PECAN PIPELINE ANNOUNCES PRAIRIE ROSE PIPELINE PLACED IN OPERATION

FOR IMMEDIATE RELEASE: February 4, 2010

STANLEY, North Dakota - Pecan Pipeline (North Dakota), Inc. (Pecan North Dakota) today commenced operation of its 12-inch diameter, 76-mile Prairie Rose Pipeline, which interconnects with the Alliance Pipeline system near Bantry, North Dakota. Dense phase rich natural gas from the North Dakota Bakken oil play is being transported to a natural gas liquids processing plant near Chicago, Illinois. Initial deliveries are expected to reach 40 million cubic feet per day (MMcfd) by year-end 2010. The estimated capacity of the pipeline exceeds 100 MMcfd.

Pecan North Dakota is a wholly owned subsidiary of EOG Resources, Inc. (EOG) and provides intrastate natural gas gathering services to complement EOG's exploration programs and production growth.
