A passion for construction and engineering, who enjoys working outdoors and has a strong understanding of technology to fill our role as an engineering technician/construction technician!

Engineer Technician will have all the necessary training and support to excel. Engineer Technician will conduct field inspections for all types of construction projects, ensuring compliance with plans, specifications, and contract documents.

Work with cutting-edge equipment like Robotic Total Station GPS, drones, and use computer aided drafting software such as Microstation to measure and calculate quantities and create reports and plan sheets for use on construction projects. Assist project engineers with checking and organizing project final records, as well as with district design work that requires the use of Microstation.
