

Bakken Production

This map series (Geologic Investigations No. 149) plotting initial Bakken production on the trace of Bakken laterals was first published in January 2012. Since that time, we have been updating it on a quarterly basis. The map was constructed by Elroy Kadrmaz, Steve Nordeng, and Nathan Kirby and is available for download on the Geological Survey webpage. A 30 x 36 inch paper copy can be purchased for \$20 or a shape file for \$75.
