

# Areas Of Landslides

## Cinnamon Creek Quadrangle, North Dakota

Edward C. Murphy

2015

### UNIT DESCRIPTIONS

 Geology Undifferentiated

### QUATERNARY SYSTEM

#### RECENT/PLEISTOCENE

 Landslide Deposits

Variable mixture of strata and deposits that have slid to the base of steep slopes.

Landslides identified on this quadrangle were mapped from stereo pairs, black and white 1:20,000 scale aerial photographs flown between 6-21-58 and 9-7-58. As a result these maps can be used to identify areas that are vulnerable to slope failure, but are not an up to date assessment of all landslides for the area.

### Other Features

 Unpaved Road

Cinnamon Creek Quadrangle, North Dakota

Scale 1:24,000

Lambert Conformal Conic Projection  
Standard Parallels 47° 22' 30" and 47° 30' 00"  
1927 North American Datum NGVD 1929  
USGS 7.5 Minute Topographic Map Contour Interval 40 Feet  
County Road Layer (NDGIS HUB) Updated July 16th, 2014
