

COME DIG WITH US IN 2006

Dinosaur and mosasaur fossil digs in the scenic and rugged North Dakota badlands near Marmarth

Sixty-five to 75 million year old fossil sites containing dinosaur and mosasaur fossils have recently been discovered in the beautiful and rugged badlands near Marmarth, North Dakota. The North Dakota Geological Survey and Marmarth Research Foundation will co-sponsor scientific, professionally-conducted, fossil excavations at these sites in August, 2006. Public participation is invited.

Triceratops

Mosasaur

Who: Open to anyone 12 years or older

When: August 5 through August 12, 2006
