TANK BOTTOM CLEANING REPORT - FORM 10-sm

1. This report shall be filed by the operator with the Commission within thirty (30) days after completing a tank cleaning.
2. Please refer to Section 43-02-02.4-31 NDAC regarding tank cleaning.
3. No tank bottom shall be removed from any tank used for the storage of crude oil or a tank in which crude oil might accumulate without prior approval.
4. Verbal approval may be given by a Commission representative authorizing the tank cleaning.
5. The name of the Commission representative verbally authorizing the work and the date the work was authorized shall be included on the report.
6. The well file number, well name and number, field, well or facility location, and operator of the well or facility shall coincide with the official records on file with the Commission. The wells to be credited with oil sold shall be clearly identified by well name and number and well file number. The well names and numbers and file numbers shall coincide with the official records on file with the Commission.
7. The amount of merchantable oil shall be determined from a representative sample of the tank bottoms by a standard centrifugal test as prescribed by API standards.
8. All salable oil volumes shall be reported as barrels (42 gallons) corrected to 60 degrees F. and 14.73 psia. All other volumes shall be reported as barrels (42 gallons). All volumes shall be rounded to the nearest full barrel.
9. All tank bottom waste shall be disposed of in accordance with all applicable local, state, and federal laws and regulations.
10. The original and one copy of this report shall be filed with the Industrial Commission of North Dakota, Geological Survey Division, 600 East Boulevard, Dept. 405, Bismarck, ND 58505-0840.
