PRELIMINARY GEOLOGIC MAP OF DUNOON COUNTY, NORTH DAKOTA

By Les Clayton

Map validity: The geologic map of the area is set for one sheet of 1/2-in. quadrangle area. The geologic contacts are based on an extensive field check and are drawn with maximum accuracy. Several strong trends were identified as such contacts. The result, so far, is to be interpreted and marked on this map.

MAP UNIT DESCRIPTIONS

Map unit B: The total area is 750 ft wide and 1400 ft long. This unit consists of a series of subunits that are approximately 100 ft wide and 300 ft long. The subunits are separated by 50-ft-wide faults.
