

COME DIG WITH US IN 2007

Dinosaur and other fossil digs in the scenic and rugged North Dakota badlands near Rhame

About sixty-five million year old (Cretaceous age Hell Creek Formation) fossil sites containing *Triceratops* dinosaur, plant, and other fossils have recently been discovered in the beautiful and rugged badlands near Rhame, North Dakota. The North Dakota Geological Survey and Pioneer Trails Museum, in cooperation with the U.S. Bureau of Land Management, will co-sponsor scientific, professionally-conducted, fossil excavations at these sites in June, 2007. Public participation is invited.
