

Note, the holes circled in red, were holes that were moved during drilling operations. When the surveyors reset these holes, they did show on the final point plot where they were moved to, but did not identify the holes with a number. I tried to label them best I could, hoping they are correct.

Tom

RE: Seismic Completion Reports
970072 – Beiceigel Creek 3D
#970073 – Cliffside 3D
#970074 – Roughrider 3D
#970077 – Roosevelt Creek 3D

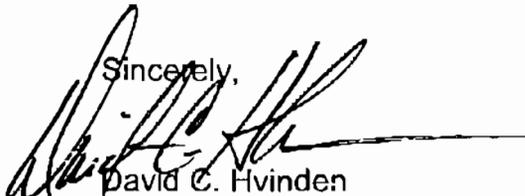

Dear Mr. Brooks:

Please be advised that we have not received Seismic Completion Reports for the above captioned programs. We have enclosed for your convenience, blank copies of these forms.

Pursuant to section 43-02-12-06 NDAC, geophysical contractors are required to submit these reports within 30 days of completion of operations. For your information, we have received the required post-plot maps and a copy of the holeplugging records, so the only forms we currently lack are the enclosed completed reports.

Should you have any questions regarding this matter, feel free to call me at your earliest convenience.

Sincerely,

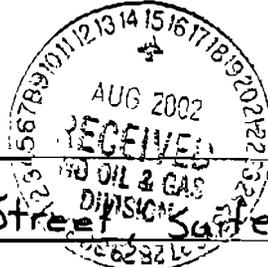

David C. Hvinden
Geophysical Regulation Supervisor
