UNIT DESCRIPTIONS

 **Geology Undifferentiated**

QUATERNARY SYSTEM

RECENT/PLEISTOCENE

 **Qls Landslide Deposits**

A mass of material that has moved downslope. Includes earth flows, slumps, and areas of soil creep.

Areas of landslides were investigated within this quadrangle based on a review of county historical aerial photography flown in July 1960 by the United States Department of Agriculture (USDA). Additional data sources include digital orthophotography from the USDA National Agriculture Imagery Program (NAIP) flown in September 2024 and the North Dakota Geological Survey LiDAR Map Series, which compiles raw data flown in May to November 2023 from the North Dakota State Water Commission. From this investigation, no landslides were mapped within the quadrangle.
