#### BEFORE THE INDUSTRIAL COMMISSION

#### OF THE STATE OF NORTH DAKOTA

CASE NO. 16429 ORDER NO. 18695

IN THE MATTER OF A HEARING CALLED ON A MOTION OF THE COMMISSION TO CONSIDER THE APPLICATION OF BAYTEX ENERGY USA LTD. FOR AN ORDER PURSUANT TO NDAC § 43-02-03-88.1 AUTHORIZING THE FLARING OF GAS FROM THE HANSEN #6-7-162-99H WELL, NENE OF 18, T.162N., R.99W., COUNTY, ND, AMBROSE-BAKKEN POOL, AS AN EXCEPTION TO THE PROVISIONS OF NDCC § 38-08-06.4 AND SUCH OTHER RELIEF AS IS APPROPRIATE.

#### ORDER OF THE COMMISSION

#### THE COMMISSION FINDS:

- (1) This cause came on for hearing at 9:00 a.m. on the 15th day of December, 2011.
- (2) Baytex Energy USA Ltd (Baytex), succeeded by SM Energy Company, provided exhibits and testimony in this matter by sworn affidavit.
- (3) Pursuant to NDAC Section 43-02-03-88.1, the Director is authorized to sign, on behalf of the Commission, orders relating to, inter alia, flaring exemptions under NDCC Section 38-08-06.4 and under NDAC Section 43-02-03-60.2.
  - (4) At the time of this hearing, NDCC Section 38-08-06.4 stated:

As permitted under rules of the industrial commission, gas produced with crude oil from an oil well may be flared during a one-year period from the date of first production from the well. Thereafter, flaring of gas from the well must cease and the well must be capped, connected to a gas gathering line, or equipped with an electrical generator that consumes at least seventy-five percent of the gas from the well. An electrical generator and its attachment units to produce electricity from gas must be considered to be personal property for all purposes. For a well operated in violation of this section, the producer shall pay royalties to royalty owners upon the

Case No. 16429 Order No. 18695

value of the flared gas and shall also pay gross production tax on the flared gas at the rate imposed under section 57-51-02.2. The industrial commission may enforce this section and, for each well operator found to be in violation of this section, may determine the value of flared gas for purposes of payment of royalties under this section and its determination is final. A producer may obtain an exemption from this section from the industrial commission upon application and a showing that connection of the well to a natural gas gathering line is economically infeasible at the time of the application or in the foreseeable future or that a market for the gas is not available and that equipping the well with an electrical generator to produce electricity from gas is economically infeasible.

(5) Baytex is the owner or operator of the following well in the Ambrose-Bakken Pool, Divide County, North Dakota:

| <u>File #</u> | Well Name & Number | <u>Location</u>            |
|---------------|--------------------|----------------------------|
| 19633         | Hansen 6-7-162-99H | NENE Section 18-T162N-R99W |

- (6) The Hansen 6-7-162-99H well was completed in the Ambrose-Bakken Pool on or around January 22, 2011. Pursuant to NDCC Section 38-08-06.4, gas produced with crude oil from an oil well may be flared during a one-year period from the date of first production from the well.
- (7) The Ambrose-Bakken Pool is an oil reservoir, but gas is produced in association with the oil at the wellhead as a by-product of oil production.
- (8) The well is not connected to a gas gathering facility and evidence presented to the Commission indicates that the well currently produces approximately 75 MCF per day of surplus gas.
- (9) The well is located approximately 6.5 miles to the nearest gas gathering system with sufficient capacity to market the surplus gas.
- (10) Baytex has submitted evidence that under current market conditions the surplus casinghead gas presently being produced by the well and the estimated recoverable reserves of surplus gas from the well is insufficient to recoup the costs of installing and operating a gas gathering facility.
- (11) Baytex has investigated the possibility of equipping the well with an electrical generator. It is not economic to purchase, install, connect and operate an electric generator fueled by produced casinghead gas. The Commission concludes that equipping the well with an electrical generator to produce electricity from the gas is economically infeasible.
- (12) If Baytex's request is not granted, taxes and royalties must be paid on flared gas which will increase operating costs, raise the economic limit and cause premature abandonment of the well; or the well must be connected to a gas pipeline or an electrical generator at an economic loss which would also cause premature abandonment, or flaring must cease and the well must be

Case No. 16429 Order No. 18695

"capped," resulting in the loss of oil production and the loss of the benefits of that production by all owners of interest in the well and the State of North Dakota.

- (13) Considering the amount of surplus gas being produced by the well, the amount of estimated recoverable reserves from the well, and the cost to connect the well to a gas pipeline, it is not economic at this time to connect the well to a gas gathering facility or an electrical generator.
- (14) Baytex has entered into a contract with a gas gatherer that plans to install a new 270-mile gas gathering system in Divide County that should be operational in 2013. The Commission notes the well was connected to such gas gathering system in October 2013.
- (15) In order to prevent waste, and protect correlative rights this application should be granted, although limited in duration.

#### IT IS THEREFORE ORDERED:

(1) Baytex Energy USA LTD, its assigns and successors, is hereby allowed to flare surplus casinghead gas produced with crude oil from the Ambrose-Bakken Pool through the well listed below under the exemption provided for under NDCC Section 38-08-06.4:

| File # | Well Name & Number | <u>Location</u>            |
|--------|--------------------|----------------------------|
| 19633  | Hansen 6-7-162-99H | NENE Section 18-T162N-R99W |

(2) This order is effective as of November 14, 2011 and shall remain in full force and effect until November 1, 2013.

Dated this 12th day of May, 2015.

Re: Flaring Surplus Gas – Alternatives

Production in North Dakota has increased significantly over the past several years and nearly 500,000 barrels of oil per day is being produced today. Most of this oil is produced from oil reservoirs in the Bakken and Three Forks Formations, although gas is produced in association with the oil. The gas has high BTU content and is rich in liquids.

A significant amount of gas is currently being flared in North Dakota, although many projects have commenced, or will commence in the near future, to capture and process a large portion of the flared gas. The Commission desires that companies requesting flaring exceptions and exemptions consider alternatives to flaring.

The following companies have recently received grants from the North Dakota Oil & Gas Research Council for applications that provide alternatives to flaring such gas. Please contact them and provide your analysis of alternatives to utilize the flared gas as an exhibit in your upcoming case:

# BEFORE THE INDUSTRIAL COMMISSION OF THE STATE OF NORTH DAKOTA

Application of Baytex Energy USA Ltd. for an order pursuant to N.D.A.C. § 43-02-03-88.1 authorizing the flaring of gas from the Hansen 6-7-162-99H well located in the NE/4NE/4 of Section 18, Township 162 North, Range 99 West, Divide County, North Dakota, Ambrose-Bakken Pool, as an exception to the provisions of N.D.C.C. § 38-08-06.4 or such further and additional relief.

|                   | ) ss |
| COUNTY OF DENVER  | )    |

Ward Rikala, being first duly sworn, deposes and states as follows:

1.

That I am the Production Manager for Baytex Energy USA Ltd., 600 17th Street, Suite 1600S, Denver, CO 80202, the applicant in the above-entitled matter.

2.

That I have prepared or had prepared under my control and supervision the attached exhibit.

3.

That to the best of my knowledge and belief, the information contained on the attached exhibit is true and correct.

That attached as Exhibit No. 1 is a plat showing the area around the Hansen 6-7-162-99H well. Shown on the plat is a line depicting the field limits of the Ambrose-Bakken Pool, as defined by the North Dakota Industrial Commission. Also displayed on the plat is the location of the Hansen 6-7-162-99H well located in Section 18, Township 162 North, Range 99 West, Divide County, North Dakota.

5.

That Baytex is currently the operator of the Hansen 6-7-162-99H well, said well having been completed and producing in the Ambrose-Bakken Pool.

6.

That to the best of my information, knowledge, and belief, the Hansen 6-7-162-99H well was completed as a producer on or about <u>January 23, 2011</u>.

7.

That to the best of my knowledge and belief, gas produced from the Hansen 6-7-162-99H well from the Ambrose-Bakken Pool contains minimal H<sub>2</sub>S and is considered sweet gas.

8.

That to the best of my knowledge and belief, the current average daily rate of gas being produced from the Hansen 6-7-162-99H well is approximately 95 MCFD.

9.

That the Hansen 6-7-162-99H well is currently not connected to gas gathering facility.

That to the best of my knowledge, belief and information, the costs associated with the purchase, installation, connection and operation of an electric generator fueled by gas produced from the Hansen 6-7-162-99H well would include a 100KW generator (\$70,000), using approximately 75 MCF/day of gas for fuel, regulator (\$25,000) and 2.5 miles of line/poles (at \$75,000/mile) to connect to the nearest three phase power source would total approximately \$282,500.

11.

That to the best of my knowledge, belief and information, the projected revenue received from sale of electricity produced from the electric generator fueled by gas produced from the Hansen 6-7-162-99H well over a ten (10) year period would total approximately \$150,000.

12.

That requiring the installation and operation of an electric generator fueled by the gas produced from the Hansen 6-7-162-99H well would result in a discounted loss of approximately \$132,500 and would not be economically justifiable.

13.

That to the best of my knowledge and belief, the total amount of gas from the Hansen 6-7-162-99H well not being used for lease use and available for sale is approximately 75 MCFD.

14.

That gas produced in association with oil produced from the Hansen 6-7-162-99H well and not utilized for lease use is currently being flared.

That Baytex estimates the ultimate recoverable gas reserves from the Hansen 6-7-162-99H well to be 170 MMCF of gas, produced over a 30 year well life.

16.

That based upon the sale of gas from other wells connected to the nearest gathering system with sufficient capacity to service the Hansen 6-7-162-99H well, if said well were connected to a gas gathering facility, it is anticipated that said gas would have a value of \$4.93/MCF.

17.

That based upon the aforementioned price of \$4.93/MCF, the gross value of the recoverable gas reserves from the Hansen 6-7-162-99H well is estimated to be \$838,100.

18.

That based upon a royalty rate for the Hansen 6-7-162-99H well of 20% and a gas production tax of \$0.115/MCF, Baytex estimates the royalty and production tax burden for the total (gross) gas produced from the well would be approximately \$167,600 and \$96,400, respectively.

19.

That the total (undiscounted) gross value of the gas reserves of the Hansen 6-7-162-99H well to the working interest owners, after deducting royalty and production taxes, is approximately \$574,100.

20.

That to the best of my knowledge and belief, the Hansen 6-7-162-99H well is located approximately 6.5 miles from the nearest connection point to a gas gathering facility.

That based upon the operations of other operators in and near the area of the Hansen 6-7-162-99H well, the cost associated with the purchase and installation of a two inch pipeline from the well to the nearest connection point to a gas gathering facility is approximately \$100,000 per mile. In this case, the total cost would be approximately \$655,000 inclusive of a gas meter.

22.

That based upon the differential between the gross value of the gas and the cost to install and operate the pipeline required for delivery of gas to a gas gathering system, requiring to connect the Hansen 6-7-162-99H well to a gas gathering system with sufficient capacity would result in an undiscounted loss of approximately \$80,900.

23.

That based upon my knowledge and belief, the lower volumes of gas produced from the Hansen 6-7-162-99H well make it economically infeasible at the present time or in the foreseeable future to connect the Hansen 6-7-162-99H well to a gas gathering facility.

#### BEFORE THE INDUSTRIAL COMMISSION

#### OF THE STATE OF NORTH DAKOTA

CASE NO. 16409

Application of Baytex Energy USA Ltd. for an order pursuant to N.D.A.C. § 43-02-03-88.1 authorizing the flaring of gas from the Hansen 6-7-162-99H well located in the NE/4NE/4 of Section 18, Township 162 North, Range 99 West, Divide County, North Dakota, Ambrose-Bakken Pool, as an exception to the provisions of N.D.C.C. § 38-08-06.4 or such further and additional relief.

## APPLICATION OF BAYTEX ENERGY USA LTD.

Baytex Energy USA Ltd. ("Baytex"), for its application to the North Dakota Industrial Commission ("Commission"), respectfully states as follows:

1.

That Baytex is the owner of an interest in the oil and gas leasehold estate in portions of Section 18, Township 162 North, Range 99 West, Divide County, North Dakota.

2.

That such lands are currently within an area defined by the Commission as the field boundaries for the Ambrose-Bakken Pool.

3.

That Baytex is currently the operator of the Hansen 6-7-162-99H well located in the Northeast Quarter of the Northeast Quarter (NE/4NE/4) of Section 18, completed as a producing well in the Ambrose-Bakken Pool.

4.

That the Hansen 6-7-162-99H well is currently not connected to a gas gathering facility.

That because of the location of the well and low volumes of gas produced from the Hansen 6-7-162-99H well, it is economically infeasible to connect said well to a gas gathering facility at the present time, or in the foreseeable future.

6.

That gas produced in association with oil produced from the Hansen 6-7-162-99H well is currently being flared.

7.

That Section 38-08-06.4 of the North Dakota Century Code prohibits the flaring of gas produced in association with crude oil under certain circumstances but authorizes the Commission, upon application, to grant an exception to the flaring prohibition upon a showing that connection of the well to a gas gathering facility is economically infeasible at the time of the application or in the foreseeable future or that a market for the gas is not available.

8.

That in the opinion of the applicant, it is economically infeasible at the present time or in the foreseeable future to connect the Hansen 6-7-162-99H well to a gas gathering facility and/or there is no market for the gas. As such, applicant should be allowed to continue to flare such gas as an exception to Section 38-08-06.4 of the North Dakota Century Code should be granted for said well.

## WHEREFORE, Baytex requests the following:

(a) That this matter be set for the regularly scheduled December 2011 hearings of the Commission;

- (b) That pursuant to Section 43-02-03-88.2 of the North Dakota Administrative Code, Baytex's witnesses in this matter be allowed to participate by telephonic means; and
- (c) That thereafter the Commission issue its order granting the relief requested and such other and further relief as the Commission may deem appropriate.

**DATED** this 14th day of November, 2011.
