

BEFORE THE INDUSTRIAL COMMISSION
OF THE STATE OF NORTH DAKOTA

CASE NO. 12482
ORDER NO. 14739

IN THE MATTER OF A HEARING CALLED ON
A MOTION OF THE COMMISSION TO
CONSIDER THE APPLICATION OF SAMSON
RESOURCES CO. FOR AN ORDER
AUTHORIZING THE FLARING OF GAS FROM
THE LOKKEN #35-163-99H, NENE OF SECTION
35, T.163N., R.99W., DIVIDE COUNTY, ND,
AMBROSE-BAKKEN POOL, PURSUANT TO
THE PROVISIONS OF NDCC § 38-08-06.4 AND
SUCH OTHER RELIEF AS IS APPROPRIATE.

ORDER OF THE COMMISSION

THE COMMISSION FINDS:

- (1) This cause came on for hearing at 9:00 a.m. on the 29th day of April, 2010.
- (2) The initial public notice of this application was not properly published in the Divide County Journal, the official Divide County newspaper. Evidence and testimony was taken on April 29, 2010 but the record in this case was left open until May 6, 2010 to allow the required notice to be published and afford any interested parties the opportunity to appear. No further appearances were made on May 6, 2010.
- (3) The record in this case was left open to receive additional information from Samson Resources Company (Samson). Additional information in this matter was received from Samson on October 27, 2010 and the record was closed.
- (4) Pursuant to NDAC Section 43-02-03-88.1, the Director is authorized to sign, on behalf of the Commission, orders relating to, inter alia, flaring exemptions under North Dakota Century Code (NDCC) Section 38-08-06.4 and under NDAC Section 43-02-03-60.2.
- (5) NDCC Section 38-08-06.4 states:

As permitted under rules of the industrial commission, gas produced with crude oil from an oil well may be flared during a one-year period from the date of first production from the well. Thereafter, flaring of gas from the well must cease and the well must be capped, connected to a gas gathering line, or equipped with an

electrical generator that consumes at least seventy-five percent of the gas from the well. An electrical generator and its attachment units to produce electricity from gas must be considered to be personal property for all purposes. For a well operated in violation of this section, the producer shall pay royalties to royalty owners upon the value of the flared gas and shall also pay gross production tax on the flared gas at the rate imposed under section 57-51-02.2. The industrial commission may enforce this section and, for each well operator found to be in violation of this section, may determine the value of flared gas for purposes of payment of royalties under this section and its determination is final. A producer may obtain an exemption from this section from the industrial commission upon application and a showing that connection of the well to a natural gas gathering line is economically infeasible at the time of the application or in the foreseeable future or that a market for the gas is not available and that equipping the well with an electrical generator to produce electricity from gas is economically infeasible.

(6) Samson is the owner or operator of the following well in the Ambrose-Bakken Pool, Divide County, North Dakota:

<u>File #</u>	<u>Well Name & Number</u>	<u>Location</u>
17226	Lokken #35-163-99H	NE NE Section 35-T163N-R99W

(7) The Ambrose-Bakken Pool is an oil reservoir, but gas is produced in association with the oil at the wellhead as a by-product of oil production.

(8) By previous order of the Commission, said well is currently authorized to flare so that all owners of interests in the well herein described may receive the maximum benefits of the oil production in such a manner that will prevent waste and protect correlative rights.

(9) The well is not connected to a gas gathering facility and evidence presented to the Commission indicates that the well currently produces approximately 14 MCF per day of surplus gas.

(10) The well is located approximately 9.7 miles to the nearest gas gathering system.

(11) Samson has estimated the net profit value of the project to be a loss of approximately \$687,000, therefore, there are insufficient reserves of surplus gas to recoup the costs of installing and operating a gas gathering facility.

(12) Samson has submitted evidence that under current market conditions the surplus casinghead gas presently being produced by the well and the estimated recoverable reserves of surplus gas from the well is insufficient to recoup the costs of installing and operating a gas gathering facility.

(13) Samson has investigated the possibility of equipping the well with an electrical generator and has presented evidence that the well has insufficient gas production to justify

investing in an electric generator. It is therefore determined that equipping the well with an electrical generator to produce electricity from the gas is economically infeasible.

(14) If Samson's request is not granted, taxes and royalties must be paid on flared gas which will increase operating costs, raise the economic limit and cause premature abandonment of the well; or the well must be connected to a gas pipeline or an electrical generator at an economic loss which would also cause premature abandonment, or flaring must cease and the well must be "capped," resulting in the loss of oil production and the loss of the benefits of that production by all owners of interest in the well and the State of North Dakota.

(15) Considering the amount of surplus gas being produced by the well, the amount of estimated recoverable reserves from the well, and the cost to connect the well to a gas pipeline, it is not economic at this time to connect the well to a gas gathering facility or an electrical generator.

(16) Samson will continue to evaluate the feasibility of connecting the well to a gas gathering facility.

(17) In order to prevent waste, and protect correlative rights this application should be granted.

IT IS THEREFORE ORDERED:

(1) Samson Resources Company, its assigns and successors, is hereby allowed to flare surplus casinghead gas produced with crude oil from the Ambrose-Bakken Pool through the well listed below under the exemption provided for under NDCC Section 38-08-06.4:

<u>File #</u>	<u>Well Name & Number</u>	<u>Location</u>
17226	Lokken #35-163-99H	NE NE Section 35-T163N-R99W

(2) This order shall remain in full force and effect until further order of the Commission.

Dated this 15th day of December, 2010.

INDUSTRIAL COMMISSION
STATE OF NORTH DAKOTA

By the Director, on behalf of the Commission

/s/ Lynn D. Helms, Director

STATE OF NORTH DAKOTA

AFFIDAVIT OF MAILING

COUNTY OF BURLEIGH

I, Jeanette Bean, being duly sworn upon oath, depose and say: That on the 17th day of December, 2010 enclosed in separate envelopes true and correct copies of the attached Order No. 14739 of the North Dakota Industrial Commission, and deposited the same with the United States Postal Service in Bismarck, North Dakota, with postage thereon fully paid, directed to the following persons by the Industrial Commission in Case No. 12482 :

LAWRENCE BENDER
FREDRICKSON & BYRON
PO BOX 1855
BISMARCK ND 58502-1855

Jeanette Bean
Oil & Gas Division

On this 17th day of December, 2010 before me personally appeared Jeanette Bean to me known as the person described in and who executed the foregoing instrument and acknowledged that she executed the same as her free act and deed.

**BEFORE THE INDUSTRIAL COMMISSION
OF THE STATE OF NORTH DAKOTA**

CASE NO. 12482

Application of Samson Resources Company for an Order authorizing the flaring of gas from the Lokken 35-163-99H well located in the NE/4NE/4 of Section 35, Township 163 North, Range 99 West, Divided County, North Dakota, Ambrose-Bakken Pool, as an exception to the provisions of Section 38-08-06.4 of the N.D.C.C. or such further and additional relief.

SUPPLEMENTAL AFFIDAVIT OF STEVE RAWLINGS

STATE OF COLORADO)
)ss
COUNTY OF DENVER)

Steve Rawlings, being first duly sworn, deposes and states as follows:

1.

That I am a Manager-Division Operations for Samson Resources Company, 370 17th Street, Suite 3000, Denver, Colorado 80202, the applicant in the above-entitled matter.

2.

That, to the best of my information, knowledge, and belief, the costs associated with the purchase, installation, connection and operation of an electric generator fueled by gas produced from the Lokken 35-163-99H well would total approximately \$617,430.

3.

That, to the best of my information, knowledge, and belief, the revenue received from sale of electricity produced from the electric generator fueled by gas produced from the Lokken 35-163-99H well would total approximately \$249,425.

4.

That requiring the installation and operation of an electric generator fueled by the gas produced from the Lokken 35-163-99H well would result in a discounted loss of approximately \$368,005 and would not be economically justifiable.

5.

That this affidavit supplements my previously submitted affidavit of April 20, 2010 in the above referenced matter, and that all statements made in such prior affidavit are hereby reaffirmed.

DATED this 25th day of October, 2010.

Steve Rawlings
STEVE RAWLINGS

STATE OF COLORADO)
)ss:
COUNTY OF DENVER)

The foregoing instrument was acknowledged before me this 25th day of October, 2010 by Steve Rawlings, Manager-Division Operations, of Samson Resources Company.

Subject: Flaring Exemptions: Case Nos. 12482, 12483, 12484, 12485, 12486, 12487

Lawrence,

As you know, NDCC Section 38-08-06.4 provides a producer may obtain an exemption from paying royalties and taxes on flared gas only after showing, inter alia, that equipping the well with an electrical generator to produce electricity from gas is economically infeasible. Samson has attempted to fulfill this requirement in Case Nos. 12482, 12483, 12484, 12485, 12486, and 12487 by providing the statement:

"The.....well has insufficient gas production to justify investing in an electric generator."

The Commission is not comfortable approving such request without the affiant providing some economics supporting the above mentioned statement.

Please let me know if you have any questions or comments.

BEFORE THE INDUSTRIAL COMMISSION
OF THE STATE OF NORTH DAKOTA

CASE NO. 12482

Application of Samson Resources Company for an order authorizing the flaring of gas from the Lokken 35-163-99H well located in the NE/4NE/4 of Section 35, Township 163 North, Range 99 West, Divide County, North Dakota, Ambrose-Bakken Pool, as an exception to the provisions of Section 38-08-06.4 of the N.D.C.C. or such further and additional relief.

AFFIDAVIT OF STEVE RAWLINGS

STATE OF COLORADO)
) ss
COUNTY OF DENVER)

Steve Rawlings, being first duly sworn, deposes and states as follows:

1.

That I am a Manager-Division Operations for Samson Resources Company, 370 17th Street, Suite 3000, Denver, Colorado 80202, the applicant in the above-entitled matter.

2.

That I have prepared or had prepared under my control and supervision the attached exhibit.

3.

That to the best of my knowledge and belief, the information contained on the attached exhibit is true and correct.

4.

That attached as Exhibit No. 1 is a plat showing the area around the Lokken 35-163-99H well. Shown on the plat is a line depicting the field limits of the Ambrose-Bakken Pool, as defined by the North Dakota Industrial Commission. Also displayed on the plat is the location of the Lokken 35-163-99H well located in Section 35, Township 163 North, Range 99 West, Divide County, North Dakota.

5.

That Samson is currently the operator of the Lokken 35-163-99H well, said well having been completed and producing in the Ambrose-Bakken Pool.

6.

That to the best of my information, knowledge, and belief, the Lokken 35-163-99H well was completed as a producer on or about February 26, 2009.

7.

That to the best of my knowledge and belief, gas produced from the Lokken 35-163-99H well from the Ambrose-Bakken Pool does not contain any H₂S and is considered sweet gas.

8.

That to the best of my knowledge and belief, the current average daily rate of gas being produced from the Lokken 35-163-99H well is approximately 23.6 MCFD.

9.

That the Lokken 35-163-99H well is currently not connected to gas gathering facility.

10.

That the Lokken 35-163-99H well has insufficient gas production to justify investing in an electric generator.

11.

That to the best of my knowledge and belief, the total amount of gas from the Lokken 35-163-99H well not being used for lease use and available for sale is approximately 14.0 MCFD.

12.

That gas produced in association with oil produced from the Lokken 35-163-99H well and not utilized for lease use is currently being flared.

13.

That Samson estimates the ultimate recoverable gas reserves from the Lokken 35-163-99H well to be 55,849 MCF of gas, produced over a 30 year well life.

14.

That based upon the sale of gas from other wells connected to the nearest gathering system to the Lokken 35-163-99H well, if said well were connected to a gas gathering facility, it is anticipated that said gas would have a value of \$2.12/MCF.

15.

That based upon the aforementioned price of \$2.12/MCF, the gross value of the recoverable gas reserves from the Lokken 35-163-99H well is estimated to be \$118,400.

16.

That based upon a royalty rate for the Lokken 35-163-99H well of 57.08% and a gas production tax of \$0.1428/MCF, Samson estimates the royalty and production tax burden for the gas produced from the well would be approximately \$67,584 and \$7,975, respectively.

17.

That the total value of the gas reserves of the Lokken 35-163-99H well to the working interest owners, after deducting royalty and production taxes, is approximately \$42,841.

18.

That to the best of my knowledge and belief, the Lokken 35-163-99H well is located approximately 9.7 miles from the nearest connection point to a gas gathering facility.

19.

That based upon the operations of other operators in and near the area of the Lokken 35-163-99H well, the cost associated with the purchase and installation of a 4 inch pipeline from the well to the nearest connection point to a gas gathering facility is approximately \$63,888 per mile. In this case, the total cost would be approximately \$730,000, inclusive of a gas meter.

20.

That based upon the differential between the value of the gas and the cost to install and operate the pipeline required for delivery of gas to a gas gathering system, requiring to connect the Lokken 35-163-99H well to gas gathering system would result in an undiscounted loss of approximately \$687,159.

21.

That based upon my knowledge and belief, the low volumes of gas produced from the Lokken 35-163-99H well make it economically infeasible at the present time or in the foreseeable future to connect the Lokken 35-163-99H well to a gas gathering facility.

DATED this 20th day of April, 2010.

Steve Rawlings

STATE OF COLORADO)
)ss
COUNTY OF DENVER)

The foregoing instrument was acknowledged before me this 20th day of April, 2010, by Steve Rawlings, Manager-Division Operations, of Samson Resources Company

Notary Public
My Commission Expires:

4724601_1.DOC

**BEFORE THE INDUSTRIAL COMMISSION
OF THE STATE OF NORTH DAKOTA**

CASE NO. 12482

Application of Samson Resources Company for an order authorizing the flaring of gas from the Lokken 35-163-99H well located in the NE/4NE/4 of Section 35, Township 163 North, Range 99 West, Divide County, North Dakota, Ambrose-Bakken Pool, as an exception to the provisions of Section 38-08-06.4 of the N.D.C.C. or such further and additional relief.

APPLICATION OF SAMSON RESOURCES COMPANY

Samson Resources Company ("Samson"), for its application to the North Dakota Industrial Commission ("Commission"), respectfully states as follows:

1.

That Samson is the owner of an interest in the oil and gas leasehold estate in portions of Section 35, Township 163 North, Range 99 West, Divide County, North Dakota.

2.

That such lands are currently within an area defined by the Commission as the field boundaries for the Ambrose-Bakken Pool.

3.

That Samson is currently the operator of the Lokken 35-163-99H well located in the Northeast Quarter of the Northeast Quarter (NE/4NE/4) of Section 35, completed as a producing well in the Ambrose-Bakken Pool.

4.

That the Lokken 35-163-99H well is currently not connected to a gas gathering facility.

5.

That because of the location of the well and low volumes of gas produced from the Lokken 35-163-99H well, it is economically infeasible to connect said well to a gas gathering facility at the present time, or in the foreseeable future.

6.

That gas produced in association with oil produced from the Lokken 35-163-99H well is currently being flared.

7.

That Section 38-08-06.4 of the North Dakota Century Code prohibits the flaring of gas produced in association with crude oil under certain circumstances but authorizes the Commission, upon application, to grant an exception to the flaring prohibition upon a showing that connection of the well to a gas gathering facility is economically infeasible at the time of the application or in the foreseeable future or that a market for the gas is not available.

8.

That in the opinion of the applicant, it is economically infeasible at the present time or in the foreseeable future to connect the Lokken 35-163-99H well to a gas gathering facility and an exception to Section 38-08-06.4 of the North Dakota Century Code should be granted for said well.

WHEREFORE, Samson requests the following:

(a) That this matter be set for the regularly scheduled April 2010 hearings of the Commission;

(b) That pursuant to Section 43-02-03-88.2 of the North Dakota Administrative Code, Samson's witnesses in this matter be allowed to participate by telephonic means; and

DATED this 26th day of March, 2010.

By **LAWRENCE BENDER**
Attorneys for Applicant
Samson Resources Company.
