-05-01-11.4 states in part “the storage operator shall prepare, maintain, and comply with a testing and monitoring plan to verify that the geological sequestration project is operating as permitted and is not endangering underground sources of drinking water.” Summit has submitted a testing and monitoring plan, as summarized in Table 5-2 of each application, that accounts for passive seismicity monitoring and leak detection monitoring at the well bore.

NDAC Section 43-05-01-14 requires the storage operator to have an integrated leak detection system and to report any leaks detected at the well or surface facilities. The submitted testing and monitoring plan accounts for leak detection monitoring at the well and surface facilities.

The information and opinions included in Schmit and Miller’s email that were not herein addressed are either inapplicable, irrelevant to the application, unsubstantiated, or previously addressed.

(43) The Commission received an email on June 10, 2024 from Kathy Carter (Carter) of Rockford, Iowa. Carter is in opposition to the three storage facility permits submitted by SCS #1, SCS #2, and SCS #3 (collectively called Summit in this paragraph). Carter questions whether anyone can be certain that carbon dioxide will stay within the pipeline, injection wells, and injection zone, notes Summit’s lack of experience with building a pipeline or injection wells, and the dangers of carbon dioxide creating carbonic acid as reasons for opposition.

The Commission notes Carter was not identified as a mineral owner or surface owner requiring notification for any of the three storage facilities.

Summit provided supplements on June 24, 2024 including a response to Carter, stating these concerns were addressed in its applications and through testimony at the hearings. The Commission agrees.

(44) The Commission received an email on June 10, 2024 from Lisa Ritzert (Ritzert). Ritzert is in opposition to the proposed storage facility. Ritzert believes carbon capture and sequestration is an underregulated industry that needs greater consideration for people, community, and resource protection and safety before pipelines of this nature can be considered. Ritzert states the intentions of these pipelines have not been clear and continues to change, but in any case, its clear monetary profits are being put ahead of people.

The Commission notes that Ritzert was not identified as a mineral owner or surface owner requiring notification for any of the three storage facilities.

SCS #1 provided supplements on June 24, 2024 including a response to Ritzert, stating it provided testimony that the flow lines that are part of the sequestration projects will be built in accordance with standards set forth in 49 CFR 195 (Code of Federal Regulations –Transportation of Hazardous Liquids by Pipeline).

The information and opinions included in Ritzert’s email are directed at the transportation of carbon dioxide by pipeline rather than on the storage of carbon dioxide.

(45) The Commission received an email on June 10, 2024 from Paul Schock (Schock) in support of the three storage facility permits submitted by SCS #1, SCS #2, and SCS #3 (collectively called Summit in this paragraph). Schock owns land in Sections 19 and 33, Township 142 North, Range 88 West, Mercer County, North Dakota. Schock stated Summit has been very transparent, open, and honest and believes the project will sustain and enhance the agricultural industry, provide jobs and tax revenue for the counties and state, and provide supplemental income to farmers and ranchers. The Commission notes Schock was identified as a surface owner for the BK Fischer storage facility requiring notification by SCS #2.

(46) The Commission received an email on June 10, 2024 from Gary and Carla Poeckes of Lake View Services, LLC (LVS), located in Beulah and Trenton, North Dakota, in support of the three storage facility permits submitted by SCS #1, SCS #2, and SCS #3 (collectively called Summit in this paragraph). LVS is a crane and trucking company that has been serving western North Dakota for 13 years and has worked with Summit for the past two years to maintain their well sites. LVS states Summit is easy to communicate with, pays its bills promptly, and is always willing to assist them.

(47) The Commission received a letter on June 10, 2024 from North Dakota State Representative, Anna Novak (Novak) of District 33 in support of the three storage facility permits submitted by SCS #1, SCS #2, and SCS #3. Novak states North Dakota's significant history of carbon management, the benefit to economic development, and the level of voluntary landowner support for the storage facilities as reasons for her support. The Commission notes Novak was not identified as a mineral owner or surface owner requiring notification for any of the three storage facilities.

(48) Kenneth Hintz (Hintz) appeared on June 13, 2024 to provide testimony. Hintz testified to owning the NE/4 of Section 9 and the NE/4 of Section 17, Township 142 North, Range 86 West, Oliver County, North Dakota. Hintz is in support of Summit Carbon Solution's project (sic; Hintz reference to Summit Carbon Solution's project is equivalent to the storage facility permit applications for SCS #1, SCS #2, and SCS #3) because it will provide new industry for North Dakota, provide supplemental income for farmers and ranchers, and new tax dollars for the county. Hintz explains he has worked with the company since 2021, and the experiences have been good and open. The Commission notes Hintz was identified as a surface owner for the KJ Hintz storage facility requiring notification by SCS #3.

(49) SCS #1 provided supplements on June 24, 2024 including a response to those who submitted written comments in support of the three storage facility permits. SCS #1 believes the supporting comments are indicative of the over 450 landowners who entered into voluntary agreements for the development of their pore space.

INTERVENOR EXAMINATION:CROSS EXAMINATION:

(50) Counsel for the Landowner Intervenors appeared in these consolidated matters, cross examined SCS #1, SCS #2, and SCS #3 (collectively called Summit in this Intervenor Examination Section) and provided direct examination as to why the storage facility permits should be denied by the Commission.

(51) Counsel for the Landowner Intervenors questioned the accuracy of the North American Industry Classification System (NAICS) code provided in Summit's testimony. Summit, during later testimony, provided the correct NAICS code for the proposed capture sources (ethanol facilities). The corrected NAICS code meets NDAC Section 43-05-01-07.1(3)(c).

(52) Counsel for the Landowner Intervenors questioned Summit on what "mechanical" miscalculation means in Article 2.4 (Correcting Errors) of the Storage Agreement. Summit responded it was a typographical error that should read "mathematical" miscalculation and would provide a supplement amending the Storage Agreement. The amended Storage Agreement submitted on June 24, 2024 corrected the typographical error.

(53) Counsel for the Landowner Intervenors questioned Summit on its reasoning to include the following terms within the Storage Agreement and Exhibit D to the Storage Agreement (Pore Space Lease):

Storage Agreement

(a) Article 3.3 (Amendment of Leases and Other Agreements)

(b) Article 7.1 (Warranty and Indemnity)

(c) Article 10.2 (Waiver of Rights to Partition)

(d) Article 16.2 (Joinder in Dual Capacity)

Pore Space Lease

(a) Warranty of Title within Section 18 (Warranty of Title and Quiet Enjoyment)

(b) Section 25 (Confidentiality)

Summit agreed to strike the terms above and provide a supplement amending the Storage Agreement and Pore Space Lease. The amended Storage Agreement and Pore Space Lease submitted on June 24, 2024 has the terms above stricken.

(54) Counsel for the Landowner Intervenors asked Summit why it chose not to include the no surface facilities clause to the Pore Space Lease agreement. Summit responded it did not anticipate that to be a difficult addition. The amended Storage Agreement submitted on June 24, 2024 added a No Surface Occupancy clause as the first paragraph under Article 8 (Easements or

Use of Surface) which states in part that unless agreed to in writing with the owner of the surface estate, the operator shall not place any surface facilities on the surface estate owned by any pore space owner within the boundaries of the facility area.

(55) Counsel for the Landowner Intervenor asked Summit to clarify Section 34 (Insurance) in the Pore Space Lease and add a waiver of subrogation with respect to the insurance it is carrying for the landowners. Summit responded it would submit an amended Pore Space Lease. The amended Pore Space Lease submitted on June 24, 2024 includes a term that the policy shall be endorsed or include a provision waiving insurer rights of subrogation against the Lessor.

(56) Counsel for the Landowner Intervenor asked Summit to explain its understanding of NDCC Section 38-22-17 where it states in part, "Once a certificate is issued: Title to the storage facility and to the stored carbon dioxide transfers, without payment of any compensation to the State." Summit responded its understanding is that Summit would transfer the leasehold rights as well as the stored carbon dioxide. NDCC Section 38-22-16 states in part, "The storage operator has title to the carbon dioxide injected into and stored in a storage reservoir and holds title until the commission issues a certificate of project completion." NDCC Section 38-22-17 states in part that, "Once a certificate is issued: Title acquired by the state includes all rights and interests in, and all responsibilities associated with, the stored carbon dioxide."

(57) Counsel for the Landowner Intervenor asked Summit if its geologic model could be replicated without the 3D seismic survey information. Summit explained the 3D seismic information was used to interpret the variograms used in the geologic model and the variogram information is available in the permit application so a third-party could replicate the geologic model but it would not be an exact duplicate as the 3D seismic data was used to interpret seismic horizons for the structural model. The Commission notes that seismic data is proprietary and the use of seismic data is not required pursuant to NDAC Section 43-05-01-05(1)(b)(2)(k).

(58) Counsel for the Landowner Intervenor asked Summit if the land that sits in between the area of reviews, as shown in Exhibit LO-63, would see pressure interference due to the injection into the three proposed storage facilities and if such pressure interference would limit the ability to inject into the pore space in the reservoir located across the questioned lands. Summit responded that an operator could still develop and store carbon dioxide in the pore space but that the regulatory limitation placed on the bottom hole pressure might impact potential injection rates. The Commission agrees.

**DIRECT EXAMINATION:**

(59) Counsel for the Landowner Intervenor called upon five witnesses, Shane Bofto (Bofto) of Hydro Solutions, Inc., Paul Ted Doughty (Doughty) of PTD Geoscience, LLC, Paul Michael Button (Button) of Button Petroleum Management LLC, Chris Stockness (Stockness) of Shenhon Company, and Kurt Michael Swenson (Swenson) who is one of the Landowner Intervenor, representing the Swenson Trust.

(60) Bofto testified he is capable and ready to run the geochemical model in the PHREEQC software once the data and input files are received. Summit previously testified PHREEQC is a

free model that anyone can use and all input data used in the PHREEQC models is described in the permit application. The Commission notes the PHREEQC software is a public domain geochemical modeling software available from the U.S. Geological Survey and agrees that the data to replicate the PHREEQC modeling is available within the storage facility permit application.

(61) Button testified he is capable and ready to run the numerical simulation model using Computer Modeling Group Ltd. (CMG) software once the data and input files are received. The Commission stands by its assertion that Counsel for the Landowner Intervenor had or could have had this information as discussed in aforementioned Paragraph (27).

(62) Stockness testified he was hired by the Landowner Intervenor to perform a valuation or credible analysis on the pore space rights of the Landowner Intervenor's lands in Mercer and Oliver Counties, North Dakota. Stockness stated he was unable to provide an opinion on what fair market value is of pore space located in Mercer, Oliver, and Morton Counties, North Dakota. The Commission notes it does not set or evaluate the fair market value of pore space as those terms are negotiated between the applicant (storage operator) and the pore space owners.

(63) Swenson testified to being the trustee for the Swenson Trust, which owns the lands mentioned in aforementioned Paragraph (18a). Swenson also testified to recently signing a purchase agreement for more land interest in Section 20, Township 142 North, Range 87, Oliver County, North Dakota and having options on another 480 acres in that area. Swenson testified he is not against the applicant Summit or the proposed storage facilities, but he does disagree with the use of taxpayer funds to reward their unconstitutional taking of private property. Swenson testified to the following, as being the reasons, the Commission should deny these applications:

- (a) Swenson believes NDCC Chapter 38-22 amalgamation law is a taking of private property that does not allow the private owner a constitutionally guaranteed judicial hearing or trial by a jury to determine just compensation if an agreement is not reached between the private owner and applicant.
- (b) Swenson believes Summit has not made a good-faith effort to get his consent for the pore space owned by himself, the Swenson Trust, and the group of landowners he is representing (Landowner Intervenor).
- (c) Swenson does not believe Summit's proposed storage facilities are accomplishing the policy goals listed under NDCC Chapter 38-22.
- (d) Swenson testified he does not believe equitable compensation is occurring or that the Commission has the information available to determine if equitable compensation is being met as required by NDCC Chapter 38-22.
- (e) Swenson testified he has been severely prejudiced by the State's lack of enforcement of North Dakota Rules of Civil Procedure as he has not received one piece of discovery from Summit. Swenson testified he believes he has been unfairly treated as his Petition to Intervene was only granted for the BK Fischer application submitted by SCS #2 but Minnkota, who is to see smaller pressure increases in its

leased pore space, as shown in Exhibit LO-86, was granted approval to petition in all three storage facilities.

- (f) Swenson testified he believes the storage facility boundary that determines which pore space owners are paid is arbitrary and inaccurate.
- (g) Swenson believes the pore space he owns outside of the storage facility area boundaries will be negatively affected, as shown by Exhibit LO-63, by the injection operations. Swenson testified that much of his land will have pressure trespass in the pore space rendering him unable to use it for a net cash flow and that he is not being paid for his pore space being damaged.
- (h) Swenson testified Summit has not submitted into the record any evidence of a potential vapor release model, concentration gradients of the carbon dioxide that may be released, and its potential impact to public receptors should a release occur. Swenson believes this information is necessary before making a determination on whether the project could endanger human health.

The Commission notes the following in response to Swenson's testimony:

- (a) At the hearings and in their various motions the Landowner Intervenor argue the Commission has violated their constitutional rights including due process. As part of issuing this order, however, the Commission notes it does not determine the constitutionality of North Dakota statutes and laws. The Commission finds NDCC Section 38-22-10 to be the current law.
- (b) NDCC Section 38-22-08(4) requires the storage operator to make a good-faith effort to get the consent of all persons who own the storage reservoir's pore space and NDCC Section 38-22-08(5) requires the storage operator to obtain the consent of persons who own at least sixty percent of the storage reservoir's pore space. Summit testified that through good-faith negotiations with over 450 landowners, it acquired pore space agreements for over 146,500 acres and during those negotiations made changes to the pore space agreement, including a 50% increase in the royalty payment rate, the addition of a Favored Nations clause, and offering of a no surface facilities clause (No Surface Occupancy). Exhibit 5A, 5B, and 5C show SCS #1, SCS #2, and SCS #3 have leased approximately 89.14%, 92.43%, and 96.77%, respectively, across the three proposed storage facilities. A good-faith effort does not always result in an agreement between parties and a good-faith effort was made by Summit as indicated by the large percentage of consenting pore space owners.
- (c) The approval of Summit's three storage facility permit applications is in the public interest by promoting the policy stated in NDCC Section 38-22-01.
- (d) NDCC Section 38-22-08(14) requires that all nonconsenting pore space owners are or will be equitably compensated. "Equitably compensated" in this statute is not to be interpreted as assessing or setting the fair market value of pore space. Summit's

one-phase formula based on surface acres and implementation of the Favored Nation clause under Section 32 of the Pore Space Lease agreement will equitably compensate all pore space owners within the storage facilities. The Commission does not set or evaluate the fair market value of pore space as those terms are negotiated between the applicant (storage operator) and the pore space owners; however over 90% of the pore space owners across the three storage facilities signed pore space lease agreements, indicating the majority of the pore space owners agree they are being fairly compensated for the use of their pore space.

- (e) Minnkota's Petition to Intervene was granted only upon Minnkota demonstrating its correlative rights are impacted.
- (f) Swenson is not qualified to evaluate the accuracy of the storage facility boundary. The storage facility permit application and testimony provided by Summit at the hearing adequately define the horizontal and vertical boundaries of the storage reservoir.
- (g) Swenson is not qualified to evaluate the effect the injection operations and associated pressure front may have on his pore space. This topic has been discussed in aforementioned Paragraph (58).
- (h) Dispersion models are not required to be submitted with storage facility permit applications. The storage facility permit application's geologic and area of review evaluations indicate the confining zone properties and lack of pathways for migration present across the storage reservoir will prevent carbon dioxide from leaking out of or for other substances to leak into the storage reservoir, as required pursuant to NDCC Section 38-22-08(8) and (9). The storage facility permit application includes a testing and monitoring plan, postinjection site care and facility closure plan, and emergency and remedial response plan, and these plans if followed will ensure compliance with NDCC Section 38-22-08(13). The storage facility permit as proposed will not endanger human health nor unduly endanger the environment and will not adversely affect surface waters or formations containing fresh water, as required pursuant to NDCC Section 38-22-08(7) and (10).

#### TECHNICAL REVIEW:

(64) SCS #1's application provides adequate data to show suitability of the Broom Creek Formation for geologic storage of carbon dioxide in the facility area. SCS #1 testified the storage facility was suitable and feasible for carbon dioxide injection and storage pursuant to NDCC Section 38-22-08(2). The Commission agrees.

(65) SCS #1's application provides adequate modeling of the storage reservoir for delineation of the facility area pursuant to NDAC Section 43-05-01-05, provides adequate monitoring to detect if carbon dioxide is migrating into properties outside of the facility area pursuant to NDAC Section 43-05-01-11.4, and should a vertical or lateral release of carbon dioxide

from the facility occur, emergency and remedial plans are in place pursuant to NDAC Section 43-05-01-13.

(66) NDCC Section 38-22-08(6) requires the Commission to find whether the storage facility contains commercially valuable minerals and, if it does, a permit may be issued only if the Commission is satisfied that the interests of the mineral owners or mineral lessees will not be adversely affected or have been addressed in an arrangement entered into by the mineral owners or mineral lessees and the storage operator. The proposed storage facility does not contain commercially valuable minerals. The amalgamated storage reservoir pore space to be utilized is not hydrocarbon bearing as determined from test data included with the application. There has been no historic hydrocarbon exploration, production, or studies suggesting there is an economic supply of hydrocarbons from formations above or below the Broom Creek Formation within the proposed storage facility area. Lignite coal is mined near the proposed storage facility area from the Sentinel Butte Formation, within the Beulah Horizon of the Beulah-Zap Interval. Coal seams exist in the Bullion Creek Formation. All coal seams present in the Fort Union Group above the facility area will not be impacted by this project as there are no current or future planned mining activities within the proposed storage facility area. SCS #1 testified if operators decide to drill wells for hydrocarbon exploration or production in the future, the lateral extent of the stabilized plume and the pressure differential are minor enough to allow for either horizontal drilling without penetrating the stored carbon dioxide or vertical drilling with proper controls, for hydrocarbon exploration below the Broom Creek Formation. The Commission agrees.

(67) The MCE Pipeline is an approximately 2,500-mile proposed carbon dioxide transmission pipeline that will be constructed, owned, and operated by SCS Carbon Transport LLC (SCS CT). SCS #1 testified the MCE Pipeline will be capable of transporting up to 18.5 million metric tons of carbon dioxide annually from anthropogenic sources, including ethanol facilities and other industries across the Midwest, including Iowa, Minnesota, Nebraska, South Dakota, and North Dakota, to be stored in three storage facilities, namely the TB Leingang, BK Fischer, and KJ Hintz located in Mercer, Morton, and Oliver Counties, near the city of Beulah, North Dakota, respectively owned and operated by SCS #1, SCS #2, and SCS #3. SCS #1 testified Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC are all wholly owned subsidiaries of SCS Permanent Carbon Storage LLC (SCS PCS), and SCS Carbon Transport LLC and SCS Permanent Carbon Storage LLC are both wholly owned subsidiaries of Summit Carbon Solutions, LLC. SCS #1 testified at the time of the hearing, 57 ethanol plants had signed contracts, including Tharaldson Ethanol in Casselton, North Dakota.

(68) The dynamic reservoir simulation for SCS #1's application indicated approximately 6.22 million metric tons of carbon dioxide annually or 124.4 million metric tons over the 20-year injection period, could be stored in the TB Leingang storage facility, without exceeding the maximum bottom hole pressure constraint, derived as 90% of the formation fracture pressure of the Broom Creek Formation and a well head pressure of 2,100 psi during injection. The capacity for the three storage facilities combined was modeled to be approximately 17.6 million metric tons of carbon dioxide annually or 352 million metric tons over the 20-year injection period. SCS #1 testified the 57 ethanol plants account for approximately 16 million metric tons of carbon dioxide annually and should additional volumes be contracted that would exceed the capacity of the three storage facilities, an additional storage facility permit would be pursued.

(69) SCS CT has submitted a permit to the North Dakota Public Service Commission (PSC) for approximately 332 miles of the MCE Pipeline that is within the state of North Dakota. Transition from the PSC jurisdiction transmission line (MCE Pipeline) to the flow lines for the three storage facilities will be at the terminus point located in Section 5, Township 141 North, Range 86 West, Oliver County, North Dakota. The entire length of the approximately 8.6-mile flow line to be utilized for carbon dioxide transportation from the terminus point (the terminus point is considered part of the injection facility for the proposed TB Leingang storage facility) is under the jurisdiction of the Commission.

(70) The 20-inch and 24-inch flow line will be high-strength carbon steel pipe constructed in accordance with American Petroleum Institute (API) 5L X-70 PSL 2 (2018) requirements and is anticipated to have maximum operating pressure of 2,183 psig and maximum design flow rate of 936 million standard cubic feet per day. The flow line will have an impressed current cathodic protection (ICCP) system installed to mitigate external corrosion. SCS #1 testified the flow lines for all three storage facilities, the MCE Pipeline, and the ICCP system will be constructed and operated in compliance with the Pipeline and Hazardous Materials Safety Administration's Title 49 of the Code of Federal Regulations, Part 195. SCS #1 testified the flow line would be operated in a manner that would not exceed the surface and bottom hole pressure constraints of the injection wells.

(71) The flow line will be equipped with flowmeters, pressure gauges, and a Supervisory Control and Data Acquisition (SCADA) system to detect leaks. The SCADA system will be integrated to allow SCS #1, SCS #2, SCS #3, SCS PCS, and SCS CT to share operational data and controls in real-time to ensure operational parameters are safely maintained between all injection sites. Carbon dioxide gas detection stations will be placed on the injection well heads and inside the pump and metering buildings. SCS #1 testified the flow line will be owned by SCS #1 but operated by SCS CT, as a single integrated system, with the SCS #2 flow line, SCS #3 flow line, and MCE Pipeline.

SCS #1 testified each injection well will have a dedicated mass flowmeter in addition to a mass flowmeter located at the terminus point (custody transfer point from MCE Pipeline to SCS #1's flow line). SCS #1 was questioned by Commission staff at the hearing on June 12, 2024 if it would be opposed to a requirement to add flowmeters at the beginning of each individual flow line to show custody transfer to SCS #2 and SCS #3, to which SCS #1 had no opposition. SCS #1 provided a supplemental filing on June 24, 2024 to clarify prior testimony, to add it does not object to the requirement but does not believe the additional custody transfer points (flowmeters) will add significant value to the accuracy of the metering and leak detection system. SCS #1 explains the addition of these flowmeters would require additional resources to calibrate meters and stream quality analyzers and require the addition of a 24-inch smart tool receiver and launcher. SCS #1 recommends such additions be contemplated in the future should one of the storage facilities be sold.

(72) The projected composition of the commingled carbon dioxide stream being transported by the MCE Pipeline at the time of this application is anticipated to be at least 98.25% carbon dioxide, less than 1.44% nitrogen, less than 0.31% oxygen, with trace quantities of water,

hydrocarbons, hydrogen sulfide, sulfur, and glycol. The MCE Pipeline and storage facility have been conservatively designed to accommodate a carbon dioxide stream that is 95% carbon dioxide, 2% oxygen, and 3% nitrogen. The carbon dioxide stream composition used in the dynamic reservoir simulation was 98.25% carbon dioxide which SCS #1 testified represents the anticipated average carbon dioxide stream based on compositional tests from the 57 ethanol plant sources and provides for a more representative plume boundary. SCS #1 testified a test would be required for any new proposed sources to confirm their carbon dioxide stream meets or exceeds 95% carbon dioxide. Carbon dioxide stream test results for any new proposed sources shall be submitted to the Commission, for review through the Department of Mineral Resources Oil and Gas Division. The Commission finds SCS #1 has demonstrated the carbon dioxide stream is of a quality that allows it to be safely and efficiently stored in the storage reservoir pursuant to NDCC Section 38-22-08(3).

(73) The TB Leingang #1 well (File No. 40158) is a stratigraphic test well that will be drilled, tested, logged, and constructed to Class VI requirements, located 2,160 feet from the north line and 519 feet from the east line of Section 18, Township 141 North, Range 87 West, Oliver County, North Dakota. This well is to be converted to a Class VI injection well.

(74) The TB Leingang #2 well (File No. 40178) is a stratigraphic test well that will be drilled, tested, logged, and constructed to Class VI requirements, located 2,260 feet from the north line and 521 feet from the east line of Section 18, Township 141 North, Range 87 West, Oliver County, North Dakota. This well is to be converted to a Class VI injection well.

(75) The Milton Flemmer #1 well (File No. 38594), located 306 feet from the north line and 1,839 feet from the east line of Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota, is a stratigraphic test well that was used for reservoir characterization and constructed to Class VI requirements. This well is to be utilized as a direct method of monitoring the injection zone pursuant to NDAC Section 43-05-01-11.4.

(76) SCS #1 created a geologic model based on site characterization as required by NDAC Section 43-05-01-05.1 to delineate the area of review. Data utilized included seismic survey data, geophysical logs from nearby wells, and core data. Structural surfaces were interpolated with SLB's (formerly Schlumberger) Petrel software, and included formation top depths, data collected from the ANG #1 (Class I well), Flemmer #1 (File No. 34243), BNI #1 (File No. 34244), J-LOC #1 (File No. 37380), Liberty #1 (File No. 37672), MAG #1 (File No. 37833), Coteau #1 (File No. 38379), Milton Flemmer #1 (File No. 38594), Archie Erickson #2 (File No. 38622), and Slash Lazy H #5 (File No. 38701) wells; three 3D seismic surveys conducted at the Milton Flemmer #1, Archie Erickson #2, and Slash Lazy H #5; the J-LOC #1 and BNI #1; and the Liberty #1 locations; and one 5 mile long 2D seismic line near the J-LOC #1, BNI #1, and Liberty #1 locations. Well log data was used to pick formation tops, interpret lithology, estimate petrophysical properties, and determine a time-depth shift for seismic data in the Amsden Formation, the lower confining zone, the undifferentiated Spearfish/Opeche Formations, the upper confining zone, and the Broom Creek Formation, the injection zone. Geostatistics were used to distribute petrophysical properties within the model. Seismic data was used to reinforce interpolation of the formation tops to create structural surfaces, and to distribute lithologies and geologic properties in the model.

The numerical simulation model permeability was tuned globally by applying a permeability multiplier to match the reservoir properties estimated from the Milton Flemmer #1 data. SCS #1 explained that the Milton Flemmer #1 injectivity test results, well logs, and core analysis, and area seismic data were reviewed before deciding to use a 2.5 multiplier and its technical experts are confident in using this multiple based on their years of experience studying the Broom Creek Formation. The Commission notes the use of permeability multipliers is typical in reservoir modeling and finds the use of the 2.5 multiple reasonable given the information provided, the lack of operational data for history matching, and the requirement for storage operators to reevaluate the model at a minimum once every five years pursuant to NDAC Section 43-05-01-05.1.

Sensitivity analyses are used to determine how input parameters affect a model's output. SCS #1 testified sensitivity analyses were ran on injection rates, bottom hole pressure conditions, well head temperatures, and well head pressures, and certainty cases were run on property distribution. SCS #1 explained that a model without sensitivity analyses done would provide enough insight to be able to safely inject for at least five years until the first reevaluation requirement. The Commission agrees.

Based on the reservoir pressure calculated at the TB Leingang #1 well, critical threshold pressure for this storage facility exists in the Broom Creek Formation prior to injection. For area of review delineation purposes, critical threshold pressure has the same meaning as pressure front, defined in NDAC Section 43-05-01-01. The EPA's "UIC Program Class VI Well Area of Review Evaluation and Corrective Action Guidance" lists several methods to estimate an acceptable pressure increase for over-pressurized reservoirs, including a multiphase numerical model designed to model leakage through a single well bore, or through multiple well bores in the formation. SCS #1 used this method to determine cumulative leakage potential along a hypothetical leaky well bore without injection occurring, estimated to be 0.01 cubic meters over 20 years. Incremental leakage with injection occurring was estimated to be a maximum of 0.017 cubic meters over 20 years. A value of 1 cubic meter is the lowest meaningful value that can be produced by the Analytical Solution for Leakage in Multilayered Aquifers (ASLMA) model as smaller values likely represent statistical noise. An actual leaky well bore or transmissive conduit would likely communicate with the Inyan Kara Formation. SCS #1's application noted no indications of communication between the Broom Creek Formation and Inyan Kara Formation were observed, and that nothing in fluid samples indicated communication to an Underground Source of Drinking Water (USDW).

The predicted extent of the carbon dioxide plume from beginning to end of life of the project, at the time when the carbon dioxide plume ceases to migrate into adjacent cells of the geologic model during the numerical simulation, referred to as stabilized plume, was used to define the storage facility boundary in this case. Pursuant to NDAC Section 43-05-01-05(1)(b)(2) the area of review included a one-mile buffer around the storage facility boundaries. Time lapse seismic surveys will be used to monitor the extent of the carbon dioxide plume.

SCS #1 testified plume stabilization is evaluated by reviewing the rate of change in the carbon dioxide plume area over time using one-year time steps and a rate cutoff of less than 0.2 square miles of change per year was used to determine the stabilized plume boundary; a carbon dioxide saturation cutoff of 5% was used to define the stabilized plume boundary because 5% is the lowest

detectable limit using seismic surveys; and a variable buffer was used on the stabilized plume boundary so the storage facility area included describable lands.

(77) The area proposed to be included within the storage facility is as follows:

TOWNSHIP 142 NORTH, RANGE 87 WEST

ALL OF SECTION 32, THE SW/4 AND E/2 OF SECTION 31, THE NW/4 AND S/2 OF SECTION 33, AND THE S/2 SW/4 AND SW/4 SE/4 OF SECTION 34,

TOWNSHIP 141 NORTH, RANGE 88 WEST

ALL OF SECTIONS 12, 13, 14, 23, 24, 25, 26, AND 36, THE NE/4 AND S/2 OF SECTION 1, THE NE/4 AND S/2 OF SECTION 11, THE SE/4 NE/4 AND E/2 SE/4 OF SECTION 15, THE E/2 E/2 OF SECTION 22, AND THE N/2 OF SECTION 35,

TOWNSHIP 141 NORTH, RANGE 87 WEST

ALL OF SECTIONS 3, 4, 5, 6, 7, 8, 9, 10, 15, 16, 17, 18, 19, 20, 21, 22, 26, 27, 28, 29, 30, 31, 32, 33, 34, THE W/2 W/2 OF SECTION 2, THE W/2 OF SECTION 11, THE W/2 SECTION 14, THE NW/4 AND S/2 OF SECTION 23, THE W/2 NW/4 AND NW/4 SW/4 OF SECTION 25, AND THE W/2 AND W/2 E/2 OF SECTION 35,

TOWNSHIP 140 NORTH, RANGE 88 WEST

ALL OF SECTION 1, LOT 1, LOT 2, LOT 3, LOT 4, SE/4 NE/4, AND NE/4 SE/4 OF SECTION 2, LOT 1, LOT 2, LOT 3, LOT 4 OF SECTION 3, AND THE NE/4 OF SECTION 12,

TOWNSHIP 140 NORTH, RANGE 87 WEST

ALL OF SECTION 6, LOT 2, LOT 3, LOT 4, S/2 NW/4 OF SECTION 4, LOT 1, LOT 2, LOT 3, LOT 4, S/2 N/2 OF SECTION 5, AND THE N/2 OF SECTION 7.

ALL IN MERCER, MORTON, AND OLIVER COUNTIES AND COMPRISING OF 29,444.72 ACRES, MORE OR LESS.

(78) In the Milton Flemmer #1 well, the Spearfish, Minnekahta, and Opeche Formations, hereinafter referred to as the Spearfish/Opeche Formations, unconformably overlie the Broom Creek Formation. The Minnekahta Formation pinches out within the storage facility area, and where it does not exist, the Spearfish and Opeche Formations are considered undifferentiated. The Broom Creek Formation, the upper confining Spearfish/Opeche Formations, and the lower confining Amsden Formation are laterally extensive throughout the area of review.

(79) Core analysis of the Broom Creek Formation in the Milton Flemmer #1 well shows sufficient permeability to be suitable for the desired injection rates and pressures without risk of creating fractures in the injection zone. Thin-section and SEM-EDS (energy-dispersive spectroscopy) micrograph investigation shows the Broom Creek Formation's most porous sample shows moderately well-sorted, subrounded to subangular, and fine quartz and feldspar grains, with quartz grains constituting about 87% of the composition. The least porous sample is located at the Spearfish/Opeche Formations and Broom Creek Formation boundary and primarily consists of

anhydrite, dolomite, and clay minerals with some microfractures. Microfracture testing in the Milton Flemmer #1 well, at a depth of 5,950 feet determined the breakdown pressure of the Broom Creek Formation to be 7,088 psi, with a fracture propagation pressure of 4,288 psi, and a fracture closure pressure of 4,047 psi, yielding a formation fracture gradient of 0.718 psi/ft.

Core analysis of the overlying Spearfish/Opeche Formations shows sufficiently low permeability to stratigraphically trap carbon dioxide and displaced fluids. Thin-section and SEM-EDS micrograph investigation shows the Spearfish/Opeche Formations' most porous sample has tightly associated fine grains of quartz, feldspar, and dolomite with anhydrite and clay cement, with isolated and discontinuous pore spaces. The least porous sample is located at the Spearfish/Opeche Formations and Broom Creek Formation boundary and primarily consists of anhydrite with some microfractures. Microfracture testing in the Milton Flemmer #1 well at 5,771 feet observed no formation breakdown with a maximum of approximately 5,580 psi applied. A propagation pressure of 4,769 psi was observed, yielding a Spearfish/Opeche Formations fracture gradient of 0.82 psi/ft but was deemed associated with drilling-induced fractures. The inability to break down the Spearfish/Opeche Formations indicates the formations are very tight competent rock and exhibit sufficient geologic integrity to contain the injected carbon dioxide. The maximum bottom hole pressures of 3,663 psi and 3,669 psi, respectively for the TB Leingang #1 and TB Leingang #2 injection wells, are estimated to be 90% of the formation fracture pressure as calculated by the 0.718 psi/ft fracture gradient of the Broom Creek Formation multiplied by the depth of the top perforation in the injection zone. Injection formation breakdown would be observed and recorded if permitted operational pressures were exceeded before compromising the confining zone.

Core analysis of the underlying Amsden Formation shows sufficiently low permeability to stratigraphically contain carbon dioxide and displaced fluids. Thin-section and SEM-EDS micrograph investigation shows the most porous sample has moderately sorted, fine grained subangular quartz and feldspar grains with anhydrite cement, however this layer is isolated and confined between an ultralow permeable layer of clay-rich quartz dolomite above and anhydrite-rich layer below.

(80) SCS #1 has defined the horizontal and vertical boundaries of the storage reservoir and buffers have been included to ensure the storage facility is operated safely and as contemplated pursuant to NDCC Section 38-22-08(12).

(81) The in situ fluid of the Broom Creek Formation in this area is in excess of 10,000 parts per million of total dissolved solids.

(82) Investigation of wells within the area of review found no vertical penetrations of the confining or injection zones requiring corrective action. The area of review will be reevaluated at a period not to exceed five years from beginning of injection operations.

(83) The Fox Hills Formation is the deepest USDW within the area of review. Its base is situated at a depth of 1,661 feet at the location of the Milton Flemmer #1 well, leaving approximately 4,156 feet between the base of the Fox Hills Formation and the top of the Broom Creek Formation.

(84) Fluid sampling of shallow USDWs has been performed to establish a geochemical baseline, with additional localized baseline sampling proposed for the Fox Hills Formation and other shallow wells under investigation. Future sampling is proposed in SCS #1's application pursuant to NDAC Section 43-05-01-11.4. A baseline of groundwater samples will be established and submitted to the Commission, for review through the Department of Mineral Resources Oil and Gas Division prior to injection operations.

(85) Soil sampling is proposed pursuant to NDAC Section 43-05-01-11.4. A baseline of soil gas concentrations will be established and submitted to the Commission, for review through the Department of Mineral Resources Oil and Gas Division prior to injection operations. Soil gas profile stations will be located near the TB Leingang #1 and TB Leingang #2 injection wells and Milton Flemmer #1 monitoring well locations.

(86) The top of the Inyan Kara Formation is at 4,444 feet, approximately 2,783 feet below the base of the Fox Hills Formation at the location of the Milton Flemmer #1 well and it provides an additional zone of monitoring between the Fox Hills Formation and the Broom Creek Formation to detect vertical carbon dioxide or fluid movement.

(87) No known or suspected regional faults or fractures with transmissibility have been identified during the site-specific characterization. Formation imaging logs show primarily litho-bound resistive fractures commonly filled with anhydrite and litho-bound conductive fractures filled with clay within the Opeche Formation, one conductive litho-bound fracture in the Minnekahta Formation, and one resistive litho-bound fracture and one resistive continuous fracture in the Spearfish Formation. Core analysis confirmed fractures observed in the Opeche Formation were tectonic, vertical to subvertical, closed, and cemented with anhydrite. The Amsden Formation is considered to be nonfractured, however a few litho-bound conductive and resistive fractures were identified with the presence of horizontal compaction features (stylolites). Core analysis confirmed the fractures were discontinuous and filled. No microfaults were found within the aforementioned formations. Breakout and tensile fractures induced by drilling were identified in the Opeche, Broom Creek, and Amsden Formations. Seismic data used to characterize the subsurface within the project area showed no indication of faulting with sufficient vertical extent to transect the storage reservoir and confining zones. SCS #1 testified the fractures found through formation imaging logs and core analysis were filled with precipitated minerals and all fractures lack sufficient permeability or vertical extent to act as fluid pathways.

(88) Fluid samples from the Inyan Kara Formation and Broom Creek Formation suggest they are hydraulically isolated from each other, supporting that the confining formations above the Broom Creek Formation are not compromised by migration pathways.

(89) Geochemical simulation performed with a conservative injection stream and data obtained from the confining and injection zones determined no observable change in injection rate or pressure, and simulations of conservatively high carbon dioxide exposure to the cap rock determined geochemical changes will be minor and only at the contact with the injection zone and will not cause substantive deterioration compromising confinement. The injection stream composition used for geochemical modeling contained a higher amount of oxygen than the anticipated stream to represent the conservative scenario because oxygen is the most reactive

constituent in the anticipated injection steam. The confining zones have adequate thickness to both act as immediate containment and provide a measurable vertical buffer.

(90) Risk of induced seismicity is not a concern based on existing studies of major faults within the area of review, tectonic boundaries, and relatively stable geologic conditions surrounding the proposed injection site. SCS #1 testified a passive seismicity monitoring array would be installed to provide continuous near-real-time reporting of seismic events and once the layout is known it will be submitted to the Commission, for review through the Department of Mineral Resources Oil and Gas Division prior to injection operations.

(91) The storage facility permit application, testimony provided at the hearing, and information detailed in the aforementioned paragraphs in the Technical Review section provide evidence that the storage facility as proposed will:

- (a) Not adversely affect surface waters or formations containing surface waters pursuant to NDCC Section 38-22-08(7).
- (b) Prevent carbon dioxide from escaping the storage reservoir pursuant to NDCC Section 38-22-08(8).
- (c) Not allow substances to enter the storage reservoir that could compromise the objectives of NDCC Chapter 38-22 or the integrity of the storage reservoir pursuant to NDCC Section 38-22-08(9).
- (d) Not endanger human health nor unduly endanger the environment, pursuant to NDCC Section 38-22-08(10) as supported by aforementioned Paragraphs (a) through (c) above.
- (e) Have established monitoring facilities and protocols to assess the location and migration of carbon dioxide injected for storage and the storage operator will ensure compliance with all permit, statutory, and administrative requirements pursuant to NDCC 38-22-08(13).

(92) NDAC Section 43-05-01-11.3(3) requires the storage facility operator to maintain pressure on the annulus that exceeds the operating injection pressure, unless the Commission determines that such a requirement might harm the integrity of the well or endanger USDWs. SCS #1 testified its intention to submit a variance request with the injection permit to use less than a 300 psi nitrogen cushion to maintain constant positive pressure on the well annulus in each injection well. The Commission believes placing pressure on the annulus that exceeds the operating injection pressure will create a risk of micro annulus by debonding of the long string casing-cement sheath during the operational life of the well. A micro annulus would harm external mechanical integrity and provide a potential pathway for endangerment of USDWs.

(93) The two injection wells are proposed to be equipped with distributed temperature sensing (DTS) and distributed acoustic sensing (DAS) fiber optic cables enabling continuously

monitored external mechanical integrity. The planned monitoring well, Milton Flemmer #1 is equipped with DTS/DAS.

(94) SCS #1 testified Summit's project (reference to Summit's project means the three storage facilities, TB Leingang, BK Fischer, and KJ Hintz and the MCE Pipeline which are owned by subsidiaries of Summit Carbon Solutions, LLC) will benefit the agricultural and energy industries of North Dakota, the U.S. economy, and the ethanol plant participants (sources of carbon dioxide).

SCS #1 testified the project will benefit North Dakota by developing carbon capture storage (CCS) infrastructure, such as carbon dioxide pipeline infrastructure that will be a common carrier system that could be used by others, by commercially deploying CCS it provides support for others doing the same, and by benefiting the regional corn market as it will provide a significant demand for regional corn. By extension the corn market will have an impact on land prices and commodity prices that would benefit the U.S. economy. SCS #1 testified the project will benefit the ethanol plant partners as it will allow them to lower their carbon intensity score and enable them to participate in emerging low carbon fuel markets, both for fuel transportation and potentially sustainable aviation fuels. The Tharaldson Ethanol Plant, located in Casselton, North Dakota, is a plant partner that consumes approximately 15-20% of the corn grown in North Dakota annually.

More information is needed before establishing storage fees pursuant to NDAC Section 43-05-01-17 for the TB Leingang, BK Fischer, and KJ Hintz storage facilities.

(95) The approval of this application is in the public interest by promoting the policy established by the North Dakota Legislature pursuant to NDCC Section 38-22-01.

(96) The application submitted and testimony provided at the hearing, meet all requirements set by the Commission as required by NDCC Section 38-22-08(1).

IT IS THEREFORE ORDERED:

(1) The creation of the TB Leingang Broom Creek Storage Facility in Mercer, Morton, and Oliver Counties, North Dakota, is hereby authorized and approved.

(2) Summit Carbon Storage #1, LLC, its assigns and successors, is hereby authorized to store carbon dioxide in the Broom Creek Formation in the TB Leingang Broom Creek Storage Facility.

(3) The TB Leingang Broom Creek Storage Facility shall extend to and include the following lands in Mercer, Morton, and Oliver Counties, North Dakota:

TOWNSHIP 142 NORTH, RANGE 87 WEST

ALL OF SECTION 32, THE SW/4 AND E/2 OF SECTION 31, THE NW/4 AND S/2 OF SECTION 33, AND THE S/2 SW/4 AND SW/4 SE/4 OF SECTION 34,

TOWNSHIP 141 NORTH, RANGE 88 WEST

ALL OF SECTIONS 12, 13, 14, 23, 24, 25, 26, AND 36, THE NE/4 AND S/2 OF SECTION 1, THE NE/4 AND S/2 OF SECTION 11, THE SE/4 NE/4 AND E/2 SE/4 OF SECTION 15, THE E/2 E/2 OF SECTION 22, AND THE N/2 OF SECTION 35,

TOWNSHIP 141 NORTH, RANGE 87 WEST

ALL OF SECTIONS 3, 4, 5, 6, 7, 8, 9, 10, 15, 16, 17, 18, 19, 20, 21, 22, 26, 27, 28, 29, 30, 31, 32, 33, 34, THE W/2 W/2 OF SECTION 2, THE W/2 OF SECTION 11, THE W/2 SECTION 14, THE NW/4 AND S/2 OF SECTION 23, THE W/2 NW/4 AND NW/4 SW/4 OF SECTION 25, AND THE W/2 AND W/2 E/2 OF SECTION 35,

TOWNSHIP 140 NORTH, RANGE 88 WEST

ALL OF SECTION 1, LOT 1, LOT 2, LOT 3, LOT 4, SE/4 NE/4, AND NE/4 SE/4 OF SECTION 2, LOT 1, LOT 2, LOT 3, LOT 4 OF SECTION 3, AND THE NE/4 OF SECTION 12,

TOWNSHIP 140 NORTH, RANGE 87 WEST

ALL OF SECTION 6, LOT 2, LOT 3, LOT 4, S/2 NW/4 OF SECTION 4, LOT 1, LOT 2, LOT 3, LOT 4, S/2 N/2 OF SECTION 5, AND THE N/2 OF SECTION 7.

ALL IN MERCER, MORTON, AND OLIVER COUNTIES AND COMPRISING OF 29,444.72 ACRES, MORE OR LESS.

(4) Injection into the TB Leingang Broom Creek Storage Facility shall not occur until Summit Carbon Storage #1, LLC has met the financial responsibility demonstration pursuant to Order No. 33531.

(5) This authorization does not convey authority to inject carbon dioxide into the TB Leingang Broom Creek Storage Facility; an approved permit to inject for the TB Leingang #1 (File No. 40158) and TB Leingang #2 (File No. 40178) wells shall be issued by the Commission prior to injection operations commencing.

(6) The authorization granted herein is conditioned on the operator receiving and complying with all provisions of the injection permit issued by the Department of Mineral Resources Oil and Gas Division of the Industrial Commission and complying with all applicable provisions of NDAC Chapter 43-05-01 and this order.

(7) Definitions.

“Area of review” in this case means an area encompassing a buffer around the facility area of one mile.

“Broom Creek Formation” in this case means the stratigraphic interval from below the base of the undifferentiated Spearfish/Opeche Formations, found at a depth of 5,817 feet below the Kelly Bushing, to above the top of the Amsden Formation, found at a depth of 6,159 feet below the Kelly Bushing, as identified by the Array Induction Gamma log performed in the Milton Flemmer #1

well (File No. 38594), located in NW/4 NE/4 of Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota.

“Cell” in this case means individual cell blocks of the geologic model; each cell is approximately 1,000 feet by 1,000 feet.

“Facility area” means the areal extent of the storage reservoir as defined in Paragraph (3) above, that includes lands within the lateral boundary of the carbon dioxide plume from beginning of injection to the time the carbon dioxide plume ceases to migrate into adjacent geologic model cells.

“Storage facility” means the reservoir, underground equipment, and surface facilities and equipment used or proposed to be used in the geologic storage operation. Pursuant to NDCC Section 38-22-02, it does not include pipelines used to transport carbon dioxide to the storage facility.

(8) The storage facility operator shall comply with all conditions of this order, the permit to inject, and applicable provisions of NDAC Chapter 43-05-01. Any noncompliance constitutes a violation and is grounds for enforcement action, including but not limited to termination, revocation, or modification of this order pursuant to NDAC Section 43-05-01-12.

(9) In an administrative action, it shall not be a defense that it would have been necessary for the storage facility operator to halt or reduce the permitted activity in order to maintain compliance with this order, the permit to inject, and applicable provisions of NDAC Chapter 43-05-01.

(10) The storage facility operator shall take all reasonable steps to minimize or correct any adverse impact on the environment resulting from noncompliance with this order, the permit to inject, and applicable provisions of NDAC Chapter 43-05-01.

(11) The storage facility operator shall implement and maintain the provided emergency and remedial response plan pursuant to NDAC Section 43-05-01-13.

(12) The storage facility operator shall notify the Director within 24 hours of any release of carbon dioxide from the storage facility, flow lines, or of carbon dioxide detected outside of the injection zone. Where the Director or the storage facility operator obtains evidence that the injected carbon dioxide stream and associated pressure front may endanger an underground source of drinking water, the storage facility operator shall cease injection immediately, implement the emergency and remedial response plan approved by the Commission (insofar as the Commission has jurisdiction), and take all steps reasonably necessary to identify and characterize any release.

(13) The storage facility operator shall at all times properly operate and maintain all storage facilities which are installed or used by the storage facility operator to achieve compliance with the conditions of this order, the permit to inject, and applicable provisions of NDAC Chapter 43-05-01. Proper operation and maintenance includes effective performance, adequate funding, adequate operator staffing and training, and adequate laboratory and process controls, including

appropriate quality assurance procedures. This provision requires the operation of backup or auxiliary facilities or similar systems only when necessary to achieve compliance.

(14) This order may be modified, revoked and reissued, or terminated pursuant to NDAC Section 43-05-01-12. The filing of a request by the storage facility operator for and order modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance, does not stay any condition contained herein.

(15) The injection well permit or the permit to operate an injection well does not convey any property rights of any sort or any exclusive privilege.

(16) The storage facility operator shall furnish to the Director, within a time specified, any information which the Director may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this order, or to determine compliance thereof. The storage facility operator shall also furnish to the Director, upon request, copies of records required to be kept by this order, the permit to inject, and applicable provisions of NDAC Chapter 43-05-01.

(17) The storage facility operator shall allow the Director, or an authorized representative, upon presentation of credentials and other documents as may be required by law, to:

- (a) Enter upon the storage facility premises where records must be kept pursuant to this order and NDAC Chapter 43-05-01.
- (b) At reasonable times, have access to and copy any records that must be kept pursuant to this order and NDAC Chapter 43-05-01.
- (c) At reasonable times, inspect any facilities, equipment, including monitoring and control equipment, practices, or operations regulated or required pursuant to this order, the permit to inject, and NDAC Chapter 43-05-01.
- (d) At reasonable times, sample or monitor for the purposes of assuring compliance, any substances or parameters at any location.

(18) The storage facility operator shall maintain and comply with the proposed testing and monitoring plan pursuant to NDAC Section 43-05-01-11.4.

(19) The storage facility operator shall comply with the reporting requirements provided in NDAC Section 43-05-01-18. The mass of carbon dioxide injected, the volume of carbon dioxide stream injected, and the average and maximum injection rate, surface injection pressure, and down-hole temperature and pressure data shall be reported monthly to the Director on or before the fifth day of the second succeeding month once injection commences regardless of the status of operations, until the injection well is properly plugged and abandoned.

(20) The storage facility operator must obtain an injection well permit under NDAC Section 43-05-01-10 and injection wells must meet the construction and completion requirements in NDAC Section 43-05-01-11.

(21) The storage facility operator shall notify the Director at least 48 hours in advance to witness all mechanical integrity tests of the tubing-casing annulus in the injection well. The packer must be set within 100 feet of the upper most perforation and in the chrome enhanced casing, as an exception to NDAC Section 43-05-01-11. However, the packer must also be set within confining zone lithology, within carbon dioxide resistant cement, and not interfere with down-hole monitoring equipment.

(22) The storage facility operator shall maintain and comply with the prepared plugging plan pursuant to NDAC Section 43-05-01-11.5.

(23) The storage facility operator shall establish mechanical integrity prior to commencing injection and maintain mechanical integrity pursuant to NDAC Section 43-05-01-11.1.

(24) The storage facility operator shall implement the worker safety plan pursuant to NDAC Section 43-05-01-13.

(25) The storage facility operator shall comply with leak detection and reporting requirements pursuant to NDAC Section 43-05-01-14.

(26) The storage facility operator shall implement the proposed corrosion monitoring and prevention program pursuant to NDAC Section 43-05-01-15.

(27) The storage facility operator shall prepare, maintain, and comply with an area of review and corrective action plan pursuant to NDAC Section 43-05-01-05.1, if deemed necessary by the Commission.

(28) The storage facility operator shall maintain financial responsibility pursuant to NDAC Section 43-05-01-09.1 and Order No. 33531.

(29) The storage facility operator shall maintain and comply with the proposed post-injection site care and facility closure plan pursuant to NDAC Section 43-05-01-19.

(30) The storage facility operator shall notify the Director within 24 hours of failure or malfunction of surface or bottom hole gauges in the proposed TB Leingang #1 and TB Leingang #2 injection wells and the Milton Flemmer #1 monitoring well.

(31) The storage facility operator shall implement surface air and soil gas monitoring as proposed.

(32) This storage facility authorization and permit shall be docketed for a review hearing at least once every five years from commencement of injection to determine whether it should be modified, revoked, or minor modification made, pursuant to NDAC Section 43-05-01-05.1(4).

(33) The storage operator shall file minor modification to the permit requests pursuant to NDAC Section 43-05-01-12.1 through a Facility Sundry Notice form.

(34) The storage facility operator shall pay fees pursuant to NDAC Section 43-05-01-17 annually, on or before the last business day in June, for the prior year's injection, unless otherwise approved by the Director.

(35) The storage facility operator must obtain a Commission determination by separate hearing on whether the current proposed carbon dioxide sources contribute to the energy and agricultural production economy of North Dakota. The storage operator shall not receive authorization to inject until the fees are determined by subsequent hearing and order of the Commission.

(36) For each new additional carbon dioxide source, the storage facility operator must obtain a Commission determination on whether the source contributes to the energy and agriculture production economy of North Dakota, before it is approved to be stored. If the Commission deems a carbon dioxide source does not contribute to the energy and agricultural production economy of North Dakota, the fees will be determined by hearing, pursuant to NDAC Section 43-05-01-17(1)(b).

(37) The operator shall implement a data sharing plan that provides for real-time sharing of data between Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, Summit Carbon Storage #3, LLC, and SCS Carbon Transport LLC. If a discrepancy in the shared data is observed, the party observing the data discrepancy shall notify all other parties, take action to determine the cause, and record the instance. Copies of such records must be filed with the Commission upon request.

(38) This order shall remain in full force and effect until further order of the Commission.

Dated this 12th day of December, 2024.

INDUSTRIAL COMMISSION  
STATE OF NORTH DAKOTA

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

## DECLARATION OF DERRICK BRAATEN

---

1. I am writing this declaration to update the North Dakota Industrial Commission (NDIC).
2. An open records request was sent to the North Dakota Industrial Commission on November 13, 2024 requesting the DAT, SRS, OUT, LOG, and RST modeling files. Attached hereto as Exhibit A is a true and correct copy of the November 13, 2024 open records request.
3. On November 20, 2024, in response to my November 13, 2024 open records request, Michael Ziesch emailed indicating the files were on a thumb drive and our office could pick up the files. Attached hereto as Exhibit B is a true and correct copy of the November 20, 2024 email in response to the open records request.
4. The flash drive contained these files:

Name	Date modified	Extension
P50_2W_BR_VOLMOD_TS_Summit1209_20Yspost_LGR_threesite	1/11/2024	dat
P50_2W_BR_VOLMOD_TS_Summit1209_20Yspost_LGR_threesite	11/9/2023	err
P50_2W_BR_VOLMOD_TS_Summit1209_20Yspost_LGR_threesite	11/9/2023	log
P50_2W_BR_VOLMOD_TS_Summit1209_20Yspost_LGR_threesite	11/9/2023	out
P50_2W_BR_VOLMOD_TS_Summit1209_20Yspost_LGR_threesite	11/9/2023	sr3
P50_2W_BR_VOLMOD_TS_Summit1209_20Yspost_No LGR_threesite	11/9/2023	dat

5. On December 5, 2024, Paul Button, the Landowners' expert, confirmed that these were the same files we received from the EERC after he used a software program to compare the bytes and other metadata.
6. Landowners require additional time now that they have been able to obtain and confirm the model files. In order to show that the plume has been arbitrarily reduced in size in the model, and the pressure front and its impact on pore space is not accounted for, Landowners require additional time to analyze the model and generate mapping units to show the precise extent of the

inaccuracies of the mapping for purposes of amalgamation and compensation. The NDIC has inexplicably refused to produce the mapping files in its possession until the past month – and many months *after* the hearing in this matter. Now that the NDIC has finally produced the mapping files, it is unfair and highly prejudicial and a violation of due process to proceed to decision without giving the Landowners a fair opportunity to analyze the files and produce evidence in support of their valuation case that was impossible to present because of the failure to provide these files by the NDIC.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 9<sup>th</sup> day of December, 2024 at Bismarck, ND, United States.

Nathan Anderson  
Director, Oil and Gas Division  
Department of Mineral Resources  
1016 East Calgary Avenue  
Bismarck, ND 58503

**Re: Open Records Request**

Mr. Anderson:

In the past year and a half, I have submitted to DMR several open records requests. The requests relate to applications filed by three LLCs, Summit Carbon Storage #1, Summit Carbon Storage #2, and Summit Carbon Storage #3, regarding their requests for permits for underground storage of carbon dioxide. In response to these requests, while I have received some of the materials requested, I have not received certain files included in those requests, files dealing with the applicants' reservoir simulation modeling, that is, the CMG modeling files, computer files used by and produced from the CMG modeling software running reservoir simulations regarding the applicants' proposed injection into and use of the reservoir for storage. In particular, I have not received the DAT, SRS, OUT, LOG, and RST modeling files. My past records' requests and DMR's responses are summarized below.

While I suppose it is possible that DMR does not have these files, I believe it probably does. If in fact DMR does not have them, please let me know that. But if you do have them, this is a request pursuant to N.D. Cent. Code § 44-04-18 for those files.

On June 9, 2023, the three Summit Carbon applicants submitted to DMR draft applications for storage. On June 12, DMR's Tamara Madche informed the applicants that while DMR could not start an immediate review of the applications, a check for completeness was conducted and several "issues" were found. One concerned the "CMG Modeling Files," about which Ms. Madche stated, "Need: the DAT, SRS, OUT, LOG, and RST files for the model." Exh. 1 (enclosed).

On June 14, 2023, as modified on June 20, I submitted a records request. Exh. 2 (enclosed). In response, on June 21 DMR provided me with a thumb drive containing, according to DMR's Michael Ziesch, "[t]he related data sets." *Id.* However, the DAT, SRS, OUT, LOG, and RST modeling files were not on the thumb drive, but perhaps DMR had not yet received these files from the applicants in response to Ms. Madche's June 9 request for them.

Nathan Anderson  
November 13, 2024

Page 2 of 2

On August 24, 2023, and also on September 7 and September 21 of that year, I submitted to DMR records requests. Exhs. 3-5 (enclosed). DMR responded, but the responses did not include any of the DAT, SRS, OUT, LOG, or RST modeling files. *Id.*

In February of 2024, the three Summit Carbon LLCs filed applications for carbon dioxide storage. On May 15, 2024, I submitted to DMR a records request. Exh. 6 (enclosed). Mr. Ziesch responded on May 21, but his responses did not include any of the DAT, SRS, OUT, LOG, or RST modeling files. *Id.* Mr. Ziesch stated that on September 21, 2023, DMR had provided to me "all modeling input and results files" and also that: "The CMG files, previously provided on 9-21-2023, are the modeling files still being used for the applications. There are no updates to them." I never received anything from DMR on September 21. (Perhaps Mr. Ziesch was referring to the thumb drive provided to me on June 21, 2023, but if so, the modeling files were not on it.)

Again, if DMR, or any other Industrial Commission agency, does not have the DAT, SRS, OUT, LOG, or RST modeling files, please let me know, but if DMR or any other Industrial Commission agency does have them, please provide them to me in electronic format by emailing them to my paralegal Desirae Zaste at [desirae@braatenlawfirm.com](mailto:desirae@braatenlawfirm.com). If it is necessary to mail them, send them to Braaten Law Firm, Suite 100, 109 N. 4<sup>th</sup> St., Bismarck, ND 58501-4003.

You have my pre-authorization to bill me up to \$300.00 to fulfill this records request. If you have any questions about anything in this letter, please contact me.

Sincerely,

Derrick Braaten

**RE: Summit Carbon Solutions - Draft applications**

---

**From** Madche, Tamara J. </O=EXCHANGELABS/OU=EXCHANGE ADMINISTRATIVE GROUP (FYDIBOHF23SPDLT)/CN=RECIPIENTS/CN=6A42AF0567B24222973A8F24B8BDE405-MADCHE, TAM>

**Date** Mon 6/12/2023 10:06 AM

**To** Jay Volk <jvolk@summitcarbon.com>; Suggs, Richard A. <rasuggs@nd.gov>

**Cc** Amanda Hoffer <ahoffer@summitcarbon.com>; Wade Boeshans <wboeshans@summitcarbon.com>; Jeffrey Skaare <jskaare@summitcarbon.com>; Jacobson, Lonny <ljacobson@undeerc.org>; Regorrah, Josh <jregorrah@undeerc.org>; Anagnost, Katherine <kanagnost@undeerc.org>; Olsen, Caitlin <colsen@undeerc.org>; Connors, Kevin <kconnors@undeerc.org>; Kalenze, Nicholas <nkalenze@undeerc.org>; Bender, Lawrence <LBender@fredlaw.com>

All,

We have received and were able to download the files provided for the three SFP applications. It's unlikely we'll have time to start the review of these applications in full until July as our focus is being switched back to our current docketed application for June 30<sup>th</sup>, so don't hesitate to continue refining these draft applications in the meantime. I will let you know when we begin our review process, that way we can ensure we're looking at the latest versions.

I did do a quick cursory check for completeness and found the following issues:

- CMG Modeling Files
  - Need: DAT, SRS, OUT, LOG, and any RST files for the model.
- Application appendices needed for each SFP application:
  - Testing and Monitoring Plan Summary – these have been provided on the past two applications and are considered an expectation going forward. The case files end up very large and unwieldy for SFPs, so this compiled summary was created to help provide a quicker reference point that helps both the operator and the regulatory body through the life of the project.
  - Quality Assurance Surveillance Plan (QASP) – I did not see this appendix. I did notice within the Testing and Monitoring section that you had QASP subsections. I am going to ask that these be pulled and placed in their own appendix to remain consistent with past applications. It's very likely we'll ask that additional items (such as figures or reference documents) be added in the QASP as we review the application and by having them all in one appendix it will help aid in less reference points having to be updated in Section 5, Section 6, and the Regulatory Compliance Table.
  - Appendix C – Geochemical Interactions – Unless you can provide a good argument for moving this information into an appendix, we are going to ask that it be placed back in Section 2 under its respective zone sub-sections. From a reviewer stance we review all the geological exhibits including the geochemical and geomechanical information together by zone, so not only is it not consistent with past applications but it makes the review a bit disjointed.
  - Section 12 – Financial Assurance – I wouldn't expect you to know the exact financial instrument types you intend to use at the draft stage of the SFPs, but it will be preferred that you have that nailed down in the narrative prior to us docketing the application.

If you have any questions on the comments above, please let me know.

Thanks,

**EXHIBIT 1**

Tammy and Richard,

Summit Carbon Solutions, LLC respectfully submits for the review and consideration of the North Dakota Industrial Commission, three applications for carbon dioxide storage facility permits, **as follows:**

- **Applicant:** Summit Carbon Storage #1, LLC for the injection site called TB Leingang;
- **Applicant:** Summit Carbon Storage #2, LLC for the injection site called BK Fischer; and
- **Applicant:** Summit Carbon Storage #3, LLC for the injection site called KJ Hintz.

These applications were prepared pursuant to and in accordance with Chapter 38-22 of the North Dakota Century Code and Chapter 43-05-01 of the North Dakota Administrative Code.

Please watch your email for a separate message with the link to **access the application contents that will be provided by the end of business today.**

In addition, please note any questions in relation to this submittal please feel free to reach out to myself as the primary contact for Summit Carbon Solutions and Lonny Jacobson as the primary contact for any EERC correspondence.

We look forward to the results of your review.

Sincerely,

Jay Volk

**Subject:** RE: Open Record Request re: Summit Carbon Solutions

[Warning: External Sender]

We estimate a hard copy of the data would be approximately 1,200 pages.

The related data sets we have are approximately 3.3G and would take about an hour to transfer onto a thumb drive.

We spent approximately an hour reviewing your request, so the cost estimate for processing will be \$25 as the first hour is free.

Additionally, the cost of either print copy, or the cost of the thumb drive, which would likely be nominal. We would need to put the data on a device that is ours because we can't introduce external hard drives for security reasons.

**EXHIBIT 2**

Please let me know if you want me to proceed with the request and, if so, what format you'd like it in.

[Warning: External Sender]

Mr. Braaten, we were able to get staff together this afternoon to review your request.

Our office has not received an application for amalgamation, nor do we have any class VI applications for the entity referenced. We do have a draft application for a storage facility permit.

Finally, your request for correspondence is too broad to process. It needs to have a more specific topic and date range.

**Subject:** Open Record Request re: Summit Carbon Solutions

You don't often get email from [derrick@braatenlawfirm.com](mailto:derrick@braatenlawfirm.com). [Learn why this is important](#)

\*\*\*\*\* **CAUTION:** This email originated from an outside source. Do not click links or open attachments unless you know they are safe. \*\*\*\*\*

I understand that Summit Carbon Solutions or one of its subsidiaries or affiliates such as SCS Carbon Transport or another related entity has filed an application with the ND Industrial Commission requesting an order amalgamating property interests and/or seeking a Class VI well permit or permits. I am writing to request all such applications and all correspondence and other documents related to the application, as well as all correspondence generally with Summit Carbon Solutions or its affiliates, authorized agents and representatives. I authorize you to charge up to \$250.00 to respond to this request and would prefer all materials in electronic format to the maximum extent possible. I understand that there are likely short timeframes for such applications and hearings so hope to receive these materials as soon as possible and I am happy to discuss ways to expedite the request or make your response more efficient. Please let me know if you have any questions or would like to discuss anything in this request.

Sincerely,

**Derrick Braaten**

**Re: Records Request -- Applications for Permits**

I am writing to request a copy of records from your office, pursuant to N.D.C.C. § 44-04-18. Summit Carbon Solutions, LLC submitted three applications for carbon dioxide storage facility permits on June 9<sup>th</sup>, 2023. I am writing to request all correspondence and other documents related to the applications, as well as all correspondence generally with Summit Carbon Solutions or its affiliates, authorized agents and representatives, from June 21<sup>st</sup>, 2023 to August 24<sup>th</sup>, 2023.

To the maximum extent possible, I request that you provide all records to me in electronic format by emailing them to my paralegal Steven Price at [steven@braatenlawfirm.com](mailto:steven@braatenlawfirm.com). If it is necessary to mail responsive records, they may be sent to me at the address below. You have my pre-authorization to bill up to \$300.00 to fulfill this records request. If you have any questions about anything in this letter, do not hesitate to contact me.

Sincerely,

Derrick Braaten

**Re: Records Request -- Applications for Permits**

I am writing to request a copy of records from your office pursuant to N.D.C.C. § 44-04-18. Summit Carbon Storage #1, LLC was recently granted a permit for the TB LEINGANG 2, SE NE 18-141N-87W, Oliver Co., API – 33-065-00027, well file #40178. I am writing to request all correspondence and other documents related to all permit applications submitted by Summit Carbon Storage #1, LLC, or its affiliates, authorized agents, and representatives, from January 1, 2023 to September 6, 2023.

To the maximum extent possible, I request that you provide all records to me in electronic format by emailing them to my paralegal Steven Price at [steven@braatenlawfirm.com](mailto:steven@braatenlawfirm.com). If it is necessary to mail responsive records, they may be sent to me at the address below. You have my pre-authorization to bill up to \$300.00 to fulfill this records request. If you have any questions about anything in this letter, do not hesitate to contact me.

Sincerely,

Derrick Braaten

**Re: Records Request**

I am writing to request a copy of records from your office, pursuant to N.D.C.C. § 44-04-18. Please provide the following data electronic files and/or load files submitted to the Oil and Gas Division by applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC:

- All the input files, field and analytical data, and the model geochemical database used to evaluate the CO<sub>2</sub> effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's USGS's PHREEQC model.
- All the input files, field and analytical data, and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.
- Geophysical Logs that penetrate injection and confining zones, seismic survey data and core sample measurements, all measurements and data for acoustic impedance, total porosity, effective porosity, permeability, and facies.
- All the input files, field and analytical data, and the model, including but not limited to all inputs and data files used to run SLB's Petrel model in any manner related to Summit's applications.
- All 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse or Petrel format, CMG (Canadian Modeling Group) Imex format, or other similar format.

To the maximum extent possible, I request that you provide all records to me in electronic format by emailing them to my paralegal Desirae Zaste at [desirae@braatenlawfirm.com](mailto:desirae@braatenlawfirm.com). If it is necessary to mail responsive records, they may be sent to me at the address below.

**Re: open records request from 5-15-2024**

---

From Ziesch, Michael D. <mdziesch@nd.gov>

Date Tue 5/21/2024 10:26 AM

To Desirae Zaste <desirae@braatenlawfirm.com>

[Warning: External Sender]

Regarding the open records request received on 5-15-2024 for Summit Carbon Storage facilities. Please see responses in red below each of the submitted topics.

The agency has previously provided (9-21-2023) all modeling input and results files submitted and used for the application by Summit. Agency staff validated the inputs and parameters in the submitted model via CMG software. Field and analytical data of your request are available through the agency website in log and well files.

- All the input files, field and analytical data, and the model geochemical database used to evaluate the CO<sub>2</sub> effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's USGS's PHREEQC model.

Results received from applicant is in the related case files and available on the agency website. The agency did not receive software files for PHREEQC model. Model and geochemical database documentation can be obtained from the USGS.gov PHREEQC webpage.

- All the input files, field and analytical data, and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.

The agency did not receive Geochem GEM model files. Results of Geochem modeling are summarized in the application packet, available in the case file. The geochemical equations used in the model are internal to the CMG GEM software.

- Geophysical Logs that penetrate injection and confining zones, seismic survey data and core sample measurements, all measurements and data for acoustic impedance, total porosity, effective porosity, permeability, and facies.

Geophysical logs data are available via Premium Subscription on the agency Scout Ticket. Well files contain the core analysis and are also available on agency website via Premium Subscription. Related wells that penetrate the area of review are identified in section 4 of each application package. Seismic survey results are not provided to the agency, they are owned by the company conducting the survey.

- All the input files, field and analytical data, and the model, including but not limited to all inputs and data files used to run SLB's Petrel model in any manner related to Summit's applications.

The agency does not receive Petrel model files other than exports from the CMG files previously provided on 9-21-2023 open records request.

- All 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse or Petrel format, CMG (Canadian Modeling Group) Imex format, or other similar format.

The CMG files, previously provided on 9-21-2023, are the modeling files still being used for the applications. There are no updates to them.

Mr. Braaten, our office has compiled the requested files and copied them to a thumb drive for delivery. Would you like to have one of your staff members come by our office for pickup, or I can arrange to have one of our staff members deliver the device to your office.

Due to the size of the files we had to purchase a flash drive from Best Buy. The cost of the device was \$16.99 an invoice will be included. No other charges were incurred in processing the request.

Please let me know how you'd like to proceed.

**Michael Ziesch**

**BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA**

**CASE NOS. 30869–30880**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34,**

**Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission**

may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.

In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon

**Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**RESPONSE OF SUMMIT CARBON STORAGE #1, LLC, SUMMIT CARBON STORAGE #2, LLC, AND SUMMIT CARBON STORAGE #3, LLC TO THE DECLARATIONS FILED BY LANDOWNER INTERVENORS<sup>1</sup>**

---

<sup>1</sup> Landowner Intervenorers are the Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

## INTRODUCTION

On November 4, 2024, without seeking permission from the North Dakota Industrial Commission (“Commission”), Landowner Intervenor filed two declarations: the Declaration of Derrick Bratten (the “Braaten Declaration”) and the Declaration of Paul Button (the “Button Declaration”) (collectively, the “Declarations”). Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, “Summit”) now seek leave of the Commission to respond to these filings.

Summit respectfully requests that the Commission carefully consider this response and recognize that the recent Declarations from Landowner Intervenor appear to reflect a strategic intent to obstruct Summit’s project. Summit does not oppose the information within these Declarations, provided the Commission equally weighs Summit’s response, which clarifies the detrimental impact of these continued delays.

For the reasons outlined below, Summit urges the Commission to reject this latest attempt by Landowner Intervenor to stall these proceedings, deny their request for a supplemental hearing, and proceed with a decision on each of Summit’s applications without further delay.

## STATEMENT OF RELEVANT FACTS

### **I. Landowner Intervenor’s pattern of dilatory tactics in the above-captioned cases.**

Landowner Intervenor’s efforts throughout these proceedings have been focused primarily on delaying a decision by the Commission. These efforts began on April 25, 2024, when Landowner Intervenor filed a motion to continue the hearing on Summit’s applications to a later date. On June 7, 2024, the Commission denied Landowner Intervenor’s motion to continue. *See* Order on Motion for Expedited Discovery and Motion for Continuance of Hearing.

The Commission held a hearing on Summit's applications on June 11, 12 and 13 of 2024. *See Hr'g Recording.*<sup>2</sup> At the hearing, Landowner Intervenor—through their attorney—conducted extensive cross-examination of Summit's witnesses relating to the modeling efforts performed by Summit and the Energy & Environmental Research Center ("EERC"), including questioning about the models themselves. *Id.* In fact, the majority of the hearing was devoted to Landowner Intervenor's cross-examination of Summit's witnesses and the presentation of Landowner Intervenor's own witnesses. *Id.*<sup>3</sup> At the conclusion of the hearing, Landowner Intervenor renewed their motion to continue the hearing. *Id.* The Commission again denied the motion. *Id.*

On July 2, 2024, Landowner Intervenor continued their efforts to delay a decision by filing a Petition for Reconsideration of Denial of Motion to Continue Hearing. Landowner Intervenor requested the Commission continue the hearing on Summit's applications (which had already concluded). On August 15, 2024, the Commission denied Landowner Intervenor's Petition for Reconsideration of Denial of Motion to Continue Hearing. *See Order on Petition for Reconsideration of Denial of Motion to Continue Hearing.*

Two weeks later, on August 29, 2024, the Landowner Intervenor filed with the Commission another request for delay. Rather than requesting to continue the hearing that had long since concluded, Landowner Intervenor moved the Commission for a supplemental hearing arguing the same was necessary to "allow [Landowner Intervenor] to present evidence related to the reservoir computer modeling and parameters used in that model." *See Intervenor Landowners' Motion for Supplemental Hearing*, ¶ 1. In their supporting brief, Landowner Intervenor

---

<sup>2</sup> The recording of the hearing in this matter can be accessed using the following hyperlink: <https://www.youtube.com/@NDDMR>.

<sup>3</sup> The hearing on Summit's application lasted approximately 23 ½ hours over the course of 3 days. Landowner Intervenor consumed approximately 80% of that time through cross examination and presentation of their witnesses.

represented to the Commission that they first received the modeling information from the EERC on July 2, 2024, and “a first run of the model will take 24.7 days.” *See* Brief in Support of Intervenor Landowners’ Motion for Supplemental Hearing. Contrary to these representations, Landowner Intervenors had previously requested and received the modeling information from the Commission on June 23, 2023 – more than one year earlier. *See* Summit’s Response to Intervenor Landowners’ Motion for Supplemental Hearing, ¶ 13 (referring to the Commission’s May 21, 2024 response to Landowner Intervenors’ May 15, 2024 open records request).<sup>4</sup>

**II. The Declarations foreshadow Landowner Intervenors’ continued efforts to delay a decision by the Commission.**

On November 4, 2024, approximately 500 days after receiving the modeling information from the Commission, and approximately 125 days after receiving the same modeling information from the EERC, Landowner Intervenors filed with the Commission the reservoir computer modeling information they sought to introduce at the supplemental hearing requested in their Motion for Supplemental Hearing. *See generally* Braaten Declaration and Button Declaration. From Landowner Intervenors’ filings, it appears they provided their expert, Mr. Paul Button, a petroleum engineer, with the GEM simulation model submitted to the Commission by the EERC in the above-referenced cases (the “Model”). *See* Button Declaration, ¶ 2. Although the Braaten Declaration indicates more time is needed for his expert Mr. Button to run the simulation model with a 2.7 multiplier, Mr. Button confirms in his declaration he has already done so and attaches plume maps as exhibits to his declaration. *See* Braaten Declaration, ¶ 2; *see also* Button Declaration, ¶ 4. Mr. Button indicates he ran the model using global permeability multipliers of 1, 2.5, and 2.7 to simulate the plume size for each of Summit’s proposed Broom Creek storage

---

<sup>4</sup> The Commission has not yet ruled on Landowner Intervenors motion for a supplemental hearing.

facilities on January 1, 2044. *Id.* Mr. Button’s results are depicted on Exhibit A to the Button Declaration. *See* Button Declaration, Ex. A.

Mr. Button does not provide opinions or conclusions related to his modeling efforts. The omission of these opinions is explained by Mr. Braaten’s declaration, which foreshadows Landowner Intervenor’s forthcoming attempts to further delay a decision with the vague promise of evidence to be made available at some time in the future. Mr. Braaten states that Landowner Intervenor need “additional time to analyze the model runs,” and that within the next 30 days, Landowner Intervenor “could generate maps and specific impacted acreages based on plume area and extent as well as pressure fronts.” *See* Braaten Declaration, ¶¶ 3, 4.

## ARGUMENT

### **I. Summit’s ongoing efforts and obligations with respect to the subject storage facilities.**

As the Commission and Landowner Intervenor are aware, Summit’s obligations with respect to the storage facilities will not cease if the Commission issues storage facility permits to Summit. State law requires and Summit has committed to re-evaluating the area of review (“AOR”) and its corrective action plan not less than one time every five (5) years. *See* N.D.A.C. § 43-05-01-05.1; *see also* Summit’s Applications in Case Nos. 30869–30880, § 4.3. As part of Summit’s re-evaluation, Summit will either “a) demonstrate to the [Commission] using monitoring data and modeling results that no plan amendment is necessary or b) submit an amended AOR and corrective action plan for [Commission] approval.” *Id.*

At the hearing on the above-referenced applications, Summit provided testimony that it will conduct 3D seismic on the storage facilities by the end of years two, four and nine following commencement of injection operations and then at least one time every five years thereafter. *See Exhibit A* (Excerpt of Transcript from June 12, 2024 Hearing). In response to a request by Commission staff at the hearing on Summit’s applications, Summit agreed to report to the

Commission if “anything looks significantly off” based on the 3D seismic conducted at the two-year mark. *Id.* And Summit has submitted to the Commission a Storage Agreement for each of Summit’s proposed storage facilities and each Storage Agreement provides for the procedure to enlarge the storage facility and the re-allocation of each pore space owner’s interest in the storage facility upon such enlargement. *See* Case Nos. 30869–30880.

The above measures exist to ensure that any permits issued to Summit can be adjusted in response to developments not anticipated by Summit’s modeling (or Landowner Intervenor’s modeling). For these reasons, and for those set forth below, the Commission should reject Landowner Intervenor’s delay tactics, deny Landowner Intervenor’s request for a supplemental hearing and proceed with a decision on Summit’s applications.

**II. The Commission should not delay its decision based on Landowner Intervenor’s estimated timelines.**

Landowner Intervenor argues that the modeling performed by their experts will somehow show: (1) the boundaries of each of Summit’s three storage facilities need to be expanded to include additional acreage, and (2) certain Landowner Intervenor and other pore space owners within the proposed storage facilities should be compensated based on the pressure fronts and volumetric capacity of the pore space. As noted above, Landowner Intervenor took great liberty in cross-examining Summit’s witnesses on these issues at the hearing earlier this year. Now, Landowner Intervenor attempts to draw the Commission’s attention with the promise of additional modeling information and other yet-to-be-presented evidence they contend should be considered before the Commission issues its decision. But the recent submissions should be viewed for what they are—one more attempt to delay the Commission’s decision.

The Commission now has before it the additional modeling information that Landowner Intervenor sought to admit at a supplemental hearing. Desiring to further delay the Commission’s

decision on Summit's applications, Landowner Intervenor have indicated their intent to submit more of the same information to the Commission within thirty (30) days of November 4, 2024. However, Landowner Intervenor's have already demonstrated that it takes between 125 and 500 days for their expert to compile this information, not 24.7 days as previously suggested by the Landowner Intervenor.

The Commission should not further delay its decision on Summit's application based on Landowner Intervenor's promises for submission of additional modeling information sometime in the future. There is no guarantee Landowner Intervenor will adhere to their self-imposed timelines, and the proceedings to date indicate the opposite is more likely. Accordingly, the Commission should render a decision on Summit's applications without waiting for more evidence or a supplemental hearing.

**III. The Landowner Intervenor's concerns regarding plume migration are alleviated and addressed by the statutes, rules and orders of the Commission.**

The Commission need not delay its decision on Summit's applications in anticipation of receiving additional modeling information from Landowner Intervenor. The modeling simulations and information submitted by Summit *and* Landowner Intervenor will be subject to confirmation when Summit performs 3D seismic two years after injection operations commence and the AOR is reevaluated in accordance with N.D.A.C. § 43-05-01-05.1. While Summit and the Landowner Intervenor could continue to submit modeling information based on multiple combinations of different variables for the Commission's consideration, this would be an exercise in futility. The modeling information merely provides a "best prediction" of plume migration based on the variables put into the model. No party will know or understand the actual migration until after injection operations have commenced, 3D seismic and other monitoring activities are

conducted, and models are updated with actual data by Summit in accordance with the Commission's rules and orders.

To that end, the Commission has continuing jurisdiction over Summit and Summit's proposed storage facilities and may re-evaluate (or cause Summit to re-evaluate) the AOR and the storage facility boundaries at any time. *See* N.D.C.C. § 38-22-03(5). As set forth above, Summit committed that it will notify the Commission if Summit's monitoring activities indicate that the plume is reacting or migrating other than as predicted by Summit's models, including if the data suggests that the plume may travel outside of the horizontal boundaries of a storage facility. Furthermore, Summit's testing, monitoring and reporting plans require Summit to submit injection data to the Commission on a monthly, quarterly and annual basis, and to submit Summit's seismic data by the end of the second, fourth and ninth years following commencement of injection operations.

Consistent with the Commission's continuing jurisdiction and authority, the Commission may modify the storage facility boundaries and require Summit to include additional pore space owners within an enlarged storage facility if the injection and seismic data support such a modification. Any interested person (which includes any person who has or will suffer actual injury or economic damage) may request that the Commission review Summit's permit for the reasons set forth in N.D.A.C. § 43-05-01-12, which include changes to the storage facility area. Last, any nonconsenting pore space owners within the enlarged facility must be equitably compensated in accordance with § 38-22-08(14) of the North Dakota Century Code.

Accordingly, the information Landowner Intervenor's promise to present is likely to have little, if any, impact on the Commission's decision at present. The concerns that appear to motivate Landowner Intervenor's can (and will) be more adequately addressed after more information about

the operation of the storage facility has become available. If Landowner Intervenor's concerns are not allayed by the information obtained, they can request review of Summit's permits at that time. The Commission should thus put an end to Landowner Intervenor's delay tactics and render a decision on Summit's applications.

**IV. The Commission has already considered and rejected a pore volume formula for determining equitable compensation.**

The Landowner Intervenor has indicated their intent to argue that pore space owners should be compensated based on the volume and storage capacity of the pore space for each individual pore space owner. However, the Landowner Intervenor's objection to Summit's pore space compensation formula is fundamentally flawed and disregards both established regulatory precedent and robust geologic data. Summit's formula, grounded in surface acreage, aligns precisely with what the Commission has approved for every previous permit issued for storage facilities. Yet the Landowner Intervenor advocates for an alternative formula based on each landowner's estimated pore space volume and storage capacity, specifically targeting variations in thickness, porosity, and permeability within the reservoir beneath their properties.

This proposal is a clear overreach, ignoring the Commission's repeated findings and conclusions in similar cases, as well as the specific geologic data outlined in Summit's application. In fact, the Commission has consistently ruled that "capillary trapping, relative permeability hysteresis, and a lack of local area history matching data from injection of carbon dioxide into the saline Broom Creek Formation reservoir provides reasonable doubt for the utility of a pore volume formula." *See* Order No. 32807, Case No. 30123 (DCC West); *see also* Order No. 32475, Case No. 29889 (Blue Flint); *see also* Order No. 32251, Case No. 29451 (DGC). In previous storage facility permit application hearings, the Commission concluded that, for the Broom Creek Formation in the area of the proposed Summit storage facilities, "the 100% weighting on surface

acreage is acceptable and that the one-phase formula is protective of correlative rights and should not be modified.” *Id.*

Landowner Intervenor’s formula demands would upend a tried-and-true framework that has been carefully calibrated to ensure fair compensation and protect all stakeholders. Their insistence on a more granular approach not only misrepresents the scientific data but is at odds with a regulatory standard designed to protect correlative rights. The Commission’s stance is clear, consistent, and well-grounded in both law and science—Summit’s surface acreage-based compensation model should stand unchallenged. Furthermore, Landowner Intervenor has not indicated they will be able to provide new or additional local history matching data to overcome the conclusion the Commission has reached in prior matters. To the extent Landowner Intervenor could have provided such data, the time to do so was at the originally scheduled hearing on Summit’s applications.

## CONCLUSION

Delaying the permit process is often seen as a powerful tool in opposing infrastructure projects, sometimes even more effective than direct opposition. Here, any additional hearing on Summit’s model variations would not provide meaningful enhancement to the evidentiary record in these cases. Only the actual injection of carbon dioxide, coupled with subsequent monitoring, testing, and analysis, can yield further valuable data. Landowner Intervenor already had the opportunity to challenge Summit’s models in a hearing, and the validity of those models will ultimately be determined through required post-injection monitoring. The due process afforded to Landowner Intervenor during the hearing was substantial, and the Commission’s issuance of storage facility permits still allows for future review if Landowner Intervenor submit a justified request.

Further, the Commission has consistently rejected the use of a pore volume formula to determine compensation for pore space due to technical uncertainties, such as capillary trapping and a lack of local data on carbon dioxide injection in the Broom Creek Formation. Despite the Landowner Intervenor's proposal to base compensation on individual pore volume and storage capacity, they have not provided new data to address these concerns. Any relevant data concerning a pore volume formula was available to the Landowner Intervenor well in advance of the hearings in June and could have been presented at that time.<sup>5</sup> Landowner Intervenor refused to do so with the intent to argue that more information and time were necessary. Summit submits that the Landowner Intervenor should not be allowed to benefit from this approach which was clearly a delay tactic. Landowner Intervenor made a strategic choice that carried the risk of not presenting their full case in a timely manner and should not be rewarded for this decision.

While the resources expended on Landowner Intervenor's efforts are regrettable, they are not unexpected. If the Landowner Intervenor's objective is to derail or delay Summit's project to the point of economic infeasibility, the rights and remedies available to them under the law, *e.g.*, the right and ability for Landowner Intervenor to request a review of Summit's permit(s) pursuant to N.D.A.C. § 43-05-01-12, do not further this objective and likely do not appeal to Landowner Intervenor. A similar strategy was observed in the parallel pipeline hearings before the North Dakota Public Service Commission, where the intervenors in that case employed similar delay tactics—filing for continuances, petitions for reconsideration, and requests for supplemental hearings—in an effort to block Summit's pipeline project. These strategies should not be

---

<sup>5</sup> See, *e.g.*, Section 2.3 of Summit's Applications; see also Figure 2-10a and Figure 2-10b (Isopach maps of Broom Creek Formation).

condoned, and the Commission should not be unwittingly complicit in Landowner Intervenor's extralegal efforts to delay Summit's pipeline project.

For the reasons set forth herein, Summit respectfully requests that the Commission reject Landowner Intervenor's delay strategy, deny their requests for a supplemental hearing, and proceed to render a decision on the merits of Summit's applications.

Dated this 12th day of November, 2024.

1           A.    It's my understanding ano beds.  We'll  
2   clarify.

3           Q.    Okay.  And so, regardless, we'd want those  
4   locations identified.

5           A.    Yeah.

6           Q.    And I think, John, you testified to this  
7   earlier, but there's some narrative on 5-29 that  
8   indicates that you will be running 3D seismic at  
9   years two, four and nine.  It is the intent to run  
10   3D seismic as early as year two after injection?

11          A.    (BY MR. HUNT)  That's -- yes.  Yeah, and  
12   in the narrative it says "by year two," so just to  
13   be clear.

14          Q.    Okay.  But my point -- my confirmation is  
15   that there will be a sequence of 3D seismic run  
16   shortly after beginning injection and another one  
17   prior to the five-year review?

18          A.    Correct.

19          Q.    Okay.  I'll point out that if anything  
20   looks significantly off at that two-year mark, it  
21   is expected that you will report that and we'll  
22   begin the determination whether or not we need to  
23   accelerate that hearing.

24          A.    Understood.

25          Q.    On page 5-32 there's the narrative about

**BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA**

**CASE NOS. 30869–30880**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34,**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

## DECLARATION OF DERRICK BRAATEN

---

1. I am writing this declaration to update the North Dakota Industrial Commission and provide further support for the pending request for additional time to submit post-hearing evidence.

2. The Landowners' expert has managed to run two versions of the model, one without a permeability adjustment as used by Summit and one with the adjustment of 2.5. We are working on a run at 2.7, the actual number from the injection tests on which the adjustment was based. Additionally we are modeling pressure fronts and identifying other potential inaccuracies in the plume model that lead to an incorrect allocation of compensation to acreages and pore space for the Landowners.

3. We'd like to use this information to further explore the acreage impacted by the facility. Our ultimate goal is to provide adjusted acreages for its consideration for amalgamation and compensation for the injections for our clients. We need additional time to analyze the model runs and run models with adjusted parameters in order to produce the data and evidence needed to support our claims. Specifically we could generate maps and specific impacted acreages based on plume area and extent as well as pressure fronts.

4. We are currently working on additional model runs and generating additional evidence right now and hope to be able to submit this to the commission within the next 30 days.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 4<sup>th</sup> day of November, 2024 at Bismarck, ND, United States.

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

## DECLARATION OF PAUL BUTTON

---

1. I am a Petroleum Engineer with experience modeling and operating oil and gas reservoirs, and I currently reside in Butte, Montana.
2. Attached hereto as Exhibit A is a true and correct copy of slides created using a GEM simulation model to simulate a carbon sequestration project in Broom Creek Formation in Central North Dakota. The base simulation model was provided to Button Petroleum Management by the Braaten Law Firm. The model was originally built and run by the EERC.
3. Three separate simulations were completed using the model and modification to determine the sensitivity to rock permeability. The original model was built by the EERC and Summit Carbon Solutions based upon core, log, seismic and well test data to simulate the effects of carbon sequestration on the aquifer and confining zones. During the construction of the model the permeability values were distributed within the grid blocks based upon industry accepted practices. The original model uses a global permeability multiplier of 2.5. This means that all the cells in the model have their permeability value originally derived from the core, log, and seismic properties increased 250% to match the results of an injectivity test.
4. The model was run with modifications to the permeability multiplier to determine the change in the areal extent of the injected gas plume. The model was run with the original 2.5 global permeability modifier, a global permeability multiplier of 1 to rely just on the core, log and seismic distribution of permeability and a 2.7 multiplier which

the EERC expert testified was the global permeability multiplier that was originally recommended.

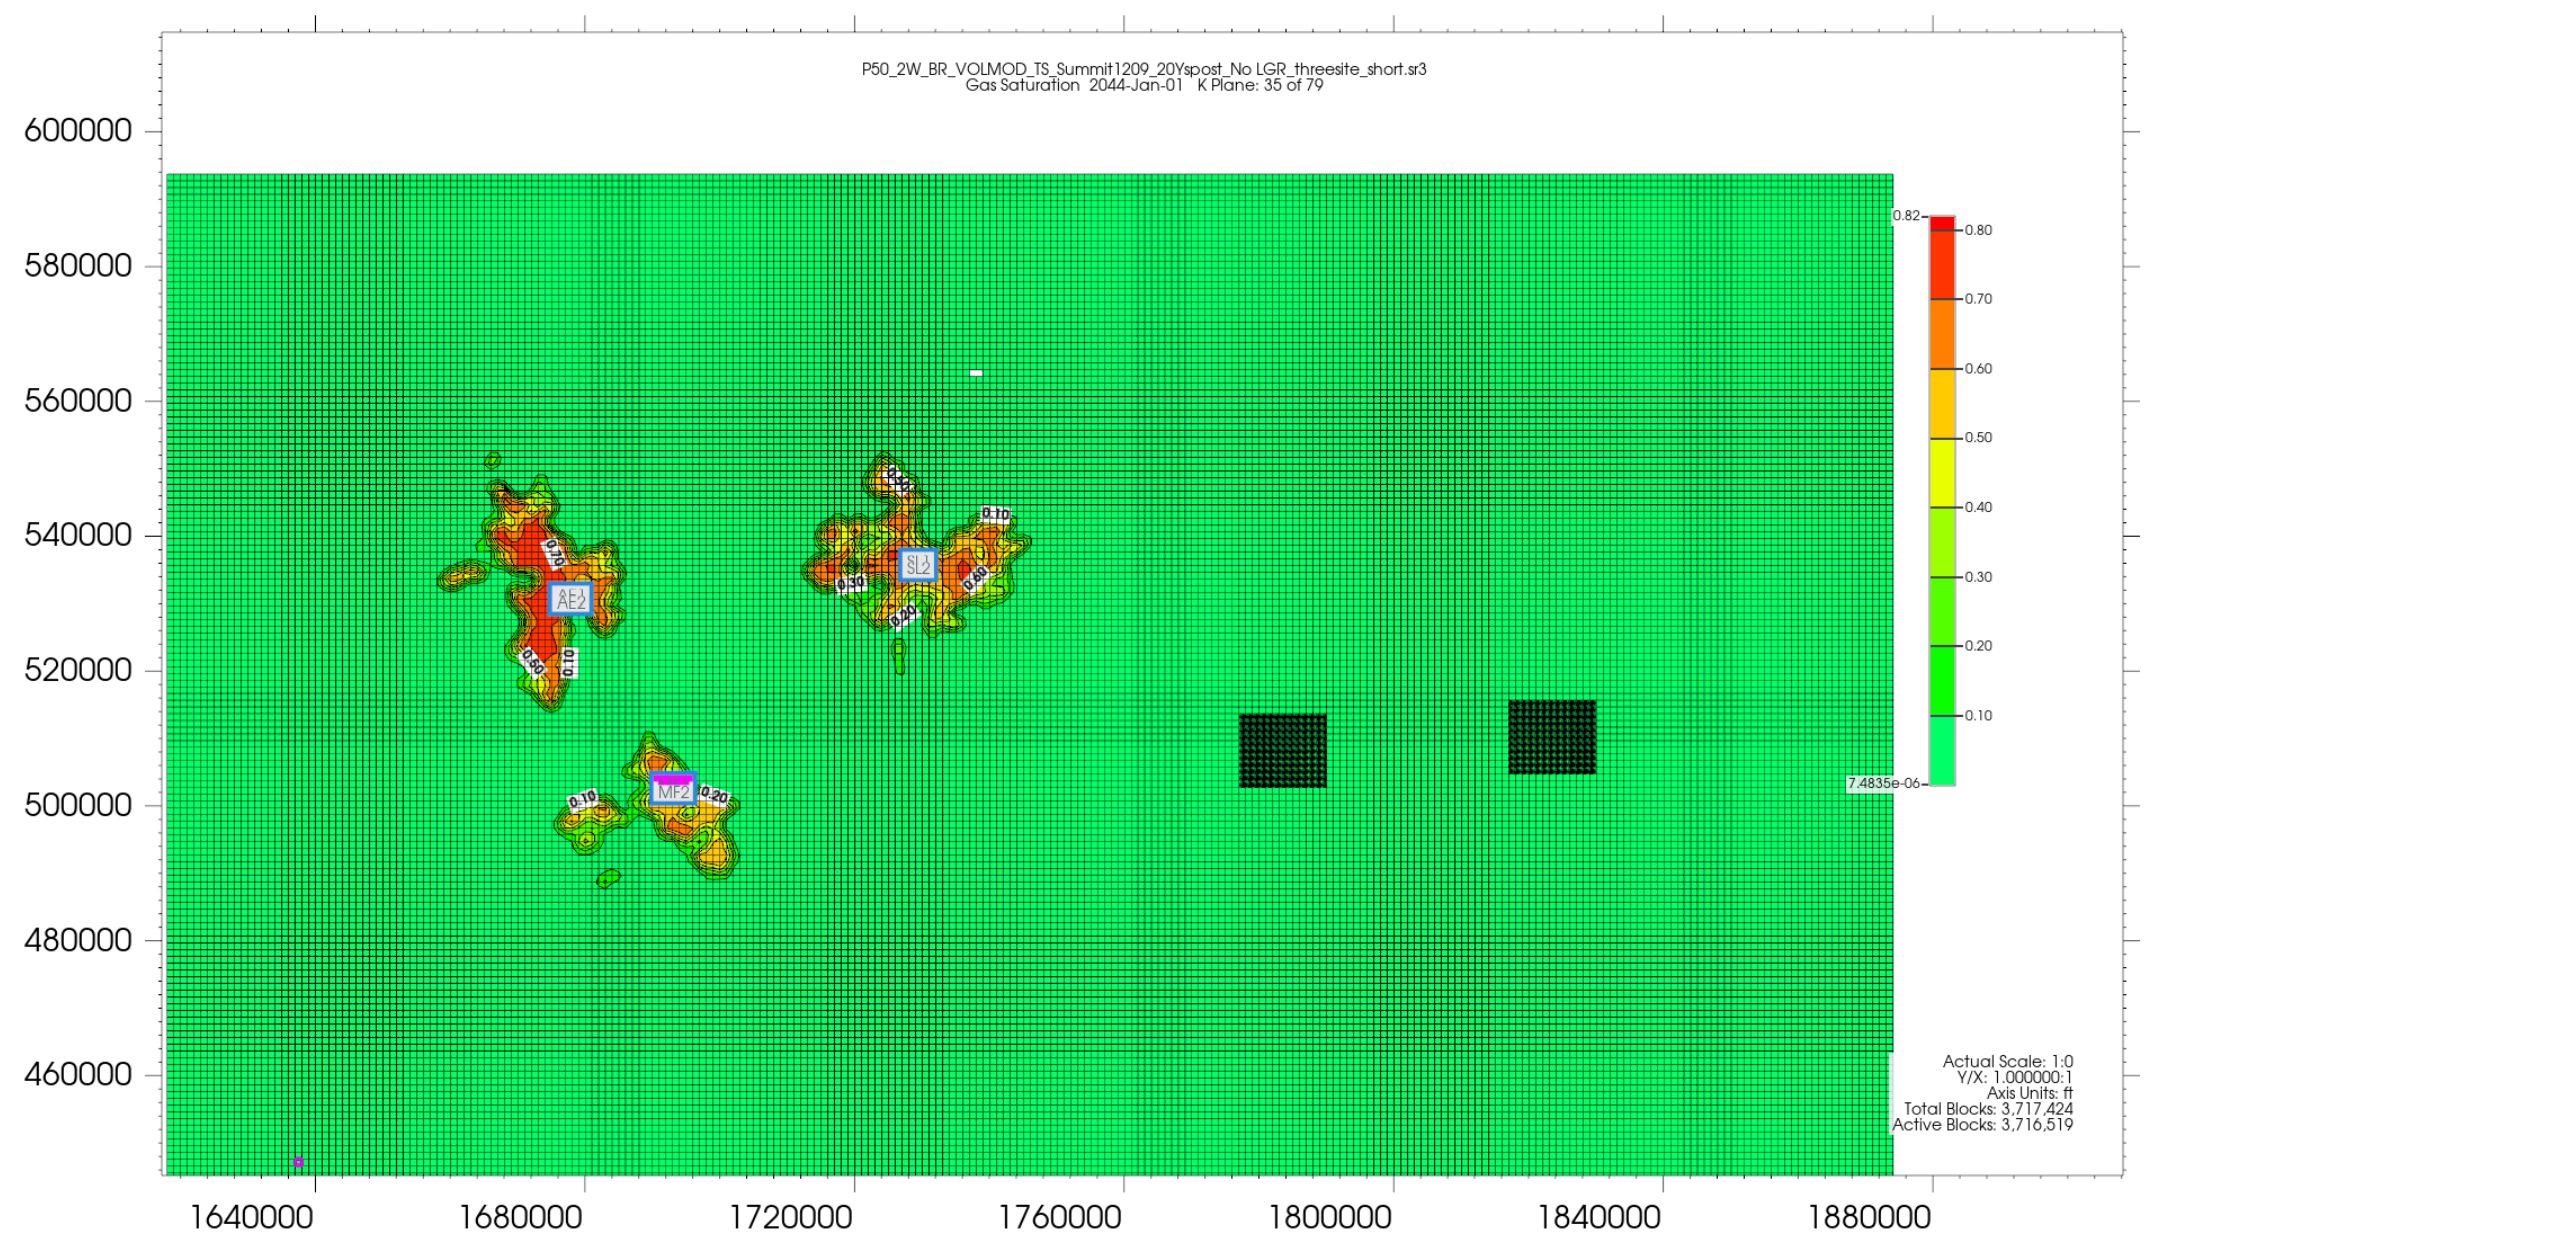

5. Screen shots of the gas saturation within the model are presented in the accompanying slides. The plume size is depicted in each case at Jan 1, 2044. The pictures are of an individual layer within the Broom Creek formation. The gas plume does vary with layer based upon the model properties. The gas plume is pictured for each of the model runs with the 2.5, 1.0 and 2.7 global permeability modifier.

**I declare under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.**

Executed this 1<sup>st</sup> day of November, 2024 in Butte, Montana.

  
Paul Button

# Model Gas Saturation

Gas saturation map after 20 years of injection with 2.5 global permeability multiplier

Gas saturation map after 20 years of injection with no global permeability multiplier

Gas saturation map after 20 years of injection with 2.7 global permeability multiplier

All,

I just want to note an error in the brief filed today where I indicated the hearing notice was issued 45 days before the hearing. I had intended to reference the minimum notice period but referenced the actual period, and that period was actually 56 days. I just wanted to amend that error and my apologies for any confusion.

Thank you,

**Derrick Braaten**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**REPLY BRIEF IN SUPPORT OF INTERVENOR LANDOWNERS' MOTION TO  
COMPEL RESPONSES TO WRITTEN DISCOVERY AND MOTION FOR  
SUPPLEMENTAL HEARING**

---

Summit Carbon Storage #s 1, 2, and 3 (“Summit”) make numerous claims that are patently false. For example, Summit argues that there is no such thing as an application for amalgamation, yet this very caption includes an “application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space....” Summit argues that “this proceeding” started in June of 2023 when it submitted draft applications for review to NDIC. That is false. This proceeding started with notice to the affected landowners issued just 45 days before the hearing. Indeed, while Summit argues that the “proceeding” apparently began in June of 2023, this is clearly contradicted by *its own applications* which were dated February 2024 and which contained a certification signed by Summit’s Executive Vice President for Summit Carbon Solutions, LLC on February 6, 2024. *See* Permit Application Certification.

For Summit to argue that Derrick Braaten having made a record request a year ago is somehow attributable to clients he’d never spoken to at that time is preposterous. Throughout this proceeding the NDIC and Summit have trampled on the Landowners’ due process rights and continue to do so. Arguing that the Landowners are somehow required to retain experts and obtain copies of applications before the applications are even completed or filed and prepare for a proceeding before there is any notice of the proceeding is ludicrous and violates Landowners’ due process rights.

On top of this, Summit also argues that it was the fault of the Landowners because the attorney they hired did not know the NDIC withheld modeling files from a prior open record request and then continued to do so in response to every record request made to it by Derrick

Braaten thereafter. Given that everything produced in June 2023 was part of a “draft” application and the NDIC did not disclose the modeling files in June, this is irrelevant to the record request made in May of 2024 after this proceeding actually began. That was a legitimate request that the NDIC mistakenly told Landowners it need not comply with. It was wrong.

Summit also argues that the Landowners were dilatory in issuing discovery. This is double-speak. Summit itself refused to respond to the discovery because the NDIC refused to grant the landowners’ interventions in a timely manner. *See* Response to Motion to Expedited Discovery, filed May 28, 2024. Despite specific and explicit requests to expedite, the NDIC intentionally sat on the intervention petition to ensure that the intervenor landowners did not have time for discovery. *See* Petition to Intervene [of the Swenson Living Trust] filed April 18, 2024 and Order on Petition to Intervene for Swenson Trust dated May 31, 2024. This type of direct and open sabotage of a litigant by an agency is the epitome of a procedural due process violation. Summit then relies on this sabotage to argue that it was the *Landowners* who delayed their own discovery requests. Given Summit’s objection that it would not respond to discovery issued prior to a grant of intervention, it is disingenuous for Summit to now claim that Landowners abandoned the discovery efforts issued before the grant of intervention. It was not a choice Landowners made – Summit could have responded but refused and issued a perfunctory objection that no intervention was granted so it need not and would not respond.

Summit is also disingenuous when it claims there was no certification document indicating that a conferral took place. The Declaration of Derrick Braaten explicitly provided that certification. *See* Declaration of Derrick Braaten in Support of Motion to Compel, ¶3 filed on August 29, 2024. To the extent Summit claims that the certification did not have enough detail, it is pretending that the conferral was not its own and that it was not a participant – in other words,

Summit is well aware of the details of the conferral that took place over the course of days. And of course it should be noted that Summit never did argue that there was no conferral – it disingenuously and pointlessly argued that there was not enough detail in Landowners’ *certification* of a conferral despite having all of that detail itself. The conferral did in fact take place. The Declaration was sufficient. This type of guile is also the hallmark of violations of due process and shows Summit’s lack of good faith. But given the higher standard being imposed on Landowners here, the entire written conferral is attached. *See* Decl. of Derrick Braaten and Exhibit A attached to the Decl. of Derrick Braaten.

This Commission made a mistake. For whatever reason, rather than simply providing the files in its possession, it acted in concert with Summit to prevent the landowners from obtaining the modeling files and other data before the hearing that both had in their possession. This prevented the Landowners from having due process. The Commission has one chance to fix this mistake, by requiring Summit to meaningfully respond to the Landowners’ discovery and holding a supplemental hearing, or at least providing intervenor landowners the opportunity to submit additional evidence in writing after discovery is complete.

Finally, Summit claims that the goal of Landowners is to cause delay. The prior *motion to expedite* by Landowners begs a number of questions in response to that allegation by Summit and is sufficient response. Summit also claims the Landowners cannot explain what they will do with the discovery. Summit knows exactly what Landowners will do with the model and that is precisely why it is fighting so hard to prevent discovery (and the same goes for the Commission). It was abundantly clear at the hearing that the model was run with an arbitrary 2.5 factor adjustment to the permeability across the entire model. Landowners’ engineer and the engineer from EERC both agree that results in a *smaller* border and storage facility, thus leaving certain landowners out of

payment. Landowners could show that without that arbitrary adjustment, they would be in the storage area. Summit claimed it would not adjust past payments if its storage area boundaries turn out to be too narrow. Only by running the model, and then *rerunning the model* without the 2.5 factor permeability adjustment can this be done. Similarly, EERC's witness testified that EERC only modeled the plume out to 5% CO<sub>2</sub> because that is the limit of detection for equipment it uses. That is arbitrary and if CO<sub>2</sub> is going to enter a landowners' pore space it is trespass regardless of whether it is at a 4% concentration or a 5% concentration. In order to illustrate the difference in boundaries for these percentages, Landowners again have to make adjustments to the model parameters and rerun the model. One additional example is the pressure analysis – these pressures will create interference with use of pore space by Landowners outside of the storage boundaries and this is an issue related to the validity of that boundary. Landowners need to run the model and understand the pressure variations on their individual properties in order to present that evidence, but have thus far been stymied by Summit and the Commission. These are only three of numerous examples of how the Landowners would use the model.<sup>1</sup>

The Commission is making decisions that have massive impacts on the Landowners' property and property rights. This is no mere licensing proceeding. This proceeding effectuates significant alterations in property rights. Such proceedings are of a very different nature than a Class II permit proceeding, for example, and the due process requirements are profoundly more robust in these proceedings than in a mere licensing proceeding. This is being missed by Summit

---

<sup>1</sup> Summit also claims that landowners already have the model from EERC. Landowners have a model from EERC (because apparently EERC has integrity and provides data that supports its work, and this is likely because it is made up of scientists who respect the scientific process). Whether it is the same model that was submitted by Summit to the NDIC is unknown. Of course both Summit and the NDIC could immediately resolve this uncertainty and authenticate the model files Landowners' obtained by simply emailing the files in their possession to Landowners. The ongoing refusal to do so while spending time and resources attempting to prevent Landowners' from having due process is again in bad faith by all involved and a blatant violation of the Landowners' due process rights. This entire proceeding is appallingly unconstitutional. This is the final chance to provide due process.

and the Commission and it will lead to reversal if not corrected. Even if the Commission had the power to “amalgamate” property rights as it claims under Chapter 38-22 (it does not), that authority would not be allowed without more process than the Landowners received here. So the law is unconstitutional and the application of the law by the Commission is also unconstitutional. One of these can be remedied now.

DATED this 18<sup>th</sup> day of September, 2024.

---

**DECLARATION OF DERRICK BRAATEN IN SUPPORT OF MOTION TO COMPEL**

---

1. I am an attorney for the Intervenor Landowners (“Landowners”), in the above-captioned matter.
2. I represent the Landowners in matters involving the applications submitted by Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, and Summit Carbon Storage #3, LLC (“SCS”).
3. I certify that I have conferred in good faith to obtain this discovery without the Commission’s intervention. Attached as Exhibit A is a true and correct copy of the correspondence between myself and Summit’s legal counsel regarding the conferral to obtain the discovery without the Commission’s intervention.
4. As detailed in the attached Exhibit A, I reached out to Lawrence Bender on August 19, 2024 at 3:27 p.m. attaching a copy of my draft brief for the motion to compel and asking for a discussion if it would be productive.
5. Lawrence Bender emailed a response on August 19, 2024 at 4:19 p.m. indicating he will discuss with his client but his belief was “much of wat you seek is available from the Commission.” *See* Exhibit A.
6. I again emailed Lawrence Bender on August 26, 2024 at 1:31 p.m. asking if Summit’s position has changed. Mr. Bender responded on August 26, 2024 at 1:35 p.m. clarifying the request. I responded on August 27, 2024 at 7:16 a.m. Mr. Bender then emailed on August 28, 2024 at 8:53 a.m. indicating that his “client will not agree to your proposal.”  
*Id.*

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 18<sup>th</sup> day of September, 2024 at Bismarck, ND, United States.

---

**CAUTION: EXTERNAL E-MAIL**

---

What do you mean, doesn't everyone do discovery after the hearing?

Kidding, it's a fair question. I intend to file a motion requesting a supplementary hearing or the ability to submit my evidence from the model in document form if no hearing is held. I have some files I'm working with but I don't know if they are the model without Summit or the NDIC producing the model used by Tammy and Rich for the application/parameter review.

I intend to file my motion at close of business Wednesday unless I hear that Summit would like to discuss production or confer about it somehow.

Thanks,  
Derrick

Derrick:

I will of course discuss with my client. However, I believe much of what

you seek is available from the Commission. I know you requested the information and there is a dispute between you and the NDIC as to what was provided to you. I say this not to anger you, but I am certain my client will ask why you do not seek what you want from the NDIC.

Nevertheless, I will discuss with my client and get back to you.

**Subject:** Swenson Living Trust et al. - NDIC Case Nos. 30869-30880 - Brief re Motion to Compel Discovery

---

**CAUTION: EXTERNAL E-MAIL**

---

Lawrence:

I am preparing to file a motion to compel discovery in NDIC Case Nos. 30869-30880 and I am writing to ask if you believe additional discussion on any of these items might be productive. I presume that your position has not changed and that you will not agree to produce these documents or files or appear for a deposition. I am happy to discuss if you think there may be ways to resolve the concerns raised in this draft brief, so please let me know at your earliest convenience if you feel a discussion might be productive.

Thank you,  
Derrick

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1,**

11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by

**nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of**

**carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the**

**geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**RESPONSE TO INTERVENOR LANDOWNERS'**  
**MOTION FOR SUPPLEMENTAL HEARING**

[¶ 1] Applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, “Summit”) submit this brief in response to the Motion for Supplemental Hearing (“Motion”) filed with the North Dakota Industrial Commission

(“Commission”) on August 29, 2024 by the Landowner Intervenor<sup>1</sup>. For the reasons explained below, the Commission should deny Landowner Intervenor’s Motion.

## **STATEMENT OF RELEVANT FACTS**

### **I. Timeline of pre-hearing information and records requests by Landowner Intervenor relevant to the Motion.**

[¶ 2] The following sets forth a timeline of events preceding the hearing held by the Commission in the above-captioned cases on June 11-13, 2024, with a focus on information and document requests made by Landowner Intervenor to the Commission and the Commission’s responses thereto:

#### **A. Summit commences the above-captioned cases and counsel for Landowner Intervenor immediately requests documents related thereto.**

[¶ 3] On June 9, 2023, Summit commences the above-captioned cases by filing three separate initial draft applications (collectively, the “Applications”) with the Commission requesting permits for the geological storage of carbon dioxide. *See* Declaration of Derrick Braaten, Ex. D. Thereafter, between June 14, 2023, and June 23, 2023, several exchanges took place between Derrick Braaten, counsel for the Landowner Intervenor, and the Commission.

[¶ 4] On June 14, 2023, Derrick Braaten e-mailed the Commission indicating that he was aware that Summit had filed an application with the Commission “requesting an order amalgamating property interests and/or seeking a Class VI well permit or permits.” *Id.* Ex. A. Mr. Braaten also requested “all such applications and all correspondence and other documents related to the application, as well as correspondence generally with [Summit], or its affiliates, authorized agents and representatives.” *Id.*, Ex. A.

---

<sup>1</sup> Landowner Intervenor are the Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

[¶ 5] The next day, Michael Ziesch responded to Mr. Braaten’s June 14, 2023, request indicating that the request had been received and was being reviewed. *Id.*, Ex. B. Five days later, on June 20, 2023, Mr. Ziesch responded to Mr. Braaten’s request indicating that the Commission “has not received an application for amalgamation, nor do we have any class VI applications for the entity referenced,” but that the Commission does have “a draft application for a storage facility permit.” Mr. Ziesch further told Mr. Braaten that his request for correspondence was “too broad to process,” and that the request needs to have a more specific topic and date range. *Id.* The same day, Mr. Braaten responded by requesting Summit’s “draft application for a storage facility permit and any correspondence related to that from May 1, 2023 to June 20, 2023.” *Id.*

[¶ 6] In response to Mr. Braaten’s revised request, Mr. Ziesch informed Mr. Braaten that a hard copy of the requested data would be approximately 1,200 pages and that the related data sets are approximately 3.3G and would take about an hour to transfer onto a thumb drive. *Id.* Mr. Ziesch further indicates that the cost to process the request is \$25, plus the cost of a thumb drive. *Id.* Mr. Braaten then requested that the data be transferred to a thumb drive and stated that he will pay the charges when “we pick it up.” *Id.*

[¶ 7] Thereafter, on June 23, 2023, Mr. Ziesch notified Mr. Braaten that the request had been compiled and was available for pickup. *Id.* Mr. Ziesch also indicates that the total cost to process the request, including the cost of the thumb drive, is \$30.62. *Id.* In his declaration in support of the present Motion, Mr. Braaten confirmed that “[a] thumb drive of files was picked up on June 23, 2023.” *See* Declaration of Derrick Braaten, ¶ 3.

**B. Landowner Intervenor wait two months before engaging in a second series of document requests to the Commission.**

[¶ 8] During the month of July 2023, there is no indication that Landowner Intervenor’s counsel communicated with the Commission or otherwise followed up with the Commission

regarding information provided or not provided by the Commission in response to his prior open records requests. *See generally* Declaration of Derrick Braaten. Thereafter, beginning August 24, 2023, Landowner Intervenor’s counsel again made a series of requests to the Commission for documents related to the above-captioned cases.

[¶ 9] On August 24, 2023, Mr. Braaten e-mailed a letter to the Commission requesting “all correspondence and other documents related to the [Applications], as well as all correspondence generally with [Summit] or its affiliates, authorized agents and representatives, from June 21<sup>st</sup>, 2023 to August 24<sup>th</sup>, 2023.” *See* Declaration of Derrick Braaten, Ex. I. On September 7, 2023, Mr. Braaten e-mailed another letter to the Commission requesting “all correspondence and other documents related to all permit applications submitted by [Summit], or its affiliates, authorized agents, and representatives, from January 1, 2023 to September 6, 2023.” *Id.*, Ex. J. And then on September 21, 2023, Mr. Braaten e-mailed a letter to the Commission requesting “all applications for permits pursuant to N.D.C.C. ch. 38-25, including any associated or related correspondence, documents, and notes related to the applications for permits.” *See* Declaration of Derrick Braaten, Ex. E. Michael Ziesch responded to Mr. Braaten’s September 21, 2023, request stating that “our office has not received any applications under NDCC 38-25.” *See* Declaration of Derrick Braaten, Ex. F.

**C. Landowner Intervenor’s wait more than five months to make any follow-up requests to the Commission.**

[¶ 10] After making the requests described in the preceding section, Landowner Intervenor’s counsel waited over five months, until March 12, 2024, to follow up with the Commission. During the months of October 2023 through February 2024, there is no indication that Landowner Intervenor’s counsel communicated with the Commission or otherwise followed

up with the Commission regarding information provided or not provided by the Commission in response to counsel's prior open records requests. *See generally* Declaration of Derrick Braaten.

[¶ 11] On March 12, 2024, counsel for Landowner Intervenor e-mailed another letter to the Commission requesting "all applications for permits pursuant to N.D.C.C. ch. 38-22 and N.D.C.C. ch 38-25 from September 1, 2023 to present, including any associated or related correspondence, documents, and notes related to the applications for permits."<sup>2</sup> *See* Declaration of Lawrence Bender, Ex. A. On March 18, 2024, Michael Ziesch responded to Mr. Braaten's letter by requesting that Mr. Braaten "narrow [the request] in terms of scope and topic." *Id.*, Ex. B. Nine days later, on March 27, 2024, Mr. Braaten responded to Mr. Ziesch's e-mail by stating that he "disagrees that the request is overly broad," but that he does "understand the position of the [Commission] however and we will respond accordingly." *Id.*

**D. The Commission schedules a hearing in the above-captioned cases and Landowner Intervenor make a fourth series of document requests.**

[¶ 12] On April 16, 2024, the Commission noticed a hearing in the above-captioned cases to take place on June 11-12, 2024. During the month of April 2024, there is no indication that Landowner Intervenor's counsel communicated with the Commission or otherwise followed up with the Commission regarding information provided or not provided by the Commission in response to any of the above-described open records requests. *See generally* Declaration of Derrick Braaten.

---

<sup>2</sup> To be certain, this open records request was for all applications for permits filed with the Commission under the stated chapters of the North Dakota Century Code. Mr. Braaten's June 20, 2023 open records request was specific to the storage facility applications filed by Summit.

[¶ 13] Nearly two months after being asked to narrow their most recent open records request, and only 27 days before the hearing, the Landowner Intervenor made a new request to the Commission. The details of that request and the Commission's response are as follows:

May 15, 2024: Derrick Braaten e-mails a letter to the Commission requesting the following data submitted by Summit:

- All input files, field and analytical data, and the model geochemical database used to evaluate the CO2 effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's USGS's PHREEQC model
- All the input files, field and analytical data, and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.
- Geophysical Logs that penetrate injection and confining zones, seismic survey data and core sample measurements, all measurements and data for acoustic impedance, total porosity, effective porosity, permeability, and facies.
- All the input files, field and analytical data, and the model, including but not limited to all inputs and data files used to run SLB's Petrel model in any matter related to Summit's applications.
- All 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may be commonly stored in Slumberger Eclipse or Petrel format, CMG (Canadian Modeling Group) Imex format, or other similar format.

May 21, 2024: Michael Ziesch responds to Mr. Braaten's May 15, 2024 request as follows:

Regarding the open records request received on 5-15-2024 for Summit Carbon Storage facilities. Please see responses in red below each of the submitted topics.

The agency has previously provided (9-21-2023) all modeling input and results files submitted and used for the application by Summit. Agency staff validated the inputs and parameters in the submitted model via CMG software. Field and analytical data of your request are available through the agency website in log and well files.

- All the input files, field and analytical data, and the model geochemical database used to evaluate the CO2 effects on the upper and lower confining layers, including but not

limited to all inputs and data files used to run the United States Geological Survey's USGS's PHREEQC model.

Results received from applicant is in the related case files and available on the agency website. The agency did not receive software files for PHREEQC model. Model and geochemical database documentation can be obtained from the USGS.gov PHREEQC webpage.

- All the input files, field and analytical data , and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.

The agency did not receive Geochem GEM model files. Results of Geochem modeling are summarized in the application packet, available in the case file. The geochemical equations used in the model are internal to the CMG GEM software.

- Geophysical Logs that penetrate injection and confining zones, seismic survey data and core sample measurements, all measurements and data for acoustic impedance, total porosity, effective porosity, permeability, and facies.

Geophysical logs data are available via Premium Subscription on the agency Scout Ticket. Well files contain the core analysis and are also available on agency website via Premium Subscription. Related wells that penetrate the area of review are identified in section 4 of each application package. Seismic survey results are not provided to the agency, they are owned by the company conducting the survey.

- All the input files, field and analytical data, and the model, including but not limited to all inputs and data files used to run SLB's Petrel model in any manner related to Summit's applications.

The agency does not receive Petrel model files other than exports from the CMG files previously provided on 9-21-2023 open records request.

- All 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse or Petrel format, CMG (Canadian Modeling Group) Imex format, or other similar format.

The CMG files, previously provided on 9-21-2023, are the modeling files still being used for the applications. There are no updates to them.

## **II. Summary of relevant events leading up to June 2024 hearing.**

[¶ 14] As set forth above, the Commission has indicated the Landowner Intervenor received the CMG and modeling input and results files from the Commission on September 21, 2023. Landowner Intervenor acknowledges that the thumb drive obtained by Landowner Intervenor from the Commission on June 23, 2023 contained an e-mail dated June 12, 2023 from Tamara Madche to Summit requesting “CMG Modeling Files . . . Need: DAT, SRS, OUT, LOG, and any REST files for the model.” *See* Declaration of Derrick Braaten, ¶¶ 3-5.

[¶ 15] Landowner Intervenor argues that they never received the same CMG Modeling Files requested by Tamara Madche in her June 12, 2023 e-mail to Summit; however, if this true, Landowner Intervenor waited approximately 10 months (June 23, 2023 to May 15, 2024) to make an open records request to the Commission, and subsequently to the Energy & Environmental Research Center (“EERC”), specifically requesting such files. *See generally* Landowner Intervenor’s Motion; *see also* Declaration of Derrick Braaten, Ex. G. Landowner Intervenor never sent a letter or otherwise indicated to the Commission that the Commission’s responses to Landowner Intervenor’s many open records requests were deficient in any way. *See generally* Landowner Intervenor’s Motion. Michael Ziesch confirmed that Mr. Braaten did not follow up to Mr. Ziesch’s March 18, 2024 response requesting that Mr. Braaten narrow his March 12, 2024 open records request. *See* Declaration of Lawrence Bender, Ex. C.

[¶ 16] Furthermore, Landowner Intervenor acknowledges in their Motion that they received the reservoir modeling inputs and results files from the EERC on July 2, 2024. *See* Declaration of Derrick Braaten, ¶ 15; *see also* Declaration of Derrick Braaten, Ex. L. Yet, Landowner Intervenor continues to argue they need Summit and the Commission to provide the same files. *See generally* Brief in Support of Intervenor Landowners’ Motion for Supplemental Hearing.

[¶ 17] Finally, despite making open records requests related to the Applications as early as June 14, 2023, the Landowner Intervenors waited nearly a year to retain experts for the purpose of reviewing the documents, data, and information obtained. Landowner Intervenors' expert witnesses testified that they were not retained until approximately one month prior to the commencement of the June 11–13, 2024 hearing and/or spent less than 15 hours reviewing Summit's Applications on Summit's Applications. *See* Declaration of Lawrence Bender, Ex. D.

### ARGUMENT

[¶ 18] Landowner Intervenors request a supplemental hearing for the purpose of presenting evidence they are either in the process of gathering or have yet to gather. Summit is not aware of any authority for such a request, or for an additional hearing on its Applications, and Landowner Intervenors cite none. Even if the Landowner Intervenors were authorized to request an additional hearing from the Commission, they have wholly failed to show they possess evidence materially different from what was already presented at the hearing. Moreover, Landowner Intervenors cannot show that their failure to present such evidence at the hearing was justified, when it is undisputed that they knew of Summit's Applications nearly a year in advance of the hearing, they were actively engaged in making open records requests related to those applications, and they were able to retain experts to assist them with the technical aspects of their requests. Accordingly, Landowner Intervenors' motion should be denied.

#### **I. Landowner Intervenors do not cite to any authority to support their request for an additional hearing.**

[¶ 19] Landowner Intervenors do not cite to any authority that allows the Commission to hold another hearing in these cases, and Summit is not aware of any such authority. Landowner Intervenors' Motion appears to be a "petition to reopen" the proceedings in this case. Admittedly, other agencies, such as the Public Service Commission, the Department of Financial Institutions,

or the Pesticide Control Board, specifically allow a proceeding to be “reopened,” typically for purposes of admitting “additional” evidence. *See, e.g.*, N.D.A.C. § 69-02-06-01 (“At any time after the conclusion of a hearing, but before the final order is issued . . . any party may file a petition to reopen the proceeding for the purpose of taking additional evidence.”); *see also* N.D.A.C. § 13-01.1-0601 (“After the conclusion of a hearing, but before the board issues its final order, any party may file with the board a petition to reopen the proceeding for the purpose of taking additional evidence.”); *see also* N.D.A.C. § 60-02-06-01 (“At any time after the conclusion of a hearing, but before entry of the final order by the commissioner, any party to a proceeding may file with the commissioner a petition to reopen the proceeding for the purpose of taking additional evidence.”). Unlike those other administrative agencies, however, the Commission does not have administrative rules allowing for the reopening of a proceeding. Even if they did, Landowner Intervenor have failed to show what “additional” evidence would be admitted, as explained further in the following section. Because Landowner Intervenor fail to present the Commission with any authority for it to grant the relief they now seek, their motion should be denied.

## **II. Landowner Intervenor fail to allege sufficient grounds for a supplemental hearing.**

[¶ 20] Even if the Commission had rules that allowed Landowner Intervenor to reopen the record in the above-captioned cases, Landowner Intervenor have failed to allege sufficient grounds for doing so. Landowner Intervenor admit in their brief that they are “currently working with their experts and Computer Modeling Group Ltd. to set up and run the model input files received from [Energy & Environmental Research Center], but it is estimated a first run of the model will take 24.7 days.” *See* Brief in Support of Intervenor Landowners’ Motion for Supplemental Hearing, p. 10; *see also* Declaration of Derrick Braaten, ¶ 18. Landowner Intervenor merely imply that their reservoir modeling, which they admit is based on the same data

inputs utilized by the EERC, will produce different results than the modeling conducted by EERC and/or the Commission. *See* Brief in Support of Intervenor Landowners’ Motion for Supplemental Hearing, p. 10. However, the rules adopted by other agencies for reopening proceedings require a showing of “material changes of fact or law alleged to have occurred since the conclusion of the hearing.” *See* N.D.A.C. § 69-02-06-01(1) (“The petition must set forth clearly the facts claimed to constitute the grounds requiring reopening of the proceeding, including any material changes of fact or law alleged to have occurred since the conclusion of the hearing.”). Accordingly, even if Landowner Intervenor were entitled to petition the Commission to reopen the proceedings, their Motion fails because Landowner Intervenor have not alleged any material change in fact or law in their Motion.

[¶ 21] Landowner Intervenor instead point to broad legal theories of fairness while ignoring the fact that Landowner Intervenor were allowed to meaningfully participate in the hearings in this case by conducting extensive cross-examination of Summit’s witnesses and calling their own witnesses. As discussed in greater detail below, there is no question Landowner Intervenor knew of the Applications nearly a year before the hearing thereon was held and had ample opportunity during that time to gather evidence to present at that hearing through open records requests. The fact that they failed to diligently gather evidence does not mean that their surprise and unpreparedness at the hearing was “unfair.” Landowner Intervenor’s fairness arguments are merely an attempt to distract from Landowner Intervenor’s failure to understand the documents the Commission had provided to them and their further failure to meaningfully follow up with the Commission on those documents in the twelve months preceding the June 2024 hearing on Summit’s Applications.

[¶ 22] Ultimately, while it is certain that holding an additional hearing and reopening the evidentiary record would allow Landowner Intervenor to further delay a decision in this case, there is no indication that the evidence Landowner Intervenor wish to present at the hearing would materially alter the factual record in this case. Landowner Intervenor's interest in correcting their own avoidable mistakes is not one that deserves protection, particularly where Landowner Intervenor's efforts to delay these proceedings are prejudicial to Summit's interest in a just, speedy, and inexpensive determination of the above-captioned cases. For this reason, Landowner Intervenor's request for a supplemental hearing should be denied.

### **III. Landowner Intervenor have received due process.**

[¶ 23] Landowner Intervenor have been afforded due process by the Commission in this case. "Due process prescribes that the participant in an administrative proceeding be given notice of the general nature of the questions to be heard, and an opportunity to prepare and to be heard on those questions." *St. Alexius Med. Ctr. v. N.D. Dep't Human Res.*, 2018 ND 36, ¶ 27, 906 N.W.2d 343 (quoting *Estate of Robertson*, 492 N.W.2d 599, 602 (N.D. 1992)). "Notice is adequate if it apprises the party of the nature of the proceedings so that there is no unfair surprise." *Id.* "[A] person challenging an agency action must be adequately informed in advance of the questions to be addressed at the hearing so that the person can be prepared to present evidence and arguments on those questions." *Id.* "The notice must adequately specify the issue to be considered." *Id.*

[¶ 24] Landowner Intervenor insist that they were denied the opportunity for meaningful participation in the hearing because they did not receive the documents, data, or information they wanted (or at least that they now want) from the Commission or from Summit. As indicated in the preceding paragraph, the North Dakota Supreme Court has held that due process in an administrative proceeding requires only "notice of the general nature of the questions to be heard,

and an opportunity to prepare and to be heard on those questions.” *Id.* As explained below, there can be no dispute that Landowner Intervenors were aware of the “general nature of the questions to be heard” in the above-captioned cases as early as June 14, 2023. As also explained below, there can be no dispute that in the year between that date and the hearing, Landowner Intervenors had ample “opportunity to prepare and to be heard on those questions.” Finally, there can be no dispute that Landowner Intervenors squandered the opportunity to gather and prepare evidence by waiting until the last minute to retain experts and make specific, detailed requests for the data they now complain of not receiving. For the reasons explained below, Landowner Intervenors did receive due process in these cases and are not entitled to a new hearing. Thus, their motion should be denied.

**A. Landowner Intervenors failed to diligently gather the evidence they now wish to present to the Commission.**

[¶ 25] Landowner Intervenors argue that “[t]he files produced in June of 2023 . . . only include ‘Rescue’ files, not ‘results’ files,” and that “those files have not been provided to my office by the [Commission] in any response to any records request.” *See* Declaration of Derrick Braaten, ¶ 11. However, Commission staff, in response to Landowner Intervenors’ May 15, 2024 open records request to the Commission, indicate that “all modeling input and results files submitted and used for the application by Summit,” were previously provided to Landowner Intervenors on September 21, 2023. *See* Declaration of Derrick Braaten, Ex. H. (emphasis added). The Commission’s May 21, 2024 response to Landowner Intervenors’ May 15, 2024 open records request is specific in both what was provided to Landowner Intervenors (modeling input and results files) and when it was provided (September 21, 2023). *Id.* Accordingly, and despite Landowner Intervenors’ arguments to the contrary, it appears that Landowner Intervenors were in possession of the reservoir modeling input and results files that they sought as early as September

of 2023. Landowner Intervenors were, at the time, simply unaware that they were in possession of the information they now argue they never received.

[¶ 26] Assuming, *arguendo*, that Landowner Intervenors never received the reservoir modeling input and results files from the Commission, Landowner Intervenors offer no explanation for waiting approximately 10 months, until May 15, 2024, on the eve of the June 2024 hearing on Summit’s Applications, to specifically request the CMG Modeling data and results files that they argue were never provided to them by the Commission. Landowner Intervenors were aware that the Commission had specifically requested CMG modeling files from Summit as early as June 23, 2023. Yet, Landowner Intervenors continued to inexplicably make very broad and general open records request to the Commission for “applications” and related “documents” and “correspondence.”

[¶ 27] Finally, on May 15, 2024, Landowner Intervenors requested, with specificity, the modeling files and data that they required to run the models from the Commission. This specific open records request appears to have been made at approximately the same time that Landowner Intervenors engaged their expert witnesses to assist with their case. This request, and the Commission’s response, demonstrate that Landowner Intervenors did not understand the documents and information the Commission had provided to them until after they had obtained expert assistance on the eve of the June 2024 hearing. The belated retention of experts also likely explains Landowner Intervenors’ assertion, for the first time, at the June 2024 hearing that they never received the specific modeling inputs and results files they now insist are critically important. *See* Declaration of Lawrence Bender, ¶ 7. If Landowner Intervenors failed to obtain the evidence they wished to present in time for the hearing, it was not due to any unfair procedure employed by the Commission or Summit in this case; rather, it was their failure to diligently gather

that evidence in the year prior to the hearing on the Applications, or, as discussed in greater detail in the following section, it was due to their lack of diligence in hiring experts to assist them in gathering such evidence.

**B. Landowner Intervenor’s failed to timely retain experts to assist in analyzing the information received by Landowner Intervenor through their numerous open records requests to the Commission.**

[¶ 28] Landowner Intervenor alleges that they “used every method available to obtain the [data and information the Commission considers] prior to the hearing, but due to stonewalling by Summit and the Commission these efforts were unsuccessful.” *See* Brief in Support of Intervenor Landowners’ Motion for Supplemental Hearing, pg. 11. Summit disagrees. Landowner Intervenor did make numerous open records requests and did conduct discovery on Summit. If these efforts were unsuccessful, it was not because of “stonewalling by Summit and the Commission,” but rather because Landowner Intervenor failed to get the expert help necessary to use these methods effectively until it was too late.

[¶ 29] Landowner Intervenor’s experts testified at the June 2024 hearing that they had been retained less than 30 days before the hearing or that they had spent less than 15 hours reviewing Summit’s Applications and other information in preparation for their testimony. As the Commission is well aware, this is not enough time to prepare for a hearing that covers many highly technical subject matters in applications that comprise thousands of pages of materials.

[¶ 30] If Landowner Intervenor had retained their expert witnesses sooner than May of 2024, their experts would have had more time to prepare and would have been able to assist the Landowner Intervenor in their evidence gathering efforts. If the Commission is to believe Landowner Intervenor’s claim that they never received the modeling data they sought, Landowner Intervenor have offered no reason for why they never followed up with the Commission to specifically request such information until May 15, 2024. If the reason for this failure was their

lack of expertise on the subject matter, they have offered no reason for why they failed to retain experts until many months after they had requested and received the relevant records. Had experts been hired promptly, Landowner Intervenor could have submitted a detailed open records request to the Commission and/or EERC well in advance of the June 2024 hearing. In fact, this is exactly what Landowner Intervenor did, albeit too late, when they submitted their May 15, 2024, open records request to the Commission and their post-hearing open records request to the EERC.

[¶ 31] The consequences of their evidence gathering without the assistance of technical experts are evident from the sequence of events set forth in the statement of facts, above. Landowner Intervenor made numerous open records requests to the Commission from June 2023 to September 2023 without the assistance of experts knowledgeable in the field of reservoir modeling. These requests were general and broad, signaling that Landowner Intervenor did not understand the rules and regulations pertaining to the geologic storage of carbon dioxide. Specifically, in June of 2023, counsel for Landowner Intervenor made an open records request for “all applications for an order amalgamating property interests.” As correctly pointed out by Commission staff in its response, the Commission would not be in possession of an application to amalgamate property interests because no such application exists. The Commission requires a permit to operate a storage facility. Amalgamation may be required in connection therewith, but not applied for separately. *See* N.D.C.C. §§ 38-22-02(4), 38-22-04 and 38-22-10. In its response to Landowner Intervenor’s open records request, Commission staff offer assistance to Landowner Intervenor by indicating that the Commission does “have a draft application for a storage facility permit.” Counsel for Landowner Intervenor then responds by requesting the draft applications for a storage facility permit.

[¶ 32] The follow-up open records requests made by Landowner Intervenor's counsel to the Commission further indicate that Landowner Intervenor simply did not know what information the Commission had provided to them, nor what information to request from the Commission, even though they should have, and could have, had they retained their expert witnesses sooner than a month prior to the June 2024 hearing on Summit's Applications. Because neither Summit nor the Commission prevented Landowner Intervenor from hiring experts or making open records requests for the data they now seek, Landowner Intervenor have not been treated unfairly in the above-captioned cases and due process does not entitle them to an additional hearing.

### CONCLUSION

[¶ 33] In conclusion, the reopening of these proceedings to allow Landowner Intervenor an opportunity to correct their avoidable mistakes is both prejudicial and unfair to Summit. For this reason and the other reasons set forth herein, the Commission should deny Landowner Intervenor's Motion for a Supplemental Hearing.

Dated this 12th day of September, 2024.

**BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA**

**CASE NOS. 30869–30880**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1,**

11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by

**nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of**

**carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the**

**Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**RESPONSE TO INTERVENOR LANDOWNERS'**  
**MOTION TO COMPEL RESPONSES TO WRITTEN DISCOVERY**

[¶ 1] Applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, “Summit”) submit this brief in response to the Motion to Compel Responses to Written Discovery filed with the North Dakota Industrial Commission (“Commission”) on August 29, 2024 by the Landowner Intervenor.<sup>1</sup> Landowner

---

<sup>1</sup> Landowner Intervenor are the Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

Intervenors' motion to compel depends in large part on the success of their motion for supplemental hearing. If Landowner Intervenors' motion for a supplemental hearing is denied, the Commission should deny Landowner Intervenors' motion to compel. Because no additional hearing is warranted, no further discovery should be permitted. For this reason, and for the reasons set forth below, the Commission should deny Landowner Intervenors' motion.

### **STATEMENT OF RELEVANT FACTS**

[¶ 2] Summit's brief in response to the Landowner Intervenors' motion for supplemental hearing, filed herewith, sets forth a summary of document requests made by Landowner Intervenors to the Commission before and after receiving notice of the hearing ("Hearing") held in these cases on June 11-13, 2024. That statement of facts is incorporated herein by reference.

[¶ 3] On April 16, 2024, the Landowner Intervenors received notice of the Hearing. Br. Supp. Intervenor Landowners' Mot. Compel Resps. Written Discovery, p. 7. Two days later, one of the Landowner Intervenors petitioned to intervene in the above-captioned action filed a petition to intervene. *Id.* The remaining Landowner Intervenors waited a month or more before filing petitions to intervene on May 16, 2024, and May 24, 2024. The Commission issued orders granting Landowner Intervenors' petitions to intervene a week later.

[¶ 4] The Swenson Living Trust ("Trust") attempted to conduct discovery in the above-captioned cases before intervening. These attempts included three sets of written discovery directed at Summit on May 2, 6, and 10, 2024, as well as an attempted corporate deposition noticed on May 9, 2024. *See, e.g.*, Decl. Derrick Braaten Supp. Mot. Compel, Exs. A–C (Aug. 29, 2024); Decl. Derrick Braaten Supp. Mot. Compel, Ex. 1 (June 10, 2024). On May 16, 2024, the Trust requested the Commission shorten Summit's time to respond to its three sets of pre-intervention written discovery. *See, e.g.*, Brief Supp. Mot. Expedite Discovery, pp. 15–16.

[¶ 5] After the Commission granted its petition for intervention, the Trust abandoned the foregoing efforts and joined with the remaining Landowner Intervenors to serve three sets of

“amended” written discovery requests and an “amended” corporate deposition notice for “Summit Carbon Solutions” on May 31, 2024. *See, e.g.*, Decl. Derrick Braaten Supp. Mot. Compel, Exs. D–F (Aug. 29, 2024); Decl. Derrick Braaten Supp. Mot. Compel, Ex. 2 (June 10, 2024). On June 4, 2024, Landowner Intervenor served three “amended” corporate deposition notices for Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC, with all three depositions scheduled to take place in less than two days, at 9:00 AM CT on June 6, 2024. Decl. Derrick Braaten Supp. Mot. Compel, Exs. 4–6 (June 10, 2024).

[¶ 6] On June 5, 2024, Summit objected to the proposed corporate depositions on several grounds and indicated it would not be appearing. Decl. Derrick Braaten Supp. Mot. Compel, Ex. 7 (June 10, 2024). On June 10, 2024, one day before the hearing, Landowner Intervenor filed a motion to compel related to their corporate deposition notices. *See, e.g.*, Mot. Compel. Summit responded to the motion to compel on June 20, 2024, and Landowner Intervenor filed their reply on June 27, 2024. *See* Resp. Mot. Compel; Intervenor Landowners’ Reply Br. Supp. Mot. Compel. Summit served responses and objections to the Landowner Intervenor’s three sets of requests on July 2, 2024, after the close of evidence and the conclusion of the June 11–13, 2024, hearing. Decl. Derrick Braaten Supp. Mot. Compel, Exs. G–I (Aug. 29, 2024). The Landowner Intervenor’s May 31, 2024, written discovery requests and the Landowner Intervenor’s June 4, 2024, corporate deposition notices, as well as Summit’s responses and objections thereto, are the subject of the Landowner Intervenor’s present motion.<sup>2</sup>

---

<sup>2</sup> In connection with their argument that Summit should be compelled to submit to a corporate deposition, Landowner Intervenor appears to assert that Summit’s applications in the above-captioned cases are “void.” The consequences of this assertion are not elaborated on, nor does it appear to be germane to the relief requested by the Landowner Intervenor in the present motion, so Summit does not address the matter in this brief. If the Landowner Intervenor wishes to obtain some sort of declaration from the Commission that Summit’s applications are invalid, that request should be made by motion, in which case Summit would address the matter in a responsive brief.

## ARGUMENT

[¶ 7] Landowner Intervenor move the Commission to compel more complete responses to several requests for production and an interrogatory and to compel Summit to appear for a deposition. Landowner Intervenor's motion should be denied for at least two reasons, each explained in greater detail below. First, the motion is untimely because the Hearing concluded months ago and therefore there is no further opportunity to present evidence in these cases. Second, Landowner Intervenor's motion to compel is facially invalid because they failed to include the certification required by Rule 37(a) of the North Dakota Rules of Civil Procedure.

### **I. Landowner Intervenor's motion to compel is untimely.**

[¶ 8] Landowner Intervenor have brought the present motion to compel *after* the Commission held an evidentiary hearing on Summit's applications in the above-captioned cases. There are no other evidentiary hearings scheduled and the Commission has closed the record with respect to accepting evidence in support of or in opposition to the applications. A motion to compel at this stage of the proceedings serves no purpose. "It is obvious that a motion to compel discovery in a proceeding must be filed before trial." *513 E. Rich St. Co. v. McGreevy*, 20030WL 21101280, \*2 (Ct. App. Ohio, May 15, 2003); *see also State ex rel. Foy v. Vanderbilt Cap. Advisors, LLC*, 511 P.3d 329, 339 (Ct. App. N.M. 2020) (upholding denial of motion to compel made almost three months after evidentiary hearing noting that "[t]he lateness of the motion to compel would be sufficient reason by itself to deny it"). The Commission should thus deny the Landowner Intervenor's motion as untimely.

[¶ 9] Though Rule 37 does not include a specific time limit for motions to compel, a limit is implicit in the scope of discovery allowed by the North Dakota Rules of Civil Procedure. Rule 26 describes the scope of discovery in a civil proceeding and provides in relevant part as follows:

Parties may obtain discovery regarding any nonprivileged matter that is relevant to any party's claim or defense . . . . For good cause, the court may order the discovery of any matter relevant to the subject matter involved in the action. Relevant

information need not be admissible at the trial if the discovery appears reasonably calculated to lead to the discovery of admissible evidence.

N.D.R.Civ.P. 26(b)(1)(A). Like a court, the Commission may only order discovery of “relevant” information, and relevant information must, at a minimum, appear “reasonably calculated to lead to the discovery of admissible evidence.” *Id.* Discovery pursued after the conclusion of an evidentiary hearing is not reasonably calculated to lead to the discovery of admissible evidence because the time for admission of evidence has passed.

[¶ 10] Landowner Intervenor’s rebuttal to the foregoing is presumably that they have requested an additional hearing for the taking of additional evidence. That motion should be denied for the reasons stated in Summit’s response thereto, filed herewith, and if that motion is denied, the present motion must also fail.

## **II. Landowner Intervenor’s motion to compel does not include a proper certification.**

[¶ 11] A motion to compel must “include a certification that the movant has in good faith conferred or attempted to confer with the person or party failing to make discovery in an effort to obtain it without court action.” N.D.R.Civ.P. 37(a)(1). The North Dakota Supreme Court has explained that “a facially valid motion to compel requires two components, an actual certification document and performance.” *Meuchel v. Red Trail Energy, LLC*, 2024 ND 44, ¶ 24, 4 N.W.3d 203. As explained below, Landowner Intervenor’s motion does not include a proper certification document. Accordingly, for this additional reason, the Landowner Intervenor’s motion should be denied.

[¶ 12] The Landowner Intervenor’s motion to compel must be accompanied by “an actual certification document” to be valid. *Meuchel*, 2024 ND 44, ¶ 24. The North Dakota Supreme Court has described the certification requirement as follows:

Although Rule 37 does not identify detailed certification requirements, to effectuate the underlying policy of the rule, counsel seeking court-facilitated discovery must adequately set forth in the motion essential facts sufficient to enable the court to

pass a preliminary judgment on the adequacy and sincerity of the good faith conferment between the parties. That is, a certificate must include, *inter alia*, the names of the parties who conferred or attempted to confer, the manner by which they communicated, the dispute at issue, as well as the dates, times, and results of their discussions, if any.

*Id.* ¶ 26 (citations omitted) (internal quotation marks omitted).

[¶ 13] In an effort to meet the certification requirement described above, Landowner Intervenor submitted the Declaration of Derrick Braaten in Support of Motion to Compel with their motion. The extent of the certification is Mr. Braaten's assertion that "I certify that I have conferred in good faith to obtain this discovery without the Commission's intervention." Decl. Derrick Braaten Supp. Mot. Compel, ¶ 3. This statement does not include "the names of the parties who conferred or attempted to confer, the manner by which they communicated, the dispute at issue, as well as the dates, times, and results of their discussions, if any." *Meuchel*, 2024 ND 44, ¶ 26. As such, the Landowner Intervenor has failed to file a proper certification document with their motion to compel. Their motion is thus facially invalid and must be denied.<sup>3</sup>

### CONCLUSION

[¶ 14] The Landowner Intervenor's motion to compel hinges in large part on the Commission granting their motion for supplemental hearing. Summit has argued persuasively in response to that motion that the Landowner Intervenor's request for a second hearing should be denied. For that reason, and for the reasons set forth above, the Commission should also deny the Landowner Intervenor's motion to compel.

---

<sup>3</sup> Even though Landowner Intervenor's motion to compel should be denied for the reasons set forth in this brief, if the Commission were to schedule a second hearing in the above-captioned cases, Summit would be willing to promptly confer with Landowner Intervenor regarding the documents and information sought by the present motion in an effort to resolve the parties' discovery disputes without further action by the Commission.

Dated this 12th day of September, 2024.

**BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA**

**CASE NOS. 30869–30880**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1,**

11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by

nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.

In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of

**carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the**

**geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**DECLARATION OF LAWRENCE BENDER**  
**IN SUPPORT OF SUMMIT'S RESPONSE TO INTERVENOR**  
**LANDOWNERS' MOTION FOR SUPPLEMENTAL HEARING**

[illegible]

Lawrence Bender, being first duly sworn upon oath, states and alleges as follows:

¶ 1] I am counsel for the above-named applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, “Summit”).

In that capacity I am familiar with and have personal knowledge of the facts set forth below.

[¶ 2] On June 25, 2024, I submitted an open records request to the North Dakota Industrial Commission, Department of Mineral Resources, Oil and Gas Division (the “Commission”), requesting that the Commission provide copies of the information it provided to Mr. Derrick Braaten in response to Mr. Braaten’s May 15, 2024 open records request to the Commission.

[¶ 3] In response to my June 25, 2024 open records request, the Commission provided a copy of a March 12, 2024 e-mail from Desirae Zaste to the Commission in which Ms. Zaste attaches an open records request dated March 12, 2024 from Mr. Braaten to the Commission. A true and correct copy of Desirae Zaste’s e-mail to the Commission, and Mr. Braaten’s March 12, 2024 open records request to the Commission is attached hereto as **Exhibit A**.

[¶ 4] In response to my June 25, 2024 open records request, the Commission provided a copy of the Commission’s March 18, 2024 response to Mr. Braaten’s March 12, 2024 open records request. A true and correct copy of Michael Ziesch’s March 18, 2024 e-mail to Desirae Zaste is attached hereto as **Exhibit B**.

[¶ 5] In response to my June 25, 2024 open records request, the Commission provided a copy of Mr. Braaten’s March 27, 2024 response to Mr. Ziesch’s March 18, 2024 e-mail to Desirae Zaste. A true and correct copy of Mr. Braaten’s March 27, 2024 e-mail to Mr. Ziesch is attached hereto as **Exhibit B**.

[¶ 6] In response to my June 25, 2024 open records request, the Commission indicated that Mr. Braaten never followed up with the Commission to narrow Mr. Braaten’s March 12, 2024 open records request. A true and correct copy of the July 10, 2024 e-mail I received from Michael Ziesch is attached hereto as **Exhibit C**.

[¶ 7] At the Commission's June 2024 hearing on Summit's storage facility permit applications, I participated in an off-the-record conversation with intervenors' counsel, Mr. Derrick Braaten; the Director of Mineral Resources, Mr. Lynn Helms; the hearing officer, Mr. David Garner; and possibly one or two other members of Commission staff. During this conversation, Mr. Braaten claimed that the Commission never provided the reservoir modeling input and results files utilized in connection with Summit's applications in response to any of Mr. Braaten's open records requests. Mr. Helms and Commission staff insisted that the reservoir modeling input and results files were in fact provided to Mr. Braaten.

[¶ 8] On June 12, 2024, Mr. Braaten called Shane Bofto, P. Ted Doughty, and Paul Button as expert witnesses at the hearing on Summit's storage facility permit applications. Each of said expert witnesses testified that they were either hired approximately a month prior to the commencement of the June 2024 hearing and/or that they had spent less than 15 hours reviewing Summit's applications and other materials in preparation of their testimony. A true and correct copy of excerpts from the transcript of Mr. Bofto's testimony at the June 11, 2024 hearing is attached hereto as **Exhibit D**. A true and correct copy of excerpts from the transcript of Mr. Doughty's testimony at the June 11, 2024 hearing is attached hereto as **Exhibit E**. A true and correct copy of excerpts from the transcript of Mr. Button's testimony at the June 11, 2024 hearing is attached hereto as **Exhibit F**.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 12th day of September, 2024, at Bismarck, North Dakota, USA.

**BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA**

**CASE NOS. 30869–30880**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1,**

11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic

**storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation,**

and enact such special field rules as may be necessary.

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143**

North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

**Re: Records Request Applications for Permits**

I am writing to request a copy of records from your office, pursuant to N.D.C.C. § 44-04-18. Please provide all applications for permits pursuant to N.D.C.C. ch. 38-22 and N.D.C.C. ch. 38-25 from September 21, 2023 to present, including any associated or related correspondence, documents, and notes related to the applications for permits.

To the maximum extent possible, I request that you provide all records to me in electronic format by emailing them to my paralegal Desirae Zaste at [desirae@braatenlawfirm.com](mailto:desirae@braatenlawfirm.com). If it is necessary to mail responsive records, they may be sent to me at the address below.

You have my pre-authorization to bill up to \$300.00 to fulfill this records request. If you have any questions about anything in this letter, do not hesitate to contact me. Thank you for your assistance.

Sincerely,

Derrick Braaten

DB/dnz

Mr. Ziesch:

I disagree that the request is overly broad. There are a limited number and type of permits that can be requested under those two chapters of code. I do understand the position of the NDIC however and we will respond accordingly.

Thank you,

**Derrick Braaten**

[Warning: External Sender]

Good afternoon, we have reviewed the request and would ask that you narrow it in terms of scope and topic. It's too vague requesting for 38-22 and 38-25, those are broad sections of code.

Regards,

**Michael Ziesch**

1       this, but I asked -- my question was specific to  
2       being involved in an application with a state that  
3       had primacy.

4           A.     None with a state that had primacy.

5           Q.     Other than the applications that are  
6       before the Commission today, have you ever reviewed  
7       an application for a Class VI well?

8           A.     Back to my previous statement, I believe I  
9       did when I was drafting the program to look at what  
10      an application looks like. I just don't recall  
11      because it was so long ago on what it was.

12          Q.     That would have been back in the 2012  
13      period, 2014 period; is that right?

14          A.     Somewhere in there.

15          Q.     And would those have been applications  
16      before the EPA?

17          A.     Yes.

18          Q.     Okay. When were you hired by the  
19      intervenors in this case?

20          A.     Oh, it's been a month or so.

21          Q.     Okay. You don't know the exact date? I  
22      mean, today is the 11th. Would it have been  
23      probably May 11?

24          A.     It could have been about that time, but I  
25      don't know specifics.

1           Q.     What were you asked to do on May -- on  
2     May 11?

3           MR. BRAATEN:   I'm going to object to that  
4     characterization of testimony.  I don't believe he  
5     testified to doing something on the 11th.

6           HEARING EXAMINER GARNER:  Overruled.

7           Q.     (MR. BENDER CONTINUING)  Okay.  What --  
8     okay.  I guess you can answer the question.

9           A.     What was I -- could you repeat that  
10    question again?

11          Q.     What were you asked to do when you were  
12    hired for this project?

13          MR. BRAATEN:   I'm going to object to  
14    questions eliciting communications between me and  
15    the experts.

16          HEARING EXAMINER GARNER:  Overruled.

17          MR. BRAATEN:   You can go ahead, Shane.

18          MR. BOFTO:    Oh, okay.  Just to provide my  
19    experience with the Class VI guidance and programs  
20    that I had early on and just my general  
21    environmental background information.

22          Q.     (MR. BENDER CONTINUING)  And how many  
23    hours do you believe you've worked on this project  
24    since you were retained?

25          A.     Outside of this, probably 15 reviewing

1 documents and such and --

2 Q. And have you had an opportunity to review  
3 each one of the -- what I'm going to refer to as  
4 the final form of applications for the three  
5 applications that are before the Commission?

6 A. I've generally reviewed them, yes, and --  
7 I'm trying to think if I've done any others. So  
8 I'd say I generally reviewed the three  
9 applications.

10 Q. Okay. And when you say reviewed them, did  
11 you just -- did you just read them or did you do  
12 anything beyond reading? Did you do any  
13 independent research?

14 A. I looked closely at some of the models on  
15 what were being used and what they did exactly.

16 Q. Okay. And if I -- and please correct me  
17 if I'm wrong, Shane, but I understood your  
18 testimony when Mr. Braaten was asking you some  
19 questions that you -- if you'd had the materials  
20 that he requested from the Industrial Commission,  
21 you could have run a model in a relatively short  
22 period of time. Was that your testimony?

23 A. Yes. I specifically referenced the  
24 PHREEQC model by U -- that is put out by the USGS.

25 Q. Okay. And do you have the necessary

1       within their stimulation -- their simulation area.  
2       Excuse me. So there's very little data within  
3       their application with which to evaluate exactly  
4       how they derive their permeability parameters for  
5       the AOR that they're applying for.

6           Q.     Mr. Doughty, do you recall approximately  
7       how long ago you were asked about the possibility  
8       of working on this matter?

9           A.     It was, what, a month ago, maybe three  
10      weeks ago, something like that.

11          Q.     And are you ready, willing and able to  
12      conduct additional review and particularly review  
13      of seismic data if you receive it?

14          A.     Yes, I am.

15                 MR. BRAATEN: No further questions.

16                 HEARING EXAMINER GARNER: Attorney Bender.

17                                 **CROSS-EXAMINATION**

18       **BY MR. BENDER:**

19          Q.     Mr. Doughty, are you -- Mr. Doughty, are  
20      you in a position today to make any recommendations  
21      to the Commission as to whether this application  
22      should be approved or denied?

23          A.     I am.

24          Q.     And what are your conclusions?

25          A.     I would recommend that it's denied on the

1           A.     Let me --

2           Q.     How many hours -- just let me ask the  
3 questions. Just let me ask the questions.

4           A.     Okay.

5           Q.     How many hours of time have you spent  
6 working on this project?

7           A.     I have -- up until the start of this  
8 hearing, I spent 14-and-a-half hours working on it.

9           Q.     Okay. And what were you asked to do?

10           MR. BRAATEN: Same objection to privileged  
11 communications with experts.

12           HEARING EXAMINER GARNER: Overruled.

13           MR. BUTTON: What was I asked to do?

14           Q.     (MR. BENDER CONTINUING) Yes.

15           A.     I was asked by Mr. Braaten to evaluate the  
16 impact of the pore space of his clients.

17           Q.     Okay. And to do that at this point in  
18 time, all you have done is reviewed the  
19 applications that were submitted to the Commission;  
20 is that correct?

21           A.     No.

22           Q.     You didn't review the applications?

23           A.     I did review the applications, but that is  
24 not all that I've done.

25           Q.     What else did you do in the 15 hours that

<b>and 7, Township 140 North, Range 87 West,</b>	
<b>Mercer, Morton, and Oliver Counties, ND</b>	

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**BRIEF IN SUPPORT OF INTERVENOR LANDOWNERS' MOTION TO COMPEL  
RESPONSES TO WRITTEN DISCOVERY**

---

**I. FACTS**

On April 16, 2024, Intervenor Landowners received notice that the Commission would hold a hearing on the applications in mid-June. On April 18—two days after receiving notice—Swenson Trust promptly filed a petition to intervene. The other Intervenor Landowners filed their own petitions in the following days.

Intervenor Landowners served their first set of discovery requests on Summit on May 2, 2024. *See* Exhibit A, attached to the Decl. of Derrick Braaten. They then served their second and third sets of discovery requests on May 6 and May 10, 2024, respectively. *See* Exhibits B and C, attached to the Decl. of Derrick Braaten.

On May 16, with the hearing quickly approaching, Intervenor Landowners filed a motion to expedite discovery, as an alternative to a previously filed motion to continue the hearing. One of these two alternatives was necessary for procedural fairness because the subject matter is technical, and Intervenor Landowners' experts needed sufficient time to review the data on which the Commission will base its decision. "[F]airness requires that the agency afford interested parties an opportunity to challenge the underlying factual data relied on by the agency." *Chemical Mfrs. Ass'n v. U.S. E.P.A.*, 870 F.2d 177, 200 (5th Cir. 1989).

The Commission waited until May 31, 2024 to grant Intervenor's Petitions to Intervene, providing Summit a way to delay responding to discovery rather than expediting it as was requested.

In support of its May 16 motion to expedite discovery, Intervenor Landowners explained that it was necessary because of the compressed timeline of events, among other reasons. Intervenor

Landowners supported their motion with a declaration of Paul Button, who specifically stated what was needed, why it was needed, and when it was needed.

On June 7, 2024, the Commission denied Intervenor Landowners' request for expedited discovery. It stated that the "Trust offered conclusory statements regarding its need for discovery" and cited the opinion of Summit's representative, Jeff Skaare, who said that the request was for a large volume of information, and it would not be feasible to respond to the requests. On this basis, the Commission held "it would not be possible for Summit to comply with such an order and the burden would be significant to Summit," and it denied the motion.<sup>1</sup>

The hearing commenced four days later, without Intervenor Landowners having the benefit of discovery.

Intervenor Landowners had served amended discovery requests on May 31, the date the Commission belatedly granted their petitions to intervene, but Summit did not respond to these requests until July 2—two months after being served the first set of discovery and three weeks

---

<sup>1</sup> The Commission's denial of the motion for expedited discovery was incorrect both factually and legally. First, its decision was based on a factual inaccuracy because the Trust supported its motion with the declaration of Paul Button concerning what information was needed and why—far from merely "conclusory statements." Second, the decision was based on a misapprehension of the law because the Trust did not have the burden to offer more than "conclusory statements regarding its need for discovery." The century code specifically provides that "discovery may be obtained in accordance with the North Dakota Rules of Civil Procedure." N.D.C.C. § 28-32-33. These rules do not require the parties to explain their need for discovery. Instead, "parties may obtain discovery regarding any nonprivileged matter that is relevant to any party's claim or defense, including the existence, description, nature, custody, condition, and location of any documents, electronically stored information, or other tangible things and the identity and location of persons who know of any discoverable matter." N. D. R. Civ. P., Rule 26(b)(1)(A). At most, the Trust needed to explain the reason discovery needed to be expedited, not the need for the discovery itself. Given that the Trust was not given the materials which were *in the Commission's possession* and could have simply been provided with almost zero effort by the Commission, expediting discovery would have been as simple as the Commission providing the files in its possession or ordering Summit to do so, just as the Commission had previously required it to send the load files for staff review. It refused to do so without stating any justification, requiring the Trust and other landowners whose due process rights have been trampled to obtain them from outside sources through other means.

after the hearing. *See* Exhibits D, E, and F, attached to the Decl. of Derrick Braaten. Although Summit had ample time to respond to the discovery requests before the hearing, it sat on its hands enabled by the Commission's intentional inaction.

## **II. LAW & ARGUMENT**

North Dakota Rules application here allow broad discovery in civil matters, whereby "[p]arties may obtain discovery regarding any nonprivileged matter that is relevant to any party's claim or defense." N.D.R.Civ.P. 26(b)(1)(A). The discovery rules should be construed "liberally." *See Marmon v. Hodny*, 287 N.W.2d 470, 476 (N.D. 1980). Additionally, Rule 37 confers "broad discretion" to compel discovery upon a party's motion. *Voracheck v. Citizens State Bank of Lankin*, 421 N.W.2d 45, 50 (N.D. 1988); *see* N.D.R.Civ.P. 37(a)(1). Intervenor Landowners certify they have conferred in good faith to obtain this discovery without the Commission's intervention. *See* Decl. of Derrick Braaten, ¶3.

### **A. The Commission should order Summit to provide a complete response to Request for Production Nos. 2, 3, 4, 5, 6 (Set 1).**

Among the documents requested in these RFPs, Landowners asked repeatedly for "field and analytical data" such as the data used to evaluate the CO<sub>2</sub> effects on the upper and lower confining layers...." The seismic field and analytical data (i.e. raw and processed data) was used for numerous purposes and was used generally to support all of the activities references in RFP Nos. 2-6. *See* Exhibit G, attached to the Declaration of Derrick Braaten. Summit's witnesses testified at the hearing repeatedly to how critical the seismic data was to their analysis. *See* Exhibit J, attached to the Declaration of Derrick Braaten, 216:19 - 217:5; 220:23 - 221:9; 246:24 - 247:16; 256:13-23; 258:3-9; 259:22 - 260:3; 261:9-19; 264:5 - 265:6; 265:16-21; 269:20 - 270:1. This request includes any raw or processed seismic data that would have been used to create the application and indeed, as was stated over and over by Summit's representatives, the data was

pivotal to numerous of the analyses conducted in support of the application and forms a fundamental basis for engineering decisions made as part of developing the application and model on which it is based. RFP No. 5 specifically requests all seismic survey data and acoustic impedance data, and all raw and processed seismic data is responsive to all five of these requests for production and it must be provided.

**B. The Commission should order Summit to provide a complete response to Request for Production Nos. 8 & 9 (Set 1).**

In Request for Production No. 8, Landowners asked for all electronic files or data provided to the ND Industrial Commission, Dept. of Mineral Resources, or Oil and Gas Division. In Request for Production No. 9, Landowners asked for “all 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format.” *See* Exhibit G, attached to the Decl. of Derrick Braaten. Summit responded to both by refusing to provide any data or files, and as with numerous other responses, it claimed “Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.”

The Commission should order Summit to provide all CMG Modeling Files including DAT, SRS, OUT, LOG, and any RST files for the model as they were provided to the Commission because the Commission has refused to provide them to Landowners, and now that error is compounded because Summit refuses to produce them on the basis that the Commission produced them.

**C. The Commission should order Summit to provide a complete response to Request for Production No. 16 (Set 1).**

Landowners requested all “reservoir pressure data for the Storage Reservoir” and Summit refused to produce any files or data claiming once again that “Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery

Request.” But the Commission did not provide all of the pressure data available, such as electronic files and data associated with any modular formation dynamics tester (MDT) data and analyses, and if the Commission is in possession of these it has similarly refused to produce them to Landowners. Summit should be ordered to provide a complete response to this Request for Production No. 16.

**D. The Commission should order Summit to provide a complete response to Request for Production Nos. 1 & 4 (Set 2).**

Summit’s response to Request for Production No. 1 (Set 2) is misleading. Landowners requested “all agreements for use of or damage to the pore space of any property that are in your possession.” Summit responds stating “that a copy of the pore space lease is attached as Exhibit D to the Storage Facility Agreement submitted as part of its applications in the above-captioned cases.” *See* Exhibit H, attached to the Decl. of Derrick Braaten. Summit similarly points to its own lease for its response to RFP 4 (Set 2).

Summit cannot credibly contend that it has no agreements for use of or damage to the pore space of any property in its possession other than a copy of its own pore space lease attached to its application. It should be ordered to produce the other agreements in its possession.

**E. The Commission should order Summit to provide a complete response to Request for Production No. 6 (Set 2).**

Landowners requested all correspondence related to Summit’s applications between Summit and the NDIC. Given that the NDIC’s response to Landowner’s requests for data and information has been to refer Landowners to its website and Summit’s applications, it is critical and relevant for Landowners to have the correspondence between Summit and the NDIC. The NDIC has not produced these records in response to Landowners’ open record requests as Summit contends, and Summit should be ordered to produce these records to aid Landowners in their search for data and information relevant to the property rights being taken from them in this proceeding. Presumably

Summit has been responsive to requests for files and data from the Commission staff, so this correspondence would significantly aid Landowners' search for data and files.

**F. The Commission should order Summit to provide a complete response to Interrogatory No. 1 (Set 3).**

Among its discovery requests, Intervenor Landowners sought information concerning "CO2 pressure relief devices or vent systems or other mechanical devices designed for relieving pressure from a pipe," including discharge pipe sizes. *See* Interrogatory No. 1 of Exhibit I, attached to the Decl. of Derrick Braaten. Summit responded with improper, boilerplate objections and stated that it provided responsive testimony at the hearing.

However, Summit did not provide responsive testimony at the hearing. Instead, its expert, Mr. Powell, said that the information was contained in a piping and instrumentation diagram that he would willingly provide. *See* Exhibit J, 491:5-9. This diagram has not been provided, and the Commission should order Summit to provide it because it is encompassed by the discovery request and Summit testified under oath that it would provide these diagrams, a commitment now proven hollow and false. *Id.*

**G. The Commission should order Summit to provide a complete response to Request for Production No. 1 (Set 3).**

Summit's response to Request for Production No. 1 in Set 3 of the discovery requests was also insufficient. *See* Exhibit I, attached to the Decl. of Derrick Braaten. The Request stated:

Please produce any above-ground vapor dispersion modeling results such as from any engineered pressure relief systems, including all data and input files and load files. Without limiting the generality of the forgoing, specifically provide all data inputs for the following: weather conditions modeled, topography assumptions modeled, flow rate of CO2 over time, total quantity of CO2 released and total time of release modeled, and predicted CO2 concentrations at any public receptors such as roads, buildings, and dwellings.

Summit, again, responded with improper, boilerplate objections and also an objection that the information requested was protected from open record requests under N.D.C.C. § 44-04-24 and

subject to a protective order entered by the North Dakota Public Service Commission, citing Docket No. 364, Case No. PU-22-391. This objection is misplaced because the protective order applies only to testing done on the mainline, while this request seeks information concerning the surface facilities at the injection point *after* the terminus of the mainline, as discussed at the June 12 hearing. Exh. J, 477:2-25.

**H. The Commission should order Summit to appear at a 30(b)(6) deposition.**

Summit argues that the Intervenor Landowner's did not serve the 30(b)(6) on the correct entity and it did not need to appear at the deposition. Summit was being wholly deceptive in not appearing for its noticed deposition and deceiving Intervenor Landowners and the Commission as to why it was not required to appear in its response to the motion to compel. *See* Response to Motion to Compel, ¶¶2-3.

Summit recently provided Intervenor Swenson Living Trust copies of a notice of assignment on July 18, 2024 and July 24, 2024. *See* Exhibits 1 and 2, attached to the Decl. of Kurt Swenson. The July 18, 2024 notice of assignment assigned Summit Carbon Solutions, LLC to SCS Permanent Carbon Storage, LLC and the July 24, 2024 notice of assignment assigned SCS Permanent Carbon Storage, LLC to Summit Carbon Storage #2. *Id.* Summit Carbon Solutions was indeed the real party in interest when served with the deposition notice because it owned the pertinent interests at the time of service. Summit Carbon Storage, #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC were not proper applicants at the time of the applications submitted to the North Dakota Industrial Commission. To the extent the Commission will hold to corporate formalities it must do so consistently, and in this case if that is done, all three applications are void because they were submitted by entities with no ownership interests pertinent to the applications when they were submitted. It is abuse of process to apply

strict corporate formalities to Intervenor Landowners and ignore those same formalities to benefit the improper applicants.

The notice of deposition was properly served when it was served on Summit Carbon Solutions and Summit's argument should fail and it should be ordered to appear for a deposition and reimburse the Intervenor's their reasonable attorney's fees and expenses for the first deposition.

### **III. CONCLUSION**

For the foregoing reasons, the Commission should grant Intervenor Landowner's motion and order Summit to supplement its responses as indicated herein.

DATED this 29<sup>th</sup> day of August, 2024.

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**DECLARATION OF DERRICK BRAATEN IN SUPPORT OF MOTION TO COMPEL**

---

1. I am an attorney for the Intervenor Landowners (“Landowners”), in the above-captioned matter.
2. I represent the Landowners in matters involving the applications submitted by Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, and Summit Carbon Storage #3, LLC (“SCS”).
3. I certify that I have conferred in good faith to obtain this discovery without the Commission’s intervention.
4. Attached hereto as Exhibit A is a true and correct copy of Landowners Interrogatories and Request for Production of Documents to Applicants (Set 1).
5. Attached hereto as Exhibit B is a true and correct copy of Landowners Interrogatories and Request for Production of Documents to Applicants (Set 2).
6. Attached hereto as Exhibit C is a true and correct copy of Landowners Interrogatories and Request for Production of Documents to Applicants (Set 3).
7. Attached hereto as Exhibit D is a true and correct copy of Intervenor Landowners’ Amended Interrogatories and Request for Production of Documents to Applicants (Set 1). No substance of the questions had been changed when the amended discovery was served.
8. Attached hereto as Exhibit E is a true and correct copy of Intervenor Landowners’ Amended Interrogatories and Request for Production of Documents to Applicants (Set

- 2). No substance of the questions had been changed when the amended discovery was served.
9. Attached hereto as Exhibit F is a true and correct copy of Intervenor Landowners' Amended Interrogatories and Request for Production of Documents to Applicants (Set 3).
- 3). No substance of the questions had been changed when the amended discovery was served.
10. Attached hereto as Exhibit G is a true and correct copy of Response of Applicants to Intervenor Landowners' Amended Interrogatories and Request for Production of Documents (Set 1).
11. Attached hereto as Exhibit H is a true and correct copy of Response of Applicants to Intervenor Landowners' Amended Interrogatories and Request for Production of Documents (Set 2).
12. Attached hereto as Exhibit I is a true and correct copy of Response of Applicants to Intervenor Landowners' Amended Interrogatories and Request for Production of Documents (Set 3).
13. Attached hereto as Exhibit J is a true and correct copy of the Transcript of Hearing Volume II – (Pages 277-552).

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 29<sup>th</sup> day of August, 2024 at Bismarck, ND, United States.

Re: Notice of Assignment  
SCS Permanent Carbon Storage, LLC to Summit Carbon Storage #2

Dear Faye and Kurt Swenson, Trustees of the Swenson Living Trust,

As part of our plans for development of a Storage Facility Permit, SCS Permanent Carbon Storage, LLC has assigned, in whole or in part, its interest in your "Exclusive Option to Lease Pore Space" (Option); and "Pore Space Lease" (Lease) to a wholly owned subsidiary, Summit Carbon Storage #2, LLC. You are receiving this letter pursuant to the terms and conditions of the Option and Lease. There is nothing that you need to do with this letter, however, we are always interested in hearing from you.

If you have any questions or concerns, please feel free to call us at (701) 505-8676. If we do not answer, please leave us a message and we will have a representative call you. If you would prefer email, please send us any questions, or concerns to: [option-info@summitcarbon.com](mailto:option-info@summitcarbon.com).

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey L. Skaare".

**LANDOWNERS INTERROGATORIES AND REQUEST FOR PRODUCTION OF  
DOCUMENTS TO APPLICANTS (SET 1)**

---

PLEASE TAKE NOTICE, that The Swenson Living Trust, (“Landowners”), hereby require Applicants, Summit Carbon Storage #1, LLC, Summit Carbon Storage #2 , and Summit Carbon Storage #3, LLC (“SCS” or “Summit”), to answer the following interrogatories, signed and under oath, and produce and permit Landowners to inspect and copy documents responsive to the document requests contained herein in accordance with Rules 33 and 34 of the North Dakota Rules of Civil Procedure. Your answers must be in writing and signed by someone authorized to sign on behalf of, and whose signature binds, Summit. Documents should be made available at the office of Braaten Law Firm, 109 N. 4<sup>th</sup> St., Suite 100, Bismarck, North Dakota, or copies of said documents may be forwarded to Landowners attorneys (in native, electronic format). A copy of the answers and responses, together with your objections, if any, must be served within thirty (30) days from the date of service, or within such other time as the court may allow, or parties agree.

**INSTRUCTIONS**

1. These interrogatories and requests for production are deemed to be continuing in nature and should you, your counsel, or anyone representing your interest become aware of or acquire any additional knowledge or documents which affect the accuracy or completeness of any answers herein, or which relate to the matters into which these requests for production inquire, it is hereby demanded that such knowledge and documents be immediately transferred to the undersigned attorney by way of supplemental answers and responses to the full extent required by Rule 26(e), N.D.R.Civ.P.

2. In answering these interrogatories and requests for production, you are required to furnish all information and responsive documents in the possession of you, your attorney, accountants, advisors, or other persons directly employed by you.

3. Your attention is directed to Rule 34 of the North Dakota Rules of Civil Procedure, which provides that any party who produces documents for inspection “must produce documents as they are kept in the usual course of business or must organize and label them to correspond to the categories in the request.” If the requested documents are stored only on software or otherwise are “computer based information,” regardless of whether you produce as kept in the usual course of business or by category, you are directed to produce the raw data along with codes and programs necessary for translating it into usable form, or produce the information in a finished, usable form. In either case, all necessary glossaries, keys, indices, metadata, and software necessary for interpretation of the material should be produced unless software is proprietary in nature, in which case native format should be produced with an indication of the software types required to view and process the data.

4. **Produce electronic records in their native format.** Without limiting the generality of the foregoing, Word documents should be produced in .docx or .doc format, emails should be produced in Outlook or .eml format, ArcGIS shapefiles should be produced in .shp, .shx and .dbf formats (and when available .prj, .xml, .sbn, and .sbx), and Excel spreadsheets should be produced in .xlsx, .xls, or .csv format. To the maximum extent feasible, file structures should be maintained, especially when a data or document database is linked to an ArcGIS map, website, or other such file.

5. In responding to the requests for production, for each document or any portion thereof which you have withheld based on privilege, describe the factual basis for your claim of

privilege in sufficient detail to permit adjudication of the validity of that claim, including the following:

- a. A brief description of the type of document or communication;
- b. The date of the document or communication;
- c. The name, title and job description of the transmitter of the document or communication;
- d. The name, title, and job description of the person to whom the document or communication was addressed;
- e. The name, title, and job description of each person who has received or had access to the document or communication;
- f. A brief description of the subject matter of the document or communication; and
- g. The nature of the privilege claim.

6. In responding to the Requests for Production, for each document or any portion thereof which has been lost, discarded or destroyed, identify such document as completely as possible, providing as much of the following information as possible:

- a. The type of document;
- b. Its date;
- c. The date or approximate date it was lost, discarded, or destroyed;
- d. The reason(s) for disposing of the document (if discarded or destroyed);
- e. The identity of all person(s) authorizing or having knowledge of the circumstances surrounding the disposal of the document;
- f. The identity of the person(s) who lost, discarded or destroyed the document; and
- g. The identity of all persons having knowledge of the contents thereof.

7. Each interrogatory and request for production (as well as these instructions) may contain one or more terms that are defined below. You should construe each defined term

according to the meaning of that word as set forth below. All other words should be construed consistent with customary usage given the context in which the words appear such that, in each instance, you should construe any word to bring that word within the scope of the discovery request in which it appears. Consistent with the above, the singular usage of a word shall be considered to include within its meaning the plural, and vice versa; the conjunctive shall be considered to include within its meaning the disjunctive, and vice versa; and the feminine shall be considered to include within its meaning the masculine, and vice versa.

### **DEFINITIONS**

As used in these Interrogatories and Request for Production of Documents, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) and each of those entities’ authorized agents.

2. “Landowner” means The Swenson Living Trust.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> within the Areas of Review as well as the confining layers, as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit’s applications in NDIC Case No. 30869, and includes the confining layers/zones, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well,

the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW¼ of the NE¼, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, each of its agents, representatives, and attorneys, and each person acting or purporting to act on its behalf.

### **INTERROGATORIES**

**INTERROGATORY NO. 1:** Identify the petroleum engineers or reservoir engineers who made any material contribution to Summit’s applications or the materials provided in support of Summit’s applications in NDIC Case Nos. 30869-30880.

**INTERROGATORY NO. 2:** Identify the geologists who made any material contribution to Summit’s applications or the materials provided in support of Summit’s applications in NDIC Case Nos. 30869-30880.

**INTERROGATORY NO. 3:** List any other individuals not listed in Interrogatories 1 and 2 who made any material contribution to Summit’s applications or the materials provided in support of Summit’s applications in NDIC Case Nos. 30869-30880. Identify each and every person whom you expect to call or may call as a witness at trial.

**INTERROGATORY NO. 4:** Identify all witnesses Summit plans to testify in support of Summit’s applications in NDIC Case Nos. 30869-30880.

**INTERROGATORY NO. 5:** Identify all exhibits Summit plans to offer in support of Summit's applications in NDIC Case Nos. 30869-30880.

### **REQUESTS FOR PRODUCTION**

**REQUEST NO. 1:** Please produce the underlying data and electronic files necessary to run the model used to create the images of the pressure differentials contained in Figures 3-14(a-d) in Summit's application in NDIC Case No. 30869.

**REQUEST NO. 2:** Please produce all the input files, field and analytical data , and the model geochemical database used to evaluate the CO2 effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's USGS's Phreeqc geochemical model.

**REQUEST NO. 3:** Please produce all the input files, field and analytical data , and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.

**REQUEST NO. 4:** Please produce all the input files, field and analytical data , and the model geochemical database used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.

**REQUEST NO. 5:** Please produce the following data and files as referenced by Summit in its application in NDIC Case No. 30873: Geophysical Logs that penetrate injection and confining zones, Seismic survey data and core sample measurements, Acoustic impedance, total porosity, effective porosity, permeability, facies, and SLB's Petrel was used to interpolate structural surfaces for zones.

**REQUEST NO. 6:** Please produce all the input files, field and analytical data, and the model geochemical database used to evaluate the CO2 effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.

**REQUEST NO. 7:** Please produce all data from any parameter referenced or described in Table 2-1: Model Parameters for Multiphase Fluid Modeling of Geologic Sequestration as that table appears in EPA Guidance - AOR Evaluation and Corrective Action Guidance (Guidance page 11) as found here: AOR Evaluation and Corrective Action Guidance - <https://www.epa.gov/sites/default/files/2015-07/documents/epa816r13005.pdf>.

**REQUEST NO. 8:** Please produce all electronic files and data provided to the North Dakota Industrial Commission or its Department of Mineral Resources or Oil and Gas Division in association with or related to the applications in NDIC Case Nos. 30869-30880. Please produce the general ledger detail (or account activity report) for the account for Drain #11 starting January 1, 2011 through present, on an annual basis (i.e. January 1, 2011 to December 31, 2011, and January 1, 2012 to December 31, 2012, etc.).

**REQUEST NO. 9:** Please produce all 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format. The purpose of this request is to obtain the simulation model of the proposed storage facilities and associated reservoir, along with input and output files in Summit's possession for this simulation model.

**REQUEST NO. 10:** Please produce structure maps of the injection zone top, structure maps for major sub zones, and/or structure maps of confining zones for the Storage Reservoir and the confining zones as defined therein. Such maps include those created based upon formation tops

from well logs, 3D seismic reflectors, and interpretation of geologic deposition environment to give a representation of the elevation change across the target reservoir.

**REQUEST NO. 11:** Please produce all gross and net thickness isopach maps for the Storage Reservoir.

**REQUEST NO. 12:** Please produce pore volume (PV) maps and hydrocarbon pore volume (HCPV) maps of the Storage Reservoir, regardless of when compiled and regardless of whether created by Summit.

**REQUEST NO. 13:** Please produce all well logs (raw data plus processed and interpreted copies) from anywhere in or near the Storage Reservoir. Specially please produce the well logs in .las or other digital format, including any and all well logs utilized by Summit in developing its applications herein.

**REQUEST NO. 14:** Please produce any databases, spreadsheets, or other documents containing porosity, permeability, saturation, and other rock properties such as (minerology, geomechanical properties etc) for the Storage Reservoir in original electronic format and, if available, in Excel spreadsheet format.

**REQUEST NO. 15:** Please produce water chemistry and any other liquid or solid sampling data for water or other substances in the Storage Reservoir. Please include any gas solubility testing that was performed on the water samples for CO<sub>2</sub> or injected gas stream.

**REQUEST NO. 16:** Please produce all spreadsheets, databases, and other documents or compilations containing reservoir pressure data for the Storage Reservoir, including but not limited to all bottom hole pressure data, surface pressure data, and fluid level measurements. If a spreadsheet is not available, then please produce all Documents containing this information.

**REQUEST NO. 17:** Please produce all relative permeability data for the Storage Reservoir, including core test information. If multiple cores have been tested, please produce all test data.

**REQUEST NO. 18:** Please produce all capillary pressure data for all cores tested in the Storage Reservoir.

**REQUEST NO. 19:** Please produce all routine core analysis data for the Storage Reservoir.

**REQUEST NO. 20:** Please produce all spreadsheets of reservoir temperature data in the Storage Reservoir, including spreadsheets indexing reservoir temperature data to well name and API number. If this information is not available in spreadsheet format, then please produce all Documents containing this information.

**REQUEST NO. 21:** Please produce all written interpretations of micro-seismic data obtained from the Storage Reservoir.

Dated this 2<sup>nd</sup> day of May, 2024.

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**LANDOWNERS INTERROGATORIES AND REQUEST FOR PRODUCTION OF  
DOCUMENTS TO APPLICANTS (SET 2)**

---

PLEASE TAKE NOTICE, that The Swenson Living Trust, (“Landowners”), hereby require Applicants, Summit Carbon Storage #1, LLC, Summit Carbon Storage #2 , and Summit Carbon Storage #3, LLC (“SCS” or “Summit”), to answer the following interrogatories, signed and under oath, and produce and permit Landowners to inspect and copy documents responsive to the document requests contained herein in accordance with Rules 33 and 34 of the North Dakota Rules of Civil Procedure. Your answers must be in writing and signed by someone authorized to sign on behalf of, and whose signature binds, Summit. Documents should be made available at the office of Braaten Law Firm, 109 N. 4<sup>th</sup> St., Suite 100, Bismarck, North Dakota, or copies of said documents may be forwarded to Landowners attorneys (in native, electronic format). A copy of the answers and responses, together with your objections, if any, must be served within thirty (30) days from the date of service, or within such other time as the Commission may allow, or parties agree.

**INSTRUCTIONS**

1. These interrogatories and requests for production are deemed to be continuing in nature and should you, your counsel, or anyone representing your interest become aware of or acquire any additional knowledge or documents which affect the accuracy or completeness of any answers herein, or which relate to the matters into which these requests for production inquire, it is hereby demanded that such knowledge and documents be immediately transferred to the undersigned attorney by way of supplemental answers and responses to the full extent required by Rule 26(e), N.D.R.Civ.P.

2. In answering these interrogatories and requests for production, you are required to furnish all information and responsive documents in the possession of you, your attorney, accountants, advisors, or other persons directly employed by you.

3. Your attention is directed to Rule 34 of the North Dakota Rules of Civil Procedure, which provides that any party who produces documents for inspection “must produce documents as they are kept in the usual course of business or must organize and label them to correspond to the categories in the request.” If the requested documents are stored only on software or otherwise are “computer based information,” regardless of whether you produce as kept in the usual course of business or by category, you are directed to produce the raw data along with codes and programs necessary for translating it into usable form, or produce the information in a finished, usable form. In either case, all necessary glossaries, keys, indices, metadata, and software necessary for interpretation of the material should be produced unless software is proprietary in nature, in which case native format should be produced with an indication of the software types required to view and process the data.

4. **Produce electronic records in their native format.** Without limiting the generality of the foregoing, Word documents should be produced in .docx or .doc format, emails should be produced in .msg (Outlook) or .eml format, ArcGIS shapefiles should be produced in .shp, .shx and .dbf formats (and when available .prj, .xml, .sbn, and .sbx), and Excel spreadsheets should be produced in .xlsx, .xls, or .csv format. To the maximum extent feasible, file structures should be maintained, especially when a data or document database is linked to an ArcGIS map, website, or other such file.

5. In responding to the requests for production, for each document or any portion thereof which you have withheld based on privilege, describe the factual basis for your claim of

privilege in sufficient detail to permit adjudication of the validity of that claim, including the following:

- a. A brief description of the type of document or communication;
- b. The date of the document or communication;
- c. The name, title and job description of the transmitter of the document or communication;
- d. The name, title, and job description of the person to whom the document or communication was addressed;
- e. The name, title, and job description of each person who has received or had access to the document or communication;
- f. A brief description of the subject matter of the document or communication; and
- g. The nature of the privilege claim.

6. In responding to the Requests for Production, for each document or any portion thereof which has been lost, discarded or destroyed, identify such document as completely as possible, providing as much of the following information as possible:

- a. The type of document;
- b. Its date;
- c. The date or approximate date it was lost, discarded, or destroyed;
- d. The reason(s) for disposing of the document (if discarded or destroyed);
- e. The identity of all person(s) authorizing or having knowledge of the circumstances surrounding the disposal of the document;
- f. The identity of the person(s) who lost, discarded or destroyed the document; and
- g. The identity of all persons having knowledge of the contents thereof.

7. Each interrogatory and request for production (as well as these instructions) may contain one or more terms that are defined below. You should construe each defined term

according to the meaning of that word as set forth below. All other words should be construed consistent with customary usage given the context in which the words appear such that, in each instance, you should construe any word to bring that word within the scope of the discovery request in which it appears. Consistent with the above, the singular usage of a word shall be considered to include within its meaning the plural, and vice versa; the conjunctive shall be considered to include within its meaning the disjunctive, and vice versa; and the feminine shall be considered to include within its meaning the masculine, and vice versa.

### **DEFINITIONS**

As used in these Interrogatories and Request for Production of Documents, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) and each of those entities’ authorized agents.

2. “Landowner” means The Swenson Living Trust.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit’s applications in NDIC Case No. 30869, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW¼ of the NE¼, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota.

The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles,

electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary

or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “Summit’s applications” means all of Summit’s applications and documents and other materials in support in NDIC Case Nos. 30869, 30870, 30871, 30872; 30873, 30874, 30875, 30876; 30877, 30878, 30879, 30880.

11. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and its authorized agents.

### **INTERROGATORIES**

**INTERROGATORY NO. 1:** Identify all software programs necessary to open or run or execute any electronic files that are themselves responsive to or which contain data and information responsive to any of Landowners written interrogatories or requests for production of documents. Please exclude from your answer any software programs needed to open files with the following extensions: .doc, .docx, .pdf, .xlsx, .csv, .eml, .msg, as well as common audio-visual file types that can be opened with freely-available software such as .jpg/.jpeg, .tiff, and .mp4 files.

**INTERROGATORY NO. 2:** State whether Summit possesses documents related to any exchange of valuable consideration (including but not limited to monetary compensation even if nominal) for the right to use or damage the pore space of a property.

**INTERROGATORY NO. 3:** Describe how Summit determined the amounts it paid to property owners for use of or damage to their pore space for its activities related to Summit’s applications.

**INTERROGATORY NO. 4:** State the amounts that Summit has paid to property owners for use of or damage to pore space for injections of CO<sub>2</sub>.

**INTERROGATORY NO. 5:** State how Summit determines if a property owner has been “equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14), and what criteria it uses to make this determination.

**INTERROGATORY NO. 6:** Identify the factual basis in Summit’s applications or the materials submitted in support of Summit’s applications that might support or that Summit will use to support a finding that property owners have been “equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14).

**INTERROGATORY NO. 7:** Identify the factual basis in any documents or information sources other than Summit’s applications that might support or that Summit will use to support a finding that property owners have been “equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14).

**INTERROGATORY NO. 8:** Identify the sections of Summit’s applications that support a finding that “[t]hat the proposed storage facility will not adversely affect surface waters or formations containing fresh water” as is stated at N.D.C.C. § 38-22-08(7). If Summit claims that any documents or information outside of Summit’s applications support such a finding, identify those documents and information.

**INTERROGATORY NO. 9:** Identify the source of any carbon dioxide that will be injected pursuant to Summit’s applications that is created or produced or originates in North Dakota.

### **REQUESTS FOR PRODUCTION**

**REQUEST NO. 1:** Please produce all agreements for use of or damage to the pore space of any property that are in your possession.

**REQUEST NO. 2:** Without limiting the generality of Request No. 1, please produce all agreements that might support or that Summit will use to support a finding “[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space” as required by N.D.C.C. § 38-22-08(5).

**REQUEST NO. 3:** Without limiting the generality of Request No. 1, produce all agreements that might support or that Summit will use to support a finding that “all nonconsenting pore space owners are or will be equitably compensated” as stated in N.D.C.C. § 38-22-08(14).

**REQUEST NO. 4:** Please produce all documents containing data or information indicating or indicative of market values for any rights associated with the use of or damage to a property’s pore space.

**REQUEST NO. 5:** Without limiting the generality of the foregoing requests, please produce all agreements for use of or damage to any surface estate necessary for Summit to complete construction of the facilities described in Summit’s applications, including but not limited to its injections wells (but for clarification not those agreements necessary for the interstate transmission line subject to siting proceedings before the ND Public Service Commission).

**REQUEST NO. 6:** Please produce all correspondence related to Summit’s applications between Summit and the North Dakota Industrial Commission and its Department of Mineral Resources and its Oil and Gas Division (collectively “NDIC”) and any authorized agents of the NDIC, and all correspondence between your authorized agents and the NDIC (including any individuals copied on or submitting Summit’s applications) related to Summit’s applications.

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**LANDOWNERS INTERROGATORIES AND REQUEST FOR PRODUCTION OF  
DOCUMENTS TO APPLICANTS (SET 3)**

---

PLEASE TAKE NOTICE, that The Swenson Living Trust, (“Landowners”), hereby require Applicants, Summit Carbon Storage #1, LLC, Summit Carbon Storage #2 , and Summit Carbon Storage #3, LLC (“SCS” or “Summit”), to answer the following interrogatories, signed and under oath, and produce and permit Landowners to inspect and copy documents responsive to the document requests contained herein in accordance with Rules 33 and 34 of the North Dakota Rules of Civil Procedure. Your answers must be in writing and signed by someone authorized to sign on behalf of, and whose signature binds, Summit. Documents should be made available at the office of Braaten Law Firm, 109 N. 4<sup>th</sup> St., Suite 100, Bismarck, North Dakota, or copies of said documents may be forwarded to Landowners attorneys (in native, electronic format). A copy of the answers and responses, together with your objections, if any, must be served within thirty (30) days from the date of service, or within such other time as the Commission may allow, or parties agree.

**INSTRUCTIONS**

1. These interrogatories and requests for production are deemed to be continuing in nature and should you, your counsel, or anyone representing your interest become aware of or acquire any additional knowledge or documents which affect the accuracy or completeness of any answers herein, or which relate to the matters into which these requests for production inquire, it is hereby demanded that such knowledge and documents be immediately transferred to the undersigned attorney by way of supplemental answers and responses to the full extent required by Rule 26(e), N.D.R.Civ.P.

2. In answering these interrogatories and requests for production, you are required to furnish all information and responsive documents in the possession of you, your attorney, accountants, advisors, or other persons directly employed by you.

3. Your attention is directed to Rule 34 of the North Dakota Rules of Civil Procedure, which provides that any party who produces documents for inspection “must produce documents as they are kept in the usual course of business or must organize and label them to correspond to the categories in the request.” If the requested documents are stored only on software or otherwise are “computer based information,” regardless of whether you produce as kept in the usual course of business or by category, you are directed to produce the raw data along with codes and programs necessary for translating it into usable form, or produce the information in a finished, usable form. In either case, all necessary glossaries, keys, indices, metadata, and software necessary for interpretation of the material should be produced unless software is proprietary in nature, in which case native format should be produced with an indication of the software types required to view and process the data.

4. **Produce electronic records in their native format.** Without limiting the generality of the foregoing, Word documents should be produced in .docx or .doc format, emails should be produced in .msg (Outlook) or .eml format, ArcGIS shapefiles should be produced in .shp, .shx and .dbf formats (and when available .prj, .xml, .sbn, and .sbx), and Excel spreadsheets should be produced in .xlsx, .xls, or .csv format. To the maximum extent feasible, file structures should be maintained, especially when a data or document database is linked to an ArcGIS map, website, or other such file.

5. In responding to the requests for production, for each document or any portion thereof which you have withheld based on privilege, describe the factual basis for your claim of

privilege in sufficient detail to permit adjudication of the validity of that claim, including the following:

- a. A brief description of the type of document or communication;
- b. The date of the document or communication;
- c. The name, title and job description of the transmitter of the document or communication;
- d. The name, title, and job description of the person to whom the document or communication was addressed;
- e. The name, title, and job description of each person who has received or had access to the document or communication;
- f. A brief description of the subject matter of the document or communication; and
- g. The nature of the privilege claim.

6. In responding to the Requests for Production, for each document or any portion thereof which has been lost, discarded or destroyed, identify such document as completely as possible, providing as much of the following information as possible:

- a. The type of document;
- b. Its date;
- c. The date or approximate date it was lost, discarded, or destroyed;
- d. The reason(s) for disposing of the document (if discarded or destroyed);
- e. The identity of all person(s) authorizing or having knowledge of the circumstances surrounding the disposal of the document;
- f. The identity of the person(s) who lost, discarded or destroyed the document; and
- g. The identity of all persons having knowledge of the contents thereof.

7. Each interrogatory and request for production (as well as these instructions) may contain one or more terms that are defined below. You should construe each defined term

according to the meaning of that word as set forth below. All other words should be construed consistent with customary usage given the context in which the words appear such that, in each instance, you should construe any word to bring that word within the scope of the discovery request in which it appears. Consistent with the above, the singular usage of a word shall be considered to include within its meaning the plural, and vice versa; the conjunctive shall be considered to include within its meaning the disjunctive, and vice versa; and the feminine shall be considered to include within its meaning the masculine, and vice versa.

### **DEFINITIONS**

As used in these Interrogatories and Request for Production of Documents, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) and each of those entities’ authorized agents.

2. “Landowner” means The Swenson Living Trust.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit’s applications in NDIC Case No. 30869, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW¼ of the NE¼, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota.

The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles,

electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary

or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “Summit’s applications” means all of Summit’s applications and documents and other materials in support in NDIC Case Nos. 30869, 30870, 30871, 30872; 30873, 30874, 30875, 30876; 30877, 30878, 30879, 30880.

11. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and its authorized agents.

### **INTERROGATORIES**

**INTERROGATORY NO. 1:** For any installed CO2 pressure relief devices or CO2 vent systems or other mechanical devices designed for relieving pressure from a pipe, at any of the surface facilities constructed for purposes of Summit’s applications, please provide the following:

- a. Rated capacity of each device or system;
- b. Quantity of each device or system;
- c. Discharge pipe size(s);
- d. Discharge pipe outlet(s) direction (vertical or horizontal); and
- e. If horizontal, state direction of discharge.

### **REQUESTS FOR PRODUCTION**

**REQUEST FOR PRODUCTION NO. 1:** Please produce any above-ground vapor dispersion modeling results such as from any engineered pressure relief systems, including all data and input files and load files. Without limiting the generality of the forgoing, specifically provide

all data inputs for the following: weather conditions modeled, topography assumptions modeled, flow rate of CO2 over time, total quantity of CO2 released and total time of release modeled, and predicted CO2 concentrations at any public receptors such as roads, buildings, and dwellings.

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**INTERVENORS' LANDOWNERS' AMENDED INTERROGATORIES AND  
REQUEST FOR PRODUCTION OF DOCUMENTS TO APPLICANTS (SET 1)**

---

PLEASE TAKE NOTICE, that Intervenor Landowners, The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith, ("Landowners"), hereby require Applicants, Summit Carbon Storage #1, LLC, Summit Carbon Storage #2 , and Summit Carbon Storage #3, LLC ("SCS" or "Summit"), to answer the following interrogatories, signed and under oath, and produce and permit Landowners to inspect and copy documents responsive to the document requests contained herein in accordance with Rules 33 and 34 of the North Dakota Rules of Civil Procedure. Your answers must be in writing and signed by someone authorized to sign on behalf of, and whose signature binds, Summit. Documents should be made available at the office of Braaten Law Firm, 109 N. 4<sup>th</sup> St., Suite 100, Bismarck, North Dakota, or copies of said documents may be forwarded to Landowners attorneys (in native, electronic format). A copy of the answers and responses, together with your objections, if any, must be served within thirty (30) days from the date of service, or within such other time as the court may allow, or parties agree.

**INSTRUCTIONS**

1. These interrogatories and requests for production are deemed to be continuing in nature and should you, your counsel, or anyone representing your interest become aware of or acquire any additional knowledge or documents which affect the accuracy or completeness of any answers herein, or which relate to the matters into which these requests for production inquire, it is hereby demanded that such knowledge and documents be immediately transferred to the

undersigned attorney by way of supplemental answers and responses to the full extent required by Rule 26(e), N.D.R.Civ.P.

2. In answering these interrogatories and requests for production, you are required to furnish all information and responsive documents in the possession of you, your attorney, accountants, advisors, or other persons directly employed by you.

3. Your attention is directed to Rule 34 of the North Dakota Rules of Civil Procedure, which provides that any party who produces documents for inspection “must produce documents as they are kept in the usual course of business or must organize and label them to correspond to the categories in the request.” If the requested documents are stored only on software or otherwise are “computer based information,” regardless of whether you produce as kept in the usual course of business or by category, you are directed to produce the raw data along with codes and programs necessary for translating it into usable form, or produce the information in a finished, usable form. In either case, all necessary glossaries, keys, indices, metadata, and software necessary for interpretation of the material should be produced unless software is proprietary in nature, in which case native format should be produced with an indication of the software types required to view and process the data.

4. **Produce electronic records in their native format.** Without limiting the generality of the foregoing, Word documents should be produced in .docx or .doc format, emails should be produced in Outlook or .eml format, ArcGIS shapefiles should be produced in .shp, .shx and .dbf formats (and when available .prj, .xml, .sbn, and .sbx), and Excel spreadsheets should be produced in .xlsx, .xls, or .csv format. To the maximum extent feasible, file structures should be maintained, especially when a data or document database is linked to an ArcGIS map, website, or other such file.

5. In responding to the requests for production, for each document or any portion thereof which you have withheld based on privilege, describe the factual basis for your claim of privilege in sufficient detail to permit adjudication of the validity of that claim, including the following:

- a. A brief description of the type of document or communication;
- b. The date of the document or communication;
- c. The name, title and job description of the transmitter of the document or communication;
- d. The name, title, and job description of the person to whom the document or communication was addressed;
- e. The name, title, and job description of each person who has received or had access to the document or communication;
- f. A brief description of the subject matter of the document or communication; and
- g. The nature of the privilege claim.

6. In responding to the Requests for Production, for each document or any portion thereof which has been lost, discarded or destroyed, identify such document as completely as possible, providing as much of the following information as possible:

- a. The type of document;
- b. Its date;
- c. The date or approximate date it was lost, discarded, or destroyed;
- d. The reason(s) for disposing of the document (if discarded or destroyed);
- e. The identity of all person(s) authorizing or having knowledge of the circumstances surrounding the disposal of the document;
- f. The identity of the person(s) who lost, discarded or destroyed the document; and
- g. The identity of all persons having knowledge of the contents thereof.

7. Each interrogatory and request for production (as well as these instructions) may contain one or more terms that are defined below. You should construe each defined term according to the meaning of that word as set forth below. All other words should be construed consistent with customary usage given the context in which the words appear such that, in each instance, you should construe any word to bring that word within the scope of the discovery request in which it appears. Consistent with the above, the singular usage of a word shall be considered to include within its meaning the plural, and vice versa; the conjunctive shall be considered to include within its meaning the disjunctive, and vice versa; and the feminine shall be considered to include within its meaning the masculine, and vice versa.

### **DEFINITIONS**

As used in these Interrogatories and Request for Production of Documents, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) and each of those entities’ authorized agents.

2. “Landowner” means The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> within the Areas of Review as well as the confining layers, as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not

limited to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit's applications in NDIC Case No. 30869, and includes the confining layers/zones, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW¼ of the NE¼, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. "Communication" means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. "Document" means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which

information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents

which refer to or evidence the communication, and, to the extent that the communication was non-written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, each of its agents, representatives, and attorneys, and each person acting or purporting to act on its behalf.

### **INTERROGATORIES**

**INTERROGATORY NO. 1:** Identify the petroleum engineers or reservoir engineers who made any material contribution to Summit’s applications or the materials provided in support of Summit’s applications in NDIC Case Nos. 30869-30880.

**INTERROGATORY NO. 2:** Identify the geologists who made any material contribution to Summit’s applications or the materials provided in support of Summit’s applications in NDIC Case Nos. 30869-30880.

**INTERROGATORY NO. 3:** List any other individuals not listed in Interrogatories 1 and 2 who made any material contribution to Summit’s applications or the materials provided in support of Summit’s applications in NDIC Case Nos. 30869-30880. Identify each and every person whom you expect to call or may call as a witness at trial.

**INTERROGATORY NO. 4:** Identify all witnesses Summit plans to testify in support of Summit's applications in NDIC Case Nos. 30869-30880.

**INTERROGATORY NO. 5:** Identify all exhibits Summit plans to offer in support of Summit's applications in NDIC Case Nos. 30869-30880.

### **REQUESTS FOR PRODUCTION**

**REQUEST NO. 1:** Please produce the underlying data and electronic files necessary to run the model used to create the images of the pressure differentials contained in Figures 3-14(a-d) in Summit's application in NDIC Case No. 30869.

**REQUEST NO. 2:** Please produce all the input files, field and analytical data , and the model geochemical database used to evaluate the CO2 effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's Phreeqc geochemical model.

**REQUEST NO. 3:** Please produce all the input files, field and analytical data , and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.

**REQUEST NO. 4:** Please produce all the input files, field and analytical data , and the model geochemical database used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.

**REQUEST NO. 5:** Please produce the following data and files as referenced by Summit in its application in NDIC Case No. 30873: Geophysical Logs that penetrate injection and confining zones, Seismic survey data and core sample measurements, Acoustic impedance, total

porosity, effective porosity, permeability, facies, and SLB's Petrel was used to interpolate structural surfaces for zones.

**REQUEST NO. 6:** Please produce all the input files, field and analytical data, and the model geochemical database used to evaluate the CO<sub>2</sub> effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.

**REQUEST NO. 7:** Please produce all data from any parameter referenced or described in Table 2-1: Model Parameters for Multiphase Fluid Modeling of Geologic Sequestration as that table appears in EPA Guidance - AOR Evaluation and Corrective Action Guidance (Guidance page 11) as found here: AOR Evaluation and Corrective Action Guidance - <https://www.epa.gov/sites/default/files/2015-07/documents/epa816r13005.pdf>.

**REQUEST NO. 8:** Please produce all electronic files and data provided to the North Dakota Industrial Commission or its Department of Mineral Resources or Oil and Gas Division in association with or related to the applications in NDIC Case Nos. 30869-30880.

**REQUEST NO. 9:** Please produce all 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format. The purpose of this request is to obtain the simulation model of the proposed storage facilities and associated reservoir, along with input and output files in Summit's possession for this simulation model.

**REQUEST NO. 10:** Please produce structure maps of the injection zone top, structure maps for major sub zones, and/or structure maps of confining zones for the Storage Reservoir and the confining zones as defined therein. Such maps include those created based upon formation tops

from well logs, 3D seismic reflectors, and interpretation of geologic deposition environment to give a representation of the elevation change across the target reservoir.

**REQUEST NO. 11:** Please produce all gross and net thickness isopach maps for the Storage Reservoir.

**REQUEST NO. 12:** Please produce pore volume (PV) maps and hydrocarbon pore volume (HCPV) maps of the Storage Reservoir, regardless of when compiled and regardless of whether created by Summit.

**REQUEST NO. 13:** Please produce all well logs (raw data plus processed and interpreted copies) from anywhere in or near the Storage Reservoir. Specially please produce the well logs in .las or other digital format, including any and all well logs utilized by Summit in developing its applications herein.

**REQUEST NO. 14:** Please produce any databases, spreadsheets, or other documents containing porosity, permeability, saturation, and other rock properties such as (minerology, geomechanical properties etc) for the Storage Reservoir in original electronic format and, if available, in Excel spreadsheet format.

**REQUEST NO. 15:** Please produce water chemistry and any other liquid or solid sampling data for water or other substances in the Storage Reservoir. Please include any gas solubility testing that was performed on the water samples for CO<sub>2</sub> or injected gas stream.

**REQUEST NO. 16:** Please produce all spreadsheets, databases, and other documents or compilations containing reservoir pressure data for the Storage Reservoir, including but not limited to all bottom hole pressure data, surface pressure data, and fluid level measurements. If a spreadsheet is not available, then please produce all Documents containing this information.

**REQUEST NO. 17:** Please produce all relative permeability data for the Storage Reservoir, including core test information. If multiple cores have been tested, please produce all test data.

**REQUEST NO. 18:** Please produce all capillary pressure data for all cores tested in the Storage Reservoir.

**REQUEST NO. 19:** Please produce all routine core analysis data for the Storage Reservoir.

**REQUEST NO. 20:** Please produce all spreadsheets of reservoir temperature data in the Storage Reservoir, including spreadsheets indexing reservoir temperature data to well name and API number. If this information is not available in spreadsheet format, then please produce all Documents containing this information.

**REQUEST NO. 21:** Please produce all written interpretations of micro-seismic data obtained from the Storage Reservoir.

Dated this 31<sup>st</sup> day of May, 2024.

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**INTERVENORS' LANDOWNERS' AMENDED INTERROGATORIES AND  
REQUEST FOR PRODUCTION OF DOCUMENTS TO APPLICANTS (SET 2)**

---

PLEASE TAKE NOTICE, that Intervenor Landowners, The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith, ("Landowners"), hereby require Applicants, Summit Carbon Storage #1, LLC, Summit Carbon Storage #2 , and Summit Carbon Storage #3, LLC ("SCS" or "Summit"), to answer the following interrogatories, signed and under oath, and produce and permit Landowners to inspect and copy documents responsive to the document requests contained herein in accordance with Rules 33 and 34 of the North Dakota Rules of Civil Procedure. Your answers must be in writing and signed by someone authorized to sign on behalf of, and whose signature binds, Summit. Documents should be made available at the office of Braaten Law Firm, 109 N. 4<sup>th</sup> St., Suite 100, Bismarck, North Dakota, or copies of said documents may be forwarded to Landowners attorneys (in native, electronic format). A copy of the answers and responses, together with your objections, if any, must be served within thirty (30) days from the date of service, or within such other time as the Commission may allow, or parties agree.

**INSTRUCTIONS**

1. These interrogatories and requests for production are deemed to be continuing in nature and should you, your counsel, or anyone representing your interest become aware of or acquire any additional knowledge or documents which affect the accuracy or completeness of any answers herein, or which relate to the matters into which these requests for production inquire, it is hereby demanded that such knowledge and documents be immediately transferred to the

undersigned attorney by way of supplemental answers and responses to the full extent required by Rule 26(e), N.D.R.Civ.P.

2. In answering these interrogatories and requests for production, you are required to furnish all information and responsive documents in the possession of you, your attorney, accountants, advisors, or other persons directly employed by you.

3. Your attention is directed to Rule 34 of the North Dakota Rules of Civil Procedure, which provides that any party who produces documents for inspection “must produce documents as they are kept in the usual course of business or must organize and label them to correspond to the categories in the request.” If the requested documents are stored only on software or otherwise are “computer based information,” regardless of whether you produce as kept in the usual course of business or by category, you are directed to produce the raw data along with codes and programs necessary for translating it into usable form, or produce the information in a finished, usable form. In either case, all necessary glossaries, keys, indices, metadata, and software necessary for interpretation of the material should be produced unless software is proprietary in nature, in which case native format should be produced with an indication of the software types required to view and process the data.

4. **Produce electronic records in their native format.** Without limiting the generality of the foregoing, Word documents should be produced in .docx or .doc format, emails should be produced in .msg (Outlook) or .eml format, ArcGIS shapefiles should be produced in .shp, .shx and .dbf formats (and when available .prj, .xml, .sbn, and .sbx), and Excel spreadsheets should be produced in .xlsx, .xls, or .csv format. To the maximum extent feasible, file structures should be maintained, especially when a data or document database is linked to an ArcGIS map, website, or other such file.

5. In responding to the requests for production, for each document or any portion thereof which you have withheld based on privilege, describe the factual basis for your claim of privilege in sufficient detail to permit adjudication of the validity of that claim, including the following:

- a. A brief description of the type of document or communication;
- b. The date of the document or communication;
- c. The name, title and job description of the transmitter of the document or communication;
- d. The name, title, and job description of the person to whom the document or communication was addressed;
- e. The name, title, and job description of each person who has received or had access to the document or communication;
- f. A brief description of the subject matter of the document or communication; and
- g. The nature of the privilege claim.

6. In responding to the Requests for Production, for each document or any portion thereof which has been lost, discarded or destroyed, identify such document as completely as possible, providing as much of the following information as possible:

- a. The type of document;
- b. Its date;
- c. The date or approximate date it was lost, discarded, or destroyed;
- d. The reason(s) for disposing of the document (if discarded or destroyed);
- e. The identity of all person(s) authorizing or having knowledge of the circumstances surrounding the disposal of the document;
- f. The identity of the person(s) who lost, discarded or destroyed the document; and
- g. The identity of all persons having knowledge of the contents thereof.

7. Each interrogatory and request for production (as well as these instructions) may contain one or more terms that are defined below. You should construe each defined term according to the meaning of that word as set forth below. All other words should be construed consistent with customary usage given the context in which the words appear such that, in each instance, you should construe any word to bring that word within the scope of the discovery request in which it appears. Consistent with the above, the singular usage of a word shall be considered to include within its meaning the plural, and vice versa; the conjunctive shall be considered to include within its meaning the disjunctive, and vice versa; and the feminine shall be considered to include within its meaning the masculine, and vice versa.

### **DEFINITIONS**

As used in these Interrogatories and Request for Production of Documents, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) and each of those entities’ authorized agents.

2. “Landowner” means The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited

to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit's applications in NDIC Case No. 30869, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW¼ of the NE¼, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. "Communication" means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. "Document" means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a

reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-

written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “Summit’s applications” means all of Summit’s applications and documents and other materials in support in NDIC Case Nos. 30869, 30870, 30871, 30872; 30873, 30874, 30875, 30876; 30877, 30878, 30879, 30880.

11. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and its authorized agents.

### **INTERROGATORIES**

**INTERROGATORY NO. 1:** Identify all software programs necessary to open or run or execute any electronic files that are themselves responsive to or which contain data and information responsive to any of Landowners written interrogatories or requests for production of documents. Please exclude from your answer any software programs needed to open files with the following extensions: .doc, .docx, .pdf, .xlsx, .csv, .eml, .msg, as well as common audio-visual file types that can be opened with freely-available software such as .jpg/.jpeg, .tiff, and .mp4 files.

**INTERROGATORY NO. 2:** State whether Summit possesses documents related to any exchange of valuable consideration (including but not limited to monetary compensation even if nominal) for the right to use or damage the pore space of a property.

**INTERROGATORY NO. 3:** Describe how Summit determined the amounts it paid to property owners for use of or damage to their pore space for its activities related to Summit's applications.

**INTERROGATORY NO. 4:** State the amounts that Summit has paid to property owners for use of or damage to pore space for injections of CO2.

**INTERROGATORY NO. 5:** State how Summit determines if a property owner has been "equitably compensated" as that phrase is used in N.D.C.C. § 38-22-08(14), and what criteria it uses to make this determination.

**INTERROGATORY NO. 6:** Identify the factual basis in Summit's applications or the materials submitted in support of Summit's applications that might support or that Summit will use to support a finding that property owners have been "equitably compensated" as that phrase is used in N.D.C.C. § 38-22-08(14).

**INTERROGATORY NO. 7:** Identify the factual basis in any documents or information sources other than Summit's applications that might support or that Summit will use to support a finding that property owners have been "equitably compensated" as that phrase is used in N.D.C.C. § 38-22-08(14).

**INTERROGATORY NO. 8:** Identify the sections of Summit's applications that support a finding that "[t]hat the proposed storage facility will not adversely affect surface waters or formations containing fresh water" as is stated at N.D.C.C. § 38-22-08(7). If Summit claims that any documents or information outside of Summit's applications support such a finding, identify those documents and information.

**INTERROGATORY NO. 9:** Identify the source of any carbon dioxide that will be injected pursuant to Summit's applications that is created or produced or originates in North Dakota.

**REQUESTS FOR PRODUCTION**

**REQUEST NO. 1:** Please produce all agreements for use of or damage to the pore space of any property that are in your possession.

**REQUEST NO. 2:** Without limiting the generality of Request No. 1, please produce all agreements that might support or that Summit will use to support a finding "[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space" as required by N.D.C.C. § 38-22-08(5).

**REQUEST NO. 3:** Without limiting the generality of Request No. 1, produce all agreements that might support or that Summit will use to support a finding that "all nonconsenting pore space owners are or will be equitably compensated" as stated in N.D.C.C. § 38-22-08(14).

**REQUEST NO. 4:** Please produce all documents containing data or information indicating or indicative of market values for any rights associated with the use of or damage to a property's pore space.

**REQUEST NO. 5:** Without limiting the generality of the foregoing requests, please produce all agreements for use of or damage to any surface estate necessary for Summit to complete construction of the facilities described in Summit's applications, including but not limited to its injections wells (but for clarification not those agreements necessary for the interstate transmission line subject to siting proceedings before the ND Public Service Commission).

**REQUEST NO. 6:** Please produce all correspondence related to Summit's applications between Summit and the North Dakota Industrial Commission and its Department of Mineral

Resources and its Oil and Gas Division (collectively “NDIC”) and any authorized agents of the NDIC, and all correspondence between your authorized agents and the NDIC (including any individuals copied on or submitting Summit’s applications) related to Summit’s applications.

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**INTERVENOR LANDOWNERS' AMENDED INTERROGATORIES AND REQUEST  
FOR PRODUCTION OF DOCUMENTS TO APPLICANTS (SET 3)**

---

PLEASE TAKE NOTICE, that Intervenor Landowners, The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith, ("Landowners"), hereby require Applicants, Summit Carbon Storage #1, LLC, Summit Carbon Storage #2 , and Summit Carbon Storage #3, LLC ("SCS" or "Summit"), to answer the following interrogatories, signed and under oath, and produce and permit Landowners to inspect and copy documents responsive to the document requests contained herein in accordance with Rules 33 and 34 of the North Dakota Rules of Civil Procedure. Your answers must be in writing and signed by someone authorized to sign on behalf of, and whose signature binds, Summit. Documents should be made available at the office of Braaten Law Firm, 109 N. 4<sup>th</sup> St., Suite 100, Bismarck, North Dakota, or copies of said documents may be forwarded to Landowners' attorneys (in native, electronic format). A copy of the answers and responses, together with your objections, if any, must be served within thirty (30) days from the date of service, or within such other time as the Commission may allow, or parties agree.

**INSTRUCTIONS**

1. These interrogatories and requests for production are deemed to be continuing in nature and should you, your counsel, or anyone representing your interest become aware of or acquire any additional knowledge or documents which affect the accuracy or completeness of any answers herein, or which relate to the matters into which these requests for production inquire, it is hereby demanded that such knowledge and documents be immediately transferred to the

undersigned attorney by way of supplemental answers and responses to the full extent required by Rule 26(e), N.D.R.Civ.P.

2. In answering these interrogatories and requests for production, you are required to furnish all information and responsive documents in the possession of you, your attorney, accountants, advisors, or other persons directly employed by you.

3. Your attention is directed to Rule 34 of the North Dakota Rules of Civil Procedure, which provides that any party who produces documents for inspection “must produce documents as they are kept in the usual course of business or must organize and label them to correspond to the categories in the request.” If the requested documents are stored only on software or otherwise are “computer based information,” regardless of whether you produce as kept in the usual course of business or by category, you are directed to produce the raw data along with codes and programs necessary for translating it into usable form, or produce the information in a finished, usable form. In either case, all necessary glossaries, keys, indices, metadata, and software necessary for interpretation of the material should be produced unless software is proprietary in nature, in which case native format should be produced with an indication of the software types required to view and process the data.

4. **Produce electronic records in their native format.** Without limiting the generality of the foregoing, Word documents should be produced in .docx or .doc format, emails should be produced in .msg (Outlook) or .eml format, ArcGIS shapefiles should be produced in .shp, .shx and .dbf formats (and when available .prj, .xml, .sbn, and .sbx), and Excel spreadsheets should be produced in .xlsx, .xls, or .csv format. To the maximum extent feasible, file structures should be maintained, especially when a data or document database is linked to an ArcGIS map, website, or other such file.

5. In responding to the requests for production, for each document or any portion thereof which you have withheld based on privilege, describe the factual basis for your claim of privilege in sufficient detail to permit adjudication of the validity of that claim, including the following:

- a. A brief description of the type of document or communication;
- b. The date of the document or communication;
- c. The name, title and job description of the transmitter of the document or communication;
- d. The name, title, and job description of the person to whom the document or communication was addressed;
- e. The name, title, and job description of each person who has received or had access to the document or communication;
- f. A brief description of the subject matter of the document or communication; and
- g. The nature of the privilege claim.

6. In responding to the Requests for Production, for each document or any portion thereof which has been lost, discarded or destroyed, identify such document as completely as possible, providing as much of the following information as possible:

- a. The type of document;
- b. Its date;
- c. The date or approximate date it was lost, discarded, or destroyed;
- d. The reason(s) for disposing of the document (if discarded or destroyed);
- e. The identity of all person(s) authorizing or having knowledge of the circumstances surrounding the disposal of the document;
- f. The identity of the person(s) who lost, discarded or destroyed the document; and
- g. The identity of all persons having knowledge of the contents thereof.

7. Each interrogatory and request for production (as well as these instructions) may contain one or more terms that are defined below. You should construe each defined term according to the meaning of that word as set forth below. All other words should be construed consistent with customary usage given the context in which the words appear such that, in each instance, you should construe any word to bring that word within the scope of the discovery request in which it appears. Consistent with the above, the singular usage of a word shall be considered to include within its meaning the plural, and vice versa; the conjunctive shall be considered to include within its meaning the disjunctive, and vice versa; and the feminine shall be considered to include within its meaning the masculine, and vice versa.

### **DEFINITIONS**

As used in these Interrogatories and Request for Production of Documents, the following terms shall have the meanings and definitions as indicated:

1. “SCS” or “Summit” means the applicants in NDIC Case Nos. 30869, 30870, 30871, 30872 (for “Summit Carbon Storage #1, LLC,”); 30873, 30874, 30875, 30876 (for “Summit Carbon Storage #2,”) and 30877, 30878, 30879, 30880 (for “Summit Carbon Storage #3, LLC,”) and each of those entities’ authorized agents.

2. “Landowner” means The Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

3. “Storage Reservoir” means the reservoir and formation into which Summit intends to inject CO<sub>2</sub> and the confining zones within the Areas of Review as defined and depicted by Summit’s applications herein (*see e.g.* Figure 1-1, NDIC Case No. 30869) including but not limited

to the Storage Reservoir as defined by Section 1.15 of the Storage Agreement included with Summit's applications in NDIC Case No. 30869, to wit:

the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW¼ of the NE¼, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Summit Carbon Storage #1, LLC – Broom Creek 5 Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

4. “Communication” means any oral or written utterance, notation, or statement of any nature, by and to whomever, including, but not limited to, correspondence, text messages, chat messages, emails, letters, and any other oral or written conversations, dialogues, discussions, interviews, or consultations, between or among two or more persons.

5. “Document” means all documents or electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a

reasonably usable form. Documents and electronically stored information encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

6. “ESI” or “electronically stored information” means all electronically stored information discoverable under N.D.R.Civ.P. 34 - including writings, databases, shapefiles, electronic or computer files, graphs, charts, photographs, sound recordings, images, and other data or data compilations - stored in any medium from which information can be obtained either directly or, if necessary, after translation by you into a reasonably usable form. ESI encompasses and includes all file formats in which electronically stored information is or can be stored or saved, and always includes the native file format if one exists.

7. “Identification,” “identify,” or “identity,” when used in reference to (a) a natural person, requires you to state his or her full name and residential and business addresses; (b) a corporation, requires you to state its full corporate name and any names under which it does business, its state of incorporation, the address of its principal place of business, and the addresses of all of its offices in the State of North Dakota; (c) a business, requires you to state the full name or style under which the business is conducted, its business address or addresses, the types of businesses in which it is engaged, the geographic area in which it conducts those businesses, and the identity of the person or persons who own, operate, and control the business; (d) a document, requires you to state the number of pages and the nature of the document (e.g., letter or memorandum), and if not apparent on the face of the document or ESI, its title, its date, the name or names of its authors and recipients, and its present location and custodian; (e) a communication, requires you, if any part of the communication was written, to identify the document or documents which refer to or evidence the communication, and, to the extent that the communication was non-

written, to identify the persons participating in the communication and to state the date, manner, place, and substance of the communication.

8. “Person” means any individual acting in any capacity as well as any entity or organization, including divisions, departments, and other units of the organization, and shall include such organizations as public or private corporations, partnerships, joint ventures, voluntary or unincorporated associations, sole proprietorships, trusts, estates, governmental agencies, commissions, bureaus, or departments.

9. “Representative” means any agent, employee, servant, officer, director, attorney, or other person acting or purporting to act on behalf of the person in question.

10. “Summit’s applications” means all of Summit’s applications and documents and other materials in support in NDIC Case Nos. 30869, 30870, 30871, 30872; 30873, 30874, 30875, 30876; 30877, 30878, 30879, 30880.

11. “You,” “your,” or “yourself” refer to “SCS” or “Summit”, and its authorized agents.

## **INTERROGATORIES**

**INTERROGATORY NO. 1:** For any installed CO2 pressure relief devices or CO2 vent systems or other mechanical devices designed for relieving pressure from a pipe, at any of the surface facilities constructed for purposes of Summit’s applications, please provide the following:

- a. Rated capacity of each device or system;
- b. Quantity of each device or system;
- c. Discharge pipe size(s);
- d. Discharge pipe outlet(s) direction (vertical or horizontal); and
- e. If horizontal, state direction of discharge.

## **REQUESTS FOR PRODUCTION**

**REQUEST FOR PRODUCTION NO. 1:** Please produce any above-ground vapor dispersion modeling results such as from any engineered pressure relief systems, including all data and input files and load files. Without limiting the generality of the forgoing, specifically provide all data inputs for the following: weather conditions modeled, topography assumptions modeled, flow rate of CO<sub>2</sub> over time, total quantity of CO<sub>2</sub> released and total time of release modeled, and predicted CO<sub>2</sub> concentrations at any public receptors such as roads, buildings, and dwellings.

in Support of Motion to Compel

**BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA**

**CASE NOS. 30869–30880**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1,**

11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by

**nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of**

**carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the**

geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

**RESPONSE OF APPLICANTS TO INTERVENORS' LANDOWNERS' AMENDED INTERROGATORIES AND REQUEST FOR PRODUCTION OF DOCUMENTS (SET 1)**

Applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, "Summit"), by and through their counsel, Lawrence Bender, Fredrikson & Byron, P.A., 304 East Front Avenue, Suite 400, Bismarck, ND 58504-5639, respond to the Amended Interrogatories and Request for Production of Documents (Set 1) submitted by The Swenson Living Trust; Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk

and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith (collectively, “Landowners”) on May 31, 2024 in the above-captioned proceedings (each a “Discovery Request” and collectively, the “Discovery Requests”). Summit’s response is made without waiving or intending to waive any objection as to relevance, privilege, or admissibility of any information provided in response to the Discovery Requests in any subsequent proceeding of this or any other action on any ground. A partial answer to any Discovery Request that has been objected to, in whole or in part, is not intended to be a waiver of the objection. By responding to the Discovery Requests, Summit is not admitting that any aspect of the Discover Requests is factually accurate or relevant to this proceeding.

### **GLOBAL OBJECTIONS**

The following Global Objections apply to each of the Discovery Requests—even if not separately restated below in response to a particular Discovery Request.

Summit objects to all Discovery Requests to the extent they seek the discovery of documents which are privileged for the reasons that they (a) are subject to the attorney-client privilege; (b) are covered by the “work product” doctrine; and/or (c) were prepared in anticipation of litigation or for trial by or for Summit or its representatives, including its employees, consultants, or agents.

Summit objects to all Discovery Requests to the extent they are beyond the scope of discovery allowed pursuant to Rules 26, 33, 34, and 36 of the North Dakota Rules of Civil Procedure.

Summit objects to all Discovery Requests to the extent they seek identification or production of “all documents” of a particular description. It is impossible to guarantee that all such documents have been identified or located. Summit states, however, that in response to these

requests, it has made a diligent search of records kept in the ordinary course of business in those locations likely to contain relevant information.

Summit objects to the Landowners' definitions and instructions to the extent such definitions and instructions exceed or are inconsistent with the requirements imposed upon Summit under the North Dakota Rules of Civil Procedure or Chapter 28-32 of the North Dakota Century Code.

Summit objects to the Discovery Requests because they are unduly burdensome and disproportionate to the needs of this proceeding because they seek irrelevant information.

Summit objects inasmuch as the Discovery Requests seek information relating to anything other than Summit's sequestration facilities in North Dakota. Only Summit's North Dakota sequestration facilities are covered by its applications in this proceeding.

Summit objects inasmuch as the Discovery Requests seek information that contains proprietary or confidential business information or is subject to trade-secret protections or that contains information for which Summit owes a third party an obligation of confidentiality or privacy, whether contractual or under any federal or state laws or regulations.

Summit objects to all Discovery Requests that seek, and disclaims any obligation to identify or furnish, documents or information that the Landowners actually or constructively possesses or to which the Landowners have access through alternative means.

Summit objects inasmuch as the Discovery Requests seek information from third parties and information that is not within Summit's possession, custody, control, or personal knowledge of Summit.

Summit objects and responds to the Discovery Requests based upon information and documents available as of the date hereof and reserves the right to supplement and amend the responses.

Subject to the foregoing objections and conditions, and subject to the specific additional objections made with respect to each request, Summit responds to the Landowners' Discovery Requests as follows:

### **RESPONSE TO INTERROGATORIES**

#### **INTERROGATORY NO. 1:**

*Identify the petroleum engineers or reservoir engineers who made any material contribution to Summit's applications or the materials provided in support of Summit's applications in NDIC Case Nos. 30869-30880.*

#### **RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the North Dakota Industrial Commission ("Commission" or "NDIC") to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states the following individuals made material contributions in support of Summit's applications or the materials provided in support of Summit's applications in NDIC Case Nos 30869-30880:

Todd Jiang, Principal Reservoir Engineer  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Guangwei Ren, Senior Reservoir Engineer  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Chantsalmaa Dalhkaa, Principal Reservoir Engineer  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Nessa Mahmoud, Geochemist  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Tim Shenk, Senior Operations Specialist  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Agustinus Zandy, Principal Operations Specialist  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Michael Warmack, Distinguished Oil & Gas Facilities Engineer  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

**INTERROGATORY NO. 2:**

*Identify the geologists who made any material contribution to Summit's applications or the materials provided in support of Summit's applications in NDIC Case Nos. 30869-30880.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states the following individuals made material contributions in support of Summit's applications or the materials provided in support of Summit's applications in NDIC Case Nos 30869-30880:

Remington Leger, Principal Geoscientist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Amanda Livers-Douglas, Assistant Director for Integrated Subsurface Projects  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Sofiane Djezzar, Geoscientist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Kyle McBride, Geophysicist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

John Hunt, Senior Geoscientist & MRV Specialist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Arash Abarghani, Senior Research Scientist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Caitlin Olsen, Principal Policy and Regulatory Specialist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Kevin Connors, Assistant Director for Regulatory Compliance and Energy Policy  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Kyle Glazewski, Assistant Director for Research, Community Benefits & Stakeholder Engagement  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Josh Regorrah, Permitting & Regulatory Specialist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Steve Smith, Assistant Director for Integrated Analytical Solutions  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Bret Fossum, Principal Research Engineer  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Core Laboratories Petro Services  
2550 W 2nd Ave Unit 110  
Denver, CO 80219

Wagner Petrographic  
122 North 1800 West, #7  
Lindon, UT 84042

**INTERROGATORY NO. 3:**

*List any other individuals not listed in Interrogatories 1 and 2 who made any material contribution to Summit's applications or the materials provided in support of Summit's applications in NDIC Case Nos. 30869-30880. Identify each and every person whom you expect to call or may call as a witness at trial.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states, with respect to the first question, that the following individuals made material contributions in support of Summit's applications or the materials provided in support of Summit's applications in the NDIC Case Nos 30869-30880:

Lonny Jacobson, Assistant Director for Subsurface Field Operations  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Wade Boeshans, Executive Vice President  
Summit Carbon Solutions  
3442 E. Century Ave.  
Bismarck, ND 58503

Jay Volk, Ph.D., Sequestration – Director of Health, Safety & Environmental  
Summit Carbon Solutions  
3442 E. Century Ave.  
Bismarck, ND 58503

Jeffrey L. Skaare, J.D., C.P.L., Sequestration – Director of Land Legal & Regulatory Affairs

Summit Carbon Solutions  
3442 E. Century Ave.  
Bismarck, ND 58503

Luis Piasco, Senior Project Manager Sequestration Drilling and Engineering

Summit Carbon Solutions  
3442 E. Century Ave.  
Bismarck, ND 58503

Jean Oddy, Sequestration Project Engineer

Summit Carbon Solutions  
3442 E. Century Ave.  
Bismarck, ND 58503

Jamey Backus, Project Manager – Sequestration Facilities

Summit Carbon Solutions  
3442 E. Century Ave.  
Bismarck, ND 58503

With respect to the second question, the individuals listed in response to Interrogatory No. 4, below, testified at the hearing on the above-captioned cases.

**INTERROGATORY NO. 4:**

*Identify all witnesses Summit plans to testify in support of Summit's applications in NDIC Case Nos. 30869-30880.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any.

Subject to and notwithstanding the objections, Summit states that the following individuals testified at the hearing in support of Summit's applications:

Wade Boeshans  
Jeffrey L. Skaare  
Amanda Livers-Douglas  
Caitlin Olsen  
John Hunt  
Jean Oddy  
James Powell  
Jay Volk  
Jamey Backus

**INTERROGATORY NO. 5:**

*Identify all exhibits Summit plans to offer in support of Summit's applications in NDIC Case Nos. 30869-30880.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that an exhibit list setting forth all exhibits offered by Summit and admitted at the hearing on the above-captioned cases was provided to the Landowners at the hearing.

**RESPONSE TO REQUESTS FOR PRODUCTION**

**REQUEST NO. 1:**

*Please produce the underlying data and electronic files necessary to run the model used to create the images of the pressure differentials contained in Figures 3-14(a-d) in Summit's application in NDIC Case No. 30869.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that all the underlying data and electronic files utilized to run the models has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 2:**

*Please produce all the input files, field and analytical data, and the model geochemical database used to evaluate the CO2 effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's Phreeqc geochemical model.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit

further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 3:**

*Please produce all the input files, field and analytical data, and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 4:**

*Please produce all the input files, field and analytical data, and the model geochemical database used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 5:**

*Please produce the following data and files as referenced by Summit in its application in NDIC Case No. 30873: Geophysical Logs that penetrate injection and confining zones, Seismic survey data and core sample measurements, Acoustic impedance, total porosity, effective porosity, permeability, facies, and SLB's Petrel was used to interpolate structural surfaces for zones.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 6:**

*Please produce all the input files, field and analytical data, and the model geochemical database used to evaluate the CO2 effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 7:**

*Please produce all data from any parameter referenced or described in Table 2-1: Model Parameters for Multiphase Fluid Modeling of Geologic Sequestration as that table appears in EPA Guidance - AOR Evaluation and Corrective Action Guidance (Guidance page 11) as found here: AOR Evaluation and Corrective Action Guidance - <https://www.epa.gov/sites/default/files/2015-07/documents/epa816r13005.pdf>.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence

for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 8:**

*Please produce all electronic files and data provided to the North Dakota Industrial Commission or its Department of Mineral Resources or Oil and Gas Division in association with or related to the applications in NDIC Case Nos. 30869-30880.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 9:**

*Please produce all 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format. The purpose of this request is to obtain the*

*simulation model of the proposed storage facilities and associated reservoir, along with input and output files in Summit's possession for this simulation model.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 10:**

*Please produce structure maps of the injection zone top, structure maps for major sub zones, and/or structure maps of confining zones for the Storage Reservoir and the confining zones as defined therein. Such maps include those created based upon formation tops from well logs, 3D seismic reflectors, and interpretation of geologic deposition environment to give a representation of the elevation change across the target reservoir.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has

been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 11:**

*Please produce all gross and net thickness isopach maps for the Storage Reservoir.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that, to the best of its knowledge, net thickness isopach maps have not been created and that gross thickness isopach maps have been submitted to the Commission and are publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the gross thickness isopach maps.

**REQUEST NO. 12:**

*Please produce pore volume (PV) maps and hydrocarbon pore volume (HCPV) maps of the Storage Reservoir, regardless of when compiled and regardless of whether created by Summit.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any.

Subject to and notwithstanding the objections, Summit states that, to the best of its knowledge, this information has not been created.

**REQUEST NO. 13:**

*Please produce all well logs (raw data plus processed and interpreted copies) from anywhere in or near the Storage Reservoir. Specially please produce the well logs in .las or other digital format, including any and all well logs utilized by Summit in developing its applications herein.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 14:**

*Please produce any databases, spreadsheets, or other documents containing porosity, permeability, saturation, and other rock properties such as (minerology, geomechanical properties etc) for the Storage Reservoir in original electronic format and, if available, in Excel spreadsheet format.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 15:**

*Please produce water chemistry and any other liquid or solid sampling data for water or other substances in the Storage Reservoir. Please include any gas solubility testing that was performed on the water samples for CO2 or injected gas stream.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 16:**

*Please produce all spreadsheets, databases, and other documents or compilations containing reservoir pressure data for the Storage Reservoir, including but not limited to all bottom hole pressure data, surface pressure data, and fluid level measurements. If a spreadsheet is not available, then please produce all Documents containing this information.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 17:**

*Please produce all relative permeability data for the Storage Reservoir, including core test information. If multiple cores have been tested, please produce all test data.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit

further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 18:**

*Please produce all capillary pressure data for all cores tested in the Storage Reservoir.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 19:**

*Please produce all routine core analysis data for the Storage Reservoir.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission (Core Library) and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open

records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 20:**

*Please produce all spreadsheets of reservoir temperature data in the Storage Reservoir, including spreadsheets indexing reservoir temperature data to well name and API number. If this information is not available in spreadsheet format, then please produce all Documents containing this information.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 21:**

*Please produce all written interpretations of micro-seismic data obtained from the Storage Reservoir.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence

for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states they have not created any micro seismic data and thus have not produced any written interpretations thereof.

**AS TO OBJECTIONS TO THE  
AMENDED INTERROGATORIES  
AND REQUEST FOR PRODUCTION  
OF DOCUMENTS (SET 1) FROM  
INTERVENOR LANDOWNERS:**

North Dakota Industrial Commission  
Oil and Gas Division  
Case Nos. 30869-30880

Exhibit H to Declaration of Derrick Braaten  
in Support of Motion to Compel

**BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA**

**CASE NOS. 30869-30880**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1,**

11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by

nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.

In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of

**carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the**

geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

**RESPONSE OF APPLICANTS TO INTERVENORS' LANDOWNERS' AMENDED INTERROGATORIES AND REQUEST FOR PRODUCTION OF DOCUMENTS (SET 2)**

Applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, "Summit"), by and through their counsel, Lawrence Bender, Fredrikson & Byron, P.A., 304 East Front Avenue, Suite 400, Bismarck, ND 58504-5639, respond to the Amended Interrogatories and Request for Production of Documents (Set 2) submitted by The Swenson Living Trust; Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk

and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith (collectively, “Landowners”) on May 31, 2024 in the above-captioned proceedings (each a “Discovery Request” and collectively, the “Discovery Requests”). Summit’s response is made without waiving or intending to waive any objection as to relevance, privilege, or admissibility of any information provided in response to the Discovery Requests in any subsequent proceeding of this or any other action on any ground. A partial answer to any Discovery Request that has been objected to, in whole or in part, is not intended to be a waiver of the objection. By responding to the Discovery Requests, Summit is not admitting that any aspect of the Discover Requests is factually accurate or relevant to this proceeding.

### **GLOBAL OBJECTIONS**

The following Global Objections apply to each of the Discovery Requests—even if not separately restated below in response to a particular Discovery Request.

Summit objects to all Discovery Requests to the extent they seek the discovery of documents which are privileged for the reasons that they (a) are subject to the attorney-client privilege; (b) are covered by the “work product” doctrine; and/or (c) were prepared in anticipation of litigation or for trial by or for Summit or its representatives, including its employees, consultants, or agents.

Summit objects to all Discovery Requests to the extent they are beyond the scope of discovery allowed pursuant to Rules 26, 33, 34, and 36 of the North Dakota Rules of Civil Procedure.

Summit objects to all Discovery Requests to the extent they seek identification or production of “all documents” of a particular description. It is impossible to guarantee that all such documents have been identified or located. Summit states, however, that in response to these

requests, it has made a diligent search of records kept in the ordinary course of business in those locations likely to contain relevant information.

Summit objects to the Landowners' definitions and instructions to the extent such definitions and instructions exceed or are inconsistent with the requirements imposed upon Summit under the North Dakota Rules of Civil Procedure or Chapter 28-32 of the North Dakota Century Code.

Summit objects to the Discovery Requests because they are unduly burdensome and disproportionate to the needs of this proceeding because they seek irrelevant information.

Summit objects inasmuch as the Discovery Requests seek information relating to anything other than Summit's sequestration facilities in North Dakota. Only Summit's North Dakota sequestration facilities are covered by its applications in this proceeding.

Summit objects inasmuch as the Discovery Requests seek information that contains proprietary or confidential business information or is subject to trade-secret protections or that contains information for which Summit owes a third party an obligation of confidentiality or privacy, whether contractual or under any federal or state laws or regulations.

Summit objects to all Discovery Requests that seek, and disclaims any obligation to identify or furnish, documents or information that the Landowners actually or constructively possesses or to which the Landowners have access through alternative means.

Summit objects inasmuch as the Discovery Requests seek information from third parties and information that is not within Summit's possession, custody, control, or personal knowledge of Summit.

Summit objects and responds to the Discovery Requests based upon information and documents available as of the date hereof and reserves the right to supplement and amend the responses.

Subject to the foregoing objections and conditions, and subject to the specific additional objections made with respect to each request, Summit responds to the Landowners' Discovery Requests as follows:

### **RESPONSE TO INTERROGATORIES**

#### **INTERROGATORY NO. 1:**

*Identify all software programs necessary to open or run or execute any electronic files that are themselves responsive to or which contain data and information responsive to any of Landowners written interrogatories or requests for production of documents. Please exclude from your answer any software programs needed to open files with the following extensions: .doc, .docx, .pdf, .xlsx, .csv, .eml, .msg, as well as common audio-visual file types that can be opened with freely-available software such as .jpg/.jpeg, .tiff, and .mp4 files.*

#### **RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the following software programs may be necessary to open, run, or execute the specified electronic files: Petrel Geoscience Core, Petrel Well Correlation, Ikon/RokDoc, GEM MAX, Builder, Results, CMOST, Kappa, S&P

Global/Kingdom, Techlog Base, Pore Pressure Prediction, Wellbore Stability, Quanti.Elan, Quanti, Techlog Python, TechData Plus, TechStat, Wellbore Imaging.

**INTERROGATORY NO. 2:**

*State whether Summit possesses documents related to any exchange of valuable consideration (including but not limited to monetary compensation even if nominal) for the right to use or damage the pore space of a property.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it has used a pore space lease for the right to utilize pore space and that such document provides for valuable consideration in exchange for such right.

**INTERROGATORY NO. 3:**

*Describe how Summit determined the amounts it paid to property owners for use of or damage to their pore space for its activities related to Summit's applications.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any.

Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases.

**INTERROGATORY NO. 4:**

*State the amounts that Summit has paid to property owners for use of or damage to pore space for injections of CO<sub>2</sub>.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases.

**INTERROGATORY NO. 5:**

*State how Summit determines if a property owner has been “equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14), and what criteria it uses to make this determination.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases.

**INTERROGATORY NO. 6:**

Identify the factual basis in Summit's applications or the materials submitted in support of Summit's applications that might support or that Summit will use to support a finding that property owners have been "equitably compensated" as that phrase is used in N.D.C.C. § 38-22-08(14).

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases.

**INTERROGATORY NO. 7:**

*Identify the factual basis in any documents or information sources other than Summit's applications that might support or that Summit will use to support a finding that property owners have been "equitably compensated" as that phrase is used in N.D.C.C. § 38-22-08(14).*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases.

**INTERROGATORY NO. 8:**

*Identify the sections of Summit's applications that support a finding that "[t]hat the proposed storage facility will not adversely affect surface waters or formations containing fresh water" as is stated at N.D.C.C. § 38-22-08(7). If Summit claims that any documents or information outside of Summit's applications support such a finding, identify those documents and information.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases and that most sections of Summit's applications relate to the secure storage of CO<sub>2</sub> in the Broom Creek Formation and the protection of underground sources of drinking water.

**INTERROGATORY NO. 9:**

*Identify the source of any carbon dioxide that will be injected pursuant to Summit's applications that is created or produced or originates in North Dakota.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive

to this Discovery Request at the hearing on the above-captioned cases, i.e., the Tharaldson Ethanol Plant is currently the only contracted source of carbon dioxide originating in North Dakota.

**RESPONSE TO REQUESTS FOR PRODUCTION**

**REQUEST NO. 1:**

*Please produce all agreements for use of or damage to the pore space of any property that are in your possession.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that a copy of the pore space lease is attached as Exhibit D to the Storage Facility Agreement submitted as part of its applications in the above-captioned cases.

**REQUEST NO. 2:**

*Without limiting the generality of Request No. 1, please produce all agreements that might support or that Summit will use to support a finding "[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space" as required by N.D.C.C. § 38-22-08(5).*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence

for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided documents and testimony responsive to this Discovery Request at the hearing on the above-captioned cases, i.e., Summit Exhibits 5A, 5B and 5C.

**REQUEST NO. 3:**

*Without limiting the generality of Request No. 1, produce all agreements that might support or that Summit will use to support a finding that "all nonconsenting pore space owners are or will be equitably compensated" as stated in N.D.C.C. § 38-22-08(14).*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided documents and testimony responsive to this Discovery Request at the hearing on the above-captioned cases, i.e., the Storage Agreement and pore space lease.

**REQUEST NO. 4:**

*Please produce all documents containing data or information indicating or indicative of market values for any rights associated with the use of or damage to a property's pore space.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence

for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided documents and testimony responsive to this Discovery Request at the hearing on the above-captioned cases, i.e., the compensation paid under the pore pace lease and negotiations with hundreds of pore space owners.

**REQUEST NO. 5:**

*Without limiting the generality of the foregoing requests, please produce all agreements for use of or damage to any surface estate necessary for Summit to complete construction of the facilities described in Summit's applications, including but not limited to its injections wells (but for clarification not those agreements necessary for the interstate transmission line subject to siting proceedings before the ND Public Service Commission).*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided documents and testimony responsive to this Discovery Request at the hearing on the above-captioned cases, i.e., the pore pace lease.

**REQUEST NO. 6:**

*Please produce all correspondence related to Summit's applications between Summit and the North Dakota Industrial Commission and its Department of Mineral Resources and its Oil and Gas Division (collectively "NDIC") and any authorized agents of the NDIC, and all*

*correspondence between your authorized agents and the NDIC (including any individuals copied on or submitting Summit's applications) related to Summit's applications.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit also objects to this Discovery Request because it is overly broad in that it requests "all correspondence" and because the Discovery Request is unduly burdensome at this late stage in the proceedings. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information is on file with the Commission and is publicly available via an open records request.

Case Nos. 30869-30880

Exhibit I to Declaration of Derrick Braaten  
in Support of Motion to Compel

**BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA**

**CASE NOS. 30869-30880**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1,**

11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by

**nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of**

**carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the**

geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

**RESPONSE OF APPLICANTS TO INTERVENOR LANDOWNERS' AMENDED INTERROGATORIES AND REQUEST FOR PRODUCTION OF DOCUMENTS (SET 3)**

Applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, "Summit"), by and through their counsel, Lawrence Bender, Fredrikson & Byron, P.A., 304 East Front Avenue, Suite 400, Bismarck, ND 58504-5639, respond to the Amended Interrogatories and Request for Production of Documents (Set 3) submitted by The Swenson Living Trust; Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk

and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith (collectively, “Landowners”) on May 31, 2024 in the above-captioned proceedings (each a “Discovery Request” and collectively, the “Discovery Requests”). Summit’s response is made without waiving or intending to waive any objection as to relevance, privilege, or admissibility of any information provided in response to the Discovery Requests in any subsequent proceeding of this or any other action on any ground. A partial answer to any Discovery Request that has been objected to, in whole or in part, is not intended to be a waiver of the objection. By responding to the Discovery Requests, Summit is not admitting that any aspect of the Discover Requests is factually accurate or relevant to this proceeding.

### **GLOBAL OBJECTIONS**

The following Global Objections apply to each of the Discovery Requests—even if not separately restated below in response to a particular Discovery Request.

Summit objects to all Discovery Requests to the extent they seek the discovery of documents which are privileged for the reasons that they (a) are subject to the attorney-client privilege; (b) are covered by the “work product” doctrine; and/or (c) were prepared in anticipation of litigation or for trial by or for Summit or its representatives, including its employees, consultants, or agents.

Summit objects to all Discovery Requests to the extent they are beyond the scope of discovery allowed pursuant to Rules 26, 33, 34, and 36 of the North Dakota Rules of Civil Procedure.

Summit objects to all Discovery Requests to the extent they seek identification or production of “all documents” of a particular description. It is impossible to guarantee that all such documents have been identified or located. Summit states, however, that in response to these

requests, it has made a diligent search of records kept in the ordinary course of business in those locations likely to contain relevant information.

Summit objects to the Landowners' definitions and instructions to the extent such definitions and instructions exceed or are inconsistent with the requirements imposed upon Summit under the North Dakota Rules of Civil Procedure or Chapter 28-32 of the North Dakota Century Code.

Summit objects to the Discovery Requests because they are unduly burdensome and disproportionate to the needs of this proceeding because they seek irrelevant information.

Summit objects inasmuch as the Discovery Requests seek information relating to anything other than Summit's sequestration facilities in North Dakota. Only Summit's North Dakota sequestration facilities are covered by its applications in this proceeding.

Summit objects inasmuch as the Discovery Requests seek information that contains proprietary or confidential business information or is subject to trade-secret protections or that contains information for which Summit owes a third party an obligation of confidentiality or privacy, whether contractual or under any federal or state laws or regulations.

Summit objects to all Discovery Requests that seek, and disclaims any obligation to identify or furnish, documents or information that the Landowners actually or constructively possesses or to which the Landowners have access through alternative means.

Summit objects inasmuch as the Discovery Requests seek information from third parties and information that is not within Summit's possession, custody, control, or personal knowledge of Summit.

Summit objects and responds to the Discovery Requests based upon information and documents available as of the date hereof and reserves the right to supplement and amend the responses.

Subject to the foregoing objections and conditions, and subject to the specific additional objections made with respect to each request, Summit responds to the Landowners' Discovery Requests as follows:

### **RESPONSE TO INTERROGATORIES**

#### **INTERROGATORY NO. 1:**

*For any installed CO2 pressure relief devices or CO2 vent systems or other mechanical devices designed for relieving pressure from a pipe, at any of the surface facilities constructed for purposes of Summit's applications, please provide the following:*

- a. Rated capacity of each device or system;*
- b. Quantity of each device or system;*
- c. Discharge pipe size(s);*
- d. Discharge pipe outlet(s) direction (vertical or horizontal); and*
- e. If horizontal, state the direction of discharge.*

#### **RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases.

## **RESPONSE TO REQUESTS FOR PRODUCTION**

### **REQUEST FOR PRODUCTION NO. 1:**

*Please produce any above-ground vapor dispersion modeling results such as from any engineered pressure relief systems, including all data and input files and load files. Without limiting the generality of the forgoing, specifically provide all data inputs for the following: weather conditions modeled, topography assumptions modeled, flow rate of CO2 over time, total quantity of CO2 released and total time of release modeled, and predicted CO2 concentrations at any public receptors such as roads, buildings, and dwellings.*

### **RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit also objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Summit further objects to this Discovery Request because it seeks confidential information that has been deemed a “security system plan” exempt for open record requests pursuant to N.D.C.C. § 44-04-24 and subject to a protective order issued by the North Dakota Public Service Commission. *See* Docket No. 364, Case No. PU-22-391.

**AS TO OBJECTIONS TO THE  
AMENDED INTERROGATORIES  
AND REQUEST FOR PRODUCTION  
OF DOCUMENTS (SET 3) FROM  
INTERVENOR LANDOWNERS:**

Dated this 1st day of July, 2024.

Oil and Gas Division  
Case Nos. 30869-30880

Exhibit J to Declaration of Derrick Braaten  
in Support of Motion to Compel

## NORTH DAKOTA

## OIL AND GAS DIVISION

In re application of Summit : Case No(s). 30869  
 Carbon Storage #1, LLC requesting : 30870  
 consideration for the geologic : 30871  
 storage of carbon dioxide in the : 30872  
 Broom Creek Formation from the : 30873  
 Midwest Carbon Express Pipeline in: 30874  
 the storage facility located in : 30875  
 Sections 31, 32, 33, and 34, : 30876  
 Township 142 North, Range 87 West,: 30877  
 Sections 1, 11, 12, 13, 14, 15, : 30878  
 22, 23, 24, 25, 26, 35, and 36, : 30879  
 Township 141 North, Range 88 West,: 30880  
 Sections 2, 3, 4, 5, 6, 7, 8, 9, :  
 10, 11, 14, 15, 16, 17, 18, 19, :  
 20, 21, 22, 23, 25, 26, 27, 28, :  
 29, 30, 31, 32, 33, 34, and 35, :  
 Township 141 North, Range 87 West,:  
 Sections 1, 2, 3, and 12, Township:  
 140 North, Range 88 West and :  
 Sections 4, 5, 6, and 7, Township :  
 140 North, Range 87 West, Mercer, :  
 Morton, and Oliver Counties, ND. :

In re application of Summit :  
 Carbon Storage #1, LLC to :  
 consider the amalgamation of the :  
 storage reservoir pore space, in :  
 which the Commission may require :  
 that the pore space owned by :  
 nonconsenting owners be included :  
 in the geologic storage, as :  
 required to operate the Summit :  
 Carbon Storage #1, LLC storage :  
 facility located in Sections 31, :  
 32, 33, and 34, Township 142 :  
 North, Range 87 West, Sections 1, :  
 11, 12, 13, 14, 15, 22, 23, 24, :  
 25, 26, 35, and 36, Township 141 :  
 North, Range 88 West, Sections 2, :  
 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, :

 Sections 1, 2, 3, 4, 5, 6, 7, 8, :  
 9, 10, 11, 12, 13, 14, 15, 16, 17, :  
 18, 19, 20, 21, 22, 23, 24, 25, :  
 26, 27, 28, 29, 30, 32, 33, 34, :  
 35, and 36, Township 142 North, :  
 Range 88 West, Sections 5, 6, 7, :  
 8, 17, 18, 19, 20, 29, 30, 31, :  
 Township 142 North, Range 87 :  
 West, and Sections 1, 2, and 3, :  
 Township 141 North, Range 88 :  
 West, Mercer and Oliver Counties, :  
 ND in the Broom Creek Formation. :

In re application of Summit :  
 Carbon Storage #2, LLC to :  
 consider the application of Summit :  
 Carbon Storage #2, LLC for an :  
 order of the Commission :  
 determining the amount of :  
 financial responsibility for the :  
 geologic storage of carbon dioxide :  
 from the Midwest Carbon Express :  
 Pipeline in the storage facility :  
 located in Sections 27, 28, 29, :  
 32, 33, 34, and 35, Township 143 :  
 North, Range 88 West, Sections 1, :  
 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, :  
 12, 13, 14, 15, 16, 17, 18, 19, :  
 20, 21, 22, 23, 24, 25, 26, 27, :  
 28, 29, 30, 32, 33, 34, 35, and :  
 36, Township 142 North, Range 88 :  
 West, Sections 5, 6, 7, 8, 17, 18, :  
 19, 20, 29, 30, and 31, Township :  
 142 North, Range 87 West, and :  
 Sections 1, 2, and 3, Township 141 :  
 North, Range 88 West, Mercer and :  
 Oliver Counties, ND, in the Broom :  
 Creek Formation. :

In re motion of the Commission to :  
 consider establishing the field :  
 and pool limits for lands located :  
 in Sections 27, 28, 29, 32, 33, :  
 34, and 35, Township 143 North, :  
 Range 88 West, Sections 1, 2, 3, :  
 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, :

14, 15, 16, 17, 18, 19, 20, 21, :  
 22, 23, 24, 25, 26, 27, 28, 29, :  
 30, 32, 33, 34, 35, and 36, :  
 Township 142 North, Range 88 West, :  
 Sections 5, 6, 7, 8, 17, 18, 19, :  
 20, 29, 30, and 31, Township 142 :  
 North, Range 87 West, and Sections :  
 1, 2, and 3, Township 141 North, :  
 Range 88 West, Mercer and Oliver :  
 Counties, ND, subject to the :  
 application of Summit Carbon :  
 Storage #2, LLC for the geologic :  
 storage of carbon dioxide in the :  
 Broom Creek Formation, and enact :  
 such special field rules as may :  
 be necessary. :

In re application of Summit :  
 Carbon Storage #3, LLC requesting :  
 consideration for the geologic :  
 storage of carbon dioxide in the :  
 Broom Creek Formation from the :  
 Midwest Carbon Express Pipeline in :  
 the storage facility located in :  
 Section 36, Township 143 North, :  
 Range 87 West, Sections 19, 20, :  
 21, 28, 29, 30, 31, 32, 33, 34, :  
 35, and 36, Township 143 North, :  
 Range 86 West, Sections 1, 2, 11, :  
 12, 13, 14, and 24, Township 142 :  
 North, Range 87 West, Sections 1, :  
 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, :  
 12, 13, 14, 15, 16, 17, 18, 19, :  
 20, 21, 22, 23, 24, 25, 26, 27, :  
 28, 29, 30, 32, 33, 34, and 35, :  
 Township 142 North, Range 86 :  
 West, and Sections 6, 7, 17, 18, :  
 19, and 20, Township 142 North, :  
 Range 85 West, Oliver County, ND. :

In re application of Summit :  
 Carbon Storage #3, LLC to consider :  
 the amalgamation of the storage :  
 reservoir space, in which the :  
 Commission may require that the :  
 pore space owned by nonconsenting :  
 owners be included in the geologic :

storage, as required to operate :  
 the Summit Carbon Storage #3, LLC :  
 storage facility located in :  
 Section 36, Township 143 North, :  
 Range 87 West, Sections 19, 20, :  
 21, 28, 29, 30, 31, 32, 33, 34, :  
 35, and 36, Township 143 North, :  
 Range 86 West, Sections 1, 2, 11, :  
 12, 13, 14, and 24, Township 142 :  
 North, Range 87 West, Sections 1, :  
 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, :  
 12, 13, 14, 15, 16, 17, 18, 19, :  
 20, 21, 22, 23, 24, 25, 26, 27, :  
 28, 29, 30, 32, 33, 34, and 35, :  
 Township 142 North, Range 86 West, :  
 and Sections 6, 7, 17, 18, 19, and :  
 20, Township 142 North, Range 85 :  
 West, Oliver County, ND, in the :  
 Broom Creek Formation. :

In re application of Summit :  
 Carbon Storage #3, LLC for an :  
 order of the Commission :  
 determining the amount of :  
 financial responsibility for the :  
 geologic storage of carbon dioxide :  
 from the Midwest Carbon Express :  
 Pipeline in the storage facility :  
 located in Section 36, Township :  
 143 North, Range 87 West, Sections :  
 19, 20, 21, 28, 29, 30, 31, 32, :  
 33, 34, 35, and 36, Township 143 :  
 North, Range 86 West, Sections 1, :  
 2, 11, 12, 13, 14, and 24, :  
 Township 142 North, Range 87 West, :  
 Sections 1, 2, 3, 4, 5, 6, 7, 8, :  
 9, 10, 11, 12, 13, 14, 15, 16, 17, :  
 18, 19, 20, 21, 22, 23, 24, 25, :  
 26, 27, 28, 29, 30, 32, 33, 34, :  
 and 35, Township 142 North, Range :  
 86 West, and Sections 6, 7, 17, :  
 18, 19, and 20, Township 142 :  
 North, Range 85 West, Oliver :  
 County, ND, in the Broom Creek :  
 Formation. :

In re motion of the Commission to :  
consider establishing the field :  
and pool limits for lands located :  
in Section 36, Township 143 North, :  
Range 87 West, Sections 19, 20, :  
21, 28, 29, 30, 31, 32, 33, 34, :  
35, and 36, Township 143 North, :  
Range 86 West, Sections 1, 2, 11, :  
12, 13, 14, and 24, Township 142 :  
North, Range 87 West, Sections 1, :  
2, 3, 4, 5, 6, 7, 8, 9, 10, 11, :  
12, 13, 14, 15, 16, 17, 18, 19, :  
20, 21, 22, 23, 24, 25, 26, 27, :  
28, 29, 30, 32, 33, 34, and 35, :  
Township 142 North, Range 86 West, :  
and Sections 6, 7, 17, 18, 19, and :  
20, Township 142 North, Range 85 :  
West, Oliver County, ND, subject :  
to the application of Summit :  
Carbon Storage #3, LLC for the :  
geologic storage of carbon dioxide :  
in the Broom Creek Formation, and :  
enact such special field rules as :  
may be necessary. :

TRANSCRIPT OF HEARING

VOLUME II - (Pages 277 - 552)

Taken At  
1000 East Calgary Avenue  
Bismarck, North Dakota  
June 12, 2024

BEFORE DAVID P. GARNER  
-- HEARING EXAMINER --

1 (The following proceedings were had and  
2 made of record herein, commencing at 9:06 a.m.,  
3 Wednesday, the 12th day of June, 2024:)  
4 HEARING EXAMINER GARNER: We are on the  
5 record for hearings in the matters listed in the  
6 North Dakota Industrial Commission Hearing Docket  
7 for June 12. I'm David Garner, hearing examiner  
8 for these hearings. We're at the hearing room for  
9 the Department of Mineral Resources, Oil & Gas  
10 Division, and it is 9:08 a.m.  
11 We will resume our hearings for Case  
12 Numbers 30869 through 30880. I notice new counsel  
13 appeared at the table, so I'll give everyone an  
14 opportunity for all interested parties to please  
15 come forward again.  
16 MR. BENDER: Thank you, Mr. Examiner.  
17 I'll introduce Tom. He doesn't need any  
18 introduction, but with us today is Tom Throne.  
19 He's going to be assisting with Summit in this  
20 application.  
21 HEARING EXAMINER GARNER: Okay.  
22 MR. BRAATEN: Derrick Braaten, Braaten Law  
23 Firm, on behalf of the landowner intervenors. With  
24 me is my paralegal, Desirae Zaste, and client Kirk  
25 Swenson.

290

1 MR. BENDER: I apologize. I thought you  
2 were just looking for an introduction of the new  
3 counsel.  
4 HEARING EXAMINER GARNER: No, that's --  
5 MR. BENDER: Did you want me to make  
6 another appearance or --  
7 HEARING EXAMINER GARNER: No. That's  
8 fine.  
9 MR. BENDER: Okay.  
10 HEARING EXAMINER GARNER: That's fine.  
11 Just a quick note. We're going to resume with the  
12 cross-examination of the two witnesses that were  
13 being crossed by Mr. Braaten yesterday. Change,  
14 though. We're going to then at that point in time  
15 allow Summit to call its remaining witnesses, give  
16 the Commission a chance to respond to them -- or  
17 question them. And then you'll have the remainder  
18 of the time to cross-examine those witnesses.  
19 MR. BRAATEN: Okay. And, Your Honor, I  
20 don't want to be difficult or take up time. I just  
21 want to put on the record that I do object to that  
22 process.  
23 HEARING EXAMINER GARNER: Okay.  
24 MR. HELMS: 6:30.  
25 HEARING EXAMINER GARNER: Oh, I'm sorry.

291

1 And we're going to have a deadline today again of  
2 6:30 p.m., and if we are not done, we will be back  
3 here tomorrow morning at 9 a.m.  
4 Okay. With that, I think we can proceed.  
5 MR. HELMS: They're still under oath.  
6 HEARING EXAMINER GARNER: They're still  
7 under oath.  
8 **CONTINUED CROSS-EXAMINATION**  
9 **BY MR. BRAATEN:**  
10 Q. I wasn't going to ask this, but since it  
11 came up, do you understand that you're still under  
12 oath?  
13 A. (BY MS. DOUGLAS) I do.  
14 Q. Okay. We were discussing the CO<sub>2</sub> plume  
15 model yesterday, and I want to start by just asking  
16 if you have an understanding within the regulatory  
17 framework for Class 6 wells why a plume model is  
18 constructed?  
19 A. I do.  
20 Q. And what is that understanding?  
21 A. So under the North Dakota UIC Class VI  
22 regulations, a geologic model is constructed to  
23 help define the horizontal and vertical boundaries  
24 of a storage reservoir.  
25 Q. For what purpose or reason?

292

1 A. The purpose of this is to define the  
2 boundaries of the storage reservoir, in this case  
3 which would be the storage facility, which the  
4 regulations require pore space owners within that  
5 storage facility to be equitably compensated.  
6 Also, the modeling and simulation, it's constructed  
7 to help delineate the area of review, which is also  
8 a requirement of the statutes to delineate the area  
9 of review.  
10 Q. And the delineation of the area of review  
11 is also the primary requirement or reason for  
12 creating that model under the Safe Drinking Water  
13 Act?  
14 A. So we're talking about two sets of  
15 regulations here. So in -- in North Dakota UIC  
16 Class VI regulations, as I mentioned, the modeling  
17 is a tool to determine the AOR in the storage  
18 facility area. The Safe Water Drinking Act, under  
19 that, I believe, the EOA has its own set of UIC  
20 Class VI rules, which the North Dakota UIC Class VI  
21 rules are based on and are more stringent than. In  
22 the EPA rules, it is my understanding that modeling  
23 and simulation is used to define an area of review  
24 as well.  
25 Q. Is North Dakota's underground injection

293

1 control program regulation for Class VI wells  
 2 adopted pursuant to the Safe Drinking Water Act?  
 3 **A.** It is, and it is more stringent in terms  
 4 that it goes above and beyond and also has  
 5 stipulations for a storage facility area, pore  
 6 space leasing, which the EPA UIC Class VI rules do  
 7 not.  
 8 **Q.** And when the EPA promulgated its Class VI  
 9 rules, the methodologies it used for delineating --  
 10 delineating an area of review were focused on the  
 11 purpose and function of protecting USDWs; right?  
 12 **A.** That's correct, and North Dakota  
 13 Administrative Code is as well. So they define the  
 14 area of review as the region surrounding the  
 15 geologic sequestration project where underground  
 16 sources of drinking water may be endangered by the  
 17 CO<sub>2</sub> injection activities.  
 18 **Q.** And so you're modeling the areal extent of  
 19 the CO<sub>2</sub> plume because the regulations require you to  
 20 do that in order to protect drinking water sources?  
 21 **A.** Modeling the simulation is required to  
 22 evaluate potential impact and endangerment on any  
 23 underground sources of drinking water in which  
 24 you're required to define an area of review where  
 25 you're required to monitor and ensure that you're

294

1 not endangering any underground sources of drinking  
 2 water.  
 3 **Q.** You've noticed -- you've noted a couple of  
 4 times that North Dakota's regulations are more  
 5 stringent than the EPA regulations. That's because  
 6 the EPA regulations require that any state being  
 7 granted primacy have a set of regulations that are  
 8 more stringent than EPA's?  
 9 **A.** I'm not familiar with the specific  
 10 requirements. I know that they can't be any  
 11 lesser.  
 12 **Q.** Okay. I've handed you what has been  
 13 marked as Exhibit LO-83. Can you tell me if you've  
 14 seen that document before?  
 15 **A.** I personally have not.  
 16 **Q.** And when you say "I personally have not,"  
 17 are you aware of others who have that you're  
 18 thinking of?  
 19 **A.** Not specifically, no.  
 20 **Q.** If you look at the bullet points in the  
 21 middle, you'll notice a number of descriptions of  
 22 various data and input files. Is there anything in  
 23 those bullet points that you can identify that was  
 24 not provided to the Industrial Commission by EERC?  
 25 **A.** Upon request from the Commission, the EERC

295

1 had provided the DMR with the .DAT file, which is  
 2 our simulation model input file for CMG, as well as  
 3 our results file in the form of a .SR3, as well as  
 4 shapefiles for the maps that were generated.  
 5 Outside of those data sets, we did not provide any  
 6 additional data to the DMR.  
 7 **Q.** You said for the maps that were provided  
 8 outside of the data. What maps are you referring  
 9 to?  
 10 **A.** The maps in the storage facility area. So  
 11 we provided shapefiles for the storage facility  
 12 boundary, the area of review boundary and such.  
 13 **Q.** Okay. And you're saying you provided the  
 14 shapefiles but not necessarily the particular maps  
 15 you generated from them?  
 16 **A.** Correct.  
 17 **Q.** Okay.  
 18 **A.** Let me correct for that. The maps are  
 19 provided in the permit itself, so we didn't provide  
 20 maps separately. They're within the permit itself.  
 21 **Q.** Okay. That's fair.  
 22 So this first one, all of the input files  
 23 for the PHREEQC model were provided to the  
 24 Commission?  
 25 **A.** No. As I stated, just the .DAT file for

296

1 the numerical simulations which were used to define  
 2 the horizontal and the vertical boundaries of the  
 3 reservoir.  
 4 **Q.** You didn't give them an input file for the  
 5 PHREEQC model?  
 6 **A.** We did not, no. It was not requested.  
 7 **Q.** It's in your possession, though?  
 8 **A.** The EERC has the data.  
 9 **Q.** Sorry. Yes. EERC.  
 10 And EERC is Summit's agent and  
 11 representative with respect to that data?  
 12 **A.** The ownership of the data is governed  
 13 under our specific contracts with Summit including  
 14 our NDA with them that govern data ownership.  
 15 **Q.** EERC has a nondisclosure agreement with  
 16 Summit?  
 17 **A.** Yes.  
 18 **Q.** Who proposed that?  
 19 **A.** I was not involved in those discussions.  
 20 It's a standard -- standard practice we have with  
 21 most of our clients, though.  
 22 **Q.** Is that because your licenses for the  
 23 computer modeling programs are academic licenses?  
 24 **A.** No. Commercial licenses were procured for  
 25 this project as this was a commercially contracted

297

1 project.

2 Q. Did Summit compensate for the cost of the

3 subscriptions for the programs on a commercial

4 basis?

5 A. The EERC procured commercial licenses and

6 the costs of those commercial licenses were billed

7 to Summit. Yes.

8 Q. Okay. Were they temporary subscriptions?

9 A. Yes. So the licenses have a time period

10 associated with them. Commonly, we procure

11 licenses on the order of a month, two-month,

12 three-month licenses, depending on the duration of

13 the time period in the project we need the license

14 to perform the scope.

15 Q. So I want to go back to my prior question.

16 Other than the input model for the PHREEQC model --

17 sorry. Let me start over.

18 Other than the input file for the PHREEQC

19 model, is there anything listed in these bullet

20 points that was not provided by EERC to the

21 Industrial Commission?

22 A. Yes. As I mentioned, the only input data

23 that was provided can be found in your last bullet

24 point in terms of what I would call the

25 simulation -- or the numerical reservoir simulation

298

1 model data decks and the output files. Those were

2 the two pieces of data which I am saying is the

3 .DAT file and the .SR3 file. Those are the only

4 two data sets from this list that were provided.

5 Q. So if you look at the third bullet point,

6 is there anything there that was provided to the

7 Industrial Commission?

8 A. Yes. Thank you for correcting me. So all

9 core analysis data was provided to the Industrial

10 Commission as well as the North Dakota Geological

11 Survey through submission to the North Dakota core

12 library staff. And as required, all well log data,

13 formation testing, fluid analysis was provided

14 as -- as part of completions reports for the three

15 stratigraphic test wells that were drilled. So

16 those were technically provided.

17 Q. When you look through these bullet points

18 on this letter, do you have an understanding of

19 what is being referenced in all of these? Is there

20 anything you don't understand what is being

21 referenced?

22 A. No. I understand.

23 Q. If I asked you to go back to EERC today

24 and sit down and pull together an external hard

25 drive and put this data on that external hard drive

299

1 and give it to me, approximately how long would it

2 take you to do that?

3 A. That would involve the procurement of

4 commercial licenses to access.

5 Q. No. Assuming that you have a commercial

6 license, which you do for all of this, if you

7 needed to go to your office, take all of this data

8 and put it on an external hard drive, how long

9 would that take you?

10 A. Days to weeks.

11 Q. It would take you weeks to put this data

12 on a hard drive? You're telling me that?

13 A. To ensure that we have the proper data, QC

14 it, and we ran multiple iterations.

15 Q. No. I'm asking you to take this data that

16 you understand what all of it is, export it,

17 transfer those files onto an external hard drive,

18 how long?

19 A. One to two weeks.

20 Q. It would take you one to two weeks to

21 transfer those files to a hard drive, but you can

22 start from scratch with publicly available data and

23 replicate and recreate that entire model in four

24 weeks?

25 A. So the publicly available data would be

300

1 coming from single data bases. The way the EERC's

2 file structure and the iterations of our models,

3 the amount of data we have, it's my opinion knowing

4 our data storage, the amount of data we have, the

5 different iterations of modeling simulations done

6 for this project, I would estimate it would take

7 our staff that amount of time to ensure that we had

8 the proper data to be transferred.

9 Q. But you keep saying -- you're saying

10 ensure we have the proper data to be transferred.

11 I'm saying physically how long does it take to

12 click the buttons on the computer to tell the files

13 in the computer to transfer them to an external

14 hard drive and how long does it take the computer

15 to process that file transfer and get it onto the

16 external hard drive? I'm not talking about quality

17 control or review.

18 A. Okay. I can't speculate. I don't know

19 the size of the data in terms of megabytes,

20 gigabytes or the speed to upload it.

21 Q. So you have no idea how long it would take

22 to put this on an external hard drive and send it

23 to us?

24 A. I gave you an estimated range of what I

25 believe it would take.

301

1 Q. Three weeks?

2 A. I believe I said one to two.

3 Q. One to two weeks.

4 And you're still saying that you could

5 also replicate the entire model yourself from

6 public data in just four weeks? Can you explain

7 that?

8 A. I believe I did already answer that.

9 Q. Why does it only take two weeks to

10 transfer the files onto a hard drive but you can

11 take and recreate everything in four weeks?

12 A. I believe I already answered that.

13 Q. And you think that sounds plausible?

14 A. I gave a range and in my opinion of what

15 it would take.

16 Q. Okay. Were you asked to do that at any

17 point?

18 A. No.

19 Q. Were you at any point advised that you

20 might need to make data available to an opposing

21 party in any kind of legal proceeding for Summit?

22 A. I was made aware that data may be

23 requested. Not specifically that it would need to

24 be provided.

25 Q. Were you told that it would not need to be

302

1 provided?

2 MR. BENDER: I'm going to object insofar

3 as it might get into issues on attorney/client

4 privilege. So if any of this was discussed with

5 you while I was present on the phone or whatever or

6 Ty, I'd instruct you not to answer it.

7 MR. BRAATEN: Are you asserting the

8 privilege on behalf of Summit or EERC?

9 MR. BENDER: Summit.

10 Q. (MR. BRAATEN CONTINUING) At any time when

11 there was no representative of Summit, other than

12 Mr. Bender, were you told that -- or there was no

13 representative of Summit present for the

14 conversation, at any point were you told that you

15 would not need to provide data?

16 A. No. I was involved in discussions to

17 determine what it would take for us to provide that

18 data. I was not told we would not have to provide

19 it. I was told as a potential we may have to.

20 Q. Who were you told that by?

21 A. Mr. Lonny Jacobson who is our direct point

22 of communication with the Summit team.

23 Q. Is he with EERC or Summit?

24 MR. BENDER: Your Honor, I'm going to

25 object. We're getting into issues having to do

303

1 with discovery. These issues are before the

2 Commission in a motion to compel. I don't think

3 it's appropriate to try to litigate that here. We

4 haven't had an opportunity to respond to that

5 motion to compel, so I'm going to object to this

6 whole line of questioning.

7 HEARING EXAMINER GARNER: I'm going to

8 overrule.

9 MR. BENDER: Okay. Thank you.

10 Q. (MR. BRAATEN CONTINUING) Who does

11 Lonny -- did you say Lonny Jacobson?

12 A. Yeah.

13 Q. Who does he work for?

14 A. The Energy & Environmental Research

15 Center.

16 Q. Okay. When did you talk to him about the

17 potential of having to provide data?

18 A. Can you clarify "provide data"? To whom?

19 Q. We just talked about a conversation you

20 had had with Lonny in which you indicated that you

21 had not been told that you would not need to

22 provide data. Do you recall that conversation?

23 A. I do. It was after discovery was

24 submitted.

25 Q. And when you say "after discovery was

304

1 submitted," are you referring to the request for

2 data and information that were sent by me on behalf

3 of the intervenors?

4 A. Correct.

5 Q. Okay. What did he ask you about that

6 data?

7 A. What effort and software licenses would be

8 needed to compile that data.

9 Q. And just tell me fully what your response

10 to that was when you talked to him at that time?

11 A. We provided him with a specific list of

12 the software licenses needed, the data as well as

13 things, like I discussed yesterday, about some of

14 the data sets being acquired from data brokers that

15 the specific digitized logs in question are

16 governed by a license agreement.

17 Q. Did you make a determination that because

18 of those license agreements you were unwilling to

19 provide those data sets?

20 A. EERC did not make that determination. We

21 provided information to Summit on what it would

22 take for us to produce those data sets.

23 Q. With respect to everything that's listed

24 in Exhibit 83 in those bullet points, first, EERC

25 has itself all of that data related to Summit's

305

1 project; right?

2 **A.** Yes.

3 **Q.** And has EERC provided all of that data to

4 Summit itself?

5 **A.** I'm unsure. I don't believe we have

6 provided every piece of data yet.

7 **Q.** So Summit doesn't even have all of the

8 data that EERC has?

9 **A.** I can't comment on that with certainty.

10 **Q.** Well, did you just say that EERC has not

11 provided all of this data to Summit?

12 **MS. DOUGLAS:** Could you read back what I

13 stated?

14 (Record read as requested.)

15 **MS. DOUGLAS:** So I believe I said I'm

16 unsure, I'm uncertain about that. I don't have a

17 definitive answer.

18 **Q.** (MR. BRAATEN CONTINUING) Okay. What did

19 Lonny tell you about his conversations with Summit

20 about it?

21 **A.** That we would just not have to provide it

22 at this time. A determination was not made on

23 whether we would be providing it or not.

24 **Q.** At any point were you asked to start

25 compiling the data in the potential event that you

306

1 did have to provide it?

2 **A.** No, because as I mentioned, we'd be

3 required to procure software licenses.

4 **Q.** For what?

5 **A.** To open the model, take out any data. For

6 example, to open the Petrel model, we'd need a

7 Petrel license in order to take out the digitized

8 well logs that are governed by that license

9 agreement.

10 **Q.** So the temporary subscriptions you had for

11 the models, have those lapsed at this point?

12 **A.** They have.

13 **Q.** Okay. So you didn't want to export the

14 data because in order to do that, you would have

15 had to buy another subscription just to export the

16 data out of the models?

17 **A.** Again, the EERC's contracted to perform

18 this scope by Summit Carbon Storage, and so they

19 would have had to approve and authorize us to

20 procure the software.

21 **Q.** And they didn't want to pay for the

22 software?

23 **MR. BENDER:** If you know.

24 **MS. DOUGLAS:** I -- I don't know. I was

25 not involved in those discussions.

307

1 **Q.** (MR. BRAATEN CONTINUING) Well, you're the

2 one that just told me that the need to procure new

3 licenses was part of the reason for not exporting

4 or starting on the export of the data; right?

5 **A.** We would need to be authorized by Summit

6 to start those activities.

7 **Q.** And they never did that?

8 **A.** No.

9 **Q.** Did Lonny ask them if they would like to

10 authorize that?

11 **A.** I'm not privy to those discussions.

12 **Q.** The PHREEQC model is a free model, though,

13 that anyone can use and there would be no barrier

14 with subscriptions to putting all that data

15 together; right?

16 **A.** Correct. As I testified, though,

17 yesterday, I believe that all of the input data

18 used for that is described in the permit itself.

19 **Q.** Have you personally had any direct

20 communications with the employees or members of the

21 North Dakota Industrial Commission about this

22 matter in the last two weeks?

23 **A.** I have not, no.

24 **Q.** Do you know if Lonny has?

25 **A.** I'm not aware if he has or not, but I do

308

1 not believe he has.

2 **Q.** As part of your work on the -- the Summit

3 project, did you do any work related to the surface

4 facilities?

5 **A.** No, I did not.

6 **Q.** There was a comment yesterday that I

7 believe -- and you can correct me if I'm wrong, but

8 I believe you said that these injection wells will

9 not endanger human health. Would you agree with

10 that?

11 **A.** I believe Caitlin testified to human

12 health.

13 **Q.** Okay. And did I hear it right or do you

14 agree that the testimony was that these injection

15 wells, the Class VI wells, will not endanger human

16 health?

17 **A.** (BY MS. OLSEN) I believe I testified to

18 the injection wells have engineering protocol in

19 place that would not endanger human health or the

20 environment in relation to CO<sub>2</sub> injection activities.

21 **Q.** Thank you. In making that statement, did

22 you consider the potential of CO<sub>2</sub> releases from

23 those surface facilities such as valves, blowouts,

24 things of that nature?

25 **A.** That was discussed later on in the permit.

309

1 So my references to that are in relation to the  
 2 injection well and the review that was done on the  
 3 injection well specifically.  
 4 Q. Would it also be accurate to say  
 5 specifically with respect to the things that happen  
 6 downhole at the injection well?  
 7 A. The engineering safeguards in place  
 8 downhole are such that they would prevent migration  
 9 of CO<sub>2</sub> into USDWs or the atmosphere.  
 10 Q. What about the engineering safeguards  
 11 between the terminus point of the Midwest Carbon  
 12 Express Pipeline and the wellhead?  
 13 A. (BY MS. DOUGLAS) We believe we have  
 14 witnesses coming up who are better suited to  
 15 testify to that.  
 16 Q. Okay. We had a discussion yesterday about  
 17 the permeability adjustment with the 2.5  
 18 multiplier. Do you recall that?  
 19 A. I do.  
 20 Q. Did you or Lonny have conversations with  
 21 Summit at any point regarding that issue?  
 22 A. We did.  
 23 Q. And what were those conversations?  
 24 A. So as I testified yesterday, the results  
 25 showed a slightly higher permeability that could

310

1 have been used to justify a higher multiplier. In  
 2 discussions with EERC and Summit, EERC providing  
 3 technical advisement to use a lower value, those  
 4 discussions included discussions with Summit from a  
 5 business case. They wanted to permit the site to  
 6 take a certain amount of CO<sub>2</sub> and store CO<sub>2</sub> within a  
 7 certain area.  
 8 And so through sensitivity modeling and  
 9 business considerations, it was a joint  
 10 determination to use 2.5. Additionally, the  
 11 Commission has approved a permit for the Broom  
 12 Creek Formation that has used 2.5 as well.  
 13 Q. What were the business considerations  
 14 Summit expressed regarding the use of the 2.5  
 15 factor?  
 16 A. Again, I just discussed the amount of CO<sub>2</sub>  
 17 they were targeting and the area -- the area to be  
 18 permitted for CO<sub>2</sub>. I discussed a little bit  
 19 yesterday I didn't want to overestimate the storage  
 20 facility area and then not inject that amount of CO<sub>2</sub>  
 21 to where we would be over-leasing the area and not  
 22 using it.  
 23 Q. So Summit was -- Summit's preference would  
 24 be that that perm adjustment be a lower number  
 25 based on that business consideration?

311

1 A. Through discussions with EERC and Summit,  
 2 the 2.5 multiplier was selected.  
 3 Q. But specifically because in part of  
 4 Summit's business considerations of wanting to keep  
 5 the storage facility as small as possible for the  
 6 amount of CO<sub>2</sub> they want to inject; right?  
 7 A. I wouldn't say it's as small as possible.  
 8 There's just some consideration to not overestimate  
 9 the area needed.  
 10 Q. Because if they reduce the size or the  
 11 boundary of that storage facility, then if there  
 12 are people just on the other side of that, they  
 13 don't need to pay for any property rights for that;  
 14 is that accurate?  
 15 A. Can you repeat that?  
 16 Q. If they reduce the geographic areal extent  
 17 of the storage facility boundary, it reduces the  
 18 number of landowners for whom they need to  
 19 compensate for the use of the property rights and  
 20 that's the business consideration; right?  
 21 A. It's a fact a smaller storage facility  
 22 area would result in less landowners having to be  
 23 permitted. The -- the business consideration  
 24 wasn't related to number of landowners as it was  
 25 area.

312

1 Q. What business interest does Summit have in  
 2 reducing the size or boundary of that storage  
 3 facility if it's not related to not having to  
 4 compensate landowners?  
 5 A. I --  
 6 MR. BENDER: If you know the answer.  
 7 MS. DOUGLAS: I don't know that. I'd have  
 8 to defer to Summit.  
 9 Q. (MR. BRAATEN CONTINUING) And so the  
 10 compensation of landowners is the only thing you  
 11 know of as a business consideration that they would  
 12 have been thinking about in --  
 13 MR. BENDER: I think that's a  
 14 mischaracterization of her testimony. Can you ask  
 15 the question again?  
 16 Q. (MR. BRAATEN CONTINUING) Sure. You've  
 17 testified to the business consideration of the need  
 18 to lease landowners; right?  
 19 A. Yes.  
 20 Q. And that's the only business consideration  
 21 that you've testified to related to Summit's  
 22 consideration of which permeability adjustment  
 23 factor to use?  
 24 A. Yes, but it's not the only business  
 25 consideration. There's also operational costs

313

1 associated with monitoring. If they -- they use a  
 2 permeability multiplier in a larger permeability  
 3 multiplier as we discussed, it may result in a  
 4 larger plume, likely a larger associated pressure  
 5 front, larger AOR that would require additional  
 6 acreage to monitor, meaning additional monitoring  
 7 costs.  
 8 Q. And every five years or so Summit is going  
 9 to rerun the models based on the data acquired thus  
 10 far from that monitoring; right?  
 11 A. Yeah. So the regulations require a  
 12 reevaluation of the AOR determination, no less than  
 13 every five years, meaning that Summit will be using  
 14 operational and monitoring data to history match,  
 15 calibrate their models and confirm their permitted  
 16 AOR and storage facility area are still sufficient.  
 17 Q. What if they found out it wasn't?  
 18 A. So the North Dakota Century Code  
 19 43-05-01-12 --  
 20 MR. BENDER: Let me -- let me correct you.  
 21 That's the Administrative Code.  
 22 MS. DOUGLAS: Thank you for that  
 23 correction.  
 24 Q. (MR. BRAATEN CONTINUING) 43-05-01, and  
 25 what was the next one?

314

1 A. 12. Dash 12.  
 2 Q. Okay.  
 3 A. Okay. This contains the -- the regulation  
 4 language regarding any changes to the storage  
 5 facility area on that reevaluation. If it was  
 6 deemed that the CO<sub>2</sub> would potentially go outside the  
 7 boundaries and Summit determined they needed to  
 8 expand the area, they would need to go through the  
 9 modification process.  
 10 Q. And the result being potentially an  
 11 adjustment to the boundaries of the storage  
 12 facility?  
 13 A. That would require a major modification  
 14 which I believe requires an additional hearing at  
 15 that point if they needed to modify the permitted  
 16 boundaries.  
 17 Q. But if the data indicated that the storage  
 18 facility boundary had not been modeled in a way  
 19 that was accurately reflecting the conditions in  
 20 the last five years, that is a potential result of  
 21 the five-year review, that you redraw the storage  
 22 facility boundary; right?  
 23 A. Potentially.  
 24 Q. And if you did that, what do you do about  
 25 all the payments you've made to the landowners so

315

1 far?  
 2 A. I can't speak to that.  
 3 Q. Is there any process you're aware of that  
 4 would address that?  
 5 A. Again, I believe it would be addressed in  
 6 that major modification proceeding, which would be  
 7 a hearing just like the one we're in today.  
 8 Q. Were there any communications about using  
 9 the 2.5 multiplier between EERC and the Industrial  
 10 Commission?  
 11 A. I can't recall specifically. Potentially  
 12 in their review of initial permit drafts submitted,  
 13 it could have been discussed.  
 14 Q. If you had used 2.7 for the factor instead  
 15 of 2.5, how many more acres of property would have  
 16 been included in the storage facility?  
 17 A. I can't speak to that. We did not run  
 18 that case.  
 19 Q. Okay. Do you have any sense of what that  
 20 might be?  
 21 A. I do not because simulations are a  
 22 complex, multi-physics approach, and so adjusting  
 23 the permeability is not a straight ratio to plume  
 24 size.  
 25 Q. Would you agree that it would result in

316

1 some additional acreage?  
 2 A. Yes, I believe I stated that.  
 3 Q. Just a couple minutes ago you made a  
 4 reference to sensitivity analysis. Do you recall  
 5 that?  
 6 A. Yes.  
 7 Q. What do you mean by "sensitivity  
 8 analysis"?  
 9 A. So the EERC performs sensitivity analysis.  
 10 Some of that is discussed in -- in the permit as  
 11 well. We looked at parameters that affectively --  
 12 or could affect simulation results. In addition to  
 13 that, to the sensitivity analysis, we also did  
 14 uncertainty analysis to look at how various  
 15 properties and distribution of properties, such as  
 16 permeability, could potentially impact the -- the  
 17 model and the simulation results.  
 18 Q. And that's essentially doing quality  
 19 control to test the predictive utility of your  
 20 model?  
 21 A. I wouldn't classify it as testing the  
 22 utility of our model. We did those things to  
 23 determine what parameters we thought were  
 24 appropriate and justifiable for use in the model.  
 25 Q. Could you do that assessment of the

317

1 parameters chosen without running sensitivity  
 2 analysis on the model?  
 3 **A.** Could you repeat that?  
 4 **Q.** Could you assess the propriety of the  
 5 parameters used in the model without running any  
 6 sensitivity analysis on it? Let me ask a different  
 7 question.  
 8 What properties did you run sensitivity  
 9 analysis on?  
 10 **A.** Sensitivity analysis, you said?  
 11 **Q.** Yep.  
 12 **A.** So we ran sensitivity analysis on  
 13 injection rates, bottomhole pressure conditions,  
 14 wellhead temperatures, wellhead pressures.  
 15 **Q.** For what purpose?  
 16 **A.** So on page 3-15, we have a paragraph  
 17 talking about sensitivity analysis.  
 18 **Q.** And you indicate that because of the  
 19 availability of data in the form of well logs, core  
 20 sample data and rock fluid properties, the need for  
 21 typical sensitivity studies of influential  
 22 reservoir parameters has been reduced. Has it been  
 23 eliminated?  
 24 **A.** No, which is why we ran a sensitivity  
 25 analysis.

318

1 **Q.** What's the difference between the  
 2 sensitivity analysis you ran and what you would  
 3 refer to here as typical sensitivity studies?  
 4 **A.** Typical sensitivity studies would vary  
 5 more parameters potentially. So we felt confident  
 6 in site-specific data to define limits of certain  
 7 variables so we didn't need to test those.  
 8 **Q.** Up until you ran the injection test?  
 9 **A.** I -- I don't understand the question.  
 10 **Q.** Well, what were the parameters you were  
 11 comfortable with that you didn't need to run  
 12 sensitivity analysis on?  
 13 **A.** Things like model size, grid cell size,  
 14 boundary conditions. We ran certainty cases on  
 15 property distribution. We didn't necessarily run  
 16 sensitivity cases on property distribution.  
 17 **Q.** Would you have been confident using your  
 18 model to develop this application for Summit with  
 19 running zero sensitivity analysis?  
 20 **A.** I think it points back to your questions  
 21 earlier where you asked about what is the intent of  
 22 running these models to define the storage facility  
 23 area in an area of review taking into consideration  
 24 the required five-year reevaluation, the amount of  
 25 CO<sub>2</sub> that would be injected in -- in that time. I

319

1 believe running a model without sensitivity  
 2 analysis would -- would still provide enough  
 3 insight to be able to safely inject for those -- at  
 4 least those five years until the reevaluation time  
 5 period.  
 6 **Q.** So you're comfortable with a larger margin  
 7 of error in the first five years?  
 8 **A.** Given the amount of CO<sub>2</sub> that will be  
 9 injected, the proposed CO<sub>2</sub> plume size, other  
 10 variables such as the area of review evaluation  
 11 that looked at proximity of legacy wellbores and  
 12 things like that, given the testing and monitoring  
 13 plan, yes.  
 14 **Q.** Because ultimately what we're talking  
 15 about here are pressures and the extent of the  
 16 plume, and given what's going to be injected in the  
 17 first five years, you don't have those same safety  
 18 concerns in those first five years; would that be  
 19 fair?  
 20 **A.** Could you restate that?  
 21 **Q.** You're comfortable with a greater margin  
 22 of error in the first five years; right?  
 23 **A.** Given the amount of CO<sub>2</sub> that would be  
 24 injected, that's -- that's correct, because  
 25 we're -- the model as a whole was used to define a

320

1 boundary which is for 20 years of injection plus a  
 2 period of postinjection plus a buffer. So within  
 3 that five years, we're talking about a much smaller  
 4 area.  
 5 **Q.** And if it's not exact, it's not going to  
 6 be problematic because you're not going to have  
 7 injected enough to get out to that boundary by that  
 8 time anyway?  
 9 **A.** That's my belief. Correct.  
 10 **Q.** Except that you're treating all of the  
 11 landowners inside that boundary exactly the same  
 12 with the first ton that goes down that well and  
 13 everyone on the outside of that line exactly the  
 14 same, meaning they get nothing; right?  
 15 **MR. BENDER:** If -- if you understand how  
 16 the allocation formula works for paying royalties,  
 17 you can answer the question, but if you don't, I  
 18 would not -- I would not answer it if I were you.  
 19 **MS. DOUGLAS:** Could you restate your  
 20 question?  
 21 **MR. BRAATEN:** I can't even remember. May  
 22 I have you read it back, please?  
 23 (Record read as requested.)  
 24 **Q.** (MR. BRAATEN CONTINUING) With respect to  
 25 compensation.

321

1       **A.** I guess I don't understand your question.

2 If the CO<sub>2</sub>'s still in the boundaries, you're in

3 compliance with your permit and you're compensating

4 those within the boundary.

5       **Q.** Regardless of where that CO<sub>2</sub> is actually?

6       **A.** I guess to Mr. Bender's point, I'm not

7 comfortable talking on the compensation rates for

8 landowners or how that's going to be distributed

9 across owners within the area.

10       **Q.** And so to the extent you ran sensitivity

11 analysis on the model and to the extent you're

12 comfortable with the predictive utility of the

13 model in the ways that you used it for this

14 application, it was never a consideration to you

15 how that would affect how landowners get

16 compensated?

17       **A.** This modeling and simulation was done to

18 define the boundaries. Summit made decisions

19 related to compensation of pore space owners.

20       HEARING EXAMINER GARNER: Why don't we

21 take a ten-minute break.

22       (Recessed at 10:00 a.m. and reconvened at

23 10:12 a.m.)

24       HEARING EXAMINER GARNER: We are back on

25 the record. Mr. Braaten, you can resume your

322

1 questioning.

2       **Q.** (MR. BRAATEN CONTINUING) You had

3 mentioned that the Industrial Commission had

4 previously accepted the use of a 2.5 factor. Was

5 that for the Project Tundra project?

6       **A.** For those permits, correct.

7       **Q.** And was the EERC similarly involved with

8 developing those applications?

9       **A.** We were involved, but they had -- we were

10 involved.

11       **Q.** Did someone from EERC make that

12 determination in the prior case? That was a bad

13 question. Let me ask it again.

14       Did someone from EERC make the

15 determination to use the 2.5 permeability

16 adjustment factor in the prior proceedings related

17 to Project Tundra in which EERC was involved?

18       **A.** I can say we participated in those

19 discussions. I can't provide more details on who

20 made the determination and the parties involved as

21 that project is -- is still actively being

22 conducted and is governed by an NDA with Minnkota.

23       **Q.** If you were going to assess someone else's

24 work developing the same models that EERC developed

25 for Summit's application, how would you go about

323

1 assessing those models that were developed by

2 others?

3       MR. BENDER: Do you understand what he's

4 talking about when he says "assess"?

5       MS. DOUGLAS: I was just going to ask,

6 assessing for what purposes?

7       **Q.** (MR. BRAATEN CONTINUING) If you were

8 asked to determine if the inputs and parameters and

9 ways in which the models were set up and run would

10 be acceptable to you in your professional

11 experience such that they would support an

12 application for Class VI wells.

13       **A.** The EERC's been contracted in this

14 capacity before, so I'm speaking from direct

15 experience here. Typically, that review process

16 would come in the form of presentations about

17 inputs and assumptions used in the model by those

18 that created the model. We would evaluate their

19 inputs and assumptions for reasonability and if

20 they're justifiable based on the data sets that

21 they had available to them, and we'd take into

22 considerations Class VI requirements related to

23 compliance. But EERC has not in these roles --

24 where we've been contracted to perform this work

25 before, we have not reviewed people's models or

324

1 rerun their simulations to -- to double-check

2 things in that manner. We've reviewed their inputs

3 and assumptions through presentations, reviews of

4 reports, that type of thing.

5       **Q.** Presentations by whom?

6       **A.** As I mentioned, those that generated the

7 models presented to us their inputs and

8 assumptions. A lot of the information that would

9 have been in those presentations is captured -- for

10 our models that information is similarly captured

11 in the storage facility permits.

12       **Q.** Did you run the model at a 2.7 adjustment

13 factor for permeability?

14       **A.** I just previously mentioned earlier today

15 that we did not.

16       **Q.** Why not?

17       **A.** We didn't feel it was necessary. We made

18 a decision to run it with 2.5 and so we ran it with

19 2.5.

20       **Q.** Would it have cost you anything to run it

21 at 2.7?

22       **A.** Yes, it would have cost us time, so --

23       **Q.** How much time?

24       **A.** -- hours, and it would have cost us time

25 running it with the model license. So we only

325

1 have -- we pay for a model license for a month.  
 2 Running the model would tie up that license for a  
 3 week or so.  
 4 Q. Because that's how long it takes to run  
 5 the model?  
 6 A. A model this size typically could be  
 7 anywhere from two days to a week of run time,  
 8 depending on if any errors are encountered and you  
 9 have to restart the model.  
 10 Q. Meaning that if you had to restart the  
 11 model, it could take up to a week?  
 12 A. Potentially.  
 13 Q. Could it take longer than a week?  
 14 A. Potentially, if there are model errors  
 15 which can't be necessarily predicted when the  
 16 simulator is going to experience a numerical error  
 17 and give an error file.  
 18 Q. But you think an engineer could replicate  
 19 it in four weeks?  
 20 A. You asked me how much time it would take  
 21 to -- to build a model and I said four weeks to  
 22 build the model. That's different than running the  
 23 simulations.  
 24 Q. Okay. So several weeks to replicate the  
 25 model and then at least another week to run it?

326

1 A. Correct.  
 2 Q. So it's your testimony that another  
 3 engineer could both replicate and run that model in  
 4 five weeks?  
 5 A. If the model they built ran and didn't  
 6 experience any numerical errors that they would  
 7 have to troubleshoot.  
 8 Q. Have you ever set up and run a model that  
 9 didn't have any numerical errors that had to be  
 10 troubleshooted?  
 11 A. Myself personally, no.  
 12 Q. There's a binder directly in front of you  
 13 there with a number of tabbed exhibits. If you  
 14 don't mind, can I have you open it to landowner --  
 15 or LO-63.  
 16 A. I'm there.  
 17 Q. Are there features on this map that you  
 18 recognize from the shapefiles submitted by Summit  
 19 to the DMR?  
 20 A. These appear to be the storage facility  
 21 boundaries and the AOR for the three permits.  
 22 Q. Are you also familiar with the maps that  
 23 were produced to indicate the 5-, 10- and 20-year  
 24 pressure increases in the area of the injectors?  
 25 A. Yes, I'm familiar with those.

327

1 Q. And does it appear that one of those is  
 2 also overlaid on this exhibit?  
 3 A. It does appear that way, but it's  
 4 difficult to see given the color scale for that  
 5 layer.  
 6 Q. You are familiar with the maps that were  
 7 generated to indicate the areal extent of the  
 8 pressure increases in the reservoir that were in  
 9 the application; right?  
 10 A. I am.  
 11 Q. And so you'd agree that there will be  
 12 increases in the pressure in the formation well  
 13 outside the boundaries of the storage facility?  
 14 A. Yes. If we may, I'd like to speak off  
 15 page 4-2 of the permit.  
 16 Q. Okay.  
 17 A. Figure 4-1.  
 18 Q. And just for the record, the permit being  
 19 referenced is Exhibit 1A?  
 20 A. Correct. So this map is showing the  
 21 predicted maximum subsurface pressure due to  
 22 injection from the three sites. So this is at  
 23 20 years is where -- of injection is where we see  
 24 the maximum. And as you can see, the pressure  
 25 increase extends beyond the proposed facility

328

1 boundaries in the area of review.  
 2 Q. What variable of Darcy's law limits the  
 3 amount and rate at which you can inject CO<sub>2</sub>?  
 4 A. I don't think I could speak to that  
 5 without the equation in front of me.  
 6 Q. What limits your ability to inject CO<sub>2</sub> into  
 7 these Class VI wells? Let me ask that again.  
 8 What limits the rate and amount of CO<sub>2</sub> that  
 9 you can inject into that reservoir through these  
 10 Class VI wells?  
 11 A. So the bottomhole pressure constraint is  
 12 the -- the regulatory constraint that dictates the  
 13 amount of CO<sub>2</sub> that can be injected into these wells.  
 14 So that bottomhole pressure constraint is derived  
 15 as 90 percent of the fracture pressure gradient.  
 16 So bottomhole pressure is the regulatory constraint  
 17 for the Class VI.  
 18 Q. And the bottomhole pressure is obviously  
 19 directly impacted by existing pressures in the  
 20 formation; right?  
 21 A. That's correct.  
 22 Q. Are you familiar with the intervention by  
 23 Minnkota in this proceeding?  
 24 A. Generally.  
 25 Q. Are you familiar with where the well is

329

1 that they had concerns about?

2 **A.** Yes.

3 **Q.** Is Summit's project going to affect the

4 ultimate bottomhole pressure that limits Minnkota's

5 project?

6 **A.** There will be pressure interference.

7 **Q.** Can I have you go back to Exhibit LO-63?

8 **A.** I'm there.

9 **Q.** Do you see in the legend there there's a

10 number of different colors, and I'll agree with you

11 the color scale's a bit off, but down near the

12 bottom next to Swenson there's a white color. Do

13 you see that?

14 **A.** Yep.

15 **Q.** Do you see the land that sits right in

16 between the areas of review of the three different

17 storage facilities?

18 **A.** Yes.

19 **Q.** Is there going to be pressure interference

20 with Mr. Swenson's lands and pore space?

21 **A.** Define "pressure interference with."

22 **Q.** From the Class VI injectors that Summit is

23 going to inject CO<sub>2</sub> into.

24 **A.** There will be a pressure increase in the

25 reservoir due to injection. The map does show the

330

1 pressure increase will be in the pore space below

2 that land.

3 **Q.** Which would similarly limit the ability to

4 inject into the pore space in that part of the

5 reservoir based on limits to bottomhole pressure

6 that are being affected by that pressure

7 interference by Summit's Class VI wells?

8 **A.** Yes, potentially.

9 **Q.** How much is Summit compensating for that?

10 **A.** They're not required to compensate based

11 on North Dakota Class VI laws. They're required to

12 compensate for use of pore space for CO<sub>2</sub> storage.

13 Injection will cause pressure increase.

14 **Q.** Which reduces the availability of pore

15 space for storage of substances?

16 **A.** No. The pore space is still there. It's

17 not taking the pore space away.

18 **Q.** It reduces the availability of the pore

19 space for the storage of substances?

20 **A.** I don't agree with that characterization.

21 **Q.** Why not?

22 **A.** An operator could come in and still

23 develop that and store CO<sub>2</sub> in that pore space.

24 **Q.** Subject to a bottomhole pressure

25 limitation that has been significantly impacted by

331

1 the three Class VI wells surrounding him; right?

2 **A.** For the amount. Bottomhole pressure might

3 impact potential injection rates, not necessarily

4 the volumes that could be stored there. So one

5 thing to note that while injection operations will

6 increase pressure, when injection stops or if

7 injection rates are limited, after injection stops

8 pressure will die off in the reservoir, and we have

9 a map that demonstrates that.

10 During operations, you know, if Summit's

11 injecting at a lower rate, there will be a lower

12 pressure increase. It could also, you know, shut

13 in wells which would result -- or decrease -- which

14 would result in additional pressure decreasing

15 there. The pressure increase is temporary, but a

16 developer could come in and still inject CO<sub>2</sub> there.

17 **Q.** And you show equilibrium of pressures ten

18 years after operations; right?

19 **A.** The permit has a map that demonstrates

20 this pressure decrease. It doesn't represent

21 pressure equilibrium.

22 **Q.** What would you project that to be in time

23 from the end of operations?

24 **A.** We did not simulate that.

25 **Q.** Would you expect it to be more than

332

1 20 years?

2 **A.** We'd have to simulate that.

3 **Q.** Significant pressure interference for at

4 least 30 years of Mr. Swenson's pore space caused

5 by the Summit project?

6 **A.** Again, it would limit injection rates. It

7 wouldn't limit the total volumes that could be

8 stored on his land. So to answer your question,

9 there would be a pressure increase of approximately

10 500 psi up to a thousand psi increase over the

11 current pressure of the Broom Creek today for up to

12 30 years.

13 **Q.** What's the economic incentive for

14 injecting CO<sub>2</sub> into the pore space?

15 **A.** Can you clarify that question?

16 **Q.** Is Summit being paid in the form of tax

17 credits by the federal government to inject CO<sub>2</sub> in

18 the pore space?

19 **A.** I believe Wade testified yesterday as to

20 the -- the economic drivers behind their project.

21 I can't answer questions on that.

22 **Q.** Will the 45Q credits be in place in the

23 same form and amount 30 years from now?

24 **MR. BENDER:** Objection. Calls for

25 speculation.

333

1 HEARING EXAMINER GARNER: Overruled.  
 2 MS. DOUGLAS: As written today?  
 3 Q. (MR. BRAATEN CONTINUING) Correct.  
 4 A. No. But as I mentioned, while Summit's  
 5 operating, there's nothing that would preclude an  
 6 operator from coming in and injecting to store CO<sub>2</sub>.  
 7 The same amount of pore space would still exist.  
 8 They would just have to inject at lower injection  
 9 rates, but they could still get the same amount of  
 10 CO<sub>2</sub> in that pore space over time.  
 11 Q. How much longer amount of time?  
 12 A. We have not run that model.  
 13 MR. BRAATEN: Real quick, I apologize, on  
 14 the prior exhibit, LO-83, I did not move to admit,  
 15 and I would move to admit LO-83.  
 16 MR. BENDER: Did you say 83 or 63?  
 17 MR. BRAATEN: 83.  
 18 MR. BENDER: Oh, that one. I'm sorry.  
 19 MR. BRAATEN: I'm skipping back.  
 20 HEARING EXAMINER GARNER: Any objections?  
 21 MR. BENDER: No objection.  
 22 HEARING EXAMINER GARNER: The exhibit is  
 23 admitted.  
 24 Q. (MR. BRAATEN CONTINUING) You talked  
 25 yesterday briefly about the area of review and

334

1 corrective action. Did you look at the old wells  
 2 that have been P and A'd around the area of the  
 3 storage facilities?  
 4 A. (BY MS. OLSEN) We did.  
 5 Q. What did you look at in those wells?  
 6 A. Particular to this permit, there are no  
 7 legacy wells in this area.  
 8 Q. Within the area of review?  
 9 A. Within the area of review for the TB  
 10 Leingang, that's correct.  
 11 Q. Did you look at the legacy wells that are  
 12 closest but not within your area of review?  
 13 A. We did not evaluate wells outside of the  
 14 area of review.  
 15 Q. Okay. Are you aware of the Fritz-Lutz 1  
 16 well?  
 17 A. I don't believe that was in the area of  
 18 review.  
 19 Q. Are you aware of where it is in relation  
 20 to the area of review?  
 21 A. Which area of review?  
 22 Q. Any of them.  
 23 A. Not at this moment.  
 24 Q. And are you familiar with the Richter 1  
 25 well?

335

1 A. I recall the Richter 1 well.  
 2 Q. Did you assess that well in any way as  
 3 part of your work on the Summit project?  
 4 A. No. Class VI rules only require  
 5 evaluation of wells within the area of review.  
 6 Q. Can I have you turn to Figure 4-1, the  
 7 pressure map we were taking a look at a moment ago.  
 8 A. (BY MS. DOUGLAS) We're there.  
 9 Q. Are the dots on this pressure map  
 10 indicative of wells?  
 11 A. Yes.  
 12 Q. Are you generally familiar with the two  
 13 wells I mentioned being to the southwest of the  
 14 storage facility represented on this map? Sorry.  
 15 I don't know who I'm talking to. Either of you who  
 16 knows.  
 17 A. Not based on the current map. They're not  
 18 labeled or have well names, so I can't identify  
 19 them based on this map.  
 20 Q. And just based on your familiarity with  
 21 your location, does it appear that the -- let me  
 22 ask a different question.  
 23 Based on your familiarity with the Richter  
 24 1 well, is it your understanding that that well is  
 25 generally to the south or southwest of the storage

336

1 facilities?  
 2 A. (BY MS. OLSEN) I don't recall that  
 3 information, but if you say it is.  
 4 Q. So if we look directly south from the SCS1  
 5 injection wells that is indicated on the map with  
 6 the green triangle, if you go south of that until  
 7 you're outside of the area of review and storage  
 8 facility boundaries, almost directly south in blue  
 9 there is a dot and it is a dot directly south of  
 10 the green triangle and within the area that I  
 11 believe is indicated as a 400 psi pressure  
 12 differential. Do you see where I'm pointing at  
 13 that?  
 14 A. I do.  
 15 Q. Does that well have surface casing below  
 16 the depth of the uppermost freshwater aquifer or  
 17 U.S. drinking water aquifer?  
 18 A. I don't have that information in front of  
 19 me.  
 20 Q. Have you assessed the integrity of the  
 21 plugs on that well?  
 22 A. For this permit, only wells within the  
 23 area of review are required to be assessed.  
 24 Q. I understand. But as a factual matter  
 25 regardless of a requirement, did you assess the

337

1 integrity of the plugs on that well?

2 **A.** I did not.

3 **Q.** And did EERC assess that?

4 **A.** I don't recall.

5 **Q.** Do you know if Summit assessed that?

6 **A.** I don't know.

7 **Q.** You'd agree that the reservoir pressures

8 in the area of that well are going to increase by

9 400 psi based on your modeling as indicated on this

10 map at Figure 4-1?

11 **A.** That's correct.

12 **Q.** Did you run an MIT on the well?

13 **A.** We did not. I assume the well is plugged.

14 **Q.** When was it plugged?

15 **A.** I don't know. Most of the wells in this

16 area are vintage and drilled in the '70s. That's

17 my assumption.

18 **Q.** Or even earlier?

19 **A.** Sure.

20 **Q.** Some of them plugged before the 1950s

21 even?

22 **A.** Perhaps.

23 **Q.** So plug job that's 70 years old now?

24 **A.** Seven years?

25 **Q.** 70.

338

1 **A.** Perhaps.

2 **Q.** And it was plugged before we had the oil

3 and gas conservation laws on the books in North

4 Dakota we have now?

5 **A.** Plugging rules were different, yep.

6 **Q.** How much time and expense would be

7 required to pressure up an MIT and run it at 400

8 psi on that well?

9 **A.** (BY MS. DOUGLAS) That -- that well's

10 abandoned and so it's -- it's not accessible at the

11 surface. You'd have to redrill out the plugs and

12 recomplete it to get any information out of it.

13 **Q.** Was there an assessment of whether that

14 might need to be replugged?

15 **A.** No. Again, Caitlin's testified and stated

16 here a couple times we're only required to evaluate

17 the wells in our AOR.

18 I would like to say -- point out, we did

19 look at potential leakage or ribbing of leakage in

20 that well. So if I could direct you to page 3-41

21 to map -- to the map in Figure 3-2. So we modeled

22 a case here assuming hypothetical leakage pathways,

23 again, hypothetical leakage pathways, meaning that

24 there's a leakage pathway through plugs for this

25 model. If there was a leakage pathway due to the

339

1 pressure increase -- maximum pressure increase from

2 injection, we're estimating over the life of the

3 project only .005 meters cubed of formation fluid

4 could leak up through that well, again assuming

5 it's leaking, into overlying formations.

6 So, again, we have not evaluated that

7 particular well. It's outside of our AOR. We

8 don't believe that there is endangerment of USDWs

9 due to leakage.

10 **Q.** But if the plugs were bad, your modeling

11 indicates that fluids from the formation would

12 travel up that well in some amount to the

13 freshwater drinking aquifer that is not protected

14 by a surface casing?

15 **A.** The Broom Creek as it sits today is

16 overpressurized. If those plugs were bad because

17 the Broom Creek is overpressurized, fluids would

18 already be flowing.

19 **Q.** How much psi would it take to bust those

20 plugs?

21 **A.** I don't have that calculation.

22 **Q.** So you don't know if the pressure

23 formation would cause those plugs to burst right

24 now?

25 **A.** (BY MS. OLSEN) Class G cement is

340

1 typically rated to 5,000 psi.

2 **Q.** Is that what they used in 1945?

3 **A.** I'd have to look at the plugging records

4 to look at that specific well.

5 **Q.** Do they have plugging records?

6 **A.** I don't know.

7 **Q.** Do you have any familiarity with how wells

8 were plugged in North Dakota in the 1940s?

9 **A.** Generally, yes.

10 **Q.** Based on what?

11 **A.** My experience working for the Department

12 of Mineral Resources.

13 **Q.** If you put a Class VI injector on the

14 Swenson land and ran it at the same rates and

15 volumes that Summit is going to run its wells,

16 would that have any impact on Summit's project?

17 **A.** (BY MS. DOUGLAS) Yes, potentially.

18 **Q.** Do you think Mr. Swenson could get a Class

19 II disposal well into the Broom Creek Formation

20 permitted on his land in between the three Class VI

21 injectors?

22 **A.** So my understanding is that the -- the

23 Commission -- and I might not be using the proper

24 terms -- but if they grant this permit, they will

25 define this as a field, and so my understanding is

341

1 Mr. Swenson could permit the Class II or a Class VI  
2 well on his land. He would have to work with the  
3 Commission and make sure that he abides by any  
4 Commission orders related to those field rights.  
5 Q. Given your knowledge of the technical  
6 feasibility of that, do you think the Commission's  
7 going to grant that permit?  
8 A. I think development of any subsurface  
9 resources in the state require the cooperation of  
10 many entities, including landowners and project  
11 developers.  
12 Q. How is Summit cooperating with Mr. Swenson  
13 to allow him to develop his pore space subject to  
14 the pressure increases caused by Summit's Class VI  
15 wells?  
16 A. Is Mr. Swenson actively trying to develop  
17 those?  
18 Q. Do you have the answer to my question?  
19 A. I don't have any knowledge of Mr. Swenson  
20 actively trying to develop those.  
21 Q. And so if Summit is preventing him from  
22 developing those, what does it matter if he's  
23 actively trying to develop them right now or not?  
24 A. Could you clarify how Summit's --  
25 Q. Why are you saying it's significant or

342

1 relevant whether or not Mr. Swenson is actively  
2 trying to develop a Class II well?  
3 A. Your question you asked me, I believe --  
4 and it can be repeated back here, but I believe you  
5 asked why is Summit preventing Mr. Swenson from  
6 developing his pore space.  
7 Q. Okay. Well, if I asked that, I apologize.  
8 My intended question is has Summit worked with  
9 Mr. Swenson or reached out or talked to him about  
10 how their operations are going to affect his  
11 ability to use his pore space?  
12 A. I was not privy to the discussions between  
13 Summit and Mr. Swenson.  
14 Q. Would you agree there's going to be about  
15 a 900 psi pressure increase in the pore space in  
16 the reservoir under Mr. Swenson's land?  
17 A. Approximately, yes.  
18 Q. Is the max bottomhole pressure about  
19 3,000, 3,500? What's the max bottomhole pressure  
20 on the BK Fischer?  
21 A. It's on the range of, yeah, 3,600 psi to  
22 3,800 psi, depending on what site-specific data --  
23 Q. So you're going to increase the pressure  
24 in his pore space by approximately 25 percent of  
25 the max bottomhole pressure?

343

1 A. I've not done the specific calculations,  
2 but if you're saying that's what it is --  
3 Q. Is 900 approximately one-fourth of 3600?  
4 A. Yep.  
5 Q. There was testimony yesterday about the  
6 delineation of the CO<sub>2</sub> plume boundary, and I believe  
7 the testimony was that it was determined to be at a  
8 5 percent concentration of CO<sub>2</sub> in the aquifer as the  
9 edge of the CO<sub>2</sub> plume; is that right?  
10 A. That's correct.  
11 Q. And can you tell me again why 5 percent?  
12 A. Yes. So there's several studies out there  
13 that suggest that 5 percent is the detection limit  
14 for monitoring techniques, particularly 3D seismic.  
15 Q. Would it be fair and accurate to say that  
16 at the bottom of the injector, bottomhole, you've  
17 got about a hundred percent CO<sub>2</sub> in the formation,  
18 would that be fair, during injections?  
19 A. Right -- right at the injection well?  
20 Q. Right. I'm just saying if you start  
21 aground like right at -- where you're injecting, we  
22 can make an assumption that the CO<sub>2</sub> is a hundred  
23 percent of the fluid right there; right? Within  
24 one inch of the bottom of the well -- actually, let  
25 me ask you something. Are they perforating the

344

1 well?  
2 A. They will be perforating the well.  
3 Q. Okay.  
4 A. Or -- yes, they will be perforating the  
5 well.  
6 Q. Is there going to be a lateral?  
7 A. No.  
8 Q. Okay. So within the wellbore we're at a  
9 hundred percent CO<sub>2</sub>?  
10 A. Correct.  
11 Q. And you're indicating the edge of the  
12 plume is 5 percent CO<sub>2</sub>?  
13 A. Correct.  
14 Q. Does the concentration of CO<sub>2</sub> become more  
15 diluted in a linear manner as you move away from  
16 the wellbore?  
17 A. No, not necessarily. I'd like to point  
18 you to page 3-25 and 3-26.  
19 Q. Okay.  
20 A. So these are showing cross-sections  
21 through the simulated plume. These are  
22 representing the gas saturation in the model cells.  
23 So saturation of CO<sub>2</sub> is also dictated by the  
24 porosity and permeability of the rock, so you'll  
25 note -- so, again, this has the 5 percent

345

1 saturation cutoff. You'll note along the wellbore  
 2 you see an area of white, so this is on Figure  
 3 3-15a. Even at the wellbore saturation is below  
 4 5 percent due to the porosity and permeability in  
 5 that model layer.  
 6 So it's -- it's dependent on porosity and  
 7 permeability and how the CO<sub>2</sub> would flow in the  
 8 formation.  
 9 And just a point of clarification,  
 10 saturation will never be a hundred percent. CO<sub>2</sub>  
 11 injection can never move all of the formation fluid  
 12 out of -- out of the rock.  
 13 Q. Okay. Thank you. If we held constant  
 14 permeability and porosity, would the CO<sub>2</sub> become more  
 15 diluted in a linear or logarithmic function as you  
 16 move away from the wellbore?  
 17 A. Not directly linear or logarithmic, but  
 18 generally it would. At the edges of the plume is  
 19 where you see more mixing of CO<sub>2</sub> with -- with brine.  
 20 Q. So, generally speaking, if we were to plot  
 21 the reduction in CO<sub>2</sub> concentration on a linear scale  
 22 out to 1 percent, and let's pretend we can measure,  
 23 would the area of that line representing 6 percent  
 24 to 1 percent be much longer than the rest of the  
 25 line?

346

1 A. Based on the volumes being simulated here,  
 2 no, it would be much, much smaller because you'd  
 3 have a larger area with higher saturation.  
 4 Q. Would the area over which the saturation  
 5 changes from 10 percent to 0 percent be  
 6 significantly longer than the area over which it  
 7 changes from 20 percent to 10 percent?  
 8 A. I can't really make an educated guess on  
 9 that --  
 10 Q. What would you expect?  
 11 A. -- at this time.  
 12 Q. Would you expect that area from 10 to  
 13 0 percent to take longer or be longer than the area  
 14 from 10 to -- or 20 to 10 percent based on what you  
 15 know about how it dilutes as it moves away from the  
 16 wellbore as an engineer?  
 17 A. Again, I don't think I could -- could  
 18 speak on that.  
 19 Q. Okay. And the 5 percent, again, though,  
 20 was chosen because that's essentially the detection  
 21 limit and that's the lowest limit you can detect  
 22 with running the models? Sorry. Let me start  
 23 over.  
 24 The 5 percent is used because that is the  
 25 detection limit from the seismic?

347

1 A. Correct. Based on published studies --  
 2 Q. Okay.  
 3 A. -- from other carbon capture and storage  
 4 sites that are in operation.  
 5 Q. But you agree that's not actually the  
 6 border or the edge of where the actual CO<sub>2</sub> being  
 7 injected is traveling to?  
 8 A. As discussed, it's the boundary we can  
 9 detect.  
 10 Q. How?  
 11 A. With seismic.  
 12 Q. But only to a 5 percent concentration of  
 13 CO<sub>2</sub>; right?  
 14 A. Yep.  
 15 Q. So we know that there is CO<sub>2</sub> outside of  
 16 that boundary if that boundary is set at 5 percent.  
 17 It sure doesn't go from 5 percent to 0 within a  
 18 millimeter; right?  
 19 A. There's the potential for CO<sub>2</sub> to be --  
 20 Q. It's not just potential. Just as a matter  
 21 of physics, there's obviously CO<sub>2</sub> outside of that  
 22 boundary; right?  
 23 A. Yeah.  
 24 Q. Is there a plan to put two different  
 25 wellbores in at each injector site?

348

1 A. That's my understanding.  
 2 Q. Is the intent to do any kind of  
 3 directional drilling with the wellbores?  
 4 A. I believe so, but I can defer questions of  
 5 that to a witness who can answer in more detail.  
 6 Q. Okay. Did someone generate a PHI-H map  
 7 for the reservoir in the area -- areas of review?  
 8 A. I don't believe one was provided in the  
 9 permit and I'm not sure if one was produced.  
 10 Q. Would the -- would EERC have produced the  
 11 PHI-H map if one was produced?  
 12 A. Yes.  
 13 Q. Can I have you look at Figure 3-1?  
 14 A. I'm there.  
 15 Q. It says the distributed PHIE property  
 16 along a roughly west-east cross-section. It seems  
 17 obvious, but I want to make sure I understand. The  
 18 little callout in the upper left with the red line,  
 19 does that indicate the cross-section?  
 20 A. That does. The red line's the path of the  
 21 cross-section.  
 22 Q. Okay. Do you see the vertical line for  
 23 the Archie Erickson 2?  
 24 A. I do.  
 25 Q. And do you see just to the left of that

349

1 there's a couple areas with some fairly significant  
 2 pockets of red, I'll call them?  
 3 **A.** Yep.  
 4 **Q.** And then if we look over at the Milton  
 5 Flemmer, just to the right of that there's an area  
 6 that is mostly blue and green with just a little  
 7 yellow. Do you see where that is?  
 8 **A.** I do.  
 9 **Q.** If we took a hundred-foot diameter core in  
 10 that area with the red splotches just to the left  
 11 of the Archie Erickson and then we took a  
 12 hundred-foot diameter core in that area with the  
 13 blue and green just to the right of the Milton  
 14 Flemmer, would one of those cores contain more  
 15 available pore space for the storage of substances  
 16 than the other?  
 17 **A.** Yes. If we're -- we're -- in a  
 18 hypothetical case if we're assuming that this model  
 19 is a hundred percent accurate and represents the  
 20 rocks there, where you have higher porosity, you're  
 21 going to have more pore space just mathematically.  
 22 **Q.** And there's also a difference -- if we did  
 23 that same exercise, there's also a difference in  
 24 the amount of pore space available for storage  
 25 based on the vertical extent of the formation;

350

1 right?  
 2 **A.** You're saying based on the thickness?  
 3 **Q.** Correct.  
 4 **A.** Yes. That would be a factor in that  
 5 calculation -- sorry. That would be a factor of  
 6 the calculation, would be height, if you're  
 7 calculating volume.  
 8 **Q.** And would a PHI-H map show us  
 9 geographically what the various values were, taking  
 10 into account the porosity as well as the thickness?  
 11 **A.** It would for the realization of the model  
 12 in the permit. One thing to understand, while we  
 13 use site-specific data as controls, we used  
 14 variograms and other means to distribute properties  
 15 to the best of our ability. It doesn't mean that  
 16 the model will be a hundred percent accurate, which  
 17 is why we have that five-year reevaluation period  
 18 in case our model -- or the actual subsurface  
 19 geology is slightly different than our model, so  
 20 that we can account for those differences in how  
 21 bottomhole pressure is responding to injection as  
 22 well as how the CO<sub>2</sub> plume is migrating in the  
 23 reservoir.  
 24 **Q.** But if we look at Figure 3-1 in that area  
 25 of red just to the left of the Archie Erickson,

351

1 you're not saying that the model just randomly  
 2 allocated an area of higher porosity to that  
 3 specific location based on, you know, a factor of  
 4 variability. It's doing that because it is  
 5 predicting that that actually has more porosity  
 6 there in that specific location; right?  
 7 **A.** It's being informed by control points, but  
 8 we did uncertainty analysis looking at a hundred  
 9 different cases for property distribution -- sorry,  
 10 not a hundred -- a thousand different cases for  
 11 property distribution. We chose the one P50 case  
 12 which we feel is the most likely.  
 13 **Q.** And you couldn't have done that unless you  
 14 were able to do sensitivity analysis?  
 15 **A.** Uncertainty analysis.  
 16 **Q.** Sorry.  
 17 **A.** But, yes, that's correct. Those are the  
 18 steps we performed to determine which model we had  
 19 the highest confidency in being the most probable  
 20 case.  
 21 **Q.** And it's important to do that; right?  
 22 **A.** When you're the operator looking to define  
 23 the boundaries of your storage facility area, it's  
 24 important as you will be obligated to operate and  
 25 CO<sub>2</sub> must stay within those bounds.

352

1 **Q.** What if you're the landowner with pore  
 2 space on the outside of that boundary, is it  
 3 important for them?  
 4 **A.** I don't understand what context it would  
 5 be important for them. The operator's required to  
 6 keep CO<sub>2</sub> within their boundaries. If CO<sub>2</sub> is going  
 7 to go outside their boundaries, they're in  
 8 noncompliance with their permit. If they have to  
 9 adjust their boundaries, they are going to have to  
 10 amalgamate or acquire that additional pore space  
 11 outside, go through this major modification and  
 12 hearing process to get that approved.  
 13 **Q.** With respect to the compensation being  
 14 paid to the landowners whose property is being used  
 15 by Summit, is there any consideration given to the  
 16 actual porosity or actual thickness of their pore  
 17 space?  
 18 **A.** I believe Summit chose to treat all  
 19 landowners within the storage facility area  
 20 equally, meaning that the compensation is based by  
 21 a total amount of CO<sub>2</sub> injected and they're given the  
 22 proportional payment for the amount of land they  
 23 have within the storage facility area. They did  
 24 not use a volumetric approach. So in a volumetric  
 25 approach landowners would be paid for the actual

353

1 amount of CO<sub>2</sub>. Why that's not done is it -- it  
 2 would -- it would benefit the landowners directly  
 3 around the injection well, so Summit chose to treat  
 4 all landowners within the storage facility area  
 5 equally instead of --  
 6 Q. Accurately?  
 7 A. I don't agree with that classification.  
 8 Q. Well, they're not paying the landowners  
 9 based on the amount of CO<sub>2</sub> being stored in their  
 10 pore space; right?  
 11 A. Summit's paying for the use of the pore  
 12 space, so they are leasing the pore space.  
 13 Q. Are they leasing the pore space from my  
 14 clients?  
 15 A. My understanding is that your clients are  
 16 outside of the storage facility area boundary, so  
 17 their pore space is not being leased for storage of  
 18 CO<sub>2</sub>.  
 19 Q. Can I have you flip back to Landowner 63.  
 20 A. I'm there.  
 21 Q. If you see the different colors next to  
 22 the names and you look at the map, there are blocks  
 23 of colors both within and without the storage  
 24 areas, areas of review and outside of those  
 25 boundaries?

354

1 A. Yep.  
 2 Q. I apologize. Bear with me one moment. I  
 3 think I may be done.  
 4 Is there a place in the permit application  
 5 where thickness or porosity is broken down by  
 6 landowner or tract?  
 7 A. No.  
 8 Q. Okay. Whether it's in the application or  
 9 not, was that ever done or attempted by EERC, to  
 10 your knowledge?  
 11 A. No.  
 12 Q. How does it affect the accuracy of your 3D  
 13 seismic if you are not doing it on certain tracts?  
 14 A. It has the potential to reduce the  
 15 resolution and quality of the seismic data.  
 16 Q. And does it reduce the resolution and  
 17 quality just for that area specifically or does  
 18 that lack of seismic in that area impact the  
 19 quality of the other data?  
 20 A. So the quality of the seismic data is  
 21 dependent on the fold as well as the source  
 22 receiver offsets, so it's dependent -- the quality  
 23 of the image is dependent on the fold within each  
 24 area. Fold is lower when you aren't allowed to  
 25 have source and receivers in a specific tract.

355

1 However, if you have sufficient source receiver  
 2 offset, the quality of data will be lesser for  
 3 shallower formations, but you would -- depending on  
 4 the side of the land where you don't have source  
 5 and receivers, you may still have source --  
 6 sufficient source and receiver offset to produce  
 7 high-quality images with a seismic of the deeper  
 8 formations.  
 9 Again, that's going to be dependent on the  
 10 depth of the reservoir, the source receiver offset  
 11 and the area where receivers and source weren't  
 12 allowed to be placed or operated.  
 13 MR. BRAATEN: I don't have any further  
 14 questions.  
 15 HEARING EXAMINER GARNER: Any questions  
 16 from the staff?  
 17 **EXAMINATION**  
 18 **BY MS. MADCHE:**  
 19 Q. I have some questions. I would like to  
 20 start out with some of the questions that were  
 21 deferred to this group from earlier. Let's see  
 22 here.  
 23 So you had given testimony on the location  
 24 of coal reserves and coal leases within the three  
 25 storage facility permits. Would you be able to

356

1 answer approximately how close mining activity  
 2 currently is from proposed equipment, aboveground  
 3 infrastructure for the three facilities? So to  
 4 repeat, for each three storage facility permits,  
 5 what's the proximity to current mining activity to  
 6 date from the aboveground surface infrastructure?  
 7 And if you need to defer that, that's fine. Just  
 8 let me know.  
 9 A. (BY MS. DOUGLAS) All right. I'm going to  
 10 point you to the Exhibit 2.  
 11 MR. BENDER: It's 1B.  
 12 MS. DOUGLAS: 1B. Exhibit 1B, page 280.  
 13 This is the Archie Erickson/BK Fischer permit.  
 14 Q. (MS. MADCHE CONTINUING) Yep.  
 15 A. Figure 2-50. So these reflect the closest  
 16 mining operations from the Coyote Creek and Beulah  
 17 Mine which are the closest mining operations to any  
 18 of the three storage facility areas. And you can  
 19 see on this map green shows future mining  
 20 activities and brown shows mined out -- or areas  
 21 where mining has already taken place. And you can  
 22 see the approximate distance from those to the  
 23 proposed injection sites as well as the flowlines.  
 24 So here the scale we're looking at, I believe those  
 25 are townships. So it's approximately three to

357

1 four miles, the surface facilities are, from the  
 2 future mining activities.  
 3 Q. And just to confirm, yesterday in your  
 4 testimony you had stated that there were no active  
 5 coal leases where surface infrastructure was  
 6 planned for the three facilities; correct?  
 7 A. Correct.  
 8 Q. So earlier I had asked a question on why  
 9 the Milton Flemmer 1 was used as the type log in  
 10 Article 1.15 for all three storage agreements.  
 11 Could you elaborate as to why?  
 12 A. I can. So the Milton Flemmer well  
 13 penetrates the entire thickness of the Amsden, so  
 14 it was used as the type log so that we could  
 15 accurately represent the depth to the top and the  
 16 bottom of the Amsden and the thickness. The other  
 17 two stratigraphic test wells drilled for the other  
 18 storage facility areas do not penetrate the entire  
 19 Amsden. That is why the Milton Flemmer 1 well was  
 20 used as the type log for all three storage  
 21 facilities.  
 22 Q. When it comes to the royalty payments,  
 23 would you agree that due to the lack of history  
 24 matching data that we have that there would be more  
 25 uncertainties to allocating via volumetric versus

358

1 the tract participation as Summit has chosen to go  
 2 forward with?  
 3 A. I would agree with that. I'd also add  
 4 that there are limitations for using monitoring  
 5 methods to quantify the amount of CO<sub>2</sub> in a given  
 6 area in the subsurface. Monitoring methods such as  
 7 3D seismic and time lapse changes that can be  
 8 captured in 3D seismic are susceptible to both  
 9 changes in pressure and changes in fluid  
 10 saturation, so you would not be able to accurately  
 11 separate out effects of pressure from CO<sub>2</sub> saturation  
 12 in order to assure you're compensating landowners  
 13 using a volumetric approach.  
 14 Q. So now I'm going to move forward to  
 15 questions that I have from Section 2 on the  
 16 geologic exhibits. For the storage facility permit  
 17 for the TB Leingang, what was the maximum pressure  
 18 applied during the microfracture testing in the  
 19 Milton Flemmer 1 well within the Spearfish/Opeche  
 20 Formation?  
 21 A. I'll defer that question to a later  
 22 witness who was involved in those tests.  
 23 Q. Would you be able to state who it's being  
 24 deferred to specifically?  
 25 A. Ms. Jean Oddy.

359

1 Q. Okay. As it pertains to all three of the  
 2 storage facility permits and to their stratigraphic  
 3 test wells, can you explain how you determined  
 4 which sand package within the Broom Creek you  
 5 target for your microfracture in situ stress test  
 6 to determine the fracture propagation pressure  
 7 gradient?  
 8 A. I'll also have to defer that to Ms. Oddy.  
 9 Q. Okay. For all three of the applications  
 10 and the three stratigraphic test wells, was the  
 11 next dissipation zone above the injection zone, so  
 12 your Inyan Kara, sampled at all three facilities?  
 13 A. I believe so, yes.  
 14 Q. And did those samples show evidence that  
 15 the formations are currently hydraulically  
 16 separated?  
 17 A. That's our interpretation of the data,  
 18 yes.  
 19 Q. And in all three storage facility permits,  
 20 has any Fox Hills wells been sampled?  
 21 A. (BY MS. OLSEN) There's historical  
 22 groundwater sampling data in Appendix B throughout  
 23 each of the three permits. Plans to test those  
 24 wells in the baseline sampling plan are described  
 25 in Section 5 and will be testified to later.

360

1 Q. So just to confirm, you reviewed any data  
 2 that already existed which would be in Appendix B,  
 3 but no baseline sampling has started in the Fox  
 4 Hills?  
 5 A. That's correct.  
 6 Q. Core plugs taken from the base of the  
 7 upper confining zone in the Milton Flemmer 1 well  
 8 had a fairly high anhydrite weight percentage,  
 9 around 86 to 98 percent. Similar in the Archie  
 10 Erickson, there was around 95 and a half percent  
 11 shown. Did geochemical modeling indicate that it  
 12 was likely that the boundary between the two  
 13 formations would dissolve due to that percentage of  
 14 anhydrite?  
 15 A. (BY MS. DOUGLAS) Geochemical modeling  
 16 done for the upper confining zone showed little to  
 17 no dissolution of anhydrite due to geochemical  
 18 reactions with the modeled CO<sub>2</sub>.  
 19 Q. And would that apply for both the TB  
 20 Leingang and the BK Fischer?  
 21 A. That's correct.  
 22 Q. So I'm going to ask some questions related  
 23 to the formation imaging logs. Would you be the  
 24 correct witness to answer for all three storage  
 25 facility permit applications? I only ask because

361

1 it was discussed that you were going to have  
 2 another witness at the end that would talk about  
 3 differences between the three facilities, or are  
 4 you good with answering them?  
 5 **A.** We're good with answering the questions to  
 6 all three.  
 7 **Q.** Okay. So in the Milton Flemmer 1 well,  
 8 both in the formation imaging logs and within the  
 9 thin sections specifically where high anhydrite  
 10 content existed, there were a handful of fractures  
 11 that were shown. Can you please explain why these  
 12 fractures don't pose a risk to the storage  
 13 facility?  
 14 **A.** You said for the upper confining zone?  
 15 **Q.** Yes.  
 16 **A.** Could you point to specifically what depth  
 17 interval?  
 18 **Q.** So in figure 2-33 and into 2-34 in the TB  
 19 Leingang application, it shows that there are a  
 20 handful of resistive litho-bound fractures present  
 21 in the Opeche/Spearfish interval. Why are these  
 22 fractures not a concern as far as containment?  
 23 **A.** They're not a concern for containment  
 24 because they're commonly filled. In the case of  
 25 the resistive bound fractures, they're commonly

362

1 filled with anhydrite.  
 2 **Q.** So they wouldn't have transmissibility to  
 3 have CO<sub>2</sub> move through them?  
 4 **A.** Correct. They wouldn't have  
 5 transmissibility in the sense of they wouldn't have  
 6 sufficient permeability.  
 7 **Q.** So now in the BK Fischer application,  
 8 similarly in the Archie Erickson 2 well, the  
 9 investigation also found fractures, including one  
 10 minor fault. I would have the same questions for  
 11 that one. I'll let you get to the -- the figure  
 12 here. So Figure 2-30 (c) specifically would show  
 13 some of the fractures and the minor fault that was  
 14 found within the Opeche/Spearfish interval.  
 15 **A.** For this well the fractures were also  
 16 commonly filled either with anhydrite or clay. In  
 17 the case of the minor fault, it -- it appears to be  
 18 isolated. It doesn't appear to transect a  
 19 sufficient vertical extent to -- to serve as a  
 20 fluid migration pathway or to be transmissible.  
 21 Meaning it's a minor fault and it doesn't cut  
 22 through the entirety of the upper confining zone.  
 23 **Q.** And similarly in the last application, in  
 24 the Slash Lazy H 5 well there were fractures found  
 25 and a minor fault in the Amsden Formation.

363

1 **A.** Again, the minor fault -- or the fractures  
 2 are commonly filled, in this case commonly with  
 3 anhydrite. Similarly, given the geometry of this  
 4 minor fault, it appears to be isolated and does not  
 5 have properties to -- for it to serve as a fluid  
 6 migration pathway.  
 7 **Q.** So I want to go back to the BK Fischer  
 8 application. In the 3D seismic survey that was  
 9 done across these three storage facilities, was the  
 10 Stanton fault that was suspected to run through the  
 11 northwest corner of the BK Fischer storage facility  
 12 area found in the 3D seismic?  
 13 **A.** No. The proposed location of the Stanton  
 14 fault is on the edge of the 3D seismic survey. We  
 15 saw no indication of the fault or any deformation  
 16 associated with the fault.  
 17 **Q.** So now I'm going to move to questions  
 18 related to Section 3 for the model and simulation.  
 19 Do you know what the geographical projection was  
 20 used in Petrel for the geologic model?  
 21 **A.** I don't have that information on hand, but  
 22 perhaps I could provide it after a break.  
 23 **Q.** Okay. And what is the cell size in the  
 24 model both within and outside of the refinement  
 25 grid?

364

1 **A.** Outside the refinement grid, it's a  
 2 thousand by a thousand feet. Within the refinement  
 3 grid, I believe it's 250 feet by 250 feet.  
 4 **Q.** So on Figure 2-3 on page 2-5 that shows a  
 5 boundary for the simulation model, could you  
 6 explain why the boundary was centered as shown in  
 7 that figure within the geologic model?  
 8 **A.** Are you asking why the simulation model  
 9 extent was centered within the geologic model  
 10 extent?  
 11 **Q.** Yes. Or how it was determined as far as  
 12 placement for the centering with it?  
 13 **A.** So the -- the simulation model extent was  
 14 selected to cover Summit's sites and have enough of  
 15 a boundary -- or have enough cells as to model the  
 16 pressure plume and not have artifacts due to  
 17 boundary conditions. Additionally, we wanted to  
 18 incorporate the nearest site, the DCC West site, to  
 19 evaluate potential pressure interference.  
 20 **Q.** In the numerical simulation, are all three  
 21 facilities injecting across the same 20-year  
 22 injection period?  
 23 **A.** Yes. That's what was modeled.  
 24 **Q.** In this section it's stated that the TDS  
 25 value of the Broom Creek measured from the Milton

365

1 Flemmer 1 was used as the input for the numerical  
 2 simulation. Can you explain why the Milton Flemmer  
 3 1 sample was chosen out of the three?  
 4 **A.** Yes. So the Milton 1 sample was the --  
 5 the meeting of the three values. We selected that  
 6 as it was a site-specific value close to what could  
 7 be considered an average between the three.  
 8 **Q.** And could you explain what effect the TDS  
 9 input would have on the CO<sub>2</sub> plume?  
 10 **A.** Yeah. A higher TDS could potentially  
 11 result in a smaller plume.  
 12 **Q.** Similarly, it's stated that the  
 13 temperature and pressure gradients derived from the  
 14 Milton Flemmer 1 were used in the simulation.  
 15 Similarly the reasoning behind why the Milton  
 16 Flemmer 1 was chosen?  
 17 **A.** One of the reasons being wanting to apply  
 18 the same reservoir conditions associated with the  
 19 salinity value.  
 20 **Q.** And could you explain what effect  
 21 temperature has on the CO<sub>2</sub> plume? Movement, to  
 22 clarify.  
 23 **A.** A difference in temperature could result  
 24 in either a larger or smaller plume.  
 25 **Q.** So let's say like an increase in

366

1 temperature.  
 2 **A.** I can't recall at the moment. I could  
 3 provide that answer potentially after a break.  
 4 **Q.** You had noted earlier that the CO<sub>2</sub> stream  
 5 used in the geochemical modeling was done at  
 6 95 percent CO<sub>2</sub> and 2 percent oxygen to be more  
 7 conservative because oxygen is likely what's going  
 8 to be most reactive. Could you explain  
 9 additionally -- so in earlier testimony with group  
 10 one, they had stated that the minimum requirement  
 11 for the CO<sub>2</sub> purity would be 95 percent to be able to  
 12 take CO<sub>2</sub> from sources to send to these storage  
 13 facilities. Can you explain why in the numerical  
 14 simulation 98.25 percent was used instead of  
 15 95 percent? 95 percent being the minimum cutoff  
 16 for Summit to take CO<sub>2</sub> from third-party sources.  
 17 **A.** Just to clarify, that's what Wade  
 18 testified to, 95 not 98.  
 19 **Q.** Correct. But the model uses  
 20 98.25 percent. I'm just asking why 98.25 percent  
 21 was used in the numerical simulation.  
 22 **A.** Sure. So 98 percent is the expected  
 23 operational composition.  
 24 **Q.** And could you just explain what effect CO<sub>2</sub>  
 25 purity also has on the CO<sub>2</sub> plume movement? So like

367

1 a higher CO<sub>2</sub> purity would have what influence on CO<sub>2</sub>  
 2 plume movement?  
 3 **A.** In this case because of the compositions  
 4 where we're talking about, the potential would be  
 5 changes in plume size, but they -- it would be very  
 6 minimal.  
 7 **Q.** As proposed well injectors are drilled, so  
 8 for the three applications the six injectors  
 9 haven't been drilled yet. As they are drilled and  
 10 logging and coring and testing data is gathered,  
 11 that planned to be incorporated into the geologic  
 12 model and an updated simulation ran prior to  
 13 starting injection?  
 14 **A.** I don't know specific plans to update the  
 15 model, but I believe regulations require validation  
 16 of the proposed model inputs with the injection  
 17 well data, including the injection test that's  
 18 required for each injection well.  
 19 **Q.** So to confirm, if -- if the results  
 20 indicated a substantial change and the regulatory  
 21 group requested that it be done, at that time it  
 22 would likely be done?  
 23 **A.** By the regulatory group you mean the DMR?  
 24 **Q.** DMR.  
 25 **A.** Yes, we would.

368

1 **Q.** At what frequency will plume predictions  
 2 be updated once operations are underway?  
 3 **A.** No less than every five years.  
 4 **Q.** So I'd like to go to Figure 3-6 on  
 5 page 3-10 in the TB Leingang application.  
 6 **A.** I'm there.  
 7 **Q.** For all of the applications when showing  
 8 the permeability curves used for siltstone and  
 9 anhydrite, they were used equivalently. Could you  
 10 explain why you're using the same? So to clarify,  
 11 can you explain why the same permeability curve is  
 12 used for siltstone and anhydrite?  
 13 **A.** Sure. That's related in part to the core  
 14 analysis sampling and the data points available.  
 15 Because siltstone and anhydrite are expected to be  
 16 low permeability and porosity lithologies, we felt  
 17 it was sufficient to apply this data set to both  
 18 lithologies in the model.  
 19 **Q.** So I'd like to move to Table 3-5 on  
 20 page 3-35.  
 21 **A.** I'm there.  
 22 **Q.** So for all of the applications when having  
 23 this table shown for the EPA Method 1, you are  
 24 using the proposed locations of one of the  
 25 injection wells, being the TB Leingang 1, the BK

369

1 Fischer 1 and the KJ Hintz 1. Considering these  
2 wells haven't been drilled yet, can you explain how  
3 these values are derived?

4 **A.** Sure. So these values are taken from the  
5 geologic model and the simulation model.

6 **Q.** And can you explain why it was chosen to  
7 use these rather than the three stratigraphic test  
8 wells?

9 **A.** Given that we modeled to populate these,  
10 you'll note that, for example -- so I'd -- just  
11 trying to find a map I'd like to point you to. So  
12 I'd like to point you to page 3-22. So here is a  
13 map of the -- the average pressure change after  
14 20 years of injection. Again, the AOR was defined  
15 using pressure data from the simulations. If you  
16 look at -- here in this case the green triangle  
17 represents the injection well and just to the  
18 southwest of that, that gray triangle represents  
19 the Milton Flemmer well, and you can see that there  
20 is a large difference in pressure between those two  
21 locations. So in that sense it was more  
22 appropriate to use data from the injection well  
23 location to be able to evaluate pressure change.  
24 **MS. MADCHE:** That is all the questions I  
25 have. Thank you.

370

**EXAMINATION**

2 **BY MR. STOLL DORF:**

3 **Q.** Moving on to Section 4, I have some  
4 questions about locations. If you guys can't  
5 answer these, just let me know who can. Start on  
6 page 4-4, Figure 4-2. Just an AOR map showing  
7 occupied structures, among other things. How far  
8 exactly -- or approximately how far away from the  
9 facility are -- are occupied structures?

10 **MR. BENDER:** We have another witness who  
11 can provide that unless you know.

12 **MR. STOLL DORF:** Do you know who just so I  
13 know who to ask?

14 **MR. BENDER:** It will be Jimmy Powell.

15 **MR. STOLL DORF:** Jimmy.

16 **Q.** (MR. STOLL DORF CONTINUING) For the TB  
17 Leingang, BK Fischer and KJ Hintz wells, have any  
18 baseline samples been taken from these wells to  
19 date?

20 **A.** (BY MS. OLSEN) Not in this part of the  
21 Summit project.

22 **Q.** Okay.

23 **A.** Water -- Fox Hill -- you mean groundwater  
24 monitoring wells; correct?

25 **Q.** Correct.

371

1 **A.** Yep.

2 **Q.** This one is just related to the KJ Hintz  
3 facility area of review. The Raymond Jensen 1-34  
4 well, File No. 4942, is a plugged and abandoned  
5 well within that facility. Can you briefly explain  
6 the protective measures that are being made to  
7 monitor the CO<sub>2</sub> plume movement near that well?

8 **A.** 3D seismic surveys will be taken at least  
9 every five years as part of the testing and  
10 monitoring plan to track the plume. And at or  
11 around year 19, Summit proposes putting in an  
12 additional groundwater monitoring well in the Fox  
13 Hills Formation nearby that legacy wellbore.

14 **Q.** Do you know how -- approximately how  
15 close?

16 **A.** I don't think the final location has been  
17 determined yet.

18 **MR. STOLL DORF:** Okay. That's all I have.

**EXAMINATION**

20 **BY MR. SUGGS:**

21 **Q.** Okay. Bear with me. A lot of my  
22 questions have been asked at different levels, so  
23 I'm going to have to pan through this as I go.

24 But I'm also going to start with a couple  
25 of questions that were deferred. One being the --

372

1 looking at Figure 1-1 on 1-2 -- on page 1-2 of the  
2 Leingang application. Okay. I'll start with the  
3 odd shape of the CO<sub>2</sub> plume as it exists in the  
4 modeled stabilized CO<sub>2</sub> extent. Is there any  
5 explanation for why we don't see CO<sub>2</sub> in that central  
6 area, the southwest central area?

7 **A.** (BY MS. DOUGLAS) Yeah. In this region of  
8 the model, we had low porosity and permeability  
9 layers. That's why you don't see predicted  
10 migration of CO<sub>2</sub> plume there.

11 **Q.** The low PHIE and perm, I guess, layers  
12 that exist in that area, were they arbitrarily --  
13 and when I say "arbitrarily," just purely due to  
14 the variograms were they assessed or was there  
15 additional seismic evaluation that supported that  
16 low porosity/perm area?

17 **A.** There is additional seismic data that was  
18 used as control points and to -- to support the  
19 distribution of properties, but it should be noted  
20 that seismic data has resolution images for  
21 resolving thicknesses of different porosity and  
22 permeability layers, so there's potentially some  
23 uncertainty.

24 **Q.** Okay. So I guess in that explanation, did  
25 it just -- I'm going to tie this back to some of

373

1 the discussion on the depositional environment.  
 2 Would the seismic in that area indicate it was  
 3 partially interdunal or do you see the dune  
 4 structures there or not?  
 5 **A.** Correct. That would suggest the low  
 6 porosity and permeabilities typically associated  
 7 with those interdunal dolomites as well as  
 8 anhydrite deposits.  
 9 **Q.** Okay. And then I asked this as well  
 10 earlier, but in Township 141 North, Range 88 West,  
 11 Section 35, you'll note that on this exhibit, at  
 12 least, the stabilized CO<sub>2</sub> plume extent does appear  
 13 to contact the storage facility area border. Do  
 14 you know what the distance is between there? What  
 15 kind of buffer is applied at approximately around  
 16 that area?  
 17 **A.** Yes. So regarding the stabilized CO<sub>2</sub> plume  
 18 extent, it's a short distance, you know, on the  
 19 order of 10 feet, but I would like to point out the  
 20 red line is the CO<sub>2</sub> extent at the end of injection.  
 21 So we feel that that buffer is reasonable, and we  
 22 will, you know, reevaluate the predicted plume  
 23 movement and our storage facility area boundaries  
 24 no less than every five years to confirm that.  
 25 **Q.** So just to clarify, the red line is the

374

1 extent of the CO<sub>2</sub> migration at the end of the  
 2 20-year injection cycle?  
 3 **A.** Correct.  
 4 **Q.** And the gray that goes outside of that  
 5 would be where the model is predicting that CO<sub>2</sub> to  
 6 migrate during a ten-year postinjection phase?  
 7 **A.** Correct.  
 8 **Q.** Okay. Moving on to Sections 2 and 3, on  
 9 page 2-17 -- I've got to get there myself. The  
 10 narrative right above the figure indicates that the  
 11 net sandstone thickness in the simulation model  
 12 area ranges from 6 feet to 397 feet with an average  
 13 of 140 feet. Can you point me at -- somewhere on  
 14 the figure below, Figure 2-10a where it would  
 15 approach 6, or is that a typo in any way?  
 16 **A.** I believe the typo should say -- I believe  
 17 those values are from the geologic model extent,  
 18 not the simulation model extent, so that is an  
 19 error.  
 20 **Q.** Okay. So that wouldn't be -- so what  
 21 should that read, then?  
 22 **A.** Because it's sandstone thickness, I'd have  
 23 to calculate that from the model. I can't derive  
 24 that from the thickness map.  
 25 **Q.** I guess looking at the isopach of the

375

1 Broom Creek, then, do you see anywhere on that map  
 2 that you're presenting where the thickness would  
 3 approach 6 feet? I mean in glancing at it, I  
 4 thought the -- the thinnest that was represented  
 5 was on the order of a hundred feet.  
 6 **A.** Yes. That's why I believe that that's an  
 7 error. It should say those values are from the  
 8 geologic model extent where the Broom Creek  
 9 actually --  
 10 **Q.** Oh.  
 11 **A.** -- does pinch out, not the simulation  
 12 model.  
 13 **Q.** Got you. So not the simulation, but the  
 14 whole --  
 15 **A.** Correct.  
 16 **Q.** -- geologic?  
 17 **A.** So that -- I believe that sentence is in  
 18 error.  
 19 **Q.** And that'd be where it would punch out to  
 20 the northeast and the Broom Creek wouldn't exist --  
 21 **A.** Correct.  
 22 **Q.** -- far northeast of the whole model area?  
 23 **A.** Correct.  
 24 **Q.** Okay. Page 2-22. At the bottom of that  
 25 page you indicate that there's, I guess, a sample

376

1 bias towards the sandstones that were sampled.  
 2 Does that sample bias affect the overall model in  
 3 any way?  
 4 **A.** No. So the core samples were used to  
 5 calibrate petrophysical logs of porosity --  
 6 calculated porosity and permeability, and those  
 7 logs were what were used to help derive model  
 8 properties. So I -- I don't believe that that bias  
 9 impacted the model in a significant fashion.  
 10 **Q.** Figure 2-16 on page 2-25.  
 11 **A.** I'm there.  
 12 **Q.** At the very top of the Broom Creek here,  
 13 you have an anhydrite facies identified in column 7  
 14 on that figure. And then in column 8 when you  
 15 upscale those for the modeling purposes, it's being  
 16 applied the siltstone facies. Is there any effect  
 17 on the modeling due to that or is there a reason  
 18 that was applied instead of the anhydrite facies?  
 19 **A.** There is not an effect of that. Both the  
 20 anhydrite and siltstone are populated as low  
 21 porosity and permeability.  
 22 **Q.** So functionally they both act as confining  
 23 layers in the modeling?  
 24 **A.** That's correct.  
 25 **Q.** That drives me to the geochemical side of

377

1 this so I'm going to jump probably largely over  
 2 into Appendix C, but bear with me. The -- the  
 3 narrative -- so I'm looking at C-15 and 16 here --  
 4 or sorry -- Figures C-15 and 16. I think I'm on  
 5 C-12.  
 6 **A.** Figure C-15 and 16 or page --  
 7 **Q.** So the narrative that I'm asking about is  
 8 on page C-12 where you reference Figures C-9 and  
 9 10, which those figures are on pages C-15 and C-16.  
 10 **A.** Okay.  
 11 **Q.** This narrative indicates that dolomite is  
 12 the primary entity in dissolution and that  
 13 anhydrite is precipitating it. I just want to  
 14 confirm that.  
 15 **A.** That's correct.  
 16 **Q.** Okay. So in previous applications, the  
 17 anhydrite has been identified as a primary  
 18 dissolving element in those models, in those  
 19 geochemical analyses. So I guess my questions here  
 20 are what is different about the modeling that was  
 21 done here or the chemistry of the water or the  
 22 chemistry of the rock that is causing anhydrite to  
 23 be a precipitant instead of a dissolving --  
 24 **A.** I don't have that answer readily  
 25 available.

378

1 **Q.** Is that something that may be provideable  
 2 in short term or is that something I might need a  
 3 supplemental response on?  
 4 **A.** I could potentially provide it after a  
 5 break.  
 6 **Q.** Okay. I guess I'll -- I guess I'll ask  
 7 that if it's not something that can be answered in  
 8 testimony after a break, that it would be submitted  
 9 as explanation in supplemental.  
 10 **A.** Okay.  
 11 **Q.** Still on C-12 here -- bear with me. So  
 12 actually on page C-14, Figure C-8. In this figure,  
 13 the bottom figure, shows that mineral trapping is  
 14 still on the negative side of the equation so more  
 15 dissolution has taken place than precipitation at  
 16 this point through the extent of what's presented  
 17 on this figure; correct?  
 18 **A.** Yes. So what this figure is showing is  
 19 why there's negative amount for mineral trapping.  
 20 It's because of that dolomite being dissolved and  
 21 that those dissolved carbonates are being  
 22 attributed to as carbon that was added into the  
 23 system.  
 24 **Q.** Okay. In previous testimony you indicated  
 25 that it would be on the order of hundreds of years

379

1 before true mineralization started happening for CO<sub>2</sub>  
 2 in the storage reservoir. Have you projected that  
 3 out? Do you know a rough time frame when that  
 4 negative trend starts moving the other way?  
 5 **A.** We have not modeled that.  
 6 **Q.** Okay. C-18.  
 7 **A.** Maybe just one point very quickly. Sorry,  
 8 we're going back to Figure C-8. You can see by the  
 9 slope of the curve, after CO<sub>2</sub> injection ends, we  
 10 have less of that mineral trapping and that slows  
 11 down over time.  
 12 **Q.** But you still haven't taken it to the  
 13 point of when that actually reverses? It's just --  
 14 **A.** That's correct.  
 15 **Q.** -- expected or anticipated that it does  
 16 reverse?  
 17 **A.** Correct.  
 18 **Q.** Okay. Going on to page C-18, the -- the  
 19 narrative here for your PHREEQC model, and you've  
 20 testified to this earlier, that you used the  
 21 diffusion process for the mechanism by which the CO<sub>2</sub>  
 22 would enter. And, conversely, if you look at later  
 23 in the -- in the appendix when you're talking about  
 24 the lower confining zone and the simulation that  
 25 was done there, you're talking about advection and

380

1 dispersion. Can you elaborate a little bit on why  
 2 the two different mechanisms are used for the two  
 3 different confining zones?  
 4 **A.** Yes. So diffusion was used for the upper  
 5 confining zone as CO<sub>2</sub> is a buoyant fluid which is --  
 6 so CO<sub>2</sub> is a buoyant fluid which is why we needed to  
 7 use advection and dispersion which allowed the CO<sub>2</sub>  
 8 to dissolve in -- in -- in brine and the density to  
 9 allow it to enter the model cells for the lower  
 10 confining zone.  
 11 **Q.** So for the lower confining zone -- sorry,  
 12 I'm going to have to ask you to clarify that.  
 13 Focus on why diffusion was used for the upper  
 14 confining zone modeling.  
 15 **A.** I don't think I can elaborate and provide  
 16 that specific answer at this time, but I could  
 17 potentially provide it after a break.  
 18 **Q.** Okay. Probably the same situation, if I  
 19 don't get that answer as part of testimony, I might  
 20 want it as a supplemental.  
 21 **A.** Correct. We would be able to provide  
 22 that.  
 23 **Q.** Page C-18 still. The formation brine for  
 24 the simulation that was done on the Opeche and as  
 25 well as the -- or the Opeche/Spearfish as well as

381

1 what was done on the Amsden for the lower confining  
2 zone, in both cases you used the brine composition  
3 as it was determined from Broom Creek samples?  
4 **A.** That's correct.  
5 **Q.** Can you elaborate on why?  
6 **A.** Just let me confirm something real  
7 quickly.  
8 So it's my understanding given the  
9 porosity and permeability of at least the  
10 Opeche/Spearfish, we weren't able to collect a  
11 fluid sample due to the immobility of the water due  
12 to low permeability. Therefore, we used the Broom  
13 Creek as a representative sample as we don't  
14 believe the composition will vary greatly.  
15 **Q.** Okay. Still on page C-18, Table C-4 the  
16 average mineral composition of the Opeche/Spearfish  
17 that was used here, can you confirm which facies  
18 within the Spearfish that would represent -- or the  
19 Opeche/Spearfish?  
20 **A.** This sample -- the average sample here is  
21 approximately 60 percent mineral weight anhydrite,  
22 so I'd interpret that as anhydrite.  
23 **Q.** On page C-19, middle paragraph there when  
24 you're discussing Figure C-13, you indicate that  
25 the net change due to precipitation or dissolution,

382

1 in this case you're referencing C2, which is a cell  
2 within the model that was done, has less than 5  
3 kilograms per cubic meter net change. That net  
4 change, is that positive or negative?  
5 **A.** I'd have to clarify how that was  
6 calculated and provide that as a supplement.  
7 **Q.** I don't think I could confirm or  
8 guesstimate with the figure in front of me which  
9 way that would be going, so if we could confirm  
10 that as well.  
11 **A.** Yep. We could provide that as a  
12 supplement.  
13 **Q.** Page C-25, similar question. This happens  
14 to be the -- Table C-6 on page C-25 -- averaged  
15 mineral composition for the Amsden formation that's  
16 being presented in this table. Could you elaborate  
17 and confirm which facies that were represented in  
18 your modeling?  
19 **A.** I'd characterize that as a -- well, it  
20 would be represented as a dolostone in our model.  
21 **Q.** Okay. I guess a similar question on page  
22 C-28. The narrative at the -- in the bottom  
23 paragraph, again you're referencing an overall net  
24 porosity change as less than 2 percent. And can  
25 you tell me whether that's a positive change or a

383

1 negative?  
2 **A.** I would like to provide that as a  
3 supplement.  
4 **Q.** Okay. Then back up to Section 3,  
5 page 3-7, I believe. The bottom paragraph on page  
6 3-7 you discuss the distances from the edge of the  
7 model and the volume modifiers that were applied as  
8 boundary conditions. Can you spend just a few  
9 moments confirming what those distances are  
10 measured from and to within the model? And then --  
11 well, I'll let you do that first.  
12 **A.** So those distances are measured from the  
13 Broom Creek extent interpreted by the EERC which is  
14 shown on page 2-16 in Figure 2-9.  
15 **Q.** So the distance you're referencing there  
16 is the distance from the edge of the Broom Creek to  
17 the edge of the modeled area?  
18 **A.** To the edge of the simulation modeled --  
19 **Q.** The whole simulation.  
20 **A.** -- area. That is correct.  
21 **Q.** Okay. And then when applying your volume  
22 modifiers as boundary conditions, can you elaborate  
23 on what the effect of those are within the model?  
24 **A.** Yes. So we applied the volume modifiers  
25 to represent the fact that we don't have an

384

1 infinitely acting aquifer where the Broom Creek  
2 pinches out. Because we don't have an infinitely  
3 acting aquifer, there will be differences in how  
4 pressure responds in the reservoir due to that  
5 pinch-out. And so these modifiers were applied to  
6 take into account that difference in boundary  
7 condition between an infinitely acting aquifer and  
8 the closed boundary.  
9 And so the volume modifier is used in the  
10 CMG calculations with the boundary condition to  
11 account for the specific distance beyond the model  
12 where that pinch-out occurs, and so that is  
13 accounted for with the boundary conditions as it  
14 relates to the simulated pressure.  
15 **Q.** So the -- the cell -- the modifier being  
16 applied to a boundary cell allows -- allows that  
17 cell to act as if it has a larger volume than its  
18 individual cell size?  
19 **A.** That's correct. To allow the  
20 computational simulator to account for how that  
21 pressure would respond outside of the model.  
22 **Q.** So the smaller values have less distance  
23 or less volume in the reservoir in that  
24 direction --  
25 **A.** Correct.

385

1 Q. -- towards a pinch-out or towards a  
2 boundary of the -- the -- I guess the Broom Creek  
3 as a whole as opposed to what's actually simulated  
4 within the model?

5 A. That's correct.

6 Q. So this was asked a little bit, so I'm on  
7 page 3-8, the description your capillary pressure  
8 curves, and you indicate that they were derived  
9 from mercury capture -- mercury injection capillary  
10 pressure testing on the cores; right?

11 A. Correct.

12 Q. But then that they were modified. Can you  
13 elaborate on the need why they were -- why it was  
14 necessary to modify those core-derived values and  
15 what that process looked like?

16 A. So those values were calculated using data  
17 for -- from a single sample, so we looked at the  
18 porosity and permeability from that sample to  
19 upscale it to the ranges of the porosity and  
20 permeability reflected in our model.

21 Q. Okay. When you say that, was that -- when  
22 you say the single sample, you're referring to the  
23 single sample that was used to derive the two  
24 confining zones, being anhydrite facies values and  
25 siltstone facies values, or am I -- yeah, siltstone

386

1 and anhydrite.

2 A. We took capillary entry pressure data from  
3 a single sample from those units to derive these  
4 curves.

5 Q. Okay. And so, I guess, the modification  
6 of that mercury -- mercury-injection-derived data  
7 to be representative for CO<sub>2</sub> injection, what was  
8 done to, I guess, adjust the mercury fluid  
9 properties to the CO<sub>2</sub> fluid properties?

10 A. I could provide that answer after a break.

11 Q. Okay. Same, I guess, question or same  
12 response, then, if it's something that doesn't come  
13 as part of direct testimony, we'll want  
14 supplemental explanation for it.

15 Down in the AOR page 4-14, it was actually  
16 referenced in a number of locations, including on  
17 page 4-12 in Table 4-6, but there's a reference  
18 that's being used to the Tongue River Formation for  
19 a freshwater aquifer. I just -- I guess I'm just  
20 going to point out and confirm that Tongue River  
21 isn't a formation recognized on the North Dakota  
22 stratigraphic column at this time. There's an RI  
23 59 -- Report of Investigation 59 that was published  
24 in 1977 that proposed renaming the Tongue River and  
25 the Ludlow as they correlate from Montana and

387

1 Wyoming to the Slope and -- drawing a blank on the  
2 other one and I don't have it written here -- but  
3 rename those two formations. The Tongue River as  
4 you're referencing here would be equivalent to  
5 those two formations that are represented on the  
6 geologic strat column in North Dakota; correct? Or  
7 can we confirm that?

8 A. (BY MS. OLSEN) We can confirm that.

9 Q. Okay. On page 4-16, there's a line here  
10 in your narrative that reads, "The Pierre Formation  
11 is the thickest shale formation in the AOR and  
12 primary geologic barrier between the USDWs and the  
13 injection zone."

14 The primary barrier would be the upper  
15 confining zone; correct?

16 A. (BY MS. DOUGLAS) That's correct. So  
17 that's a misstatement.

18 Q. It would just be an additional barrier --

19 A. Correct.

20 Q. -- of significant thickness as what's  
21 indicated?

22 A. Yeah. We -- we consider it as a tertiary  
23 confining zone because there's the primary  
24 confining zone, a secondary confining zone, and  
25 then we consider the -- everything between the

388

1 Inyan Kara Formation and the Fox Hills as a  
2 tertiary confining zone.

3 Q. One last item I'm going to jump -- it kind  
4 of mixes between the AOR and the -- and Section 3.  
5 It's actually on 3-42 I think where the --  
6 page 3-42 where the narrative is. Right at the  
7 bottom of this page there's a statement,  
8 "Therefore, the AOR is delineated as the storage  
9 facility area plus a 1-mile buffer."

10 This immediately follows a discussion of  
11 the risk-based AOR approach that was taken, but the  
12 one-mile buffer that's applied for that AOR, is  
13 that -- is there any importance to the one mile  
14 that's being used or is that just a value that is  
15 chosen?

16 A. I can confirm during break, but to my  
17 understanding, that the AOR at a minimum has to be  
18 the storage facility area plus a one-mile buffer,  
19 but I will confirm that my understanding is correct  
20 during the break.

21 MR. SUGGS: Okay. That'll be all I've got  
22 on these sections.

23 HEARING EXAMINER GARNER: Okay. At this  
24 time why don't we take a break for lunch for an  
25 hour.

389

1 (Recessed at 12:29 p.m. and reconvened at  
2 1:30 p.m.)  
3 HEARING EXAMINER GARNER: Okay. We are  
4 back on the record.  
5 Attorney Bender, how would you like to  
6 proceed? Are we going to answer some questions  
7 that were pending?  
8 MR. BENDER: Yes. I don't know if I  
9 should say we'll recall -- we'll bring back Amanda  
10 Douglas who -- and there were some questions posed  
11 for her and she said she needed a little time  
12 during the break to research those answers. What  
13 we were proposing, perhaps to save some time, is  
14 she can read what she believes to be the question  
15 and then she can give the answer. And then there  
16 was a question or two also that Caitlin Olsen got  
17 that needed a little time to respond to. So I can  
18 just ask Amanda a few questions and proceed that  
19 way, if that's okay with you, Mr. Examiner.  
20 HEARING EXAMINER GARNER: Is that okay?  
21 That's fine.  
22 **REDIRECT EXAMINATION**  
23 **BY MR. BENDER:**  
24 Q. All right. Amanda, before we took the  
25 break, when you were answering some questions that

390

1 were posed to you by the Commission staff, I  
2 believe it was your testimony that if you had a  
3 little time during the break, you could take a look  
4 at some of your notes and some of the documents you  
5 have and respond to those questions; is that  
6 correct?  
7 A. (BY MS. DOUGLAS) That's correct.  
8 Q. Do you want to just walk through the  
9 questions as you understood them and then provide  
10 us with the responses?  
11 A. Yes.  
12 Q. Okay.  
13 A. With respect to the projection system  
14 used, it was NAD27 North Dakota State Plane South  
15 U.S. feet.  
16 The Commission had a question about  
17 generally how would having a higher reservoir  
18 temperature impact plume size. So it should be  
19 noted that temperature isn't the main driver in  
20 dictating plume size. There's other parameters  
21 that are more sensitive or the -- the -- the CO<sub>2</sub>  
22 plume size is more sensitive to other parameters.  
23 But generally a higher temperature could result in  
24 a bigger plume.  
25 I had a question on why we saw

391

1 precipitation of anhydrite and dissolution of  
2 dolomite and what constituents in the water  
3 chemistry or the mineralogy used for those models  
4 was different than previous permit submitted that  
5 would cause this. We would like to provide that  
6 answer as a supplement.  
7 I had questions about the transport  
8 mechanisms for the PHREEQC modeling. For the upper  
9 confining zone, diffusion is expected to be the  
10 dominant transport mechanism due to the buoyancy of  
11 the CO<sub>2</sub>. At the boundary between the reservoir and  
12 the confining zone, the reservoir will have a  
13 higher CO<sub>2</sub> concentration, so diffusion will allow  
14 the movement of gas from an area of high  
15 concentration to an area of low concentration.  
16 So with respect to advection and  
17 dispersion, these are the expected dominant  
18 transport mechanisms for the lower confining zone.  
19 So dispersion in the sense of the CO<sub>2</sub> mixing and  
20 forming saturated brine and that saturated brine  
21 mixing with unsaturated CO -- brine that's  
22 unsaturated with CO<sub>2</sub> and the different densities  
23 between the two and that mixing by dispersion, so  
24 between that and advection, those are the expected  
25 dominant transport mechanisms, and that's why those

392

1 were used for the lower confining zone.  
2 And there was a question on the use of  
3 MICP data and calculated relative permeability  
4 data, and we'd like to provide that as a  
5 supplement.  
6 Q. That's all you have? Those were the  
7 questions you received; is that correct? Those are  
8 the questions?  
9 A. Those are the questions I received. There  
10 is one more question that I received that Ms. Olsen  
11 will be providing the answer to.  
12 MR. BENDER: Mr. Examiner, unless there's  
13 other questions from the staff of Ms. Douglas, I  
14 would move to Ms. Olsen.  
15 HEARING EXAMINER GARNER: Okay. That's  
16 fine.  
17 Q. (MR. BENDER CONTINUING) Caitlin, can you  
18 recite for us what the question was that you're  
19 going to address for us now?  
20 A. (BY MS. OLSEN) Yeah. The first question,  
21 Rich, I believe you asked -- I don't remember the  
22 order in the questions, but you had asked about the  
23 nomenclature for some of those aquifers and namely  
24 the Tongue River. The new name that is more  
25 recently used is Bullion Creek, and so that is the

393

1 same formation. We're talking about the same thing  
 2 there, just to clarify.  
 3 And then the second question you had asked  
 4 about the AOR and the minimum one-mile buffer  
 5 outside of the storage facility area. That  
 6 language comes from 43-05-01-05 and it's -- that  
 7 language is outside throughout that rule, and it  
 8 references it -- the area several times. And just  
 9 to give an example, it will say something like the  
 10 evaluation must do X, Y, Z in the facility area and  
 11 within one mile of its outside boundaries.  
 12 So the AOR, when we talk about reviewing  
 13 wells and items inside of the AOR, is the storage  
 14 facility area and one-mile boundary pursuant to  
 15 43-05-01-05.  
 16 MR. BENDER: Okay. If there's no  
 17 questions from the staff, Mr. Examiner, we're ready  
 18 to move forward with our next witness as we talked.  
 19 Oh, I'm sorry.  
 20 MR. SUGGS: I did have a couple questions  
 21 that weren't addressed.  
 22 **FURTHER EXAMINATION**  
 23 **BY MR. SUGGS:**  
 24 Q. The net positive or net negative?  
 25 A. (BY MS. DOUGLAS) I had stated earlier

394

1 that we'd like to provide those, too, as  
 2 supplements.  
 3 Q. Okay. As a supplement still. Okay. And  
 4 then I apologize, but I did have one set of  
 5 questions that I forgot to hit and I have to find  
 6 it again in my notes. Page 2-66.  
 7 MR. BRAATEN: Of Exhibit 1A?  
 8 MR. SUGGS: Yes.  
 9 MR. BRAATEN: Thank you.  
 10 Q. (MR. SUGGS CONTINUING) And I guess the  
 11 narrative actually starts on page 2-65 regarding  
 12 your Mohr-Coulomb Critical Stress Analysis of  
 13 Faults. The faults that you have depicted in  
 14 Figure 2-42, can you identify what depths those  
 15 were identified at or what range of -- there's been  
 16 testimony that there's no faults in the injection  
 17 reservoir or the confining zones. So where are  
 18 these faults coming from? How were they  
 19 identified?  
 20 A. Yes. So the 3D seismic survey acquired  
 21 over the project area led to the identification of  
 22 several deep faults within the storage -- all three  
 23 storage facility areas. These faults originate  
 24 within the Precambrian basement and all of them  
 25 terminate below the top of the Interlake Formation,

395

1 which is approximately 3,000 feet below the Broom  
 2 Creek Formation.  
 3 Q. So they're all deep --  
 4 A. Correct.  
 5 Q. -- features?  
 6 Okay. And those are some of the items  
 7 that are identified or at least visibly  
 8 identifiable on Figure 2-41 on page 2-64?  
 9 A. That's correct.  
 10 MR. SUGGS: Okay. Thank you.  
 11 MR. BENDER: Okay. Mr. Examiner, if there  
 12 aren't any further questions, our plan now is to  
 13 call four new witnesses, and then we will recall  
 14 Caitlin Olsen to do the comparison between what  
 15 we've discussed in great detail, which is the  
 16 Leingang with the Fischer and the Hintz. And then  
 17 we're going to recall Wade Boeshans to talk about  
 18 the amendment that the Commission received a letter  
 19 on from Minnkota.  
 20 HEARING EXAMINER GARNER: Okay.  
 21 MR. BENDER: So our first witness will be  
 22 James Powell.  
 23 HEARING EXAMINER GARNER: Mr. Powell,  
 24 please raise your right hand.  
 25

396

1 **JAMES POWELL,**  
 2 being first duly sworn, was examined and testified  
 3 as follows:  
 4 **DIRECT EXAMINATION**  
 5 **BY MR. BENDER:**  
 6 Q. You go by Jimmy; is that correct?  
 7 A. Yes, sir.  
 8 Q. Will you state your full name for the  
 9 record?  
 10 A. James Earnest Powell.  
 11 Q. And, Jimmy, by whom are you employed?  
 12 A. Summit Carbon Solutions.  
 13 Q. And in what capacity?  
 14 A. Chief operating officer.  
 15 Q. What I'd like you to do is briefly  
 16 highlight for the examiner, Commission staff and  
 17 opposing counsel your educational background and  
 18 work experience.  
 19 A. Okay. I have a bachelor of science in  
 20 engineering, and I have about 35 years of  
 21 experience in the energy industry, predominantly  
 22 upstream/midstream, with the last 25 leading large  
 23 projects such as this, both internationally and in  
 24 the U.S.  
 25 Q. Okay. So I'm just going to have a

397

1 question or two for you having to do with  
 2 engineering and operational design. To what  
 3 standard will the flowlines be constructed?  
 4 **A.** The flowlines, like the remainder of the  
 5 pipeline system, will be constructed -- designed,  
 6 constructed and operated in accordance with DOT  
 7 regulations, CFR 49, 195.  
 8 **Q.** Okay. And can you explain how the three  
 9 entities that have made application for the storage  
 10 permits are going to work together and monitor this  
 11 system and utilize the data that's provided  
 12 throughout the SCADA system?  
 13 **A.** Yeah. So from receipt of the CO<sub>2</sub> molecules  
 14 at the capture facilities through transportation of  
 15 the pipeline system and through -- to the  
 16 sequestration system to the injection site and  
 17 subsurface, it will all be operated as one  
 18 integrated system under one supervisory control and  
 19 data acquisition system, and it will be controlled  
 20 from a single control center.  
 21 **MR. BENDER:** And, Mr. Examiner, after I  
 22 finish with a few questions of these other  
 23 witnesses, Mr. Powell will be available for  
 24 questions from the staff. So if I can move to the  
 25 next witness, I'll do so.

398

1 **HEARING EXAMINER GARNER:** Sure.  
 2 **MR. BENDER:** Next witness is John Hunt.  
 3 **HEARING EXAMINER GARNER:** Mr. Hunt.  
 4 Please raise your right hand.  
 5 **JOHN HUNT,**  
 6 being first duly sworn, was examined and testified  
 7 as follows:  
 8 **DIRECT EXAMINATION**  
 9 **BY MR. BENDER:**  
 10 **Q.** John, would you state your name for the  
 11 record, please?  
 12 **A.** (BY MR. HUNT) John Hunt.  
 13 **Q.** And, John, by whom are you employed?  
 14 **A.** By EERC.  
 15 **Q.** And in what capacity?  
 16 **A.** I'm a senior geoscientist and measurement  
 17 reporting verification, or MRV, specialist.  
 18 **Q.** And can you briefly provide for the  
 19 Commission staff your educational background and  
 20 work experience?  
 21 **A.** Sure. So I hold bachelor of science and  
 22 master of science degrees in geology. I'm a  
 23 licensed professional geologist. And prior to the  
 24 EERC, I worked at Chesapeake Energy as a petroleum  
 25 geologist.

399

1 **Q.** Okay. And you're going to talk just a  
 2 little bit about -- at least from questions from  
 3 me, about Section 5 of the application which is --  
 4 has to do with testing and monitoring; is that  
 5 correct?  
 6 **A.** That's correct.  
 7 **Q.** Okay. And my first question is can you  
 8 provide a brief summary of Table 5-2 in the  
 9 application?  
 10 **A.** Yes. So Table 5-2 begins on page 5-4 of  
 11 the TB Leingang application or Exhibit 1A. And let  
 12 me back up here just a little bit. So the testing  
 13 and monitoring plan, the full plan is laid out  
 14 between Tables 5-1, 5-2 and 6-1. So 5-1 being the  
 15 preinjection plan, 5-2 is the operational plan and  
 16 6-1 is the postinjection plan. We're hitting the  
 17 highlights of Table 5-2 simply because this makes  
 18 up the bulk of testing and monitoring and includes  
 19 all of the different various activities that Summit  
 20 will -- will perform.  
 21 And so let's -- yeah, again, let's go to  
 22 Table 5-2. This is an overview of the operational  
 23 testing and monitoring plan. And just to start us  
 24 off, a brief description of the -- of really what's  
 25 contained in this table. So if we're looking at

400

1 the columns and we're stepping left to right, we  
 2 see the first thing is the Monitoring Type. I'll  
 3 touch on that a little bit more in a minute, but  
 4 essentially, you know, whether it's a CO<sub>2</sub> stream or  
 5 surface facilities, the wellbores or the  
 6 environment, those generally make up the monitoring  
 7 types.  
 8 Then we step over and we have the  
 9 Parameter, so what parameters are we interested in  
 10 measuring. And then the next column describes the  
 11 activity that will collect those data. Then we  
 12 have the primary purpose of the activity listed,  
 13 the equipment and any tests associated with  
 14 gathering that data. The location where that data  
 15 will be gathered and a sampling frequency  
 16 described.  
 17 Finally, in the last three columns, we  
 18 have how that data -- what data will make its way  
 19 into the reporting to DMR. So we have the Report  
 20 Content, the Reporting Method and then the  
 21 Reporting Schedule specified.  
 22 So how I like to think about this plan  
 23 overall is you're really following the CO<sub>2</sub> stream as  
 24 it enters the sequestration facility, and you're  
 25 first and foremost analyzing the CO<sub>2</sub> stream in terms

401

1 of composition and end-to-end metering. So those  
 2 are some of the things highlighted in the rows  
 3 within the CO<sub>2</sub> Stream Analysis section. There's  
 4 also the Surface Facilities Leakage Detected --  
 5 Detection Plan as well as the Corrosion Prevention  
 6 and Detection Plan. Those generally at a high  
 7 level have already been touched on a little bit so  
 8 I won't go into great detail there.  
 9 And then we move to the wellbore sections.  
 10 Now the CO<sub>2</sub> stream has traveled through the surface  
 11 facilities and it's entered the wellbore, so here  
 12 we're primarily focused on activities that look at  
 13 monitoring wellbore integrity. So, for example,  
 14 pressure, temperature gauges, fiberoptic cable, all  
 15 of which provide continuous readings to monitor  
 16 the -- the operations of those wells, of the  
 17 injection wells.  
 18 And, finally, we have -- I guess  
 19 continuing on the wellbore monitoring part, we also  
 20 include a Downhole Corrosion Detection Plan, and  
 21 the key activity there is the pulse neutron log  
 22 which is also feeding into the wellbore mechanical  
 23 and integrity piece where we have periodic pulse  
 24 neutron logs planned to be acquired throughout the  
 25 life of the project.

402

1 And then, finally, the -- so now we've  
 2 injected the CO<sub>2</sub> into the storage reservoir and what  
 3 we're interested in is monitoring the volume in a  
 4 targeted way as that CO<sub>2</sub> expands within the storage  
 5 reservoir and ultimately that volume contained  
 6 within the area of review boundary. So we have a  
 7 Near Surface monitoring plan, which is primarily  
 8 made up of soil, gas and groundwater -- I guess  
 9 wholly made up of soil, gas and groundwater  
 10 sampling, and then an Above-Zone Monitoring  
 11 Interval, which is defined as the Opeche/Spearfish  
 12 to the Skull Creek. Again, pulse neutron logging  
 13 for logging saturations, and then the fiberoptic  
 14 cable to look at temperature.  
 15 And -- and then, finally, we end with the  
 16 monitoring of the storage reservoir itself which,  
 17 again, will be conducted with the fiberoptic cable  
 18 to monitor the temperature profile of the storage  
 19 reservoir as well as casing-conveyed pressure  
 20 temperature gauges on the injection wells and --  
 21 and also a downhole pressure temperature gauge  
 22 installed in the reservoir monitoring well. And  
 23 then we have planned 3D seismic surveys as has been  
 24 testified to a little bit prior to this point, as  
 25 well as a plan for monitoring seismicity with a

403

1 surface array of seismometers.  
 2 MR. BENDER: No further questions of this  
 3 witness. And the next witness will be -- yeah,  
 4 next witness is going to be Jay Volk.  
 5 HEARING EXAMINER GARNER: Jay Volk. Mr.  
 6 Volk, please raise your right hand.  
 7 **JAY VOLK,**  
 8 being first duly sworn, was examined and testified  
 9 as follows:  
 10 **DIRECT EXAMINATION**  
 11 **BY MR. BENDER:**  
 12 Q. Jay, can you state your full name for the  
 13 record, please?  
 14 A. (BY MR. VOLK) Yes. Thank you, Lawrence.  
 15 Jay Volk.  
 16 Q. And, Jay, by whom are you employed?  
 17 A. Summit Carbon Storage.  
 18 Q. In what capacity?  
 19 A. I am the sequestration director of health,  
 20 safety, environmental.  
 21 Q. Okay. And can you provide for us briefly  
 22 your educational background and work experience?  
 23 A. Yes. Lawrence, I have a bachelor's  
 24 degree, master's degree and PhD -- PhD from North  
 25 Dakota State University. My PhD is in the

404

1 department of natural resources with range  
 2 sciences. My work history has largely been through  
 3 BNI Coal. Spent approximately 17 years there  
 4 working on permitting, compliance, testing and  
 5 monitoring, financial assurance plans and site  
 6 closures. The last two years I've been employed  
 7 with Summit Carbon Solutions working within the  
 8 Class VI regulations.  
 9 Q. You're going to have to slow down a little  
 10 bit.  
 11 A. I apologize. Thank you for the reminder.  
 12 Q. And, Jay, you're here today to discuss  
 13 Section 7, which is emergency and remedial response  
 14 plans; is that correct?  
 15 A. That is correct.  
 16 Q. As well as financial assurance which  
 17 appears in Section 12; is that correct?  
 18 A. That is correct.  
 19 Q. Okay. So you'll be able to handle  
 20 questions from the Commission staff on those two  
 21 subject areas; is that correct?  
 22 A. That is correct.  
 23 Q. Okay. Let me just ask you a question or  
 24 two, first with respect to emergency and remedial  
 25 response. Can you tell us generally what is the

405

1 purpose of emergency and remedial response plans?

2 **A.** Yes. Lawrence, the purpose of the ERRP in

3 Section 7 is really to provide guidance for a

4 quick, safe and effective response plan to keep the

5 community and -- community, workers and the

6 environment safe. Items that we look at included

7 in there are definitions and reviews of local

8 resources --

9 **Q.** Slow down a little bit.

10 **A.** I am sorry for a second time.

11 Looking at areas such as what are the

12 local resources in the areas, identification of

13 potential events, as well as the response to the

14 events.

15 **Q.** And can you explain for us, slowly, the

16 interactions that you've had with local first

17 responders in Oliver, Mercer and Morton Counties?

18 **A.** Yes. Our interactions between the three

19 counties have really included a multilayered

20 approach to outreach. We've engaged all three

21 counties with LEPC meetings. We've worked within

22 dispersion methodology of meetings. We've worked

23 individually with LEC portfolio holders, as well as

24 with local responders on an individual basis

25 through safety tours or landowner meetings.

406

1 **Q.** Okay. Jay, let's shift gears a bit and

2 talk a little bit about Section 12, which is

3 Financial Assurance Demonstration Plan. Can you

4 provide for us a brief overview of the

5 methodologies used to determine the financial

6 assurance? And if you have to direct the

7 Commission's attention to any part of the

8 application, that'd be great.

9 **A.** Thank you, Lawrence. And I would direct

10 you to Table 12 -- or excuse me -- 12-1 on

11 page 12-2. The methodology that we used in

12 developing the financial assurance plan really

13 consisted of known cost, which included areas such

14 as plugging in injection wells, the PISC -- the

15 PISC plans, testing and monitoring, as well as site

16 closures and the flowline abandonment sections.

17 Other areas we looked at were estimated

18 costs, and that was used to determine the ERRP as

19 well as endangerment to USDWs. We also looked at

20 previous literature as well as previous Class VI

21 permits in developing the financial assurance plan.

22 **Q.** Okay. And can you provide for us an

23 overview of the cost estimates associated with the

24 financial assurances?

25 **A.** Yes. So, again, referring to Table 12-1,

407

1 for the TB Leingang, the plugging and injection

2 well cost was 1,166,000. Likewise, the PISC

3 storage and facility monitoring was 4,225,000, as

4 well as the flowline plugged and abandoned at

5 243,000.

6 And, I apologize, I'd have to ask -- the

7 PISC and storage facility is 4,225,000 if I

8 misspoke on that. The ERRP is 11,100,000. And the

9 endangerment of USDW is 2,695,000. And that gives

10 a total of 20,316,000 between the three -- or

11 excuse me -- between the TB Leingang.

12 I do want to make a quick reference before

13 I move on to the other two sites is what is covered

14 by the surety bond versus pollution liability

15 policies is also outlaid in Table 12-1 in which the

16 plugging of injection wells, PISC storage facility

17 and monitoring, flowline plugged and abandonment

18 cost, as well a site closure and remediation will

19 be covered under a surety. Whereas, an ERRP as

20 well as the endangerment of USDWs, a pollution

21 liability policy will be used.

22 Again, there is minor differences between

23 SCS2 and SCS3 in which the total bond for SCS2

24 proposed is \$20,868,800 as well as the KJ Hintz at

25 \$20,817,800.

408

1 Cumulatively, the three are bonded at just

2 over \$62 million.

3 **MR. BENDER:** Mr. Examiner, that's all the

4 questions I have for this witness. We do have

5 another witness that we'd like to call at this

6 time, Jean Oddy.

7 **HEARING EXAMINER GARNER:** Ms. Oddy, please

8 raise your right hand.

9 **JEAN ODDY,**

10 being first duly sworn, was examined and testified

11 as follows:

12 **DIRECT EXAMINATION**

13 **BY MR. BENDER:**

14 **Q.** Jean, would you state your full name for

15 the record, please?

16 **A.** (BY MS. ODDY) Jean Oddy.

17 **Q.** And by whom are you employed?

18 **A.** Summit Carbon Solutions.

19 **Q.** In what capacity?

20 **A.** Sequestration project engineer.

21 **Q.** And could you briefly highlight for the

22 Commission staff your educational background and

23 work experience?

24 **A.** Yes. I have a bachelor of science in

25 petroleum engineering from Montana Technological

409

1 University. Before Summit I worked for Neset,  
 2 which is an engineering and geological consulting  
 3 firm, in which most of my responsibilities was  
 4 around drilling engineering, design and operations,  
 5 as well as plugging and abandonment projects in the  
 6 Williston Basin, including wells such as Class II  
 7 saltwater disposal wells. And I joined Summit last  
 8 year in January.

9 Q. Okay. And you're here to discuss any  
 10 questions the Commission staff might have about  
 11 well design, casing, cementing, plugging and  
 12 completion; is that correct?

13 A. That's correct.

14 Q. Okay. A question or two having to do with  
 15 well design and casing. Can you -- excuse me.  
 16 With respect to Section 9, can you describe the  
 17 well construction plan design? And if you have to  
 18 refer to a particular figure or exhibit, please do  
 19 so.

20 A. Yes. I'd like to direct your attention to  
 21 Figure 9-1 on page 9-2. So in this well  
 22 construction program, starting with the surface  
 23 section, the surface hole will be drilled with  
 24 freshwater-based drilling fluid down to a depth  
 25 within the Pierre Formation. Surface casing will

410

1 then be set and placed at least 50 feet below the  
 2 base of the lowest underground source of drinking  
 3 water. Surface casing will then be set and  
 4 cemented in place from the surface casing shoe all  
 5 the way to the surface of the ground to provide  
 6 isolation to and from the underground source of  
 7 drinking water.

8 Moving on to the next section, we've got  
 9 the long string casing, so that section will be  
 10 drilled and cored at specific intervals. And then  
 11 in accordance to Class VI regulations and  
 12 administrative code, corrosion resistant alloy  
 13 casing will be set in place to a depth below the  
 14 Broom Creek Formation which is in the Amsden. The  
 15 long string casing will then be cemented in place  
 16 with CO<sub>2</sub> resistant cement from the shoe all the way  
 17 through the Mowry Formation, then cemented to  
 18 surface.

19 MR. BENDER: Mr. Examiner, that's all the  
 20 questions I have for this witness.

21 I would point out that at this point in  
 22 time, given the space that we have here for  
 23 witnesses to sit, I would like to give the  
 24 Commission an opportunity to ask these witnesses  
 25 questions, and then also point out that we do have

411

1 two other individuals who are in the audience. And  
 2 in the event these witnesses have some questions  
 3 that they feel can be better answered by someone  
 4 else, I would bring those people up. One is Jamey  
 5 Backus, B-a-k-k-e-s [sic], and the other is Luis --  
 6 how do I pronounce that?

7 MR. POWELL: Piasco.

8 MR. BENDER: Piasco, P-i-a-s-o [sic].

9 HEARING EXAMINER GARNER: Okay. Any  
 10 questions from the staff?

**EXAMINATION**

12 **BY MS. MADCHE:**

13 Q. I will go ahead and start. As before I'm  
 14 going to start with what I think are deferred  
 15 questions for this group. Early on Richard Suggs  
 16 had asked on whether or not you would be able to  
 17 provide industrial codes that best reflect the  
 18 capture sources, such as the ethanol facilities.  
 19 Is that something that you can provide at this  
 20 time?

21 A. (BY MR. VOLK) Yes. The ethanol NAICS is  
 22 325193 reflecting as asked for the capture NAICS  
 23 code, and that is for ethanol.

24 Q. Earlier an answer was provided for  
 25 approximately how many miles of the MCE pipeline

412

1 transmission pipeline system is within the North  
 2 Dakota PSC jurisdiction. 352 miles was provided,  
 3 but I believe, Jimmy, you would be able to confirm  
 4 that number?

5 A. (BY MR. POWELL) Yes. It's 3 --  
 6 approximately 332 miles are in the jurisdiction of  
 7 the Public Service Commission. In the delta  
 8 roughly 19 miles is within the NDIC jurisdiction.  
 9 So Wade had it accurate and correct. But the PSC  
 10 is 332.

11 Q. Okay. I had asked earlier on with the  
 12 first group yesterday on whether or not royalties  
 13 were being paid on the full CO<sub>2</sub> stream or just the  
 14 CO<sub>2</sub> mass of the stream. Is there anyone in this  
 15 group that can confirm that or is that something  
 16 that would need to be a supplemental?

17 MR. BENDER: No one can answer that.  
 18 We'll have to supply you with supplemental  
 19 information on that one.

20 MS. MADCHE: Okay.

21 Q. (MS. MADCHE CONTINUING) In Section 2  
 22 earlier I had asked what the maximum pressure was  
 23 applied during the microfracture testing in the  
 24 Milton Flemmer 1 that was done across the  
 25 Spearfish/Opeche Formation.

413

1       **A.** (BY MS. ODDY) Yes. I would like to  
 2 direct your attention to Figure 2-7 on the TB  
 3 Leingang 1 permit.  
 4       **Q.** I'm ready.  
 5       **A.** So relative to Milton Flemmer 1, the  
 6 maximum injection pressure is highlighted with the  
 7 black square box on the image on the upper section  
 8 there, and from that graph it looks like around  
 9 5580 psi was -- was pumped as a maximum. However,  
 10 after evaluation, there was no breakdown pressure  
 11 observed at that maximum pressure injected.  
 12       And then referring to Table 2-4, we do  
 13 have a summary on the Opeche/Spearfish  
 14 microfracture stress test breaking down your  
 15 breakdown pressure as well as your propagation  
 16 pressure.  
 17       **Q.** So some additional questions as it  
 18 pertains to the microfracture testing that was  
 19 done. A question that I had posed earlier was how  
 20 do you determine which sand package within the  
 21 Broom Creek to target for these tests?  
 22       **A.** So prior to the micro in situ stress  
 23 tests, we ran logs such as your magnetic resonance  
 24 log as well as an FMI log and sonic log, and in  
 25 combination of that along with the core photos that

414

1 we observed, along with some field description,  
 2 were able to pick the representative sand package  
 3 within the Broom Creek Formation and pick the test  
 4 steps.  
 5       **Q.** Could you elaborate a little bit more on  
 6 what makes a representative sample?  
 7       **A.** Yes. So I'm going to go back here to  
 8 another figure. Figure 2-5. We looked at the  
 9 sonic log, and on column 7 we've got the facies  
 10 there, so we looked at, you know, a good, thick  
 11 sandstone package. And then looking at the  
 12 magnetic resonance log, that showed us good  
 13 porosity in that test point. Then looking at  
 14 making sure there are no visible bedding or  
 15 fractures within the core photos that was -- that  
 16 was collected and any field description that was  
 17 noted by the geologists on site.  
 18       **Q.** So just to confirm, you're looking for a  
 19 sand package that would represent good porosity and  
 20 permeability but without fractures that could  
 21 possibly affect the results of the MBT test?  
 22       **A.** That's right.  
 23       **Q.** So as a follow-up to that, on average to  
 24 date across the Broom Creek on previous  
 25 applications, the frac grading has between 0.69 psi

415

1 per foot to 0.712 psi per foot. Could you explain  
 2 why we're seeing a larger variation across these  
 3 three facilities, specifically as it relates to the  
 4 Slash Lazy H 5 which was at 0.784 psi per foot  
 5 which would be above that range, or what you  
 6 anticipate might have caused it to be higher than  
 7 what we've seen to date on past applications?  
 8       **A.** So with that for the KJH -- or sorry --  
 9 the Slash Lazy H 5, cause of that could potentially  
 10 be activities during the drilling operation that  
 11 may impact. Also could be some bedding within the  
 12 FMI logs that was observed.  
 13       However, we are willing to, you know, work  
 14 with the DMR on solutions on confirming that --  
 15 that value at the KJH sites. It is also part of  
 16 our plan to perform an in situ stress test in the  
 17 KJH, at least on one of the wells. In addition, we  
 18 are planning on performing an injectivity test in  
 19 the injection wells again to confirm these values,  
 20 and that also applies in all six injection wells.  
 21       **Q.** Would you be able to explain what effect  
 22 the frac gradient has on the CO<sub>2</sub> plume size?  
 23       **MR. BENDER:** That's probably a question  
 24 that we'll have to recall Amanda to answer.  
 25       **MS. MADCHE:** Okay. And am I correct that

416

1 we'll want to do that at the end as far as  
 2 recalling?  
 3       **MR. BENDER:** Yeah. What I thought we'd do  
 4 is after we finish with this group, once again,  
 5 because of the size of the group, we're going --  
 6       **MS. MADCHE:** Sure.  
 7       **MR. BENDER:** -- to have to recall Wade  
 8 Boeshans and also Caitlin, and perhaps we could  
 9 bring Amanda up at the same time and get that done  
 10 if the examiner's okay with that.  
 11       **HEARING EXAMINER GARNER:** I am okay with  
 12 that. I was going to allow cross of these four  
 13 before they go to sit down and bring them back up  
 14 and sit down and bring them back up. Does that  
 15 work? Is that fine?  
 16       **MR. BENDER:** I mean, there's a lot of  
 17 people. I think it's a lot of cross. We can  
 18 finish our -- the remaining witnesses, I think,  
 19 very quickly. That's kind of what I had in mind  
 20 this morning, but it's certainly your call,  
 21 Mr. Examiner.  
 22       **HEARING EXAMINER GARNER:** Mr. Braaten, any  
 23 input? Are you okay waiting with the other  
 24 witnesses to be called and then we can -- then  
 25 you'll have an opportunity to cross any one of the

417

1 witnesses and recall them up here.

2 MR. BRAATEN: Yeah. I think with respect

3 to that, I just want to be clear on record that

4 specifically because what I'm running into now is

5 difficulty with scheduling with experts and when

6 they're going to be here, but thinking about what

7 Mr. Bender is saying whether I cross these folks

8 now or cross all of these folks right after, I

9 don't think that's going to help me on anything

10 else, so --

11 HEARING EXAMINER GARNER: Okay.

12 MR. BRAATEN: -- I'm okay with that --

13 HEARING EXAMINER GARNER: Okay.

14 MR. BRAATEN: -- but reserving my prior

15 objections --

16 HEARING EXAMINER GARNER: Sure.

17 MR. BRAATEN: -- on the scheduling.

18 HEARING EXAMINER GARNER: Your objection's

19 noted, so we'll go then with your witnesses.

20 MR. BENDER: Thank you.

21 Q. (MS. MADCHE CONTINUING) Okay. Just to

22 continue on the microfracture testing which you've

23 already given some testimony on, just confirming

24 that we would want to see a microfracture test done

25 on either the KJ Hintz 1 or 2 just to confirm that

418

1 value which was proposed in the testing and

2 monitoring plan.

3 Let's see here. So as it pertains to

4 the -- how the microfracture test data is used in

5 the simulation to calculate the bottomhole pressure

6 constraints that are used in the model, if the

7 results do come out substantially different on the

8 KJ Hintz 1 or 2, whichever you decide to do to

9 confirm that result, it is likely DMR would want

10 the model reran because of the bottomhole pressure

11 constraint being affected by that frac gradient.

12 A. Understood.

13 Q. Okay. I'm now moving into Section 5, so I

14 would like to go to Table 5-3. So on this table

15 you have the CO<sub>2</sub> stream composition specification

16 that must be met for you to, I believe, accept a

17 third-party source. My question related to this is

18 whether or not all the sources you currently have

19 contracts with have had samples taken or FEED

20 studies completed to confirm they meet or exceed

21 that stream composition?

22 A. (BY MR. POWELL) So the individual quality

23 spec for each course is greater than 95 percent --

24 Q. Okay.

25 A. -- carbon dioxide, and we did -- we had

419

1 done a stack test at each facility, and that will

2 be done -- the plants typically do them annually.

3 Unless we have a reason to do them intermittently,

4 we'll follow their schedule, but the individual

5 spec is not greater than 95 percent CO<sub>2</sub>.

6 Q. Yeah. I think the confusion was the

7 narrative right above Table 5-3 since it states,

8 "Any new CO<sub>2</sub> streams from third-party entities not

9 accounted for at the time of permitting must also

10 meet or exceed the specification once commingled."

11 And you're saying at a minimum at the

12 source side they would be greater than 95 percent

13 with the anticipation that the commingled stream

14 would be greater than 98.25 percent; correct?

15 A. Correct. And it's my recollection I think

16 all but one of the 57 sources were 98 percent or

17 higher. There was one facility that was about 96.

18 So commingled, yes, it would be greater than the

19 98 percent.

20 Q. And for any new sources that might come

21 down the line, I'm guessing additionally you would

22 want a stack test done before to confirm that

23 they're going to meet the specifications to take

24 that source?

25 A. You're correct.

420

1 Q. Could you -- yeah, we would require that

2 that data be submitted to us before we would

3 approve new sources too.

4 A. Okay.

5 Q. Could you elaborate on how the baseline

6 isotopic signature of the CO<sub>2</sub> stream will be

7 resampled if new sources are added later on?

8 MR. HUNT: So I think I can respond.

9 MR. POWELL: Okay. Go ahead because I was

10 just going to read a paragraph, but go ahead, John.

11 A. (BY MR. HUNT) Okay. So in the event that

12 a new source is added and approved by DMR, Summit

13 would sample that new commingled CO<sub>2</sub> stream within

14 one year after adding that additional CO<sub>2</sub> source to

15 get its composition and isotopic signature.

16 Q. (MS. MADCHE CONTINUING) Let's see. Will

17 the meters that exist -- or sorry. Let me rephrase

18 that.

19 Will meters exist at all the outlets at

20 the CO<sub>2</sub> source facilities, both in state and out of

21 state, to be able to account for how much CO<sub>2</sub> mass

22 and total injection stream volumes each individual

23 source is contributing?

24 A. (BY MR. POWELL) Yes. So Coriolis meters

25 will be installed consistently throughout the

421

1 system.

2 Q. And how do you plan to ratio those mass

3 and volumes back to the individual three storage

4 facility permits for reporting?

5 A. So I'm not the measurement expert, but it

6 would be reconciled. We'll have custody transfer

7 from the -- on the outlet or discharge side of the

8 capture facilities, and then we'll have -- we'll

9 have a measurement station at the terminus of the

10 main line. And then we'll have Coriolis meters or

11 measurement facilities at each of the injection

12 sites. And so it'll be a mass balance from volume

13 in from each of the 57 source plants all the way

14 through what's injected at each of the well sites

15 and that'll be reconciled.

16 Q. So I want to move us to Figure 5-3 on

17 page 5-12 of the TB Leingang application. So this

18 figure shows a generalized flow diagram. Could you

19 walk us through this figure specifically as it

20 relates to the capabilities to isolate individual

21 flowlines from each other and how pigging of the

22 flowline system will take place?

23 A. Yes, and I'd -- this is a difficult

24 diagram to do that from. If you start from right

25 to left -- so each line segment on the discharge

422

1 side of a capture facility will have a launcher.

2 And so -- and then each pipe diameter change within

3 the pipeline system will also have a launcher and

4 receiver. And then when you get to the

5 sequestration site, there will be a receiver at

6 each of the well sites.

7 So if you're looking right to left, so in

8 a common pipeline diameter size, you know, the

9 launcher will be the initiation of that pipe

10 segment, and then it'll go through right to left

11 and then you will be -- for instance, at the

12 sequestration site before it reaches the injection

13 facility, then it will go through a receiver, and

14 then downstream will be a meter or measurement

15 station which will include a gas chromatograph,

16 Coriolis meter and pump. And then the -- the --

17 the line of demarcation will be on the inlet valve

18 upstream of the shutdown valve at the injection

19 facility.

20 Q. So just to confirm, with the three -- with

21 the three individual flowlines, are you able to pig

22 those separately?

23 A. Yes. Each pipe diameter will be able to

24 be pigged independently. So in the sequestration

25 where we have 16, 20 and 24, each of those diameter

423

1 changes, the entire segment will be able to be

2 pigged independently.

3 Q. And as a follow-up, are there any plans

4 for an isolation valve at the junction of where the

5 BK Fischer flowline, called NDL-325, splits off

6 from the TB Leingang flowline known as NDL-327?

7 A. I may -- may need help from Jamey if

8 that's a diameter change.

9 MR. BENDER: Okay. We'll bring him up

10 later.

11 Q. (MS. MADCHE CONTINUING) Can you confirm

12 the land description of where that junction occurs

13 at those two flowlines? Looking at the prior

14 figure, Figure 5-2 it looks like it's Section 5,

15 Township 141 North, Range 87, but it's pretty small

16 scale on the map.

17 A. It looks correct to me as well, but it is

18 small scale.

19 MR. POWELL: And, again, perhaps Jamey can

20 confirm, Lawrence.

21 Q. (MS. MADCHE CONTINUING) So now I'd like

22 to go to Table 5-4 on page 5-14. In this table the

23 flowline has a maximum rate of 936 million standard

24 cubic feet per day, approximately equivalent to 18

25 million metric tons a year. Earlier on in the

424

1 project summary, the modeling had shown that this

2 facility, the TB Leingang specifically, would be

3 able to take 124.4 million metric tons over a

4 20-year period which would average around

5 6.22 million metric tons annually. Can you please

6 confirm there's no intent to send -- even though

7 the line has the capacity to send the full 18

8 million metric tons, there's no intent to send it

9 all to this one facility?

10 A. That is correct. There is no intent.

11 Q. And on average, what do you anticipate the

12 flow rate to be on this flowline?

13 MR. POWELL: Again, I'm going to have to

14 defer to Jamey for that, Lawrence. Sorry.

15 Q. (MS. MADCHE CONTINUING) Similarly, on the

16 BK Fischer application instead, and on its Table

17 5-4 on page 5-14, it has a maximum rate of

18 314.5 million standard cubic feet per day,

19 equivalent to around 6 million metric tons a year,

20 and its modeling had more of an annual amount of

21 4.92 million metric tons.

22 So, again, just confirming again that you

23 would not be exceeding what the modeling had showed

24 in those bottomhole pressure constraints even if

25 the flowline capacity would allow you to?

425

1     **A.** That's correct.

2     **Q.** And I'm interested in what the average

3 flow rates will be for all three flowlines for when

4 that gets deferred.

5           MR. BENDER: That's another Jamey

6 question?

7           MR. POWELL: Yes.

8     **Q.** (MS. MADCHE CONTINUING) So, additionally,

9 on that table, for all three of the applications a

10 typical operating pressure has a 900 psi range,

11 roughly, going from 1250 to 2150 psi. And this

12 might be a question that you need to defer again.

13 I'm wanting to know why such a big range was given

14 and whether or not you have -- kind of more within

15 that range where you actually typically plan to be

16 for all three facilities.

17     **A.** The range is just -- it's to keep the CO<sub>2</sub>

18 in super critical state, and so that's the range

19 from 1250 to 2150, and it's really applicable over

20 the -- predominantly over the pipeline system

21 because over the 2500 miles we have about --

22 including -- excluding the pumps at the discharge

23 site of the capture facilities, we have 17, I

24 believe -- if I recollect properly, 17 intermediate

25 pump stations, so you have that pressure gradient

426

1 from the discharge down to the suction side of

2 the -- of the next intermediate pump station, so

3 that's the range of pressures.

4           As it says, the maximum operating pressure

5 is 28 -- 2183, but the discharge set points will be

6 2160, and then we'd run the surge analysis and, of

7 course, you know that's 110 percent so that's,

8 according to the math off the top of my head, about

9 2400.

10     **Q.** So a couple follow-ups to that. In the

11 modeling, the model was done as being pressure

12 constrained both on bottomhole pressure and

13 wellhead pressure and not weight constrained. I'm

14 curious as to why you have a maximum discharge

15 pressure of 2160 psi when the wellhead pressure

16 constraint in the model was only 2100 psi.

17     **A.** Yeah, I might have to defer that one.

18           MR. BENDER: Jamey again.

19     **Q.** (MS. MADCHE CONTINUING) And just a

20 statement, because this isn't a weight-constrained

21 model, typically DMR would be going forward with

22 setting a wellhead pressure constraint based on the

23 model and not on operating conditions.

24           When it comes to kind of the fluctuation

25 that you had mentioned that you have on the

427

1 pressure to keep it in a super critical state, will

2 the metering that you're planning to use be able to

3 handle those fluctuations knowing that the density

4 of CO<sub>2</sub> is affected greatly by both temperature and

5 pressure and both the temperature and pressure on

6 this Table 5-4 is a fairly substantial range?

7     **A.** Yes, it is. It will. The Coriolis meters

8 can handle that variation.

9     **Q.** And are those mass flow meters or

10 volumetric meters?

11     **A.** Again, I'm not the measurement expert, but

12 I believe that they're mass flow meters.

13           MR. BENDER: Do you have the answer?

14           MR. HUNT: No.

15           MR. BENDER: Okay.

16     **Q.** (MS. MADCHE CONTINUING) So some questions

17 related to the corrosion prevention and monitoring

18 detection that's being implemented for all three

19 storage facilities. Can you elaborate a little bit

20 more on the ER -- the ER probes that are proposed

21 and the impressed current cathodic protection

22 system that's going to be used along the flowline

23 system?

24     **A.** (BY MR. HUNT) Yes. So for the ER probe,

25 DMR can think of those as -- you know, you guys are

428

1 familiar with a corrosion coupon. So imagine this

2 as a miniaturized corrosion coupon that is then

3 attached to a probe that's then attached to the --

4 to the flowline where it's subjugated to the -- the

5 stream continuously, and in real time there will be

6 continuous measurements of the electrical

7 resistance of that -- of that miniaturized coupon

8 or -- or that probe, said another way. Those --

9 those resistivity measurements are sensitive to

10 changes in mass and thickness in particular.

11     **Q.** What material is the composition of the ER

12 probes?

13     **A.** So they will be of the flowline material

14 as well as the wellbore material.

15     **Q.** So there will be two probes at at least

16 each injection site?

17     **A.** That is my understanding.

18     **Q.** And with the impressed current cathodic

19 protection system, is that combined as far as the

20 same system that's going to be across the flowline

21 and the transmission pipeline operated as a

22 continuous protection?

23     **A.** (BY MR. POWELL) It is.

24     **Q.** Referencing back to that Figure 5-2, I'm

25 just looking for confirmation on what the land

429

1 description would be for the terminus point.  
 2 Again, on this one it looks like it's Section 5,  
 3 Township 141 North, Range 86 West.  
 4 MR. BENDER: Is that something we can  
 5 supply you in a supplement?  
 6 MS. MADCHE: Yeah. Both of those  
 7 locations could be confirmed in a supplement. That  
 8 would be fine.  
 9 Q. (MS. MADCHE CONTINUING) So a question on  
 10 the seal pot system that is planned to be used to  
 11 maintain the tubing/casing annulus pressure to  
 12 approximately 300 psi. Are you anticipating any  
 13 on-site tank storage such as vessels needing to be  
 14 on site for that system that would be holding,  
 15 like, packer fluid or brine, not necessarily a  
 16 nitrogen vessel?  
 17 A. (BY MS. ODDY) At this time I don't  
 18 believe we plan on having storage tanks for  
 19 corrosion-inhibited fluid, but we will have the  
 20 nitrogen seal pot like you said adjacent to the  
 21 wellhead.  
 22 Q. I guess just a note. If at any point  
 23 those plans do change, secondary containment such  
 24 as a dike would be required around any brine  
 25 storage or the packer fluid.

430

1 And also a note that a Sundry variance  
 2 would be required to have the 300 psi annulus  
 3 pressure just because currently as rule requires,  
 4 it's to be greater than the injection pressure.  
 5 A. Understood.  
 6 Q. I believe this has already been answered  
 7 earlier in part, but just to confirm, no baseline  
 8 soil, gas sampling or groundwater sampling has  
 9 taken place yet; correct?  
 10 A. (BY MR. HUNT) That is correct.  
 11 Q. And that would be anticipated to begin  
 12 approximately a year in advance of injection  
 13 operations beginning?  
 14 A. That is also correct.  
 15 Q. So this question is specific to the KJ  
 16 Hintz and it may need to be deferred. I'm just  
 17 looking for how that year 19 was determined for the  
 18 year to install the Fox Hills monitoring well next  
 19 to the Raymond Jensen 1-34 P&A well.  
 20 A. Yeah. So in general the idea there was,  
 21 as has been testified to, you know, previously,  
 22 seismic surveys will be acquired at least every  
 23 five years, so, you know, year 2, year 4, year 9,  
 24 year 14, year 19. And so the idea there was that  
 25 as Summit is monitoring the CO<sub>2</sub> plume expanding in

431

1 the storage reservoir, we don't anticipate at this  
 2 time that that legacy wellbore will see CO<sub>2</sub> and  
 3 certainly within that time frame.  
 4 But, you know, taking a proactive approach  
 5 and after taking the seismic data and then  
 6 reviewing that data to see how is the CO<sub>2</sub> plume  
 7 progressing, is it conforming to expectations, so  
 8 that year 19 really just allows some of the  
 9 opportunity, the -- the optionality to wait to  
 10 install that well until, you know, it is needed.  
 11 And, of course, if it's determined that it may be  
 12 needed prior to then, then they have that option as  
 13 well.  
 14 Q. So I want to reference Section 5.7.2. Let  
 15 me get a page number. So that would be page 5-26  
 16 in the TB Leingang application. And it's paragraph  
 17 4, and this language is in all three applications.  
 18 There's a statement that Summit reserves the right  
 19 to evaluate and modify, if necessary, appropriate  
 20 groundwater sampling locations and frequency. Just  
 21 a note that any changes to the frequency or  
 22 locations should go through DMR for approval and  
 23 review.  
 24 A. Yes. Acknowledged.  
 25 Q. And that would apply as well as far as any

432

1 changes made to the near surface monitoring during  
 2 the PISC period.  
 3 A. Understood.  
 4 Q. Could you give a little more testimony on  
 5 the local passive seismicity array that's planned  
 6 to monitor for potential induced seismicity?  
 7 A. Sure. So at this time Summit has plans to  
 8 install multiple seismometers at the site. At this  
 9 time -- well, a specific layout or design or number  
 10 of stations is unknown, but prior to injection  
 11 Summit would request bids from vendors to put  
 12 together a site-specific strategy.  
 13 We understand today that by multiple -- in  
 14 order to properly triangulate and locate any  
 15 seismicity events, you would need at least three  
 16 seismometer stations as a minimum.  
 17 Q. Just a statement that once a layout's  
 18 known, that information should be provided to DMR.  
 19 A. Understood.  
 20 MS. MADCHE: Let's see. I think that's  
 21 all I have currently. Thank you.  
 22 **EXAMINATION**  
 23 **BY MR. STOLLDOFF:**  
 24 Q. Jimmy, I asked a question earlier that  
 25 they punted to you, so I'll ask it again. At its

433

1 closest, approximately how far away is the facility  
 2 for the TB Leingang from an occupied dwelling?  
 3 **A.** (BY MR. POWELL) I apologize because I  
 4 don't have each site memorized, but I believe the  
 5 closest dwelling to either -- any of the well sites  
 6 is about 4400 feet -- I'm sorry -- 2200 feet.  
 7 2200 feet. I believe the furthest is about  
 8 4100 feet. But it's 2200 feet. And we can clarify  
 9 if that's Leingang or if that's one of the other  
 10 two.  
 11 MS. MADCHE: I think we might just ask  
 12 that a supplemental is provided as far as the  
 13 proximity of how close the flowline is for each  
 14 individual one to the closest dwelling.  
 15 MR. POWELL: Okay. And I believe the  
 16 closest dwelling to a flowline at either location  
 17 is 700 feet, but we could provide the exact  
 18 distances for all three.  
 19 MS. MADCHE: Could you add to that also  
 20 closest distance to a wind turbine, specifically  
 21 for the TB Leingang application?  
 22 MR. POWELL: Yes, we can do that.  
 23 MS. MADCHE: Sorry to jump in.  
 24 **Q.** (MR. STOLL DORF CONTINUING) So Section 7,  
 25 the Emergency Remedial and Response Plan, that's

434

1 you, Jay; is that correct?  
 2 **A.** (BY MR. VOLK) Yes.  
 3 **Q.** Under the Section 7.6 -- I'll let  
 4 everybody get there. It indicates that the company  
 5 organizational structure is still in flux and in  
 6 development. Do you know -- I'd note that it's  
 7 expected that we -- to complete that before being  
 8 provided authorization to inject. We would expect  
 9 that to be nailed down.  
 10 **A.** Without a doubt. We're continuing to work  
 11 on, as the rest of the project continues to  
 12 develop, an integrated response plan as well which  
 13 will be consistent with this one, and we will  
 14 supply that when done and prior to injection.  
 15 **Q.** Okay. So this is in the PISC section.  
 16 Hopefully one of you can answer this. For all  
 17 three applications on Figure 6-2 -- give me a  
 18 second and I'll get a page number for you. That is  
 19 page 6-6 in Exhibit 1A for the TB Leingang  
 20 application.  
 21 Can you -- oh, sorry. Are you guys there?  
 22 Explain how the CO<sub>2</sub> extent ten-year  
 23 postinjection boundary was determined?  
 24 **A.** (BY MR. HUNT) I think we would want to  
 25 bring one of the other witnesses up to answer that.

435

1 MR. STOLL DORF: Probably Amanda?  
 2 MR. BENDER: (Nods head.)  
 3 **Q.** (MR. STOLL DORF CONTINUING) What's the  
 4 setback being proposed for the flowlines?  
 5 **A.** (BY MR. POWELL) Again, the setbacks for  
 6 the flowlines, similar to the -- to the pipeline in  
 7 North Dakota that's under PSC jurisdiction,  
 8 complies with State law, 500 feet as a minimum.  
 9 **Q.** What type of notification system's in  
 10 place should residents or -- and/or businesses need  
 11 to be notified in an emergency?  
 12 **A.** (BY MR. VOLK) We've had numerous  
 13 conversations with Oliver County, Mercer County and  
 14 Morton County, and this is an area we've determined  
 15 to work cumulatively on and develop. So right now  
 16 there's multiple systems being used between Mercer  
 17 County and Morton County. I believe Mercer County  
 18 and Oliver are both using reverse 911. Morton  
 19 County is using that as well as I believe some  
 20 secondary options.  
 21 So we have committed to continuing working  
 22 with all three counties to provide the data needed  
 23 to make sure the notification system is -- is going  
 24 to be consistent throughout all three counties.  
 25 **Q.** How often do you plan on doing training

436

1 with these local emergency response teams?  
 2 **A.** On an annual basis at minimum. I believe  
 3 it's not to exceed 15 months, but it is on the  
 4 annual basis.  
 5 MR. POWELL: Yeah. I'll just add that  
 6 since we know that North Dakota -- and I'm not sure  
 7 of a specific -- Jay, you could help me on Mercer  
 8 or Morton or Oliver, but a lot of the counties have  
 9 volunteer fire departments and sometimes those  
 10 personnel interchange or are unavailable, so we've  
 11 committed to providing training on a more frequent  
 12 basis as needed.  
 13 **Q.** (MR. STOLL DORF CONTINUING) I hope you  
 14 guys will -- someone here at the table will be able  
 15 to answer this one, but this has come up in the  
 16 past, but are there any special considerations for  
 17 DMR field inspection staff to be coming onto the  
 18 sites? Do you have -- or do you have any -- are  
 19 you aware of any issues that might bring up, having  
 20 a DMR inspector on site -- some of the sites?  
 21 **A.** (BY MR. VOLK) As expected, unrestricted  
 22 access for any regulatory items such as DMR access.  
 23 With that being said, previous work I've done has  
 24 always provided on-site hazard training for and up  
 25 to and including inspectors so they have the proper

437

1 notices of what is out there or what needs to be  
 2 out there. And if any special training would be  
 3 required for those inspectors, we will make sure  
 4 that's available.

5 Q. Would you be able to provide us --  
 6 MR. SUGGS: Sorry.  
 7 MR. STOLLDOERF: Oh, go ahead.  
 8 MR. SUGGS: On that note, if there is  
 9 anything anticipated, at this time I would ask that  
 10 it be provided as a supplemental for what you'd  
 11 anticipate the DMR inspection staff needing to have  
 12 under their belt or have training for accessing  
 13 your facilities.

14 MR. VOLK: We will provide that.  
 15 MR. SUGGS: Thank you.

16 Q. (MR. STOLLDOERF CONTINUING) As it relates  
 17 to Sections 9, 10 and 11, the construction plugging  
 18 and completion plans for the Class VI wells and  
 19 monitoring wells, we just want to note that it will  
 20 require typical DMR approvals prior to executing,  
 21 just so you understand.

22 A. (BY MS. ODDY) Understood.

23 Q. I want to move to Section 11, the  
 24 injection well. I have one question -- or a couple  
 25 questions. Can I -- okay. Then we'll go to 12.

438

1 Sorry. Excuse me.  
 2 You're approximating it'll cost about  
 3 \$583,000 to plug one injection well. Are you guys  
 4 considering that it's going to probably require a  
 5 big rig to handle that size of tubing?

6 A. That's correct. With a 7-inch tubing, we  
 7 will need a bigger workover rig. In addition to  
 8 that, the anticipation of the plugging plan is also  
 9 to set CO<sub>2</sub> resistant cement. So those estimated  
 10 costs are included in the plugging costs.

11 Q. Okay. And you touched on this earlier  
 12 about the surety bonds, but you're proposing to use  
 13 a surety bond for the injection well plugging phase  
 14 and the PISC phase. Are you planning to have one  
 15 surety bond or two separate bonds for each phase?

16 A. (BY MR. VOLK) At this point in time we  
 17 have not one -- allocated -- or we have not  
 18 committed to a certain provider, so that'll be  
 19 forthcoming, at minimum 30 to 60 days prior to  
 20 injection it would be submitted to you. We know we  
 21 will be using the surety and the pollution  
 22 liability for those, and I can't today tell you in  
 23 certainty if those will be split between the phases  
 24 you asked.

25 MS. MADCHE: I'm just going to jump in,

439

1 and not necessarily a recommendation but something  
 2 to consider is clearly as you work through closing  
 3 one of these facilities, plugging the injection  
 4 wells is going to be the first item. If they are  
 5 on separate sureties, that would allow you the  
 6 ability to request one to be released while  
 7 maintaining the other one for continued PISC  
 8 monitoring. So, again, just something to consider.

9 MR. VOLK: Appreciate that, and we will  
 10 provide additional information to you.

11 Q. (MR. STOLLDOERF CONTINUING) Can you  
 12 elaborate a little more on the emergency and  
 13 remedial response plan and how the endangerment to  
 14 USW -- or underground sources of drinking water  
 15 costs were determined?

16 A. I just want to make sure I'm getting to  
 17 the right figure. If you bear with me for one  
 18 second. There it is. So I'm going to direct your  
 19 reference to page 12-10 and Table 12-7. So, first  
 20 of all, I want to start off with what the actual  
 21 scenario was used to determine the estimated cost  
 22 on ERRP as well as to your specific question the  
 23 USDWs.

24 The scenario that was used was a well  
 25 failure or integrity issue with the well in which a

440

1 containment -- loss in containment event happened.  
 2 To get into more specific details on that, I will  
 3 have Jean talk through that. But to the specific  
 4 cost as it relates to the USDWs, it is broken out  
 5 between -- in Table 12-7, the general response  
 6 actions, delineation and water replacement at  
 7 1.89 million as well as the quarterly monitoring  
 8 which is dictated on a ten-year period for 750,000.  
 9 And then the plugging and abandonment cost of the  
 10 groundwater -- groundwater monitoring wells in that  
 11 area is another 55,000, which came up to  
 12 2.6 million.

13 Q. And you did mention that the failure  
 14 mechanism is a loss of a containment event?

15 A. That's correct.

16 Q. Okay. Just want to note that the  
 17 average -- okay. I don't need to. All right.  
 18 Never mind.

19 MS. MADCHE: No. I do have a follow-up on  
 20 that. Clearly, the costs are slightly different  
 21 for all three facilities for the emergency remedial  
 22 response. Can you just kind of go over what  
 23 parameters were used to determine those costs that  
 24 would cause that fluctuation?

25 MR. VOLK: Yes. The difference largely

441

1 comes into on the general response delineation and  
 2 water replacement line item. What we tried to do  
 3 is look at more site-specific characterizations in  
 4 those areas, how many wells, what would be their  
 5 water replacement cost, and that was the  
 6 distinguishing difference that drove the number up  
 7 or down.  
 8 MR. STOLLDOERF: Nothing further for me.  
 9 **EXAMINATION**  
 10 **BY MR. SUGGS:**  
 11 Q. Just a couple of additional items. I'm  
 12 going to jump back up to 5-13. The second-to-last  
 13 paragraph on that page related to custody transfer  
 14 of the CO<sub>2</sub>, the way that's described is that the CO<sub>2</sub>  
 15 when it reaches the terminus point will become the  
 16 custody of SCS1 and it will remain that way until  
 17 it goes down the hole at any of the three different  
 18 facilities. Am I understanding that intention  
 19 correctly?  
 20 A. (BY MR. POWELL) So that's page 5-15?  
 21 Q. Page 5-13, the second-to-last paragraph.  
 22 A. Oh, sorry. All right. That's my  
 23 understanding.  
 24 Q. Okay. As the flowlines are anticipated to  
 25 be owned by the individual storage facilities,

442

1 SCS1, 2 and 3, would Summit be opposed to a  
 2 requirement that would require a flow meter at  
 3 each -- I guess at the beginning of each of the  
 4 individual flowlines and an actual custody transfer  
 5 happening as it moves from one line into the other?  
 6 A. So versus having measurement at the  
 7 terminus of the main line for the -- sorry. As  
 8 opposed to just having the single meter at the  
 9 terminus of the main line at the -- at the  
 10 jurisdiction breakpoint and then an individual  
 11 meter at each well pad or well site, you're  
 12 suggesting or recommending that we'd have an  
 13 intermediate meter, then, at the beginning of each  
 14 of the laterals from that segment of main line,  
 15 flowline to each well site.  
 16 Q. (MR. SUGGS CONTINUING) Yeah. I think you  
 17 would end up with at least two additional meters in  
 18 play, one being where the CO<sub>2</sub> would go north to the  
 19 KJ Hintz facility and one at the point where it  
 20 goes west from the Leingang to the Fischer.  
 21 A. I'm not opposed to that.  
 22 Q. Okay. With respect to the cathodic  
 23 protection system that's being proposed, has that  
 24 already been designed at this point?  
 25 A. It hasn't been -- the impressed current

443

1 cathodic protection system?  
 2 Q. Yeah.  
 3 A. Generally. We're going to have to --  
 4 since we've added additional source points and  
 5 additional laterals along the whole system, we're  
 6 going to have to go back and rebalance the system  
 7 and figure out if the location of the ground  
 8 well -- the ground beds have changes, where they  
 9 need to be expanded, et cetera. So it needs to be  
 10 reconfigured upstream of the sequestration area.  
 11 Q. Okay.  
 12 A. As far as the sequestration area, it's  
 13 generally been designed but we'll refine.  
 14 Q. Okay. So that is still under works and  
 15 will be refined?  
 16 A. Correct.  
 17 Q. Okay. So when that is determined, we'll  
 18 want the location of the ano beds identified, and  
 19 pursuant -- there's -- on page 5-15 in Section  
 20 5.3.1, there's indication of -- what am I  
 21 reading -- Summit Carbon Solutions will supply DMR  
 22 with a map of cathodic protection boreholes to meet  
 23 the requirements of 43-05-01-5. Do you anticipate  
 24 actually drilling any cathodic protection boreholes  
 25 or will this system entirely utilize ano beds?

444

1 A. It's my understanding ano beds. We'll  
 2 clarify.  
 3 Q. Okay. And so, regardless, we'd want those  
 4 locations identified.  
 5 A. Yeah.  
 6 Q. And I think, John, you testified to this  
 7 earlier, but there's some narrative on 5-29 that  
 8 indicates that you will be running 3D seismic at  
 9 years two, four and nine. It is the intent to run  
 10 3D seismic as early as year two after injection?  
 11 A. (BY MR. HUNT) That's -- yes. Yeah, and  
 12 in the narrative it says "by year two," so just to  
 13 be clear.  
 14 Q. Okay. But my point -- my confirmation is  
 15 that there will be a sequence of 3D seismic run  
 16 shortly after beginning injection and another one  
 17 prior to the five-year review?  
 18 A. Correct.  
 19 Q. Okay. I'll point out that if anything  
 20 looks significantly off at that two-year mark, it  
 21 is expected that you will report that and we'll  
 22 begin the determination whether or not we need to  
 23 accelerate that hearing.  
 24 A. Understood.  
 25 Q. On page 5-32 there's the narrative about

445

1 the traffic light system for the passive

2 seismicity, and you have the cutoff points of 2.7,

3 4.0 and 4.5. Can you elaborate on what the

4 significance of those values as cutoff points are?

5 **A.** So 2.7 is the point at which humans can

6 begin to feel seismicity, and so that's why that

7 one is listed there. For events 4 and 4.5, I don't

8 have off by memory -- I would need to go and refer

9 back to the team on that one.

10 **Q.** Okay. If that's something that can't be

11 provided in short notice or short period as part of

12 this testimony, possibly a supplemental just

13 confirming what the importance of those values is

14 in that system.

15 **A.** Understood.

16 **Q.** And I think this one is for Jay. On 7-17,

17 the last sentence under the 5 -- sorry -- 7.5.1

18 section, it reads, "In addition, assistance has

19 been secured from local emergency services to

20 implement this ERRP."

21 Which emergency services have you

22 specifically worked with and secured their

23 assistance in execution?

24 **A.** (BY MR. VOLK) So we continue to develop

25 this. This is an overarching plan. We have

446

1 reached out to, as I've said, Morton County, Oliver

2 County as well as Mercer County, including the fire

3 departments in numerous of the surrounding towns.

4 A couple of them are Beulah, Hazen, Center, Zap.

5 So without having what I would call -- and I'm

6 going to say maybe that statement today is not

7 totally defined as the ERRP isn't, but continued

8 working agreements with -- or continued working

9 with them to commit to: One, I understand there's

10 a memorandum of understanding of mutual aid between

11 all of them or actually statewide now. So they

12 have recognized that. Two is they've recognized

13 that we will continue to work together in

14 developing that plan and know they have different

15 capabilities between the units. And that is what

16 we're going to continue to work on to supply what I

17 would call as an integrated plan between all three

18 counties.

19 **Q.** So in -- I guess with respect to this

20 statement in the application --

21 **A.** We have not secured an agreement, so I

22 would say that wording probably should be changed

23 at this point.

24 **Q.** Okay.

25 **A.** I would say commitment's a better word

447

1 than agreement.

2 **MR. SUGGS:** That's all I need. Thank you.

3 **HEARING EXAMINER GARNER:** Okay. Before we

4 recall those witnesses, why don't we take a

5 ten-minute break.

6 **MR. BENDER:** Okay.

7 (Recessed at 2:56 p.m. and reconvened at

8 3:12 p.m.)

9 **HEARING EXAMINER GARNER:** We are back on

10 the record. Attorney Bender, you wanted to recall

11 some witnesses.

12 **MR. BENDER:** Yes. We're going to recall

13 Caitlin Olsen.

14 **HEARING EXAMINER GARNER:** Microphone.

15 **MR. BENDER:** Oh, sorry. We're going to

16 recall Caitlin Olsen. We're going to recall Wade

17 Boeshans. And then to answer some of the questions

18 that came up from staff, we'll be recalling Amanda

19 Douglas, and then we'll have one new witness. As

20 you may recall, there were questions to the

21 previous group and they were deferred to Jamey

22 Backus.

23 And I apologize, I misspelled his name

24 earlier when there was a question on it. It's

25 B-a-c-k-u-s.

448

1 So with that in mind, we'll call Caitlin

2 Olsen back.

3 **HEARING EXAMINER GARNER:** Ms. Olsen, just

4 a reminder, you're still under oath.

5 **REDIRECT EXAMINATION**

6 **BY MR. BENDER:**

7 **Q.** Caitlin, I'm going to show you what's been

8 previously marked as Exhibit 8B. Can you tell me

9 what 8B is?

10 **A.** (BY MS. OLSEN) 8B is the Storage Facility

11 Permit Application Comparison Summary Table.

12 **Q.** And when we started the hearings, I

13 briefly explained to the --

14 **MR. SUGGS:** Lawrence, have you handed that

15 out yet?

16 **HEARING EXAMINER GARNER:** Do you have one?

17 **MR. SUGGS:** No.

18 **Q.** (MR. BENDER CONTINUING) When we started

19 the hearing, Caitlin, you may recall me talking

20 very briefly about the fact that we were going to

21 spend a lot of time on the Leingang application and

22 then we were going to sort of do -- contrast and

23 compare Leingang with Fischer and Hintz after that.

24 Do you recall that?

25 **A.** I do.

449

1 Q. Okay. And is 8B sort of a visual aid and  
 2 you being able to go through and make those  
 3 comparisons?  
 4 A. That's right.  
 5 Q. Okay. Let's start -- I'm not going to  
 6 interrupt you much, but why don't you start by  
 7 first talking about the various columns and what  
 8 your method was for laying this out and then you  
 9 can explain it to the Commission.  
 10 A. Sure. So the intent of this comparison  
 11 summary table was just to lay out the differences  
 12 between all three permits. Listening to the  
 13 hearings today, I feel like most of those points  
 14 have been covered by DMR or otherwise in testimony.  
 15 But you'll see here across the top the  
 16 column named SFP Permit Section, that relates to  
 17 the section of the permit that we're talking about.  
 18 Then you'll see Summit Carbon Storage #1, TB  
 19 Leingang/Milton Flemmer 1, that's referring to  
 20 permit number one, the TB Leingang permit.  
 21 Likewise, the second column is the BK Fischer  
 22 permit. And the third column is the KJ Hintz  
 23 permit.  
 24 Q. Okay. Then let's -- why don't we start  
 25 out first with the Project Summary, and what I'll

450

1 probably do is have you explain that in detail, and  
 2 then we can kind of walk through the -- the other  
 3 sections and you can probably more abbreviate your  
 4 discussion of it.  
 5 A. Sure. So as Wade testified to the project  
 6 summary earlier today, the only material difference  
 7 in the three permits in relation to the project  
 8 summary is the applicant name listed. All other  
 9 aspects of Wade's testimony apply to the TB  
 10 Leingang, the BK Fischer and the KJ Hintz as you'll  
 11 see noted in that row.  
 12 Q. Okay. Let's go to the next column -- or  
 13 not the next column, the next row.  
 14 A. Section 1, Pore Space Access. There's  
 15 minimal content changes between the permits, as  
 16 you'll see noted. There is one thing to specify in  
 17 the BK Fischer permit and that is that there is  
 18 Coyote Creek -- Coyote Creek mining -- mine land  
 19 located within the hearing notification area.  
 20 Q. And I think as a result of some questions  
 21 that came to Amanda, she pointed that out in one of  
 22 the exhibits; is that correct?  
 23 A. That's right.  
 24 Q. Let's go on then to Section 2.  
 25 A. That's the geologic exhibits portion of

451

1 the storage facility permit. You'll remember as  
 2 Amanda testified to yesterday and earlier today  
 3 that the model extents used across all three  
 4 permits are the same. Logging efforts are the  
 5 same. Microfracture in situ stress tests were  
 6 performed in all three wells and all three --  
 7 excuse me -- all three permits, and all three  
 8 permits used the same 2D and 3D seismic surveys.  
 9 The differences that we'll talk about here  
 10 mainly have to do with site-specific  
 11 characterization work. You'll note that in the TB  
 12 Leingang permit the Minnekahta Formation is present  
 13 as Amanda had testified to earlier. The Minnekahta  
 14 Formation is absent in the BK Fischer permit and in  
 15 the KJ Hintz permit.  
 16 Again, site-specific storage complex  
 17 formation data is -- varies between all three  
 18 permits as noted here. That includes core data,  
 19 log testing, things like that.  
 20 And the last point to make sure on Section  
 21 2, Geologic Exhibits, is that the number of  
 22 borehole image logs varies between all three  
 23 permits.  
 24 Q. All right. Then let's go to Section 3,  
 25 please.

452

1 A. Section 3 discusses the geologic model  
 2 construction and numerical simulation of CO<sub>2</sub> as  
 3 Amanda had testified to previously. The same data  
 4 inputs were used. Again, as described in Section  
 5 2, the same model was used across all three  
 6 permits. The same simulation was performed where  
 7 all three well sites were simulated as injecting at  
 8 the same time. You'll note here that there are  
 9 minor variations in Section 3 where site-specific  
 10 data is used to derive individual injection  
 11 pressures, rates, temperatures and critical  
 12 threshold pressure estimations. Those are the only  
 13 differences of material value.  
 14 Q. All right. Then we'll go -- the next row  
 15 is Section 4, the Area of Review. Can you briefly  
 16 discuss what's contained in that row?  
 17 A. Area of review, as I testified to earlier,  
 18 uses the same groundwater sampling method across  
 19 all three permits. The methodology remains the  
 20 same. There are site-specific differences that  
 21 have to do with the number of wells based on the  
 22 specific area of review and what wells exist there.  
 23 Other differences include other  
 24 site-specific surface features which may include  
 25 springs, mining land as I discussed previously, and

453

1 any legacy oil or gas wells. To note, there are no  
 2 legacy oil and gas present in the TB Leingang or BK  
 3 Fischer area of review. There is one KJ -- there  
 4 is one legacy oil and gas well in the KJ Hintz  
 5 permit as I had testified to earlier.  
 6 Q. I'm going to try to get some points here  
 7 with the court reporter, so can you slow down just  
 8 a little bit?  
 9 A. I thought I was.  
 10 Q. Let's go to the next section, Section 5.  
 11 A. Section 5 discusses the testing and  
 12 monitoring plan. Across all three permits, leak  
 13 detection plans are similar. Flowline corrosion,  
 14 prevention plans are similar, and baseline testing  
 15 and logging plans are similar. There are minimal  
 16 differences for mechanical integrity testing across  
 17 all three permits.  
 18 You'll note that in the TB Leingang permit  
 19 the Milton Flemmer 1 will use tubing-conveyed  
 20 gauges, as Jean had previously testified to in  
 21 Section 9. The other two stratigraphic  
 22 monitoring -- excuse me -- stratigraphic  
 23 test/monitoring wells will use casing-conveyed  
 24 gauges. Environmental monitoring plans, again, are  
 25 site specific but the methodology remains the same.

454

1 Q. Okay. The next section, please.  
 2 A. Section 6, the Postinjection Site Care and  
 3 Facility Closure Plan. The monitoring programs are  
 4 similar across all three storage facility permits.  
 5 There are minimal differences related to monitoring  
 6 well-specific details, for example, the maximum  
 7 pressures seen across each storage facility.  
 8 Q. All right. And then Section 7 I have  
 9 labeled on my exhibit Emergency and Remedial  
 10 Response Plan. Can you discuss that for us,  
 11 please?  
 12 A. The content between all three permits is  
 13 the same materially.  
 14 Q. Okay. And Section 8?  
 15 A. Again, the material content is the same  
 16 and there are no -- no large differences.  
 17 Q. And Section 9?  
 18 A. All three storage facility permits abide  
 19 by the same North Dakota rules and regulations,  
 20 such as requiring surface casing 50 foot below the  
 21 lowermost USDW and CO<sub>2</sub> resistant cement casing  
 22 within the injection reservoir zones.  
 23 You'll note that the biggest differences  
 24 are that the Milton Flemmer 1 stratigraphic test  
 25 well and monitoring well was drilled deeper. It

455

1 was drilled to 12,000 feet. The other two wells,  
 2 the Archie Erickson and the Slash Lazy H, were  
 3 drilled to approximately around 6,000 feet. That  
 4 would result in just differences in cementing.  
 5 Some are two stages for the shorter wells and some  
 6 are three stages in those completions.  
 7 Q. All right. Let's go to Section 10, the  
 8 plugging plan.  
 9 A. There are no material differences in the  
 10 plugging plans across all three permits. Plug  
 11 placement will vary based on formation depths, you  
 12 know, depending on where those formations exist  
 13 within each specific wellbore.  
 14 Q. And Section 11, Injection Well and Storage  
 15 Operations?  
 16 A. Again, the Milton Flemmer 1 well, since it  
 17 will be using tubing-conveyed pressure gauges,  
 18 tubing will be installed in the Milton Flemmer 1  
 19 well. Prior to injection operations beginning in  
 20 that storage facility permit in the TB Leingang,  
 21 that well will be plugged back. It's currently  
 22 drilled to about 12,000 feet.  
 23 There will be no tubing installed in  
 24 either the Archie Erickson monitoring well or the  
 25 Slash Lazy H monitoring well.

456

1 There are site-specific differences in  
 2 maximum bottomhole pressures, injection amounts, et  
 3 cetera, as seen in Table 11-1.  
 4 Q. Okay. And Jay spent some time comparing  
 5 and contrasting the financial assurance. So  
 6 keeping that in mind, can you just discuss Section  
 7 12 for us?  
 8 A. Yeah. Jay did a great job testifying to  
 9 the differences already. There are minimal  
 10 differences between all three storage facility  
 11 permits. The total bond amount between the three  
 12 storage facility permits varies slightly, and those  
 13 minimal differences are related to the cost  
 14 estimates of the postinjection site care and  
 15 facilities plan, and namely the number of  
 16 monitoring wells at each site, the reservoir  
 17 monitoring well design characteristics, flowline  
 18 lengths and costs associated with endangerment of  
 19 USDWs.  
 20 Q. All right. Now let's spend a little time  
 21 with the appendices that are attached to each one  
 22 of the applications. Let's start with Appendix A.  
 23 A. There are no material differences between  
 24 all three permits other than they use site-specific  
 25 information.

457

1 Q. And Appendix B?

2 A. There are, again, no material differences

3 in Appendix B, Freshwater Well Sampling Analysis,

4 other than the results are site specific.

5 Q. And Appendix C?

6 A. There are no material differences in

7 Appendix C across all three storage facility

8 permits. You'll note here that site-specific

9 information, namely XRD data, was used to inform

10 mineralogical compositions for injection zone and

11 confining zones. Again, stratigraphic

12 well-specific water ionic compositions were used

13 and, therefore, the simulation results are site

14 specific.

15 Q. And Appendix D?

16 A. There are no material differences between

17 the three storage facility permits. You'll note

18 that TB Leingang does list information for those

19 tubing-conveyed pressure temperature gauges.

20 Q. And then finally Appendix E?

21 A. There's no material differences. The

22 differences relate to the permits themselves.

23 MR. BENDER: Mr. Examiner, you know, I

24 don't -- I think I'll offer the exhibit, and I

25 don't have any other further -- I don't have any

458

1 further questions for Ms. Olsen.

2 HEARING EXAMINER GARNER: Any objections?

3 MR. BRAATEN: No objection.

4 HEARING EXAMINER GARNER: Exhibit is

5 admitted.

6 You can proceed to your next witness.

7 MR. BENDER: Next witness is Wade

8 Boeshans.

9 HEARING EXAMINER GARNER: And just a

10 reminder, Mr. Boeshans, you're still under oath.

11 MR. BOESHANS: Yes.

12 **REDIRECT EXAMINATION**

13 **BY MR. BENDER:**

14 Q. Wade, while we're handing out the

15 exhibits, I'm just going to have you direct your

16 attention to what's been previously marked as

17 Exhibit 1C-1.

18 MR. BENDER: Derrick, can you tell me when

19 you get a copy?

20 MR. BRAATEN: Sure. Okay. I'm ready.

21 MR. BENDER: Okay. Thank you.

22 Q. (MR. BENDER CONTINUING) Wade, can you

23 tell me what Exhibit 1C-1 is?

24 A. (BY MR. BOESHANS) It is the storage

25 agreement for SCS3 for the KJ Hintz storage site.

459

1 Q. And can you briefly describe the amendment

2 to the Hintz storage unit that Summit is proposing

3 with this exhibit?

4 A. Yes. So in this exhibit it includes an

5 amendment in what is labeled in here as Section

6 3.12.

7 Q. And can you explain to the Commission

8 staff why Summit is proposing the addition of

9 Section 3.12 to the Hintz storage agreement?

10 A. Yes. So as you're aware in the -- from

11 the previous -- or my testimony yesterday, the KJ

12 Hintz is in proximity to the DCC facilities. I

13 think I mentioned yesterday -- or I did mention

14 yesterday that approximately, you know, three miles

15 between the storage boundary of -- storage area

16 boundary of the KJ Hintz and the DCC West facility.

17 And so Summit and Minnkota have been in discussions

18 around a border agreement in terms of how we would

19 work together to, you know, manage our storage

20 operations or cooperate in storage operations. And

21 so this amendment outlines what we have agreed to

22 in terms of general terms, and those discussions

23 have advanced to this point.

24 Q. It's my understanding, Wade, that the --

25 the Hintz storage agreement already has language

460

1 for a border agreement -- for the parties to enter

2 into a boarding -- border -- I'm having trouble

3 talking here -- border agreement. Why was it

4 necessary to add Section 3.12?

5 A. Yeah. So you're correct in that the

6 application or the border -- the storage agreement

7 in the application includes border agreements.

8 This section is specific to a border agreement

9 between Summit SCS3 and the DCC facilities.

10 And so we thought it was prudent at this

11 time given our discussions to lay out the general

12 terms that we've agreed to at this point in

13 anticipation of finalizing that border agreement of

14 coming here, but this would set forth in essence

15 the -- call it general terms and expectations of

16 the border agreement which the parties have agreed

17 to work together on. We believe it's in our best

18 interest to do so, and so we're submitting it here

19 today.

20 Q. So it's Summit's request and Minnkota's

21 request that the storage agreement for the Hintz

22 storage facility be amended to include the language

23 which is set forth in 3.12; is that a fair

24 statement?

25 A. Yes. That's correct.

461

1 MR. BENDER: That's all the questions I  
2 have for this witness. Offer that exhibit which is  
3 Exhibit 1C-1.  
4 HEARING EXAMINER GARNER: Any objection?  
5 MR. BRAATEN: I don't have an objection to  
6 the admission of the exhibit. I have an objection  
7 to the amendment itself to the application at this  
8 point given the circumstances, but not to the  
9 admission of that exhibit into the record.  
10 HEARING EXAMINER GARNER: We will note  
11 your objection and admit the exhibit.  
12 MR. BENDER: Mr. Examiner, we'd now like  
13 to move to Amanda Douglas. If you recall, there  
14 were some questions when we had the larger group up  
15 here that we believe Amanda can respond to. So I  
16 believe she's still sworn.  
17 HEARING EXAMINER GARNER: Yeah. Just a  
18 reminder you're still under oath.  
19 MS. DOUGLAS: Understood.  
20 **REDIRECT EXAMINATION**  
21 **BY MR. BENDER:**  
22 Q. Do you want to handle it the way you did  
23 last time, Amanda, where you indicate what the  
24 question is and then respond?  
25 A. (BY MS. DOUGLAS) Yes. And DMR staff, if

462

1 I -- I miss any, please let me know.  
2 The first question I believe that was  
3 asked and deferred was how a fracture pressure  
4 gradient influenced CO<sub>2</sub> plume size. Generally, the  
5 fracture pressure gradient is used to calculate the  
6 bottomhole pressure constraint, so 90 percent of  
7 the fracture pressure gradient is used to define  
8 the bottomhole pressure constraint as required by  
9 regulations. A higher fracture pressure gradient  
10 would result in a higher bottomhole pressure  
11 allowing for more injection of CO<sub>2</sub> which would  
12 generally result in a larger plume.  
13 However, I'd like to point out in the  
14 modeling cases that we ran in the permits in  
15 Section 3, the 2100 psi wellhead pressure  
16 constraint was met prior to the bottomhole pressure  
17 constraint being met. So in this case the higher  
18 fracture pressure gradient at one of the sites is  
19 not dictating a larger plume size for the case --  
20 simulation case presented in the permit  
21 application.  
22 Q. That's -- I believe that's the only  
23 question that -- oh, there's another one?  
24 A. I was just pausing. Sorry.  
25 Q. Oh, okay.

463

1 A. Waiting for --  
2 Q. That was a long pause, so --  
3 A. Waiting for the Commission to -- to write  
4 their notes.  
5 Another question I believe -- Travis, you  
6 asked a question on stabilized plume. Could you  
7 please restate your question, or postinjection  
8 period?  
9 MR. STOLL DORF: Oh, okay. Hang on one  
10 second. Yeah. On Figure 6-2, can you explain the  
11 CO<sub>2</sub> extent ten-year postinjection -- how that  
12 ten-year postinjection boundary was determined?  
13 It's on page 6-6 or 6, dash, 6.  
14 MS. DOUGLAS: Yep. So the simulation  
15 model was used to simulate the 20 years of  
16 injection and several years postinjection. And so  
17 the plume as labeled here is showing the CO<sub>2</sub> plume  
18 extent at ten years postinjection as determined --  
19 as predicted by that modeling simulation.  
20 MR. STOLL DORF: Okay. What parameters are  
21 used to determine when the plume is stable -- when  
22 the plume is stabilized?  
23 MS. DOUGLAS: So plume stabilization is  
24 determined by looking at the rate of change in  
25 plume area over time. So the rate of change in the

464

1 plume area over time decreases, and so we used --  
2 we calculated the rate of change over one-year time  
3 steps and looked at the point in time where rate of  
4 change slowed down. And in that case the cutoff  
5 was determined to be less than two square miles of  
6 change per year in plume area, and that was used as  
7 our cutoff to determine when the CO<sub>2</sub> plume  
8 stabilized. .2 -- .2 miles, sorry, if I misstated.  
9 MS. MADCHE: And that's using the  
10 5 percent saturation cutoff as well within those  
11 square footage movements?  
12 MS. DOUGLAS: That's correct.  
13 MR. STOLL DORF: Thank you. That's all I  
14 had.  
15 MS. DOUGLAS: So, Tammy, you asked a  
16 question about the pressure from the flowlines and  
17 the wellhead pressure used in modeling. Could you  
18 restate that question?  
19 MS. MADCHE: Yes. So on Table 11-1 on  
20 page 11-2, for all three applications there's a  
21 note that maximum injection pressure during  
22 operations will be limited to surface equipment  
23 pressure ratings and the maximum bottomhole  
24 pressure constraint. In Table 11-1 and in Section  
25 3 in the model you report that you used a wellhead

465

1 pressure constraint of 2100 psi alongside the  
 2 bottomhole pressure constraints. However, in the  
 3 testing and monitoring section in Table 5-4, the  
 4 flowline maximum operating pressure is listed at  
 5 2183 psi along with a maximum discharge pressure of  
 6 2160 psi. So my question was why those operational  
 7 values on the flowline are higher than the wellhead  
 8 pressure constraint that was used in the model.  
 9 MS. DOUGLAS: So can you restate the  
 10 value? Did you say it was 2,160?  
 11 MS. MADCHE: 2183 for max operating  
 12 pressure, 2160 for max discharge pressure.  
 13 MR. BENDER: Do you want to hand that off  
 14 to Jamey or --  
 15 MS. DOUGLAS: Yes.  
 16 MR. BENDER: Reluctantly?  
 17 MS. DOUGLAS: So before Lawrence  
 18 introduces Jamey, then, you guys had a question on  
 19 the stoplight system and the magnitude of  
 20 earthquakes used in that stoplight system. So John  
 21 described 2.7 is the low value for that stoplight  
 22 system. Again, that's the threshold for a felt  
 23 earthquake.  
 24 Greater than a magnitude of 4 was chosen  
 25 essentially for that next step in the stoplight

466

1 system. At an earthquake magnitude level 4, that's  
 2 where the magnitude of the earthquake would be  
 3 sufficient to -- it's generally described by the  
 4 USGS as shake or rattle dishes. That's how the  
 5 USGS describes it. So at that point the stoplight  
 6 system states that SCS will stop injection, perform  
 7 inspection on surface facilities and wells to  
 8 ensure there's no damage, and then reduce  
 9 operations while a detailed analysis is done to  
 10 determine whether or not injection operations  
 11 caused that or that could have been a natural  
 12 earthquake that their monitoring array is just  
 13 picking up.  
 14 And then over 4.5 is the cutoff for  
 15 complete stop of operations and working with the  
 16 regulator to determine if any changes to injection  
 17 operations are needed.  
 18 MR. SUGGS: So why the 4.5? What's the  
 19 significance of that transition?  
 20 MS. DOUGLAS: So as you get from 4 moving  
 21 up till 5, so earthquake magnitude 5 -- as  
 22 described by the USGS, at earthquake magnitude 5,  
 23 that's where you might start seeing potential  
 24 damages to structure, such as cracked drywall,  
 25 things like that. And so 4.5 is below that 5

467

1 threshold to provide that safeguard to make sure  
 2 that operations are shut down before any  
 3 earthquakes are induced that could cause damage.  
 4 MR. SUGGS: Okay. Thank you.  
 5 MS. DOUGLAS: Were there any other  
 6 questions that you recalled that were deferred?  
 7 MS. MADCHE: No.  
 8 MS. DOUGLAS: Okay.  
 9 MR. BENDER: We'll now call Jamey Backus,  
 10 I think, who can respond to the remaining  
 11 questions. Jamey will -- and Jamey has not been  
 12 sworn.  
 13 HEARING EXAMINER GARNER: I'm going to  
 14 swear him in.  
 15 MR. BENDER: Okay.  
 16 **JAMEY BACKUS,**  
 17 being first duly sworn, was examined and testified  
 18 as follows:  
 19 **DIRECT EXAMINATION**  
 20 **BY MR. BENDER:**  
 21 Q. Jamey, state your full name for the  
 22 record.  
 23 A. Jamey Backus.  
 24 Q. And, Jamey, I misspelled your name  
 25 earlier, so will you spell your last name?

468

1 A. B-a-c-k-u-s.  
 2 Q. And, Jamey, by whom are you employed?  
 3 A. Summit Carbon Solutions.  
 4 Q. In what capacity?  
 5 A. Project manager of topside facilities.  
 6 Q. Okay. And can you spend just a few  
 7 moments providing us with a summary of your  
 8 educational background and work experience?  
 9 A. Bachelor's degree in mechanical  
 10 engineering. I worked at DGC for a number of  
 11 years, which is the chemical plant up near Beulah,  
 12 and then I also worked in coal-fired power  
 13 generation in roles such as engineer, maintenance  
 14 superintendent and plant manager.  
 15 Q. And what are some of your duties and  
 16 responsibilities with respect to your employment at  
 17 Summit?  
 18 A. That would be design of the topside  
 19 facilities and equipment selection.  
 20 Q. Okay. I don't have any other questions.  
 21 He's available for the questions that -- I don't  
 22 remember exactly what they were, but I think Tammy  
 23 may have had a few, or do you recall the questions?  
 24 A. Well, I think I can -- I'll go through all  
 25 the ones I have and then let me know if I forgot

469

1 any.

2 So if we begin with the max pressure one

3 that Amanda referenced, the max operating pressure

4 of the pipe is set by thickness, flange ratings, et

5 cetera. The maximum output pressure of the pump is

6 set by the pump manufacturer, but we will have

7 controls in place so that the wellhead pressure

8 never exceeds the 2100 psi.

9 MS. MADCHE: Sounds good.

10 MR. BACKUS: Okay. The other question,

11 the block valve where NDL-327 breaks off to

12 NDL-325, we did not have intentions of putting a

13 block valve there. Now, with the discussion of

14 potentially putting a Coriolis meter there, we may

15 revisit that, but we did not originally have

16 intentions of putting one there because the mileage

17 of the pipeline in that area did not require it.

18 MS. MADCHE: So I guess I would just state

19 we would probably highly recommend it just because

20 it gives you that extra ability to isolate between

21 the facilities since they are owned by separate

22 LLCs.

23 MR. BACKUS: You'd asked about location of

24 where NDL-327 goes to 325, that is 141 North, 87

25 West, Section 5. The terminus point is 141 North,

470

1 86 West, Section 5.

2 MS. MADCHE: Okay.

3 MR. BACKUS: Those were the ones that I

4 had.

**EXAMINATION**

6 **BY MS. MADCHE:**

7 Q. Okay. So additional ones I have were what

8 you anticipate the average flow rate to be for the

9 three individual flowlines?

10 A. Yeah. So I would -- I would reference the

11 Section 11 for each one of the applications, and

12 our average -- average injection rate between the

13 two wells utilizing the 2100 psi wellhead

14 constraint, I would -- I would utilize the total of

15 that number as to what will actually flow through

16 the line to the -- to the well site.

17 Q. So just to confirm, you plan to maximize

18 right up until the 2100 psi wellhead pressure

19 constraint?

20 A. Depending on flow coming in from the

21 capture facilities --

22 Q. Sure.

23 A. -- you know, the 16 -- I'll talk in rough

24 numbers -- the 16 million tons that is currently

25 slated.

471

1 MS. MADCHE: Okay. I'm just checking to

2 make sure I don't have anything else here. I think

3 that's all I have for deferred questions. I'll let

4 anyone else go. I do have one question on the

5 Exhibit 8B afterwards, so --

6 MR. BENDER: When you say "afterwards,"

7 I'm sorry, I don't mean to question you, but --

8 MS. MADCHE: Anyone else in DMR that --

9 MR. BENDER: Oh, I see.

10 MS. MADCHE: -- has --

11 MR. BENDER: Okay.

12 MS. MADCHE: -- deferred questions.

13 Sorry.

14 MR. BENDER: Okay. Thank you.

15 HEARING EXAMINER GARNER: I think you can

16 ask, Tammy.

17 Q. (MS. MADCHE CONTINUING) All right. So on

18 Exhibit 8B, on page 5 of 6 I think there might be a

19 typo on the KJ Hintz column under Section 12,

20 number 2. It states, "Additional groundwater

21 monitoring well and soil gas profile station has

22 been added at legacy well 4942." Based on the

23 figure in the application it's an additional Fox

24 Hills monitoring, not a soil gas station, just to

25 confirm. And that would be figure -- give me a

472

1 second.

2 A. (BY MS. OLSEN) You're correct. That's a

3 typo. There is not a soil gas station planned near

4 that additional legacy well. Just a Fox Hills

5 monitoring well.

6 MS. MADCHE: Okay. Thank you.

7 HEARING EXAMINER GARNER: Well, at this

8 time I guess we'll move to cross-examination unless

9 there's anything else.

10 MR. BENDER: Yeah. And I will -- I'll

11 accommodate Derrick in any way. If you would

12 prefer the -- that other group of people that we

13 had up a few moments ago and have -- and do your --

14 conduct your cross-examination on those witnesses

15 first or if you want to use this group, whatever

16 you prefer, I'll try to accommodate you.

17 MR. BRAATEN: Give me just one moment,

18 please. Maybe for efficiency, if you don't mind, I

19 can just start with some of the questions I had for

20 these witnesses and then finish that and recall any

21 that I need that were up prior.

22 MR. BENDER: I guess I'll try not to

23 object, but I would hope you would keep it to --

24 MR. BRAATEN: Yeah. I have questions

25 based on this testimony.

473

1 MR. BENDER: On the direct we just had?

2 MR. BRAATEN: Yeah.

3 MR. BENDER: Okay. Fine.

4 **RECROSS-EXAMINATION**

5 **BY MR. BRAATEN:**

6 Q. Ms. Douglas, I think you had testified

7 about the plume stabilization parameters and

8 indicated that the stabilization cutoff was

9 determined to be when less than .2 square miles of

10 change occurred in any given year at the 5 percent

11 saturation cutoff; do I have that right?

12 A. (BY MS. DOUGLAS) Correct.

13 Q. Did you also model -- let me start over.

14 Did you run the model to determine the

15 total duration over which the plume would keep

16 moving regardless of rate?

17 A. I can't recall off of the top of my head.

18 I know we modeled it for a significant

19 postinjection duration. I was not directly

20 involved in determination of stabilized plume so I

21 don't have that information readily available.

22 Q. Who made the determination for stabilized

23 plume or who was involved with that?

24 A. Apologies, I don't have those names

25 readily available.

474

1 Q. Was it people at EERC?

2 A. Yes.

3 Q. Okay. There was some discussion of the

4 stoplight system. Why not notify DMR of events

5 between a 4 and a 4.5?

6 A. That's not included here as written, but I

7 think that'd be prudent to add that.

8 Q. Okay. Ms. Olsen, you testified on

9 Exhibit 8B regarding the different depths for the

10 three wells. Do you have an understanding as to

11 why they drilled the three different wells to those

12 specific depths?

13 A. (BY MS. OLSEN) Generally, yes.

14 Q. And just generally, what is your

15 understanding?

16 A. My understanding is they were drilling the

17 Milton Flemmer to get core data from deeper

18 formations.

19 Q. Okay. Did they complete or are there

20 plans to complete that at a higher interval at some

21 point with a plug?

22 A. There are no plans, to my knowledge.

23 MR. BRAATEN: I have some questions,

24 Lawrence, related to surface facilities, and

25 Mr. Volk did some testifying but it sounds like

475

1 Mr. Backus has an understanding as well. Do you

2 mind if I ask him the questions, and if he can't

3 answer, we can call Jay Volk up?

4 MR. BENDER: I have no problem with that.

5 It may save time if you just try that approach.

6 Q. (MR. BRAATEN CONTINUING) Okay.

7 Mr. Backus, can I have you turn to the generalized

8 flow diagram on page 5-12 of Exhibit 1A?

9 A. (BY MR. BACKUS) Okay.

10 Q. Can you describe the purpose of the

11 blowdown which is indicated on the generalized flow

12 diagram?

13 A. Thank you. In hopes of not getting called

14 up, I didn't bring my glasses.

15 Oh, the blowdown on the receiver?

16 Q. Correct.

17 A. Yes. That would be for when the -- when a

18 pig is received in there and the receiver is

19 isolated, that blows down the pressure and CO<sub>2</sub> so

20 that the pig can be removed and data can be

21 retrieved from it.

22 Q. Are there emergency pressure relief valves

23 on the system anywhere as far as what we're looking

24 at in the generalized flow diagram?

25 A. There is a thermal relief valve, but not

476

1 emergency pressure relief valve.

2 Q. How do you deal with an unexpected spike

3 in pressures coming through this system?

4 A. I think that is dealt with through

5 controls of the pipeline pump pressure control

6 valves to maintain pressures that are -- that can

7 be withheld within the existing facility.

8 Q. Can you explain that a little more?

9 A. In order to have a pressure spike,

10 something would need to do that, and a pump would

11 be the obvious thing, and there are controls on the

12 pump, be it vari -- variable frequency drive or

13 just the nature of the pump that would keep it

14 underneath of the failure pressure of the piping --

15 or the maximum operating pressure, I should say.

16 I'm sorry.

17 Q. Do you believe there's a 0 percent chance

18 of pressure causing some kind of a release from the

19 surface facilities post Midwest Carbon Express'

20 terminus point?

21 A. I don't know that I can say there is a

22 0 percent chance of that ever happening.

23 Q. Have you done any kind of dispersion

24 modeling to determine the areas in which you would

25 need to provide notice to people if you did have a

477

1 release in one of those sites?

2 MR. BENDER: Before you answer that

3 question, I want to caution you that there's been

4 some -- there's been a dispersion model that's been

5 prepared and it's been submitted to the Public

6 Service Commission and it's confidential. So you

7 can answer the question, but be very careful that

8 you don't answer it in a way that provides

9 information with the model that was supplied to the

10 PSC.

11 MR. BACKUS: I can say that I was not

12 personally involved with any of the dispersion

13 modeling that has been done.

14 MR. BRAATEN: And fair objection,

15 Lawrence. I'm actually not trying to get into

16 that.

17 MR. BENDER: I appreciate that.

18 Q. (MR. BRAATEN CONTINUING) But my

19 understanding of the dispersion model with the PSC

20 is that that relates to the main line and to that,

21 and I'm asking just specifically if there was any

22 dispersion modeling done post main line on the

23 flowlines in those facilities?

24 A. I was not involved in any of that.

25 Q. Okay. And so you're not saying there

478

1 wasn't one done. You're just saying you don't

2 know?

3 A. Yes. That's what I'm saying.

4 Q. Okay. Is there -- do you know of anyone

5 else that's testifying that would know whether or

6 not one was done?

7 A. You could ask Mr. Powell.

8 Q. Okay. If Mr. Powell didn't know, is there

9 anyone else that would?

10 A. He would be the one to ask that question

11 to.

12 Q. Okay. What is the purpose of the thermal

13 relief valve?

14 A. So in cases where you can isolate a

15 section of pipe and it would be full of CO<sub>2</sub> at

16 pressure, if it heats up through whatever means,

17 say the sun is shining on that pipe, the CO<sub>2</sub> will

18 expand and this -- the thermal relief makes sure it

19 does not exceed safe operating limits.

20 Q. How does the thermal relief valve do that?

21 A. More than likely it would be the type of

22 thermal relief valve that is spring operated, so as

23 the pressure would increase, it would relieve that

24 and then close again.

25 Q. Is the valve opened based on temperature

479

1 or pressure?

2 A. The valve would open based on pressure.

3 Q. What pressure?

4 A. I believe that number is 5 percent over

5 maximum operating pressure.

6 Q. Wouldn't that risk a failure if the max

7 operating pressure is based on the manufacturer's

8 recommendations?

9 A. No, I don't believe it would. That --

10 that is a normal thing when you talk about, say, a

11 vessel. Normally they operate -- the pressure

12 safety valve in that case is normally set 10

13 percent over -- 5 to 10 percent over the operating

14 pressure.

15 Q. And when you say "the operating pressure,"

16 are you saying the max operating pressure as

17 established by the manufacturer of the pipe?

18 A. I'm saying the 900-pound class standard we

19 are working off of, that operating pressure, as set

20 by ASME, I believe.

21 Q. Okay. Does the valve, then, close by

22 itself automatically once it gets back down below

23 that pressure?

24 A. It does.

25 Q. Okay. So I asked you earlier about a

480

1 dispersion model, but are you aware of any testing

2 done on predicted maximum release from the line

3 through that valve?

4 A. Because -- because of that thermal relief

5 valve?

6 Q. Correct.

7 A. Yes, I am.

8 Q. And what -- what kind of studies were done

9 to determine what the maximum release would be from

10 that thermal relief valve?

11 A. It was -- a third party performed a study

12 based on a temperature rise in that line and the

13 thermal expansion of the CO<sub>2</sub> given the size of the

14 line and the volume contained in, how much it would

15 need to relieve.

16 Q. As well as the intended flow rate?

17 A. Yes.

18 Q. And operating pressure?

19 A. Yes. Well, it -- when you say flow rate,

20 do you mean through the valve or through the line?

21 Q. I don't know.

22 A. I can say this: If that would happen, it

23 is because everything is stopped. There is no flow

24 through the line and valves are closed.

25 Q. Okay. Yeah, so through the valve.

481

1 What was the maximum amount of CO<sub>2</sub>

2 predicted to be released from the thermal valve in

3 the scenario you described?

4 **A.** Approximately .136 tons per minute.

5 **Q.** And did they determine the maximum length

6 of time they thought such a release would

7 potentially occur under those parameters?

8 **A.** Based on the largest segment of line that

9 one of these exists on, I think there would be

10 approximately three tons of CO<sub>2</sub>. That would be if

11 you emptied the line completely, which would be

12 highly unlikely, but that would be if you emptied

13 the line completely.

14 **Q.** So when the thermal valve is released,

15 does that trigger other valves to stop flow in the

16 line or do you have to manually shut that off?

17 **A.** Well, as I said for -- for that to trip,

18 that means that there is no injection going into

19 that well. We have isolated the valves because it

20 is only as the temperature warms up, the pressure

21 would increase to release that. So there would be

22 no replacement CO<sub>2</sub> coming into that line. It's

23 simply to protect the line.

24 **Q.** Okay. Do you have an understanding of how

25 far three tons of CO<sub>2</sub> would disperse under natural

482

1 wind and weather conditions?

2 **A.** I do not.

3 **Q.** I'm not sure who this question is for, but

4 I think there was some testimony about who would be

5 operating the flowlines, so not the main line,

6 Midwest Carbon Express, but the flowlines. Was

7 there testimony that the flowlines would be owned

8 by the storage facilities but operated by SCS

9 Transport?

10 **A.** (BY MR. BOESHANS) That's correct.

11 **Q.** And when did that arrangement -- when was

12 that arrangement decided upon?

13 **A.** That -- I don't know that I can give you a

14 specific timeline in which that decision was made.

15 **Q.** Was it within --

16 **A.** I think it was generally that the intent

17 that -- from my recollection, it was always the

18 intent that it would be an integrated system

19 operated -- connected with a common control system

20 as Jamey described earlier.

21 **Q.** Are there any contracts signed between the

22 various entities to formalize that relationship for

23 operating the flowlines?

24 **A.** We do not have interoperating agreements

25 in place today between the entities.

483

1 **Q.** Or any other kinds of contracts to govern

2 that?

3 **A.** Not at this time.

4 **Q.** I apologize, I'm jumping around a little

5 now, but, Ms. Douglas, I think you had talked about

6 this traffic light system, and under the event of

7 greater than 4.01 one of the plans is to continue

8 operations at a reduced rate and/or below a revised

9 maximum operation pressure. How would you make

10 those determinations as to how much to reduce the

11 rate or the maximum operation pressure?

12 **A.** (BY MS. DOUGLAS) At this time what's

13 specified is injection rate would be reduced to no

14 less than 50 percent.

15 **Q.** How do you decide if it'll be 50 or 55 or

16 60, for example?

17 **A.** So as part of this stoplight system and as

18 this traffic light system is part of this seismic

19 monitoring, we'd be acquiring continuous seismic

20 data. So we'd take into account not just that

21 larger event but if there were other events, how

22 many, their magnitude, time duration, as well as

23 their epicenters.

24 **Q.** Mr. Backus, do you know what the diameter

25 is of the thermal valve?

484

1 **A.** (BY MR. BACKUS) 1 inch, I believe.

2 **Q.** Okay. Are there any other pressure relief

3 systems post terminus of the Midwest Carbon Express

4 that we haven't discussed?

5 **MR. BENDER:** I think I'd rather have you

6 address that question to Jimmy. He's more familiar

7 with those things, and he'll be coming up after

8 this.

9 **MR. BRAATEN:** Okay. Okay. I think that's

10 all the questions I have for these witnesses. I

11 have a few, I think, for Mr. Powell and Ms. --

12 one -- well, a couple quick ones for Ms. Oddy.

13 **MR. BENDER:** Do you want the whole group

14 or --

15 **MR. BRAATEN:** No, I think -- well, I think

16 we can start here. I think that they may be able

17 to answer them all.

18 **MR. BENDER:** Okay.

19 **CROSS-EXAMINATION**

20 **BY MR. BRAATEN:**

21 **Q.** Ms. Oddy -- am I saying that right, Oddy?

22 **A.** (BY MS. ODDY) Yes. Oddy.

23 **Q.** You made a reference to CO<sub>2</sub> resistant

24 cement. Can you describe what that is?

25 **A.** Yep. So as part of the design plan, we

485

1 have consulted with contractors who specialize on  
 2 cementing design in the basin, and part of that is  
 3 evaluating the downhole pressures and temperatures  
 4 as well as the interactions between the CO<sub>2</sub> stream  
 5 as well as the formation water in accordance to the  
 6 regulations. And so we're not looking at your  
 7 conventional oil and gas cement, primary cement.  
 8 The cementing system is tailored to provide  
 9 resistance to CO<sub>2</sub> with additions to different  
 10 chemicals and different formulations within the  
 11 cement.  
 12 Q. Other than the pH, are there other  
 13 properties of the cement that are specific to CO<sub>2</sub>  
 14 resistant cement that make it different than your  
 15 regular cement used for plugging wells in the oil  
 16 patch?  
 17 A. So -- yeah, so for both plugging as well  
 18 as primary cementing in our -- in our injection  
 19 wells and monitoring wells, some parameters I can  
 20 name off the top of my head is the permeability  
 21 would be significantly reduced in the formulation.  
 22 Those -- I can't recall any other parameters. Like  
 23 I said, we contracted specialized cementing  
 24 contractors.  
 25 Q. So just as a general matter, would the

486

1 lower permeability in that cement result from a  
 2 greater clay content?  
 3 A. So it would just mean that, generally  
 4 speaking, there'd be less chances on interactions  
 5 with, you know, potential oxidation or any chemical  
 6 reactions downhole.  
 7 Q. What do they add to the cement to prevent  
 8 oxidation or chemical reactions downhole that is  
 9 different than the cement used for normal cementing  
 10 or plugs in the oil patch?  
 11 A. I'm not privy to the specific additives by  
 12 the contractor.  
 13 Q. Do you know if anyone at Summit or EERC  
 14 is?  
 15 A. Again, we've contracted technical experts  
 16 from a cementing company and so they would know  
 17 the -- they, as in the contractor, have, you know,  
 18 a proprietary formulation of the cement system, and  
 19 then it would just be our responsibility to make  
 20 sure that those are rated for the bottomhole  
 21 pressures that we expect.  
 22 Q. What is the name of the contractor?  
 23 A. So the two commonly contracted out for  
 24 carbon portfolios would be either Schlumberger or  
 25 Halliburton.

487

1 Q. Okay. Is there any requirement to use CO<sub>2</sub>  
 2 resistant cement in these wells?  
 3 A. So under Administrative Code 43-05-1-11 --  
 4 this would be in my own summarization, but in the  
 5 selection of casing and cement, you know, where --  
 6 some of the factors that we need to take into place  
 7 in the design is bottomhole pressures,  
 8 temperatures, as well as the potential  
 9 corrosiveness when CO<sub>2</sub> is introduced with formation  
 10 water.  
 11 Q. And the cement both used to cement in a  
 12 casing as well as the plugs interacts with CO<sub>2</sub> in  
 13 the reservoir with these wells, the injectors?  
 14 A. With respect to the injection wells, yes,  
 15 it would be -- yep, because it'd be isolating the  
 16 injection zone. So it would -- the CO<sub>2</sub> would be  
 17 going through the casing into the cement into the  
 18 reservoir.  
 19 Q. Did they use CO<sub>2</sub> resistant cement to cement  
 20 in the casing or plug the Raymond Jensen well?  
 21 A. I don't have the details of what type of  
 22 grade of cement that was used in the Raymond Jensen  
 23 well.  
 24 Q. Why wouldn't that be as important as  
 25 knowing the cement in the injector wells?

488

1 A. We don't anticipate, as per Caitlin or  
 2 Amanda -- I can't remember which one, but we don't  
 3 anticipate the CO<sub>2</sub> plume at this time to reach the  
 4 Raymond Jensen well. However, it is part of the  
 5 area of review and therefore that was reviewed  
 6 as -- as Caitlin testified to.  
 7 Q. Okay. And the surface casing for the  
 8 Raymond Jensen well is not 50 feet below the lowest  
 9 USDW; right?  
 10 A. I'd have to -- I'd have to refer to that  
 11 diagram.  
 12 Q. Would you mind taking a look?  
 13 A. Oh, this is the TB Leingang.  
 14 Q. You know, I might be able to speed this  
 15 up. Are you confident that the depth of the casing  
 16 of the Raymond Jensen is in the application?  
 17 A. I do not know. I'd have to refer back to  
 18 the --  
 19 Q. Okay. I'll have you go ahead and look.  
 20 A. Can you repeat your question, please?  
 21 Q. Is the surface casing for the Raymond  
 22 Jensen well 50 feet -- at least 50 feet below the  
 23 lowest USDW?  
 24 A. According to the diagram here, I guess I'm  
 25 not sure in this area what would be considered what

489

1 the lowest underground source of drinking water is.

2 Q. What's the depth of the surface casing?

3 A. On the diagram it's 330 -- 330 feet.

4 Q. Okay.

5 MR. BENDER: Mr. Braaten, if you don't

6 mind, I think Caitlin can address that question, if

7 you want.

8 MR. BRAATEN: Oh, okay. Thank you.

9 MS. OLSEN: Can you repeat the question?

10 Sorry.

11 Q. (MR. BRAATEN CONTINUING) Is the surface

12 casing of the Raymond Jensen at least 50 feet below

13 the lowest USDW?

14 A. (BY MS. OLSEN) It's not.

15 Q. Okay. When you did the model for the

16 leaky well scenario, were you doing that based on

17 the location of the Raymond Jensen well?

18 A. No, we did that leaky well scenario to

19 delineate the AOR using the risk-based AOR method.

20 Q. Okay. I'm going to -- just a couple more

21 here, and I'm not sure who this one's for, but it

22 relates to the -- the valves in the surface

23 facilities we discussed. And, Mr. Powell, I think

24 these were for you.

25 But the first question is have you

490

1 designed that system to accommodate a situation

2 with a blocked flow in the system?

3 A. (BY MR. POWELL) Yes. So the general flow

4 diagram is not the piping and instrument diagram.

5 So the thermal relief was just to relieve pressure

6 in that bypass on that valve. So, yes, in all

7 segments where the -- a segment could be isolated

8 by a valve or shut in, yes, there is pressure

9 relief in those segments.

10 As far as design pressure, the pipe is

11 designed for 195. It's hydro tested to 125 percent

12 of that maximum operating pressure. The valves

13 were designed at Class 900 and bench-tested to 150

14 percent of pressure.

15 THE REPORTER: Can I have you speak up,

16 please?

17 MR. POWELL: Oh, sorry. I'll repeat it.

18 So as far as the design pressure of the

19 pipeline, it's per 195 regulation and then it's

20 hydro tested to 125 percent of the MAOP, which

21 would be 125 percent of the 2183. The valves are

22 designed to Class 900 and that pressure value and

23 then they're bench-tested at 150 percent of that.

24 Q. (MR. BRAATEN CONTINUING) Why was the

25 piping and instrumentation diagram not provided as

491

1 part of the application?

2 A. I can't answer that question.

3 Q. Can it be provided?

4 A. Yes.

5 Q. Rather than asking you to identify the

6 location and size of every valve in there, would

7 you be willing to simply provide the piping and

8 instrumentation diagram?

9 A. Yes.

10 Q. Oh, what is the diameter of those other

11 valves that you just discussed?

12 A. Again, we'll reference them on the piping

13 and instrument diagram. To Jamey's testimony,

14 they're typically 1-inch to 2-inch valves.

15 Q. But the diameter of those valves will be

16 listed on the piping and instrumentation?

17 A. Not the diameter of the valve. The size

18 of the valve. The valves themselves are standard,

19 at least in my experience, but the connections to

20 the piping, to the carrier pipe, that's typically

21 three-quarter inch to 1 inch, but we'll have that

22 on the P&I data.

23 Q. Okay.

24 A. And just to clarify, any relief of

25 pressure would not be external to the pipe. It

492

1 would be relieved into the pipeline. So if it's --

2 if you've got pressure relief between two

3 segments -- a segment of the pipe that could be

4 isolated with two closed valves, the pressure would

5 be iso -- or relieved downstream. It would not be

6 released to the atmosphere. So that wasn't clear

7 from what I heard before.

8 Q. Okay. Thank you. So the only valve that

9 would release to the atmosphere would be the

10 temperature valve --

11 A. No. The temperature.

12 Q. -- or thermal valve? Sorry.

13 A. The thermal relief should be -- should be

14 via tubing connected downstream. So if you have

15 those two -- if there's pressure built up in that

16 valve bypass, which would typically be closed in

17 normal operation, then you could -- to Mr. Backus'

18 testimony, you could have a thermal pressure

19 buildup, and if that's the case, there's a set

20 point on that valve, 110 percent, whatever it is --

21 we'll have that set point and that should be

22 indicated on the P&ID, at least at this point.

23 Then when it reaches that set point, it relieves

24 downstream of that closed valve so it relieves the

25 pressure on that piping, that segment of piping.

493

1 Q. The thermal valve releases the pressure  
2 downstream?  
3 A. That thermal relief valve relieves the  
4 pressure from that small segment of bypass piping  
5 downstream of the closed valve.  
6 Q. So it doesn't release anything to the  
7 atmosphere?  
8 A. No. The only thing that would be released  
9 to the atmosphere is where you saw the blowdown  
10 referenced. That would be a controlled blowdown or  
11 release to the atmosphere if that were needed for  
12 normal or abnormal operating conditions.  
13 Q. What kind of a spike in pressure would you  
14 expect if you had a valve shutdown at the wellhead?  
15 A. Again, these -- these set points -- I'll  
16 back up.  
17 I mentioned earlier in previous testimony  
18 about a surge analysis. So that surge analysis  
19 is -- was conducted on every -- or every main line  
20 valve, including in the flowline segments, was  
21 evaluated for an inadvertent closing. And the  
22 regulation is 110 percent of maximum operating  
23 pressure so it cannot exceed that. And in our case  
24 I believe the maximum was 107 percent. We can tell  
25 you exactly what the segments were in the

494

1 flowlines, I don't remember off the top of my head,  
2 but they were less than 110 percent.  
3 Q. What was the time duration that was  
4 modeled over?  
5 A. The -- the valves themselves are all  
6 actuated and have the capability to close in  
7 seconds, and we can confirm, but I believe the time  
8 frame was minutes, two to five minutes.  
9 Q. So if all of your pressure relief systems  
10 relieves pressure within the line downstream and  
11 you have a valve unexpectedly shut at the wellhead,  
12 how do you relieve that pressure?  
13 A. You're talking about upstream of the  
14 wellhead --  
15 Q. Right.  
16 A. -- to the inlet valve?  
17 Q. Right. Yeah.  
18 A. If it's the segment up -- well, let me  
19 back up.  
20 Because there's -- remember, this is all  
21 automatically or automated or controlled by a  
22 control center, and there are -- there will be  
23 tight operating pressure boundaries. So they're  
24 continually seeing when any pressure changes may  
25 happen in a line, so -- and if -- there will be set

495

1 points, and I can't tell you what they are at this  
2 ten seconds, but there will be an alarm and then  
3 there will be a secondary alarm. And so the  
4 control center operator will have notification if  
5 there's a -- if there's a pressure increase, and so  
6 there will be procedures or protocol they take to  
7 relieve that pressure before there's a buildup that  
8 would overpressure any equipment, whether it's that  
9 inlet valve to the wellhead or that segment of  
10 piping. So there shouldn't be a situation even in  
11 an abnormal operating condition where that  
12 equipment will be overpressured.  
13 Q. But the protocol you mention for ensuring  
14 that that doesn't get overpressured relies on human  
15 judgment?  
16 A. No. There will be an automatic -- or you  
17 can't have automatic set points, but, yes, the  
18 first -- the first response would be from an  
19 individual in the control center. That's correct.  
20 Per procedures on what to do in a what-if  
21 situation.  
22 Q. Will there be protocols provided to the  
23 DMR or any regulatory bodies with respect to the  
24 decision tree for the person making that decision?  
25 A. Those will be in the standard operating

496

1 procedures. So I'm not -- I don't have the  
2 experience with the DMR to see if that's something  
3 that they are -- that they want to audit or  
4 interested in reviewing. If they do, they would be  
5 available. They're not confidential or will not be  
6 confidential.  
7 Let me clarify. We're not going to  
8 publish them on the website, but if a regulatory  
9 body wants to see our operating procedures,  
10 absolutely.  
11 Q. Mr. Powell, were you here during my  
12 questioning of, I believe, Ms. Douglas when I was  
13 asking about what Summit would do if after, for  
14 example, the five-year review you determined that  
15 you needed to change the boundaries of the storage  
16 facility and then my questions following that were  
17 about how you would allocate compensation in that  
18 event? Did you -- were you here during that  
19 testimony?  
20 A. I was.  
21 Q. So let's just take as a hypothetical a  
22 situation where Summit makes the determination  
23 after five years that the data on the ground  
24 justifies adjusting those storage facility  
25 boundaries. What is Summit's plan with respect to

497

1 how to adjust the compensation to the landowners  
 2 that has been paid up until that point?  
 3 **A.** I don't have that knowledge of how the --  
 4 how the compensation may or may not be adjusted to  
 5 landowners.  
 6 **Q.** Is there anyone else in the company that  
 7 would have that knowledge?  
 8 **A.** I'll defer to Mr. Boeshans.  
 9 **Q.** Okay.  
 10 **MR. BRAATEN:** I'm not trying to get out of  
 11 order, Lawrence, but do you mind -- this is like  
 12 right near the end. Do you mind if we have  
 13 Mr. Boeshans come up?  
 14 **MR. BENDER:** If you're getting close to  
 15 the end, I don't have any problem with that.  
 16 **Q.** (MR. BRAATEN CONTINUING) Mr. Boeshans, do  
 17 you have an under -- well, I'll just start over.  
 18 In the hypothetical scenario that five  
 19 years down the road Summit determines that it wants  
 20 to adjust the boundary of the storage facility  
 21 based on the data it gets from its monitoring  
 22 activities, how would it allocate or reallocate  
 23 payments already made to the owners in the storage  
 24 facility?  
 25 **A.** (BY MR. BOESHANS) So in that situation,

498

1 what I would see is, you know, it's an it-depends  
 2 answer. It depends on what the adjustment is to  
 3 the boundary. And then if we were going to make an  
 4 adjustment to the boundary, it would be -- you  
 5 know, be decided, you know, by hearing like this  
 6 with the Commission because that would be a major  
 7 modification to the permit.  
 8 And so at that time we would have more  
 9 information around what the change is, the  
 10 adjustment is, how much -- how long it's been  
 11 operated and have a -- probably have -- we'd have a  
 12 recommendation in terms of how to do that. We  
 13 don't have a plan exactly today in terms of how  
 14 that would happen.  
 15 **Q.** If you expand the storage facility after  
 16 five years, the boundary of the -- I'm going to  
 17 start over.  
 18 If Summit were to make a major  
 19 modification and expand the border of the storage  
 20 facility through a hearing with the DMR, would you  
 21 agree that you need to pay the new owners now being  
 22 included in the storage facility for prior  
 23 injections?  
 24 **MR. BENDER:** I'm going to object because I  
 25 think you're asking for a legal conclusion.

499

1 **MR. BRAATEN:** That's fair.  
 2 **Q.** (MR. BRAATEN CONTINUING) But what I'm  
 3 actually asking is what Summit's opinion would be  
 4 on that issue. Not whether they need to, just  
 5 whether you would.  
 6 **A.** So you're asking me if there was an  
 7 adjustment -- your situation, if there was an  
 8 adjustment after five years and we had been  
 9 injecting, would we pay the landowners that were  
 10 added to the unit?  
 11 **Q.** For the past injections.  
 12 **A.** For the past injections. I don't know  
 13 that I can answer that. It's a -- I think you'd  
 14 have to understand more about that situation, what  
 15 led to the changing of the units.  
 16 **Q.** What more do you want to understand? What  
 17 information are you missing to make the  
 18 determination?  
 19 **A.** Well, I'm missing the historical operation  
 20 and what led to the need for a change.  
 21 **Q.** Well, let's presume -- sorry. This was  
 22 implied, but I should be explicit. You're going to  
 23 change the size of the storage facility because  
 24 you've determined that it was inaccurate and that  
 25 the plume is going to move further than you

500

1 originally anticipated such that you need to expand  
 2 the boundary of the storage facility.  
 3 **MR. BENDER:** And I'm going to object.  
 4 You've asked that question previously in a little  
 5 bit different manner and he said he needs to know  
 6 more information before he can answer the  
 7 question -- answer the question. So I'm going to  
 8 object.  
 9 **HEARING EXAMINER GARNER:** I'm going to let  
 10 him answer if he knows.  
 11 **MR. BOESHANS:** I don't know.  
 12 **Q.** (MR. BRAATEN CONTINUING) You don't know  
 13 what?  
 14 **A.** I don't know the answer to your question  
 15 right now.  
 16 **Q.** So Summit won't make a commitment to pay  
 17 owners added into an expanded storage facility for  
 18 prior injections?  
 19 **MR. BENDER:** Objection. Asked and  
 20 answered.  
 21 **HEARING EXAMINER GARNER:** Sustained.  
 22 **Q.** (MR. BRAATEN CONTINUING) Was the answer  
 23 no?  
 24 **MR. BENDER:** He said he didn't know.  
 25 **Q.** (MR. BRAATEN CONTINUING) Okay. But if

501

1 you don't know whether or not Summit will make a  
 2 commitment to do that, then the answer is that  
 3 they're not making a commitment right now to do  
 4 that; right?  
 5 MR. BENDER: Objection. I mean, we've  
 6 covered this ground now three times.  
 7 HEARING EXAMINER GARNER: Sustained.  
 8 Q. (MR. BRAATEN CONTINUING) Does anyone at  
 9 Summit know the answer to that question?  
 10 MR. BENDER: Objection.  
 11 MR. BRAATEN: What's the objection?  
 12 HEARING EXAMINER GARNER: He can -- he can  
 13 answer that one.  
 14 MR. BOESHANS: I don't know. It's not a  
 15 question that I've raised with anybody at Summit.  
 16 Q. (MR. BRAATEN CONTINUING) Has anyone else  
 17 at Summit raised the question with you or anyone  
 18 else that you're aware of?  
 19 A. Not that I'm aware of.  
 20 Q. I apologize if someone did ask this, but  
 21 there was a question earlier -- Mr. Powell, I think  
 22 it might have been deferred to you, but -- or  
 23 Mr. Boeshans -- with respect to the payments being  
 24 made to landowners on the CO<sub>2</sub> stream, is that -- are  
 25 those payments being made based on the full stream

502

1 or the actual CO<sub>2</sub> mass in the stream?  
 2 MR. BENDER: I'm going to object. You  
 3 seem to be using the past tense. You said that we  
 4 have paid or am I misunderstanding you?  
 5 MR. BRAATEN: Well, I can -- I'll just  
 6 change it to avoid that.  
 7 MR. BENDER: Okay.  
 8 MR. BRAATEN: I see what you're saying.  
 9 Q. (MR. BRAATEN CONTINUING) So when you go  
 10 to pay landowners for injections, is it your intent  
 11 to pay based on the full stream of substances  
 12 injected or the CO<sub>2</sub> mass in the stream?  
 13 A. The intent is to pay on the -- the full  
 14 stream as it's defined in the storage agreement --  
 15 Q. Okay.  
 16 A. -- which is associated substances.  
 17 MR. BRAATEN: Okay. No further questions.  
 18 HEARING EXAMINER GARNER: I believe the  
 19 staff might have some questions. Already answered?  
 20 Okay. Lawrence, any further witnesses?  
 21 MR. BENDER: Not at this time.  
 22 HEARING EXAMINER GARNER: Okay.  
 23 MR. BRAATEN: Could we take a break?  
 24 HEARING EXAMINER GARNER: Take a break  
 25 before you call?

503

1 MR. BRAATEN: Yeah.  
 2 HEARING EXAMINER GARNER: Sure. Take a  
 3 ten-minute break.  
 4 (Recessed at 4:42 p.m. and reconvened at  
 5 4:59 p.m.)  
 6 HEARING EXAMINER GARNER: We are back on  
 7 the record. Attorney Braaten, you can proceed with  
 8 your first witness.  
 9 MR. BRAATEN: All right. We are calling  
 10 Shane Bofto to appear by phone. Shane, can you  
 11 hear me okay?  
 12 MR. BOFTO: I can hear you.  
 13 HEARING EXAMINER GARNER: Okay. Let me  
 14 swear him in real quick.  
 15 MR. BRAATEN: Okay. Shane, the hearing  
 16 examiner is going to swear you in.  
 17 **SHANE BOFTO,**  
 18 being first duly sworn, was examined and testified  
 19 as follows:  
 20 **DIRECT EXAMINATION**  
 21 **BY MR. BRAATEN:**  
 22 Q. Shane, can you state your full name and  
 23 spell your last name for us?  
 24 A. My name is Shane Bofto. Last name is  
 25 B-o-f-t-o.

504

1 Q. And by whom are you employed?  
 2 A. HydroSolutions, Incorporated.  
 3 Q. And just generally speaking, what kind of  
 4 company is HydroSolutions, Incorporated?  
 5 A. We're a services, disabled veteran-owned,  
 6 small business associated with consulting and  
 7 environmental and water resources.  
 8 Q. Okay. Can you describe your educational  
 9 background, please?  
 10 A. Sure. I have a bachelor of science in  
 11 chemical engineering from Montana State University  
 12 and an M.B.A. from the University of Mary in  
 13 Bismarck.  
 14 Q. And can you give us a description of your  
 15 professional experience from college up until you  
 16 began with HydroSolutions?  
 17 A. Sure. I initially out of college worked  
 18 at a petroleum refinery in the environmental health  
 19 and safety department. I then went to work out in  
 20 Seattle where I focused on mining internationally,  
 21 consulting primarily in water quality, acid rock  
 22 drainage and treatment.  
 23 Following that, I moved back to Montana  
 24 and was a general environmental engineering  
 25 consultant and went through several companies till

505

1 I ended up here at HydroSolutions.

2 Q. And approximately how long have you been

3 working at HydroSolutions?

4 A. Since -- since 2004.

5 Q. And can I have you pull up Exhibit No.

6 LO-56, Shane?

7 A. I have it.

8 MR. BENDER: Can you just give me a minute

9 to get there?

10 MR. BRAATEN: It's his résumé.

11 MR. BENDER: Okay. I'm there. Thank you.

12 Q. (MR. BRAATEN CONTINUING) Does this

13 curriculum vitae accurately reflect your

14 educational and professional qualifications and

15 experience, Mr. Bofto?

16 A. Yes, it does.

17 MR. BRAATEN: Move to admit Exhibit LO-56.

18 HEARING EXAMINER GARNER: Any objections?

19 MR. BENDER: No objection.

20 HEARING EXAMINER GARNER: Motion granted.

21 Q. (MR. BRAATEN CONTINUING) And, Shane, can

22 you describe for us with respect to your work at

23 HydroSolutions the kinds of clients and the kinds

24 of work that you've been involved in?

25 A. At HydroSolutions, clients mainly consist

506

1 of private individuals, ag and ranching clients,

2 federal, state and local governments and

3 municipalities. We have a GSA contract with the

4 federal government. We work with developers,

5 conservation groups and other NGOs and then

6 companies including mining, oil and gas pipelines,

7 and we also work with attorneys.

8 Q. And as a general matter, you mentioned

9 environmental consulting services, but can you give

10 us just some specific examples of the kinds of

11 projects and the kinds of consult -- different

12 kinds of consulting work that the folks at

13 HydroSolutions do?

14 A. Generally, we provide independent services

15 and environmental engineering, hydrogeology,

16 remedial investigations, remediation, permitting,

17 water resource development, compliance, due

18 diligence, environmental impact statements and

19 expert work.

20 Q. And, Mr. Bofto, are you familiar with the

21 applications and the Class VI well permit

22 applications that bring us to the hearing today?

23 A. Yes, I've briefly reviewed them.

24 Q. And do you have any -- we've talked

25 generally about the experience of HydroSolutions

507

1 and your experience. Do you have any experience on

2 particular or specific projects that you think

3 informs your ability to work on -- or work in this

4 proceeding or on this matter?

5 A. Yes. Several projects come to mind. In

6 2011, the Wyoming Land Quality Division issued an

7 RFP that resulted in a competitive bid, and

8 HydroSolutions was hired where I was the project

9 manager to look at mining regulations in Wyoming,

10 specifically with respect to rare earth elements in

11 mining. And we reviewed all of the regulations and

12 permitting process with respect to Wyoming and

13 implications of kind of a different mining type

14 that the state wasn't used to seeing. It was out

15 of the ordinary.

16 And following that, the Montana Board of

17 Oil and Gas Conservation issued an RFP and we were

18 awarded that to explore primacy for the Class VI

19 program in 2014. They were looking at setting up a

20 program and reviewing it as an exploratory project

21 to see if they wanted to gain primacy, and this was

22 about the time -- a little after the time North

23 Dakota did that same pursuit, so we followed it

24 very closely.

25 Q. And so did Montana end up submitting an

508

1 application to obtain primacy for its Class VI

2 program?

3 A. We provided the State with a draft program

4 and we went back and forth with them, and

5 ultimately they had an administrative decision at

6 that time to not submit for primacy.

7 Q. And as you were working on the -- drafting

8 the Class VI program for Montana, did you review

9 any documents or guidance that informed your

10 understanding of how to develop a Class VI program?

11 A. Yes. I heavily relied on a lot of BPA

12 documents. Specifically for the Class VI program,

13 there were a lot of guidance documents associated

14 with implementing programs, well characterization,

15 area of review, recordkeeping, to name a few.

16 Q. Can I have you turn to Exhibit LO-18?

17 A. I have it.

18 Q. Is this one of the guidance documents you

19 just referenced that helped inform your

20 understanding of the Class VI program while you

21 were drafting Montana's regulations?

22 A. Yes, it was one of the documents I used to

23 understand and outline our draft program.

24 Q. And can you just describe briefly the

25 topic of this guidance?

509

1     **A.** Sure. The guidance generally provides  
2 information regarding modeling and recommendations  
3 for delineating the area of review. It also  
4 describes the circumstances under which the AOR or  
5 area of review is to be reevaluated, and also  
6 describes how to perform an AOR reevaluation and  
7 development of corrective actions.  
8     **Q.** Okay. Let me have you turn to  
9 Exhibit LO-19.  
10    **A.** All right. I have it.  
11    **Q.** Is this also one of the documents you  
12 referenced that you reviewed to inform your  
13 understanding of Class VI regulatory regimes?  
14    **A.** Yes, it was one of the documents I used to  
15 understand and so outline the draft program.  
16    **Q.** And can you just describe generally what  
17 the topic of this document is and what it covers?  
18    **A.** It provided a basic framework for the  
19 permitting process and the required activities  
20 through the Class VI injection well and activities  
21 associated with that.  
22    **Q.** Okay. Can I have you turn to  
23 Exhibit LO-20?  
24    **A.** I have it up.  
25    **Q.** Is this also one of the guidance documents

510

1 you referenced a moment ago that informed your  
2 understanding of the Class VI well program when you  
3 were drafting Montana's regulations?  
4    **A.** Yes. I used it similar to the others.  
5    **Q.** Okay. And just generally speaking, what  
6 does this guidance document cover topically?  
7    **A.** I would say it provides a general outline  
8 of the data to be collected and how to use the data  
9 to identify potential risks and eliminate  
10 unacceptable sites. It also provides information  
11 for inputs into whatever geologic model is chosen  
12 for use to evaluate any geological modeling.  
13    **Q.** Okay. And now I'm going to have you --  
14 it's marked a little out of order here, but there's  
15 an Exhibit LO-82. I'll have you switch -- or flip  
16 to Exhibit LO-82.  
17        **MR. BRAATEN:** And, Lawrence this one  
18 didn't get into the binder. I've got an extra  
19 copy.  
20        **MR. BOFTO:** Okay. I'm pulling it up.  
21 Yes, I have this one.  
22    **Q.** (MR. BRAATEN CONTINUING) I'm sorry,  
23 Mr. Bofto, I might have missed it. Did you get  
24 yourself to that exhibit?  
25    **A.** Yes, I have -- have that exhibit, the one

511

1 for recordkeeping and reporting, generally.  
2    **Q.** And specifically Exhibit 82 that indicates  
3 it's the Underground Injection Control Program  
4 Class VI Well Recordkeeping, Reporting, and Data  
5 Management Guidance for Owners and Operators. Is  
6 that the exhibit you have up?  
7    **A.** Yes.  
8    **Q.** Okay. Is this also one of the guidance  
9 documents that you reviewed that informs your  
10 understanding of the Class VI program that you used  
11 in developing Montana's regulation?  
12    **A.** Yes.  
13    **Q.** Okay.  
14        **MR. BRAATEN:** Move to admit Exhibits 18,  
15 19, 20 and 82.  
16        **HEARING EXAMINER GARNER:** Any objections?  
17        **MR. BENDER:** No objection.  
18        **HEARING EXAMINER GARNER:** Exhibits are  
19 admitted.  
20    **Q.** (MR. BRAATEN CONTINUING) Mr. Bofto, can I  
21 have you now open up -- or turn to Exhibit No. 21?  
22    **A.** I have that up.  
23    **Q.** Do you have an understanding of what the  
24 first two sentences of this data tool mean?  
25    **A.** Yes.

512

1    **Q.** And can you tell us what that is?  
2    **A.** Under the rule that's cited there, that  
3 the owners and operators must submit the project  
4 information -- their geological sequestration  
5 project information directly to the EPA and I take  
6 it through the geologic sequestration data tool in  
7 that this requirement applies regardless of  
8 primacy, whether it's still EPA or a particular  
9 state or entity has primacy.  
10    **Q.** Mr. Bofto, are you ready, willing and able  
11 and have you been ready, willing and able for the  
12 past three weeks to assist in running and analyzing  
13 models related to these Class VI well applications  
14 had you received data and input files to do so?  
15    **A.** I'm capable and ready to run the  
16 geochemical model PHREEQ, given that if I had the  
17 input files and the right thermal dynamic database  
18 or a reference to it if -- if the reference one  
19 that comes with the model, is unaltered.  
20        **MR. BRAATEN:** No further questions.  
21        **HEARING EXAMINER GARNER:** Mr. Bender, any  
22 questions?  
23        **MR. BENDER:** Yeah, I do.  
24  
25

513

**1 CROSS-EXAMINATION**

**2 BY MR. BENDER:**

**3 Q.** Mr. Bofoto [sic], my name is Lawrence

**4 Bender and I represent the applicant, Summit, in**

**5 this case. Nice to meet you today.**

**6 A.** Nice to meet you.

**7 Q.** Okay.

**8 A.** My name is Bofto.

**9 Q.** Okay. Thank you for correcting me. I

**10 appreciate that. Do you mind if I call --**

**11 A.** No problem.

**12 Q.** Do you mind if I call you Shane?

**13 A.** Please do.

**14 Q.** Okay. Thank you. I want to just delve a

**15 bit into your discussion about what you did for the**

**16 State of Montana. First of all, what was the time**

**17 period in which you were working on that? I think**

**18 you said it was about the time that North Dakota**

**19 was adopting its rules, but I want to make sure**

**20 that I understood that correctly.**

**21 A.** Yes. I believe I started it in 2012, but

**22 a lot of these documents that I had just referenced**

**23 were in draft form, so a lot of it we waited for**

**24 the final versions of the EPA guidance documents to**

**25 be issued. And I believe my last final draft was**

514

**1 submitted to the Board of Oil and Gas following**

**2 discussions with them in mid to late 2014.**

**3 Q.** Okay. And when you -- when you referred

**4 to these documents were in draft form, I'm sure**

**5 you're talking about Exhibits LO-18, 19 -- let's**

**6 see here -- looks like 20 and is it 83?**

**7 MR. BRAATEN:** 82.

**8 Q.** (MR. BENDER CONTINUING) 82. Is that

**9 correct?**

**10 A.** They may have included some of those, but

**11 there were also some other guidance documents and**

**12 some of the things I'm trying to recall with the**

**13 environmental justice, bonding, things like that.**

**14 So that was why we waited a little while longer so**

**15 we could work with final documents that were**

**16 included. I think they're currently included on**

**17 EPA's Class VI website.**

**18 Q.** And what was it that you were requested to

**19 do by the Montana Oil and Gas Conservation**

**20 Commission?**

**21 A.** To review that type of information and

**22 draft a program that the State could use for their**

**23 primacy application should they desire to go after**

**24 primacy for the Class VI program.**

**25 Q.** And were involved in drafting the statutes

515

**1 that were necessary for the Montana Board of Oil**

**2 and Gas to adopt the rules or were you -- was that**

**3 statutory enactment already in place and all you**

**4 were asked to do was prepare the regulations?**

**5 A.** I was asked -- I was not involved with the

**6 statutes or anything like that. I was just**

**7 involved with gathering information that the board**

**8 needed to get the primacy application in place.**

**9 Q.** Are the statutes already in place in

**10 Montana and that all they're lacking at this point**

**11 in time is the regulations?**

**12 A.** I believe at that time there was a statute

**13 associated with it that was in place.**

**14 Q.** Okay.

**15 A.** It's been a while, but I seem to recall it

**16 was in place prior to them issuing approval for us**

**17 to do this work.**

**18 Q.** Okay. And I believe you said you started

**19 in 2012, probably finished in 2014; is that**

**20 correct?**

**21 A.** That sounds about right.

**22 Q.** Okay. Approximately -- well, strike that.

**23 During that period of time, were you**

**24 working full-time on this project?**

**25 A.** No.

516

**1 Q.** Okay. Were you working on the project by

**2 yourself?**

**3 A.** No. I was part of a team of other

**4 consultants and internal people. We had an**

**5 attorney because there was a portion where we had**

**6 to draft a letter from I believe the attorney**

**7 general or something to EPA and there were several**

**8 other documents that needed to be drafted that were**

**9 best suited for an attorney. And I had another**

**10 company that had petroleum engineers and petroleum**

**11 geologists associated that were reviewing some of**

**12 the draft documents at that time as well.**

**13 Q.** Okay. Well, thank you for that. I had

**14 misunderstood your testimony. I thought that you**

**15 were primarily responsible for doing all the work.**

**16 But since it was a team, let me ask you a couple**

**17 questions about that. What were -- what were your**

**18 specific responsibilities on that team?**

**19 A.** I was the project manager, and areas -- I

**20 would collect information as well as derive**

**21 information that I could and I put them into the**

**22 draft program. I took and I followed a lot of the**

**23 guidance to establish, you know, a general**

**24 procedure for permitting.**

**25 Q.** And did you ultimately draft some rules

517

1 that were submitted to the Oil and Gas Conservation  
 2 Commission?  
 3 **A.** Not at that time.  
 4 **Q.** When you say "not at that time," you're  
 5 talking about the period from 2012 to 2014?  
 6 **A.** I'm talking -- well, I never drafted any  
 7 rules based on the draft program.  
 8 **Q.** Okay. I misunderstood you then. I -- I  
 9 had understood you to testify when Mr. Braaten was  
 10 asking you questions that you drafted the rules but  
 11 the -- the board ultimately made a decision that it  
 12 was not going to adopt the rules. Did I  
 13 misunderstand?  
 14 **A.** I drafted a permitting program for  
 15 somebody that we could run past EPA so someone  
 16 could get a permit for a Class VI well should  
 17 Montana get primacy.  
 18 **Q.** Okay.  
 19 **A.** Does that make sense?  
 20 **Q.** I think so.  
 21 Do you know why the board never went  
 22 forward with the rules?  
 23 **A.** No, that was an administrative decision  
 24 far above my pay grade.  
 25 **Q.** Okay. Let's talk a little bit more about

518

1 your experience. You've explained to us that as a  
 2 result of reviewing these guidance documents that  
 3 have now been entered into the record, I think it  
 4 was 17, 18, 19, 20 and also 82, you were involved  
 5 in this project. Have you ever been involved in  
 6 making application in a state that has primacy for  
 7 a Class VI permit?  
 8 **A.** No.  
 9 **Q.** Okay. You haven't been -- I apologize. I  
 10 wasn't listening to my question very well when I  
 11 asked it. Did I -- well, let me rephrase it.  
 12 Have you ever been involved in any way in  
 13 making a Class VI application to a state that has  
 14 primacy?  
 15 **A.** No.  
 16 **Q.** Okay. Have you ever reviewed an  
 17 application, other than the one before the  
 18 Commission -- or the ones that are before the  
 19 Commission today, for a Class VI permit?  
 20 **A.** I'm trying to recall. I may have looked  
 21 at some when I was drafting a program. I have a  
 22 faint recollection that I tried to look at others  
 23 that had gone through EPA at the time. I just  
 24 cannot recall the specifics.  
 25 **Q.** Yeah. And I apologize, I think I said

519

1 this, but I asked -- my question was specific to  
 2 being involved in an application with a state that  
 3 had primacy.  
 4 **A.** None with a state that had primacy.  
 5 **Q.** Other than the applications that are  
 6 before the Commission today, have you ever reviewed  
 7 an application for a Class VI well?  
 8 **A.** Back to my previous statement, I believe I  
 9 did when I was drafting the program to look at what  
 10 an application looks like. I just don't recall  
 11 because it was so long ago on what it was.  
 12 **Q.** That would have been back in the 2012  
 13 period, 2014 period; is that right?  
 14 **A.** Somewhere in there.  
 15 **Q.** And would those have been applications  
 16 before the EPA?  
 17 **A.** Yes.  
 18 **Q.** Okay. When were you hired by the  
 19 intervenors in this case?  
 20 **A.** Oh, it's been a month or so.  
 21 **Q.** Okay. You don't know the exact date? I  
 22 mean, today is the 11th. Would it have been  
 23 probably May 11?  
 24 **A.** It could have been about that time, but I  
 25 don't know specifics.

520

1 **Q.** What were you asked to do on May -- on  
 2 May 11?  
 3 **MR. BRAATEN:** I'm going to object to that  
 4 characterization of testimony. I don't believe he  
 5 testified to doing something on the 11th.  
 6 **HEARING EXAMINER GARNER:** Overruled.  
 7 **Q.** (MR. BENDER CONTINUING) Okay. What --  
 8 okay. I guess you can answer the question.  
 9 **A.** What was I -- could you repeat that  
 10 question again?  
 11 **Q.** What were you asked to do when you were  
 12 hired for this project?  
 13 **MR. BRAATEN:** I'm going to object to  
 14 questions eliciting communications between me and  
 15 the experts.  
 16 **HEARING EXAMINER GARNER:** Overruled.  
 17 **MR. BRAATEN:** You can go ahead, Shane.  
 18 **MR. BOFTO:** Oh, okay. Just to provide my  
 19 experience with the Class VI guidance and programs  
 20 that I had early on and just my general  
 21 environmental background information.  
 22 **Q.** (MR. BENDER CONTINUING) And how many  
 23 hours do you believe you've worked on this project  
 24 since you were retained?  
 25 **A.** Outside of this, probably 15 reviewing

521

1 documents and such and --

2 Q. And have you had an opportunity to review

3 each one of the -- what I'm going to refer to as

4 the final form of applications for the three

5 applications that are before the Commission?

6 A. I've generally reviewed them, yes, and --

7 I'm trying to think if I've done any others. So

8 I'd say I generally reviewed the three

9 applications.

10 Q. Okay. And when you say reviewed them, did

11 you just -- did you just read them or did you do

12 anything beyond reading? Did you do any

13 independent research?

14 A. I looked closely at some of the models on

15 what were being used and what they did exactly.

16 Q. Okay. And if I -- and please correct me

17 if I'm wrong, Shane, but I understood your

18 testimony when Mr. Braaten was asking you some

19 questions that you -- if you'd had the materials

20 that he requested from the Industrial Commission,

21 you could have run a model in a relatively short

22 period of time. Was that your testimony?

23 A. Yes. I specifically referenced the

24 PHREEQC model by U -- that is put out by the USGS.

25 Q. Okay. And do you have the necessary

522

1 software packages that you would need to run the

2 model?

3 A. Yes, I do. It's on my computer now.

4 Q. Okay. Can you tell me what some of those

5 programs are?

6 A. I'm specifically talking about the PHREEQC

7 model. It's downloaded freely from the USGS, and I

8 have routinely used the program through my career

9 and have used it to write specific reports.

10 Q. And do you believe that that's the only

11 software you would need to analyze the information

12 that Summit has filed with the Industrial

13 Commission on this matter?

14 A. It's the only one that I'm focused on.

15 Q. Okay. Do you agree with me that there are

16 other software programs?

17 MR. BRAATEN: I'm going to object to the

18 form of the question.

19 MR. BENDER: What's that?

20 MR. BRAATEN: I object to the form of the

21 question. There are.

22 MR. BENDER: Well, let him answer.

23 HEARING EXAMINER GARNER: If he can

24 understand it, he can answer it.

25 MR. BOFTO: There are numerous geochemical

523

1 models outside of PHREEQC. There's Geochem

2 Workbench® that I've used and several others, but

3 the application specifically said they used PHREEQC

4 and that was the one I was focused on.

5 Q. (MR. BENDER CONTINUING) But you don't

6 know if this PHREEQC is the only program that would

7 be necessary to evaluate the information that's

8 been supplied to the Commission, do you?

9 MR. BRAATEN: For the --

10 MR. BOFTO: I'm just going off the

11 application that said that was the program that

12 they used.

13 Q. (MR. BENDER CONTINUING) Okay.

14 A. I did not see any other geochemical

15 programs to evaluate the upper and lower confining

16 units.

17 Q. Okay. Tell me a little bit about your

18 experience working in North Dakota. I know you

19 said you went to the University of Mary. Have you

20 done any work in your current role with -- I

21 believe it's HydroSolutions. Have you worked in

22 North Dakota with that company?

23 A. Yes. I've had probably -- probably six or

24 seven projects in the last ten years in North

25 Dakota.

524

1 Q. What were those projects?

2 A. Some of them were work with attorneys for

3 oil and gas impacted sites. Done some incidental

4 air quality work there from facilities. Trying to

5 think. Looked at different reviewing remediation

6 plans for cleanup for saline impacts or produced

7 water impacts.

8 Q. Okay. So it sounds to me, and please

9 correct me if I'm wrong, that most of that work

10 that you've done in North Dakota has been from the

11 standpoint of surface issues; is that a -- is that

12 a fair statement?

13 A. No. There's been other issues associated

14 with contaminated groundwater and cleanup.

15 Q. Okay. Have you ever been involved in

16 North Dakota in making application to the

17 Commission relative to saltwater disposal wells or

18 Class II wells?

19 A. I've been part of such projects exploring

20 commercial Class II saltwater disposal wells.

21 Q. Ever prepare an application to the

22 Commission for a saltwater disposal well?

23 A. I've provided information for somebody

24 else to submit a Class II application.

25 Q. Okay. What sort of information did you

525

1 supply?

2 **A.** Looked at things like deriving maximum

3 pressure at the wellhead. Working with other

4 geologists in my company, suitable formations.

5 Looking at areas of review for other wells that

6 could be within the area of review, things along

7 that line.

8 **Q.** But you never were involved in a saltwater

9 disposal application in North Dakota where you were

10 the lead individual in making that application;

11 isn't that correct?

12 **A.** That'd be fair to say.

13 **MR. BENDER:** No further questions.

14 **HEARING EXAMINER GARNER:** Any questions

15 from the staff? Any redirect, Mr. Braaten? Oh,

16 I'm sorry, you do.

**EXAMINATION**

17 **BY MR. HELMS:**

18 **Q.** Shane, this is Lynn Helms with the

19 Industrial Commission. Nice to meet you, maybe

20 some day face-to-face.

21 **A.** Nice to meet you.

22 **Q.** Yes.

23 North Dakota made its application for

24 Class VI primacy on June 21 of 2013 and received

526

1 final approval April 24 of 2018. Shane, did you

2 comment on North Dakota's application?

3 **A.** No, I did not.

4 **Q.** Did you review the North Dakota documents

5 when you were preparing Montana's prospective

6 documents?

7 **A.** I seem to recall that we were following at

8 that time whether North Dakota was going to draft

9 their own specific rules or adopt it by rule, and

10 that was -- we had a lot of discussions about that

11 on whether Montana should or shouldn't, and I seem

12 to recall North Dakota going back and forth maybe

13 once on what the appropriate action was, and we

14 were going to try to learn at that point from you.

15 **MR. HELMS:** Okay. Thank you.

**REDIRECT EXAMINATION**

17 **BY MR. BRAATEN:**

18 **Q.** Mr. Bofto, do you have a copy of -- well,

19 do you recall signing an engagement letter for this

20 matter?

21 **A.** Yes.

22 **Q.** And do you recall the date of that?

23 **A.** May 1.

24 **MR. BRAATEN:** Okay. No further questions.

25 **HEARING EXAMINER GARNER:** Okay. You can

527

1 call your next witness. Can I get the name?

2 **MR. BRAATEN:** Ted Doughty.

3 **HEARING EXAMINER GARNER:** Doughty. Okay.

4 **MR. BRAATEN:** Yeah.

5 **MS. ZASTE:** He has a first initial, P, but

6 he goes by Ted. So it's P. Ted Doughty.

7 **HEARING EXAMINER GARNER:** Gotcha.

8 **MR. BRAATEN:** Mr. Doughty, we're getting

9 some feedback from you. Can you mute -- well, no,

10 we're still getting feedback. Can you mute -- what

11 was it -- what did you -- okay.

12 **P. TED DOUGHTY,**

13 being first duly sworn, was examined and testified

14 as follows:

**DIRECT EXAMINATION**

16 **BY MR. BRAATEN:**

17 **Q.** Mr. Doughty, can you state your full name

18 and spell your last name for us, please?

19 **A.** It's Paul Ted Doughty, D-o-u-g-h-t-y.

20 **Q.** And you go by Ted; right?

21 **A.** Yes, I do.

22 **Q.** Okay. Can you tell me briefly your

23 educational background?

24 **A.** I have a bachelor's in geology from

25 Washington University in St. Louis, a master's in

528

1 geophysics from the University of Montana, and a

2 PhD from Queen's University in Ontario, Canada.

3 **Q.** And can you start by just briefly

4 describing your professional background?

5 **A.** Yes, sir. So I've worked with Exxon -- I

6 worked in the Exxon research lab for four years in

7 the late '90s. I taught at Eastern Washington

8 University for eight years as a professor. And

9 since 2008 I've been a consultant on my own working

10 for various companies like Talisman Energy,

11 Halliburton, various other companies in the

12 Rockies.

13 **Q.** Can you tell us a little bit about the

14 kinds of work you did with your time at Exxon?

15 **A.** Yes. So at Exxon I was in the fault --

16 fault seal group, also did -- which is analyzing

17 how fault seal in the various environments in

18 the -- in the -- we did a whole research project

19 looking at fault seal across the entire -- all the

20 basins that Exxon worked in.

21 I also did 3D seismic interpretation in

22 various basins across the world. Did a lot of

23 field research on the Bakken and various other

24 groups in the western U.S. as analogs for

25 subsurface formations.

529

1 Q. And can I have you pull up in front of  
2 you, Ted, the Exhibit LO-58?  
3 A. I'm not in the office, so if you describe  
4 it to me, though, I can do that.  
5 Q. Do you recall the information contained on  
6 your curriculum vitae?  
7 A. Your -- can you repeat the question?  
8 Q. So I'll tell you Exhibit 58 is your  
9 curriculum vitae. Are you familiar with --  
10 A. Oh.  
11 Q. -- the contents of your curriculum vitae?  
12 A. Oh, yes. Yes, sir. Yes.  
13 Q. Okay. And does that accurately describe  
14 your educational and professional background and  
15 experience.  
16 A. Yes, sir. With the exception of several  
17 items that I left off that I did recently. I  
18 actually was the well site geologist on the J-Loc  
19 Minnkota well that was drilled as part of their  
20 carbon sequestration project. I logged --  
21 personally logged 1600 feet of core on site for  
22 that project.  
23 Q. Okay.  
24 A. And I've also done a lot of helium  
25 exploration in the last, oh, six months.

530

1 MR. BRAATEN: Okay. Move to admit LO-58.  
2 HEARING EXAMINER GARNER: Any objection?  
3 MR. BENDER: No objection. Oh, thank you.  
4 No objection.  
5 HEARING EXAMINER GARNER: The exhibit is  
6 admitted.  
7 MR. BENDER: My mike was off.  
8 HEARING EXAMINER GARNER: Exhibit is  
9 admitted.  
10 Q. (MR. BRAATEN CONTINUING) And, Ted, did  
11 you review the applications submitted by EERC and  
12 Summit that bring us here today?  
13 A. Yes, I have, in extensive detail.  
14 Q. And can you start by just describing to us  
15 the areas of those applications regarding which you  
16 would have particular expertise?  
17 A. Yes. So they have core data on the Broom  
18 Creek Formation of which I mentioned I personally  
19 logged all the J-Loc wells. So I'm familiar with  
20 that. Also I have expertise in 3D seismic  
21 interpretation. I haven't seen their 3D seismic,  
22 but it's a critical part of their application, as  
23 well as the formation mechanical integrity work  
24 that they did doing the testing in their test well.  
25 Q. What data would you need in order to

531

1 create a PHI-H map to map out the porosity and  
2 permeability of a reservoir?  
3 A. So from what I've seen of their  
4 applications, the -- there's only one -- no,  
5 there's three -- I think there's three -- there's  
6 two wells that are close together and another well  
7 in their AOR which encompasses about -- actually,  
8 I'm not sure how big the AOR is, but if you take  
9 their simulation area, there's 26 wells in the  
10 simulation area -- or the simulation area, there's  
11 26 wells. It's about a well per 55 square miles  
12 which is not very many data points. So within the  
13 AOR there's only 3 data points. There's no legacy  
14 wells.  
15 So you would need to coordinate it, which  
16 they provided, but as well it appears like the  
17 seismic data was a critical part of how they  
18 defined the reservoir properties in the AOR.  
19 There's only -- like I mentioned, there's very few  
20 wells within the AOR. So we'd need access to the  
21 3D seismic to actually do a facies analysis to  
22 determine what the seismic data tells you about the  
23 reservoir within that AOR.  
24 And within that application, there's only  
25 one map that shows the permeability distribution

532

1 within their stimulation -- their simulation area.  
2 Excuse me. So there's very little data within  
3 their application with which to evaluate exactly  
4 how they derive their permeability parameters for  
5 the AOR that they're applying for.  
6 Q. Mr. Doughty, do you recall approximately  
7 how long ago you were asked about the possibility  
8 of working on this matter?  
9 A. It was, what, a month ago, maybe three  
10 weeks ago, something like that.  
11 Q. And are you ready, willing and able to  
12 conduct additional review and particularly review  
13 of seismic data if you receive it?  
14 A. Yes, I am.  
15 MR. BRAATEN: No further questions.  
16 HEARING EXAMINER GARNER: Attorney Bender.  
17 **CROSS-EXAMINATION**  
18 **BY MR. BENDER:**  
19 Q. Mr. Doughty, are you -- Mr. Doughty, are  
20 you in a position today to make any recommendations  
21 to the Commission as to whether this application  
22 should be approved or denied?  
23 A. I am.  
24 Q. And what are your conclusions?  
25 A. I would recommend that it's denied on the

533

1 basis that the applicant did not -- has not  
2 provided enough of the data from which the  
3 Commission or another party could evaluate how they  
4 came up with some of their reservoir properties.

5 Q. Okay.

6 A. Without the 3D seismic, you cannot  
7 determine the distribution of permeability and  
8 porosity across the AOR.

9 Q. Okay. And I believe it was your testimony  
10 at this point in time all you have reviewed is the  
11 three applications; is that correct?

12 A. That is correct. And --

13 Q. And you haven't reviewed -- you haven't  
14 reviewed the other data that's on file with the  
15 Commission?

16 A. I've reviewed the data that's publicly  
17 available.

18 Q. Okay.

19 A. Yes.

20 Q. Did you -- have you seen a letter dated  
21 May 15, 2024, from Mr. Braaten to the Commission  
22 requesting certain information?

23 A. I have not seen the letter. I've heard  
24 that there's a motion to compel.

25 Q. Okay. Do you know if the Commission

535

1 A. Yep. J-Loc. Yep.

2 Q. So you know somewhat about that -- you  
3 know some things about that application that was  
4 made to the Commission for a Class VI well; is that  
5 correct?

6 A. I -- no. I don't -- I set the well. I  
7 described the core. I was not involved in anything  
8 after they drilled the well.

9 Q. You knew the --

10 A. But I.

11 Q. -- you know the Commission granted the  
12 application; correct?

13 A. Yes.

14 Q. Do --

15 A. But I wasn't involved in it. I do know  
16 what the core looked like and somewhat of the  
17 reservoir properties of the Broom Creek.

18 Q. And, you know, thank you for all that, but  
19 we can get through this a little bit quicker if you  
20 just answer my questions.

21 Do you know --

22 MR. BRAATEN: I think he did.

23 MR. BENDER: Well, I think he went on a  
24 little bit more than he needed to, but I'll move  
25 on.

534

1 indicates that they supplied that information to  
2 Mr. Braaten?

3 A. I do not.

4 Q. Okay. You talked a little bit about a  
5 PHI-H map, and I don't want to put -- I don't want  
6 to testify for you, but I understood you to say  
7 that a PHI-H map would have been important for the  
8 Commission in this case. Is that a -- is that a  
9 fair statement of your testimony?

10 A. Yes, that is a fair statement. If you --  
11 if you want to understand where the CO<sub>2</sub>'s going as  
12 you inject it, you need a PHI-H map to determine  
13 the -- the storage capacity to the formation.

14 Q. Okay. And you --

15 A. And like I -- like I said earlier, there's  
16 only three data points within the AOR. So I'm -- I  
17 don't quite understand how the EERC came up with  
18 such a complex map of permeability and porosity  
19 without having additional data. It should have  
20 been provided in their submittal.

21 Q. Okay. And I think you also indicated that  
22 you were involved -- you sat the -- the well for  
23 Minnkota's -- the J-Loc?

24 A. The J-Loc.

25 Q. Yeah, the J-Loc.

536

1 Q. (MR. BENDER CONTINUING) Do you know if  
2 Minnkota submitted a PHI-H map in its application?

3 A. I do not.

4 Q. Are you familiar with the application that  
5 was filed by Blue Flint?

6 A. No.

7 Q. Do you know if they submitted a PHI-H map?

8 A. I do not.

9 Q. Are you familiar with the application that  
10 was submitted by Dakota Gasification?

11 A. No.

12 Q. Do you know if they submitted a PHI map --  
13 PHI-H map?

14 A. No.

15 Q. Are you familiar with the application that  
16 was filed by Red Trail?

17 A. No.

18 Q. Do you know if they submitted a PHI-H map?

19 A. No.

20 Q. Do you know all those applications were  
21 granted by the Commission?

22 A. No.

23 MR. BENDER: No further questions.

24 HEARING EXAMINER GARNER: Any questions  
25 from the staff?

537

1 Redirect, Attorney Braaten?

2 MR. BRAATEN: No, I don't have any further

3 questions. Thank you very much, Mr. Doughty.

4 MR. DOUGHTY: Thank you.

5 HEARING EXAMINER GARNER: Okay. You can

6 call your next witness.

7 MR. BRAATEN: We are calling Paul Button.

8 HEARING EXAMINER GARNER: Button?

9 MR. BRAATEN: Yes.

10 **PAUL BUTTON,**

11 being first duly sworn, was examined and testified

12 as follows:

13 **DIRECT EXAMINATION**

14 **BY MR. BRAATEN:**

15 Q. Mr. Button, can you state your full name

16 and tell us -- well, let's start there. Just state

17 your full name, please.

18 A. My name is Paul Michael Button.

19 Q. And can you give us a business or

20 residential address?

21 A. My residential address is 1119 South Ophir

22 Street in Butte, Montana.

23 Q. All right. Can you tell us just a little

24 bit about your educational background?

25 A. I have a bachelor of science degree in

538

1 petroleum engineering from Montana Tech.

2 Q. All right. And tell us a bit about your

3 professional experience.

4 A. My professional experience is I've worked

5 26 years as a petroleum engineer. I started off my

6 career as a reservoir engineer for Marathon Oil

7 Company working the Yates Field in West Texas doing

8 simulation on gas oil gravity drainage with

9 nitrogen injection and then converting it over to

10 CO<sub>2</sub> injection.

11 From there I moved to -- on to Kinder

12 Morgan when they acquired the Yates asset. I did a

13 little bit of reservoir simulation on Yates, and

14 then I worked the SACROC CO<sub>2</sub> flood unit in Scurry

15 County, Texas.

16 After I left Kinder Morgan, I worked for

17 SM Energy in Billings, Montana, for a number of

18 years doing enhanced oil recovery studies on fields

19 in the state of Wyoming. Also worked several water

20 floods and shale development wells within the

21 Powder River Basin, Richland County, Montana, and a

22 little bit of experience in Divide County, North

23 Dakota.

24 From there I left SM Energy and I went out

25 on my own as a consultant. I did numerous

539

1 consulting jobs for multiple clients, including

2 purchase and acquisition, evaluation, State

3 evaluations and reservoir simulation for enhanced

4 oil recovery on the Poplar Dome in Montana.

5 I then joined a company called Poplar

6 Resources as a vice president where we implemented

7 a pilot for enhanced -- a nitrogen injection flood.

8 And I have been with that ever since.

9 And then I also started a startup for a

10 battery energy storage corporation. We do

11 compressed air energy storage. And I'm currently

12 working both the Poplar job, the consulting job,

13 and battery energy storage job.

14 Q. Okay. Can I have you turn in the exhibits

15 to what we marked as LO-57?

16 A. Yes.

17 Q. Let me know, do you have that in front of

18 you now?

19 A. Yes, I do.

20 Q. And what is Exhibit 57?

21 A. I would call it my résumé or CV.

22 Q. Okay. And does this CV accurately reflect

23 your educational and professional experience and

24 qualifications?

25 A. I would probably -- I caught a couple of

540

1 errors in here. The Button Petroleum Management,

2 it was no longer active until recently again, so I

3 would add that through 2024.

4 Q. Okay.

5 A. And I believe the name of the -- my

6 educational school is no longer accurate because

7 it's no longer Montana Tech of the University of

8 Montana. I believe it's the Montana Technological

9 University.

10 Q. Okay. Other than those, does the

11 Exhibit 57 accurately reflect your professional and

12 educational experience and qualifications?

13 A. Yes.

14 MR. BRAATEN: Move to admit Exhibit 57.

15 MR. BENDER: No objection.

16 HEARING EXAMINER GARNER: Exhibit is

17 admitted.

18 Q. (MR. BRAATEN CONTINUING) Mr. Button, can

19 you tell me if you have any experience with Class

20 II wells or permitting Class II wells?

21 A. Yes. I have permitted a num -- a number

22 of Class II wells in the state of Montana.

23 Q. And with respect to any of those Class II

24 wells, was it necessary to obtain an aquifer

25 exemption?

541

1 **A.** Yes. We worked on an aquifer exemption  
 2 for one of the wells within the Poplar unit, east  
 3 Poplar unit.  
 4 **Q.** Okay. Was there any kind of a volumetric  
 5 limit imposed as part of that aquifer exemption?  
 6 **A.** Yes, I believe so.  
 7 **MR. BENDER:** Objection. Relevance.  
 8 **HEARING EXAMINER GARNER:** Overruled.  
 9 **Q.** (MR. BRAATEN CONTINUING) And are you  
 10 familiar with the manner in which the volumetric  
 11 limits are calculated for aquifer exemptions by  
 12 either the EPA or state authorities?  
 13 **A.** I am familiar with how the volumetric  
 14 extensions were calculated and approved for the  
 15 permits that I worked on. Yes.  
 16 **Q.** Okay. And so with respect to the permits  
 17 you worked on, can you just provide a general  
 18 description of how those volumetric limits are  
 19 calculated for the aquifer exemptions?  
 20 **A.** Basically, these were pretty simple  
 21 calculations in that you would calculate the -- the  
 22 volume within a given X number of foot radius that  
 23 you believe you'll affect with the water injection,  
 24 you know, so you get a volume of a cylinder,  
 25 multiply it by your porosity, divide it by your

542

1 formation volume factor of water and that is the  
 2 volume that will be affected.  
 3 **Q.** Do you have experience with reservoir  
 4 modeling and -- well, you've already talked about  
 5 this. Can you tell us a little bit about the  
 6 experience you have with EOR and water floods with  
 7 respect specifically to field development analysis?  
 8 **A.** Yes. I've had several major modeling  
 9 projects over my career. The first one was for  
 10 Yates field. We spent quite a few years looking at  
 11 and running sensitivities on gas oil gravity  
 12 drainage, enhanced oil recovery process as far as  
 13 looking at gas oil contact movement speed versus  
 14 the drainage of oil from the matrix in the  
 15 reservoir. We also looked at viscosity effects  
 16 with the injection of different gases and the  
 17 swelling effects in the oil with different  
 18 composition of injected gases, whether it was  
 19 nitrogen, CO<sub>2</sub> or a mixture of recycled gas to  
 20 determine the most effective recovery and most  
 21 economic recovery mechanism with an EOR process.  
 22 My other major modeling project which I've  
 23 worked on most recently is developing a full-field  
 24 simulation model to model the history and also the  
 25 enhanced oil recovery potential for Poplar Dome in

543

1 Montana, the East Poplar unit. That is a  
 2 70-year-old field that's probably undergone primary  
 3 depletion with a strong natural water drive where I  
 4 deal with gas on the top of it and expose the  
 5 matrix to gas oil gravity drainage and determine if  
 6 that was an economically feasible project.  
 7 **Q.** And can you tell us about any other  
 8 specific experiences you have related to doing  
 9 reservoir modeling and analysis?  
 10 **A.** I'm currently working on setting up the  
 11 parameters to look at natural -- or compressed air  
 12 storage in salt caverns and looking at the pressure  
 13 volume and temperature effects and the rock stress  
 14 effects within salt caverns to determine the  
 15 feasibility for the active storage reservoirs.  
 16 **Q.** Mr. Button, do you have an understanding  
 17 of different ways that pore space can be used in a  
 18 commercial manner?  
 19 **A.** Yes, I do.  
 20 **Q.** And if a landowner wants to make a  
 21 commercial use of pore space, can you tell us what  
 22 you understand to be the options for making that  
 23 commercial use of pore space?  
 24 **A.** It's basically three options of which  
 25 there can be multiple derivatives of each option,

544

1 but either you remove fluid and market it as a --  
 2 as a quantity, you temporarily store something in  
 3 your pore space, or you permanently sequester  
 4 something in your pore space.  
 5 **Q.** And how would you assess the degree to  
 6 which the pore space of a given landowner is being  
 7 used in a way that forecloses other commercial  
 8 uses?  
 9 **A.** I guess I would attempt to evaluate the  
 10 change in the pressure volume temperature of the  
 11 fluids contained within the pore space, and knowing  
 12 that there are certain constraints on the upper end  
 13 of the pressure and certain constraints on the  
 14 lower end of the pressure and try to determine what  
 15 the current impacts, what the proposed impacts and  
 16 what the -- the final limits were of that pore  
 17 space.  
 18 **Q.** Mr. Button, if you were provided with the  
 19 data decks and input files required to run models  
 20 in CMG and Schlumberger's Petrel software for this  
 21 project, would you be ready, willing and able to  
 22 run those models and analyze them for the  
 23 intervenors?  
 24 **A.** The CMG model, I would be ready to upload  
 25 those and run those and do some sensitivity

545

1 analysis on those models. As far as the Petrel  
2 model, the Petrel model is a static model. It's  
3 basically a geologic database, so those -- unless  
4 you're trying to redistribute properties or  
5 something like that, there's -- it's not a dynamic  
6 model where the answer changes, so I don't think  
7 there's nothing -- there's nothing to run there.  
8 MR. BRAATEN: Understood. No further  
9 questions.  
10 HEARING EXAMINER GARNER: Attorney Bender.  
11 **CROSS-EXAMINATION**  
12 **BY MR. BENDER:**  
13 Q. Mr. Button, you -- you spent some time  
14 describing your experience as an engineer and  
15 involved in various enhanced oil recovery projects  
16 around the country. Is that a fair statement?  
17 A. Yes.  
18 Q. And you also talked about a compressed air  
19 project that you're working on. Do you recall  
20 that?  
21 A. Yes.  
22 Q. And in those projects, both the enhanced  
23 oil recovery projects and the compressed air  
24 project, you were involved in running some models;  
25 is that a fair statement?

546

1 A. Yes.  
2 Q. Okay. Would you agree with me that  
3 running -- preparing and running models for  
4 enhanced oil recovery projects and a compressed air  
5 project is different than preparing and running a  
6 model for CO<sub>2</sub> storage?  
7 A. Can you clarify what you mean by  
8 "different"?  
9 Q. Well, if you've run -- or prepared and run  
10 models for CO<sub>2</sub> on a number of projects, are you  
11 going to have more knowledge and experience than  
12 someone who has not run models for CO<sub>2</sub>, only for  
13 enhanced oil recovery and compressed air?  
14 A. Well, the models that I've ran for  
15 enhanced oil recovery, especially for when I worked  
16 the Yates field, those directly involved the  
17 injection of CO<sub>2</sub> in the pore space --  
18 Q. Okay.  
19 A. -- so they're not too dissimilar. The  
20 only -- the main dissimilar between those two  
21 models is that in the carbon sequestration, the  
22 CO<sub>2</sub>'s interaction is primarily with water, where in  
23 those other models it was with both water and oil.  
24 So they were actually more complex.  
25 Q. Okay. Are you familiar with the data

547

1 requests that Mr. Braaten made to the Industrial  
2 Commission?  
3 A. I --  
4 Q. Pardon me?  
5 A. Yes, I am.  
6 Q. Okay.  
7 A. Yes, I am.  
8 Q. Okay. And are you familiar with the type  
9 of data that would be contained within a CMG data  
10 file?  
11 A. Yes, I am.  
12 Q. Could someone produce a PHI-H map if they  
13 had a CMG data file?  
14 A. I believe that within CMG's program you  
15 could get that, yes.  
16 Q. Okay. And are you aware that it's the --  
17 in the Commission's position that they provided a  
18 CMG data file to Mr. Braaten?  
19 A. I am not aware of the CMG data file, if  
20 Mr. Braaten is in possession of it or -- I am  
21 certainly not in possession of that CMG data file.  
22 Q. He didn't provide it to you?  
23 A. I have not seen it, no.  
24 Q. Is it a fair statement that -- well, let  
25 me back -- strike that.

548

1 A. Let me --  
2 Q. How many hours -- just let me ask the  
3 questions. Just let me ask the questions.  
4 A. Okay.  
5 Q. How many hours of time have you spent  
6 working on this project?  
7 A. I have -- up until the start of this  
8 hearing, I spent 14-and-a-half hours working on it.  
9 Q. Okay. And what were you asked to do?  
10 MR. BRAATEN: Same objection to privileged  
11 communications with experts.  
12 HEARING EXAMINER GARNER: Overruled.  
13 MR. BUTTON: What was I asked to do?  
14 Q. (MR. BENDER CONTINUING) Yes.  
15 A. I was asked by Mr. Braaten to evaluate the  
16 impact of the pore space of his clients.  
17 Q. Okay. And to do that at this point in  
18 time, all you have done is reviewed the  
19 applications that were submitted to the Commission;  
20 is that correct?  
21 A. No.  
22 Q. You didn't review the applications?  
23 A. I did review the applications, but that is  
24 not all that I've done.  
25 Q. What else did you do in the 15 hours that

549

1 you've spent on this project?

2 **A.** I have looked through the well files of

3 the wells in the immediate area to see what

4 information was available.

5 **Q.** How many hours did you spend reviewing the

6 applications?

7 **A.** Probably the majority of the 14 hours.

8 **Q.** Okay.

9 **A.** But I don't have a specific number, but I

10 could get that number for you.

11 **Q.** More than ten?

12 **A.** I would say yes. Probably in the ten

13 range.

14 **Q.** Well, you said more than 10. Would it be

15 11 or 12?

16 **A.** We'll go with more than ten.

17 **Q.** Okay. And then the other -- the only

18 other time you would have -- well, strike that.

19 The additional time you would have spent

20 between 10 hours and 15 hours would have been to

21 review some logs; is that what you said?

22 **A.** I did not say I reviewed logs. I said I

23 reviewed the well files on the Commission website.

24 **Q.** Okay. What are in the well files?

25 **A.** The well files contain the core reports

550

1 and some of that type of information. They have

2 like casing size and the drilling completion

3 information, things like that.

4 **Q.** Okay. Would you agree with me that you

5 really haven't reviewed enough to make any sort of

6 recommendation to the Commission whether this

7 application should be granted or denied?

8 **A.** Absolutely.

9 **MR. BENDER:** Okay. No further questions.

10 **HEARING EXAMINER GARNER:** Any questions

11 from the staff?

12 **Mr. Braaten,** any redirect?

13 **MR. BUTTON:** Are you waiting for a

14 response from me?

15 **MR. BRAATEN:** Sorry. No, Mr. Button, that

16 was on me. I'm just taking a moment to review my

17 notes to see if I have anything else to ask. Give

18 me one moment, please.

19 I have nothing further.

20 **HEARING EXAMINER GARNER:** Okay. I know

21 you said you only expected to get through three

22 witnesses, but you still have 20 minutes.

23 **MR. BRAATEN:** I'm -- yeah, I'm sorry, I

24 have one more, but he is no longer available.

25 **HEARING EXAMINER GARNER:** He's not

551

1 available right now?

2 **MR. BRAATEN:** Right.

3 **HEARING EXAMINER GARNER:** Let's go off the

4 record for a minute.

5 (Recessed at 6:10 p.m. and reconvened at

6 6:11 p.m.)

7 **HEARING EXAMINER GARNER:** Okay. We are

8 back on the record, and we are going to recess

9 these hearings and resume tomorrow morning at

10 9 a.m. That concludes our hearings for the day.

11 (Recessed at 6:12 p.m., Wednesday, the 12th

12 day of June, 2024.)

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**INTERVENOR LANDOWNERS' MOTION FOR SUPPLEMENTAL HEARING**

---

[¶1] Intervenor Landowners hereby move the Commission for an order setting a supplemental hearing date in order to allow Landowners to present evidence related to the reservoir computer modeling and parameters used in that model, and the manner in which it impacts Landowners' property rights.

[¶2] This Motion is supported by the Brief in Support, Declaration, and Exhibits filed herewith.

DATED this 29<sup>th</sup> day of August, 2024.

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**BRIEF IN SUPPORT OF INTERVENOR LANDOWNERS' MOTION FOR  
SUPPLEMENTAL HEARING**

---

**I. BACKGROUND**

The Commission held a hearing on Summit's permit applications on June 11, 12, and 13, 2024. Despite taking various approaches to obtain the information necessary to meaningfully participate at the hearing—including serving discovery, filing motions to either expedite discovery or continue the hearing, and filing open records requests—Intervenor Landowners were prevented from obtaining such information, including reservoir computer modeling data. To remedy the procedural due process violations resulting from this lack of information, the Commission should grant Intervenor Landowners' motion and hold a supplemental hearing.

Because the Commission's decision regarding the permits could substantially affect their property rights, Intervenor Landowners have, from the beginning, sought information necessary to meaningfully participate in the Commission's decision-making process. To that end, Intervenor Landowners took different approaches to obtain data and information, all of which proved inadequate. *See generally* Decl. of Derrick Braaten.

First, Intervenor Landowners sought information through the discovery process under § 28-32-33 and the North Dakota Rules of Civil Procedure. Specifically, Intervenor Landowner served discovery requests on May 2, 6, and 10, 2024, and noticed a 30(b)(6) of Summit for June 6, 2024. The Commission did not grant Intervenor Landowner's petition to intervene until May 31, 2024, and Summit openly refused to participate in discovery until the petition was granted. As a direct consequence of the Commission's delay, Summit did not respond to discovery requests until July 2, 2024—three weeks *after* the hearing. Additionally, Summit unilaterally refused to attend the

deposition on grounds that it did not have sufficient notice of the deposition, despite the original notice being served nearly a month beforehand.

Intervenor Landowners attempted to overcome the information gap caused by Summit's refusal to engage in good faith discovery, but the Commission impeded these efforts by denying two motions that would have remedied the problem. The first was Intervenor Landowner's motion to continue the hearing, which, if granted, would have postponed the hearing for a period of time within which Summit would have been required to respond to the discovery requests served after the Commission granted Intervenor Landowner's petition to intervene. The second was Intervenor Landowners' alternative motion for expedited discovery, which, if granted, would have required Summit to respond to the discovery requests before the originally scheduled hearing date.

Beyond the discovery process, Intervenor Landowners also sought information through open records requests, but the Commission inexplicably refused to produce the computer modeling files that Commission staff themselves had asked Summit for on June 12, 2023. *Id.* Presumably the Commission did not have those files yet when it produced records on June 20, 2023 to the undersigned in response to an unrelated open record request, and in any case the Commission made it clear at that time that it did not have "an application for amalgamation, [or] any class VI applications." *Id.* Given this is the source of the computer modeling data, it may also explain why the Commission did not produce the modeling data. Regardless, on May 15, Intervenor Landowners submitted another open records request to the Oil and Gas Division of the Commission, specifically seeking the following:

- All the input files, field and analytical data, and the model geochemical database used to evaluate the CO<sub>2</sub> effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's USGS's PHREEQC model.

- All the input files, field and analytical data , and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.
- Geophysical Logs that penetrate injection and confining zones, seismic survey data and core sample measurements, all measurements and data for acoustic impedance, total porosity, effective porosity, permeability, and facies.
- All the input files, field and analytical data, and the model, including but not limited to all inputs and data files used to run SLB's Petrel model in any manner related to Summit's applications.

All 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse or Petrel format, CMG (Canadian Modeling Group) Imex format, or other similar format.

*See* Exhibit G, attached to the Decl. of Derrick Braaten.

The Division responded on May 21, 2024, stating “The agency has previously provided (9-21-2023) all modeling input and results files submitted and used for the application by Summit. Agency staff validated the inputs and parameters in the submitted model via CMG software.” *See* Exhibit H, attached to the Decl. of Derrick Braaten. This validation is precisely the goal of Landowners themselves and is why they seek the same files the Commission sought from Summit in June of 2023 and refuses to produce (and presumably did not have yet when it produced files in June of 2023). While it referred Landowners to a prior unrelated open record request from the undersigned related to N.D.C.C. ch. 38-25, the Commissions response to that request on September 22, 2023 was a perfunctory “Ms. Zaste, our office has not received any applications under NDCC 38-25.” *See* Exhibit F, attached to the Decl. of Derrick Braaten. This intentional misdirection is alarming and violates due process. Whatever the reason, the only action that comported with due process was for the Commission to provide a legally mandated response to the open record request and produce the computer data and files. It did not, and in the process it not only violated Landowners' due process rights, it also violated the North Dakota open records laws.

Intervenor Landowners learned at the hearing that the models were also in the possession of the EERC, so they filed an open records request on June 17 and received a response on July 2, 2024—three weeks after the hearing. Landowners are currently working with their experts and Computer Modeling Group Ltd. to set up and run the model input files received from EERC, but it is estimated a first run of the model will take 24.7 days. *See* Decl. of Derrick Braaten, ¶18.

Due to the foregoing, Intervenor Landowners did not have the information necessary to fully participate in the hearing and present their own data from the model regarding the impact to their property. The property rights at stake here are significant, and the ability to utilize and present evidence from the same computer model used by the applicant and the Commission is critical to providing Landowners their due process rights in this proceeding.

**II. The Commission will concretize a violation of procedural and substantive due process and significantly exacerbate the impact of a violation of the open record laws if it issues a decision without providing Landowners a fair opportunity for discovery and a supplemental hearing.**

It is the express policy of North Dakota to conduct permitting of geologic storage of carbon dioxide “in a manner fair to all interests.” N.D.C.C. § 38-22-01. And one of the enumerated grounds for overturning an agency’s decision is when the “[t]he rules or procedure of the agency have not afforded the appellant a fair hearing.” § 28-32-46(4). *See Schlittenhart v. North Dakota Dept. of Transp.*, 2015 ND 179, ¶ 27, 865 N.W.2d 825 (noting that the Court reviews administrative proceedings to “ensure procedural fairness”).

Fairness requires that interested parties have the information necessary to meaningfully participate at the hearing. Generally when an agency oversees a proceeding that involves an opportunity to comment and a hearing the agency must present “the data underlying its proposed action before the close of the comment and hearing period.” *National Wildlife Federation v. Marsh*, 568 F.Supp. 985, 994 (D. D.C. 1983). This is because the right to comment or be heard

cannot be meaningful “when one is not apprised of the issues and positions [that are] relevant.” *Id.* at 993 (quoting *U.S. Lines v. Federal Maritime Commission*, 584 F.2d 519, 540 (D.C.Cir. 1978)). In other words, an exchange of views and dialogue is only possible if the public is adequately informed, and “without such dialogue any notion of real public participation is necessarily an illusion.” *Id.*; see also *Chemical Mfrs. Ass’n v. U.S. E.P.A.*, 870 F.2d 177, 200 (5th Cir. 1989) (“[F]airness requires that the agency afford interested parties an opportunity to challenge the underlying factual data relied on by the agency.”).

To ensure Intervenor Landowners’ participation in these proceedings is more than illusory, the Commission should grant this motion and hold a supplemental hearing on Summit’s permit application. Fairness is required in these proceedings, and fairness requires access to data and information that the Commission considers prior to the hearing. Intervenor Landowners used every method available to obtain the information prior to the hearing, but due to stonewalling by Summit and the Commission these efforts were unsuccessful.

The Commission can remedy these procedural deficiencies by holding a supplemental hearing. Developments after the hearing—including EERC’s response to the open records request which has potentially provided the complete modeling files, and Summit’s belated responses to discovery—as well as the information obtained in the hearing itself, will allow Intervenor Landowners to meaningfully participate. Landowners have also filed a motion to compel which should be granted to ensure the supplemental hearing allows for *meaningful* participation.<sup>1</sup>

---

<sup>1</sup> Landowners reiterate that they are in the process of running the modeling files obtained from EERC and are not yet certain these are the complete modeling files. See Decl. of Derrick Braaten, ¶18. Production of the files by the Commission or Summit is essential to fully authenticate the modeling files as used for this proceeding, and if Landowners have issues with incomplete files obtained from EERC, they have little recourse as compared to having the computer modeling files directly from the Commission or Summit and produced along with the representation that they are the complete modeling files used for this application as requested from both entities through either an open record request or through discovery in this proceeding.

The holding of a supplemental hearing will not delay the Commission's decision. As noted in Intervenor Landowners' Petition for Reconsideration of Denial of Motion to Continue Hearing, a decision is not expected for months (and there is also no evidence that a delay into winter will slow anything for the applicant). Therefore, there is no justification to preclude Intervenor Landowners from participating in a supplemental hearing.

### **III. CONCLUSION**

The law requires fairness, and fairness requires access to information. Between Summit's refusal to engage in discovery, the Commission's refusal to either expedite discovery or continue the hearing, and refusal to respond to public records requests, Intervenor Landowners have been blocked from the information required to meaningfully participate at the hearing. By granting this motion, the Commission can rectify the procedural deficiencies and ensure that this proceeding is conducted "in a manner fair to all interests." N.D.C.C. § 38-22-01. Otherwise it risks proving that it is not in fact administering its Class VI program in a manner fair to landowners and compliant with approved law.

DATED this 29<sup>th</sup> day of August, 2024.

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

## DECLARATION OF DERRICK BRAATEN

---

1. Attached hereto as Exhibit A is a true and correct copy of a request submitted via email on June 14, 2023 to the NDIC Oil and Gas Division for “applications and all correspondence and other documents...as well as all correspondence generally with Summit Carbon Solutions or its affiliates, authorized agents and representatives” related to “an application with the ND Industrial Commission requesting an order amalgamating property interests and/or seeking a Class VI well permit or permits.”

2. Attached hereto as Exhibit B is a true and correct copy of subsequent emails with Michael Ziesch, EGIS Staff Officer, where the request was amended to “storage facility permit” rather than amalgamation application or Class VI permits, and the correspondence was limited to “...May 1, 2023 to June 20, 2023.”

3. Attached hereto as Exhibit C is a true and correct copy of an index of the files produced in response to the June 14<sup>th</sup> request. A thumb drive of files was picked up on June 23, 2023. The index of the files was produced with a program called “Directory List and Print,” a software tool for Windows that enables listing and printing the content of any directory.

4. Inspection of the index, and the folders and files themselves, determined that the thumb drive contained the following files.

(a) Three draft “Carbon Dioxide Geologic Storage Facility Permits” for Summit Carbon Storage #1, #2, and #3 in pdf format.

(b) Four emails regarding the draft applications and data in msg format.

- (c) 613 GIS Shapefiles for Summit Carbon Storage #1, #2, and #3 in the form of geodatabase files with extensions “atx,” “freelist,” “gdbindexes,” “gdbtable,” “horizon,” and “spx.”
- (d) 178 modeling files for the programs CGM and Petrel. The CGM Rescue files are 154 “bin” files and the Petrel Rescue files are 23 “bin” files and one “xml” file.
- (e) 138 Core Information, High Resolution Figures, and Individual Section Document files for Summit Carbon Storage #1, #2, and #3 in the form of the following:

Extension	Count
jpg	35
pdf	54
png	11
tif	9
xlsx	25

5. Attached hereto as Exhibit D is a true and correct copy of one of the four emails listed in 4(b) above. It was sent by Tamara Madche, geologist with the NDIC Oil and Gas Division, to Jay Volk, the Sequestrations Director of Health, Safety, and Environment with Summit Carbon Solutions, on June 12, 2023 regarding the draft applications for carbon dioxide storage facility permits previously emailed by Mr. Volk. In that email, Ms. Madche lists found issues after a cursory check for completeness. One issue is missing CMG modeling files, where Ms. Madche writes the following: "Need: DAT, SRS, OUT, LOG, and any RST files for the model."

6. Attached hereto as Exhibit E is a true and correct copy of a letter to the NDIC Oil and Gas Division, submitted via email on September 21, 2023, requesting “all applications for permits pursuant to N.D.C.C. ch. 38-25, including any associated or related correspondence, documents, and notes related to the applications for permits.”

7. Attached hereto as Exhibit F is a true and correct copy of the email response of Mr. Ziesch sent September 22, 2023. Mr. Ziesch wrote that “Ms. Zaste, our office has not received any applications under NDCC 38-25.” No files were provided.

8. Attached hereto as Exhibit G is a true and correct copy of a letter to the NDIC Oil and Gas Division, submitted via email on May 15, 2024, requesting “data electronic files and/or load files submitted to the Oil and Gas Division by applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC” to include “All 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse or Petrel format, CMG (Canadian Modeling Group) Imex format, or other similar format.”

9. Attached hereto as Exhibit H is a true and correct copy of the May 21<sup>st</sup>, 2024 email response of Mr. Ziesch to the request in ¶8. Mr. Ziesch wrote that “The agency has previously provided (9-21-2023) all modeling input and results files submitted and used for the application by Summit. Agency staff validated the inputs and parameters in the submitted model via CMG software” and “The CMG files, previously provided on 9-21-2023, are the modeling files still being used for the applications. There are no updates to them.”

10. However, no files were provided in response to the September 21, 2023 records request.

11. The files produced in June of 2023 (under an entirely separate record request) only include “Rescue” files, not “results” files. The EERC records request response at ¶15 below includes the same “Rescue” files, but also a separate folder of “2022 CMG EERC **Results**” that includes 2 DAT files, an OUT file, and a LOG file, three of the files that Ms. Madche at the NDIC noted they would “need” in Exhibit D.

12. If “Agency staff validated the inputs and parameters in the submitted model via CMG software,” it must be presumed that Summit provided the agency with the missing CMG modeling files that Ms. Madche noted they would “need” in Exhibit D. Those files have not been provided to my office by the NDIC in any response to any records request. Presuming that Summit simply replied to the June 12, 2023 email from Ms. Madche without turning over any additional data, then that reply should have been included in either of the subsequent records requests on August 24, 2023:

Summit Carbon Solutions, LLC submitted three applications for carbon dioxide storage facility permits on June 9th, 2023. I am writing to request **all correspondence** and other documents related to the applications, as well as all correspondence generally with Summit Carbon Solutions or its affiliates, authorized agents and representatives, from **June 21st, 2023 to August 24th, 2023**.

or September 7, 2023:

Summit Carbon Storage #1, LLC was recently granted a permit for the TB LEINGANG 2, SE NE 18-141N-87W, Oliver Co., API – 33-065-00027, well file #40178. I am writing to request **all correspondence** and other documents related to all permit applications submitted by Summit Carbon Storage #1, LLC, or its affiliates, authorized agents, and representatives, from **January 1, 2023 to September 6, 2023**.

13. Attached hereto as Exhibits I and J are true and correct copies of the August 24, 2023 and September 7, 2023 letters to the Department of Mineral Resources regarding records requests.

14. Attached hereto as Exhibit K is a true and correct copy of an open records request to the EERC, submitted via email on June 17, 2024, requesting input files, data decks, data, databases, measurements, logs, output files, and graphing files.

15. Attached hereto as Exhibit L is the EERC email response sent on July 2, 2024. The EERC provided some files that had not been previously provided by the NDIC, including the following:

- A folder titled “2022 CMG EERC Results” containing the following:

- (a) 2 DAT files
- (b) 1 LOG file
- (c) 1 OUT file
- (d) 1 ERR file, and
- (e) 1 SR3 file.

- Three folders, one for each of the three storage facilities, titled “MDT Files.” These are graphs, tables, etc. related to pressure testing.

16. Attached hereto as Exhibit M is a true and correct copy of an excerpt from the transcript of NDIC hearing testimony given June 11<sup>th</sup>, 2024. Amanda Douglas, assistant director for integrated subsurface projects at the EERC, testified that the .DAT files listed in ¶15 above were, to her understanding, provided to the NDIC.

11 Q. Are you aware of the GEM model having a  
12 single file called -- with a file extension .DAT  
13 that you can use to run a model on the program?

14 A. Correct.

15 Q. Do you have one of those .DAT files that  
16 would allow us to run the model you ran in that  
17 program?

18 A. For the CO2 simulations or the geochemical  
19 simulations?

20 Q. CO2 simulation.

21 A. Yes, I believe that was provided to the  
22 Commission already.

23 Q. And that could just be taken and loaded  
24 into the GEM program to run the model that you ran?

25 A. That's my understanding, yes.

p. 253, lns. 11-25.

17. Attached hereto as Exhibit N is a true and correct copy of an excerpt from the transcript of NDIC hearing testimony given June 12<sup>th</sup>, 2024. Amanda Douglas again testified that the .DAT files listed in ¶15 above were provided to the NDIC, along with the .SR3 file.

18 Other than the input file for the PHREEQC  
19 model, is there anything listed in these bullet  
20 points that was not provided by EERC to the  
21 Industrial Commission?

22     A. Yes. As I mentioned, the only input data  
23     that was provided can be found in your last bullet  
24     point in terms of what I would call the  
25     simulation -- or the numerical reservoir simulation  
1     model data decks and the output files. Those were  
2     the two pieces of data which I am saying is the  
3     .DAT file and the .SR3 file. Those are the only  
4     two data sets from this list that were provided.

pp. 297-298, lns. 18-4.

18. It is estimated that the first run of the model input files received from the EERC will take  
24.7 days to complete. Landowners' experts are in process on this now.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 29<sup>th</sup> day of August, 2024 at Bismarck, ND, United States.

I understand that Summit Carbon Solutions or one of its subsidiaries or affiliates such as SCS Carbon Transport or another related entity has filed an application with the ND Industrial Commission requesting an order amalgamating property interests and/or seeking a Class VI well permit or permits. I am writing to request all such applications and all correspondence and other documents related to the application, as well as all correspondence generally with Summit Carbon Solutions or its affiliates, authorized agents and representatives. I authorize you to charge up to \$250.00 to respond to this request and would prefer all materials in electronic format to the maximum extent possible. I understand that there are likely short timeframes for such applications and hearings so hope to receive these materials as soon as possible and I am happy to discuss ways to expedite the request or make your response more efficient. Please let me know if you have any questions or would like to discuss anything in this request.

Sincerely,

**Derrick Braaten**

**Sent:** Tuesday, June 20, 2023 4:28 PM  
**To:** Derrick Braaten <derrick@braatenlawfirm.com>  
**Subject:** RE: Open Record Request re: Summit Carbon Solutions

[Warning: External Sender]

We estimate a hard copy of the data would be approximately 1,200 pages.

The related data sets we have are approximately 3.3G and would take about an hour to transfer onto a thumb drive.

We spent approximately an hour reviewing your request, so the cost estimate for processing will be \$25 as the first hour is free.

Additionally, the cost of either print copy, or the cost of the thumb drive, which would likely be nominal. We would need to put the data on a device that is ours because we can't introduce external hard drives for security reasons.

Please let me know if you want me to proceed with the request and, if so, what format you'd like it in.

[Warning: External Sender]

Mr. Braaten, we were able to get staff together this afternoon to review your request.

Our office has not received an application for amalgamation, nor do we have any class VI applications for the entity referenced. We do have a draft application for a storage facility permit.

Finally, your request for correspondence is too broad to process. It needs to have a more specific topic and date range.

You don't often get email from [derrick@braatenlawfirm.com](mailto:derrick@braatenlawfirm.com). [Learn why this is important](#)

\*\*\*\*\* CAUTION: This email originated from an outside source. Do not click links or open attachments unless you know they are safe. \*\*\*\*\*

I understand that Summit Carbon Solutions or one of its subsidiaries or affiliates such as SCS Carbon Transport or another related entity has filed an application with the ND Industrial Commission requesting an order amalgamating property interests and/or seeking a Class VI well permit or permits. I am writing to request all such applications and all correspondence and other documents related to the application, as well as all correspondence generally with Summit Carbon Solutions or its affiliates, authorized agents and representatives. I authorize you to charge up to \$250.00 to respond to this request and would prefer all materials in electronic format to the maximum extent possible. I understand that there are likely short timeframes for such applications and hearings so hope to receive these materials as soon as possible and I am happy to discuss ways to expedite the request or make your response more efficient. Please let me know if you have any questions or would like to discuss anything in this request.

Sincerely,

Derrick Braaten

Exhibit D to Declaration of Derrick Braaten  
in Support of Motion for Supplemental Hearing

**From:** Madche, Tamara J.  
**Sent:** Monday, June 12, 2023 10:06 AM  
**To:** Jay Volk; Suggs, Richard A.  
**Cc:** Amanda Hoffer; Wade Boeshans; Jeffrey Skaare; Jacobson, Lonny; Regorrah, Josh; Anagnost, Katherine; Olsen, Caitlin; Connors, Kevin; Kalenze, Nicholas; Bender, Lawrence  
**Subject:** RE: Summit Carbon Solutions - Draft applications

All,

We have received and were able to download the files provided for the three SFP applications. It's unlikely we'll have time to start the review of these applications in full until July as our focus is being switched back to our current docketed application for June 30<sup>th</sup>, so don't hesitate to continue refining these draft applications in the meantime. I will let you know when we begin our review process, that way we can ensure we're looking at the latest versions.

I did do a quick cursory check for completeness and found the following issues:

- CMG Modeling Files
  - Need: DAT, SRS, OUT, LOG, and any RST files for the model.
- Application appendices needed for each SFP application:
  - Testing and Monitoring Plan Summary – these have been provided on the past two applications and are considered an expectation going forward. The case files end up very large and unwieldy for SFPs, so this compiled summary was created to help provide a quicker reference point that helps both the operator and the regulatory body through the life of the project.
  - Quality Assurance Surveillance Plan (QASP) – I did not see this appendix. I did notice within the Testing and Monitoring section that you had QASP subsections. I am going to ask that these be pulled and placed in their own appendix to remain consistent with past applications. It's very likely we'll ask that additional items (such as figures or reference documents) be added in the QASP as we review the application and by having them all in one appendix it will help aid in less reference points having to be updated in Section 5, Section 6, and the Regulatory Compliance Table.
  - Appendix C – Geochemical Interactions – Unless you can provide a good argument for moving this information into an appendix, we are going to ask that it be placed back in Section 2 under its respective zone sub-sections. From a reviewer stance we review all the geological exhibits including the geochemical and geomechanical information together by zone, so not only is it not consistent with past applications but it makes the review a bit disjointed.
  - Section 12 – Financial Assurance – I wouldn't expect you to know the exact financial instrument types you intend to use at the draft stage of the SFPs, but it will be preferred that you have that nailed down in the narrative prior to us docketing the application.

If you have any questions on the comments above, please let me know.

Thanks,

**Tammy Madche**  
*Geologist*

**Subject:** Summit Carbon Solutions - Draft applications

\*\*\*\*\* **CAUTION:** This email originated from an outside source. Do not click links or open attachments unless you know they are safe. \*\*\*\*\*

Tammy and Richard,

Summit Carbon Solutions, LLC respectfully submits for the review and consideration of the North Dakota Industrial Commission, three applications for carbon dioxide storage facility permits, **as follows:**

- **Applicant:** Summit Carbon Storage #1, LLC for the injection site called TB Leingang;
- **Applicant:** Summit Carbon Storage #2, LLC for the injection site called BK Fischer; and
- **Applicant:** Summit Carbon Storage #3, LLC for the injection site called KJ Hintz.

These applications were prepared pursuant to and in accordance with Chapter 38-22 of the North Dakota Century Code and Chapter 43-05-01 of the North Dakota Administrative Code.

Please watch your email for a separate message with the link to **access the application contents that will be provided by the end of business today.**

In addition, please note any questions in relation to this submittal please feel free to reach out to myself as the primary contact for Summit Carbon Solutions and Lonny Jacobson as the primary contact for any EERC correspondence.

We look forward to the results of your review.

Sincerely,

Jay Volk

**Re: Records Request Applications for Permits**

I am writing to request a copy of records from your office, pursuant to N.D.C.C. § 44-04-18. Please provide all applications for permits pursuant to N.D.C.C. ch. 38-25, including any associated or related correspondence, documents, and notes related to the applications for permits.

To the maximum extent possible, I request that you provide all records to me in electronic format by emailing them to my paralegal Desirae Zaste at [desirae@braatenlawfirm.com](mailto:desirae@braatenlawfirm.com). If it is necessary to mail responsive records, they may be sent to me at the address below.

You have my pre-authorization to bill up to \$300.00 to fulfill this records request. If you have any questions about anything in this letter, do not hesitate to contact me. Thank you for your assistance.

Sincerely,

Derrick Braaten

**Re: Records Request**

I am writing to request a copy of records from your office, pursuant to N.D.C.C. § 44-04-18. Please provide the following data electronic files and/or load files submitted to the Oil and Gas Division by applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC:

- All the input files, field and analytical data, and the model geochemical database used to evaluate the CO<sub>2</sub> effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's USGS's PHREEQC model.
- All the input files, field and analytical data, and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.
- Geophysical Logs that penetrate injection and confining zones, seismic survey data and core sample measurements, all measurements and data for acoustic impedance, total porosity, effective porosity, permeability, and facies.
- All the input files, field and analytical data, and the model, including but not limited to all inputs and data files used to run SLB's Petrel model in any manner related to Summit's applications.
- All 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse or Petrel format, CMG (Canadian Modeling Group) Imex format, or other similar format.

To the maximum extent possible, I request that you provide all records to me in electronic format by emailing them to my paralegal Desirae Zaste at [desirae@braatenlawfirm.com](mailto:desirae@braatenlawfirm.com). If it is necessary to mail responsive records, they may be sent to me at the address below.

[Warning: External Sender]

Regarding the open records request received on 5-15-2024 for Summit Carbon Storage facilities. Please see responses in red below each of the submitted topics.

The agency has previously provided (9-21-2023) all modeling input and results files submitted and used for the application by Summit. Agency staff validated the inputs and parameters in the submitted model via CMG software. Field and analytical data of your request are available through the agency website in log and well files.

- All the input files, field and analytical data, and the model geochemical database used to evaluate the CO2 effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's USGS's PHREEQC model.

Results received from applicant is in the related case files and available on the agency website. The agency did not receive software files for PHREEQC model. Model and geochemical database documentation can be obtained from the USGS.gov PHREEQC webpage.

- All the input files, field and analytical data, and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.

The agency did not receive Geochem GEM model files. Results of Geochem modeling are summarized in the application packet, available in the case file. The geochemical equations used in the model are internal to the CMG GEM software.

- Geophysical Logs that penetrate injection and confining zones, seismic survey data and core sample measurements, all measurements and data for acoustic impedance, total porosity, effective porosity, permeability, and facies.

Geophysical logs data are available via Premium Subscription on the agency Scout Ticket. Well files contain the core analysis and are also available on agency website via Premium Subscription. Related wells that penetrate the area of review are identified in section 4 of each application package. Seismic survey results are not provided to the agency, they are owned by the company conducting the survey.

- All the input files, field and analytical data, and the model, including but not limited to all inputs and data files used to run SLB's Petrel model in any manner related to Summit's applications.

The agency does not receive Petrel model files other than exports from the CMG files previously provided on 9-21-2023 open records request.

- All 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse or Petrel format, CMG (Canadian Modeling Group) Imex format, or other similar format.

The CMG files, previously provided on 9-21-2023, are the modeling files still being used for the applications. There are no updates to them.

**Re: Records Request -- Applications for Permits**

I am writing to request a copy of records from your office, pursuant to N.D.C.C. § 44-04-18. Summit Carbon Solutions, LLC submitted three applications for carbon dioxide storage facility permits on June 9<sup>th</sup>, 2023. I am writing to request all correspondence and other documents related to the applications, as well as all correspondence generally with Summit Carbon Solutions or its affiliates, authorized agents and representatives, from June 21<sup>st</sup>, 2023 to August 24<sup>th</sup>, 2023.

To the maximum extent possible, I request that you provide all records to me in electronic format by emailing them to my paralegal Steven Price at [steven@braatenlawfirm.com](mailto:steven@braatenlawfirm.com). If it is necessary to mail responsive records, they may be sent to me at the address below. You have my pre-authorization to bill up to \$300.00 to fulfill this records request. If you have any questions about anything in this letter, do not hesitate to contact me.

**Re: Records Request**

I am writing to request a copy of records from your office, pursuant to N.D.C.C. § 44-04-18. Please provide the following data electronic files in the possession of the EERC which are related to the applications and requests for relief in NDIC Case Nos. 30869-30880 and which were filed by Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC and/or the following entities: Summit Carbon Solutions, SCS Carbon Transport LLC, SCS Permanent Carbon Storage, LLC:

- All the input files and/or data decks, field and analytical data, and the model geochemical database used to evaluate the CO<sub>2</sub> effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's USGS's PHREEQC model.
- All the input files and or data decks, field and analytical data , and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.
- Geophysical Logs that penetrate injection and confining zones, all seismic survey data and any seismic data whatsoever, core sample measurements, all measurements and data for acoustic impedance, total porosity, effective porosity, permeability, and facies.
- All the input files, field and analytical data, and the model, including but not limited to all inputs and data files used to run SLB's Petrel model in any manner related to Summit's applications.
- All 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse or Petrel format, CMG (Canadian Modeling Group) Imex format, or other similar format.

To the maximum extent possible, I request that you provide all records to me in electronic format by emailing them to my paralegal Desirae Zaste at [desirae@braatenlawfirm.com](mailto:desirae@braatenlawfirm.com). If you wish for

Energy & Environmental Research Center  
June 17, 2024

**To:** Desirae Zaste  
**Cc:** Johnson, Stephanie A.  
**Subject:** Open Records Request dated June 17, 2024

[Warning: External Sender]

Mr. Braaten,

The following is in response to your June 17<sup>th</sup> Open Records Request to the EERC. Below is your original request, along with a response as to what is included and can be accessed electronically per the instructions below. Because each of your requests included several components, we have added numerical identifiers to identify what is, and isn't included. For anything not included, I have provided the corresponding reason per North Dakota Century Code. All items included were also accessible through the Department of Mineral Resources as previously provided to them through the permit process. There is no cost for this request since it had been previously assembled and provided to the State of North Dakota.

- All the input files and/or data decks<sup>1</sup>, field and analytical data<sup>2</sup>, and the model geochemical database<sup>3</sup> used to evaluate the CO2 effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's USGS's PHREEQC model<sup>4</sup>.
  1. Included
  2. Included
  3. Included
  4. Not included, PHREEQC software is free and publicly available.
- All the input files and or data decks<sup>1</sup>, field and analytical data<sup>2</sup>, and the model geochemical database<sup>3</sup> used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model<sup>4</sup> or software used for the same purposes.
  1. Included
  2. Included
  3. Included
  4. Not Included, Software license purchase agreement required by vendor.
- Geophysical Logs that penetrate injection and confining zones<sup>1</sup>, all seismic survey data and any seismic data whatsoever<sup>2</sup>, core sample measurements<sup>3</sup>, all measurements and data for acoustic impedance<sup>4</sup>, total porosity<sup>5</sup>, effective porosity<sup>6</sup>, permeability<sup>7</sup>, and facies<sup>8</sup>.
  1. Not Included – Per NDCC 44-04-18.4 (1) - We understand they MAY have been made available publicly by others
  2. Not Included - Per NDCC 44-04-18.4 (1)
  3. Included
  4. Not Included - Per NDCC 44-04-18.4 (1)
  5. Included
  6. Included
  7. Included
  8. Included
- All the input files<sup>1</sup>, field and analytical data<sup>2</sup>, and the model<sup>3</sup>, including but not limited to all inputs and data files<sup>4</sup> used to run SLB's Petrel model in any manner related to Summit's applications.
  1. Included
  2. Included

3. Included
4. Included
- All 3D numerical reservoir simulation model data decks<sup>1</sup>, output files and graphing files of the Storage Reservoir in original electronic format<sup>2</sup>. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse or Petrel format, CMG (Canadian Modeling Group) Imex format, or other similar format.
  1. Included
  2. Included

### Instructions for Accessing the Information

We have an SFTP Site set up for your request. Note: Prior to accessing the site, you will need to pass along the public IP address of the machine used to connect so that we can provide you access.

Here are the credentials for accessing the SFTP file storage site:

Connection String/Host: [eerc.scsspsrequestor@eerc.blob.core.windows.net](https://eerc.scsspsrequestor@eerc.blob.core.windows.net)

Username: scsspsrequestor

Password: Exf73AU6xRRdDebdM5p8TytU64ek3Wfi

Here are some instructions on accessing the SFTP file storage site:

1. Before accessing the file storage, the public IP addresses used will need to be passed along and whitelisted. Your public IP address can be found at this link: [What Is My IP? Best Way To Check Your Public IP Address](#). Please forward this IP address to [terickson@undeerc.org](mailto:terickson@undeerc.org) and I will have it whitelisted and will provide you with confirmation of the same.
2. Download and install an SFTP client. (I use FileZilla, but a list of supported SFTP clients is available here: [SFTP support for Azure Blob Storage - Azure Storage | Microsoft Learn](#))
3. Using your SFTP client, create a new connection using the attached credentials.
  - a. In FileZilla, this can be done by navigating to File > Site Manager. Click "New site" at the bottom of the screen. Select "SFTP – SSH File Transfer Protocol" in the Protocol field. Enter the connection string in the Host field and username in the User field. Click "Connect" and enter the password when prompted. You may be asked if you trust this host, select "OK."
4. You should now be connected to the file storage and able to download the files.
  - a. In FileZilla, the SFTP storage files will appear in the right panel, and the left panel can be used to navigate to a location on the client computer. To download, select a file, right click, and select "Download."

Please let me know if there are any questions.

Thanks,  
Tom

Exhibit M to Declaration of Derrick Braaten  
in Support of Motion for Supplemental Hearing

# NORTH DAKOTA

## OIL AND GAS DIVISION

In re application of Summit : Case No(s). 30869  
Carbon Storage #1, LLC requesting : 30870  
consideration for the geologic : 30871  
storage of carbon dioxide in the : 30872  
Broom Creek Formation from the : 30873  
Midwest Carbon Express Pipeline in: 30874  
the storage facility located in : 30875  
Sections 31, 32, 33, and 34, : 30876  
Township 142 North, Range 87 West,: 30877  
Sections 1, 11, 12, 13, 14, 15, : 30878  
22, 23, 24, 25, 26, 35, and 36, : 30879  
Township 141 North, Range 88 West,: 30880  
Sections 2, 3, 4, 5, 6, 7, 8, 9, :  
10, 11, 14, 15, 16, 17, 18, 19, :  
20, 21, 22, 23, 25, 26, 27, 28, :  
29, 30, 31, 32, 33, 34, and 35, :  
Township 141 North, Range 87 West,:  
Sections 1, 2, 3, and 12, Township:  
140 North, Range 88 West and :  
Sections 4, 5, 6, and 7, Township :  
140 North, Range 87 West, Mercer, :  
Morton, and Oliver Counties, ND. :

In re application of Summit :  
Carbon Storage #1, LLC to :  
consider the amalgamation of the :  
storage reservoir pore space, in :  
which the Commission may require :  
that the pore space owned by :  
nonconsenting owners be included :  
in the geologic storage, as :  
required to operate the Summit :  
Carbon Storage #1, LLC storage :  
facility located in Sections 31, :  
32, 33, and 34, Township 142 :  
North, Range 87 West, Sections 1, :  
11, 12, 13, 14, 15, 22, 23, 24, :  
25, 26, 35, and 36, Township 141 :  
North, Range 88 West, Sections 2, :  
3, 4, 5, 6, 7, 8, 9, 10, 11, 14, :  
15, 16, 17, 18, 19, 20, 21, 22, :  
23, 25, 26, 27, 28, 29, 30, 31, :

32, 33, 34, and 35, Township 141 :  
North, Range 87 West, Sections 1, :  
2, 3, and 12, Township 140 North, :  
Range 88 West and Sections 4, 5, :  
6, and 7, Township 140 North, :  
Range 87 West, Mercer, Morton, :  
and Oliver Counties, ND, in the :  
Broom Creek Formation. :

In re application of Summit :  
Carbon Storage #1, LLC for an :  
order of the Commission :  
determining the amount of :  
financial responsibility for the :  
geologic storage of carbon dioxide: :  
from the Midwest Carbon Express :  
Pipeline in the storage facility :  
located in Sections 31, 32, 33, :  
and 34, Township 142 North, Range :  
87 West, Sections 1, 11, 12, 13, :  
14, 15, 22, 23, 24, 25, 26, 35, :  
and 36, Township 141 North, Range :  
88 West, Sections 2, 3, 4, 5, 6, :  
7, 8, 9, 10, 11, 14, 15, 16, 17, :  
18, 19, 20, 21, 22, 23, 25, 26, :  
27, 28, 29, 30, 31, 32, 33, 34, :  
and 35, Township 141 North, Range :  
87 West, Sections 1, 2, 3, and 12,: :  
Township 140 North, Range 88 West :  
and Sections 4, 5, 6, and 7, :  
Township 140 North, Range 87 West,: :  
Mercer, Morton, and Oliver :  
Counties, ND, in the Broom Creek :  
Formation. :

In re motion to consider :  
establishing the field and pool :  
limits for lands located in :  
Sections 31, 32, 33, and 34, :  
Township 142 North, Range 87 West,: :  
Sections 1, 11, 12, 13, 14, 15, :  
22, 23, 24, 25, 26, 35, and 36, :  
Township 141 North, Range 88 West,: :  
Sections 2, 3, 4, 5, 6, 7, 8, 9, :  
10, 11, 14, 15, 16, 17, 18, 19, :  
20, 21, 22, 23, 25, 26, 27, 28, :  
29, 30, 31, 32, 33, 34, and 35, :

Township 141 North, Range 87 West, :  
Sections 1, 2, 3, and 12, Township :  
140 North, Range 88 West and :  
Sections 4, 5, 6, and 7, Township :  
140 North, Range 87 West, Mercer, :  
Morton, and Oliver Counties, ND, :  
subject to the application of :  
Summit Carbon Storage #1, LLC for :  
the geologic storage of carbon :  
dioxide in the Broom Creek :  
Formation, and enact such special :  
field rules as may be necessary. :

In re application of Summit :  
Carbon Storage #2, LLC requesting :  
consideration for the geologic :  
storage of carbon dioxide in the :  
Broom Creek Formation from the :  
Midwest Carbon Express Pipeline :  
in the storage facility located in :  
Sections 27, 28, 29, 32, 33, 34, :  
and 35, Township 143 North, Range :  
88 West, Sections 1, 2, 3, 4, 5, :  
6, 7, 8, 9, 10, 11, 12, 13, 14, :  
15, 16, 17, 18, 19, 20, 21, 22, :  
23, 24, 25, 26, 27, 28, 29, 30, :  
32, 33, 34, 35, and 36, Township :  
142 North, Range 88 West, Sections :  
5, 6, 7, 8, 17, 18, 19, 20, 29, :  
30, and 31, Township 142 North, :  
Range 87 West, and Sections 1, 2, :  
and 3, Township 141 North, Range :  
88 West, Mercer and Oliver :  
Counties, ND. :

In re application of Summit :  
Carbon Storage #2, LLC to :  
consider the amalgamation of the :  
storage reservoir pore space, in :  
which the Commission may require :

1 from the package?

2 A. They're governed by a specific license  
3 agreement, so I don't have those terms available  
4 now. But there are potential ways that someone  
5 else could purchase those digitized logs for those  
6 specific wells.

7 Q. And if they had a license, you could give  
8 your copy to them?

9 A. Again, I'm not sure the specific license  
10 terms for the logs in question.

11 Q. Are you aware of the GEM model having a  
12 single file called -- with a file extension .DAT  
13 that you can use to run a model on the program?

14 A. Correct.

15 Q. Do you have one of those .DAT files that  
16 would allow us to run the model you ran in that  
17 program?

18 A. For the CO<sub>2</sub> simulations or the geochemical  
19 simulations?

20 Q. CO<sub>2</sub> simulation.

21 A. Yes, I believe that was provided to the  
22 Commission already.

23 Q. And that could just be taken and loaded  
24 into the GEM program to run the model that you ran?

25 A. That's my understanding, yes.

North Dakota Industrial Commission  
Oil and Gas Division  
Case Nos. 30869-30880

Exhibit N to Declaration of Derrick Braaten  
in Support of Motion for Supplemental Hearing

# NORTH DAKOTA

## OIL AND GAS DIVISION

In re application of Summit : Case No(s). 30869  
Carbon Storage #1, LLC requesting : 30870  
consideration for the geologic : 30871  
storage of carbon dioxide in the : 30872  
Broom Creek Formation from the : 30873  
Midwest Carbon Express Pipeline in: 30874  
the storage facility located in : 30875  
Sections 31, 32, 33, and 34, : 30876  
Township 142 North, Range 87 West,: 30877  
Sections 1, 11, 12, 13, 14, 15, : 30878  
22, 23, 24, 25, 26, 35, and 36, : 30879  
Township 141 North, Range 88 West,: 30880  
Sections 2, 3, 4, 5, 6, 7, 8, 9, :  
10, 11, 14, 15, 16, 17, 18, 19, :  
20, 21, 22, 23, 25, 26, 27, 28, :  
29, 30, 31, 32, 33, 34, and 35, :  
Township 141 North, Range 87 West,:  
Sections 1, 2, 3, and 12, Township:  
140 North, Range 88 West and :  
Sections 4, 5, 6, and 7, Township :  
140 North, Range 87 West, Mercer, :  
Morton, and Oliver Counties, ND. :

In re application of Summit :  
Carbon Storage #1, LLC to :  
consider the amalgamation of the :  
storage reservoir pore space, in :  
which the Commission may require :  
that the pore space owned by :  
nonconsenting owners be included :  
in the geologic storage, as :  
required to operate the Summit :  
Carbon Storage #1, LLC storage :  
facility located in Sections 31, :  
32, 33, and 34, Township 142 :  
North, Range 87 West, Sections 1, :  
11, 12, 13, 14, 15, 22, 23, 24, :  
25, 26, 35, and 36, Township 141 :  
North, Range 88 West, Sections 2, :  
3, 4, 5, 6, 7, 8, 9, 10, 11, 14, :  
15, 16, 17, 18, 19, 20, 21, 22, :  
23, 25, 26, 27, 28, 29, 30, 31, :

32, 33, 34, and 35, Township 141 :  
North, Range 87 West, Sections 1, :  
2, 3, and 12, Township 140 North, :  
Range 88 West and Sections 4, 5, :  
6, and 7, Township 140 North, :  
Range 87 West, Mercer, Morton, :  
and Oliver Counties, ND, in the :  
Broom Creek Formation. :

In re application of Summit :  
Carbon Storage #1, LLC for an :  
order of the Commission :  
determining the amount of :  
financial responsibility for the :  
geologic storage of carbon dioxide: :  
from the Midwest Carbon Express :  
Pipeline in the storage facility :  
located in Sections 31, 32, 33, :  
and 34, Township 142 North, Range :  
87 West, Sections 1, 11, 12, 13, :  
14, 15, 22, 23, 24, 25, 26, 35, :  
and 36, Township 141 North, Range :  
88 West, Sections 2, 3, 4, 5, 6, :  
7, 8, 9, 10, 11, 14, 15, 16, 17, :  
18, 19, 20, 21, 22, 23, 25, 26, :  
27, 28, 29, 30, 31, 32, 33, 34, :  
and 35, Township 141 North, Range :  
87 West, Sections 1, 2, 3, and 12,: :  
Township 140 North, Range 88 West :  
and Sections 4, 5, 6, and 7, :  
Township 140 North, Range 87 West,: :  
Mercer, Morton, and Oliver :  
Counties, ND, in the Broom Creek :  
Formation. :

In re motion to consider :  
establishing the field and pool :  
limits for lands located in :  
Sections 31, 32, 33, and 34, :  
Township 142 North, Range 87 West,: :  
Sections 1, 11, 12, 13, 14, 15, :  
22, 23, 24, 25, 26, 35, and 36, :  
Township 141 North, Range 88 West,: :  
Sections 2, 3, 4, 5, 6, 7, 8, 9, :  
10, 11, 14, 15, 16, 17, 18, 19, :  
20, 21, 22, 23, 25, 26, 27, 28, :  
29, 30, 31, 32, 33, 34, and 35, :

Township 141 North, Range 87 West, :  
Sections 1, 2, 3, and 12, Township :  
140 North, Range 88 West and :  
Sections 4, 5, 6, and 7, Township :  
140 North, Range 87 West, Mercer, :  
Morton, and Oliver Counties, ND, :  
subject to the application of :  
Summit Carbon Storage #1, LLC for :  
the geologic storage of carbon :  
dioxide in the Broom Creek :  
Formation, and enact such special :  
field rules as may be necessary. :

In re application of Summit :  
Carbon Storage #2, LLC requesting :  
consideration for the geologic :  
storage of carbon dioxide in the :  
Broom Creek Formation from the :  
Midwest Carbon Express Pipeline :  
in the storage facility located in :  
Sections 27, 28, 29, 32, 33, 34, :  
and 35, Township 143 North, Range :  
88 West, Sections 1, 2, 3, 4, 5, :  
6, 7, 8, 9, 10, 11, 12, 13, 14, :  
15, 16, 17, 18, 19, 20, 21, 22, :  
23, 24, 25, 26, 27, 28, 29, 30, :  
32, 33, 34, 35, and 36, Township :  
142 North, Range 88 West, Sections :  
5, 6, 7, 8, 17, 18, 19, 20, 29, :  
30, and 31, Township 142 North, :  
Range 87 West, and Sections 1, 2, :  
and 3, Township 141 North, Range :  
88 West, Mercer and Oliver :  
Counties, ND. :

In re application of Summit :  
Carbon Storage #2, LLC to :  
consider the amalgamation of the :  
storage reservoir pore space, in :  
which the Commission may require :  
that the pore space owned by :  
nonconsenting owners be included :  
in the geologic storage, as :  
required to operate the Summit :  
Carbon Storage #2, LLC storage :  
facility located in Sections 27, :  
28, 29, 32, 33, 34, and 35, :

Township 143 North, Range 88 West, :  
Sections 1, 2, 3, 4, 5, 6, 7, 8, :  
9, 10, 11, 12, 13, 14, 15, 16, 17, :  
18, 19, 20, 21, 22, 23, 24, 25, :  
26, 27, 28, 29, 30, 32, 33, 34, :  
35, and 36, Township 142 North, :  
Range 88 West, Sections 5, 6, 7, :  
8, 17, 18, 19, 20, 29, 30, 31, :  
Township 142 North, Range 87 :  
West, and Sections 1, 2, and 3, :  
Township 141 North, Range 88 :  
West, Mercer and Oliver Counties, :  
ND in the Broom Creek Formation. :

In re application of Summit :  
Carbon Storage #2, LLC to :  
consider the application of Summit :  
Carbon Storage #2, LLC for an :  
order of the Commission :  
determining the amount of :  
financial responsibility for the :  
geologic storage of carbon dioxide :  
from the Midwest Carbon Express :  
Pipeline in the storage facility :  
located in Sections 27, 28, 29, :  
32, 33, 34, and 35, Township 143 :  
North, Range 88 West, Sections 1, :  
2, 3, 4, 5, 6, 7, 8, 9, 10, 11, :  
12, 13, 14, 15, 16, 17, 18, 19, :  
20, 21, 22, 23, 24, 25, 26, 27, :  
28, 29, 30, 32, 33, 34, 35, and :  
36, Township 142 North, Range 88 :  
West, Sections 5, 6, 7, 8, 17, 18, :  
19, 20, 29, 30, and 31, Township :  
142 North, Range 87 West, and :  
Sections 1, 2, and 3, Township 141 :  
North, Range 88 West, Mercer and :  
Oliver Counties, ND, in the Broom :  
Creek Formation. :

In re motion of the Commission to :  
consider establishing the field :  
and pool limits for lands located :  
in Sections 27, 28, 29, 32, 33, :  
34, and 35, Township 143 North, :  
Range 88 West, Sections 1, 2, 3, :  
4, 5, 6, 7, 8, 9, 10, 11, 12, 13, :

14, 15, 16, 17, 18, 19, 20, 21, :  
22, 23, 24, 25, 26, 27, 28, 29, :  
30, 32, 33, 34, 35, and 36, :  
Township 142 North, Range 88 West, :  
Sections 5, 6, 7, 8, 17, 18, 19, :  
20, 29, 30, and 31, Township 142 :  
North, Range 87 West, and Sections :  
1, 2, and 3, Township 141 North, :  
Range 88 West, Mercer and Oliver :  
Counties, ND, subject to the :  
application of Summit Carbon :  
Storage #2, LLC for the geologic :  
storage of carbon dioxide in the :  
Broom Creek Formation, and enact :  
such special field rules as may :  
be necessary. :

In re application of Summit :  
Carbon Storage #3, LLC requesting :  
consideration for the geologic :  
storage of carbon dioxide in the :  
Broom Creek Formation from the :  
Midwest Carbon Express Pipeline in :  
the storage facility located in :  
Section 36, Township 143 North, :  
Range 87 West, Sections 19, 20, :  
21, 28, 29, 30, 31, 32, 33, 34, :  
35, and 36, Township 143 North, :  
Range 86 West, Sections 1, 2, 11, :  
12, 13, 14, and 24, Township 142 :  
North, Range 87 West, Sections 1, :  
2, 3, 4, 5, 6, 7, 8, 9, 10, 11, :  
12, 13, 14, 15, 16, 17, 18, 19, :  
20, 21, 22, 23, 24, 25, 26, 27, :  
28, 29, 30, 32, 33, 34, and 35, :  
Township 142 North, Range 86 :  
West, and Sections 6, 7, 17, 18, :  
19, and 20, Township 142 North, :  
Range 85 West, Oliver County, ND. :

In re application of Summit :  
Carbon Storage #3, LLC to consider :  
the amalgamation of the storage :  
reservoir space, in which the :  
Commission may require that the :  
pore space owned by nonconsenting :  
owners be included in the geologic :

storage, as required to operate :  
the Summit Carbon Storage #3, LLC :  
storage facility located in :  
Section 36, Township 143 North, :  
Range 87 West, Sections 19, 20, :  
21, 28, 29, 30, 31, 32, 33, 34, :  
35, and 36, Township 143 North, :  
Range 86 West, Sections 1, 2, 11, :  
12, 13, 14, and 24, Township 142 :  
North, Range 87 West, Sections 1, :  
2, 3, 4, 5, 6, 7, 8, 9, 10, 11, :  
12, 13, 14, 15, 16, 17, 18, 19, :  
20, 21, 22, 23, 24, 25, 26, 27, :  
28, 29, 30, 32, 33, 34, and 35, :  
Township 142 North, Range 86 West, :  
and Sections 6, 7, 17, 18, 19, and :  
20, Township 142 North, Range 85 :  
West, Oliver County, ND, in the :  
Broom Creek Formation. :

In re application of Summit :  
Carbon Storage #3, LLC for an :  
order of the Commission :  
determining the amount of :  
financial responsibility for the :  
geologic storage of carbon dioxide :  
from the Midwest Carbon Express :  
Pipeline in the storage facility :  
located in Section 36, Township :  
143 North, Range 87 West, Sections :  
19, 20, 21, 28, 29, 30, 31, 32, :  
33, 34, 35, and 36, Township 143 :  
North, Range 86 West, Sections 1, :  
2, 11, 12, 13, 14, and 24, :  
Township 142 North, Range 87 West, :  
Sections 1, 2, 3, 4, 5, 6, 7, 8, :  
9, 10, 11, 12, 13, 14, 15, 16, 17, :  
18, 19, 20, 21, 22, 23, 24, 25, :  
26, 27, 28, 29, 30, 32, 33, 34, :  
and 35, Township 142 North, Range :  
86 West, and Sections 6, 7, 17, :  
18, 19, and 20, Township 142 :  
North, Range 85 West, Oliver :  
County, ND, in the Broom Creek :  
Formation. :

In re motion of the Commission to :  
consider establishing the field :  
and pool limits for lands located :  
in Section 36, Township 143 North, :  
Range 87 West, Sections 19, 20, :  
21, 28, 29, 30, 31, 32, 33, 34, :  
35, and 36, Township 143 North, :  
Range 86 West, Sections 1, 2, 11, :  
12, 13, 14, and 24, Township 142 :  
North, Range 87 West, Sections 1, :  
2, 3, 4, 5, 6, 7, 8, 9, 10, 11, :  
12, 13, 14, 15, 16, 17, 18, 19, :  
20, 21, 22, 23, 24, 25, 26, 27, :  
28, 29, 30, 32, 33, 34, and 35, :  
Township 142 North, Range 86 West, :  
and Sections 6, 7, 17, 18, 19, and :  
20, Township 142 North, Range 85 :  
West, Oliver County, ND, subject :  
to the application of Summit :  
Carbon Storage #3, LLC for the :  
geologic storage of carbon dioxide :  
in the Broom Creek Formation, and :  
enact such special field rules as :  
may be necessary. :

TRANSCRIPT OF HEARING

VOLUME II - (Pages 277 - 552)

Taken At  
1000 East Calgary Avenue  
Bismarck, North Dakota  
June 12, 2024

BEFORE DAVID P. GARNER

1 project.

2 Q. Did Summit compensate for the cost of the  
3 subscriptions for the programs on a commercial  
4 basis?

5 A. The EERC procured commercial licenses and  
6 the costs of those commercial licenses were billed  
7 to Summit. Yes.

8 Q. Okay. Were they temporary subscriptions?

9 A. Yes. So the licenses have a time period  
10 associated with them. Commonly, we procure  
11 licenses on the order of a month, two-month,  
12 three-month licenses, depending on the duration of  
13 the time period in the project we need the license  
14 to perform the scope.

15 Q. So I want to go back to my prior question.  
16 Other than the input model for the PHREEQC model --  
17 sorry. Let me start over.

18 Other than the input file for the PHREEQC  
19 model, is there anything listed in these bullet  
20 points that was not provided by EERC to the  
21 Industrial Commission?

22 A. Yes. As I mentioned, the only input data  
23 that was provided can be found in your last bullet  
24 point in terms of what I would call the  
25 simulation -- or the numerical reservoir simulation

1     model data decks and the output files. Those were  
2     the two pieces of data which I am saying is the  
3     .DAT file and the .SR3 file. Those are the only  
4     two data sets from this list that were provided.

5           Q.     So if you look at the third bullet point,  
6     is there anything there that was provided to the  
7     Industrial Commission?

8           A.     Yes. Thank you for correcting me. So all  
9     core analysis data was provided to the Industrial  
10    Commission as well as the North Dakota Geological  
11    Survey through submission to the North Dakota core  
12    library staff. And as required, all well log data,  
13    formation testing, fluid analysis was provided  
14    as -- as part of completions reports for the three  
15    stratigraphic test wells that were drilled. So  
16    those were technically provided.

17          Q.     When you look through these bullet points  
18    on this letter, do you have an understanding of  
19    what is being referenced in all of these? Is there  
20    anything you don't understand what is being  
21    referenced?

22          A.     No. I understand.

23          Q.     If I asked you to go back to EERC today  
24    and sit down and pull together an external hard  
25    drive and put this data on that external hard drive

## Summit Carbon Storage (Case Nos. 30869-30880)

BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA

CASE NOS. 30869–30880

In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND

In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15,

16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18,

19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage

facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.

In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.

In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections

6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

---

**ORDER ON PETITION FOR RECONSIDERATION OF DENIAL  
OF MOTION TO CONTINUE HEARING**

---

[¶ 1] On February 6, 2024, Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit carbon Storage #3, LLC (collectively, “Summit”), filed with the North Dakota Industrial Commission (“Commission”) applications for permits for carbon dioxide storage facilities.

[¶ 2] On April 18, 2024, the Swenson Trust (“Trust”) filed its Petition to Intervene with the North Dakota Industrial Commission (“Commission”). *See* Petition to Intervene.

[¶ 3] On April 25, 2024, the Trust filed a Motion to Continue Hearing and Request for Scheduling Conference. *See* Brief in Support of Motion to Continue Hearing and Request for Scheduling Conference. The Trust offered conclusory statements regarding its need for discovery in support of its motion.

[¶ 4] Summit filed its Response to Motion to Continue Hearing and Request for Scheduling Conference on April 25, 2024, in opposition to the request. *See* Response to Motion to Continue Hearing and Request for Scheduling Conference. Summit responded stating it will be prejudiced by continuing the hearing given all of the significant, unrecoverable costs that will be incurred should a new hearing be ordered. *Id.* at ¶ 23.

[¶ 5] The Trust did not contact Summit for the purpose of obtaining a stipulated agreement before seeking a continuance as required by N.D. Admin. Code § 98-02-03-07. *Id.* at ¶ 19.

[¶ 6] On June 8, 2024, the Trust's Motion to Continue Hearing was denied.

[¶ 7] On June 11-13, 2024 a three-day hearing was held in these cases.

[¶ 8] On July 2, 2024, the Intervenor Landowners, collectively, filed a petition for reconsideration of the denial of its motion for a continuance. The Intervenor argued that there was ample time to allow an amended application to be developed into a draft permit and fact sheet as required by law, and to allow discovery and due process prior to the Commission making its decision in December. *See* Petition for Reconsideration of Denial of Motion to Continue Hearing.

[¶ 9] On July 8, 2024, Summitt filed its objection with numerous reasons in support of denying the motion to reconsider. *See* Response to Landowners Intervenor's Objection.

[¶ 10] The Commission agrees with Summitt that the Intervenor have not provided a sufficient reason for the Commission to reconsider its order. Once again, Intervenor's petition argues that the Commission should reconsider its order because a continuance is necessary to give Intervenor more time to conduct discovery. The Commission already rejected this argument. By making the same arguments the Commission already rejected, Intervenor are simply asking the Commission to change its mind. This is not sufficient reason to reconsider its previous order.

[¶ 11] The Petition For Reconsideration of Denial of Motion to Continue Hearing is hereby DENIED.

Dated this 15<sup>th</sup> day of August, 2024.

In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19,

20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5,

6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.

In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek

Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.

In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.

In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142

North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

**INTERVENOR LANDOWNERS' REPLY TO PETITION FOR RECONSIDERATION  
OF DENIAL OF MOTION TO CONTINUE HEARING**

---

[¶1] Intervenor Landowners submits their reply to Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC and Summit Carbon Storage #3, LLC's ("Summit") response to the petition for reconsideration of the Commission's denial of Landowners' motion to continue the hearing.

**I. Summit is incorrect when it states the NDIC provided the documentation to Intervenor Landowners.**

[¶2] Summit indicates throughout its entire brief allegations that the Intervenor Landowners were in possession of the data and files. One statement made by Summit states, "By virtue of the Commission's September 21, 2023 response to Mr. Braaten's initial open records request in or around September of 2023, Landowner Intervenors have been in possession of most, if not all of the information they sought through their Discovery Requests to Summit... (Summit Brief ¶18). This is false. The North Dakota Industrial Commission provided a response however its response did not provide any data and files and referenced a response to a September 21, 2023 open records request. *See* Exhibit A, attached to the Decl. of Derrick Braaten and excerpt of email below dated May 21, 2024 from Michael Ziesch, EGIS Staff Officer for the North Dakota Mineral Resources:

Regarding the open records request received on 5-15-2024 for Summit Carbon Storage facilities. Please see responses in red below each of the submitted topics.

The agency has previously provided (9-21-2023) all modeling input and results files submitted and used for the application by Summit. Agency staff validated the inputs and parameters in the submitted model via CMG software. Field and analytical data of your request are available through the agency website in log and well files.

- All the input files, field and analytical data, and the model geochemical database used to evaluate the CO<sub>2</sub> effects on the upper and lower confining layers, including but not limited to all inputs and

data files used to run the United States Geological Survey's USGS's PHREEQC model.

Results received from applicant is in the related case files and available on the agency website. The agency did not receive software files for PHREEQC model. Model and geochemical database documentation can be obtained from the USGS.gov PHREEQC webpage.

- All the input files, field and analytical data , and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.

The agency did not receive Geochem GEM model files. Results of Geochem modeling are summarized in the application packet, available in the case file. The geochemical equations used in the model are internal to the CMG GEM software.

- Geophysical Logs that penetrate injection and confining zones, seismic survey data and core sample measurements, all measurements and data for acoustic impedance, total porosity, effective porosity, permeability, and facies.

Geophysical logs data are available via Premium Subscription on the agency Scout Ticket. Well files contain the core analysis and are also available on agency website via Premium Subscription. Related wells that penetrate the area of review are identified in section 4 of each application package. Seismic survey results are not provided to the agency, they are owned by the company conducting the survey.

- All the input files, field and analytical data, and the model, including but not limited to all inputs and data files used to run SLB's Petrel model in any manner related to Summit's applications.

The agency does not receive Petrel model files other than exports from the CMG files previously provided on 9-21-2023 open records request.

- All 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse or Petrel format, CMG (Canadian Modeling Group) Imex format, or other similar format.

The CMG files, previously provided on 9-21-2023, are the modeling files still being used for the applications. There are no updates to them.

[¶3] The response to open records request dated September 21, 2023, that Mr. Ziesch is referencing, is attached hereto as Exhibit B to the Decl. of Derrick Braaten. In this response, it

states, “Ms. Zaste, our office has not received any applications under NDCC 38-25.” This is not the data and files Summit is alleging was given to the Intervenor Landowners. The NDIC failed to give any records in its possession and instead referenced a response provided on September 21, 2023 which simply stated that no applications were received under NDCC 38-25. *Id.* No documents, data, or files were provided. Summit did not provide any documentation and neither did the North Dakota Industrial Commission in response to the open records request. *Id.*

**II. Summit refused to attend the noticed 30b6 deposition.**

[¶4] In addition to not providing any documentation to the Intervenor Landowners, Summit also decided to ignore the noticed 30(b)(6) deposition and refused to attend. As indicated in the Intervenor Landowners motion to compel, Summit was advised of the Intervenor Landowners’ intent to conduct discovery on May 2, 2024. Summit refused to respond until the eleventh hour to basically state they weren’t coming the next day. The deposition notice requested a majority, if not all, of the documentation requested from the NDIC in the open records request. But yet, Summit refused to cooperate and refused to attend the deposition.

**III. Summit failed to provide the documentation in its response to the Intervenor Landowners Discovery.**

[¶5] Summit chose not to provide any documentation whatsoever in its response to the Intervenor Landowners Discovery. Summit responded to the Intervenor Landowners Discovery on July 1, 2024. *See* Exhibit C, attached to the Decl. of Derrick Braaten. Summit did not provide any documentation or files that were requested in the discovery. Instead, Summit indicates numerous times that the information has been made available to the Landowners via an open records request. *Id.* Intervenor Landowners had not and still have not received the files they were

seeking from the North Dakota Industrial Commission despite their open records request. *See* Decl. of Derrick Braaten, ¶6.

**IV. Intervenor Landowners’ petition for reconsideration is timely.**

[¶6] Pursuant to Rule 54(b), “[a]n interlocutory order may be revised at any time before the entry of a judgment adjudicating all the claims and all the parties' rights and liabilities. N.D. R. Civ. P. 54(b). When a district court is convinced that it incorrectly decided a legal question in an interlocutory ruling, the district court may correct the decision to avoid later reversal.” *Ceynar v. Barth*, 2017 ND 286, ¶ 1, 904 N.W.2d 469. *See also* N.D.C.C. § 28-32-33 (applying North Dakota Rules of Civil Procedure in adjudicative administrative proceedings). The hearing examiner can reverse a ruling at any time before a final order.

DATED this 18<sup>th</sup> day of July, 2024.

**SUPPLEMENTAL DECLARATION OF DERRICK BRAATEN IN SUPPORT OF  
PETITION FOR RECONSIDERATION OF DENIAL OF MOTION TO CONTINUE  
HEARING**

---

1. I am an attorney for the Intervenor Landowners (“Landowners”), in the above-captioned matter.
2. I represent the Landowners in matters involving the applications submitted by Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, and Summit Carbon Storage #3, LLC (“SCS”).
3. Attached hereto as Exhibit A is a true and correct copy of an email sent by Michael Ziesch on May 21, 2024 regarding the NDIC’s response to an open records request received on May 15, 2024.
4. Attached hereto as Exhibit B is a true and correct copy of an email sent by Michael Ziesch on September 22, 2023 regarding the NDIC’s response to an open records request received on September 21, 2023 as referenced by the NDIC in Exhibit A.
5. Attached hereto as Exhibit C is a true and correct copy of Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC’s responses to Intervenor Landowners discovery requests set 1, 2, and 3.
6. Intervenor Landowners had not and still have not received the files they were seeking from the North Dakota Industrial Commission despite their open records request.

**I declare under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.**

Executed this 18<sup>th</sup> day of July, 2024 in Bismarck, North Dakota.

A handwritten signature in blue ink, appearing to read "Derrick Braaten", is written over a faint, light blue circular background.

[Warning: External Sender]

Regarding the open records request received on 5-15-2024 for Summit Carbon Storage facilities. Please see responses in red below each of the submitted topics.

The agency has previously provided (9-21-2023) all modeling input and results files submitted and used for the application by Summit. Agency staff validated the inputs and parameters in the submitted model via CMG software. Field and analytical data of your request are available through the agency website in log and well files.

- All the input files, field and analytical data, and the model geochemical database used to evaluate the CO2 effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's USGS's PHREEQC model.

Results received from applicant is in the related case files and available on the agency website. The agency did not receive software files for PHREEQC model. Model and geochemical database documentation can be obtained from the USGS.gov PHREEQC webpage.

- All the input files, field and analytical data , and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.

The agency did not receive Geochem GEM model files. Results of Geochem modeling are summarized in the application packet, available in the case file. The geochemical equations used in the model are internal to the CMG GEM software.

- Geophysical Logs that penetrate injection and confining zones, seismic survey data and core sample measurements, all measurements and data for acoustic impedance, total porosity, effective porosity, permeability, and facies.

Geophysical logs data are available via Premium Subscription on the agency Scout Ticket. Well files contain the core analysis and are also available on agency website via Premium Subscription. Related wells that penetrate the area of review are identified in section 4 of each application package. Seismic survey results are not provided to the agency, they are owned by the company conducting the survey.

- All the input files, field and analytical data, and the model, including but not limited to all inputs and data files used to run SLB's Petrel model in any manner related to Summit's applications.

The agency does not receive Petrel model files other than exports from the CMG files previously provided on 9-21-2023 open records request.

- All 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse or Petrel format, CMG (Canadian Modeling Group) Imex format, or other similar format.

The CMG files, previously provided on 9-21-2023, are the modeling files still being used for the applications. There are no updates to them.

BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA

CASE NOS. 30869–30880

In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND

In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1,

11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by

**nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of**

**carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the**

geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

**RESPONSE OF APPLICANTS TO INTERVENORS' LANDOWNERS' AMENDED INTERROGATORIES AND REQUEST FOR PRODUCTION OF DOCUMENTS (SET 1)**

Applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, "Summit"), by and through their counsel, Lawrence Bender, Fredrikson & Byron, P.A., 304 East Front Avenue, Suite 400, Bismarck, ND 58504-5639, respond to the Amended Interrogatories and Request for Production of Documents (Set 1) submitted by The Swenson Living Trust; Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk

and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith (collectively, “Landowners”) on May 31, 2024 in the above-captioned proceedings (each a “Discovery Request” and collectively, the “Discovery Requests”). Summit’s response is made without waiving or intending to waive any objection as to relevance, privilege, or admissibility of any information provided in response to the Discovery Requests in any subsequent proceeding of this or any other action on any ground. A partial answer to any Discovery Request that has been objected to, in whole or in part, is not intended to be a waiver of the objection. By responding to the Discovery Requests, Summit is not admitting that any aspect of the Discover Requests is factually accurate or relevant to this proceeding.

### **GLOBAL OBJECTIONS**

The following Global Objections apply to each of the Discovery Requests—even if not separately restated below in response to a particular Discovery Request.

Summit objects to all Discovery Requests to the extent they seek the discovery of documents which are privileged for the reasons that they (a) are subject to the attorney-client privilege; (b) are covered by the “work product” doctrine; and/or (c) were prepared in anticipation of litigation or for trial by or for Summit or its representatives, including its employees, consultants, or agents.

Summit objects to all Discovery Requests to the extent they are beyond the scope of discovery allowed pursuant to Rules 26, 33, 34, and 36 of the North Dakota Rules of Civil Procedure.

Summit objects to all Discovery Requests to the extent they seek identification or production of “all documents” of a particular description. It is impossible to guarantee that all such documents have been identified or located. Summit states, however, that in response to these

requests, it has made a diligent search of records kept in the ordinary course of business in those locations likely to contain relevant information.

Summit objects to the Landowners' definitions and instructions to the extent such definitions and instructions exceed or are inconsistent with the requirements imposed upon Summit under the North Dakota Rules of Civil Procedure or Chapter 28-32 of the North Dakota Century Code.

Summit objects to the Discovery Requests because they are unduly burdensome and disproportionate to the needs of this proceeding because they seek irrelevant information.

Summit objects inasmuch as the Discovery Requests seek information relating to anything other than Summit's sequestration facilities in North Dakota. Only Summit's North Dakota sequestration facilities are covered by its applications in this proceeding.

Summit objects inasmuch as the Discovery Requests seek information that contains proprietary or confidential business information or is subject to trade-secret protections or that contains information for which Summit owes a third party an obligation of confidentiality or privacy, whether contractual or under any federal or state laws or regulations.

Summit objects to all Discovery Requests that seek, and disclaims any obligation to identify or furnish, documents or information that the Landowners actually or constructively possesses or to which the Landowners have access through alternative means.

Summit objects inasmuch as the Discovery Requests seek information from third parties and information that is not within Summit's possession, custody, control, or personal knowledge of Summit.

Summit objects and responds to the Discovery Requests based upon information and documents available as of the date hereof and reserves the right to supplement and amend the responses.

Subject to the foregoing objections and conditions, and subject to the specific additional objections made with respect to each request, Summit responds to the Landowners' Discovery Requests as follows:

### **RESPONSE TO INTERROGATORIES**

#### **INTERROGATORY NO. 1:**

*Identify the petroleum engineers or reservoir engineers who made any material contribution to Summit's applications or the materials provided in support of Summit's applications in NDIC Case Nos. 30869-30880.*

#### **RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the North Dakota Industrial Commission ("Commission" or "NDIC") to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states the following individuals made material contributions in support of Summit's applications or the materials provided in support of Summit's applications in NDIC Case Nos 30869-30880:

Todd Jiang, Principal Reservoir Engineer  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Guangwei Ren, Senior Reservoir Engineer  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Chantsalmaa Dalhkaa, Principal Reservoir Engineer  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Nessa Mahmoud, Geochemist  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Tim Shenk, Senior Operations Specialist  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Agustinus Zandy, Principal Operations Specialist  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Michael Warmack, Distinguished Oil & Gas Facilities Engineer  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

**INTERROGATORY NO. 2:**

*Identify the geologists who made any material contribution to Summit's applications or the materials provided in support of Summit's applications in NDIC Case Nos. 30869-30880.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states the following individuals made material contributions in support of Summit's applications or the materials provided in support of Summit's applications in NDIC Case Nos 30869-30880:

Remington Leger, Principal Geoscientist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Amanda Livers-Douglas, Assistant Director for Integrated Subsurface Projects  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Sofiane Djezzar, Geoscientist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Kyle McBride, Geophysicist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

John Hunt, Senior Geoscientist & MRV Specialist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Arash Abarghani, Senior Research Scientist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Caitlin Olsen, Principal Policy and Regulatory Specialist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Kevin Connors, Assistant Director for Regulatory Compliance and Energy Policy  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Kyle Glazewski, Assistant Director for Research, Community Benefits & Stakeholder  
Engagement  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Josh Regorrah, Permitting & Regulatory Specialist  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Steve Smith, Assistant Director for Integrated Analytical Solutions

**INTERROGATORY NO. 3:**

*List any other individuals not listed in Interrogatories 1 and 2 who made any material contribution to Summit's applications or the materials provided in support of Summit's applications in NDIC Case Nos. 30869-30880. Identify each and every person whom you expect to call or may call as a witness at trial.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states, with respect to the first question, that the following individuals made material contributions in support of Summit's applications or the materials provided in support of Summit's applications in the NDIC Case Nos 30869-30880:

Lonny Jacobson, Assistant Director for Subsurface Field Operations  
Energy & Environmental Research Center (EERC)  
15 N. 23<sup>rd</sup> St., Stop 9018  
Grand Forks, ND 58202-9018

Wade Boeshans, Executive Vice President  
Summit Carbon Solutions  
3442 E. Century Ave.  
Bismarck, ND 58503

Jay Volk, Ph.D., Sequestration – Director of Health, Safety & Environmental  
Summit Carbon Solutions  
3442 E. Century Ave.  
Bismarck, ND 58503

Jeffrey L. Skaare, J.D., C.P.L., Sequestration – Director of Land Legal & Regulatory Affairs

Summit Carbon Solutions  
3442 E. Century Ave.  
Bismarck, ND 58503

Luis Piasco, Senior Project Manager Sequestration Drilling and Engineering

Summit Carbon Solutions  
3442 E. Century Ave.  
Bismarck, ND 58503

Jean Oddy, Sequestration Project Engineer

Summit Carbon Solutions  
3442 E. Century Ave.  
Bismarck, ND 58503

Jamey Backus, Project Manager – Sequestration Facilities

Summit Carbon Solutions  
3442 E. Century Ave.  
Bismarck, ND 58503

With respect to the second question, the individuals listed in response to Interrogatory No. 4, below, testified at the hearing on the above-captioned cases.

**INTERROGATORY NO. 4:**

*Identify all witnesses Summit plans to testify in support of Summit's applications in NDIC Case Nos. 30869-30880.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any.

Subject to and notwithstanding the objections, Summit states that the following individuals testified at the hearing in support of Summit's applications:

Wade Boeshans  
Jeffrey L. Skaare  
Amanda Livers-Douglas  
Caitlin Olsen  
John Hunt  
Jean Oddy  
James Powell  
Jay Volk  
Jamey Backus

**INTERROGATORY NO. 5:**

*Identify all exhibits Summit plans to offer in support of Summit's applications in NDIC Case Nos. 30869-30880.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that an exhibit list setting forth all exhibits offered by Summit and admitted at the hearing on the above-captioned cases was provided to the Landowners at the hearing.

**RESPONSE TO REQUESTS FOR PRODUCTION**

**REQUEST NO. 1:**

*Please produce the underlying data and electronic files necessary to run the model used to create the images of the pressure differentials contained in Figures 3-14(a-d) in Summit's application in NDIC Case No. 30869.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that all the underlying data and electronic files utilized to run the models has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 2:**

*Please produce all the input files, field and analytical data, and the model geochemical database used to evaluate the CO2 effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run the United States Geological Survey's Phreeqc geochemical model.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit

further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 3:**

*Please produce all the input files, field and analytical data, and the model geochemical database used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 4:**

*Please produce all the input files, field and analytical data, and the model geochemical database used to run any modelling or analysis of critical threshold pressures or areal extent of review or impact and pressure buildup, or which was used to do any kind of analysis related to EPA Method 1 or EPA Method 2 or Analytical Solution for Leakage in Multilayered Aquifers – ASLMA, or any risk-based area-of-review analysis.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 5:**

*Please produce the following data and files as referenced by Summit in its application in NDIC Case No. 30873: Geophysical Logs that penetrate injection and confining zones, Seismic survey data and core sample measurements, Acoustic impedance, total porosity, effective porosity, permeability, facies, and SLB's Petrel was used to interpolate structural surfaces for zones.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 6:**

*Please produce all the input files, field and analytical data, and the model geochemical database used to evaluate the CO2 effects on the upper and lower confining layers, including but not limited to all inputs and data files used to run Computer Modelling Group Ltd.'s GEM model and software or any similar model or software used for the same purposes.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 7:**

*Please produce all data from any parameter referenced or described in Table 2-1: Model Parameters for Multiphase Fluid Modeling of Geologic Sequestration as that table appears in EPA Guidance - AOR Evaluation and Corrective Action Guidance (Guidance page 11) as found here: AOR Evaluation and Corrective Action Guidance - <https://www.epa.gov/sites/default/files/2015-07/documents/epa816r13005.pdf>.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence

for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 8:**

*Please produce all electronic files and data provided to the North Dakota Industrial Commission or its Department of Mineral Resources or Oil and Gas Division in association with or related to the applications in NDIC Case Nos. 30869-30880.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 9:**

*Please produce all 3D numerical reservoir simulation model data decks, output files and graphing files of the Storage Reservoir in original electronic format. Without limiting the foregoing, such files may commonly be stored in Slumberger Eclipse format, CMG (Canadian Modeling Group) Imex format, or other similar format. The purpose of this request is to obtain the*

*simulation model of the proposed storage facilities and associated reservoir, along with input and output files in Summit's possession for this simulation model.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 10:**

*Please produce structure maps of the injection zone top, structure maps for major sub zones, and/or structure maps of confining zones for the Storage Reservoir and the confining zones as defined therein. Such maps include those created based upon formation tops from well logs, 3D seismic reflectors, and interpretation of geologic deposition environment to give a representation of the elevation change across the target reservoir.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has

been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 11:**

*Please produce all gross and net thickness isopach maps for the Storage Reservoir.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that, to the best of its knowledge, net thickness isopach maps have not been created and that gross thickness isopach maps have been submitted to the Commission and are publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the gross thickness isopach maps.

**REQUEST NO. 12:**

*Please produce pore volume (PV) maps and hydrocarbon pore volume (HCPV) maps of the Storage Reservoir, regardless of when compiled and regardless of whether created by Summit.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any.

Subject to and notwithstanding the objections, Summit states that, to the best of its knowledge, this information has not been created.

**REQUEST NO. 13:**

*Please produce all well logs (raw data plus processed and interpreted copies) from anywhere in or near the Storage Reservoir. Specially please produce the well logs in .las or other digital format, including any and all well logs utilized by Summit in developing its applications herein.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 14:**

*Please produce any databases, spreadsheets, or other documents containing porosity, permeability, saturation, and other rock properties such as (minerology, geomechanical properties etc) for the Storage Reservoir in original electronic format and, if available, in Excel spreadsheet format.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 15:**

*Please produce water chemistry and any other liquid or solid sampling data for water or other substances in the Storage Reservoir. Please include any gas solubility testing that was performed on the water samples for CO2 or injected gas stream.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 16:**

*Please produce all spreadsheets, databases, and other documents or compilations containing reservoir pressure data for the Storage Reservoir, including but not limited to all bottom hole pressure data, surface pressure data, and fluid level measurements. If a spreadsheet is not available, then please produce all Documents containing this information.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 17:**

*Please produce all relative permeability data for the Storage Reservoir, including core test information. If multiple cores have been tested, please produce all test data.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit

further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 18:**

*Please produce all capillary pressure data for all cores tested in the Storage Reservoir.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 19:**

*Please produce all routine core analysis data for the Storage Reservoir.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission (Core Library) and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open

records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 20:**

*Please produce all spreadsheets of reservoir temperature data in the Storage Reservoir, including spreadsheets indexing reservoir temperature data to well name and API number. If this information is not available in spreadsheet format, then please produce all Documents containing this information.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information has been submitted to the Commission and is publicly available via an open records request. Summit further states that, upon information and belief, Landowners have made an open records request to the Commission and are in receipt of the information requested in this Discovery Request.

**REQUEST NO. 21:**

*Please produce all written interpretations of micro-seismic data obtained from the Storage Reservoir.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence

for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states they have not created any micro seismic data and thus have not produced any written interpretations thereof.

**BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA**

**CASE NOS. 30869-30880**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1,**

11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by

nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.

In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of

**carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the**

geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

**RESPONSE OF APPLICANTS TO INTERVENORS' LANDOWNERS' AMENDED INTERROGATORIES AND REQUEST FOR PRODUCTION OF DOCUMENTS (SET 2)**

Applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, "Summit"), by and through their counsel, Lawrence Bender, Fredrikson & Byron, P.A., 304 East Front Avenue, Suite 400, Bismarck, ND 58504-5639, respond to the Amended Interrogatories and Request for Production of Documents (Set 2) submitted by The Swenson Living Trust; Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk

and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith (collectively, “Landowners”) on May 31, 2024 in the above-captioned proceedings (each a “Discovery Request” and collectively, the “Discovery Requests”). Summit’s response is made without waiving or intending to waive any objection as to relevance, privilege, or admissibility of any information provided in response to the Discovery Requests in any subsequent proceeding of this or any other action on any ground. A partial answer to any Discovery Request that has been objected to, in whole or in part, is not intended to be a waiver of the objection. By responding to the Discovery Requests, Summit is not admitting that any aspect of the Discover Requests is factually accurate or relevant to this proceeding.

### **GLOBAL OBJECTIONS**

The following Global Objections apply to each of the Discovery Requests—even if not separately restated below in response to a particular Discovery Request.

Summit objects to all Discovery Requests to the extent they seek the discovery of documents which are privileged for the reasons that they (a) are subject to the attorney-client privilege; (b) are covered by the “work product” doctrine; and/or (c) were prepared in anticipation of litigation or for trial by or for Summit or its representatives, including its employees, consultants, or agents.

Summit objects to all Discovery Requests to the extent they are beyond the scope of discovery allowed pursuant to Rules 26, 33, 34, and 36 of the North Dakota Rules of Civil Procedure.

Summit objects to all Discovery Requests to the extent they seek identification or production of “all documents” of a particular description. It is impossible to guarantee that all such documents have been identified or located. Summit states, however, that in response to these

requests, it has made a diligent search of records kept in the ordinary course of business in those locations likely to contain relevant information.

Summit objects to the Landowners' definitions and instructions to the extent such definitions and instructions exceed or are inconsistent with the requirements imposed upon Summit under the North Dakota Rules of Civil Procedure or Chapter 28-32 of the North Dakota Century Code.

Summit objects to the Discovery Requests because they are unduly burdensome and disproportionate to the needs of this proceeding because they seek irrelevant information.

Summit objects inasmuch as the Discovery Requests seek information relating to anything other than Summit's sequestration facilities in North Dakota. Only Summit's North Dakota sequestration facilities are covered by its applications in this proceeding.

Summit objects inasmuch as the Discovery Requests seek information that contains proprietary or confidential business information or is subject to trade-secret protections or that contains information for which Summit owes a third party an obligation of confidentiality or privacy, whether contractual or under any federal or state laws or regulations.

Summit objects to all Discovery Requests that seek, and disclaims any obligation to identify or furnish, documents or information that the Landowners actually or constructively possesses or to which the Landowners have access through alternative means.

Summit objects inasmuch as the Discovery Requests seek information from third parties and information that is not within Summit's possession, custody, control, or personal knowledge of Summit.

Summit objects and responds to the Discovery Requests based upon information and documents available as of the date hereof and reserves the right to supplement and amend the responses.

Subject to the foregoing objections and conditions, and subject to the specific additional objections made with respect to each request, Summit responds to the Landowners' Discovery Requests as follows:

### **RESPONSE TO INTERROGATORIES**

#### **INTERROGATORY NO. 1:**

*Identify all software programs necessary to open or run or execute any electronic files that are themselves responsive to or which contain data and information responsive to any of Landowners written interrogatories or requests for production of documents. Please exclude from your answer any software programs needed to open files with the following extensions: .doc, .docx, .pdf, .xlsx, .csv, .eml, .msg, as well as common audio-visual file types that can be opened with freely-available software such as .jpg/.jpeg, .tiff, and .mp4 files.*

#### **RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the following software programs may be necessary to open, run, or execute the specified electronic files: Petrel Geoscience Core, Petrel Well Correlation, Ikon/RokDoc, GEM MAX, Builder, Results, CMOST, Kappa, S&P

Global/Kingdom, Techlog Base, Pore Pressure Prediction, Wellbore Stability, Quanti.Elan, Quanti, Techlog Python, TechData Plus, TechStat, Wellbore Imaging.

**INTERROGATORY NO. 2:**

*State whether Summit possesses documents related to any exchange of valuable consideration (including but not limited to monetary compensation even if nominal) for the right to use or damage the pore space of a property.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it has used a pore space lease for the right to utilize pore space and that such document provides for valuable consideration in exchange for such right.

**INTERROGATORY NO. 3:**

*Describe how Summit determined the amounts it paid to property owners for use of or damage to their pore space for its activities related to Summit's applications.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any.

Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases.

**INTERROGATORY NO. 4:**

*State the amounts that Summit has paid to property owners for use of or damage to pore space for injections of CO<sub>2</sub>.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases.

**INTERROGATORY NO. 5:**

*State how Summit determines if a property owner has been “equitably compensated” as that phrase is used in N.D.C.C. § 38-22-08(14), and what criteria it uses to make this determination.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases.

**INTERROGATORY NO. 6:**

Identify the factual basis in Summit's applications or the materials submitted in support of Summit's applications that might support or that Summit will use to support a finding that property owners have been "equitably compensated" as that phrase is used in N.D.C.C. § 38-22-08(14).

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases.

**INTERROGATORY NO. 7:**

*Identify the factual basis in any documents or information sources other than Summit's applications that might support or that Summit will use to support a finding that property owners have been "equitably compensated" as that phrase is used in N.D.C.C. § 38-22-08(14).*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases.

**INTERROGATORY NO. 8:**

*Identify the sections of Summit's applications that support a finding that "[t]hat the proposed storage facility will not adversely affect surface waters or formations containing fresh water" as is stated at N.D.C.C. § 38-22-08(7). If Summit claims that any documents or information outside of Summit's applications support such a finding, identify those documents and information.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases and that most sections of Summit's applications relate to the secure storage of CO<sub>2</sub> in the Broom Creek Formation and the protection of underground sources of drinking water.

**INTERROGATORY NO. 9:**

*Identify the source of any carbon dioxide that will be injected pursuant to Summit's applications that is created or produced or originates in North Dakota.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive

to this Discovery Request at the hearing on the above-captioned cases, i.e., the Tharaldson Ethanol Plant is currently the only contracted source of carbon dioxide originating in North Dakota.

**RESPONSE TO REQUESTS FOR PRODUCTION**

**REQUEST NO. 1:**

*Please produce all agreements for use of or damage to the pore space of any property that are in your possession.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that a copy of the pore space lease is attached as Exhibit D to the Storage Facility Agreement submitted as part of its applications in the above-captioned cases.

**REQUEST NO. 2:**

*Without limiting the generality of Request No. 1, please produce all agreements that might support or that Summit will use to support a finding "[t]hat the storage operator has obtained the consent of persons who own at least sixty percent of the storage reservoir's pore space" as required by N.D.C.C. § 38-22-08(5).*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence

for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided documents and testimony responsive to this Discovery Request at the hearing on the above-captioned cases, i.e., Summit Exhibits 5A, 5B and 5C.

**REQUEST NO. 3:**

*Without limiting the generality of Request No. 1, produce all agreements that might support or that Summit will use to support a finding that "all nonconsenting pore space owners are or will be equitably compensated" as stated in N.D.C.C. § 38-22-08(14).*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided documents and testimony responsive to this Discovery Request at the hearing on the above-captioned cases, i.e., the Storage Agreement and pore space lease.

**REQUEST NO. 4:**

*Please produce all documents containing data or information indicating or indicative of market values for any rights associated with the use of or damage to a property's pore space.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence

for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided documents and testimony responsive to this Discovery Request at the hearing on the above-captioned cases, i.e., the compensation paid under the pore pace lease and negotiations with hundreds of pore space owners.

**REQUEST NO. 5:**

*Without limiting the generality of the foregoing requests, please produce all agreements for use of or damage to any surface estate necessary for Summit to complete construction of the facilities described in Summit's applications, including but not limited to its injections wells (but for clarification not those agreements necessary for the interstate transmission line subject to siting proceedings before the ND Public Service Commission).*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided documents and testimony responsive to this Discovery Request at the hearing on the above-captioned cases, i.e., the pore pace lease.

**REQUEST NO. 6:**

*Please produce all correspondence related to Summit's applications between Summit and the North Dakota Industrial Commission and its Department of Mineral Resources and its Oil and Gas Division (collectively "NDIC") and any authorized agents of the NDIC, and all*

*correspondence between your authorized agents and the NDIC (including any individuals copied on or submitting Summit's applications) related to Summit's applications.*

**RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit also objects to this Discovery Request because it is overly broad in that it requests "all correspondence" and because the Discovery Request is unduly burdensome at this late stage in the proceedings. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that the requested information is on file with the Commission and is publicly available via an open records request.

**BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA**

**CASE NOS. 30869-30880**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1,**

11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by

**nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of**

**carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the**

geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

**RESPONSE OF APPLICANTS TO INTERVENOR LANDOWNERS' AMENDED INTERROGATORIES AND REQUEST FOR PRODUCTION OF DOCUMENTS (SET 3)**

Applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, "Summit"), by and through their counsel, Lawrence Bender, Fredrikson & Byron, P.A., 304 East Front Avenue, Suite 400, Bismarck, ND 58504-5639, respond to the Amended Interrogatories and Request for Production of Documents (Set 3) submitted by The Swenson Living Trust; Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk

and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith (collectively, “Landowners”) on May 31, 2024 in the above-captioned proceedings (each a “Discovery Request” and collectively, the “Discovery Requests”). Summit’s response is made without waiving or intending to waive any objection as to relevance, privilege, or admissibility of any information provided in response to the Discovery Requests in any subsequent proceeding of this or any other action on any ground. A partial answer to any Discovery Request that has been objected to, in whole or in part, is not intended to be a waiver of the objection. By responding to the Discovery Requests, Summit is not admitting that any aspect of the Discover Requests is factually accurate or relevant to this proceeding.

### **GLOBAL OBJECTIONS**

The following Global Objections apply to each of the Discovery Requests—even if not separately restated below in response to a particular Discovery Request.

Summit objects to all Discovery Requests to the extent they seek the discovery of documents which are privileged for the reasons that they (a) are subject to the attorney-client privilege; (b) are covered by the “work product” doctrine; and/or (c) were prepared in anticipation of litigation or for trial by or for Summit or its representatives, including its employees, consultants, or agents.

Summit objects to all Discovery Requests to the extent they are beyond the scope of discovery allowed pursuant to Rules 26, 33, 34, and 36 of the North Dakota Rules of Civil Procedure.

Summit objects to all Discovery Requests to the extent they seek identification or production of “all documents” of a particular description. It is impossible to guarantee that all such documents have been identified or located. Summit states, however, that in response to these

requests, it has made a diligent search of records kept in the ordinary course of business in those locations likely to contain relevant information.

Summit objects to the Landowners' definitions and instructions to the extent such definitions and instructions exceed or are inconsistent with the requirements imposed upon Summit under the North Dakota Rules of Civil Procedure or Chapter 28-32 of the North Dakota Century Code.

Summit objects to the Discovery Requests because they are unduly burdensome and disproportionate to the needs of this proceeding because they seek irrelevant information.

Summit objects inasmuch as the Discovery Requests seek information relating to anything other than Summit's sequestration facilities in North Dakota. Only Summit's North Dakota sequestration facilities are covered by its applications in this proceeding.

Summit objects inasmuch as the Discovery Requests seek information that contains proprietary or confidential business information or is subject to trade-secret protections or that contains information for which Summit owes a third party an obligation of confidentiality or privacy, whether contractual or under any federal or state laws or regulations.

Summit objects to all Discovery Requests that seek, and disclaims any obligation to identify or furnish, documents or information that the Landowners actually or constructively possesses or to which the Landowners have access through alternative means.

Summit objects inasmuch as the Discovery Requests seek information from third parties and information that is not within Summit's possession, custody, control, or personal knowledge of Summit.

Summit objects and responds to the Discovery Requests based upon information and documents available as of the date hereof and reserves the right to supplement and amend the responses.

Subject to the foregoing objections and conditions, and subject to the specific additional objections made with respect to each request, Summit responds to the Landowners' Discovery Requests as follows:

### **RESPONSE TO INTERROGATORIES**

#### **INTERROGATORY NO. 1:**

*For any installed CO2 pressure relief devices or CO2 vent systems or other mechanical devices designed for relieving pressure from a pipe, at any of the surface facilities constructed for purposes of Summit's applications, please provide the following:*

- a. Rated capacity of each device or system;*
- b. Quantity of each device or system;*
- c. Discharge pipe size(s);*
- d. Discharge pipe outlet(s) direction (vertical or horizontal); and*
- e. If horizontal, state the direction of discharge.*

#### **RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit further objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Subject to and notwithstanding the objections, Summit states that it provided testimony responsive to this Discovery Request at the hearing on the above-captioned cases.

## **RESPONSE TO REQUESTS FOR PRODUCTION**

### **REQUEST FOR PRODUCTION NO. 1:**

*Please produce any above-ground vapor dispersion modeling results such as from any engineered pressure relief systems, including all data and input files and load files. Without limiting the generality of the forgoing, specifically provide all data inputs for the following: weather conditions modeled, topography assumptions modeled, flow rate of CO2 over time, total quantity of CO2 released and total time of release modeled, and predicted CO2 concentrations at any public receptors such as roads, buildings, and dwellings.*

### **RESPONSE:**

Summit incorporates by reference its Global Objections set forth above. Summit also objects to this Discovery Request because the hearing on the above-captioned cases has taken place and a response to this Discovery Request will not lead to admission of additional relevant evidence for the Commission to consider, nor will it become part of the official record on an appeal, if any. Summit further objects to this Discovery Request because it seeks confidential information that has been deemed a “security system plan” exempt for open record requests pursuant to N.D.C.C. § 44-04-24 and subject to a protective order issued by the North Dakota Public Service Commission. *See* Docket No. 364, Case No. PU-22-391.

**BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA**

**CASE NOS. 30869-30880**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1,**

11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by

nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.

In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of

**carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the**

**Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

#### **CERTIFICATE OF SERVICE**

[¶ 1] I, the undersigned, hereby certify that a true and correct copy of the following documents:

1. Response of Applicants to Intervenor's Landowners' Amended Interrogatories and Request for Production of Documents (Set 1);
2. Response of Applicants to Intervenor's Landowners' Amended Interrogatories and Request for Production of Documents (Set 2); and
3. Response of Applicants to Intervenor Landowners' Amended Interrogatories and Request for Production of Documents (Set 3).

**BEFORE THE INDUSTRIAL COMMISSION  
OF THE STATE OF NORTH DAKOTA**

**CASE NOS. 30869–30880**

**In re application of Summit Carbon Storage #1, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND**

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1,**

11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.

In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.

In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND

In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by

**nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of**

**carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the**

geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.

In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.

**RESPONSE TO LANDOWNER INTERVENORS' PETITION FOR  
RECONSIDERATION OF DENIAL OF MOTION TO CONTINUE HEARING**

[¶ 1] Applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, "Summit") submit this brief in response to the Petition for Reconsideration of Denial of Motion to Continue Hearing ("Petition") filed with the

North Dakota Industrial Commission (“Commission”) on July 2, 2024 by the Landowner Intervenor.<sup>1</sup> For the reasons explained below, the Commission should deny the Petition.

### FACTS

[¶ 2] On June 9, 2023, Summit commenced this case by filing three separate initial draft applications (collectively, the “Applications”) with the Commission requesting permits for the geologic storage of carbon dioxide. *See* Declaration of Jeff Skarre in Support of Summit’s April 30, 2024 Response to Motion for Continuance (“Skaare Decl.”), ¶ 4.

[¶ 3] On February 8, 2024, the Commission notified Summit that each of the applications were complete and had been sent to the North Dakota Department of Environmental Quality for review. *Id.* ¶ 5.

[¶ 4] On April 15, 2024, the Commission issued a notice of hearing for the above-captioned cases to be held on June 11 and June 12, 2024 at 9:00 a.m.

[¶ 5] On April 25, 2024, before they were parties to this case, Landowner Intervenor filed a motion to the continue the hearing on the above-captioned cases to a later date so that the Landowner Intervenor had the opportunity to conduct discovery.

[¶ 6] On June 7, 2024, the Commission denied Landowner Intervenor’s motion to continue for two reasons. *See* Order Mot. Expedited Disc. and Mot. Continuance Hr’g ¶ 8. First, Landowner Intervenor only “offered conclusory statements regarding [their] need for discovery in support of [their] motion.” *Id.* at ¶ 5. Second, Landowner Intervenor “did not contact Summit

---

<sup>1</sup> Landowner Intervenor are the Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

for the purpose of obtaining a stipulated agreement before seeking a continuance as required by [N.D.A.C.] § 98-02-03-07.” *Id.* at ¶ 7.<sup>2</sup>

[¶ 7] The hearing was held on June 11, 12 and 13 of 2024. *See* Hr’g Recording.<sup>3</sup> At the conclusion of the hearing, Landowner Intervenors renewed their motion to continue the hearing. *Id.* at 4:06:55 – 4:07:05 (“I move once again to continue this hearing until a later date.”). The Commission denied the motion once again. *Id.* at 4:07:27 – 4:07:28.

[¶ 8] Counsel for Landowner Intervenors conducted extensive cross-examination of Summit’s witnesses at the hearing. *See* Hr’g Recording.

[¶ 9] Landowner Intervenors were afforded the opportunity to call their own witnesses at the hearing and did so. *Id.*

[¶ 10] The expert witnesses hired by Landowner Intervenors each testified that they had not been retained by Landowner Intervenors until approximately a month prior to the June 11, 12 and 13, 2024 hearings on the above-captioned matters. *Id.*

[¶ 11] On May 15, 2024, counsel for Landowner Intervenors, Mr. Braaten, made an open records request to the Commission requesting the same or similar information it sought to obtain from Summit through discovery. *See* Landowner Intervenors’ Exhibit LO-83 (May 15, 2024 letter from D. Braaten).

[¶ 12] The Commission’s response to Mr. Braaten’s open records request indicates that the requested information was either (i) previously provided to Mr. Braaten in the Commission’s September 21, 2023 response to Mr. Braaten’s initial open records request, (ii) not in the Commission’s possession, or (iii) available via the Commission’s website. Declaration of

---

<sup>2</sup> Section 98-02-03-07, N.D.A.C., states that “[a] party seeking a continuance shall first contact the other parties for the purpose of obtaining a stipulated agreement.”

<sup>3</sup> The recording of the hearing in this matter can be accessed using the following hyperlink: <https://www.youtube.com/watch?v=LYaG0DKeAe0&t=1643s>.

Lawrence Bender in Support of Summit's Response to Landowner Intervenor's Petition for Reconsideration of Denial of Motion to Continue Hearing ("Bender Decl.") ¶ 4.

[¶ 13] On or about September 21, 2023, the Commission responded to an open records request made by counsel for Landowner Intervenor in or around September of 2023. *Id.* ¶ 5.

[¶ 14] By virtue of the Commission's September 21, 2023 response to Mr. Braaten's open records request in or around September of 2023, Landowner Intervenor has been in possession of most, if not all of the information sought through Mr. Braaten's May 15, 2024 open records request since September of 2023, or, in the alternative, had access to such information via the Commission's website. *Id.* ¶ 7.

[¶ 15] On July 1, 2024, Summit timely responded to Sets 1, 2 and 3 of Landowner Intervenor's Amended Interrogatories and Request for Production of Documents (the "Discovery Requests"). *Id.* ¶ 8.

[¶ 16] As indicated in Summit's July 1, 2024 responses to Landowner Intervenor's Discovery Requests, most, if not all, of the information requested by said Discovery Requests was either (i) provided in Summit's responses thereto, (ii) obtained by Landowner Intervenor during the course of the hearings on the above-captioned cases, (iii) available to Landowner Intervenor via an open records request to the Commission, and/or (iv) in Landowner Intervenor's possession as a result of an open records request made by Landowner Intervenor to the Commission. *Id.* ¶ 9.

[¶ 17] Some of Landowner Intervenor's Discovery Requests were for information which was subject to license or other restrictions on dissemination to third parties and Summit was prohibited from providing Landowner Intervenor with such information. *Id.* ¶ 10.

[¶ 18] By virtue of the Commission's September 21, 2023 response to Mr. Braaten's initial open records request in or around September of 2023, Landowner Intervenor has been in

possession of most, if not all of the information they sought through their Discovery Requests to Summit in the above-captioned proceedings since September of 2023, or, in the alternative, had access to such information via the Commission's website. *Id.* ¶ 11. Yet, as set forth above, Landowner Intervenors did not retain any experts in this case until approximately one month prior to the June 2024 hearings.

[¶ 19] In addition to his September 2023 and May 2024 open records requests to the Commission, Mr. Braaten made at least one more open records request to the Commission in March of 2024. *Id.* ¶ 6.

[¶ 20] Landowner Intervenors have now filed the Petition requesting that the Commission reconsider its denial of their motion to continue the hearing. *See* Pet. Recons. Den. Mot. Continue Hr'g. In support of their Petition, Landowner Intervenors accuse the Commission of "very openly and explicitly stym[ying] any semblance of due process for the Landowners." *Id.*

[¶ 21] At the time of the filing of this response, the Commission has not issued a final order on Summit's Applications.

### **ARGUMENT**

[¶ 22] There are many reasons why the Commission should deny Landowner Intervenors' Petition. In addition to the reasons set forth below, the Landowner Intervenors had ample opportunity to seek the information it sought through their Discovery Requests (interrogatories, requests for production and depositions) by making an open records request to the Commission and through cross-examination of Summit's witnesses at the June 11–13, 2024 hearing. The Landowner Intervenors did both, thus rendering the discovery it sought moot. Nevertheless, the Petition should be denied for the following reasons.

[¶ 23] First, the Commission does not have the authority to reconsider its denial of Landowner Intervenor’s original motion. The North Dakota Legislature has only granted the Commission the authority to reconsider its “final orders.” *See* N.D.C.C. § 28-32-40. The Commission’s previous order and ruling denying Landowner Intervenor’s motions for a continuance are “procedural orders” that “[are] not a final order.” N.D.C.C. § 28-32-42(3). Accordingly, the Commission does not have the authority to reconsider its order and ruling denying Landowner Intervenor’s motions for a continuance.

[¶ 24] Second, assuming, *arguendo*, that the Commission’s denial of the Landowner Intervenor’s motion to continue was a final order, the Landowner Intervenor’s Petition is untimely. The Administrative Agencies Practice Act (N.D.C.C. § 28-32-01, et seq.) governs the Landowner Intervenor’s Petition. Pursuant to N.D.C.C. § 28-32-40(1), a petition for reconsideration must be filed within fifteen days after notice of the of the final order. As set forth above, notice of the first order denying Landowner Intervenor’s motion to continue was provided on June 7, 2024, and the second ruling denying Landowner Intervenor’s motion to continue was made on June 13, 2024. In each case, more than fifteen days had passed since notice of the order and ruling were provided and the filing of Landowner Intervenor’s Petition with the Commission.

[¶ 25] Third, assuming the Commission did have the authority to reconsider its order denying Landowner Intervenor’s motion for a continuance, Landowner Intervenor has not provided a sufficient reason for the Commission to do so. Landowner Intervenor’s Petition argues that the Commission should reconsider its order because a continuance is necessary to give Landowner Intervenor more time to conduct discovery. But the Commission already rejected this argument when it denied Landowner Intervenor’s original motion. *See* Order Mot. Expedited Disc. and Mot. Continuance Hr’g ¶ 5 (stating that Landowner Intervenor “offered conclusory

statements regarding [their] need for discovery in support of [their] motion”). By making the same arguments the Commission has already rejected, Landowner Intervenors are simply asking the Commission to change its mind. This is not a sufficient reason for an agency to reconsider one of its previous orders. As explained by one court:

[A]n agency ... may reconsider an action previously taken and come to a different conclusion upon a showing ... that some new or different factual situation exists that justifies the different conclusion. [But] [w]hat is not permitted is a ‘mere change of mind’ on the part of the agency.

*Maryland v. Exxon Mobil Corp.*, 569 F. Supp. 3d 273, 284 (D. Md. 2021)

[¶ 26] Fourth, it is not possible for the Commission to grant Landowner Intervenors the relief that they request in their Petition. Unlike other administrative agencies, the Commission does not have rules governing the re-opening of a proceeding<sup>4</sup>, which is the relief the Landowner Intervenors are requesting, but not entitled to under the Commission’s rules or the Administrative Agencies Practice Act. Therefore, Landowner Intervenors are seeking a continuance of the hearing in this matter. A continuance is “[t]he adjournment or postponement of a trial or other proceeding to a future date.” *Continuance*, Black’s Law Dictionary (12th ed. 2024). The hearing in this matter concluded on June 13, 2024 and cannot be postponed or adjourned to a future date.

[¶ 27] Fifth, before a party can request a continuance from an agency, the party must “first contact the other parties for the purpose of obtaining a stipulated agreement.” N.D.A.C. § 98-02-03-07. Landowner Intervenors still have not contacted Summit for the purpose of obtaining a stipulated agreement.

[¶ 28] Sixth, the Commission “may not approve a continuance except for good cause shown.” N.D.A.C. § 98-02-03-7. Landowner Intervenors have not even attempted to explain to the

---

<sup>4</sup> See, e.g., N.D.A.C. § 69-02-06-01 (“At any time after the conclusion of a hearing, but before the final order is issued . . . any party may file a petition to reopen the proceeding for the purpose of taking additional evidence.”)

Commission how there is a good cause for a continuance in this case other than to offer conclusory statements regarding the need for discovery and denial of due-process rights. However, Landowner Intervenor conveniently ignore the fact that most, if not all, of the information it sought through their Discovery Requests was either (i) provided to the Landowner Intervenor by the Commission in September of 2023, (ii) readily available to the Landowner Intervenor via the Commission's website well in advance of the June 11, 12 and 13 hearings, (iii) obtained by Landowner Intervenor through the course of the hearing on the above-captioned cases, or (iv) provided by Summit in its response to Landowner Intervenor's Discovery Requests. Furthermore, only the Landowner Intervenor are to blame for not engaging their expert witnesses earlier than a month prior to the hearings in these cases to evaluate the information provided to Landowner Intervenor by the Commission in September 2023 and/or the information available on the Commission's website. Landowner Intervenor also refuse to acknowledge the due process they were afforded by participating in the hearing as intervenors, conducting extensive cross-examination of Summit's witnesses, and calling their own witnesses.

[¶ 29] Finally, the Commission has not issued a final order on Summit's Applications nor any order regarding amalgamation of pore space. Accordingly, the Landowner Intervenor's due process arguments are not ripe unless and until such a final order affecting their property rights has been issued.

### **CONCLUSION**

[¶ 30] For the foregoing reasons, the Commission should deny Landowner Intervenor's Petition.

Dated this 12th day of July, 2024.

[illegible]

5

[¶ 1] I am counsel for the above-named applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, “Summit”). In that capacity I am familiar with and have personal knowledge of the facts set forth below.

[¶ 2] On June 25, 2024, I submitted an open records request to the North Dakota Industrial Commission, Department of Mineral Resources, Oil and Gas Division (the “Commission”), requesting that the Commission provide copies of the information it provided to Mr. Derrick Braaten in response to Mr. Braaten’s May 15, 2024 open records request to the Commission.

[¶ 3] On or about July 10, 2024, the Commission responded to my June 25, 2024 open records request with the Commission’s e-mail response to Mr. Braaten’s May 15, 2024 open records request.

[¶ 4] The Commission’s e-mail response to Mr. Braaten’s May 15, 2024 open records request indicates that the requested information was either (i) provided to Mr. Braaten in the Commission’s September 21, 2023 response to Mr. Braaten’s initial open records request, (ii) not in Commission’s possession, or (iii) available via the Commission’s website.

[¶ 5] On or about July 10, 2024, the Commission responded to my June 25, 2024 open records request with information provided to Mr. Braaten by the Commission on or about September 21, 2023 in response to an open records request made by Mr. Braaten in or around September of 2023.

[¶ 6] On or about July 10, 2024, in response to my June 25, 2024 open records request, the Commission also provided e-mail correspondence indicating that Mr. Braaten had made an additional open records request in March of 2024.

[¶ 7] A review of the information provided to Mr. Braaten in September of 2023, and the Commission's response to Mr. Braaten's May 15, 2024 open records request, indicates that Mr. Braaten had access to most, if not all, of the information he sought through his May 15, 2024 open records request, or, in the alternative, had access to such information via the Commission's website.

[¶ 8] On July 1, 2024, Summit timely responded to Sets 1, 2 and 3 of Landowner Intervenors' Amended Interrogatories and Request for Production of Documents (the "Discovery Requests").

[¶ 9] As indicated in Summit's July 1, 2024 responses to Landowner Intervenors' Discovery Requests, most, if not all, of the information requested by said Discovery Requests was either (i) provided in Summit's responses thereto, (ii) obtained by Landowner Intervenors during the course of the hearings on the above-captioned cases, (iii) available to Landowner Intervenors via an open records request to the Commission, and/or (iv) in Landowner Intervenors possession as a result an open records request made by Landowner Intervenors to the Commission.

[¶ 10] Some of Landowner Intervenors' Discovery Requests were for information which was subject to license or other restrictions on dissemination to third parties and Summit did not provide Landowner Intervenors with such information.

[¶ 11] A review of the information provided to Mr. Braaten in September of 2023, and the Commission's response to Mr. Braaten's May 15, 2024 open records request, indicates and confirms that Mr. Braaten had access to most, if not all, of the information his clients sought through their Discovery Requests to Summit in the above-captioned proceedings, or, in the alternative, had access to such information via the Commission's website.

I declare, under penalty of perjury under the law of North Dakota, that the foregoing is true and correct.

Signed on the 12th day of July, 2024, at Bismarck, North Dakota, USA.

Sara,

I reviewed the list from Lawrence and found a couple of things that probably need to be added to the list.

- Add a supplement for Summit's site access policy for DMR inspectors

- Lawrence's comment on Section 8.0 – *Prior to commencement of injection operations, provide an updated Worker Safety Plan that includes a list of site-specific training and the training itself for DMR inspection staff*
- Address to written comments – Lawrence testified that there might not be much response but that they would respond to written comments by 6/24/24

It looks like everything else was included from our list.

-Travis

#### **RESPONSE TO LANDOWNER INTERVENORS' OBJECTION**

[¶ 1] Applicants Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, "Summit") submit this brief in response to the *Objection to Summit Carbon Stroage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC Supplements* ("Objection") filed with the North Dakota Industrial Commission ("Commission") by the Landowner Intervenor.<sup>1</sup>

---

<sup>1</sup> Landowner Intervenor are the Swenson Living Trust, Michael Bauman, Glenn and Lisa Gerving, Michael and Bonnie Haupt, John Jochim, Kevin and Kimberly Kraft, Charmayne Liebelt, Kirk and Linda Maize and Allen Maize, Paul and Christy Metz, JoLene M. Rust, and Gary and Cassie Smith.

## FACTS

[¶ 2] Summit commenced this case by filing three separate applications (collectively, the “Applications”) with the Commission requesting permits for the geologic storage of carbon dioxide (the “Permits”). According to the North Dakota Legislature, “[i]t is in the public interest to promote the geologic storage of carbon dioxide.” N.D.C.C. § 38-08-01.

[¶ 3] The Commission recently held a three-day hearing on Summit’s Applications. Throughout the course of the hearing, Commission staff requested that Summit supplement, clarify and/or correct very specific portions of its Applications (collectively, the “Commission’s Supplemental Requests”). The Landowner Intervenors did not object to the Commission’s Supplemental Requests at any time during the course of the three day hearing.

[¶ 4] At the hearing, Landowner Intervenors—through their attorney—conducted extensive cross-examination of Summit’s witnesses relating to certain provisions of Summit’s Applications. During cross-examination, Landowner Intervenors requested several revisions to the Storage Agreement and Exhibit D thereto, the Pore Space Lease. Summit agreed to make certain of the requested revisions to the Storage Agreement and Pore Space Lease (the “Intervenor Storage Agreement Revisions”) at the hearing.

[¶ 5] Commission staff requested that that the Intervenor Storage Agreement Revisions be included in Summit’s response to the Commission’s Supplemental Requests. To be clear, the Intervenor Storage Agreement Revisions were made solely in response to the Landowner Intervenors’ requests during cross-examination and not in response to any of the Commission’s Supplemental Requests.

[¶ 6] Summit filed its response to the Supplemental Requests (collectively, the “Supplemental Responses”), including the Intervenor Storage Agreement Revisions, on June 24,

2024. Soon after Summit filed its Supplemental Responses, Landowner Intervenor filed their Objection.

[¶ 7] According to Landowner Intervenor, the “notice and hearing process required by N.D.A.C. § 43-05-01-08 do[es] not allow for these amendments and supplements to an application after issuance of the notice of hearing.” Landowner Intervenor’s Objection ¶ 2. Landowner Intervenor further state that “[g]iven the significant property interests being stripped from landowners by the Commission in this proceeding, it is critical that the Commission provide the most robust protection of Intervenor’s rights to due process.” *Id.* at ¶ 3. Finally, Landowner Intervenor argue that “[a]llowing the applicants to literally amend and supplement the application in real time in response to the Intervenor’s questioning and the deficiencies pointed out by Commission staff and Intervenor’s violates due process.” *Id.*

[¶ 8] At the time of the filing of this response, the Commission has not made a decision on Summit’s Applications.

### **ARGUMENT**

[¶ 9] First, the Commission may render a decision on Summit’s original Applications in the absence of Summit’s Supplemental Responses, and most definitely without considering the Intervenor Storage Agreement Revisions. Second, if the Commission disagrees and finds that it must consider Summit’s Supplemental Responses in order to issue the requested Permits, the Commission may do so because there is no statute or regulation that prohibits the Commission from considering this information. Finally, neither Summit’s Supplemental Responses, nor the Commission’s consideration thereof, would violate Landowner Intervenor’s due process rights.

**I. The Commission can issue Summit the requested Permits without considering Summit's Supplemental Responses or the Intervenor Storage Agreement Revisions.**

[¶ 10] It is Summit's position that its original Applications are sufficient for the Commission to issue Summit the requested Permits and that Summit's Supplemental Responses were gratuitous. In coordination with Commission staff, Summit produced several iterations of its Applications prior to the Applications being deemed complete and noticed for hearing. Therefore, Summit respectfully requests that the Commission render its decision solely upon the information provided in Summit's original Applications and upon the testimony and evidence received at the hearing on said Applications. If the Commission determines that Summit's original Applications are sufficient to issue Summit the requested Permits, then the Commission may disregard Summit's Supplemental Responses and the Intervenor Storage Agreement Revisions, thus rendering Landowner Intervenor's Objection moot.

**II. Nothing prohibits the Commission from considering Summit's Supplemental Responses.**

[¶ 11] Alternatively, if the Commission determines that Summit's original Applications are not sufficient, and that the Commission must consider Summit's Supplemental Responses in order to issue Summit the requested Permits, then it is within the scope of the Commission's authority and jurisdiction to do so.

[¶ 12] First, there are no provisions in N.D.C.C. ch. 38-22 or N.D.A.C. 43-05-01 that prohibit the Commission from considering supplements to an application that are submitted after a hearing. Even if there were, the Commission has the authority to waive such prohibitions. *See* N.D.C.C. § 38-22-03(7).<sup>2</sup>

---

<sup>2</sup> The Commission has authority "[t]o grant, for good cause, exceptions to this chapters requirements and implementing rules.

[¶ 13] Second, the Commission does have the broad power to set any “application requirements” that the Commission desires. *See* N.D.C.C. § 38-22-05(1)(a) (“A person applying for a permit shall ... [c]omply with application requirements set by the commission.”). Requiring an applicant to supplement its application after the hearing is necessarily an “application requirement.” If the Commission has the authority to require an applicant to supplement its application after the hearing, then the Commission may consider those supplements in rendering its decision thereon under the same authority.

[¶ 14] Last, common sense dictates that the Commission should have the authority to require and consider supplemental information submitted after a hearing. The purpose of the public hearing on Summit’s Applications was to allow the public and other interested parties (including the Commission) the opportunity to question and comment on Summit’s Applications. The Landowner Intervenors acknowledge this in their Objection and were afforded this opportunity.<sup>3</sup> The purpose of a public hearing is defeated if the Commission does not have the ability to address those comments by requiring the submission of supplemental information. Further to this point, it should be noted that Landowner Intervenors did not take the opportunity to respond to any of Summit’s Supplemental Responses or the Intervenor Storage Agreement Revisions and merely submitted their objections to the same.

### **III. The Commission would not violate due process by considering Summit’s Supplemental Responses.**

[¶ 15] Landowner Intervenors repeatedly assert in their Objection that the Commission would violate their due process rights by considering Summit’s Supplemental Responses and Intervenor Storage Agreement Revisions.<sup>4</sup> This argument does not carry any weight.

---

<sup>3</sup> *See* Br. ¶ 2 (“The public and many others were invited to comment on the existing [Applications].”).

<sup>4</sup> *See, e.g.,* Br. ¶ 3 (“Given the significant property interests being stripped from landowners by the Commission in this proceeding, it is critical that the Commission provide the most robust protection of Intervenors’ rights to due

[¶ 16] First, the Landowner Intervenor cannot argue that Summit's Supplemental Responses materially "amend" the original Applications. Most of the Supplement Responses were just that, supplements and clarifications. For example, Summit's Supplemental Responses do not amend the boundaries of the proposed storage facilities, do not amend the capacity of the storage facilities, do not amend the operator of the storage facilities, do not amend the amount or sources of carbon dioxide to be injected into such facilities, and do not amend the compensation to be paid to nonconsenting owners within the storage facilities. In their Objection, the Landowner Intervenor do not identify how any Supplemental Response or Intervenor Storage Agreement Revision prejudice their rights in this proceeding. Furthermore, as stated above, Summit believes that the Commission may render a decision on Summit's Applications without regard to Summit's Supplemental Responses or the Intervenor Storage Agreement Revisions due to the immaterial nature of such responses and revisions.

[¶ 17] Second, and unbelievably, Landowner Intervenor argue against the Intervenor Storage Agreement Revisions that were made in direct response to the concerns raised by Landowner Intervenor at the hearings. In other words, Landowner Intervenor acknowledge that their participation in these proceedings (due process) produced favorable results for the Landowner Intervenor via the Intervenor Storage Agreement Revisions, but are now requesting that the Commission disregard such results for the sole purpose of bolstering a non-existent due process argument. The Landowner Intervenor cannot have it both ways.

[¶ 18] Last, the Commission has not issued a final order on Summit's Applications nor any order regarding amalgamation of pore space. Accordingly, the Landowner Intervenor's due

---

process. Allowing [Summit] to literally amend and supplement the application in real time in response to the Intervenor's questioning and the deficiencies pointed out by Commission staff and Intervenor's violates due process.").

process arguments are not ripe until such a final order affecting their property rights has been issued.

### CONCLUSION

[¶ 19] For the foregoing reasons, Landowner Intervenor's Objection is meritless and the Commission should proceed to render a decision on Summit's Applications with, or without, the Supplemental Responses and/or Intervenor Storage Agreement Revisions.

Dated this 8th day of July, 2024.

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**PETITION FOR RECONSIDERATION OF DENIAL OF  
MOTION TO CONTINUE HEARING**

---

[¶1] Intervenor Landowners petitions for reconsideration of the Commission’s denial of Landowners’ motion to continue the hearing. Lynn Helms indicated that staff will not present a decision for a vote by the Commission until September or October, months from now.<sup>1</sup> The Commission has allowed Summit to amend and supplement its applications post-hearing, has refused to allow any meaningful discovery, and has very openly and explicitly stymied any semblance of due process for the Landowners. The false premise that all parties must rush to a hearing was proven false by the hearing itself, and the numerous amendments and supplements to the application that followed. For the reasons stated in the objection to these supplements and amendments, the Landowners also ask the Commission to reconsider its denial of their motion to continue the hearing. There is ample time to allow an amended application to be developed into a draft permit and fact sheet as required by law, and to allow discovery and due process prior to the Commission making a decision next September. The failure to do so constitutes a violation of the constitutional due process rights of the Landowners.

**In re application of Summit Carbon Storage # 1, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #1, LLC storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 1, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion to consider establishing the field and pool limits for lands located in Sections 31, 32, 33, and 34, Township 142 North, Range 87 West, Sections 1, 11, 12, 13, 14, 15, 22, 23, 24, 25, 26, 35, and 36, Township 141 North, Range 88 West, Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, and 35, Township 141 North, Range 87 West, Sections 1, 2, 3, and 12, Township 140 North, Range 88 West and Sections 4, 5, 6, and 7, Township 140 North, Range 87 West, Mercer, Morton, and Oliver Counties, ND, subject to the application of Summit Carbon Storage #1, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #2, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND.**

**In re application of Summit Carbon Storage # 2, LLC to consider the amalgamation of the storage reservoir pore space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #2, LLC storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND in the Broom Creek Formation.**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**INTERVENOR LANDOWNERS' REPLY BRIEF IN SUPPORT OF MOTION TO COMPEL**

---

Continuing its efforts to evade routine discovery, Summit makes bare assertions and relies on strained interpretations of the rules of procedure. Significantly, Summit does not dispute that Intervenor Landowners extended offers to choose a mutually agreed upon date for the deposition on May 2 and on May 9; it does not dispute that it never responded to these requests; and it does not dispute that it has had actual notice of the deposition and topics of questioning since May 9. Instead, it claims that it can duck its discovery obligations because Intervenor Landowners did not “certify” that it made these conferral attempts in a separate document, a two-way conferral did not occur, and it did not have sufficient notice. However, the Commission should grant Intervenor Landowner’s motion because they sufficiently described their conferral attempts to demonstrate that they attempted to confer in good faith; the *only* reason a conferral did not occur is because Summit deliberately ignored Intervenor Landowners; Summit had notice of the deposition nearly a month before its scheduled date. Finally, it is the express policy of North Dakota to conduct procedures relating to the geologic storage of carbon dioxide “in a manner fair to all interests.” § 38-22-01, N.D.C.C., and fairness requires the Commission to allow the deposition to go forward.

**A. Intervenor Landowners have complied with the requirements under Rule 37.**

**a. The only reason a conferral did not occur is because Summit ignored Intervenor Landowners’ attempts to do so.**

Rule 37 requires a party to attempt to obtain discovery in good faith before seeking court intervention. But the party resisting discovery cannot simply refuse to confer and then claim Rule 37 was not satisfied because a conferral did not occur—a sincere attempt to confer is sufficient. *Meuchal v. Red Trail Energy, LLC*, 2024 ND 44, ¶ 27, 4 N.W.3d 203 (collecting cases). Summits’

own case stands for this. *Meuchal*, ¶ 27 (“Conferring requires a party actually communicate by phone or in person, or at least *sincerely attempt to do so*.”) (emphasis added).

Summit contends that the Commission should shield it from the deposition because Intervenor Landowners “did not confer or attempt to confer with Summit Storage in good faith.” Pls’ Resp. at 11. This argument is without merit, and the facts speak for themselves.

On May 2, 2024, counsel for Intervenor Landowners extended an offer to counsel for Summit to coordinate the timing of the deposition, stating in part:

I would like to put aside some days in late May/early June for the deposition that work for our two schedules at least how busy we both are and are likely to become. Please let me know what days you have available for a deposition.

Ex. 9.

On May 9, after one full week of silence and with the hearing fast approaching, Mr. Braaten scheduled the deposition for June 6 as a placeholder, but again advised Mr. Bender that the date was flexible if it did not work for him:

I scheduled this to get a date down and I did try to look at what I know of your schedule between PSC hearings, etc. I am open to rescheduling this if we can find a mutually agreeable date though, so just wanted to let you know that right away.

Ex. 10. Weeks go by, and again, silence from Summit. Additionally, on May 9<sup>th</sup>, an email was sent to Hearing Officer Dave Garner, with courtesy copies to Lawrence Bender, Lynn Helms indicating that a call was placed to Hearing Officer Garner and Summit’s counsel on May 3, 2024 to discuss the abbreviated schedule and also indicated the deposition was scheduled for June 6, 2024. *See* Exhibit 13 to Supplemental Declaration of Derrick Braaten.

On May 31, Intervenor Landowners re-noticed the deposition as a formality after being officially joined as a party. Then, on June 4, more than a month after Intervenor Landowners first contacted Summit and just two days before the deposition, Mr. Bender finally communicated. But instead of offering a new date, he did nothing but contend that as a non-party, Summit should have

been served a subpoena instead of a notice. To assuage Summit's concerns, Intervenor Landowners promptly served notices on the three of the Summit storage entities that are technically the parties rather than the Summit entity that actually submitted the applications on behalf of the three other subsidiaries. The topics of questioning and the date remained the same.

But then, on June 5, the day before the deposition, Summit invented new imaginary concerns regarding notice to a third party, Minnkota Power Cooperative, Inc., and a purported lack of particularity with respect to the description of the topics of questioning (which speak for themselves). Mr. Braaten promptly responded, thoroughly summarizing the lengths he took to coordinate the deposition over the preceding weeks and further described the specificity of the topics.

Intervenor Landowners did not engage in a two-way discussion regarding the deposition, but this was no fault of their own. Rule 37 does not require conferral to actually occur because no party can force the other to engage in a discussion—a sincere attempt is sufficient. Clearly Intervenor Landowners met this standard, and the Commission should grant the motion.

**b. Intervenor Landowners certified that they in good faith attempted to confer with Summit.**

The Commission is to look “to the totality of the circumstances to determine the existence or nonexistence of good faith under N.D.R.Civ.P. 37(a)(1).” *PHI Financial Services v. Johnson Law Office, P.C.*, 2016 ND 114, ¶ 11, 881 N.W.2d 216. The North Dakota Supreme Court acknowledged that “[a]though Rule 37 does not identify detailed certification requirements, to effectuate the underlying policy of the rule, counsel seeking court-facilitated discovery must ‘adequately set forth in the motion essential facts sufficient to enable the court to pass a preliminary judgment on the adequacy and sincerity of the good faith conferment between the parties.’” *Meuchel*, ¶ 26. In other words, a movant complies with Rule 37's instruction to certify that the

movant has attempted to confer in good faith, so long as it includes sufficient facts to determine whether the movant sincerely attempted to confer.

Here, Intervenor Landowners have clearly set forth sufficient facts for the Commission to determine whether Intervenor Landowners attempted to confer in good faith. The details include summaries of Intervenor Landowners' attempts to coordinate the deposition, the dates on which the attempts were made, the responses (or lack thereof), and the results. Beyond this, Intervenor Landowners attached as exhibits the actual exchanges themselves.

Summit reads into Rule 37 a requirement that the certification be “a separate certification document.” Opp. ¶ 14. But there is no such requirement under Rule 37. Although the Court in *Meuchel* recently stated that a certification document is one of two components of a motion to compel—the other being a good faith conferral or attempt to confer (which Summit refused to engage in)—the Court does not state the certification must be a document separate from the motion itself. *Meuchel*, ¶ 24. Indeed, the Court focuses on whether it is presented with sufficient *facts* to determine whether the attempt was sincere. *Meuchel*, ¶¶ 25, 30. Tellingly, in rendering its decision, the *Meuchel* Court approvingly summarizes its prior decision in *PHI Financial Services v. Johnston Law Office, P.C.*, 2016 ND 114, 881 N.W.2d 216—a case in which the movant certified its good faith attempts “in the motion,” *PHI*, ¶ 4. *Meuchel*, ¶ 29. *Meuchel* did not hold that the certification cannot be in the motion itself, as such a holding would have been inconsistent with North Dakota case law, *see, e.g., PHI*, 2016 ND 114, and would be against other courts that have considered the issue. *See In re Presto*, 358 B.R. 290, 292 (Bankr. S.D. Tex. 2006) (“[T]his Court concludes that the certification may be included in the body of the Motion.”).

**B. The deposition notices comply with Rule 30, and Summit was required to appear absent the filing of a motion for a protective order.**

Summit does not raise any purported technical deficiencies with the revised notices served on June 4. Instead, it claims it did not have adequate notice of the deposition to sufficiently prepare. Opp. ¶ 24. As detailed above, the communications from Mr. Braaten regarding the deposition, the prior-served deposition notices, and the record demonstrate this argument is disingenuous. Summit cannot, in good faith, claim it did not have ample time to prepare when it had notice of the deposition topics since May 9.

Moreover, a party who believes it did not have reasonable notice cannot simply refuse to appear. *Bishop v. Potter*, 2010 WL 2771763, 1 (D. Nev. 2010) (“The noticed party ‘does not have the option of sitting back, failing to appear, requiring the noticing party to take action, and then crying foul to the court.’”). And a party that does so, such as Summit, can be sanctioned. *Id.* at 1.

In *Bishop*, the defendant noticed the deposition for April 29 on April 29—the same day. *Id.* at 1. The plaintiff had earlier indicated he would be out of town during that time to care for his mother and explained he would not attend the deposition. *Id.* The defendant went forward with the deposition because of the time constraints of discovery. Awarding sanctions due to the plaintiff’s failure to appear, the court noted that “[a]bsent a protective order or an order staying the deposition, the party, including its officer or Rule 30(b)(6) deponents, is required to appear for a properly noticed deposition.” *Id.* (citing *Anderson v. Air West, Inc.*, 542 F.2d 1010, 1093 (9th Cir. 1976)). The court held that under the circumstances, the appropriate sanctions were reimbursement for the taking of the deposition and additional time to take the deposition. *Id.* at 2.

Here, Summit stated it would not appear for the depositions noticed for June 6, but it did not file a motion for a protective order or a stay. Intervenor Landowners are not seeking sanctions for this violation of the discovery rules—they simply wish to depose Summit so they can properly assess its plans for carbon storage on their property.

Finally, the purpose of a deposition notice is to inform the other parties of the date, time, and place of the deposition. The notice of a 30(b)(6) also must describe with “reasonable particularity” the topics of questioning so the deponent can adequately prepare. Here, the purpose of Rule 30 was fulfilled as early as May 9, the date the first notice was served. By this time, Summit was clearly aware of the setting of the deposition and the topics of questioning. If it took issue with the notice, it should have raised its concerns in a timely manner rather than prejudice Intervenor Landowners by intentionally waiting until the 11<sup>th</sup> hour.

**C. Due process and the administrative code entitle Intervenor Landowners to discovery.**

Summit may be correct that there is no “general” constitutional right to discovery in administrative proceedings. Opp. ¶ 26. “This general rule, however, is not dispositive.” *Achrulete v. Santa Fe Police Dep. Ex rel. City of Santa Fe*, 137 N.M. 161, ¶ 32, 108 P.3d 1019. Rather, “due process is flexible and calls for such procedural protections as the particular situation demands” *Mathews v. Eldridge*, 424 U.S. 319, 334 (1976) (cleaned up), and “[a]dministrative hearings that affect a property or liberty interest must comply with due process.” *Archuleta*, ¶ 31 (emphasis added).

Here, the Commission should grant Intervenor Landowner’s motion because it complied with the discovery rules as described above. Thus, although it is unnecessary to delve into the due process interests at stake for purposes of this motion, due process requires discovery when substantial property interests are at stake, and Summit itself has requested amalgamation such that Intervenor Landowner’s legal rights will be “substantially affected” by these proceedings. *See* Applicant’s Resp. to Swenson Trust’s Mot. to Cont. Hearing and Req. for Sched. Conf., at 10-11. Moreover, the administrative code itself allows for discovery, § 28-32-33, N.D.C.C., and it is the

express policy of North Dakota to conduct procedure relating to the geologic storage of carbon dioxide “in a manner fair to all interests.” § 38-22-01, N.D.C.C.

### **CONCLUSION**

The discovery rules should be construed “liberally.” *See Marmon v. Hodny*, 287 N.W.2d 470, 476 (N.D. 1980). The Commission should grant Intervenor Landowner’s motion because it earnestly and in good faith attempted to confer with Summit regarding the deposition, and Summit failed to respond in kind. Even if the deposition notices in May did not strictly comply with the rules, Summit was on notice and had ample time to prepare for the deposition, and the policy to be promoted by the notice requirement was more than fulfilled. Finally, there is *no* dispute that the June 4 notices were proper, and if Summit took issue with the timing (despite the topics remaining unchanged), then it was required to act by filing a protective order, rather than “sitting back, failing to appear, requiring the noticing party to take action, and then crying foul to the court.” *Bishop v. Potter*, 2010 WL 2771763, 1. Although this is grounds for sanctions, the Commission should simply order the deposition to take place.

DATED this 27<sup>th</sup> day of June, 2024.

---

Mr. Garner:

I represent the Swenson Living Trust, a proposed intervenor in NDIC Case Nos. 30869-30880. I also represent several other landowners who intend to intervene and we will be filing those petitions in the near future. I called and left a voicemail last Friday asking to speak with you and Mr. Bender regarding the extremely abbreviated schedule in this matter. The hearing has been scheduled for June 11-12, and we have submitted a motion requesting additional time to allow us to respond and prepare for a hearing. We are going to do our best to prepare if that motion is not granted, but I am very concerned that it will require a very abbreviated discovery schedule. I have scheduled a deposition for June 6, but I need to obtain the data decks, load files, and other data that was used to run the models developed for the application, and I need to do that with sufficient time to allow my team of experts to both run the models (which can take days depending on the data and how it is set up) and then analyze the results. We need to do all of this before the deposition. I have scheduled that for June 6 and this means I will likely not be able to get a transcript back before our hearing, but I wanted to give us as much time as possible to facilitate the exchange of information. If I can get some of the data decks from the NDIC, I would like to explore that as well.

I would also like to discuss logistics if we could. I have a number of landowners and it would be my preference to stipulate in advance to some of the information regarding their land ownership, deeds, etc. to avoid having to call them to walk through that at the hearing. I can make them available for examination if Mr. Bender wishes, but I'd rather not spend several hours of our time walking through deeds, etc. I also will need some very quick turnaround on the data to get this done in time, so will be asking to expedite the discovery process. I am also concerned that if the NDIC intends to grant out petitions to intervene, we are being significantly prejudiced right now because they have not been granted, and that takes more time away from us as we are trying to prepare. I have served discovery and a deposition notice, but without having our intervention granted I suspect Mr. Bender is free to ignore those. I do apologize for my directness here in addressing the tribunal, but I would ask that the intervention be granted retroactively such that our discovery requests and deposition notice do not need to be re-served, which would reset the time to respond.

I am also planning to get a motion filed tomorrow or Monday formally asking for this relief in the form of expedited discovery and an immediate discovery conference to set deadlines. I have served two rounds of discovery and in the first I focused solely on the data my experts requested in order to conduct their analysis. If there is any way to expedite that data above others I would appreciate that, and also point out that the data I am seeking for my experts is literally a part of the applications here, and I think due process requires that I obtain that in a timely manner for this to be a fair hearing. If there is anything I can do to facilitate this please let me know, and as I said, I am working as fast as I can on a motion to expedite and will have it filed tomorrow or Monday. I have attached a

copy of the discovery we served and a letter clarifying some errors we made – this is the data we are seeking that is part of the application and which our experts require in order to assess the application. If the NDIC is able to assist with sharing any of this data itself I would ask that you please consider that and I will facilitate any way I can.

I look forward to hearing from you and would appreciate if we can get a conference call set up to discuss all of this as soon as possible.

Sincerely,

**Derrick Braaten**

**In re application of Summit Carbon Storage # 2, LLC to consider the application of Summit Carbon Storage #2, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Sections 27, 28, 29, 32, 33, 34, and 35, Township 143 North, Range 88 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, 35, and 36, Township 142 North, Range 88 West, Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, and 31, Township 142 North, Range 87 West, and Sections 1, 2, and 3, Township 141 North, Range 88 West, Mercer and Oliver Counties, ND, subject to the application of Summit Carbon Storage #2, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

**In re application of Summit Carbon Storage #3, LLC requesting consideration for the geologic storage of carbon dioxide in the Broom Creek Formation from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND.**

**In re application of Summit Carbon Storage #3, LLC to consider the amalgamation of the storage reservoir space, in which the Commission may require that the pore space owned by nonconsenting owners be included in the geologic storage, as required to operate the Summit Carbon Storage #3, LLC storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31, 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re application of Summit Carbon Storage #3, LLC for an order of the Commission determining the amount of financial responsibility for the geologic storage of carbon dioxide from the Midwest Carbon Express Pipeline in the storage facility located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver County, ND, in the Broom Creek Formation.**

**In re motion of the Commission to consider establishing the field and pool limits for lands located in Section 36, Township 143 North, Range 87 West, Sections 19, 20, 21, 28, 29, 30, 31 , 32, 33, 34, 35, and 36, Township 143 North, Range 86 West, Sections 1, 2, 11, 12, 13, 14, and 24, Township 142 North, Range 87 West, Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 32, 33, 34, and 35, Township 142 North, Range 86 West, and Sections 6, 7, 17, 18, 19, and 20, Township 142 North, Range 85 West, Oliver county, ND, subject to the application of Summit Carbon Storage #3, LLC for the geologic storage of carbon dioxide in the Broom Creek Formation, and enact such special field rules as may be necessary.**

---

**OBJECTION TO SUMMIT CARBON STORAGE #1, LLC, SUMMIT CARBON STORAGE #2, LLC, AND SUMMIT CARBON STORAGE #3, LLC SUPPLEMENTS**

---

[¶1] Intervenor Landowners object to supplements of Summit Carbon Solutions, LLC through its related entities, Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (collectively, “Summit”).

[¶2] The numerous amendments and supplements provided by Summit on its own initiative as well as in response to requests from the Commission are material amendments to the application. The notice and hearing process required by N.D.A.C. § 43-05-01-08 do not allow for these amendments and supplements to an application after issuance of the notice of hearing. The public and many others were invited to comment on the existing applications. *See* Notice of Hearing, Summit Carbon Storage #1, LLC, NDIC Case Nos. 30869-30872, Notice of Hearing, Summit Carbon Storage #2, LLC, NDIC Case Nos. 30873-30876, and Notice of Hearing, Summit Carbon Storage #3, LLC, NDIC Case Nos. 30877-30880. Draft permits and fact sheets were prepared based on the existing applications and the notices were issued in accordance with these. *See* N.D.A.C. § 43-05-01-07.2.

[¶3] Although there are procedures for major and minor modifications of a *permit* following issuance, there are no such allowances for amendment and supplementation of the *applications* themselves upon which the draft permit and fact sheet are based, and which the public is invited to comment and participate in a hearing. *See, e.g.* N.D.A.C. §§ 43-05-01-12, 43-05-01-12.1. Given the significant property interests being stripped from landowners by the Commission in this proceeding, it is critical that the Commission provide the most robust protection of Intervenor’s rights to due process. Allowing the applicants to literally amend and supplement the application in

real time in response to the Intervenor's questioning and the deficiencies pointed out by Commission staff and Intervenor's violates due process.

The very nature of due process negates the concept of inflexible procedures universally applicable to every imaginable situation; instead, the requirements imposed by the Clause are flexible and variable and dependent upon the particular situation being examined. *Wolff v. McDonnell*, *supra*; *Hewitt v. Helms*, *supra*. In determining what process is due under the Fourteenth Amendment, we must consider the private interests at stake in a governmental decision, the governmental interests involved, and the value of procedural requirements.

*Jensen v. Satran*, 332 N.W.2d 222, 227 (N.D. 1983).

[¶4] The private interests at stake are the property of North Dakota citizens. The government's interest at stake is in taking those interests from its private citizens and providing them to Summit to use at any price Summit dictates. The value of providing notice and hearing on the actual application under consideration and not one amended post-hearing is very significant to the ability of the landowners' to protect their property. The applicants are literally amending the contractual agreements the applicants intend to impose on the Intervenor's. Putting aside the numerous provisions of both state and federal constitutions that this violates, taking this extreme action without even providing a fair hearing is beyond a due process violation – it is immoral.

[¶5] For these reasons, the Intervenor Landowners object to the supplementation and amendment of the applications post-hearing.

**Summit Carbon Stroage #2, LLC**  
**Summit Carbon Storage #3, LLC**  
**Supplemental Filings**

Dear Acting Director Bohrer:

In response to the supplemental filing requests made by Commission staff at the June 11, 12 and 13, 2024 hearing on the above-captioned cases, Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC and Summit Carbon Storage #3, LLC (collectively, "Summit") submit the enclosed responses. A separate response has been provided for each of the three applications submitted by Summit. Each response contains a table outlining the supplemental requests, followed by the substantive responses.

Should you have any questions, please advise.

Sincerely,

LAWRENCE BENDER

**RE: Case Nos. 30869 – 30880**  
**Summit Carbon Storage #1, LLC**  
**Summit Carbon Stroage #2, LLC**  
**Summit Carbon Storage #3, LLC**  
**Response to Public Comments**

Dear Assistant Attorney General Garner:

Summit Carbon Storage #1, LLC, Summit Carbon Storage #2, LLC, and Summit Carbon Storage #3, LLC (the “Applicants”) completed a review of the public comments submitted in Cases 30869 through 30880 (the “Cases”). In total, there were twenty-five (25) public comments submitted for all the Cases. One person, Ms. Meda Schultz, submitted comments twice, leaving twenty-four (24) comments from different organizations or individuals. There was one general comment from the North Dakota State Historical Society concerning cultural surveys, which was addressed in the hearings, leaving twenty-three (23) comments without responses.

The supportive comments can be categorized as landowner support or general support. The opposition comments can be categorized as mineral owner opposition or general opposition. Twelve (12) mineral owners submitted responses expressing their concerns over future mineral development. Seven (7) parties submitted general opposition including the Dakota Resource Council. Two (2) landowners submitted letters in support. Two (2) other parties submitted responses in support. The list of individuals and entities that submitted comments on the Cases are as follows:

1. Victoria Brown, dated May 30, 2024 (mineral owner)
2. Mark Schultz, dated June 7, 2024 (mineral owner)
3. Brenda L. Lipp, dated June 8, 2024 (mineral owner)
4. Eric R. Schultz, dated June 9, 2024 (mineral owner)
5. Janice Menge, dated May 21, 2024 (mineral owner)

6. Jenny Kirk, dated May 13, 2024 (mineral owner)
7. Donna Dippolito, received May 20, 2024 (mineral owner)
8. Marvel Beell, dated May 12, 2024 (mineral owner)
9. Karen Jacob, dated May 13, 2024 (mineral owner)
10. JoAnn Schumacher, received May 16, 2024 (mineral owner)
11. Marjorie Fairbanks, received May 13, 2024 (mineral owner)
12. Meda Schultz, dated June 10, 2024 (mineral owner) & Meda Schultz, June 10, 2024 (general opposition – 2<sup>nd</sup> letter)
13. Fay Horn f/k/a Fay Hill, dated April 28, 2024 (general opposition)
14. Gary Boeckel, received May 6, 2024 (general opposition)
15. Dakota Resource Council, dated June 10 (general opposition)
16. Emma Schmit, dated June 10, 2024 (general opposition)
17. Janet Miller, dated June 10, 2024 (general opposition)
18. Kathy Carter, dated June 10, 2024 (general opposition)
19. Lisa Ritzert, dated June 10, 2024 (general opposition)
20. Paul Schock, dated June 10, 2024 (landowner support)
21. Jason Pulver, dated June 7, 2024 (landowner support)
22. Anna Novak, State Representative District 33, dated June 10, 2024 (general support)
23. Gary & Carla Poeckes, Lake View Services, LLC, dated June 10, 2024 (general support)

**I. Response to Comments of Mineral Owners.**

The concerns of the mineral owners are largely focused on a claim that the mineral interests in the Storage Facility area are negatively impacted from future development. The Applicants addressed these concerns in Section 2.6, *Potential Mineral Zones*, of each their respective applications as follows:

*In the event that hydrocarbons are discovered in commercial quantities below the Broom Creek Formation, a horizontal well could be used to produce hydrocarbons while avoiding drilling through the CO<sub>2</sub> plume, or a vertical well could be drilled using proper controls. Aside from meeting regulatory and jurisdictional requirements, should an operator decide to drill wells for hydrocarbon exploration or production, real-time Broom Creek Formation BHP data will be available while the TB Leingang 1 and TB Leingang 2 wells are in operation, which will allow prospective operators to design an appropriate well control strategy via increased drilling mud weight. Pressure increase in the Broom Creek caused by injection of CO<sub>2</sub> will relax postinjection as the area returns to its preinjection pressure profile. Any future wells drilled for hydrocarbon exploration or production that may encounter the CO<sub>2</sub> should be designed to include an intermediate casing string placed across the storage reservoir, with CO<sub>2</sub>-resistant cement used to anchor the casing in place.*

In addition, Ms. Amanda Livers-Douglas testified that as detailed in Section 2.6 of the application, there are active and reclaimed coal mines near the storage facility area. However, no existing mines have plans to mine coal in the storage facility area during the project's operational period. Ms. Livers-Douglas further testified that in the event that hydrocarbons are discovered in commercial quantities below the Broom Creek Formation in the area of the storage facilities,

directional or horizontal wells could be used to produce hydrocarbons while avoiding drilling through the CO<sub>2</sub> plume, or a vertical well could be drilled using proper controls.

Further, there are no oil bearing formations or other hydrocarbon reserves located within the boundaries of the storage facilities. While the North Dakota Geological Survey recognizes the Spearfish Formation as the only potential oil bearing formation above the Broom Creek Formation, production from the Spearfish Formation is limited to the northern tier of counties in western North Dakota. Furthermore, there has not been historic hydrocarbon exploration in, or production from, formations below the Broom Creek Formation in the storage facility area. Section 2.6 of each application provides information concerning historical oil production in the area of the storage facility.

## **II. General Opposition.**

### **a. Meda Schultz**

Ms. Meda Schultz made the following comments: “Summit’s proposal serves an old, dying, and harmful industry: the Oil, Gas, and Chemical Industry.” Ms. Schultz also indicated, “It is time to look for new energy sources.”

**RESPONSE:** The Applicants understand that not everyone is in favor of this project. While the Applicants appreciate Ms. Schultz’s response, the Applicants disagree with her position. The project serves to support the bio-fuel and agricultural industries, not the oil, gas and chemical industries.

### **b. Fay Horn f/k/a Fay Hill**

Ms. Fay Hill commented as follows: “Summit Carbon Storage has a bad reputation as far as respect to land owners.”

**RESPONSE:** Applicants have acquired in excess of 92% of the pore space lease agreements across all three units with broad landowner support. In addition, Applicants have acquired 100% voluntary easements for its flowlines in the sequestration area.

### **c. Gary Boekel**

Mr. Gary Boekel commented that North Dakota is not the place for carbon dioxide storage. Gary raised concerns about damage to roads.

**RESPONSE:** Applicants have worked with and will continue working with the appropriate townships and counties regarding road use and road repair.

### **d. Dakota Resource Council**

The Dakota Resource Council’s comments suggest that the NDIC should not proceed with a decision on this matter until there is a resolution to the constitutionality of amalgamation.

**RESPONSE:** Summit’s position is that the NDIC should continue to proceed according to the North Dakota Century Code. DRC’s comments are tantamount to judicial activism.

e. Ms. Emma Schmit & Ms. Janet Miller

Ms. Emma Schmit and Ms. Janet Miller submitted comments that are similar to the Dakota Resource Council. Their concerns are primarily focused on a lack of environmental justice (EJ) considerations by the North Dakota Industrial Commission.

**RESPONSE:** Applicants believe that the North Dakota Industrial Commission has jurisdiction.

f. Ms. Kathy Carter

Ms. Kathy Carter's concerns are primarily focused on whether the CO<sub>2</sub> will travel through multiple "strata" contaminating underground water sources.

**RESPONSE:** These concerns are addressed by the Applicants both in its applications and through testimony at the hearings.

g. Ms. Lisa Ritzert

Ms. Lisa Ritzert's concerns are primarily focused on pipeline safety.

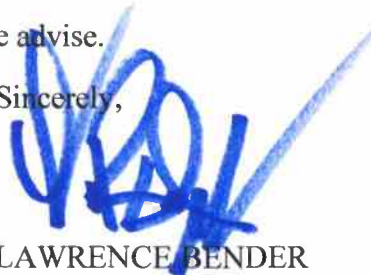

**RESPONSE:** Applicants stated in their testimony that the flowlines that are a part of the sequestration projects will be built in accordance with standards set forth in 49 CFR 195.

**III. General and Landowner Support.**

The Applicants believe that the supporting comments provided in these Cases are indicative of the over 450 landowners who entered into voluntary agreements for the development of their pore space.

Should you have any questions, please advise.

Sincerely,

LAWRENCE BENDER

6A	N/A	N/A	<b>Section 4.0</b>	Identify the distance of the closest wind turbine to the NDL-327 flowline.
7A	7B	7C	<b>Section 5.0</b>	Identify the distance of the closest occupied dwelling to each flowline and injection site.
8A	8B	8C	<b>Section 5.0</b>	Clarify statements regarding flowmeters made by Mr. James Powell during the June 12, 2024 hearing.

SCS1 Doc #	SCS2 Doc #	SCS3 Doc #	Location within Application	Supplement Requested
9A	9B	9C	Section 5.3.1 Corrosion Prevention	Clarify whether Summit anticipates any cathodic protection boreholes to be drilled or will this system utilize anode beds entirely.
10A	10B	10C	Section 7.5.1 Response Personnel and Equipment	Revise "(A)ssistance has been secured from local emergency services to implement this ERRP," to "(F)urther collaboration with local emergency services will occur to further develop and implement this ERRP," from page 7-17.
11A	11B	11C	Appendix C	Provide clarification on net change calculation of mineral precipitation vs. dissolution as seen in Figure C-13 and confirm if net change is positive or negative.
12A	12B	12C	Appendix C	Provide clarification on net change calculation of mineral precipitation vs. dissolution as seen in Figure C-22 and confirm if net change is positive or negative.

#### ACKNOWLEDGEMENTS

Prior to commencement of injection operations, SCS1, SCS2, and SCS3 will provide an updated Worker Safety Plan that includes a list of site specific training and the training itself for DMR inspection staff.

Prior to commencement of injection operations, SCS1, SCS2, and SCS3 will provide a revised Emergency Remedial Response Plan.

## **SUMMIT CARBON STORAGE #1, LLC**

Storage Facility Permit Application – Supplemental Filing June 24, 2024

### **SUPPLEMENT #1A**

**Request:** A listing of all environmental permits, construction approvals, or any other relevant permit received or applied for from the commission or any other federal, state, or local regulatory agency.

**Response:** Please see subsequent pages for a table listing permits associated with this project. Please note, identical information is also being provided as a supplement for Summit Carbon Storage #2, LLC and Summit Carbon Storage #3, LLC.

Storage Facility Permit Application – Supplemental Filing June 24, 2024

### **SUPPLEMENT #2A**

**Request:** Provide the location, including state, of the capture facilities associated with this project.

**Response:** Exhibit 3A, MCE Project Overview Map, was provided during the storage facility permit hearing as a revised Figure PS-2, MCE Project overview map. Exhibit 3A updated Summit Carbon Solutions, LLC's partner facilities from 32 to 57. A supplement was requested during the storage facility permit hearing to describe the capture facilities with respect to their locations. Please note, the provided map is not intended to replace Figure PS-2 and an identical map has been provided for Summit Carbon Storage #2, LLC and Summit Carbon Storage #3, LLC.

Storage Facility Permit Application – Supplemental Filing June 24, 2024

**SUPPLEMENT #3A**

**Request:** Revise the following sections of each Storage Agreement:

Section 2.4 – Correcting Errors

Sections 3.3 – Amendment of Leases and Other Agreements

Section 7.1 – Warranty and Indemnity

Section 8.1 – No Surface Occupancy

Section 10.2 – Waiver of Rights to Partition

Section 15.1 – Term

Section 16.2 – Joinder in Dual Capacity

Revise Pore Space Lease – EXHIBIT D:

Section 18 – Warranty of Title and Quiet Enjoyment

Section 25 – Confidentiality

Section 34 – Insurance

**Response:** Clean and red lined drafts of each Storage Agreement are enclosed herewith.

## **SUMMIT CARBON STORAGE #1, LLC**

Storage Facility Permit Application – Supplemental Filing June 24, 2024

### **SUPPLEMENT #4A**

**Request:** Provide an explanation on mercury injection capillary pressure data modifications, single sampling performance, and adjustment of the mercury fluid properties to the CO<sub>2</sub> fluid properties.

**Response:** The following narrative provides the requested explanation. Please note, identical information has been provided as a supplement for Summit Carbon Storage #2, LLC and Summit Carbon Storage #3, LLC.

**MERCURY INJECTION CAPILLARY PRESSURE FLUID PROPERTY ADJUSTMENTS AND  
MODELING MODIFICATIONS****TBL-MF1/BKF-AE2/KJH-SLH5**

Adjustments from mercury fluid properties to carbon dioxide (CO<sub>2</sub>) fluid properties are necessary to perform numerical simulations. Mercury injection capillary pressure (MICP) must be converted from the laboratory-derived air/mercury system to the brine/CO<sub>2</sub> system. Relative permeability is derived using Corey correlation<sup>1</sup> for the brine/CO<sub>2</sub> system for all samples tested with varying characteristics throughout the reservoir interval.

Core samples were selected to represent the petrophysical characteristics of each rock type populating the geological model. Samples were tested using the high-pressure mercury injection (HPMI) technique to determine the capillary pressure regime of the reservoir and upper and lower confining zones.

For each sample where HPMI data are available, the pressure and temperature are estimated using the corresponding gradients attained from well-drilling activities.

The brine/CO<sub>2</sub> capillary pressure data are calculated from the air/mercury capillary pressure using the relationship below where the interfacial tension (IFT) and contact angle (CA) are measured in the laboratory under reservoir conditions (temperature, pressure, and brine salinity).

Capillary pressure curves are calculated for all samples under laboratory conditions from MICP data considering the porosity and permeability of the core using the rock quality index (RQI) equation where (Equation 1):

$$RQI (\mu m) = \sqrt{\frac{K}{\Phi_e}} \quad [Eq. 1]$$

where K is the sample permeability (md).

where  $\Phi_e$  is the effective porosity of the sample.

Calculated capillary pressure curves from the MICP data were modified and scaled to the numerical simulation model conditions using the model's RQI for the five representative facies (SFP [storage facility permit] Figures 3-5–3-9), using the relationship: *Model (formation) Pc = Lab Pc \* (Lab RQI/Model RQI)*. The capillary entry pressure values applied in the model were determined by deriving a ratio between the RQI of core sample data within the modeled region to scale the capillary entry pressure value derived from core testing (SFP Table 3-3) to the numerical simulation model. This resulted in two different ratios derived first from MICP data and second from the RQI porosity and permeability properties for each of the modeled facies. Because of the differences in the statistical distributions of the porosity (guided by seismic inversion) and permeability (based on porosity–permeability regression) and entry pressure by facies across the modeled area vs. each well/core-based calibration data point, the modification or application of the RQI

Storage Facility Permit Application – Supplemental Filing June 24, 2024

**SUPPLEMENT #5A**

**Request:** Provide an explanation on anhydrite precipitation vs dissolution as modeled in the Broom Creek for this permit, as compared to other Class VI permits.

**Response:** The following narrative provides requested explanation.

**ANHYDRITE PRECIPITATION VS. DISSOLUTION AS MODELED IN THE BROOM CREEK  
FOR THE SCS PERMITS, AS COMPARED TO OTHER NORTH DAKOTA CLASS VI  
PERMITS**

**TBL-MF1/BKF-AE2/KJH-SLH5**

Mineral reaction (dissolution and/or precipitation) is a site-specific, simultaneous, and complex process that depends on many factors such as reservoir conditions (initial temperature, pressure, and salinity), the elevated pressure during injection, CO<sub>2</sub> stream composition, amount of CO<sub>2</sub> dissolved, resulting pH, mineral composition and their kinetics, and brine chemistry (initial pH, cation/anions and their concentration levels). Dolomite dissolution and subsequent anhydrite precipitation is observed in the Broom Creek Formation geochemical modeling for all three Summit Carbon Solutions (SCS) sites—TBL-MF1, BKF-AE2, and KJH-SLH5—and documented in the storage facility permit applications. Dolomite dissolution is observed during the 20 years of injection and after that during postinjection, where dolomite dissolution decreases gradually.

Mineral reactions in the Broom Creek Formation from five previously approved North Dakota Class VI permits were reviewed as part of this supplemental request. Factors, such as those previously described, were compared to SCS site-specific mineral reactions to understand if conclusions could be drawn as to why SCS sees anhydrite precipitation rather than dissolution and dolomite dissolution rather than precipitation. Across all three SCS permits, these geochemical behaviors may be associated with the high salinity in the formation brine (total dissolved solids >80,000 ppm, i.e., higher ion concentration levels), resulting in high brine acidity from the injection and higher dolomite content over the anhydrite content, creating an aqueous environment undersaturated with respect to dolomite mineral and thus resulting in dolomite dissolution.

Solubility of anhydrite (CaSO<sub>4</sub>) is controlled by reservoir temperature, pressure, formation brine chemistry (Ca<sup>2+</sup> and SO<sub>4</sub><sup>2-</sup> concentration levels), and mineral composition. At high reservoir temperatures and pressures under a favorable aqueous environment with sufficient Ca<sup>2+</sup> and SO<sub>4</sub><sup>2-</sup> in the aqueous solution, the anhydrite solubility gradually decreases as carbonate solubility increases because of dolomite dissolution and enhances the precipitation of anhydrite.<sup>2</sup> For the SCS sites, dolomite dissolution (Figure C-7), alongside increasing carbonate solubility, results in Ca<sup>2+</sup>-rich in situ formation brine (3060 mg/L). The resulting formation brine with increased Ca<sup>2+</sup> ions, coupled with existing high SO<sub>4</sub><sup>2-</sup> concentration (2400 mg/L), would favor precipitation of anhydrite.

---

**SUMMIT CARBON STORAGE #1, LLC**

Storage Facility Permit Application – Supplemental Filing June 24, 2024

**SUPPLEMENT #6A**

**Request:** Identify the distance of the closest wind turbine to the NDL-327 flowline.

**Response:** The closest wind turbine to the NDL-327 flowline is in Section 8, T141N, R87W. The closest straight line from the wind turbine to NDL-327 exceeds 1000 feet.

# **SUMMIT CARBON STORAGE #1, LLC**

Storage Facility Permit Application – Supplemental Filing June 24, 2024

## **SUPPLEMENT #7A**

**Request:** Identify the distance of the closest occupied dwelling to each injection site and NDL-327 flowline.

**Response:** The nearest occupied dwelling to the SCS1 injection site (TB Leingang 1 & TB Leingang 2) is over 2,200 feet from the center of the TB Leingang pad. The landowners at this dwelling are participating in the project.

The nearest occupied dwelling to the SCS1 NDL-327 flowline is over 1,100 feet. The landowners at this dwelling are participating in the project.

## **SUMMIT CARBON STORAGE #1, LLC**

Storage Facility Permit Application – Supplemental Filing June 24, 2024

### **SUPPLEMENT #8A**

**Purpose:** Clarify statements regarding flowmeters made by Mr. James Powell during June 12, 2024 hearing. Please note, an identical narrative has been provided for Summit Carbon Storage #2, LLC and Summit Carbon Storage #3, LLC.

**Response:** The following narrative has been provided.

## **CO<sub>2</sub> METERING**

### **TBL-MF1/BKF-AE2/KJH-SLH5**

During the NDIC hearings on June 12, 2024, James Powell was asked “Would Summit be opposed to a requirement that would require a flowmeter at the beginning of the individual flow lines and an actual custody transfer happening as it moves from one line into another?” Although Summit does not object to this requirement, as stated by James Powell, Summit does not believe the additional custody transfer points add significant value to the accuracy of metering and/or the leak detection system.

Summit’s leak detection and metering system looks at the system as a whole rather than individual entities. With the existing custody transfer points and flowmeters, at the terminus point as well as each individual injection well, which equates to seven flowmeters across the approximate 20 miles of flowlines, Summit receives the granular metering information required to efficiently operate the leak detection and metering system.

In the unlikely event of a release, under the proposed metering plan, Summit can allocate losses based on the proportion of flow going to the individually impacted sequestration sites from metering data gathered at the terminus as well as the individual injection wells. To further expand how the integrated metering and leak detection system works, between each metered segment a line balance (over/short) will be calculated using each segments flow in and flow out. In the unlikely event that a leak occurs, the flow out of a segment would drop and alert the controller. Under normal operations, a segment would report the same flowrate in, and out. A total system inventory balance uses all receipt/delivery meters plus line pressures along the route to show a real-time total line inventory. The line inventory is designed to catch a small release over time. Summit’s segmented line balance divides the pipeline into many smaller segments as opposed to 2500 miles. Multiple leak detection systems will be utilized, the above mentioned are two of five systems incorporated into the pipeline. A rupture detection system installed at approximately 25-mile increments will use speed of sound measurements to detect, locate, and alarm to the controller. A CPM system uses machine learning and reports any deviations from normal operations. Finally, a real-time transient model (RTTM) uses the hydraulic gradients, pump pressures, line pressures, and elevations reflected along the entirety of the pipeline to show the system health. This layered approach does not rely on one method, but each play a part in the overall system protection.

Summit’s recommendation would be to require additional custody transfer metering points, in the future, if one of the sites were to be sold. This would align with industry best practices. The ownership demarcation that exists today may not in fact be the point of sale if one were to occur in the future which could then require additional metering. Since no sale has been contemplated, it is Summit’s opinion that designing and operating for one would be premature. Likewise, the downside of additional custody transfer points (flowmeters) is on the operations, maintenance, and reliability side. It requires additional resources to calibrate meters and stream quality analyzers. It would also require the addition of a 24” smart tool receiver and launcher.

## **SUMMIT CARBON STORAGE #1, LLC**

Storage Facility Permit Application – Supplemental Filing June 24, 2024

### **SUPPLEMENT #9A**

**Request:** Clarify whether Summit anticipates any cathodic protection boreholes to be drilled or will this system utilize anode beds entirely.

**Response:** The following narrative provides requested clarification.

#### **CATHODIC PROTECTION BOREHOLES**

As stated in Section 5.3.1, Corrosion Prevention, SCS1, SCS2, and SCS3 will install an impressed current cathodic protection system along the buried flowline to mitigate the threat of external soil corrosion on the line. SCS1, SCS2, and SCS3 plan on using vertical boreholes. Per the existing language in SCS1, SCS2 and SCS3 permits in Section 5.3.1.1; SCS1, SCS2, and SCS3 will provide DMR-O&G with a map of cathodic protection borehole locations to meet N.D.A.C. § 43-05-01-05(1)(a) prior to injection.

**SUMMIT CARBON STORAGE #1, LLC**

Storage Facility Permit Application – Supplemental Filing June 24, 2024

**SUPPLEMENT #10A**

**Request:** Revise "(A)ssistance has been secured from local emergency services to implement this ERRP," to "(F)urther collaboration with local emergency services will occur to further develop and implement this ERRP," from page 7-17.

**Response:** Page 7-17 of Section 5.3.1 has been revised accordingly.

- Pipeline Control dispatches LRT to investigate the incident and notifies the QI.
- CRC arrives at the incident site and completes initial response actions. A designated CRC member will fill the initial IC position.
- The IC will conduct a risk assessment and coordinate with the QI to determine what ICS positions need to be filled for the LRT.
- The QI or IC will establish liaison with the local emergency coordinating agencies, such as the 911 emergency call centers or county emergency managers, in lieu of communicating individually with each fire, police, or other public entity.
- If the response exceeds local capabilities, the IC will coordinate with the QI to determine the need for mobilization of a CST.

## 7.5 Response Personnel/Equipment and Training

### 7.5.1 Response Personnel and Equipment

Designated company personnel will undergo hazardous waste operations and emergency response training (HAZWOPER) in accordance with guidelines produced and maintained by the Occupational Safety and Health Administration (OSHA) (OSHA 29 Code of Federal Regulations [CFR] § 1910.120). In addition, further collaboration with local emergency services will occur ~~assistance has been secured from local emergency services to further develop and~~ implement this ERRP, as shown in Figures 7-2 through 7-5.

Equipment (including appropriate PPE) needed in the event of an emergency and remedial response will vary, depending on the emergency event. Response actions (e.g., cessation of injection, well shut-in, and evacuation) will generally not require specialized equipment to implement. However, when specialized equipment is required (such as a drilling rig, logging equipment, or potable water hauling, etc.), one of the primary contacts listed in Table 7-3 is responsible for procurement of this equipment. One of the primary contacts listed in Table 7-3 is also responsible to maintain a list of contractors and equipment vendors (see Section 7.6).

The company will provide personnel, training, equipment, instruments, tools, and material as needed to respond to an emergency incident:

- All local company personnel are available for callout as needed for duty on a 24-hour basis to support public safety agencies.
- Additional personnel, if required, will be acquired from agency responders from public safety agencies and/or response contractors.
- If public authorities are involved, they will be given full cooperation and assistance. In no event shall such cooperation and assistance violate safety rules or consist of actions that would endanger the public or employees.

**SUPPLEMENT #11A**

**Request:** Provide clarification on net change calculation of mineral precipitation vs. dissolution as seen in Figure C-13 and confirm if net change is positive or negative.

**Response:** The following narrative supplies requested information.

**MINERAL PRECIPITATION VS. DISSOLUTION NET CHANGE (FIGURE C-13)**

**TBL–MF1**

Mineral dissolution and precipitation are simultaneous. Because of dissolution of any reactive in situ minerals, change in mass (initial-dissolved) was calculated for the entire simulation period, and that calculation provides net dissolution of minerals. In C2, net dissolution of all in situ minerals is 4.8 kg. Concurrent precipitation of any primary or secondary minerals was also considered. In C2, the net precipitation of all primary or secondary minerals is 4.53 kg. Mineral dissolution dominated over precipitation, and therefore the total change in mass is negative, which is 0.27 kg per cubic meter.

**SUPPLEMENT #12A**

**Request:** Provide clarification on net change calculation of mineral precipitation vs. dissolution as seen in Figure C-22 and confirm if net change is positive or negative.

**Response:** The following narrative supplies requested information.

**NET POROSITY CHANGE (FIGURE C-22)**

**TBL–MF1**

Change in porosity is dependent on the magnitude of concurrent dissolution and precipitation. If dissolution dominates over precipitation, total solid fraction decreases and porosity increases. If precipitation dominates over dissolution, total solid fraction increases and porosity decreases. Porosity change is calculated by subtracting final porosity from initial porosity for each time step and added to estimate net porosity change for the entire simulation period and converted to a percentage (%). Net porosity change refers to a positive change, as total porosity increases by 0.019 fraction, which is equivalent to a less than 2% net change.

**STORAGE AGREEMENT  
TB LEINGANG BROOM CREEK – SECURE GEOLOGIC STORAGE  
MERCER, MORTON, & OLIVER COUNTIES, NORTH DAKOTA**

**STORAGE AGREEMENT  
TB LEINGANG BROOM CREEK – SECURE GEOLOGIC STORAGE  
MERCER, MORTON, & OLIVER COUNTIES, NORTH DAKOTA**

**THIS AGREEMENT** (“Agreement”) is entered into as of the \_\_\_\_ day of \_\_\_\_\_, 20\_\_, by the parties who have signed the original of this instrument, a counterpart thereof, ratification and joinder or other instrument agreeing to become a Party hereto.

**RECITALS:**

A. It is in the public interest to promote the geologic storage of carbon dioxide in a manner which will benefit the state and the global environment by reducing greenhouse gas emissions and in a manner which will help ensure the viability of the state's coal and power industries, to the economic benefit of North Dakota and its citizens;

B. To further geologic storage of carbon dioxide, a potentially valuable commodity, may allow for its ready availability if needed for commercial, industrial, or other uses, including enhanced recovery of oil, gas, and other minerals; and

C. For geologic storage, however, to be practical and effective it requires cooperative use of surface and subsurface property interests and the collaboration of property owners, which may require procedures that promote, in a manner fair to all interests, cooperative management, thereby ensuring the maximum use of natural resources.

**AGREEMENT:**

It is agreed as follows:

**ARTICLE 1  
DEFINITIONS**

As used in this Agreement:

1.1 **Carbon Dioxide** means carbon dioxide in gaseous, liquid, or supercritical fluid state together with incidental associated substances derived from the source materials, capture

process and any substances added or used to enable or improve the injection process.

1.2 **Commission** means the North Dakota Industrial Commission (NDIC) acting by and through the Department of Mineral Resources.

1.3 **Effective Date** is the time and date this Agreement becomes effective as provided in Article 14.

1.4 **Facility Area** is the land described by Tracts in Exhibit “B” and shown on Exhibit “A” containing 29,444.72 acres, more or less.

1.5 **Party** is any individual, corporation, limited liability company, partnership, association, receiver, trustee, curator, executor, administrator, guardian, tutor, fiduciary, or other representative of any kind, any department, agency, or instrumentality of the state, or any governmental subdivision thereof, or any other entity capable of holding an interest in the Storage Reservoir.

1.6 **Pore Space** means a cavity or void, whether natural or artificially created, in any subsurface stratum.

1.7 **Pore Space Interest** is a right to or interest in the Pore Space in any Tract within the boundaries of the Facility Area.

1.8 **Pore Space Owner** is a Party hereto who owns Pore Space Interest.

1.9 **Storage Equipment** is any personal property, lease, easement, and well equipment, plants and other facilities and equipment for use in Storage Operations.

1.10 **Storage Expense** is all costs, expense or indebtedness incurred by the Storage Operator pursuant to this Agreement for or on account of Storage Operations.

1.11 **Storage Facility** is the unitized or amalgamated Storage Reservoir created pursuant to an order of the Commission.

1.12 **Storage Facility Participation** is the percentage shown on Exhibit “C” for allocating payments for use of the Pore Space under each Tract identified in Exhibit “B”.

1.13 **Storage Operations** are all operations conducted by the Storage Operator pursuant to this Agreement or otherwise authorized by any lease covering any Pore Space Interest.

1.14 **Storage Operator** is the person or entity named in Section 4.1 of this Agreement.

1.15 **Storage Reservoir** consists of the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW¼ of the NE¼, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208 miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining

Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

1.16 **Storage Rights** are the rights to explore, develop, and operate lands within the Facility Area for the storage of Storage Substances.#

1.17 **Storage Substances** are Carbon Dioxide and incidental associated substances, fluids, and minerals.

1.18 **Tract** is the land described as such and given a Tract number in Exhibit “B.”

1.19 **Transfer Storage Facility** has the meaning given such term in Section 3.7 of this Agreement.

## **ARTICLE 2 EXHIBITS**

2.1 **Exhibits.** The following exhibits, which are attached hereto, are incorporated herein by reference:

2.1.1 Exhibit “A” is a map that shows the boundary lines of the TB Leingang Broom Creek Facility Area and the tracts therein;

2.1.2 Exhibit “B” is a schedule that describes the acres of each Tract in the TB Leingang Broom Creek Facility Area;

2.1.3 Exhibit “C” is a schedule that shows the Storage Facility Participation of each Tract; and

2.1.4 Exhibit “D” is a form of Pore Space Lease.

2.2 **Reference to Exhibits.** When reference is made to an exhibit, it is to the exhibit as originally attached or, if revised, to the last revision.

2.3 **Exhibits Considered Correct.** Exhibits “A,” “B,” “C” and “D” shall be considered to be correct until revised as herein provided.

2.4 **Correcting Errors.** The shapes and descriptions of the respective Tracts have been established by using the best information available. If it subsequently appears that any Tract, mathematical miscalculation or clerical error has been made, Storage Operator, with the approval of Pore Space Owners whose interest is affected, shall correct the mistake by revising the exhibits to conform to the facts. The revision shall not include any re-evaluation of engineering or geological interpretations used in determining Storage Facility Participation. Each such revision of an exhibit made prior to thirty (30) days after the Effective Date shall be effective as of the Effective Date. Each such revision thereafter made shall be effective at 7:00 a.m. on the first day of the calendar month next following the filing for record of the revised exhibit or on such other date as may be determined by Storage Operator and set forth in the revised exhibit.

2.5 **Filing Revised Exhibits.** If an exhibit is revised, Storage Operator shall execute an appropriate instrument with the revised exhibit attached and file the same for record in the county or counties in which this Agreement or memorandum of the same is recorded and shall also file the amended changes with the Commission.

### **ARTICLE 3 CREATION AND EFFECT OF STORAGE FACILITY**

3.1 **Unleased Pore Space Interests.** Any Pore Space Owner in the Storage Facility who owns a Pore Space Interest in the Storage Reservoir that is not leased for the purposes of this Agreement and during the term hereof, shall be treated as if it were subject to the Pore Space Lease attached hereto as Exhibit "D".

3.2 **Amalgamation of Pore Space.** All Pore Space Interests in and to the Tracts are hereby amalgamated and combined insofar as the respective Pore Space Interests pertain to the Storage Reservoir, so that Storage Operations may be conducted with respect to said Storage Reservoir as if all of the Pore Space Interests in the Facility Area had been included in a single lease executed by all Pore Space Owners, as lessors, in favor of Storage Operator, as lessee and as

if the lease contained all of the provisions of this Agreement.

3.3 **[Reserved.]**

3.4 **Continuation of Leases and Term Interests.** Injection in to any part of the Storage Reservoir, or other Storage Operations, shall be considered as injection in to or upon each Tract within said Storage Reservoir, and such injection or operations shall continue in effect as to each lease as to all lands and formations covered thereby just as if such operations were conducted on and as if a well were injecting in each Tract within said Storage Reservoir.

3.5 **Titles Unaffected by Storage.** Nothing herein shall be construed to result in the transfer of title of the Pore Space Interest of any Party hereto to any other Party or to Storage Operator.

3.6 **Injection Rights.** Storage Operator is hereby granted the right to inject into the Storage Reservoir any Storage Substances in whatever amounts Storage Operator may deem expedient for Storage Operations, together with the right to drill, use, and maintain injection wells in the Facility Area, and to use for injection purposes.

3.7 **Transfer of Storage Substances from Storage Facility.** Storage Operator may transfer from the Storage Facility any Storage Substances, in whatever amounts Storage Operator may deem expedient for Storage Operations, to any other reservoir, subsurface stratum or formation permitted by the Commission for the storage of carbon dioxide under Chapter 38-22 of the North Dakota Century Code (a "Transfer Storage Facility"), *provided that*, the Pore Space ownership between the Storage Facility and Transfer Storage Facility is common.

3.8 **Receipt of Storage Substances.** Storage Operator may accept and receive into the Storage Facility any Storage Substances, in whatever amounts Storage Operator may deem expedient for Storage Operations, being stored in any other Transfer Storage Facility, *provided*

*that*, the Pore Space ownership between the Storage Facility and Transfer Storage Facility is common.

3.9 **Royalty Payments Upon Transfer.** The transfer or receipt of Storage Substances to or from a Transfer Storage Facility in accordance with Section 3.7 and Section 3.8 shall be disregarded for the purposes of calculating the royalty under any lease covering a Pore Space Interest (including Exhibit “D”) and shall not affect the allocation of Storage Substances injected into the Storage Facility through the surface of the Facility Area in accordance with Article 6 of this Agreement.

3.10 **Cooperative Agreements.** Storage Operator may enter into cooperative agreements with respect to lands adjacent to the Facility Area for the purpose of coordinating Storage Operations. Such cooperative agreements may include, but shall not be limited to, agreements regarding the transfer and receipt of Storage Substances pursuant to Sections 3.7 and 3.8 of this Agreement.

3.11 **Border Agreements.** Storage Operator may enter into an agreement or agreements with owners of adjacent lands with respect to operations which may enhance the injection of the Storage Substances in the Storage Reservoir in the Facility Area or which may otherwise be necessary for the conduct of Storage Operations.

## **ARTICLE 4 STORAGE OPERATIONS**

4.1 **Storage Operator.** Summit Carbon Storage #1, LLC is hereby designated as the initial Storage Operator. Storage Operator shall have the exclusive right to conduct Storage Operations, which shall conform to the provisions of this Agreement and any lease covering a Pore Space Interest. If there is any conflict between such agreements, this Agreement shall govern.

4.2 **Successor Operators.** The initial Storage Operator and any subsequent operator may, at any time, transfer operatorship of the Storage Facility with and upon the approval of the

Commission.

4.3 **Method of Operation.** Storage Operator shall engage in Storage Operations with diligence and in accordance with good engineering and injection practices.

4.4 **Change of Method of Operation.** As permitted by the Commission nothing herein shall prevent Storage Operator from discontinuing or changing in whole or in part any method of operation which, in its opinion, is no longer in accord with good engineering or injection practices. Other methods of operation may be conducted or changes may be made by Storage Operator from time to time if determined by it to be feasible, necessary or desirable to increase the injection or storage of Storage Substances.

## **ARTICLE 5 TRACT PARTICIPATIONS**

5.1 **Tract Participations.** The Storage Facility Participation of each Tract is shown in Exhibit “C.” The Storage Facility Participation of each Tract shall be based 100% upon the ratio of surface acres in each Tract to the total surface acres for all Tracts within the Facility Area.

5.2 **Relative Storage Facility Participations.** If the Facility Area is enlarged or reduced, the revised Storage Facility Participation of the Tracts remaining in the Facility Area and which were within the Facility Area prior to the enlargement or reduction shall remain in the same ratio to one another.

## **ARTICLE 6 ALLOCATION OF STORAGE SUBSTANCES**

6.1 **Allocation of Tracts.** All Storage Substances injected shall be allocated to the several Tracts in accordance with the respective Storage Facility Participation effective during the period that the Storage Substances are injected. The amount of Storage Substances allocated to each tract, regardless of whether the amount is more or less than the actual injection of Storage Substances from the well or wells, if any, on such Tract, shall be deemed for all purposes to have

been injected into such Tract. Storage Substances transferred or received pursuant to Sections 3.7 and 3.8 of this Agreement shall be disregarded for the purposes of this Section 6.1.

6.2 **Distribution within Tracts.** The Storage Substances injected and allocated to each Tract shall be distributed among, or accounted for to the Pore Space Owners who own a Pore Space Interest in such Tract in accordance with each Pore Space Owner's Storage Facility Participation effective during the period that the Storage Substances were injected. If any Pore Space Interest in a Tract hereafter becomes divided and owned in severalty as to different parts of the Tract, the owners of the divided interests, in the absence of an agreement providing for a different division, shall be compensated for the storage of the Storage Substances in proportion to the surface acreage of their respective parts of the Tract. Subject to Section 3.9, Storage Substances transferred or received pursuant to Sections 3.7 and 3.8 of this Agreement shall be disregarded for the purposes of this Section 6.2.

## **ARTICLE 7 TITLES**

7.1 **Injection When Title Is in Dispute.** If the title or right of any Pore Space Owner claiming the right to receive all or any portion of the proceeds for the storage of any Storage Substances allocated to a Tract is in dispute, Storage Operator shall require that the Pore Space Owner to whom the proceeds thereof are paid to furnish security for the proper accounting thereof to the rightful Pore Space Owner, if the title or right of such Pore Space Owner fails in whole or in part.

7.2 **Payments of Taxes to Protect Title.** The owner of surface rights to lands within the Facility Area is responsible for the payment of any *ad valorem* taxes on all such rights, interests or property, unless such owner and the Storage Operator otherwise agree. If any *ad valorem* taxes are not paid by or for such owner when due, Storage Operator may at any time prior to tax sale or

expiration of period of redemption after tax sale, pay the tax, redeem such rights, interests or property, and discharge the tax lien. Storage Operator shall, if possible, withhold from any proceeds derived from the storage of Storage Substances otherwise due any Pore Space Owner who is a delinquent taxpayer up to an amount sufficient to defray the costs of such payment or redemption; *provided* that such withholding to be credited to the Storage Operator. Such withholding shall be without prejudice to any other remedy available to Storage Operator.

7.3 **Pore Space Interest Titles.** If title to a Pore Space Interest fails, but the tract to which it relates is not removed from the Facility Area, the Party whose title failed shall not be entitled to share under this Agreement with respect to that interest.

## **ARTICLE 8 EASEMENTS OR USE OF SURFACE**

8.1 **No Surface Occupancy.** Unless agreed to in writing with the owner of the surface estate, Operator shall not place any surface facilities on the surface estate owned by any Pore Space Owner within the boundaries of the Facility Area. For the purpose of this Agreement, “surface facilities” shall include, but not be limited to, wellsites, pipelines, powerlines, valves or other above-ground facilities.

8.2 **Grant of Easement.** Subject to Section 8.1, Storage Operator shall have the right to use as much of the surface of the land within the Facility Area as may be reasonably necessary for Storage Operations and the injection of Storage Substances.

8.3 **Use of Water.** Storage Operator shall have and is hereby granted free use of water from the Facility Area for Storage Operations, except water from any well, lake, pond or irrigation ditch of a Pore Space Owner; notwithstanding the foregoing, Storage Operator may access any well, lake, or pond as provided in Exhibit “D”.

8.4 **Surface Damages.** Storage Operator shall pay surface owners for damage to growing crops, timber, fences, improvements, and structures located on the Facility Area that result from Storage Operations.

8.5 **Surface and Sub-Surface Operating Rights.** Subject to Section 8.1, Storage Operator shall have the same rights to use the surface and sub-surface and use of water and any other rights granted to Storage Operator in any lease covering Pore Space Interests. Except to the extent expanded by this Agreement or the extent that such rights are common to the effected leases, the rights granted by a lease may be exercised only on the land covered by that lease. Storage Operator will to the extent possible minimize surface impacts.

## **ARTICLE 9 ENLARGEMENT OF STORAGE FACILITY**

9.1 **Enlargement of Storage Facility.** The Storage Facility may be enlarged from time to time to include acreage and formations reasonably proven to be geologically capable of storing Storage Substances. Any expansion must be approved in accordance with the rules and regulations of the Commission.

9.2 **Determination of Tract Participation.** Storage Operator, subject to Section 5.2, shall determine the Storage Facility Participation of each Tract within the Storage Facility as enlarged, and shall revise Exhibits “A”, “B” and “C” accordingly and in accordance with the rules, regulations and orders of the Commission.

9.3 **Effective Date.** The effective date of any enlargement of the Storage Facility shall be effective as determined by the Commission.

## **ARTICLE 10 TRANSFER OF TITLE**

10.1 **Transfer of Title.** Any conveyance of all or part of any interest owned by any Party hereto with respect to any Tract shall be made expressly subject to this Agreement. No

change of title shall be binding upon Storage Operator, or any Party hereto other than the Party so transferring, until 7:00 a.m. on the first day of the calendar month following thirty (30) days from the date of receipt by Storage Operator of a photocopy, or a certified copy, of the recorded or filed instrument evidencing such a change in ownership.

## **ARTICLE 11 RELATIONSHIP OF PARTIES**

11.1 **No Partnership.** The duties, obligations and liabilities arising hereunder shall be several and not joint or collective. This Agreement is not intended to create, and shall not be construed to create, an association or trust, or to impose a partnership duty, obligation or liability with regard to any one or more of the Parties hereto. Each Party hereto shall be individually responsible for its own obligations as herein provided.

11.2 **No Joint Marketing.** This Agreement is not intended to provide, and shall not be construed to provide, directly or indirectly, for any joint marketing of Storage Substances.

11.3 **Pore Space Owners Free of Costs.** This Agreement is not intended to impose, and shall not be construed to impose, upon any Pore Space Owner any obligation to pay any Storage Expense unless such Pore Space Owner is otherwise so obligated.

11.4 **Information to Pore Space Owners.** Each Pore Space Owner shall be entitled to all information in possession of Storage Operator to which such Pore Space Owner is entitled by an existing lease or a lease imposed by this Agreement.

## **ARTICLE 12 LAWS AND REGULATIONS**

12.1 **Laws and Regulations.** This Agreement shall be subject to all applicable federal, state and municipal laws, rules, regulations and orders.

## **ARTICLE 13 FORCE MAJEURE**

13.1 **Force Majeure.** All obligations imposed by this Agreement on each Party, except for the payment of money, shall be suspended while compliance is prevented, in whole or in part, by a labor dispute, fire, war, civil disturbance, or act of God; by federal, state or municipal laws; by any rule, regulation or order of a governmental agency; by inability to secure materials; or by any other cause or causes, whether similar or dissimilar, beyond reasonable control of the Party. No Party shall be required against their will to adjust or settle any labor dispute. Neither this Agreement nor any lease or other instrument subject hereto shall be terminated by reason of suspension of Storage Operations due to any one or more of the causes set forth in this Article.

## **ARTICLE 14 EFFECTIVE DATE**

14.1 **Effective Date.** This Agreement shall become effective as determined by the Commission.

14.2 **Certificate of Effectiveness.** Storage Operator shall file for record in the county or counties in which the land affected is located a certificate stating the Effective Date of this Agreement.

## **ARTICLE 15 TERM**

15.1 **Term.** Unless sooner terminated in the manner hereinafter provided or by order of the Commission, this Agreement shall remain in full force and effect until the Commission has issued a certificate of project completion with respect to the Storage Facility in accordance with § 38-22-17 of the North Dakota Century Code.

15.2 **Termination by Storage Operator.** This Agreement may be terminated at any time by the Storage Operator with the approval of the Commission.

15.3 **Effect of Termination.** Upon termination of this Agreement all Storage Operations shall cease. Each lease and other agreement covering Pore Space within the Facility Area shall remain in force for ninety (90) days after the date on which this Agreement terminates, and for such further period as is provided by Exhibit “D” or other agreement.

15.4 **Salvaging Equipment Upon Termination.** If not otherwise granted by Exhibit “D” or other instruments affecting each Tract, Pore Space Owners hereby grant Storage Operator a period of six (6) months after the date of termination of this Agreement within which to salvage and remove Storage Equipment.

15.5 **Certificate of Termination.** Upon termination of this Agreement, Storage Operator shall file for record in the county or counties in which the land affected is located a certificate that this Agreement has terminated, stating its termination date.

## **ARTICLE 16 APPROVAL**

16.1 **Original, Counterpart or Other Instrument.** A Pore Space Owner may approve this Agreement by signing the original of this instrument, a counterpart thereof, ratification or joinder or other instrument approving this instrument hereto. The signing of any such instrument shall have the same effect as if all Parties had signed the same instrument.

16.2 **Approval by the North Dakota Industrial Commission.** Notwithstanding anything in this Article to the contrary, all Tracts within the Facility Area shall be deemed to be qualified for participation if this Agreement is duly approved by order of the Commission.

**ARTICLE 17**  
**GENERAL**

17.1 **Amendments Affecting Pore Space Owners.** Amendments hereto relating wholly to Pore Space Owners may be made with approval by the Commission.

17.4 **Construction.** This agreement shall be construed according to the laws of the State of North Dakota.

**ARTICLE 18**  
**SUCCESSORS AND ASSIGNS**

18.1 **Successors and Assigns.** This Agreement shall extend to, be binding upon, and inure to the benefit of the Parties hereto and their respective heirs, devisees, legal representatives, successors and assigns and shall constitute a covenant running with the lands, leases and interests covered hereby.

### Form of Pore Space Lease

Attached to and made part of the Storage Agreement  
TB Leingang Broom Creek – Secure Geological Storage  
Mercer, Morton & Oliver Counties, North Dakota

#  
#  
#  
#

### **PORE SPACE LEASE**

THIS PORE SPACE LEASE (this “Lease”) is made effective as of the Effective Date (as defined below) by and between \_\_\_\_\_,  
whose address is \_\_\_\_\_,  
(whether one or more, “Lessor”), and Summit Carbon Storage #1, LLC, a Delaware limited liability company, whose address is 2321 N. Loop Dr., Ames, IA 50010 (whether one or more, “Lessee”). Lessor and Lessee may be individually referred to herein as a “Party” and collectively as the “Parties”.

1. Leased Premises. Lessor, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, does hereby grant, demise, lease and let unto Lessee for Lessee’s geologic storage operations and other purposes set forth herein, the lands described and incorporated herein by reference in Exhibit A attached (the “Leased Premises”).

2. Term.

(a) Initial and Primary Term. This Lease shall commence on the date Lessee executes this Lease (“Effective Date”) and continue for an initial term of twenty (20) years (“Initial Term”) unless sooner terminated in accordance with the terms of this Lease. As consideration for the Initial Term, Lessee shall pay to Lessor TWENTY-FIVE and NO/100 DOLLARS (\$25.00) per acre as a single one-time bonus payment, and an annual rental of Four and No/100 Dollars (\$4.00) per acre on or before January 1 of each year of the Initial Term. The annual rental shall increase by TWO percent (2.0%) commencing on January 1, 2026 and on January 1 each year thereafter. The first year’s rental has been paid in full, the receipt and sufficiency of which is hereby acknowledged by Lessor. Lessee may, at any time prior to the expiration of the Initial Term, elect to extend the Initial Term for up to an additional twenty (20) years by providing written notice to Lessor and payment of One Hundred and No/100 Dollars (\$100.00) per acre (the Initial Term, together with all extensions shall be referred to herein as the “Primary Term”). For the avoidance of doubt, Lessor’s consent to any such extension will not be required provided that the foregoing payment is tendered to Lessor prior to the expiration of the Initial Term. Lessee shall pay to Lessor the annual rentals when due throughout the Primary Term; *provided, however*, Lessee shall not be liable to Lessor for annual rentals with respect to any portion of the Leased Premises which are or become subject to Permit as set forth in Section 2(b), below.

(b) Operational Term. This Lease shall continue beyond the Primary Term for so long as any portion of the Leased Premises or Lessee's storage facilities located in, on or under the Leased Premises (including without limitation, any Reservoirs) are subject to a permit issued by the North Dakota Industrial Commission (the "Commission") (a "Permit") or under the ownership or control of the State of North Dakota; *provided, however*, that all of Lessee's obligations under this Lease shall terminate upon issuance of a certificate of project completion pursuant to Chapter 38-22 of the North Dakota Century Code (the "Operational Term"). If the Primary Term expires and no portion of the Leased Premises or Lessee's storage facilities located in, on or under the Leased Premises is subject to a Permit, this Lease shall terminate, and Lessee shall execute a document evidencing termination of this Lease in recordable form and shall record it in the official records of the county in which the Leased Premises is located. As consideration for the Operational Term, Lessee shall pay to Lessor the royalty set forth in Section 3, below.

3. Royalty. Lessee shall pay to Lessor its proportionate share of FIFTY cents (\$0.50) per metric ton of carbon dioxide (CO<sub>2</sub>) injected into the reservoirs and subsurface pore spaces (as used herein, such terms shall have the meanings set forth in Chapter 38-22 and Chapter 47-31 of the North Dakota Century Code), stratum or strata underlying the Leased Premises (collectively, "Reservoirs"), or reservoirs and subsurface pore spaces, stratum or strata unitized or amalgamated therewith. The royalty shall increase TEN percent (10.0%) on January 1, 2026 and an additional TEN percent (10.0%) every five years thereafter, as outlined on attached Exhibit B. The quantity of CO<sub>2</sub> so injected shall be measured by meters installed by Lessee. Lessor's "proportionate share" shall be determined on a net acre basis and the Parties hereby stipulate that the acreage set forth in Section 1 shall be used to calculate Lessor's proportionate share. The quantity of CO<sub>2</sub> injected into the Reservoirs or any reservoirs or subsurface pore spaces, stratum or strata unitized or amalgamated therewith shall be determined through the use of metering equipment installed and operated by Lessee at the injection site. All royalties due hereunder for CO<sub>2</sub> injected into the Reservoirs or any reservoirs or subsurface pore spaces, stratum or strata unitized or amalgamated therewith during any calendar month shall be paid to Lessor annually on or before March 31<sup>st</sup> for the prior year's injection volumes. Lessor and Lessee agree that this Lease shall continue as specified herein even in the absence of injection operations and the payment of royalties.

4. Right to Pore Space/Storage of Carbon Dioxide. Lessor grants to Lessee the exclusive right to inject and store carbon dioxide (CO<sub>2</sub>) and other incidental gaseous substances into the Reservoirs, together with the right to construct, replace, inspect, repair, monitor, maintain, relocate, change the size of such surface or subsurface facilities on the Leased Premises that Lessee determines necessary or desirable for Lessee's storage operations, including, but not limited to fences, pipelines, tanks, reservoirs, electric and communication lines, roadways, underground facilities and equipment, surface facilities and equipment, buildings, structures and other such facilities and appurtenances. Lessor shall not grant any other person the right to inject or store CO<sub>2</sub> or any other incidental substances.

5. Facility Right of Ways/Compensation. Lessor grants Lessee the right of reasonable use of the surface of the Leased Premises, including without limitation, the rights of ingress and egress over the Leased Premises together with the right of way over, under and across the Leased Premises and the right from time to time to construct, replace, inspect, repair, monitor, maintain, relocate, change the size of such surface or subsurface facilities on the Leased Premises that Lessee determines necessary or desirable for Lessee's storage operations, including, but not limited to fences, pipelines, tanks, reservoirs, electric and communication lines, roadways, underground facilities and equipment, surface facilities and equipment, buildings, structures and other such facilities and appurtenances, (each a "Facility" and collectively the "Facilities"); *provided, however,* that (i) Lessee shall provide Lessor with notice of operations and an offer of damage, disruption and loss of production payments, as each may be applicable, prior to the installation of any such Facilities on the Leased Premises, and (ii) the agreed up terms, including the amount of damage payments to be paid to Lessor, shall be memorialized in an agreement separate from this Lease, such agreement to be consistent with the grant contained herein. Lessee shall be entitled to proceed with the installation of the Facilities while the separate agreement and amount of damage, disruption or loss is being agreed or determined. Lessee shall have the further right to fence the perimeter of any Facility on the Leased Premises and sufficiently illuminate the site for the safety and security of operations.

6. Amalgamation. Lessee, in its sole discretion, shall have the right and power, at any time and from time to time during the term of this Lease to pool, unitize, or amalgamate any reservoirs or subsurface pore spaces, stratum or strata underlying the Leased Premises with any other lands or interests into which such reservoirs or subsurface pore spaces extend and document such unit in accordance with applicable law or agency order. Amalgamated units shall be of such shape and dimensions as Lessee may elect and as are approved by the Commission. Amalgamated areas may include, but are not required to include, land upon which injection or extraction wells have been completed or upon which the injection and/or withdrawal of carbon dioxide and/or related gaseous substances has commenced prior to the effective date of amalgamation. In exercising its amalgamation rights under this Lease and if required by law, Lessee shall record or cause to be recorded a copy of the Commission's amalgamation order or other notice thereof in the county in which the amalgamated unit is located. Amalgamating in one or more instances shall, if approved by the Commission, not exhaust the rights of Lessee to amalgamate Reservoirs or portions of Reservoirs into other amalgamation areas, and Lessee shall have the recurring right to revise any amalgamated area formed under this Lease by expansion or contraction or both. Lessee may dissolve any amalgamated area at any time and document such dissolution by recording an instrument in accordance with applicable law or agency order. Lessee shall have the right to negotiate, on behalf of and as agent for Lessor, any unit, amalgamation, storage or operating agreements with respect to amalgamation of reservoir or pore space interests underlying the Leased Premises or the operation of any amalgamated areas formed under such agreements. To the extent any of the terms of such agreements conflict with the terms of this Lease, the terms of such agreements shall control, and the provisions of this Lease shall be deemed modified to conform to the terms, conditions, and provisions of any such agreements which are approved by the Commission.

7. Lessee Obligations. Lessee shall have no obligation, express or implied, to begin, prosecute or continue storage operations in, upon or under the Leased Premises, or store and/or sell or use all or any portion of the gaseous substances stored thereon. The timing, nature, manner and extent of Lessee's operations, if any, under this Lease shall be at the sole discretion of Lessee. All obligations of Lessee are expressed herein, and there shall be no covenants implied under this Lease, it being agreed that all amounts paid hereunder constitute full and adequate consideration for this Lease.

8. Ownership. Lessee shall at all times be the owner of (i) the carbon dioxide (CO<sub>2</sub>) and other gaseous substances stored in the Reservoirs or any reservoirs or subsurface pore spaces, stratum or strata unitized or amalgamated therewith, and (ii) all equipment, buildings, structures, facilities and other property constructed or installed by Lessee on the Leased Premises. Lessee shall have the right, but not the obligation, at any time during this Lease to remove all or any portion of the property or fixtures placed by Lessee on the Lease Premises. Notwithstanding the foregoing, title to the storage facility and to the stored CO<sub>2</sub> or other gaseous substances shall be transferred to the State of North Dakota upon issuance of a certificate of project completion by the Commission in accordance with Chapter 38-22 of the North Dakota Century Code.

9. Minerals, Oil and Gas. This Lease is not intended to grant or convey, nor does it grant or convey, any right to or obligation for Lessee to explore for or produce minerals, including oil and gas, that may exist on or under the Leased Premises.

10. Surrender of Leased Premises. Lessee shall have the right, but not the obligation, at any time from time to time to execute and deliver to Lessor a surrender and/or release covering all or any part of the Leased Premises for which the Reservoirs are not being utilized for storage as set forth herein, and upon delivery of such surrender and/or release to Lessor this Lease shall terminate as to such lands, and Lessee shall be released from all further obligations and duties as to the lands so surrendered and/or released, including, without limitation, any obligation to make payments provided for herein, except obligations accrued as of the date of the surrender and/or release. Lessee shall be able to surrender the any and or all of the Leased Premises if not utilizing the Reservoirs located thereunder.

11. Hold Harmless and Indemnification. The Lessee agrees to defend, indemnify, and hold harmless Lessor from any claims by any person that are a direct result of the Lessee's use of the Leased Premises or Reservoirs. Notwithstanding the foregoing, such indemnity/hold harmless obligation excludes (i) any claim or cause of action, or alleged or threatened claim or cause of action, damage, judgment, interest, penalty or other loss arising or resulting from the negligence or intentional acts of Lessor or Lessor's agents, invitees, or licensees; or third parties, and (ii) any claim for exemplary, punitive, special or consequential damages claimed by Lessor. Lessee further accepts liability and indemnifies Lessor for reasonable costs, expenses and attorneys' fees incurred in establishing and litigating the indemnification coverage provided above. The legal defense provided by Lessee to the Lessor under this paragraph must be free of any conflicts of interest even if this requires Lessee to retain separate legal counsel for Lessor.

12. Hazardous Substances. Lessee shall have no liability for any regulated hazardous substances located on the Leased Premises prior to the Effective Date or placed in, on or about the Leased Premises by Lessor or any third-party on or after the Effective Date, and nothing in this Lease shall be construed to impose upon Lessee any obligation for the removal of such regulated hazardous substances. As used herein, “hazardous substances” shall have the meaning set forth in the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) and any amendments thereto, or any other local, state or federal statutes.

13. Termination. A material violation or default of any terms of this Lease by Lessee shall be grounds for termination of the Lease. Lessor shall give Lessee written notice of violation or default and Lessee shall have sixty (60) days after receipt of said notice to substantially cure such violations or defaults. If Lessee fails to substantially cure such violations or defaults within the 60-day cure period, Lessor may terminate the Lease; provided that if it is not possible to cure such violations or defaults within the 60-day cure period, Lessee shall have a reasonable longer period of time to cure such violations or defaults provided it commences cure within the initial 60-day cure period and thereafter diligently pursues such cure. Lessee may terminate the lease with thirty (30) days written notice to Lessor. Upon termination of this Lease, Lessee shall have one hundred eighty (180) days to remove all facilities and property of Lessee located on the Leased Premises. For the avoidance of doubt, Lessee shall not be required to remove any CO<sub>2</sub> or other incidental gaseous substances injected into the Reservoirs.

14. Taxes. Lessee shall pay all taxes, if any, levied against its personal property or on its improvements to the Leased Premises. Lessor shall pay for all real estate taxes and other assessments levied upon the Leased Premises. Lessee shall have the right to pay all taxes, assessments and other fees on behalf of Lessor and to deduct the amount so paid from other payments due to Lessor hereunder.

15. Conduct of Operations. In conducting its operations hereunder, Lessee shall use its best efforts to comply with all applicable laws, rules and regulations and ordinances pertaining thereto. Lessee reserves and shall have the right to challenge and/or appeal any law, ruling, regulation, order or other determination and to carry on its operations in accordance with Lessee’s interpretation of the same, pending final determination.

16. Force Majeure. Should Lessee be prevented from complying with any express or implied covenant of this Lease or from utilizing the Lease Premises for underground storage purposes by reason of scarcity of or an inability to obtain or to use equipment or material or failure or breakdown of equipment, or by operation of force majeure, any federal or state law or any order, rule or regulation of governmental authority, then while so prevented, Lessee's obligation to comply with such covenant shall be suspended and the primary term of this Lease shall be extended while and so long as Lessee is prevented by any such cause from utilizing the property for underground storage purposes and the time while Lessee is so prevented shall not be counted against Lessee, anything in this Lease to the contrary notwithstanding.

17. Surface Damage Compensation. The bonus and royalty amounts contemplated and paid to Lessor hereunder is compensation for, among other things, damages sustained by Lessor for lost land value, lost use of and access to Lessor's land and lost value of improvements, if any and to the extent applicable. Subject to Lessee's obligation to compensate Lessor for the installation of any Facilities on the Leased Premises pursuant to Section 5 of this Agreement, Lessor agrees that such compensation is just and adequate for any and all such damages and all other damages which Lessor may sustain as a result of Lessee's use of the property for its storage operations.

18. Quiet Enjoyment. Lessor hereby agrees that Lessee, at its option, shall have the right to discharge any tax, mortgage, or other lien upon the Leased Premises, and in the event Lessee does so, Lessee shall be subrogated to such lien with the right to enforce the same and apply royalty payments or any other payments due to Lessor toward satisfying the same.

Lessor warrants that, except as disclosed to Lessee in writing, there are no liens, encumbrances, leases, mortgages, deeds of trust, options, or other exceptions to Lessor's fee title ownership of the Leased Premises (collectively, "Liens") which are not recorded in the public records of the County in which the Leased Premises is located. Lienholders (including tenants), whether or not their Liens are recorded, shall be Lessor's responsibility, and Lessor shall cooperate with Lessee to obtain a non-disturbance agreement from each party that holds a Lien (recorded or unrecorded) that might interfere with Lessee's rights under this Lease. A non-disturbance agreement is an agreement between Lessee and a lienholder which provides that the lienholder shall not disturb Lessee's possession or rights under the Lease or terminate this Lease so long as Lessor is not entitled to terminate this Lease under the provisions hereof.

Lessor shall have the quiet use and enjoyment of the Leased Premises in accordance with the terms of this Lease. Lessor's activities and any grant of rights Lessor makes to any person or entity, whether located on the Leased Premises or elsewhere, shall not, currently or prospectively, materially interfere with activities permitted hereunder. If Lessor has any right to select, determine, prohibit or control the location of sites for drilling, exploitation, production and/or exploration of minerals, hydrocarbons, water, gravel, or any other similar resource in, to or under the Lease Premises, then Lessor shall exercise such right so as to minimize interference with any of the foregoing.

19. Environmental Incentives and Tax Credits. Lessee shall be the owner of (i) any and all credits, benefits, emissions reductions, offsets, and allowances, howsoever entitled, attributable to Lessee's geologic storage operations, including any avoided emissions and the reporting rights related to these avoided emissions, such as 26 U.S.C. §45Q Tax Credits, and any other attributes of Lessee's ownership of the Facilities and Lessee's geologic storage operations ("Environmental Attributes"), and (ii) any and all credits, rebates, subsidies, payments or other incentives that relate to the use of technology incorporated into Lessee's geologic storage operations, environmental benefits of such operations, or other similar programs available from any regulated entity or any governmental authority ("Environmental Incentives"). Lessee is further entitled to the benefit of any and all (a) investment tax credits, (b) production tax credits, (c) credits under 26 U.S.C. §45Q credits, and (d) similar tax credits or grants under federal, state or local law relating to Lessee's geologic storage operations ("Tax Credits"). Lessor shall (i) cooperate with Lessee in obtaining, securing and transferring all Environmental Attributes and Environmental Incentives and the benefit of all Tax Credits, and (ii) shall allow Lessee to take any actions necessary to install additional equipment on the Facilities to comply with all monitoring and reporting obligations,

and allow Lessee's personnel to enter the premises and collect any data Lessee requires to satisfy its obligations required in connection with obtaining Tax Credits and Environmental Attributes. Lessor shall not be obligated to incur any out-of-pocket costs or expenses in connection with such actions unless reimbursed by Lessee. If any Environmental Incentives are paid directly to Lessor, Lessor shall immediately pay such amounts over to Lessee.

20. Assignment. The rights of either Party hereto may be assigned in whole or part. The assigning party shall provide written notice of any assignment within sixty (60) days after such assignment has become effective; *provided, however*, that an assigning party's failure to deliver written notice of assignment within such 60-day period shall not be deemed a breach of this Lease unless such failure is willful and intentional. The Lessor's consent shall not be required for an assignment by the Lessee of this Lease, whether by way of a collateral assignment to its financiers or otherwise.

21. Change of Ownership. No change of ownership in the Leased Premises shall be binding on the Lessee for purpose of making payments to Lessor hereunder until the date Lessor, or Lessor's successors or assigns, furnishes Lessee the recorded original or a certified copy of the instrument evidencing the change in ownership. The Lessor's consent shall not be required for a change in the direct or indirect control of the Lessee.

22. Notices. All notices required to be given under this Lease shall be in writing and addressed to the respective Party at the addresses set forth at the beginning of this Lease unless otherwise directed by either Party.

23. No Waiver. The failure of either Party to insist in any one or more instances upon strict performance of any of the provisions of this Lease or to take advantage of any of its rights hereunder shall not be construed as a waiver of any such provision or the relinquishment of any such rights, but the same shall continue and remain in full force and effect.

24. Notice of Lease. This Lease shall not be recorded in the real property records. Lessee shall cause a memorandum of this Lease to be recorded in the real property records of the county in which the Leased Premises are situated.

25. [Reserved.]

26. Counterparts. This Lease may be executed in any number of counterparts, each of which, when executed and delivered, shall be an original, but all of which shall collectively constitute one and the same instrument.

27. Severability. If any provision of this Lease is found to be invalid, illegal, or unenforceable in any respect, such provision shall be deemed to be severed from this Agreement, and the validity, legality and enforceability of the remaining provisions contained herein shall not in any way be affected or impaired thereby.

28. Governing Law. This Lease shall be governed by, construed, and enforced in accordance with the laws of the State of North Dakota and the Parties hereby submit to the jurisdiction of the state or federal courts located in the State of North Dakota.

29. Further Assurances. Each Party will execute and deliver all documents, provide all information, and take or forbear from all actions as may be necessary or appropriate to achieve the purposes of this Lease, including without limitation executing a memorandum of this Lease and all documents required to obtain any necessary government approvals.

30. Entire Agreement. This Lease constitutes the entire agreement between the Parties and supersedes all prior negotiations, undertakings, notices, memoranda and agreement between the Parties, whether oral or written, with respect to the subject matter hereof. This Lease may only be amended or modified by a written agreement duly executed by Lessor and Lessee.

31. Cooperation with Financiers. The Lessor hereby acknowledges and consents that Lessee may grant a collateral assignment or leasehold mortgage of Lessee's rights under this Lease to Lessee's debt financiers, it being understood that such collateral assignment or leasehold mortgage would only encumber the leasehold interest created hereunder.

32. Favored Nations. If, at any time within the twelve (12) month period following the Effective Date, Lessee enters into a pore space lease agreement with a third party landowner covering any part of Lessee's storage facility ("Third-Party Lease"), and if any of the payments specified in the Third-Party Lease would have been more favorable to Lessor had Lessor executed a lease agreement similar to the Third-Party Lease, then Lessor and Lessee will amend this Lease so that it reflects compensation terms similar to the Third-Party Lease, and Lessee will pay to Lessor the additional compensation, if any, that Lessor would have been paid had Lessor signed a lease agreement similar to the Third-Party Lease. For the purposes of this Section 32, "Lessee's storage facility" shall mean any storage facility (as such term is defined in ch. 38-22 of the North Dakota Century Code) operated by Lessee within a ten (10) mile radius of the Leased Premises which is subject to a permit is issued by the Commission pursuant to ch. 38-22 of the North Dakota Century Code.

33. Electronic Signatures. This Lease, and any amendments hereto, to the extent signed and delivered by means of electronic transmission in portable document format (pdf) or by DocuSign or similar electronic signature process, shall be treated in all manner and respects as an original contract and shall be considered to have the same binding legal effect as if it were the original signed version thereof delivered in person.

34. Insurance. Lessee shall obtain and maintain in force commercial general liability insurance covering the Facilities and Lessee's activities on the Leased Premises at all times during the term of this Lease, with a minimum occurrence and aggregate limit of one million dollars (\$1,000,000). Such insurance coverage for the Facilities and Leased Premises may be provided as part of a blanket policy that covers other Facilities or properties as well. Any such policies shall include Lessor as an additional insured. Lessee, or its insurer, shall provide thirty (30) days prior written notice (except ten (10) days for nonpayment of premium) to Lessor of any cancellation. Lessee shall provide Lessor with copies of certificates of insurance evidencing this coverage upon request by Lessor. The policy shall be endorsed or include a provision waiving insurer rights of subrogation against Lessor.

IN WITNESS WHEREOF, the Parties have executed this Lease effective for all purposes as of the Effective Date.

**Royalty Escalation Provision**

This Lease is subject to a Royalty Escalation. The royalty shall increase TEN percent (10.0%) on January 1, 2026, and an additional TEN percent (10.0%) every five years thereafter. For the avoidance of doubt, the royalty to be paid is calculated below:

Date: _____	Royalty Rate: _____
Beginning January 1, 2026	\$0.550
Beginning January 1, 2031	\$0.605
Beginning January 1, 2036	\$0.666
Beginning January 1, 2041	\$0.733
Beginning January 1, 2046	\$0.806
Beginning January 1, 2051	\$0.887
Beginning January 1, 2056	\$0.976
Beginning January 1, 2061	\$1.074
Beginning January 1, 2066	\$1.181
Beginning January 1, 2071	\$1.299
Beginning January 1, 2076	\$1.429

**STORAGE AGREEMENT**  
**~~SCS #1~~TB LEINGANG BROOM CREEK – SECURE GEOLOGIC STORAGE**  
**MERCER, MORTON, & OLIVER COUNTIES, NORTH DAKOTA**

**STORAGE AGREEMENT**  
**~~SCS #1~~ TB Leingang BROOM CREEK – SECURE GEOLOGIC STORAGE**  
**MERCER, MORTON, & OLIVER COUNTIES, NORTH DAKOTA**

**THIS AGREEMENT** (“Agreement”) is entered into as of the \_\_\_\_ day of \_\_\_\_\_, 20\_\_, by the parties who have signed the original of this instrument, a counterpart thereof, ratification and joinder or other instrument agreeing to become a Party hereto.

**RECITALS:**

A. It is in the public interest to promote the geologic storage of carbon dioxide in a manner which will benefit the state and the global environment by reducing greenhouse gas emissions and in a manner which will help ensure the viability of the state's coal and power industries, to the economic benefit of North Dakota and its citizens;

B. To further geologic storage of carbon dioxide, a potentially valuable commodity, may allow for its ready availability if needed for commercial, industrial, or other uses, including enhanced recovery of oil, gas, and other minerals; and

C. For geologic storage, however, to be practical and effective it requires cooperative use of surface and subsurface property interests and the collaboration of property owners, which may require procedures that promote, in a manner fair to all interests, cooperative management, thereby ensuring the maximum use of natural resources.

**AGREEMENT:**

It is agreed as follows:

**ARTICLE 1**  
**DEFINITIONS**

As used in this Agreement:

1.1 **Carbon Dioxide** means carbon dioxide in gaseous, liquid, or supercritical fluid

state together with incidental associated substances derived from the source materials, capture process and any substances added or used to enable or improve the injection process.

1.2 **Commission** means the North Dakota Industrial Commission (NDIC) acting by and through the Department of Mineral Resources.

1.3 **Effective Date** is the time and date this Agreement becomes effective as provided in Article 14.

1.4 **Facility Area** is the land described by Tracts in Exhibit “B” and shown on Exhibit “A” containing 29,444.72 acres, more or less.

1.5 **Party** is any individual, corporation, limited liability company, partnership, association, receiver, trustee, curator, executor, administrator, guardian, tutor, fiduciary, or other representative of any kind, any department, agency, or instrumentality of the state, or any governmental subdivision thereof, or any other entity capable of holding an interest in the Storage Reservoir.

1.6 **Pore Space** means a cavity or void, whether natural or artificially created, in any subsurface stratum.

1.7 **Pore Space Interest** is a right to or interest in the Pore Space in any Tract within the boundaries of the Facility Area.

1.8 **Pore Space Owner** is a Party hereto who owns Pore Space Interest.

1.9 **Storage Equipment** is any personal property, lease, easement, and well equipment, plants and other facilities and equipment for use in Storage Operations.

1.10 **Storage Expense** is all costs, expense or indebtedness incurred by the Storage Operator pursuant to this Agreement for or on account of Storage Operations.

1.11 **Storage Facility** is the unitized or amalgamated Storage Reservoir created pursuant to an order of the Commission.

1.12 **Storage Facility Participation** is the percentage shown on Exhibit “C” for allocating payments for use of the Pore Space under each Tract identified in Exhibit “B”.

1.13 **Storage Operations** are all operations conducted by the Storage Operator pursuant to this Agreement or otherwise authorized by any lease covering any Pore Space Interest.

1.14 **Storage Operator** is the person or entity named in Section 4.1 of this Agreement.

1.15 **Storage Reservoir** consists of the Pore Space and confining subsurface strata underlying the Facility Area described as the Opeche/Spearfish (Upper Confining Zone), Broom Creek (Injection Zone), and Amsden (Lower Confining Zone) Formation(s) and which are defined as identified by the well logging suite performed at one stratigraphic well, the Milton Flemmer 1 well (NDIC File No. 38594) located in the NW<sup>1</sup>/<sub>4</sub> of the NE<sup>1</sup>/<sub>4</sub>, Section 35, Township 141 North, Range 88 West, Mercer County, North Dakota. The Storage Reservoir is defined as the stratigraphic interval from below the top of the Opeche/Spearfish Formation found at a depth of 5,587 feet below the Kelly Bushing, to above the base of the Amsden Formation, found at a depth of 6,421 feet below the Kelly Bushing, as identified by the Array Induction Gamma log run in the Milton Flemmer 1 well. The logging suite included triple combo (gamma ray [GR], density porosity, and resistivity), caliper, spectral GR, combinable magnetic resonance (CMR), elemental capture spectroscopy (ESC), dipole sonic including four-arm caliper and inclinometer, and an image log. Further, the acquired logs were used to pick formation top depths and interpret lithology, petrophysical properties, and time-to-depth shifting of seismic data obtained from three 3D seismic surveys and one 5-mile long 2D seismic line covering an area totaling 208

miles in and around the Milton Flemmer 1 stratigraphic well. Formation top depths were picked from the top of the Pierre Formation to the base of the Amsden Formation. The average depth of the top of the Opeche/Spearfish Formation (Upper Confining Zone) across the storage facility area is 5,464 total vertical depth (TVD). The average depth of the base of the Amsden Formation (Lower Confining Zone) across the storage facility area is 6,270 feet TVD. The average thickness of the Storage Reservoir across the storage facility area is 806 feet.

1.16 **Storage Rights** are the rights to explore, develop, and operate lands within the Facility Area for the storage of Storage Substances.

1.17 **Storage Substances** are Carbon Dioxide and incidental associated substances, fluids, and minerals.

1.18 **Tract** is the land described as such and given a Tract number in Exhibit “B.”

1.19 **Transfer Storage Facility** has the meaning given such term in Section 3.7 of this Agreement.

## **ARTICLE 2 EXHIBITS**

2.1 **Exhibits.** The following exhibits, which are attached hereto, are incorporated herein by reference:

2.1.1 Exhibit “A” is a map that shows the boundary lines of the ~~SCS-#1~~TB Leingang Broom Creek Facility Area and the tracts therein;

2.1.2 Exhibit “B” is a schedule that describes the acres of each Tract in the ~~SCS-#1~~TB Leingang Broom Creek Facility Area;

2.1.3 Exhibit “C” is a schedule that shows the Storage Facility Participation of each Tract; and

2.1.4 Exhibit “D” is a form of Pore Space Lease.

2.2 **Reference to Exhibits.** When reference is made to an exhibit, it is to the exhibit as originally attached or, if revised, to the last revision.

2.3 **Exhibits Considered Correct.** Exhibits “A,” “B,” “C” and “D” shall be considered to be correct until revised as herein provided.

2.4 **Correcting Errors.** The shapes and descriptions of the respective Tracts have been established by using the best information available. If it subsequently appears that any Tract, ~~mechanical~~mathematical miscalculation or clerical error has been made, Storage Operator, with the approval of Pore Space Owners whose interest is affected, shall correct the mistake by revising the exhibits to conform to the facts. The revision shall not include any re-evaluation of engineering or geological interpretations used in determining Storage Facility Participation. Each such revision of an exhibit made prior to thirty (30) days after the Effective Date shall be effective as of the Effective Date. Each such revision thereafter made shall be effective at 7:00 a.m. on the first day of the calendar month next following the filing for record of the revised exhibit or on such other date as may be determined by Storage Operator and set forth in the revised exhibit.

2.5 **Filing Revised Exhibits.** If an exhibit is revised, Storage Operator shall execute an appropriate instrument with the revised exhibit attached and file the same for record in the county or counties in which this Agreement or memorandum of the same is recorded and shall also file the amended changes with the Commission.

### **ARTICLE 3 CREATION AND EFFECT OF STORAGE FACILITY**

3.1 **Unleased Pore Space Interests.** Any Pore Space Owner in the Storage Facility who owns a Pore Space Interest in the Storage Reservoir that is not leased for the purposes of this Agreement and during the term hereof, shall be treated as if it were subject to the Pore Space

Lease attached hereto as Exhibit “D”.

3.2 **Amalgamation of Pore Space.** All Pore Space Interests in and to the Tracts are hereby amalgamated and combined insofar as the respective Pore Space Interests pertain to the Storage Reservoir, so that Storage Operations may be conducted with respect to said Storage Reservoir as if all of the Pore Space Interests in the Facility Area had been included in a single lease executed by all Pore Space Owners, as lessors, in favor of Storage Operator, as lessee and as if the lease contained all of the provisions of this Agreement.

~~3.3 **Amendment of Leases and Other Agreements.** The provisions of the various leases, agreements, or other instruments pertaining to the respective Tracts or the storage of the Storage Substances therein, including the Pore Space Lease attached hereto as Exhibit “D”, are amended to the extent necessary to make them conform to the provisions of this Agreement, but otherwise shall remain in effect.~~

~~3.3 **[Reserved.]**~~

3.4 **Continuation of Leases and Term Interests.** Injection in to any part of the Storage Reservoir, or other Storage Operations, shall be considered as injection in to or upon each Tract within said Storage Reservoir, and such injection or operations shall continue in effect as to each lease as to all lands and formations covered thereby just as if such operations were conducted on and as if a well were injecting in each Tract within said Storage Reservoir.

3.5 **Titles Unaffected by Storage.** Nothing herein shall be construed to result in the transfer of title of the Pore Space Interest of any Party hereto to any other Party or to Storage Operator.

3.6 **Injection Rights.** Storage Operator is hereby granted the right to inject into the Storage Reservoir any Storage Substances in whatever amounts Storage Operator may deem

expedient for Storage Operations, together with the right to drill, use, and maintain injection wells in the Facility Area, and to use for injection purposes.

3.7 **Transfer of Storage Substances from Storage Facility.** Storage Operator may transfer from the Storage Facility any Storage Substances, in whatever amounts Storage Operator may deem expedient for Storage Operations, to any other reservoir, subsurface stratum or formation permitted by the Commission for the storage of carbon dioxide under Chapter 38-22 of the North Dakota Century Code (a “Transfer Storage Facility”), *provided that*, the Pore Space ownership between the Storage Facility and Transfer Storage Facility is common.

3.8 **Receipt of Storage Substances.** Storage Operator may accept and receive into the Storage Facility any Storage Substances, in whatever amounts Storage Operator may deem expedient for Storage Operations, being stored in any other Transfer Storage Facility, *provided that*, the Pore Space ownership between the Storage Facility and Transfer Storage Facility is common.

3.9 **Royalty Payments Upon Transfer.** The transfer or receipt of Storage Substances to or from a Transfer Storage Facility in accordance with Section 3.7 and Section 3.8 shall be disregarded for the purposes of calculating the royalty under any lease covering a Pore Space Interest (including Exhibit “D”) and shall not affect the allocation of Storage Substances injected into the Storage Facility through the surface of the Facility Area in accordance with Article 6 of this Agreement.

3.10 **Cooperative Agreements.** Storage Operator may enter into cooperative agreements with respect to lands adjacent to the Facility Area for the purpose of coordinating Storage Operations. Such cooperative agreements may include, but shall not be limited to,

agreements regarding the transfer and receipt of Storage Substances pursuant to Sections 3.7 and 3.8 of this Agreement.

3.11 **Border Agreements.** Storage Operator may enter into an agreement or agreements with owners of adjacent lands with respect to operations which may enhance the injection of the Storage Substances in the Storage Reservoir in the Facility Area or which may otherwise be necessary for the conduct of Storage Operations.

#### **ARTICLE 4 STORAGE OPERATIONS**

4.1 **Storage Operator.** Summit Carbon Storage #1, LLC is hereby designated as the initial Storage Operator. Storage Operator shall have the exclusive right to conduct Storage Operations, which shall conform to the provisions of this Agreement and any lease covering a Pore Space Interest. If there is any conflict between such agreements, this Agreement shall govern.

4.2 **Successor Operators.** The initial Storage Operator and any subsequent operator may, at any time, transfer operatorship of the Storage Facility with and upon the approval of the Commission.

4.3 **Method of Operation.** Storage Operator shall engage in Storage Operations with diligence and in accordance with good engineering and injection practices.

4.4 **Change of Method of Operation.** As permitted by the Commission nothing herein shall prevent Storage Operator from discontinuing or changing in whole or in part any method of operation which, in its opinion, is no longer in accord with good engineering or injection practices. Other methods of operation may be conducted or changes may be made by Storage Operator from time to time if determined by it to be feasible, necessary or desirable to increase the injection or storage of Storage Substances.

## **ARTICLE 5 TRACT PARTICIPATIONS**

5.1 **Tract Participations.** The Storage Facility Participation of each Tract is shown in Exhibit “C.” The Storage Facility Participation of each Tract shall be based 100% upon the ratio of surface acres in each Tract to the total surface acres for all Tracts within the Facility Area.

5.2 **Relative Storage Facility Participations.** If the Facility Area is enlarged or reduced, the revised Storage Facility Participation of the Tracts remaining in the Facility Area and which were within the Facility Area prior to the enlargement or reduction shall remain in the same ratio to one another.

## **ARTICLE 6 ALLOCATION OF STORAGE SUBSTANCES**

6.1 **Allocation of Tracts.** All Storage Substances injected shall be allocated to the several Tracts in accordance with the respective Storage Facility Participation effective during the period that the Storage Substances are injected. The amount of Storage Substances allocated to each tract, regardless of whether the amount is more or less than the actual injection of Storage Substances from the well or wells, if any, on such Tract, shall be deemed for all purposes to have been injected into such Tract. Storage Substances transferred or received pursuant to Sections 3.7 and 3.8 of this Agreement shall be disregarded for the purposes of this Section 6.1.

6.2 **Distribution within Tracts.** The Storage Substances injected and allocated to each Tract shall be distributed among, or accounted for to the Pore Space Owners who own a Pore Space Interest in such Tract in accordance with each Pore Space Owner’s Storage Facility Participation effective during the period that the Storage Substances were injected. If any Pore Space Interest in a Tract hereafter becomes divided and owned in severalty as to different parts

of the Tract, the owners of the divided interests, in the absence of an agreement providing for a different division, shall be compensated for the storage of the Storage Substances in proportion to the surface acreage of their respective parts of the Tract. Subject to Section 3.9, Storage Substances transferred or received pursuant to Sections 3.7 and 3.8 of this Agreement shall be disregarded for the purposes of this Section 6.2.

## ARTICLE 7 TITLES

~~7.1 **Warranty and Indemnity.** Each Pore Space Owner who, by acceptance of revenue for the injection of Storage Substances into the Storage Reservoir, shall be deemed to have warranted title to its Pore Space Interest, and, upon receipt of the proceeds thereof to the credit of such interest, shall indemnify and hold harmless the Storage Operator and other Parties from any loss due to failure, in whole or in part, of its title to any such interest.~~

~~7.2~~7.1 **Injection When Title Is in Dispute.** If the title or right of any Pore Space Owner claiming the right to receive all or any portion of the proceeds for the storage of any Storage Substances allocated to a Tract is in dispute, Storage Operator shall require that the Pore Space Owner to whom the proceeds thereof are paid to furnish security for the proper accounting thereof to the rightful Pore Space Owner, if the title or right of such Pore Space Owner fails in whole or in part.

~~7.3~~7.2 **Payments of Taxes to Protect Title.** The owner of surface rights to lands within the Facility Area is responsible for the payment of any *ad valorem* taxes on all such rights, interests or property, unless such owner and the Storage Operator otherwise agree. If any *ad valorem* taxes are not paid by or for such owner when due, Storage Operator may at any time prior to tax sale or expiration of period of redemption after tax sale, pay the tax, redeem such

rights, interests or property, and discharge the tax lien. Storage Operator shall, if possible, withhold from any proceeds derived from the storage of Storage Substances otherwise due any Pore Space Owner who is a delinquent taxpayer up to an amount sufficient to defray the costs of such payment or redemption; *provided* that such withholding to be credited to the Storage Operator. Such withholding shall be without prejudice to any other remedy available to Storage Operator.

~~7.4~~7.3 **Pore Space Interest Titles.** If title to a Pore Space Interest fails, but the tract to which it relates is not removed from the Facility Area, the Party whose title failed shall not be entitled to share under this Agreement with respect to that interest.

## **ARTICLE 8 EASEMENTS OR USE OF SURFACE**

8.1 **No Surface Occupancy.** Unless agreed to in writing with the owner of the surface estate, Operator shall not place any surface facilities on the surface estate owned by any Pore Space Owner within the boundaries of the Facility Area. For the purpose of this Agreement, “surface facilities” shall include, but not be limited to, wellsites, pipelines, powerlines, valves or other above-ground facilities.

~~8.1~~8.2 **Grant of Easement.** Subject to Section 8.1, Storage Operator shall have the right to use as much of the surface of the land within the Facility Area as may be reasonably necessary for Storage Operations and the injection of Storage Substances.

~~8.2~~8.3 **Use of Water.** Storage Operator shall have and is hereby granted free use of water from the Facility Area for Storage Operations, except water from any well, lake, pond or irrigation ditch of a Pore Space Owner; notwithstanding the foregoing, Storage Operator may access any well, lake, or pond as provided in Exhibit “D”.

~~8.3~~8.4 **Surface Damages.** Storage Operator shall pay surface owners for damage to growing crops, timber, fences, improvements, and structures located on the Facility Area that result from Storage Operations.

~~8.4~~8.5 **Surface and Sub-Surface Operating Rights.** ~~Except to the extent modified in this Agreement~~Subject to Section 8.1, Storage Operator shall have the same rights to use the surface and sub-surface and use of water and any other rights granted to Storage Operator in any lease covering Pore Space Interests. Except to the extent expanded by this Agreement or the extent that such rights are common to the effected leases, the rights granted by a lease may be exercised only on the land covered by that lease. Storage Operator will to the extent possible minimize surface impacts.

## **ARTICLE 9 ENLARGEMENT OF STORAGE FACILITY**

9.1 **Enlargement of Storage Facility.** The Storage Facility may be enlarged from time to time to include acreage and formations reasonably proven to be geologically capable of storing Storage Substances. Any expansion must be approved in accordance with the rules and regulations of the Commission.

9.2 **Determination of Tract Participation.** Storage Operator, subject to Section 5.2, shall determine the Storage Facility Participation of each Tract within the Storage Facility as enlarged, and shall revise Exhibits “A”, “B” and “C” accordingly and in accordance with the rules, regulations and orders of the Commission.

9.3 **Effective Date.** The effective date of any enlargement of the Storage Facility shall be effective as determined by the Commission.

## **ARTICLE 10 TRANSFER OF TITLE ~~PARTITION~~**

10.1 **Transfer of Title.** Any conveyance of all or part of any interest owned by any Party hereto with respect to any Tract shall be made expressly subject to this Agreement. No change of title shall be binding upon Storage Operator, or any Party hereto other than the Party so transferring, until 7:00 a.m. on the first day of the calendar month following thirty (30) days from the date of receipt by Storage Operator of a photocopy, or a certified copy, of the recorded or filed instrument evidencing such a change in ownership.

~~10.2 **Waiver of Rights to Partition.** Each Party hereto agrees that, during the existence of this Agreement, it will not resort to any action to partition any Tract or parcel within the Facility Area or the facilities used in the development or operation thereof, and to that extent waives the benefits or laws authorizing such partition.~~

## **ARTICLE 11 RELATIONSHIP OF PARTIES**

11.1 **No Partnership.** The duties, obligations and liabilities arising hereunder shall be several and not joint or collective. This Agreement is not intended to create, and shall not be construed to create, an association or trust, or to impose a partnership duty, obligation or liability with regard to any one or more of the Parties hereto. Each Party hereto shall be individually responsible for its own obligations as herein provided.

11.2 **No Joint Marketing.** This Agreement is not intended to provide, and shall not be construed to provide, directly or indirectly, for any joint marketing of Storage Substances.

11.3 **Pore Space Owners Free of Costs.** This Agreement is not intended to impose, and shall not be construed to impose, upon any Pore Space Owner any obligation to pay any Storage Expense unless such Pore Space Owner is otherwise so obligated.

11.4 **Information to Pore Space Owners.** Each Pore Space Owner shall be entitled to all information in possession of Storage Operator to which such Pore Space Owner is entitled by an existing lease or a lease imposed by this Agreement.

**ARTICLE 12  
LAWS AND REGULATIONS**

12.1 **Laws and Regulations.** This Agreement shall be subject to all applicable federal, state and municipal laws, rules, regulations and orders.

**ARTICLE 13  
FORCE MAJEURE**

13.1 **Force Majeure.** All obligations imposed by this Agreement on each Party, except for the payment of money, shall be suspended while compliance is prevented, in whole or in part, by a labor dispute, fire, war, civil disturbance, or act of God; by federal, state or municipal laws; by any rule, regulation or order of a governmental agency; by inability to secure materials; or by any other cause or causes, whether similar or dissimilar, beyond reasonable control of the Party. No Party shall be required against their will to adjust or settle any labor dispute. Neither this Agreement nor any lease or other instrument subject hereto shall be terminated by reason of suspension of Storage Operations due to any one or more of the causes set forth in this Article.

**ARTICLE 14  
EFFECTIVE DATE**

14.1 **Effective Date.** This Agreement shall become effective as determined by the Commission.

14.2 **Certificate of Effectiveness.** Storage Operator shall file for record in the county or counties in which the land affected is located a certificate stating the Effective Date of this Agreement.

**ARTICLE 15  
TERM**

15.1 **Term.** Unless sooner terminated in the manner hereinafter provided or by order of the Commission, this Agreement shall remain in full force and effect until the Commission has issued a certificate of project completion with respect to the Storage Facility in accordance with § 38-22-17 of the North Dakota Century Code.

15.2 **Termination by Storage Operator.** This Agreement may be terminated at any time by the Storage Operator with the approval of the Commission.

15.3 **Effect of Termination.** Upon termination of this Agreement all Storage Operations shall cease. Each lease and other agreement covering Pore Space within the Facility Area shall remain in force for ninety (90) days after the date on which this Agreement terminates, and for such further period as is provided by Exhibit “D” or other agreement.

15.4 **Salvaging Equipment Upon Termination.** If not otherwise granted by Exhibit “D” or other instruments affecting each Tract, Pore Space Owners hereby grant Storage Operator a period of six (6) months after the date of termination of this Agreement within which to salvage and remove Storage Equipment.

15.5 **Certificate of Termination.** Upon termination of this Agreement, Storage Operator shall file for record in the county or counties in which the land affected is located a certificate that this Agreement has terminated, stating its termination date.

## **ARTICLE 16 APPROVAL**

16.1 **Original, Counterpart or Other Instrument.** A Pore Space Owner may approve this Agreement by signing the original of this instrument, a counterpart thereof, ratification or joinder or other instrument approving this instrument hereto. The signing of any such instrument shall have the same effect as if all Parties had signed the same instrument.

~~16.2 **Joinder in Dual Capacity.** Execution as herein provided by any Party as either a~~

~~Pore Space Owner or the Storage Operator shall commit all interests owned or controlled by such Party and any additional interest thereafter acquired in the Facility Area.~~

~~16.3~~16.2      **Approval by the North Dakota Industrial Commission.**

Notwithstanding anything in this Article to the contrary, all Tracts within the Facility Area shall be deemed to be qualified for participation if this Agreement is duly approved by order of the Commission.

**ARTICLE 17  
GENERAL**

17.1    **Amendments Affecting Pore Space Owners.** Amendments hereto relating wholly to Pore Space Owners may be made with approval by the Commission.

17.4    **Construction.** This agreement shall be construed according to the laws of the State of North Dakota.

**ARTICLE 18  
SUCCESSORS AND ASSIGNS**

18.1    **Successors and Assigns.** This Agreement shall extend to, be binding upon, and inure to the benefit of the Parties hereto and their respective heirs, devisees, legal representatives, successors and assigns and shall constitute a covenant running with the lands, leases and interests covered hereby.
