

NORTH DAKOTA GEOLOGICAL SURVEY CIRCULAR NO. 5
TENTH REVISION, 1ST SUPPLEMENT

Introduction

The tenth revision, with the 1st supplement, contains information from all well records received at the North Dakota Geological Survey through June 14, 1966.

Wells are listed according to the N. D. G. S. file number assigned to the particular well and information pertaining to it is tabulated in the following order: company, well name, location, permit number, elevation, total depth, completion date and initial production (barrels oil per day/gravity of oil/size of choke/percent of water). If the well is an abandoned producer the cumulative barrels of oil and water are indicated.

More complete well data with formation tops and lithologic descriptions of certain wells are available in other N. D. G. S. Circulars. Wells on which circulars have been published are identified by circular numbers.
